Department of Energy, Environmental and Chemical Engineering

### **Postdoctoral position at Washington University in St. Louis**

Washington University in St. Louis invites applications for a postdoctoral scholar to join Prof. Jian Wang's group. The research will focus on new particle formation and particle growth, with an emphasis on field observations and data analysis.

The successful candidate is expected to have a background in aerosol research and strong experimental skills. Demonstrated commitment to publication of results and strong verbal and written communication skills are necessary. Previous experience with field deployments, measurements of nanoparticle size distributions, and demonstrated skills in complex data analysis and instrument development are highly desirable.

Review of applications begins immediately. Applications will be accepted until the position is filled. The initial appointment will be one year, with the expectation of annual renewal for two additional years contingent upon satisfactory performance.

To apply, please send a single pdf file that includes a cover letter describing your research interest, your C.V., 2-3 first author paper reprints, and contact information for three reference letter writers to Prof. Jian Wang ([jian@wustl.edu](mailto:jian@wustl.edu)).
