FOR IMMEDIATE RELEASE: February 1, 2017

OSU Agronomy Webinars Planned

Ohio State University Extension announces two webinars available to producers, Certified Crop Advisors and industry offered in February 2017. The Corn, Soybean and Wheat Connection series is scheduled for broadcast across Ohio on both February 21 and 28. These webinars will focus on issues and updates in grain crop production. Each webinar will begin at 7:00 p.m. and can be viewed from your home or office computer with an internet connection.

The February 21 webinar topic will be improving soil health and utilizing cover crops by Dr. Steve Culman and Dr. Ryan Haden, both from Ohio Agricultural Research and Development Center in Wooster. The webinar on February 28 will give producers management strategies to increase soybean yield and provide updates on insect trends from 2016. This session will be taught by Dr. Laura Lindsey, State Soybean & Small Grains Specialist, OSU Extension and Dr. Kelley Tilmon, State Field Crops Entomology Specialist, OSU Extension.

In order to view these webinars, you must pre-register the week before each session to receive login information. You may register online at go.osu.edu/cswconnection2017. These webinars are an outreach tool of the OSU Extension Agronomic Crops Team. Each webinar will be recorded and available online one week after the live session. The location of the recordings will be announced in the CORN newsletter and published at agcrops.osu.edu. To subscribe to the newsletter, visit corn.osu.edu. For questions or more information, contact Mark Badertscher at badertscher.4@osu.edu or 419-674-2297.
