Welcome to UC Santa Cruz 21
Introducing UC Santa Cruz 22
The University of California 22
The UC Santa Cruz Campus 23
Academic Programs 27
Bachelor's Degrees 27
Undergraduate Minors 27
Bachelor's/Master's Contiguous Pathways 27
Master's Degrees 27
Ph.D. Degrees 27
Designated Emphases 27
Fields of Study Chart 27
Academic Units 40
Arts Division 40
Art 41
Programs Offered 41
Undergraduate Program 41
Graduate Program 41
Courses for Non-majors 41
Creative Technologies 48
Programs Offered 49
Film and Digital Media 57
Programs Offered 57
Undergraduate Program 57
Graduate Program 58
History of Art and Visual Culture 74
Programs Offered 74
Undergraduate Program 74
Courses for Non-Majors 74
Graduate Program 74
Music 86
Programs Offered 86
Undergraduate Program 86
Courses for Non-Majors 87
Graduate Program 87
Facilities 87
Performance, Play & Design 127
Programs Offered 127
Other Programs of Interest 127
Humanities Division 146
Engaged with the world 146
An environment of innovation, diversity, and inclusion 146
Undergraduate Study 146
Undergraduate Majors 146
Undergraduate Minors and Certificates 147
Graduate Study 147

Employing Humanities 147
Internship Program: Experiential Career Exploration and Learning 147
Undergraduate Research Program: Experiential Learning Opportunities in Research 148
The Humanities Institute 148
Critical Race and Ethnic Studies 148
Programs Offered 148
Other Programs of Interest 148
Undergraduate Program 148
Black Studies Minor 149
CRES and Education MA/C Contiguous Bachelor's/Master's Pathway 149
Graduate Program 149
Feminist Studies 158
Programs Offered 158
History 169
Programs Offered 169
Undergraduate Program 169
Greek 170
Latin 170
Graduate Program 170
Study Abroad 185
History of Consciousness 202
Programs Offered 202
Other Programs of Interest 202
Graduate Program 203
Languages and Applied Linguistics 205
Programs Offered 205
Other Programs of Interest 205
Undergraduate Program 205
Placement Exams 206
Academic English 206
Arabic 206
Study Abroad 206
Chinese 206
Study Abroad 206

Study Abroad 208
Yiddish 208
Required Courses 219
Linguistics 220
Programs Offered 220
Other Programs of Interest 220
Courses for Non-majors 220
Literature 243

Programs Offered 243
Other Programs of Interest 243
Undergraduate Program 243
Graduate Program 243
Courses for Non-Majors 244
Philosophy 266
Programs Offered 266
Writing Program 274
Lower-Division Course 274
Multilingual Curriculum 274
Upper-Division Writing Course 274
Graduate-Level Writing Courses 274
Humanities Certificate Programs 274
Physical and Biological Sciences Division 276
Astronomy and Astrophysics 277
Programs Offered 277
Other Programs of Interest 277
Undergraduate Program 278
Courses for non-majors 278
Chemistry and Biochemistry 280
Programs Offered 280
Undergraduate Program 281
Graduate Program 281
How to Declare the Chemistry Minor 307
Coastal Science and Policy 313
Programs Offered 313
Other Programs of Interest 313
Earth and Planetary Sciences 316
Programs Offered 316
Other Programs of Interest 316
Undergraduate Program 317
Graduate Program 317
Ecology and Evolutionary Biology 352
Programs Offered 352
Other Programs of Interest 352
Undergraduate Program 353
Graduate Program 353
Materials Science & Engineering 390
Mathematics 394
Programs Offered 394
Other Programs of Interest 395
Undergraduate Program 395
Enrollment Requirements 395
UC Santa Cruz Mathematics Placement 395
Advanced Placement (AP) Calculus Examinations 395
International Baccalaureate (IB) Examination in Mathematics 395
Graduate Program 396
Admission to the Graduate Program 396
Financial Support 396
Relationship of Master's and Doctoral Programs 397
Microbiology and Environmental Toxicology 423
Programs Offered 423
Other Programs of Interest 423
Undergraduate Program 423

Graduate Program 423
Molecular, Cell, and Developmental Biology 434
Programs Offered 434
Other Programs of Interest 434
Undergraduate Program 434
Graduate Program 435
Ocean Sciences 464
Programs Offered 464
Other Programs of Interest 464
Undergraduate Program 465
Graduate Program 465
Physics 469
Programs Offered 469
Other Programs of Interest 469
Undergraduate Program 470
Undergraduate Majors 470
Courses for Non-Majors 470
Graduate Program 470
Admission Process 497
Science Communication 501
Programs Offered 501
Baskin Engineering 501
Graduate Study 502
Graduate Student Affairs Office 502
Undergraduate Study 502
Undergraduate Majors 502
Undergraduate Minors 503
Undergraduate Advising Office 504
Admission to Baskin Engineering Majors 504
Admission as First-Year Students 506
Computer Science 506
Proposed Major Retention 506
Declaring a Baskin Engineering Major 506
Junior Transfer Acceptance to Majors 506
Letter Grade Policy 507
Ethics Requirement 507
Substitutions for Courses Taken at UCSC 507
Course Equivalencies and Substitutions Taken at an Outside Institution 507
Four-Year Institutions and the UC Education Abroad Program (UCEAP) 507
Computing 507
Prerequisites 508
Permission Numbers 508
Fees 508
Applied Mathematics 508
Programs Offered 508
Undergraduate Program 508
Graduate Program 509
Biomolecular Engineering 526
Programs Offered 526
Undergraduate Program 526
Courses for All Majors and Minor 526
Graduate Program 526
Computational Media 547
Programs Offered 547
Other Programs of Interest 547

Computer Science and Engineering 568
Programs Offered 568
Other Programs of Interest 568

WELCOME TO UC SANTA CRUZ

Welcome to UC Santa Cruz!

The student experience at UCSC is unique, fusing high academic standards with a passion for transformative engagement in the world. UCSC is ranked as a top public university for students seeking to make an impact. The student experience is shaped by exceptional faculty whose work is at the forefront of their fields and who are invested in helping students grow their own intellectual interests. As a result, UCSC is routinely ranked among the top universities in the world for research excellence and impact. Our students have opportunities to collaborate with top scholars and scientists in the creation of new knowledge.

