

Ohio Crop Weather

Fieldwork and Planting Continued

Typical Spring weather conditions allowed operators to work the fields, according to Cheryl Turner, State Statistician, USDA NASS, Ohio Field Office. Average temperatures were slightly above historical normals and the entire State averaged just about 1 inch of precipitation. There were 2.5 days suitable for fieldwork during the week ending May 3.

Last week farmers applied fertilizer, repaired tiles, applied manure, and planted **corn** and **soybeans** where they could. Sixty-six percent of **pasture and range** condition was considered good or excellent compared to 46 percent last year. **Oats** were 36 percent emerged compared to a five-year average of 30 percent. Corn planted progress was ahead of last year but behind the five-year average while soybean planted progress was ahead of last year and the five-year average.
