

Assessing for COVID-19 in children with symptoms of illness & no known exposure: Consider SARS-CoV-2 for the patients with a single high risk symptom or 2 or more low risk symptoms (note: symptoms grouped together are considered a single symptom).

*High risk symptom based on specificity, seriousness, or risk for spread of SARS-CoV-2. **Clinicians may elect to test with one low risk symptom due to high clinical suspicion and/or testing readily available.**

High Risk*	Low Risk
<input type="checkbox"/> Cough <input type="checkbox"/> Shortness of breath or difficulty breathing <input type="checkbox"/> New loss of taste or smell	<input type="checkbox"/> Fever/chills/rigor <input type="checkbox"/> Headache <input type="checkbox"/> Myalgias <input type="checkbox"/> Sore throat <input type="checkbox"/> Runny nose/congestion <input type="checkbox"/> Nausea/vomiting/diarrhea

**Group A strep testing should not be done in children <3 or in children with significant respiratory symptoms
