About the Mansueto Institute for Urban Innovation

The Mansueto Institute is a hub for urban science and practice, dedicated to training the next generation of urban scholars. We study the fundamental processes that drive, shape, and sustain cities. Our researchers come from the social, natural, and computational sciences, along with the humanities. Together, we pursue interdisciplinary scholarship, develop new educational programs, and provide leadership and evidence to support global, sustainable urban development. Learn more at <http://miurban.uchicago.edu> and follow us on Twitter at @miurbanchicago.
