

Child Care Access Means Parents in School

“As a young mother and full-time student, I strive to provide the strongest educational foundation for my son and me in his formative years. CCAMPIS awarded me access to a school that has a five-star rating, the highest rating in the state of Ohio. On account of this, I feel confident in pursuing my undergraduate degree two hours away from home knowing that he is in the best possible care when I am in class. I am greatly appreciative of all the assistance that I receive from the CCAMPIS program.”

Nahla Walker
Degree: Honors Social Work on a pre-law track

“Being students AND parents certainly has its own challenges, but we wouldn’t trade the experience for anything because we are pursuing our career dreams while also being filled with so much joy from our children who keep us grounded and motivated! We are so grateful to have the financial and emotional support from CCAMPIS to help us have quality childcare while working toward our professional goals!”

Kaitana and Daniel Dahle
Ohio State Family Nurse Practitioner and Dental Students

“Pursuing a doctoral degree is stressful and time consuming for anyone, but when you factor in being an involved parent to two energetic young boys it does become overwhelming at times. The CCAMPIS team has been nothing short of amazing. They have been there for us, providing support and services to my family and I to alleviate some of that stress, which has allowed me to remain focused on my family and academic goals.”

Alexander Pittman
Doctoral Student - Department of Teaching & Learning

More than one-quarter of all college students are parenting students.

Only 33% of parenting students complete a degree or certificate within six years; for single mothers, the six-year completion rate is only 28%.
