

**Is your business compliant
with revised worker
protection standards?**

REVISED WORKER PROTECTION STANDARD WORKSHOPS

The Federal Worker Protection Standard (WPS) protects agricultural workers and pesticide handlers by reducing their risk from pesticide exposure. WPS was revised in 2015, and phased-in compliance begins **January 2, 2017**.

This free workshop will provide employers and managers what they need to bring their WPS program in compliance with the new requirements, including changes in training, restrictions during applications, personal protective equipment, decontamination supplies, recordkeeping, and more.

WHO NEEDS TO KNOW ABOUT REVISED WPS?

**FARMS, FORESTS, NURSERIES, and GREENHOUSES
especially horticultural growers & employers of
custom agricultural applicators!**

THE OHIO STATE UNIVERSITY

COLLEGE OF FOOD, AGRICULTURAL,
