## Corn and Soybean Planting Started

Farmers planted some of the first 2020 **corn** and **soybean** fields in Ohio last week, according to Cheryl Turner, State Statistician, USDA NASS, Ohio Field Office. Temperatures averaged 5 degrees cooler than historical normals and the entire State averaged normal amounts of precipitation last week. There were 2.7 days suitable for fieldwork during the week ending April 26.

Fields were dry enough most of the week and farmers worked the ground, sprayed weeds, spread manure and fertilizers, and tilled fields. Corn and soybean planting began in earnest on some farms. Freezing temperatures, mainly in the north, caused damage to some orchard blossoms and alfalfa fields. **Oats** were 18 percent emerged compared to a five-year average of 16 percent. The **winter wheat** crop was rated 71 percent good to excellent condition compared to 29 percent last year.
