Municipal Bonds in Minnesota

This analysis is based on ICE municipal bond reference and geospatial data.

Municipal bonds are the primary financing tool that state and local governments use to build roads, schools, water and wastewater systems, affordable housing, public and non-profit hospitals and other public infrastructure. More than 50,000 individual governments have active municipal bonds today, and those bonds have made possible more than \$3.5 trillion of recent investments in public infrastructure.

In return for investing in public infrastructure, investors receive favorable tax treatment on the interest they earn from municipal bonds. According to one recent analysis, this tax advantage reduces borrowing costs for state and local governments by an average of 54%, compared to taxable debt.

For Minnesota that means:

- Since 2015, state and local governments in Minnesota have invested **\$66.0 billion** in projects financed by tax-exempt municipal bonds.
- Minnesota taxpayers saved an estimated **\$1.4 billion** on projects financed with tax-exempt municipal bonds since 2015.
- A total of **1,326** state and local governments have tax-exempt municipal bonds outstanding today. Of them, **1019** have borrowed less than \$30 million in the past decade. These smaller, less frequent borrowers are **76.8**% of Minnesota's total borrowers.

This brief was prepared by the Center for Municipal Finance at the University of Chicago. It is based on data from ICE municipal bond reference and geospatial data. For questions or comments, see munifinance.uchicago.edu or contact Justin Marlowe (jmarlowe@uchicago.edu).
