

NEW MULTIDISCIPLINARY GRADUATE COURSE TO BE OFFERED AUTUMN 2015

Phytochemicals in Human Health: Crops to the Clinic

FDSCTE / HCS / BSGP / HUMNNTR / PUBHEPI 7830

Students will learn from OSU faculty experts from several disciplines and departments across campus

Topics that will be covered:

- Function and control of phytochemicals in plants.
- Impact of phytochemicals from plants, food ingredients, and food products on human health.
- Strategies when designing studies involving 'crops to the clinic' research, including the delivery of foods and phytochemicals.
- Policy and sustainability considerations when developing plant-based foods with enhanced health benefits.

Meeting time: Mondays 12:40-3:35 PM

Meeting location: Both Columbus and Wooster campus (linked via IP video)
