

TEDDY BEAR NEWS

WASHINGTON UNIVERSITY NURSERY SCHOOL

COLORS

We talked all about colors! We made a color wheel of the primary colors: red, blue and yellow. We glued on different colored objects to their matching color. We mixed colored paints together to see what happens. Our sensory table is a favorite area to explore colored water with a variety of objects that sink and float.

Our Color Books:

Bear Sees Colors

Pete the Cat: I Love my White Shoes

A Color of his Own

SNACK TIME

Snack time is a part of our daily routine. We are learning to patiently wait for everyone to be seated and then eat our snack. "Please" & "Thank You" help us remember to use our manners. Teddy Bears are able to wipe up spills, politely ask for more water and clean up after themselves. We are so proud of our Teddy Bears!!!

EXPLORING AUTUMN

Our class has continued to explore fall by playing with leaves on our playground, painting them, and pressing painting leaves on paper. We even experienced snow on top of our leaves!

***Math skills:** matching leaves, looking at leaf patterns, counting leaves, and measuring and comparing leaf sizes

***Building vocabulary & reading skills:** talking about leaf patterns and colors

***Fine Motor Skills:** painting & drawing leaves

***Gross Motor Skills:** raking, chasing and jumping in leaves

***Exploring senses:** smelling, seeing, listening, and touching leaves & trees

Looking Ahead...

Annual Nursery School Note Card Sale going on now!

November 22 @ 10:45 - Day for dads, Grandfathers & Special Friends

November 27-29: NO SCHOOL
Thanksgiving Holiday

We are truly thankful for our Teddy Bears and their families! You make WUNS a wonderful place! Thank you for sharing your precious children with us.

*Love,
Chona & Katie*
