

Mentoring junior faculty

in cardiovascular disease comorbidities, genetics, epidemiology, implementation science, global health, & data science/bioinformatics

All-Expenses-Paid Program for Inclusion and Diversity Among Individuals Engaged in Health-Related Research (PRIDE)

Washington University School of Medicine offers an all-expense paid summer institute program to increase diversity in cardiovascular disease comorbidities, genetics, epidemiology, implementation science, global health, data science / bioinformatics. The **PRIDE CVD-CGE** program is open to junior faculty and transitioning postdoctoral scientists from diverse backgrounds, including those from groups that are underrepresented in the biomedical sciences (see e.g., [NOT-OD-20-031](#)), to further develop their research skills and knowledge to become competitive NIH grants applicants and scientists in heart, lung, blood, and sleep (HLBS) research.

Apply for the Summer 2024 Cohort

- Establish partnerships between mentors and mentees based on mutual research interests.
- Engage in training and workshops on various topics related to **cardiovascular disease comorbidities, genetics, epidemiology, implementation science, global health, data science and bioinformatics.**
- Participate in grant-writing and mock study section review sessions conducted by National Heart, Lung, and Blood Institute (NHLBI) staff from NIH and PRIDE faculty.
- Compete for Small Research Project (SRP) funding to generate preliminary data for subsequent NHLBI grant applications.
- Develop the practical skills needed to apply for research grants and to promote a sustainable independent research program
