Health Equity & Institutional Accountability: Setting a New Standard for Health Care
 "A fireside chat with national experts about what it takes to hold healthcare systems accountable for advancing racial justice and improving the social and structural drivers of health equity."

Dr. Michelle Morse will join us to share her work building institutional accountability in health care, as described in her recent Boston Review article, "An Antiracist Agenda for Medicine." And we'll talk with Professor Alnoor Ebrahim from the Tufts University Fletcher School of Law & Diplomacy about his groundbreaking research on institutional accountability and its implications for health systems as well as multi-sector health equity initiatives."

Finally, we'll introduce five components of institutional accountability needed to transform social and structural drivers of health equity, and share concrete steps that existing and emerging leaders can take to put them in place.

Wed. May 12 5:00PM CT [Register Here](#)

Opportunities

Volunteers for a Vitamin D COVID-19 Study

GPHAP Booth student, Jay Yarrlagadda, has forwarded this opportunity to participate in a study on whether taking Vitamin D can help prevent or decrease severity of COVID-19. The study is being run by Dr. Andrew Schram, himself a GPHAP Booth student, and a participant in the GPHAP Mentorship Program. See the information below, and then a few additional questions and answers that follow the description. If you would like to participate, you can email vitaminD@bsd.uchicago.edu or call 773-834-8620.

"Researchers at the University of Chicago Medicine and Rush University Medical Center are conducting research to understand whether taking vitamin D can help prevent or lessen the severity of COVID-19. Participants will be given four COVID-19 antibody tests to monitor for past infection of COVID-19, a 9-month supply of vitamin D, and receive laboratory tests to monitor for possible side effects of vitamin D treatment. These will be provided at no cost to you. Your participation in the study will last for about 9 months."