But what defines UCSC is not just academic excellence or our spectacularly beautiful campus. It is our diverse community. The motto of UCSC's first residential college is "the pursuit of truth in the company of friends." Since 1965, UCSC has been the site of innovation and experimentation about what a university community could and should be. Today, our residential college system provides flexible support and opportunities aimed at recognizing the student as a whole person and prioritizing their success. Only through community can we realize the responsibilities we have to one another, and the ways the pursuit of knowledge can improve the lives of our many communities — local, national, and global.

I encourage you to take advantage of all of the opportunities that UCSC has to offer. There is so much to learn about — from the depths of the ocean to the farthest stars and everything in between.

I welcome you to UC Santa Cruz, which is not just a place, but a community of learning that spans the world.

Sincerely,

Cynthia Larive

Chancellor

INTRODUCING UC SANTA CRUZ

THE UNIVERSITY OF CALIFORNIA

The University of California opened its doors in 1869 with just 10 faculty members and 38 students, and it has since developed into one of the world's most distinguished public university systems. Acclaimed for its research, scholarship, and dedication to undergraduate and graduate education, the UC system improves the lives of people in California and around the world through world-class educational opportunities, groundbreaking research, top-rated health care, and agricultural expertise.

Ten University of California campuses are located regionally throughout the state. The system also includes five medical centers, three national laboratories, and more than 800 associated research institutes, laboratories, agricultural field stations, and extension centers.

The University of California includes nearly 300,000 students and about 265,000 faculty and staff. More than 2 million UC alumni live and work around the world. UC faculty and staff have been awarded 71 Nobel Prizes, and 63 National Medals of Science. UC academics include more than 600 members of the National Academy of Sciences. Detailed information about the University of California's teaching, research, and public service mission is available at the University of California website.

THE UC SANTA CRUZ CAMPUS

The University of California, Santa Cruz, has earned international distinction for high-impact research and an uncommon commitment to teaching and public service. UC Santa Cruz faculty and alumni have been at the forefront of sequencing the human genome, creating the organic farming movement, unlocking the mysteries of our galaxy, and using interdisciplinary research to create a more just and equitable society. Members of the UC Santa Cruz campus community share a commitment to use their voices, knowledge, and talents to effect real change in the world.

UC Santa Cruz holds the distinction of being one of only six members of the Association of American Universities (AAU) designated both as a Hispanic Serving Institution (HSI) and an Asian American Native American Pacific Islander Serving Institution (AANAPISI), highlighting our commitment to equitable educational access and research excellence. The campus is among the founding members of the Alliance of Hispanic Serving Research Universities, which aims to increase opportunity for those historically underserved by higher education.

About 19,000 students are enrolled at UC Santa Cruz in undergraduate, graduate, and professional degree programs. The campus pairs high-impact research with 10 tight-knit residential colleges that offer undergraduate students both the experience of a small liberal arts college and the depth and rigor of a major research university. The colleges are guided by distinct themes that inform their academic and student-life programs.

Graduate education is a critical element of our research and teaching missions. UC Santa Cruz enrolls approximately 1,300 Ph.D. and 500 master's candidates in 60 graduate programs. UC Santa Cruz offers several professional master's degrees, including programs in the Baskin School of Engineering based at our Silicon Valley Campus (Games and Playable Media, Natural Language Processing, and Human-Computer Interaction) and one program on our residential campus (Applied Economics and Finance), housed in the Economics department. Among many academic master's degrees, several stand out as distinctive degrees that uniquely prepare students for careers as change-makers: our programs in Scientific Communication, widely regarded as one of the best science-writing programs in the world; Coastal Science and Policy, equipping emerging leaders to respond to complex problems with effective, practical solutions; and Social Documentation, designed for future documentarians committed to social change.

Enrollment for the 2024-25 academic year was 17,366 undergraduates and 1,888 graduate and professional students, for a total of 19,254. UC Santa Cruz strives to enroll a student population that reflects the ethnic and socioeconomic diversity of California. About 56 percent of our students are underrepresented minorities, first-gen students, and/or Pell Grant recipients.

The UC Santa Cruz faculty includes one Nobel Laureate, 30 members of the American Academy of Arts and Sciences, 17 members of the National Academy of Sciences, and 49 fellows of the American Association for the Advancement of Science. Seven MacArthur "genius grants" have been awarded to UC Santa Cruz faculty and alumni.

In fiscal year 2024, UCSC faculty and researchers received more than $194 million in external funding. More information about our distinguished faculty can be found in the UCSC Newscenter.

The 10 residential colleges are supportive living and learning communities that characterize the UC Santa Cruz experience. All undergraduate students, whether they live in university housing or not, are affiliated with one of the colleges. Self-contained and architecturally distinct, each college is a community of 1,500 to 1,800 students, about half of whom typically live on campus. In addition to housing students in small-scale residential communities, each college provides academic support, organizes student activities, and sponsors events that enhance the intellectual and social life of the campus.

Each college has a distinctive quality derived from its core course and extracurricular programs and from its faculty fellows and their academic disciplines. However, all of the colleges are interdisciplinary, and all academic majors are open to students from all colleges. Detailed descriptions of the 10 colleges can be found in The Colleges section of the catalog.

Undergraduate education

The campus offers 70 undergraduate majors in the arts, engineering, humanities, physical and biological sciences, and social sciences, as well as interdisciplinary major programs and minors. A complete list of academic programs and concentrations appears on the Fields of Study chart, and detailed descriptions begin in the Academic Programs section of the catalog.

The major and minor programs are administered by departments and colleges within the academic divisions. In most cases, departments are composed of faculty in the same field, but interdisciplinary programs draw on faculty from several fields.

Undergraduate education at UC Santa Cruz is focused on student success. For students entering in fall, preparation for success begins with the summer orientation course, a 1-credit online course preparing and exposing students to our academic and college communities. The fall college core courses give first-year students a small-seminar experience, including intensive work in reading, discussion, and critical reasoning, while also providing an orientation to academic life. New transfer students can begin in-depth engagement with UC Santa Cruz and their majors in Summer Edge for transfer students.

