SCAN ME

Step 1: Initial interview and training: in person or on-line (60-90 mins)

Step 2: Complete a survey via phone daily for 30 days (5 mins each survey)

Step 3: Final interview and feedback: in-person or on-line (60 mins)

What the study is about?

This study aims to learn about the types and frequency of leisure activities that individuals do in their free time during the day.

Results may help develop programs and services that enhance leisure participation among adults with autism.

Can I be in the study?

- If autism is your primary disability;
- If you are 18 years and older;
- If you live by yourself or independently with roommate(s);
- If you own a smart-phone or study-compatible device; and
- If you are willing to complete daily checklist for 30 days.
