

Checklist for Faculty Profiles

The BSD lists faculty on the main BSD (<https://biologicalsciences.uchicago.edu/faculty/>) and departmental websites. These lists are automatically populated. A faculty member needs to be set up in Workday with certain criteria to be included in the BSD faculty profiles data feed.

Content in each individual faculty profile is automatically brought in from various data sources, including Workday and ProfilesRNS.

Please follow this checklist to make sure faculty profiles are set up properly:

- ❑ **Meet criteria for profile to display:** To make sure the faculty profile displays, check the following is true on Workday for the new faculty. Update their profile as needed:
 - Track Type is one of the following: “Faculty”, “Faculty-SOM”, “Clinical Scholar”
 - At least one appointment where the appointment is both “Primary” and “Current”*
 - Appointment End Date is either null (empty) or a future date
 - If a person meets the above criteria, we include all of their “Current” titles*
 - Department is primary in Workday
- *“Current” and “Primary” are true/false flags in an appointment record
- ❑ **Update information on ProfilesRNS**
 - Faculty can login and update their own ProfilesRNS profile. Search for the profile on [the ProfilesRNS website](#) and go to the login at the top of the profile.
 - The following information is pulled in from ProfilesRNS and should be updated to appear on the faculty profiles data feed:
 - Research and Scholarly Interests (On ProfilesRNS, “keywords”)
 - Websites
 - Biography
 - Education & Training
 - Publications
 - Honors & Awards
 - For more information on what information gets populated into the BSD faculty profiles from ProfilesRNS, refer to the [BSD Faculty Data Feed Overview](#)
 - You can also refer to [BSD Faculty Profiles FAQs](#) when troubleshooting faculty profile issues
- ❑ **Upload a photo:** Send in the full name, CNET ID, and photo of the new faculty to bsdwebsite@bsd.uchicago.edu
 - Photos must meet the minimum photo resolution below:
 - Height: 2100px x Width: 1575px
 - OR, if the photo is a square: 1575x1575.
 - You can schedule a picture to be taken at [UCM through the intranet](#)

Overview

overview

Dr. Rana's research focuses on the pathogenesis of preeclampsia, a common hypertensive disorder of pregnancy. She is particularly interested in elucidating the role of angiogenic biomarkers in the prediction of adverse maternal and fetal outcomes. Dr. Rana conducts national and international translational studies.

Keywords

angiogenic factors, preeclampsia, maternal morbidity

Graduate Program Affiliation: Cancer Biology

Sarosh Rana, MD, cares for women with high-risk pregnancies. She is an expert in the diagnosis and management of preeclampsia – a condition characterized by high blood pressure during pregnancy. Dr. Rana also performs high-level ultrasounds, which provide a greater assessment of the fetus than traditional ultrasounds.

Dr. Rana aims to improve maternal and fetal outcomes through research on preeclampsia. Her research over the last several years has focused on demonstrating clinical utility for angiogenic biomarkers in prediction of adverse outcomes among women with suspected preeclampsia. She is also testing the idea that these biomarkers will prove superior in predicting adverse outcomes, leading to reductions in maternal and fetal deaths related to preeclampsia in developing countries such as Haiti. Dr. Rana performs collaborative research evaluating the relationships between increased levels of angiogenic factors and immediate, as well as future, cardiac performance. Dr. Rana's work has been funded by several notable organizations, including the National Institutes of Health and the American Heart Association.

A dedicated teacher, Dr. Rana trains residents and fellows on the use of ultrasound imaging, as well as the management of women with complex pregnancies. She also serves as a mentor on various clinical, basic science and translational research projects; these mentored research projects have resulted in multiple national and international conference presentations, and published manuscripts.
