
Tablet & Phone Stand

These items will be placed in rooms designated to have such need.

Example: In some situation faculty may want to use a stand to hold a tablet or a phone. This might be for demonstration or talking with students on-line.

While there is no product that can hold multiple table sizes and phone sizes, this system is a hack that combines both into one roving system. The total height of the system is about 4-5 feet depending on how you position the movable arms.

- 1 Stand with rollers
- 2 Tablet holder (users bring own tablet)
- 3 Phone holder (users bring own phone)
- 4 Movable arms
