1. Is a computer/software required as an incoming first-year student?

No. However, we strongly encourage you to acquire a computer and software at the start of your first year.

Instruction in digital technologies will begin in the second week of your first-year architecture courses. In the fall semester, you will primarily use software from the Adobe® Creative Cloud®, Rhino and Microsoft Office Suite.

We encourage you to plan ahead to make sure the system is working properly, and all software has been loaded before classes begin in the fall.

Students can choose to rely on the shared computing facilities available through the University; however, the Sam Fox School does not have extensive facilities for all students.

2. Which computer systems and platforms are recommended for incoming first-year students?

The Sam Fox School recommends a PC. Based on industry standards, our architecture curriculum uses software that is designed primarily for a Windows operating system.

3. Can I buy a computer/software when I arrive at School?

Yes. Washington University has a campus store that sells computer systems that meet or exceed our minimum recommended specifications; more information can be found at www.wubookstore.com. In addition, there are local stores that are readily accessible by campus shuttles or city bus service. All software can be purchased and downloaded via the Internet.

4. What should I do if I can’t afford to purchase a computer/software at this time?

We understand that some students may need assistance in purchasing a computer. If you would like to learn more about your options, we encourage you to speak with a counselor in Student Financial Services (SFS). Counselors can be reached at 314.935.5900, 888.547.6670, or financial@wustl.edu.

5. Can I use a computer/software I already have?

Yes, but you will need to make sure that the computer you have matches as closely as possible the attributes of the computers we recommend (see Item 10). You are also encouraged to acquire the recommended software listed in Item 12.

6. Will I receive any training from the Sam Fox School?

There will be workshops at the start of the academic year that will include:
   a. Network connections for Internet and printing
   b. Best practices for computer, software use, maintenance, backups, and installation
   c. Tours of resources throughout the facilities

In addition, our Information Technology team is available for one-on-one consultation by appointment. Students may also contact WashU’s Student Technology Services team, located near the residential halls, for support. Software training will be provided in various courses. For more information visit insidesamfox.wustl.edu.

7. What is the recommended hardware?

The Sam Fox School recommends either a PC laptop with a Windows operating system. Please note M1 M2, or M3 chip will not run Windows OS; The minimum specifications for both types of computers are listed below; these are the specifications as of Spring 2024:

- Intel or AMD Processor 2.8 GHz (this is the minimum)
- RAM 16 GB (more if possible)
- HDD 500 GB hard drive (or higher)
- Video card with 2 GB of dedicated RAM (or higher)
- The Latest Windows “Professional” Operating system
- Screen resolution above 1280 x 800

The School also highly recommends:
   - A minimum of a 15-inch display
   - External hard drive of 1 TB, for secure storage of backup files (the school provides unlimited Box storage also)
   - Computer lock for use in studios
   - Damage warranty provided by manufacturer

Optional Vendors:
   Dell Vendor: dell.com/WUSTL

8. Will a computer last for all four years at the Sam Fox School?

Due to advances in technology and subsequent upgrades in software, you may need to acquire a new, more powerful computer in your junior or senior year in order to complete your area of study.

9. Are there recommended vendors we should contact?

Optional vendors that provide educational discounts are listed with each item of hardware and software (Items 10 and 12). You may also purchase the required software at samfox.onthehub.com.

10. What is the recommended software?

Adobe® Creative Cloud®

We now have a unique Adobe price for $56.50 per year that is billed to your WU student account and a license emailed to you in August of each year. This is a required cost through the University.

(includes the following)

11. What recommendations do you have for a Windows operating system for an Apple computer?

Current Apple laptops don’t support native installs of Windows operating systems on their computers.

12. What is the recommended software?

Adobe® Creative Cloud®

We now have a unique Adobe price for $56.50 per year that is billed to your WU student account and a license emailed to you in August of each year. This is a required cost through the University.

(includes the following)