Original undergraduate research is encouraged, and hundreds of research papers co-authored by UC Santa Cruz undergraduates and their professors have been published in

journals. For additional information, visit the Undergraduate Research Opportunities website.

Global Engagement programs at UC Santa Cruz include Study Abroad opportunities and International Student and Scholar Services (ISSS). Global Engagement facilitates the exchange of people, ideas, and knowledge to support and promote the internationalization of teaching, learning, and research. Each year about 500 UC Santa Cruz students broaden their academic horizons through the UC Education Abroad Program (UCEAP), which enables students to incorporate full-time study abroad as UC credit toward their degrees. The UC Santa Cruz campus also strongly encourages undergraduate students to take advantage of the many opportunities for public service, such as those provided through the campus's field programs, colleges, and Career Center. Individual studies, apprentice teaching, field studies, and internships can be important parts of the undergraduate experience (see Field Programs).

Graduate education

UC Santa Cruz offers graduate study in 41 academic fields, encompassing 57 concentrations. Graduate study at UC Santa Cruz emphasizes close interaction between faculty and students, independent student research, supervised teaching experience, and interdisciplinary work. Further graduate program information is provided in the Academic Programs and Graduate Information sections of the catalog.

Research

The UC Santa Cruz campus hosts a number of major research units. UC Observatories, the Santa Cruz Institute for Particle Physics (SCIPP) and the Institute of Marine Sciences, all within the Physical and Biological Sciences Division, and Engineering's Genomics Institute conduct state-of-the-art research on topics ranging from the discovery of planets outside our solar system, to the detection of new sub-atomic particles, to the ecology of marine mammals, to understanding molecular processes and the underpinnings of disease. UC Santa Cruz is also a primary partner in inter-UC campus initiatives such as the Institute for Quantitative Biomedical Research (QB3) and the Center for Information Technology Research in the Interest of Society (CITRIS), which focus on human health and the use of information technology to solve social, environmental, and health-care problems.

Research enterprises within the Arts benefit from the Arts Research Institute and the Center for Documentary Arts and Research, while the Institute of the Arts and Sciences emphasizes interdisciplinary exhibitions, events, and residency programs.
Engineering at UC Santa Cruz has focused on strategic initiatives that include the Institute for the Biology of Stem Cells, the Center for Games and Playable Media, and the Center for Sustainable Energy and Power Systems.
The Humanities Institute is a hub for academic research, cross-discipline collaboration, and public engagement that oversees a range of topical centers, including the Center for Cultural Studies, the Center for Jewish Studies, the Center for Public Philosophy, the Linguistics Research Center, and the Dickens Project.

Interdisciplinary collaborations thrive in Physical and Biological Sciences, from astrobiology to materials science. The Theoretical Astrophysics Santa Cruz (TASC) group spans four UCSC departments involved in research in astrophysics and planetary sciences. The Center for Molecular Biology of RNA, spanning three departments, now represents the largest grouping of RNA laboratories in the world.

The Institute for Social Transformation, the Center for Agroecology, the Center for Integrated Spatial Research, the Research Center for the Americas, and the Science and Justice Research Center provide pioneering directions for research in the Social Sciences.

Beyond these organized research enterprises, UC Santa Cruz has a suite of investigator-driven research that spans the width and breadth of campus inquiry. For additional information see Resources for Learning and Research.

Location and facilities

Located in the redwoods overlooking the Monterey Bay, our residential campus is widely regarded as one of the most beautiful in the world. UC Santa Cruz includes three sites in Santa Cruz: the 2,000-acre residential campus, the Westside Research Park facility, and our Coastal Science Campus located at the edge of the Monterey Bay National Marine Sanctuary.

Our Silicon Valley Campus in Santa Clara extends the reach of UC Santa Cruz and is home to UCSC Extension, which includes UC Scout and Smarter Balanced, and houses the four Baskin School of Engineering professional master's programs. Many of the university's office and business functions are located at the Scotts Valley Center, which is about nine miles away from our residential campus.

UC Santa Cruz also manages the Año Nuevo, Fort Ord, Younger Lagoon, Strathearn Ranch, and Landels-Hill Big Creek Natural Reserves, which are part of the UC Natural Reserve System (UCNRS). These varied environments offer students, staff and faculty multiple locations in which to learn, experiment, and innovate, and provide opportunities and resources to leverage academic research to positively impact the region, the state, and the world.

The city of Santa Cruz is a well-known recreational area and center for the arts. Mild weather, miles of beaches, and many cultural opportunities combine to make Santa Cruz an enjoyable place to study and live.

Accreditation

The University of California, Santa Cruz, is accredited by the Western Association of Schools and Colleges (WASC), Senior College and University Commission, 1001 Marina Village Parkway, Suite 402, Alameda, CA 94501, (510) 748-9001, an institutional accrediting body recognized by the Council for Higher Education and the U.S. Department of Education.

Specific degree programs at UC Santa Cruz are also accredited: The Engineering Accreditation Commission of ABET, http://www.abet.org (Electrical Engineering); the

American Chemical Society Committee on Professional Training (Chemistry); and the California State Commission on Teacher Credentialing (Education). To review accreditation documents, please contact the Office of the Vice Provost for Academic Affairs, Kerr Hall, (831) 459-1349, or vpaa@ucsc.edu.

Combined majors. In addition, students may complete a combined major leading to a B.A. degree in a number of designated fields. Combined majors currently available include those in Earth sciences/anthropology, economics/mathematics, environmental studies/biology, environmental studies/Earth sciences, environmental studies/economics, Latin American and Latino studies/politics, and Latin American and Latino studies/sociology. Students also have the option of pursuing a double major.

c = concentration, or emphasis, within a program. Some programs give students the option of following a general course of study or selecting a concentration; other programs require students to choose a concentration. Consult the linked program.

[1] An intensive major is also available.

[2] A five-year contiguous bachelor's/master's pathway is available coordinating an existing bachelor's degree from within the chemistry or biology programs (majors administered by the departments of MCD Biology, EE Biology, Chemistry and Biochemistry, and Biomolecular engineering) and the M.S. in microbiology and environmental toxicology.[3] A Master of Fine Arts (M.F.A.) degree is awarded in digital arts and new media, social documentation, and environmental art and social practice.

