

NOW HIRING: Olentangy River Wetland Research Park Coordinator

We are seeking a coordinator to oversee research and stewardship mission areas of the Wilma H. Schiermeier Olentangy River Wetlands Research Park (ORWRP) at The Ohio State University. This urban wetland facility is located on the OSU campus and managed primarily by the School of Environment and Natural Resources, for which it plays a key role in research, education, and outreach. In the coming years, the ORWRP will be the site of increased long-term environmental monitoring, habitat restoration, and public education programming, while continuing to be a “living classroom” for SENR and other OSU students. Thus, we are seeking a motivated, experienced individual to lead and participate in the development of day-to-day activities in research and stewardship at this unique environmental resource. The coordinator will work at the direction of the ORWRP Leadership Committee and be directly supervised by the ORWRP Chair. This position is 50% Research, 50% Reserve Management.
