
MODEL 1: TV Cart with Web camera and Computer

This model can be used as a primary system for various spaces or as secondary system to some in-room projection AV's.

Example: Use the TV cart to connect with on-line students via Zoom. On-ground students will see on-line students on the TV Cart and on-line students see on-ground students via web-camera. This can be used in smaller spaces such as shops, critique spaces or studios environments.

TV Cart with Web camera and Computer

- 1 Television
- 2 Web camera
- 3 Speakers (on television)
- 4 Computer*
- 5 Mouse, keyboard an remote control
- 6 HDMI connection if using own computer

***Note:** Not all TV Carts will have an on-board computer. As such, use the HDMI cable to connect your own computer. Sam Fox IT only provides connection adapters to faculty. If you do not have one submit a help desk ticket.

Technology Set Up

- A: Turn on TV and computer
- B: Log into Zoom and test sound and audio through the Zoom's settings then, connect to your meeting link.
- D: Ask students in room to mute sound and mic on laptops or other electronic devices if they are also connecting to the Zoom while in-person.

Reminders

- The TV Cart needs power to run all items on the cart.
- If you need to connect your computer to the TV that already has a computer on it, you must use the remote to change settings to HDMI 2.
- Turn off system when done.
- Disinfect surfaces you have touched and technology at end of each class with cleaning supplies in the room.
