

Families Experiencing Intellectual Disability Helping Families!

NEEDED: Youth and young adults ages 14-24 experiencing intellectual disability and their caregiver.

The Ohio State University Nisonger Center needs your help to develop an interview about the mental health of youth and young adults with Intellectual Disability (ID). Participants will play an important role in an effort to improve the mental health outcomes of adolescents and young adults with ID.

Who can participate?

- Youth and young adults experiencing intellectual disability aged 14-24.
- Parents or caregivers of these youth.

What will participants be asked to do?

- Each participant would take part in one individual session of approximately 1 to 3 hours (with breaks) at the Ohio State University Nisonger Center.
- Youth will be asked to respond to a set of interview questions about mental health, including providing feedback on a set of illustrations related to the interview questions about emotions, feelings, and behaviors.
- Parents or caregivers will be asked to provide feedback on the interview questions asked of youth.

How do youth and caregivers benefit?

- **Those who participate will help with the development of the first diagnostic assessment of mental health disorders among youth with ID.**

Participating youth and their caregiver will each receive reimbursement for their time in the form of a \$50.00 gift card. Participation in this study is voluntary. All participants' information will be kept confidential. Participation has no bearing on participants' status in any program or referring organization.

This project is supported by the National Institutes of Health (NIH) through Grant MH108869 to the University of Oregon.

To find out if you are eligible to participate or for more information with no obligation, please contact Cheryl Li at 614-366-1715 or Cheryl.Li@osumc.edu
