

**Assessing for COVID-19 in children: Consider exposure and SARS-CoV-2 for the patients with a single high risk symptom or 2 or more low risk symptoms (note: symptoms grouped together are considered a single symptom complex).**

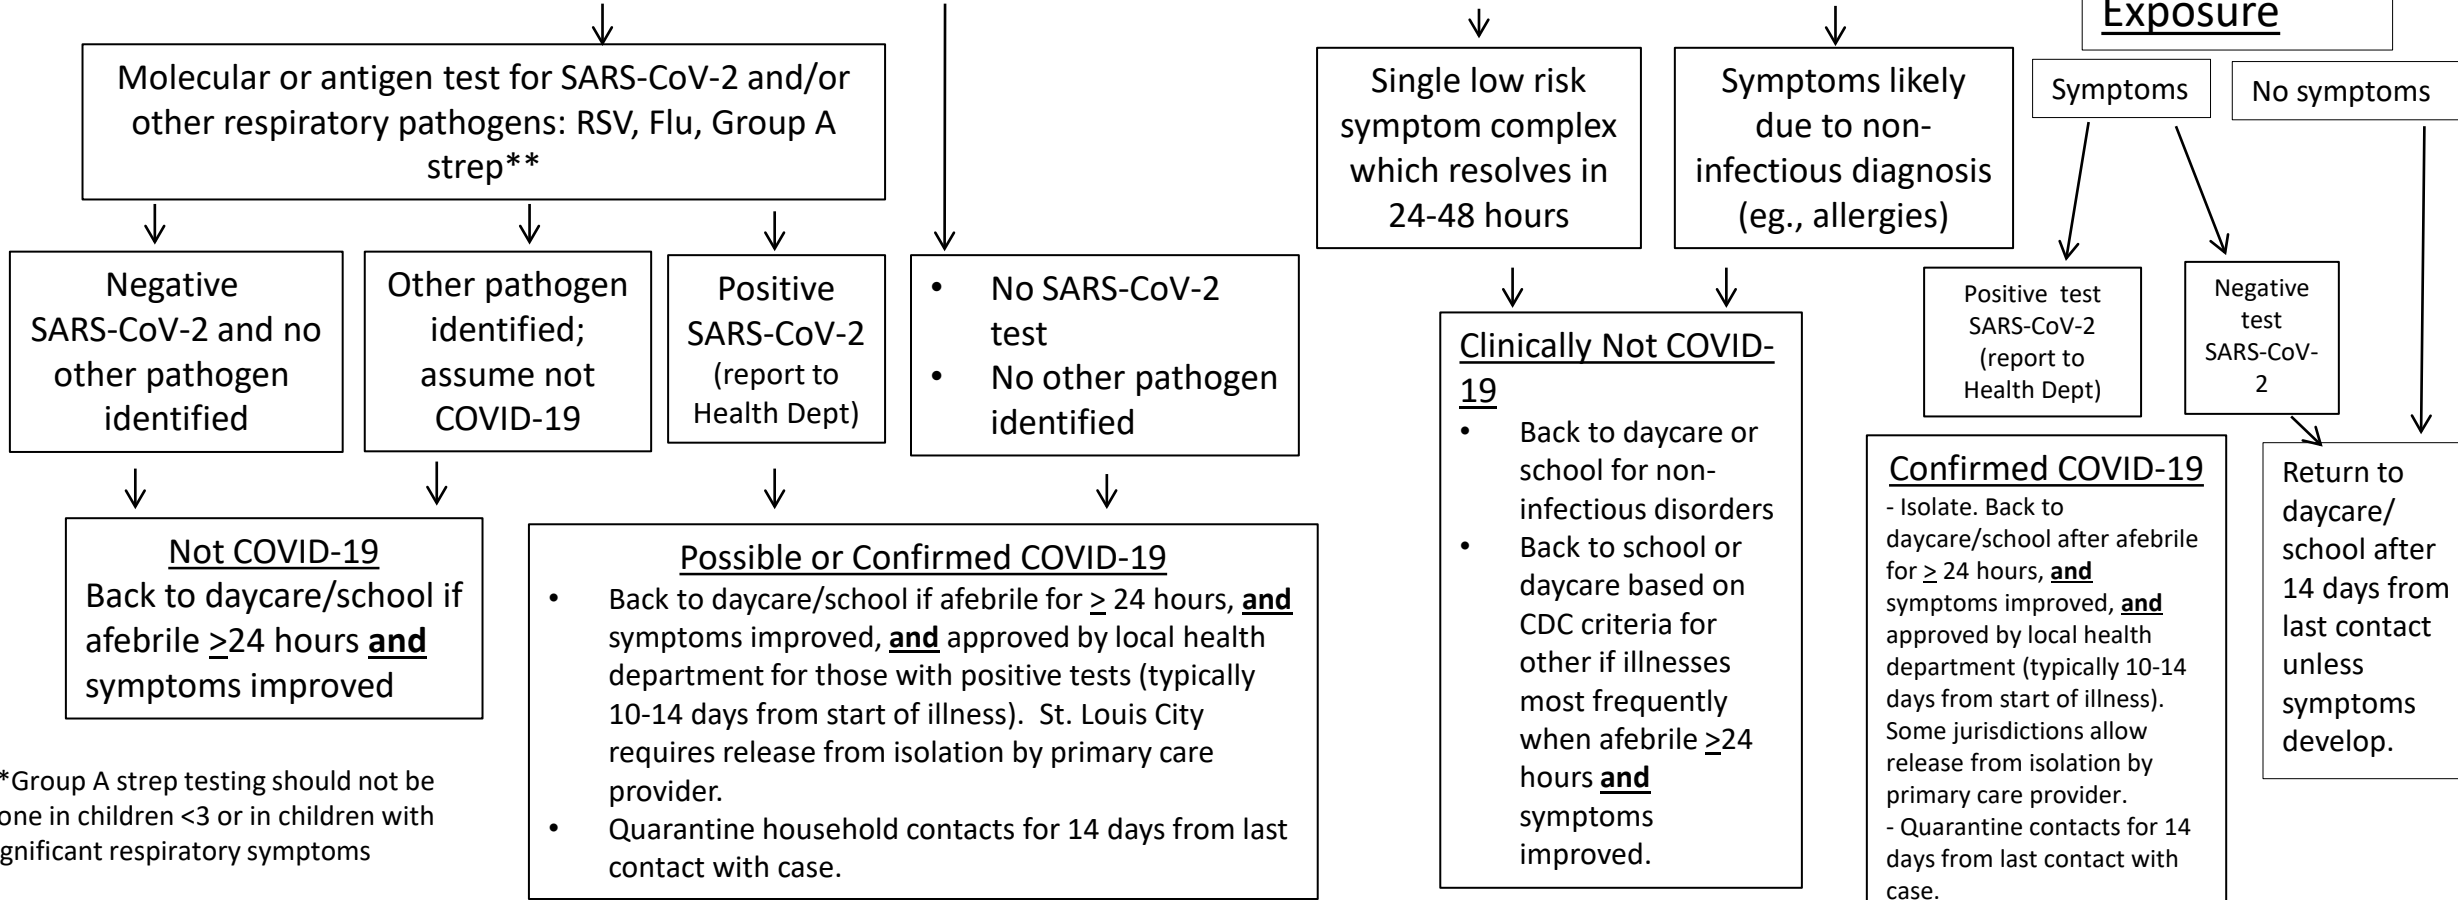

\*High risk symptom based on specificity, seriousness, or risk for spread of SARS-CoV-2. Clinicians may elect to test with one low risk symptom due to high clinical suspicion and/or testing readily available.

High Risk*	Low Risk
<input type="checkbox"/> Cough <input type="checkbox"/> Shortness of breath or difficulty breathing <input type="checkbox"/> New loss of taste or smell	<input type="checkbox"/> Fever/chills/rigor <input type="checkbox"/> Headache <input type="checkbox"/> Myalgias <input type="checkbox"/> Sore throat <input type="checkbox"/> Runny nose/congestion <input type="checkbox"/> Nausea/vomiting/diarrhea

**COVID-Like Illness & No Exposure**

**COVID Unlikely & No Exposure**

**COVID Exposure**

Prepared by WU PAARC, 06/18/2020 rev 7/8/2020 rev 7/20/2020

\*\*Group A strep testing should not be done in children <3 or in children with significant respiratory symptoms
