Student Spotlight - Anastasia Pozdnyakova

Anastasia is an MD/MBA student currently in Booth residency. Her career goal is to become an anesthesiologist at an academic institution involved in healthcare administration and quality and safety research. Anastasia joined GPHAP to gain a better understanding of the U.S. healthcare system from multiple different perspectives. As part of her GPHAP RAship, Anastasia has been working with Dr. Vineet Arora on her IGNITE project to improve interprofessional communication by engaging nurses and residents to work together on quality improvement initiatives in their departments.

Medicine, University of Chicago ([bio](#))*Speaker's Description:* A largely reductionist approach to medicine has dominated American
medicine since the start of the 20th century. A focus on isolated subsystems (biological,
operational, ethical) without regard for their behavior in the “whole”, has contributed to a
fragmented and siloed healthcare system where patients feel ignored and practitioners feel
ineffective and frustrated. “Systems-thinking” and a related orientation towards growth (growth
mindset) are essential for overcoming this fragmentation. This lecture will serve as an
introduction to the rationale and benefits of systems thinking and growth mindset in real world
endeavors.February 19th, 2020, 5:30pm-7:30pm*Location:* Biological Sciences Learning Center (BSLC), 924 E. 57th Street, Room 001More information [here](#).**Thursday, Feb 20: Health Economics Workshop (HEW)**The Health Economics Workshop (HEW) is an interdisciplinary workshop that features
participants from the Social and Biological Sciences Divisions, several professional schools,
and faculty from outside the University of Chicago. HEW is an important venue to present
research in the areas of health economics, medical decision-making, health services research,
health policy, and topics related to population health. HEW takes place in the Keller Center's
4th-floor boardroom from 3:30 - 5:00 pm.

Next Presenter:

Jonathan S. Skinner, PhD
James O. Freedman Presidential Professor,
Dartmouth College

Tuesday, Feb 25: MED STUDENT SERIES: THE BUSINESS OF HEALTHCARE INNOVATION

This is a joint program of the American Medical Association, Sling Health and MATTER. The stated aim of the program is to present next generation physicians to opportunities in healthcare innovation, equip them to be active leaders and voices for change, and help them harness their potential as budding entrepreneurs.

This session will include stories from health systems that have rolled out pilots with startups. In addition, an entrepreneur will discuss experiences navigating through a large health system.

Even though this program says it is for medical students and residents, we have been told by the organizers that ALL STUDENTS are welcome.

MATTER | 222 Merchandise Mart Plaza, Suite 1230
