the Panda Bears

April 2, 2016

Force and Motion

The Pandas participated in a few activities of Force and Motion. We started the week with marble painting in a box. The children rocked the box back and forth creating streaks of paint across their paper. The Pandas made windsocks with construction paper, crepe paper and dot paints. The windsocks hang in our room and make the room festive. Lastly, we created art with straws and watercolors. The children used eye drops to apply the watercolors on paper. The children blew into their straws to move the paint around.

We look forward to talking with you!

Plants and Flowers

During the past week, the Pandas have made flowers with glue and tissue paper, flowers by painting with forks and gluing popsicle sticks as stem, and painting wooden pieces for the petals and gluing onto a long wooden piece for the stem. The children enjoyed the colors of the rainbow and painted them onto a half of a paper plate. Our bulletin board is beautiful with these spring creations.

Spring

The Pandas are thoroughly enjoying spending time outside. Marsha and a few children have worked in the garden. Digging, planting, and mulching are making the garden look great! The children found worms for the soil as well. The plants look beautiful decorated with pipe cleaners, beads, and glitter.

During an unseasonably warm day, the water trough was enjoyed by the children. The water was used on the new plants, painting with brushes, and filling and dumping out buckets.

Bubble blowing was a popular activity outside. The children enjoyed blowing bubbles, catching and then popping them.

The Pandas are working hard on the monkey bars. Hanging on the bars for as long as possible produces smiles, laughter, and celebration.

We would like to welcome Elijah, and his family to the Panda Bear class! He has been a wonderful addition to the group!

Thank you,

Marsha and Chona
