Introductory Process

Introduce yourself and the survey

We are the members of a survey team working with the Minister of Public Health and the Minister of Martyrs and Disabled. (Optional)

This survey looks at the situation of Persons with Disability (PwDs) in Afghanistan.

We would like to speak with the head of household or the person who knows the most about the persons in the household.

To the head of household and again to the person with disability surveyed:

We would like to gather information about persons with disability whatever the cause of disability or the type of disability might be. Your participation in this survey and your answers will help the government and the NGOs to better define their programmes in all fields (health, education, employment, defense of rights).

We would like to speak to you and to the persons with disability living in the house and some other members too.

We are conducting this survey in many households of Afghanistan.

The survey will take approximately 60-90 minutes to complete. You will not get anything, such as money or food, for being in this survey, but the information you give us will help define programmes for persons with disability. Your answers are confidential and will not be shared with any other person.

The records of this study will be private. Only the people who are doing the study will be able to look at the answers that you give to the questions. Whether you choose to be in the study is up to you.

There will be no effect on your family. Only those people who are doing the study will know that you are in the study. They will not tell others in the village, district or province.

You have the right not to be in the study or to stop at any time.

If you do not understand a question, please ask me to explain it to you. You are free to stop at any time during the interview. If a question makes you uncomfortable, we will skip the question and go to the next question.

Do you have any questions before we start?

Are you willing to be a part of this study?

2 Screening Questions for Identification of Different Types of Disability

N.B.: These questions are asked to the head of the household for all the members of the family. Everytime that he/she answers positively, then we ask the identity of the member who has that particular difficulty, write it down and proceed to the next question for the entire family. All the questions are thus asked to the chief, for all members of the household. It is important to say that we do include the chief/head in these questions.
