

# Ohio Crop Weather

## Harvest and Field Work Continues

Dry, cool weather helped **corn** harvest and field work continue at a slow pace, according to Cheryl Turner, Ohio State Statistician for the USDA's National Agricultural Statistics Service. There were 3.8 days available for field work for the week ending November 26, 2017. Producers were able to enter fields when the soil dried enough late in the week or when the temperature fell below freezing. Average grain moisture for corn harvested was 19 percent. **Winter wheat** seedlings are almost fully emerged and the condition remains 88 percent good to excellent.

This issue concludes the weekly reports for the 2017 season. We would like to express our appreciation for the work done by our many weekly reporters. Your time and effort made this publication possible and ensured an up-to date and accurate representation of Ohio agriculture. Anticipated release dates for Monthly Crop Weather are:

**Tuesday, January 2, 2018**

**Monday, January 29, 2018**

**Monday, February 26, 2018**

**Monday, March 26, 2018**

Reports will be issued monthly during the winter season. Weekly reports will resume in April 2018.

### Soil Moisture: Week Ending 11/26/17

Item	Very short	Short	Adequate	Surplus
	(percent)	(percent)	(percent)	(percent)
Topsoil moisture .....	0	0	65	35
Subsoil moisture .....	0	2	68	30

### Crop Progress : Week Ending 11/26/17

Crop/Activity	Percent Completed			
	This week	Last week	Last year	5 Year average
Days Suitable for Fieldwork ..	3.8	2.8	NA	NA
Corn Harvested for Grain .....	87	79	98	96
Winter Wheat Emerged .....	96	94	95	96

### Crop Condition: Week Ending 11/26/17

Crop	Very poor	Poor	Fair	Good	Excellent
	(percent)	(percent)	(percent)	(percent)	(percent)
Winter Wheat.....	0	1	11	63	25

### Special Note:

NASS will be conducting our End-of-Season surveys on crops and hogs during the first two weeks in December. As farmers wrap up the 2017 growing season, NASS will conduct a series of surveys to determine final State and county acreage, yield, and production for crops, as well as grain storage capacity and grain stocks on hand. We are also asking pork producers about this year's farrowings, pig crop and current inventory. County level acreage, yield and production estimates are used by the Risk Management Agency to administer its crop insurance programs. All participating farmers should respond. Your information is important and helps ensure accurate results.