[3] A five-year contiguous bachelor's/master's pathway is available coordinating the biomolecular engineering and bioinformatics bachelor's degree (bioinformatics concentration) with the master's degree.

[4] A five-year contiguous bachelor's/master's pathway is available coordinating the existing bachelor's degree and master's degree in computer science and engineering.

[5] A five-year contiguous bachelor's/master's pathway is available coordinating the existing bachelor's degree in critical race and ethnic studies and the MA/Credential Master's in education.

[6] Admission to DANM MFA suspended for the 2023-24 and 2024-25 academic years.

[7] A five-year contiguous bachelor's/master's pathway is available coordinating existing bachelor's degree in Earth sciences or environmental sciences and the M.S. degree in Earth sciences.

[8] A five-year contiguous bachelor's/master's pathway is available coordinating the existing bachelor's degrees and the ecology and evolutionary biology M.A.

[9] The state of California does not allow academic majors in education that lead to a teaching credential. Instead, we offer an undergraduate major in education, democracy and justice and two minors in education for students who are considering a career in teaching or who hold a more general interest in educational studies. Please note that the major and minors in education do not provide a California Teaching Credential. Additionally, please note that the UC Santa Cruz teaching credential program is a graduate program and coursework taken in the major or minor cannot be substituted for credential requirements, except in specifically designated pathways.

[10] UCSC offers the professional clear Cross-cultural, Language, and Academic Development (CLAD) and Bilingual Cross-Cultural, Language and Academic Development (BCLAD) multiple subjects credentials, which are used in self-contained elementary classrooms (K-6) where all subjects are taught by the same teacher. UCSC also offers the CLAD and BCLAD single subjects credentials, which are used in departmentalized settings where the teacher is responsible for one subject (7-12).

[11] A five-year contiguous bachelor's/master's pathway is available coordinating the existing bachelor's degree and the M.A/Credential Master's in Education.

[12] A five-year contiguous bachelor's/master's pathway is available coordinating the existing bachelor's degrees and M.S. in Electrical and Computer Engineering.

[13] A Master of Fine Arts (M.F.A.) degree is awarded in digital arts and new media, social documentation, and environmental art and social practice.

[14] Environmental Studies / Earth Sciences Combined B.A. discontinued beginning Fall 2024.

[15] Admission for the Feminist Studies Ph.D. suspended for the 2025-26 academic year.

[16] Admissions to the Games and Playble Media Professional M.S. suspended for the 25-26 academic year.

[17.] Admissions for the History M.A. reinstated the 2025-26 admissions cycle.

[18.] A four-year contiguous bachelor's/master's pathway is available coordinating the existing bachelor's degree in Latin American and Latino Studies and the M.A/Credential Master's in Education..

[19] A five-year contiguous bachelor's/master's pathway is available coordinating the existing bachelor's degree and master's degree in linguistics.

[20] A four-year contiguous bachelor's/master's pathway is available coordinating the existing bachelor's degree in Literature and the M.A/Credential Master's in Education.

[21] A five-year contiguous bachelor's/master's pathway is available coordinating the existing bachelor's and master's degree in mathematics.

[22] A Bachelor of Music (B.M.) degree in music also available. A Doctor of Musical Arts (D.M.A.) degree in composition is also available.

[23] A five year contiguous bachelor's/master's pathway is available coordinating the exiting bachelor's and master's degree in philosophy.

[24] A five-year contiguous bachelor's/master's pathway is available coordinating the existing bachelor's degree and master's degree in physics. Students in the B.S./M.S. path can pursue concentrations in material and device physics, energy and the environment, computational physics, and medical biophysics.

[25] A five-year contiguous bachelor's/master's pathway is available coordinating existing bachelor's degrees in applied mathematics, mathematics, computer science, robotics engineering, physics, applied physics, physics (astrophysics), and the M.S. in scientific computing and applied mathematics.

[26] A five-year contiguous bachelor's/master's pathway is available coordinating the existing bachelor's degree in science education and the M.A/Credential Master's in Education.

[27] A five-year contiguous bachelor's/master's pathway is available coordinating existing bachelor's degrees and the M.S. in Statistical Science.

[28] Formerly Applied Economics and Finance

[29] Formerly Global Information and Social Enterprise Studies

[30] Formerly Contemporary Practices

[31] Formerly Western Art Music

[32] Formerly Classical Studies

[33] Theater Arts M.A. suspended for the 2025-26 academic year

[34] Admissions to the Anthropology Ph.D suspended for the 2025-26 academic year

Degrees

B.A. = Bachelor of Arts
B.M. = Bachelor of Music
B.S. = Bachelor of Science
D.M.A. = Doctor of Musical Arts
Ed.D = Doctor of Education
M.A. = Master of Arts
M.F.A. = Master of Fine Arts
M.S. = Master of Science
Ph.D. = Doctor of Philosophy

ACADEMIC UNITS

ARTS DIVISION

Porter College, D Building,
(831) 459-4940
http://arts.ucsc.edu

The Arts Division offers creative practice and critical, historical, and theoretical studies of art and culture at the undergraduate and graduate levels. The division is committed to building our students' innovative and analytic thinking as scholars and impactful voices and visions as artists through inclusive excellence. Instruction in the arts inspires and develops the skills needed for individual and collaborative thought and action within and beyond the university. Our faculty consists of artists, performers, historians, critics, makers, and theorists working across the arts in a global context, and addressing some of the most pressing issues of our day.

Undergraduate education in the arts includes Bachelor of Arts (B.A.) programs in art, art and design: games and playable media, creative technologies (online major), film and digital media, history of art and visual culture, music, and theater arts, and a Bachelor of Music (B.M.). There are also concentrations offered in film and digital media (integrated critical practice), history of art and visual culture (curation, heritage, and museums), and music (compositional practices, global musics and Western music). Minors are offered in film and digital media, history of art and visual culture, electronic music, jazz spontaneous composition and improvisation, Western music, theater arts, and dance.

Graduate programs include the Social Documentation Master of Fine Arts (M.F.A.), the Environmental Art and Social Practice Master of Fine Arts (M.F.A.), and the interdisciplinary digital arts and new media master of fine arts (M.F.A.) program (currently suspended) as well as the music Master of Arts (M.A.) and the theater arts Master of Arts (M.A.). Doctoral programs include the music composition Doctorate of Musical Arts (D.M.A.) and Ph.D. programs in music, visual studies, and film and digital media.

