Touring Two Farms!

Watts Family Farm

Phil Watts began farming in the 1970's with 70 acres. Since then the farm has expanded to 2,500 acres and 2,000 head of cattle on feed. The expansion has happened while maintaining itself as a true family farm. You will see the top notch facilities and equipment needed to successfully operate this farm and learn about the management needed to make the operation profitable. Our tour will begin here with breakfast. (3966 Moots Run Rd, Alexandria)

Timbuk Farms

Hidden from the road and nestled within a picturesque Christmas tree farm is a greenhouse facility unlike anything you would imagine. You may think of Timbuk as a Christmas tree farm but it is so much more. See ten acres under roof of greenhouse structures including state of the art equipment. Use of technology has allowed Timbuk to become one of the nation's leaders in flowering plants. Our tour will end here with a treat from Velvet Ice Cream.

*You can support our two featured farmers by visiting their businesses:
 Watts' own Granville Milling Company, 400 S. Main Street, Granville
 Timbuk's retail store at 1810 Columbus Road, Granville*

Licking County Farm Bureau, Licking County Extension, and the Licking County Soil & Water Conservation District are teaming together again this year to provide another County Farm Tour. We have 2 locations that have graciously opened their doors. These are two very successful operations that have utilized a combination of technology, management and hard work to succeed. They have all worked to do this while being good stewards of the land and using conservation methods to maintain their businesses into the future.
