

Are you a person with an intellectual and/or developmental disability?

Are you 16-22 years old?

We want to know what you think about sexual health education.

We are doing a survey with young adults with intellectual and developmental disabilities so we can make lessons about relationships and sexual health. Sexual health includes how your body changes, being safe, and having a family.

We want to know:

- What do you want to learn about relationships and sexual health?
- What would make learning about these topics fun and easy?

Your opinion is important!

What will happen in the study?

- You will do an online survey.
- You can do the survey on your own phone, tablet, or computer.
- The survey will take 20-45 minutes.
- Everything you say will be private

20-45 min

Ariel Schwartz at Boston University is in charge of this study.