The Arts Division provides students with access to quality research, work and maker spaces, including a digital-arts research facility with two experimental media labs, along with a state-of-the-art music recital hall, practice rooms, electronic music studios, and recording facilities, four theaters for dramatic productions, filmmaking studios and editing suites, surround-sound screening theaters, drama and dance studios, painting and printmaking studios, a foundry (unique to the U.C. system), photography and computer laboratories, and specialized lecture and seminar classrooms, as well as the Art M.F.A. Lab and the recently opened SocDoc Lab at the UC Santa Cruz Westside Research Park. This year the UC Santa Cruz Arts Division is introducing a state-of-the-art artificial intelligence (AI) multimedia lab that will give students the opportunity to gain hands-on experience using the very latest in advanced technology under the supervision of faculty. The Arts, AI, Augmentation and Acceleration Lab, also known as the A4 Lab, will help the next generation gain access to advanced technology and its open-source ecosystem—preparing them for varied career opportunities. McHenry Library houses an extensive collection of books and periodicals on the arts, as well as an analog and digital slide collection, music scores and recordings, and one of the largest collections of films and DVDs in the University of California system. Exhibition space in the arts includes galleries for students, faculty, and visiting artists to show their work. The Mary Porter Sesnon Art Gallery presents curated exhibitions to the university community and the general public. The Institute of the Arts and Sciences Galleries, a focus for interdisciplinary creative work, exhibitions, conferences, symposia, and seminars, offers a robust schedule of programming and curatorial opportunities.

Other Division Highlights: The newly launched online B.A. major in Creative Technologies is the first online major in the UC system. The Performance, Play and Design Department offers a wide variety of performances in four venues, ranging from faculty-directed productions of classics and musicals on our Mainstage to intimate student-created productions. Student work is regularly broadcast on SCTV. The Music Department hosts an annual festival of contemporary music, April in Santa Cruz, and an opera in the spring quarter of each year, and presents a variety of solo and ensemble concert programs throughout the year. Music also hosts Classical Indian Music concert series, featuring world-renowned artists, funded by the Hasan Endowed Chair in Classical Indian Music. Music composition programs will also soon be supported by the newly announced Corday Family Chair in Music for Film, Television, Emerging Media, and Multimedia Collaboration. The History of Art and Visual Culture Department hosts a series of speakers and seminars each year on rotating topics, some of which are supported by the Rebele Endowed Chair, and sponsors the grad student-run journal Refract. The Art Department sponsors regularly scheduled public presentations, including an M.F.A. exhibition in the spring, as well as quarterly open studios and a print sale in the spring. The Film and Digital Media (FDM) Department offers a year-round Visiting Artists Series, co-sponsors the Visual Media Cultures Colloquium, curated by FDM Ph.D and visual studies Ph.D. students, and the end-of-year screenings for the M.F.A. in Social Documentation draw many Santa Cruz residents every year. Many of these events are supported by the Corday Family Chair in Writing and Television and Film. The Arts Division supports the dissemination and completion of student work through the Arts Dean's Fund for Excellence and Equity, the University of the Future Now! grants and provides professional mentorship opportunities through Arts Professional Pathways and departmental internship programs including a speaker series on expanding career paths and removing obstacles to careers in the arts.

For more information about specific programs in the arts, please visit catalog listings and web sites for: Art; Creative Technologies; Digital Arts and New Media; Film and Digital Media; History of Art and Visual Culture; Music; and Performance, Play and Design, which hosts Art + Design: Games + Playable Media and Theater Arts.

PROGRAMS OFFERED

Art B.A. (p. 41)

Environmental Art and Social Practice M.F.A. (p. 45)

UNDERGRADUATE PROGRAM

The Art Department's innovative, interdisciplinary studio art program focuses on the power of visual communication for personal expression and public interaction. Students learn hands-on skills in a variety of fine arts mediums alongside rigorous conceptual approaches to critical thinking and art making. Students develop foundational skills in their first and second years, then launch into experimentation across media. Students explore personal projects alongside broader social, environmental and public projects. The Elena Baskin Visual Arts Studios at the University of California, Santa Cruz provide world-class facilities for art production in drawing, animation, painting, photography, foundry, metal, wood, new media and conceptual sculpture, print media, intermedia, critical theory, digital media art, public art, environmental art and social practice. The Art Department is invested in exploring diverse perspectives, world views, and approaches to art making. Diversity, equity and inclusion are core to our curriculum and teaching. Our goal is to prepare students for creative participation in a rapidly changing world.

The bachelor of arts degree prepares students for dynamic careers within the visual arts. Our graduates go on to pursue careers as professional practicing artists, as well as in arts education, arts management, art direction, social design, web design, photography, social practice and environmental art, curation and consulting, multimedia, illustration, animation, among other arts-related fields. Many of our students continue to study art and professional practices in graduate and post-graduate programs.

GRADUATE PROGRAM

The Environmental Arts and Social Practice M.F.A. integrates ecological thinking with social justice principles in a two-year degree program focusing on creative artistic inquiry and project-based research. Designed for students who seek to develop their artwork in relation to social and environmental justice questions, contexts, and communities, our place-based program emphasizes making and locating art in the world, with human and non-human collaborators, and grounded in individual and collective commitments, inventions, and aesthetic visions.

The program invites students to experiment with a breadth of approaches, art mediums, research methods, theoretical frameworks and technologies ranging from the traditional to the most contemporary, with the understanding that all media can be relevant in developing new approaches and responses to environmental and social issues. The program's interdisciplinary emphasis also encourages students to engage with other departments, divisions, centers, labs, and faculty across the university to deepen and enrich their research, and to partner with groups and organizations outside the university in the development and realization of their projects.

Students gain practical experience through direct engagement with places and communities and hone their skills of critical analysis, while studying methods, histories and theories of the field, and developing their own creative directions through their thesis projects. Students build career paths connecting multimedia art practices with environmental justice, social justice, public policy, public art, curatorial practices, art education, art writing, urban planning, landscape architecture, and other professional and creative practices.

