EARTH DAY

Earth Day is here! It takes place each year on April 22. The first Earth Day was 50 years ago in 1970. People around the world celebrate by doing things that help protect the planet. What things can you and your family do to make the Earth a better place? The pictures on this page show the Teddy Bears enjoying our outdoor playground and listening and learning from Ms Becky, our "Nature on the Move" teacher.

RECYCLE

Recycling is important to preserve the environment and to leave the planet in a better condition than we found it.

Recycling is how we take trash and transform it into new products.

Ideas to involve kids in recycling:

-Set up a recycling bin at your home & show kids how to use it.

-Not sure what to paint on or tired of paper? Paint on something from nature that was going into your yard waste: branches, twigs, acorns, rocks, leaves, etc.

-Transform cardboard boxes and tubes into sculptures

-Decorate glass jars and bottles with tissue paper and glue to make a beautiful vase, pencil/marker container, or utensil holder

-Turn that old T-shirt into a rag or face mask.
