

OSU Researchers and OSU Extension Specialists and Educators will present cutting edge information on what is new in stored forage production. All sessions will be provided via a webinar format. There will be time for discussion and questions on each topic after it is presented. For more information, contact the Hardin County Extension office at 419-674-2297 or send an email to badertscher.4@osu.edu

Adams, Brown, Highland, Ashtabula, Coshocton, Greene, Hardin, Licking, Monroe, Morgan, Morrow, Pickaway, Pike, Sandusky and Wayne Counties will all be hosting a site for the 2015 Forage Production school.

Ohio State University Extension

Stored Forage Production School Dates:
 The school is presented over four Wednesday afternoons in January:
January 7, 14, 21 and 28
12:30 pm to 3:30 pm each day

School Location:
 Hardin County Extension office
 1021 W Lima Street, Suite 103
 Kenton, Ohio 43326

A registration fee of \$30 includes a notebook of materials and school presentations.

Topic areas to be covered at the 2015

Stored Forage Production School:

- What's new in forage genetics
- Small grains and double cropping
- Fertility and manure utilization
- What's new in weed control
- What's new in agronomic products/additives
- Precision agriculture technologies for forage production
- What's new in forage quality evaluation
- Economics of Cutting management
- Shrink in silage/hay making
- Forage inventory management
- What's new in corn silage

Sponsored by:
OSU Extension Dairy
Working Group Team

Hardin County Extension

A stored forage production school is being offered by the Ohio State University Extension Dairy Working Group via webinar format to Ohio forage producers. The course is geared toward both forage and livestock producers. Emphasis will be on forages for dairy users, but beef and sheep users will also benefit from the course. Topics will be covered over the 4 days of the school, January 7, 14, 21, and 28 from 12:30 pm to 3:30 pm each day.

Forage Production School:

- Forages supply a significant part of the feed in most dairy and other ruminant animal operations in Ohio. New research and new technology helps us to make the most of this valuable resource.
- Interact with research experts and fellow producers from across the state of Ohio. Discover new, innovative ways of looking at forage production and what might work for you.
- Learn how to maximize profit per acre in Ohio's variable weather. Explore forage cutting management strategies, double cropping options, and silage production within the context of income, harvest costs and potential impact on milk production.