COURSES FOR NON-MAJORS

The Art Department offers courses for non-art majors that fulfill general education requirements and offer students a chance to explore art to see if it interests them as a major.

These courses include ART 10D, 2D Foundation; ART 10E, 3D Foundation; ART 10F, 4D Foundation; ART 80E, Environmental Art in the Expanded Field (online course); ART 80T, Digital Tools for Contemporary Artists (online course); ART 101, Introduction to Computer Programming for the Arts; ART 20L, Introduction to Drawing (online course); and ART 106O, 2D Animation (online course).

ART B.A.

Information and Policies

Introduction

The Art Department's innovative, interdisciplinary studio art program focuses on the power of visual communication for personal expression and public interaction. Students learn hands-on skills in a variety of fine arts mediums alongside rigorous conceptual approaches to critical thinking and art making. Students develop foundational skills in their first and second years, then launch into experimentation across media. Studio art courses at UC Santa Cruz build skills and encourage creative innovation and intellectual rigor. Students explore personal projects alongside broader social, environmental and public projects. The Elena Baskin Visual Arts Studios at the University of California, Santa Cruz provide world-class facilities for art production in drawing, animation, painting, photography, foundry, metal, wood, new media and conceptual sculpture, print media, intermedia, critical theory, digital media art, public art, environmental art and social practice.

The Art Department at UCSC is invested in exploring diverse perspectives, world views, and approaches to art and art making. Diversity, equity and inclusion are core to our curriculum and teaching. Our goal is to prepare students for creative participation in a rapidly changing world.

The bachelor of arts degree prepares students for dynamic careers within the visual arts. Our graduates go on to pursue careers as professional practicing artists, as well as in arts education, arts management, art direction, social design, web design, photography, social practice and environmental art, curation and consulting, multimedia, illustration, animation, among other arts-related fields. Many of our students continue to study art and professional practices in graduate and post-graduate programs.

Program Learning Outcomes

Students who earn a Bachelor of Arts (B.A.) in Art will gain the skills, knowledge, and understanding that will enable them to:

- demonstrate proficiency in a range of techniques and media;
- demonstrate the ability to imagine, create and resolve a work of art incorporating research with an awareness of contemporary and historical practices, approaches and cultural perspectives;
- demonstrate the ability to discuss and revise their own and other students' artistic process and production based on a foundation in forms and ideas with a knowledge of diversity through multiple historical and contemporary contexts, cultural perspectives and approaches;
- demonstrate the ability to communicate in writing analysis of a work of art using vocabulary that reflects a foundational knowledge in the diversity of forms and ideas encompassing multiple historical and contemporary contexts, cultural perspectives and approaches.

Academic Advising for the Program

For more information and advising on the art major, please contact the undergraduate advisor at artadvisor@ucsc.edu. For junior transfer students, please also see more detailed information below under Transfer Information and Policy.

Getting Started in the Major: Frosh

Acceptance to the Art Major

This is a course-intensive and sequential program; students who intend to pursue this major must begin taking classes for the major in their first year at UC Santa Cruz. Students are encouraged to schedule an appointment with the undergraduate advisor in their first year to develop a plan of study. We recommend that students pass two foundation courses in their first year in order to meet the campus deadline to declare the major. However, all three foundation courses (ART 10D, ART 10E, ART 10F) are requirements for the major. A portfolio review is not required for frosh entry students.

Getting into Studio Classes

Studio art classes are primarily small (25 students or fewer), making room for both individual attention and instruction as well as opportunities to develop strong relationships and networking with faculty and fellow students.

General Education Requirements

Students are required to complete general education (GE) requirements alongside their major courses throughout their career at UCSC. Students who are unable to enroll in an art course in any given quarter are encouraged to complete general education requirements. It is important to balance major requirements and GE requirements throughout your career at UC Santa Cruz. Focusing exclusively on GEs during frosh and sophomore years could delay your graduation.

Transfer Information and Policy

Transfer Admission Screening Policy

Transfer students interested in the art major should plan to complete two art foundation (ART 10 equivalent) courses listed on assist.org prior to entering UC Santa Cruz. If students have not taken two equivalent foundation courses before arriving at UC Santa Cruz, they have the option of declaring the major through a portfolio review, as summarized in the section below. For full information on the portfolio review process, see our portfolio review page.

In addition to the two foundation courses, it is recommended that students have completed a minimum of three studio art courses prior to entering UCSC. These courses should be comparable to UCSC's ART 20 courses – transferable courses from California community colleges are listed on assist.org. It is also recommended that students complete two art history courses prior to entering UCSC for timely graduation.

Getting Started in the Major: Transfer Students

Once a student is accepted to the university and has submitted their Statement of Intent to Register, the undergraduate advisor will be in contact with the student regarding first quarter enrollment and an academic plan. Transfer students qualify to declare the art major by passing two art foundation courses (ART 10 equivalent courses) or by passing the portfolio review. The portfolio review waives the two required foundation courses. A declaration petition can be submitted as soon as a transfer student has completed either option.

Portfolio Review

A portfolio review is not required for transfer students if they have taken two art foundation courses (ART 10 equivalent courses listed on assist.org). If transfer students have not taken two art foundation courses, the portfolio review is an option to waive those two foundation courses.

A portfolio is not required for entering frosh students. Frosh students may refer to the Major Qualification section for qualification criteria.

Currently enrolled transfer students who wish to pursue art should contact the art advisor as soon as possible to get information on the portfolio review application.

Major Qualification Policy and Declaration Process

Major Qualification

Students entering UC Santa Cruz as frosh qualify to declare the art major after completing two courses from the list below.

Transfer students should consult the Transfer Admissions Screening Policy section above.

ART 10D	2D Foundation	5
ART 10E	3D Foundation	5
ART 10F	4D Foundation	5

Some courses may be satisfied via exam credit.

How to Declare a Major

Petition to declare your major as soon as you have met qualification requirements and/or reach your declaration deadline quarter, whichever comes first.

To declare, log into MyUCSC and click the link to submit the Petition for Major/Minor.

If you are eligible to declare, the art advisor will approve your petition and create or update your academic plan. It is recommended to schedule an advising appointment with the undergraduate advisor to review your academic plan.

