5 Tiles-Improve Speed & Coordination

Best Practices that can be utilized with this App:

- Decision Making
- Appropriate for all ages when children are involved
- Age appropriate depending on adult's role

Adult developmental skills that can be supported with this App:

- Fine motor skill from using the iPad
- Reading
- Social engagement, which may include reminiscence
- Generativity if adult helps the child

This is a fact sheet on Apps that use emerging best practices associated with intergenerational programs.

Intergenerational programs are those that connect younger and older generations to foster positive experiences. Research continues to grow noting that when successfully delivered, intergenerational programs result in positive health effects, child learning, and appropriate socialization for both young and old (Jarrott, 2011).

For more information, check out the Best Practices in Intergenerational Programming fact sheets, available at

<http://www.intergenerational.clahs.vt.edu/trip/sample.html>

Child developmental and early education skills that can be supported with this App:

- Hand eye coordination
- Turn Taking
- Motor skill development

Facilitator Ideas

Intergenerational

One adult and several children can work together trying to catch the shapes as they move side to side and speed up.

1. An iPad can also be connected to an LCD projector to use as a group activity allowing different participants to take part in catching the shapes and tapping on them.
2. Questions or conversations stemming from use of this app may inform subsequent activities (for example an art project that focuses on different shapes in different sizes and colors).

Single generation

1. Adults can work individually using the app to work on hand eye coordination.
2. Children can also work individually or in pairs on their hand eye coordination.
3. An entire class can participate using one iPad connected to an LCD projector.

Best Practices for Intergenerational Programming

1. Staff members of the adult and the child program collaborate to plan activities.
2. *Participants involved* in decision making about the activity and during activities.
3. Participants are *prepared* ahead of time and reflect on activity afterwards.
4. Participation is *voluntary*.
5. *Activities reflect interests, backgrounds, and social histories* of program participants.
6. Activities are age and role-appropriate.
7. Activities *support interaction* among IG participants.
8. Facilitators *skillfully stage the environment* to promote interaction.
9. *Adaptive equipment* is used as appropriate.
10. Facilitators *consider the social environment and the role of staff members*.
11. *Document & communicate* experiences to build upon in future activities.
