## LEICA WHITE LIGHT LASER AND FALCON SP8 CONFOCAL

Bringing together tunable excitation and time-resolved fluorescence to everyday confocal work.

**VIRTUAL SEMINAR:**  
**Wednesday, April 1, 2020**

**11:30 AM Eastern**  
**10:30 AM Central**

**PLEASE REGISTER NOW:**  
**<https://go.leica-ms.com/GL-RSVP>**

**Presented by: Genevieve Phillips**  
**Advanced Workflow Specialist - Confocal**

**Leica SP8 FALCON** (FAst Lifetime CONtrast) is the future of functional imaging. SP8 FALCON is a truly integrated FLIM solution on a confocal platform, integrating **tunable pulsed White Light Laser** excitation to match nearly any fluorophore, spectral detection and fast photon counting Hybrid detectors. The synergies of some of these Leica-exclusive technologies delivers benchmark FLIM results at least 10x faster than conventional TCSPC systems.