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the department chair within 15 days from the date of the notification. Within 15 days of receipt of the appeal, the department will notify the student and college of the decision. Students should submit their petition via email to artadvisor@ucsc.edu.

Letter Grade Policy

Students must receive a C/P or higher for an art course to be applied toward the major.

Three-Year Pathway

The Art Department has a three-year pathway designed for students who want to complete their Art B.A. in three years. This is an intensive program that includes all of the courses for the current art B.A. major, as well as all of the general education requirements and electives for the university. Students should begin this pathway in their first year to be able to complete the required courses in three years. Summer Session attendance is required for all three years. For more information, contact the undergraduate advisor.

Course Substitution Policy

A maximum of three courses total from outside the Art Department (including UC Education Abroad Program [EAP] courses) may be substituted for regular art courses with the approval of a major advisor.

Double Majors and Major/Minor Combinations Policy

Study Abroad

The UC Santa Cruz Global Learning office offers students the opportunity to study abroad or away through a variety of programs. Art students typically participate during their junior year or over the summer, but can participate anytime during their studies after declaring their major. When considering participation in one or more of these programs, the student should be mindful that only three courses may be substituted in the art major and each must go through a review process upon return to UCSC.

Honors

Honors in the art major are awarded to graduating seniors whose academic performance demonstrates excellence at a grade point average of 3.95 or above in their upper-division art studio courses and ART 190A. Highest honors in the art major are awarded to graduating seniors whose academic performance demonstrates excellence at a grade point average of 4.0 in their upper-division art studios and ART 190A.

[Optional Catchall]

Materials Fee

A materials fee is required for some art studio courses. Materials fees are noted in the course description when applicable. A majority of courses do not carry an additional materials fee. The fee is billed to the student's account for specific course materials purchased by the Art Department through the university. Fees range from $120 to $175 per course. Students may incur additional expense purchasing individual supplies.

Requirements and Planners

Course Requirements

The Art B.A. requires a total of nine lower-division courses, eight upper-division courses, and completion of the senior comprehensive requirement. The comprehensive requirement may be fulfilled by ART 190B, Senior Project, as part of the required seven upper-division studios. The comprehensive requirement may also be fulfilled by a review of the students artwork by a ladder rank faculty. If the latter choice is selected, the student must then complete seven upper-division studios. Some courses may be satisfied via exam credit.

Lower-Division Courses

Students complete nine courses as follows. Some courses may be satisfied via exam credit.

The Foundation

All of the following (junior transfers must complete two at a community college):

ART 10D	2D Foundation	5
ART 10E	3D Foundation	5
ART 10F	4D Foundation	5

Introduction to Contemporary Art Practice

Three of the following (junior transfers should complete them at a community college):

ART 20G	Introduction to Print Media and Drawing	5
ART 20H	Introduction to Sculpture and Public Art	5
ART 20I	Introduction to Photography	5
ART 20J	Introduction to Drawing and Painting	5
ART 20K	Introduction to New Media and Digital Artmaking	5
ART 20L	Introduction to Drawing	5

Credit for ART 20L is granted for an AP Drawing score of 4 or higher.

Digital Tools

Students must take:

ART 80T	Digital Tools for Contemporary Art Practice	5

Critical Theory and Historical Context

Students complete two courses from the History of Art and Visual Culture (HAVC) geographic regions:

One course from Europe and the Americas: HAVC courses numbered 30-49 or 130-149

One course from Africa, Asia, Mediterranean, Native Americas, or Oceania: HAVC courses numbered 10-29, 50-80, 110-129, or 150-179.

A full list of courses by region can be found on the History of Art and Visual Culture program statement.

Note: A score of 3 or higher on the Advanced Placement (AP) Art History exam will satisfy the Europe and the Americas requirement.

Upper-Division Courses

Students complete eight courses as follows:

Studio Work

Students take seven upper-division studio courses. These include courses numbered ART 101—ART 189, ART 190B, ART 194, ART 196, ART 198, and ART 199. ART 190B satisfies both an upper-division studio as well as the comprehensive requirement.

Transfer students are strongly encouraged to take ART 194 during their junior year.

Electives

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in art is satisfied by completing:

ART 190A	Writing for Artists	5

Comprehensive Requirement

All art majors satisfy the capstone/comprehensive requirement with the following:

ART 190A	Writing for Artists	5

Plus one of the following options:

- Presenting an exhibition and, by appointment, meeting with a faculty member for review and critique of the exhibition; or
- Submitting a portfolio and, by appointment, meeting with a faculty member for review and critique of the portfolio; or
- Completing the following course:

ART 190B	Senior Project	5

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Art Major Planner (Incoming Frosh)

The following is a recommended academic plan for students to complete:

Year	Fall	Winter	Spring	Summer
Entering				College 1A Summer Edge (optional)

1st (frosh)	ART 10D College 1	ART 10E WRIT 1/WRIT 1E (if needed)	ART 10F	
2nd (soph)	ART 20 series HAVC * WRIT 2**	ART 20 series ART 80T	ART 20 series HAVC *	
3rd (junior)	UD studio	ART 190A UD studio	UD Studio	
4th (senior)	UD studio UD studio	UD studio	UD studio or ART 190B	

*Courses from history of art and visual culture (HAVC): one from Europe and the Americas, one from Africa, Asia, Mediterranean, Native Americas, or Oceania; please see HAVC Course List by Geographic Region.

** WRIT 2 should be taken in or before spring quarter of the second year.

In addition to the specific courses shown in these planners, a student must complete courses satisfying the CC, ER, MF, SI, SR, TA, and C General Education requirements.

Art Major Planner (Junior Transfers)

The following is a recommended academic plan for junior transfers who have completed three lower-division studios across three different media and partial IGETC:

Year	Fall	Winter	Spring	Summer
Entering				KRSG 1T Summer Edge (optional)
1st (junior)	UD Studio ART 10 Series†	ART 190A ART 80T	UD studio HAVC *	
2nd (senior)	UD studio HAVC *	UD studio UD studio	UD studio UD studio or ART 190B	

† Art 10 series: All three ART 10 series courses are required for junior transfers - two must be taken prior to entering UCSC. Art 10 series courses are offered in fall, winter and spring.

