

# ODPA FALL MEETINGS & FARM TOURS

Blue-green algae continues to be in the news, and "agricultural pollution" is being cited as a significant contributor to the problem. As a result, Senate Bill 150 has been introduced and could potentially *require* farmers to have nutrient management plans for both manure and fertilizer application.

**As a dairy farmer, you need to know what's at stake and what ODPA is doing on your behalf to provide input on this critical legislation and agricultural pollution issue. ODPA wants to hear from you!**

## What's on the Agenda:

**Meeting will be held from 10:00 AM-12:00 PM followed by lunch and tour**  
**Registration begins at 9:30 AM with coffee and donuts — compliments of our Sponsors**

- ✓ Hear first-hand how the State agencies are working together to address the **blue-green algae crisis** and how **SB 150 may affect Ohio agriculture**
