# TEDDY BEAR NEWS

WASHINGTON UNIVERSITY NURSERY SCHOOL

## OUR 5 SENSES

Last week, we learned all about our 5 senses: seeing, smelling, hearing, touching, and tasting. We listened to animal sounds and then guessed what animal made that particular sound. Miss Chona made amazing blue slime that we could stretch, squeeze, roll, twist, and press to engage our sense of touch. A "Touch Collage" included items that were: soft, smooth, bumpy, rough, and furry. We also painted with "sand paint" to add a different feel to our paintings. We baked chocolate chip cookies which we could see, smell, feel, and taste! Our 5 senses are sensational!

## PARACHUTE FUN IN MUSIC

Noah uses his sense of touch with a feather!

# DINOSAURS

The Teddy Bears LOVE dinosaurs! We had a roaring good time learning about these interesting extinct creatures. We turned a paper plate into a brontosaurus with green paint. Using play dinosaurs, we stamped "dino-footprints" at the art table. Some dinosaurs had very sharp teeth to eat meat. We created "dinosaur tooth" necklaces made out of salt dough (salt, flour, & warm water). We stamp painted a huge T-Rex footprint...wow is it big! Dinosaurs came in all shapes and sizes. They lived underwater, on land and some even flew. The Stegosaurus was about the size of a bus and had two rows of plates on its back. We recreated these interesting creatures using play-dough and noodles. It was a fun week of DINOSAUR fun!

## Looking Ahead...

-This week we are learning about opposites!

-3/16-20/20 SPRING BREAK 

 Chona & Katie
