

# Agricultural Fertilizer Applicator Certification

3-hour training for those with or without a pesticide applicator license

## **Fulfills certification requirements**

This training will fulfill the three-hour requirement for applicators who need the agricultural fertilizer applicator certification, whether or not they currently have a pesticide applicator license. Another option for obtaining fertilizer certification is to pass an approved Ohio Department of Agriculture fertilizer exam.

## **Who needs the agricultural fertilizer certification?**

Fertilizer certification is required if you apply fertilizer (other than manure) to more than 50 acres of agricultural production grown primarily for sale. If you hire a co-op or other custom applicator to make your fertilizer applications, you do not need the certification.

## **What will be taught in the training?**

Best management practices will be the basis of the agricultural fertilizer certification training with a focus on fertilizer applications that have the appropriate rate, timing, placement and source.

Wednesday

**February 12**

1:00 p.m. – 4:00 p.m.

Location:

**Richwood Marketing**

**15 E. Ottawa Street**

**Richwood, OH 43040**
