## MODEL 2: TV Cart with Web camera and User Computer

For this model users must connect their own computer to the TV and the Web camera. This systems can be used as a secondary system to some in-room projection AV's or as a stand alone system in a variety of spaces.

**Example:** Use the TV cart to connect with on-line students via Zoom. On-ground students will see on-line students on the TV Cart and on-line students see on-ground students via web-camera. This can be used in smaller spaces such as shops, hallway critique spaces or studios environments.

TV Cart with Web camera

- 1 Television
- 2 Web camera
- 3 Web camera cable
- 4 Speakers (on television)
- 5 HDMI Cable for computer\*
- 6 Surface for your computer
- 7 TV Remote control

**\*Note:** Sam Fox IT only provides connection adapters to faculty. If you do not have one submit a help desk ticket.

### Technology Set Up

- A: Connect your computer and turn TV on.
- B: Log into Zoom and test sound and audio through Zoom's settings then, connect to your meeting link.
- D: Ask students in room to mute sound and mic on laptops or other electronic devices if they are also connecting to the Zoom while in-person.
