¹ - Records for pre-2021 students in Workday are limited to data required to produce an academic transcript.

² - Before Summer 2026 combining data from (A) & (B) into a single report will require running (A) & (B) reports individually and then manually combining results using a tool like Excel.

³ - Combining SIS and Workday Student Data will be a manual process until Summer 2026.

⁴ - Beginning in Summer 2025 users can manually combine Workday Student Data in the warehouse with other student data. In 2026 Workday Student data in the warehouse will be connected to Slate Admissions and SIS. Work beyond 2026 will add connections to other data like PowerFacts, Canvas, etc.
