happy first week of classes!

We hope everyone had a fun, relaxing, and well-deserved winter break! Although it seems to have been much too short, we are excited for another semester of professional growth and development in WIMS. We have a great lineup of speakers for the semester, encompassing all areas of STEM! Additionally, we have our Girl Scouts Outreach Event in early March - see below for more information.

Have a great week, and see you Thursday evening!

SP19 Textbook Exchange

We are hosting a WIMS textbook exchange for those looking for another means to buy/sell textbooks this semester! Feel free to add your textbook information or contact a fellow WIMS member about a book. Please try to keep your information updated (if you have sold it, delete it from the exchange! Link is in the left column. Let us know if you have any questions!

recommend a speaker

Inviting a speaker to a meeting is a great way to start a professional relationship with a woman in STEM! Fill out this form if you have a speaker in mind (link is located in the left column). As of right now, we have all of our meetings taken care of for the spring 2019 semester, but please do not hesitate to recommend a speaker for the 2019-2020 academic year!

outreach opportunities

Our annual Girl Scouts Event, “Detective for a Day,” will be taking place on **Saturday, March 2nd** from 12 pm - 5 pm (we will likely finish earlier, though). Over 60 Girl Scouts from the greater Columbus area will join us at the Union for a detective-themed workshop that demonstrates how interesting and fun STEM subjects can be, culminating in their earning of a Detective Badge for their sash! Mark your calendars - this is our biggest outreach event of the year, so we need as much help as possible!

More information to come! Contact Jen tuokkola.4@osu.edu if you have any questions.
