For Immediate Release – January 26, 2017

Corn Production Issues Seminar

Hardin County – Hardin County OSU Extension will be the live host of a Corn Production Issues seminar from Ohio State University Extension’s Agronomic Crops Team on Tuesday, January 31 at 7:00 pm. The location of the seminar will be the Community Room at Mid-Ohio Energy Cooperative, 1210 Lima Street, Kenton. Dr. Peter Thomison, OSU Extension Corn Specialist and Dr. Pierce Paul, Ohio Agricultural Research and Development Center Corn and Wheat Disease Specialist will be in Kenton to discuss how to assess growing conditions and their impact on ear rots, mycotoxins and malformation in corn. Their presentations will give farmers the skills to recognize ear development problems and minimize the grain quality issues experienced in 2016.

Corn producers, Certified Crop Advisers, and industry will be able to ask questions of these experts following their presentations which will be broadcast around the state to several other host locations. CCA credits will be made available at this Kenton location. If you plan to attend this Corn Production Issues seminar on January 31, please call the Hardin County Extension office at 419-674-2297 or email Mark Badertscher at badertscher.4@osu.edu to RSVP so that preparations can be made to accommodate the number of people interested in attending. This local presentation is sponsored by Farm Credit Mid-America, with an office in Bellefontaine. Refreshments will be provided to those who attend.
