# Livestock Mortality Composting Workshop

Animal agriculture is faced today with discovering innovative ways to dispose of livestock mortality. This need has been brought on by the disappearance of rendering plants, concerns over burial and ground water pollution, and the economic cost and other issues related to incineration. Composting of dead animals is one option that is now available and it needs to be done correctly. This program is intended to provide livestock producers with mortality composting certification.

**Presenters:**

Glen Arnold, Field Specialist, Manure Nutrient Management,  
OSU Extension

Paige Kelly, Sustainability & Environmental Manager,  
Ohio Poultry Association

**THE OHIO STATE  
UNIVERSITY**

EXTENSION
