

Do you have Tinnitus (Ringing in the Ears)?

A Research Study Seeks Participants!

The purpose of this study is to test new and advanced ways to analyze real-time symptoms of tinnitus. You might qualify to participate if you meet the following criteria.

- 1. Participants must be 20 to 70 years old with tinnitus**
- 2. Participants must have access to a smartphone**
- 3. Participants must have had tinnitus symptoms for at least 6 months**

This study will last about 16 weeks. There will be approximately 10 study visits varying in duration including group cognitive behavioral therapy. Compensation will be provided for time and effort (up to \$300.00).
