Ohio Crop Weather

May 6, 2024

Planting Progressed Between Rain Showers

Light but consistent rain showers have kept the soil wet enough to limit fieldwork in some locations, according to Ben Torrance, State Statistician, USDA NASS, Ohio Field Office. Topsoil moisture conditions were rated 3 percent short, 61 percent adequate, and 36 percent surplus. Statewide, the average temperature for the week ending on May 5 was 66.9 degrees, 12.0 degrees above normal. Weather stations recorded an average of 0.98 inches of precipitation, 0.09 inches above average. There were 3.5 days suitable for fieldwork during the week ending May 5.

Rain delays weighed heavily on farmer's minds. Corn and soybean planting progressed forward to 26 and 20 percent planted, respectively. Oats were 76 percent planted. Winter wheat was 92 percent jointed and winter wheat condition was 71 percent good to excellent. Pasture and range condition was rated 89 percent good to excellent, with greening supported by ample moisture over the previous month. Farmers reported limited opportunity for planting. There had been a lot of fertilizer work and burndown herbicide applications taking place.

Soil Moisture: Week Ending 05/05/24

Item	Very short	Short	Adequate	Surplus
	<i>(percent)</i>	<i>(percent)</i>	<i>(percent)</i>	<i>(percent)</i>
Topsoil moisture	0	3	61	36
