

MODEL 7: Wall TV with Web camera and User Computer

In this model you can connect to the TV through VIA and connect the TV Web camera to your computer if needed.

Example: Use the TV (with VIA) to see visuals large for on-ground students while sharing via Zoom to on-line students. Use web-camera so that on-line students can see on-ground students in the room. Note that audio will need to come from your computer and not the TV. Depending on the space set up you may need to position yourself accordingly so the web camera can see all in the room.

Visual of room and various components

- 1 Television
- 2 Web camera
- 3 Speakers (on television)
- 4 Control panel
- 5 Cable for web camera (connect to user computer)*

***Note:** Sam Fox IT only provides connection adapters to faculty. If you do not have one submit a help desk ticket.

Technology Set Up

- A: Turn on the TV and VIA by selecting VIA on the control panel.
- B: Connect the web camera to your computer if needed.
- C: Follow the instructions at [this link](#), or from the TV screen to connect with VIA.
- D: If using Zoom, test sound and audio through Zoom's settings then, connect to your meeting link.
- E: Ask students in room to mute sound and mic on laptops or other electronic devices if they are also connecting to the Zoom while in-person.

Reminders

- Turn off system when done.
- Disinfect surfaces you have touched and tech at end of each class with cleaning supplies in the room.

VIA Connect Pro - Danforth

1) Device must be connected to one of the following WashU wireless SSIDs: wustl-2.0, WUUSM-secure, or wustl-encrypted-2.0. *wustl-guest-2.0 does not connect to the VIA.

2) **First-time users - Installing VIA software**
Laptop
- Open web browser and enter "Room Name" IP address.
- Install and launch VIA software.
Mobile Device
- Search for VIA app or scan QR code.
- Install and launch VIA software.

3) **Returning users**
Follow on-screen instructions. Enter IP address (shown on bottom left of VIA splash screen) into the "Room Name" field within the VIA portal. Type in a "Nick Name" and login.

4) Enter room "Code" (found on bottom left of splash screen underneath "Room Name").

*Codes regenerate between sessions for security purposes.

5) Once connected the presentation menu will appear. Click on the Present icon to begin presenting.

6) **Must disconnect device at end of each session by clicking on the Stop Presenting icon.** Skipping this step will prevent the next user from being able to connect to the VIA.

VIA instruction are posted in rooms that have it and at [this link](#). To learn how to install the VIA system follow [this link](#).
