

Li Li

BS Zhengzhou University, China, 2014

PhD Peking University, China, 2019

lilichem@uchicago.edu

Li was born in Chongqing China, where he completed his B.S. degree at Zhengzhou University. Under the supervision of Gang Li, he worked on the synthesis of a series of coordination polymers from the imidazole multi-carboxylate ligand. Li then moved to Peking University where he obtained a Ph.D. degree under Professor Yong Huang. His current research is focused on organocatalyzed, transition-metal-catalyzed multi-functionalization of carbon centers and photo-involved cyclization reactions. Outside of the lab, he enjoys all kinds of outdoor activities, like hiking, climbing, running and traveling.
