

## Yamile Molina, PhD, MPH

*Assistant Professor, School of Public Health  
Faculty Affiliate, Center for Research on Women and Gender and the Cancer Center  
University of Illinois at Chicago*

### “Social networks and cancer disparities: Considerations in theory and measurement”

**Wednesday, August 22  
12:00 - 1:00 p.m., Doll & Hill Room  
Taylor Avenue Building**

Dr. Molina will discuss how social network methods may enable us to measure more comprehensively 1) social factors' roles in cancer disparities; and 2) incidental/spillover effects of cancer health interventions throughout participants' social networks. Three examples of current cancer disparities studies that use social network data will be provided that focus on rural cancer survivors and caregivers; African American breast cancer survivors; and Latinas who are non-adherent to breast cancer screening guidelines.

Please feel free to bring your lunch to this presentation.

Co-sponsored by the Institute for Public Health, the Department of Obstetrics and Gynecology, the Department of Medicine, and the Department of Anesthesiology
