Fire Safety

~This week we talked about Fire Safety and the job of Fire Fighters. Using finger paints we created flames of red, yellow and orange. Finger painting strengthens our finger and hand muscles. It provides an excellent tactile experience and boosts creativity as we mix colors together and swirl them around our papers. A fire station, fire trucks of all sizes, and fire fighter dress-ups provided props for exciting pretend play.

On Friday the Clayton Fire Department visited WUNS!

~The Teddy Bears enjoyed meeting Sparky and the fire fighters! Charlie demonstrated how to "Stop, Drop, & Roll." They talked to us about calling 911 and creating a safe meeting space if there is a fire. Due to the rain, we were not able to view their fire truck. Remember: "Don't Hide, Go Outside!"

Fall Leaves...

~As the weather cools, the Teddy Bears are noticing all sorts of changes. Leaves of changing colors have begun to gather on our playground. We created beautiful leaves for our BIG classroom tree using both tissue paper and paint.

Sensory Play

~Each week the Teddy Bears have endless opportunities to explore sensory experiences with water, sand, paint, baking ingredients, play-dough, and so much more. These experiences literally enhance every part of children's development.
