WASHINGTON UNIVERSITY NURSERY SCHOOL

Spring has Sprung!

Although most of April felt more like January, Spring has finally sprung! Signs of new life are bursting all around WUNS. From blooming flowers, to baby chicks, to tiny caterpillars making a chrysalis before our eyes. So many exciting opportunities to observe the many wonders of nature.

Science with Miss Liz:

In Science, Miss Liz taught us the difference between moths and butterflies. Using a puppet, she demonstrated the metamorphosis that happens from egg to caterpillar to chrysalis to butterfly. We have prepared a home for our butterflies and can't wait to meet them this week!

CHICKS!

Last week, WUNS was proud to announce the birth of 11 newborn chicks! Our fluffy, feathered friends have been peeping ever since. We had some special opportunities to observe the chicks and even hold and pet them. They have all found forever homes! We will miss them!

Looking Ahead...

"Muffins with Moms"

Friday, May 4 at 10:45 - 11:45 a.m.

A morning to celebrate mothers, grandmothers and special guests! We will share songs, a yummy snack, and a special gift that we have been working hard to create for our wonderful moms!