*Courses from history of art and visual culture (one from Europe and the Americas, one from Africa, Asia, Mediterranean, Native Americas, or Oceania; please see HAVC Course List by Geographic Region). It is recommended that junior transfers take history of art and visual culture courses at the community college. California Community College courses that can cover the history of art and visual culture requirement can be found on assist.org.

ENVIRONMENTAL ART AND SOCIAL PRACTICE M.F.A.

Introduction

The Master of Fine Arts (M.F.A.) in Environmental Art and Social Practice (EASP) is a unique graduate program that trains students to critically analyze, understand, and respond to the challenges of our contemporary era through creative artistic inquiry and project-based research. The two-year program is designed for the student who seeks a career in the field of environmental art and social practice artmaking as these forms relate to environmental justice, social justice, public policy, and multimedia art practices, criticism, and

theory. One of the first of its kind in the country integrating this dual focus, the program builds on the unique intellectual reputation of UC Santa Cruz as a leader in promoting social justice, ecological thinking, and inventive explorations of the nature/culture interface, and contributes to this ongoing legacy through the world-transforming potential of creative practice.

The field of environmental and social practice artmaking continues to develop rapidly in relation to the urgency of social and environmental pressures, requiring artists to learn new tools and strategies for effective engagement in society at large, along with important aspects of traditional artistic training. Within this frame, the program invites students to utilize a breadth of approaches, art mediums, research methods, theoretical frameworks, and technologies ranging from the traditional to the most contemporary, with the understanding that all media can be relevant in developing new approaches and responses to environmental and social issues. The program's interdisciplinary emphasis also encourages students to engage with other departments, divisions, centers, and faculty across the university to deepen and enrich their research, and to partner with groups and organizations outside the university in the development and execution of their projects.

Graduates of the program find employment in the art world and in academia as well as qualifying for job opportunities in hybrid and developing fields, including in green technology, environmental policy, public arts policy, community planning, public space design, and other forms of advising and design where creative approaches to problem-solving is called for. Depending on the focus of their thesis project, graduates' access to academic positions is not limited to art practice fields, but may include political theory, humanities, and social issue curricula, as well as hybrid and cross- disciplinary art programs linked with science, social science, and the humanities. Graduates may also work as arts administrators in a variety of institutions or seek employment in curatorial positions, journalism, research, and editorial positions, as well as in audio-visual production and in the digital economy. Some graduates may also work as self-employed artists or in unique positions that defy existing job categories and are specifically tailored to their skills and interests.

Objectives

The M.F.A. in Environmental Art and Social Practice program supports the development of a student's artistic practice in relation to issues and contexts relevant to these two related areas of study. The program aims to train students in practical skills as they relate to project-based arts research in the areas of: creative methodologies, critical analysis, historical perspectives, ethical standards, collaborative strategies, reflective critique, and art pedagogies.

Students learn to conceive and execute projects, articulate narratives to support their ideas, and establish working relationships with other practitioners in the field. They develop methods, perspectives, and concepts to support lifelong artistic inquiry and thriving careers, and to contribute to, and further develop, the emergent fields of environmental art and social practice.

Requirements

In the first year, students work collaboratively on practice-based research topics while studying methodologies, histories, theories and pedagogies relevant to the field. They also take electives relevant to their research interests chosen from course offerings throughout the university. In the spring of their first year they also take a 2-credit thesis course in which they develop a working bibliography and thesis outline.

In the second year, students develop and realize their thesis projects. They identify a focus and geographic location, find partners and design a project individually, or in collaboration. Each student's creative research is supported by a series of core critique classes as well as electives chosen by the student to deepen their knowledge and fine-tune their research direction, and by 2 credits of thesis advising every quarter. In the spring of the second year they also take a 2-credit curatorial class focusing on the public presentation of their M.F.A. research.

Course Requirements

A minimum of 71 credits are required for the Environmental Art and Social Practice M.F.A. degree. 51 credits are required core courses and 20 credits are electives.

First Year

Students take the following core courses in their first year. ART 230 can be taken in the first or second year.

ART 210A	Practice-Based Research Group: Sites	5
ART 210B	Practice-Based Research Group: Systems	5
ART 210C	Practice-Based Research Group: Contexts	5
ART 220	Methods and Histories	5
ART 230	Theory and Practice	5
ART 250	Writing Matters	5

Second Year

Students take the following courses in their second year. If students did not take ART 230 in their first year, they should take it in their second year.

ART 299F	Thesis Research	2
ART 270A	Project Development and Critique I	5
ART 270B	Project Development and Critique II	5
ART 280	MFA Project Production	5

ART 299F is taken each quarter of the second year for a total of 6 credits.

Electives

EASP students are required to take 20 credits of electives to support the development of their thesis project. Electives can be selected from any department of the university but students must have their elective choices approved by the director of Graduate Studies (DGS) (first year) or the student's Committee Chair (second year). The list below provides

examples of courses that EASP students have taken or might take, but it is not comprehensive and not all courses are offered each year. Electives can be graduate (ART 200+) or upper-division (ART 100+) courses, including upper-division art studio courses. However, students can take no more than 15 credits of upper-division coursework. Some courses may require consent of the instructor or have prerequisites. Consult with the affiliated department for more information.

Other Requirements

First-Year Review and Advancement to Candidacy

At the end of the spring quarter of their first year, students will present their thesis project proposal to their thesis committee in order to advance in the program. The committee will be selected by the student and approved by the graduate program director by the seventh week of the spring quarter of the first year. The thesis committee will include two EASP/Art Department Senate faculty members and an external member who may be faculty from another department or division, another institution, or a community member (the external members are selected based on their research interests and close work with the student).

At this time, students will present to their committee a final project proposal, revised and developed over the course of the first year, that will serve to direct their thesis research in their second year. Proposals will outline the focus of the project, conceptual and theoretical grounding, materials, location, partners and/or collaborators, preliminary annotated bibliography/list of related artworks, and a step-by-step plan for carrying out the project. Proposals will be evaluated based on clarity and quality of purpose, concept, and plan, feasibility within the time frame and budget proposed, evidence of established relationships with partners/collaborators, and potential to make a significant creative contribution to the field. The thesis committee must approve the thesis proposal/project outline no later than the end of the spring quarter of the first year.

[Optional Catchall]

Capstone/Thesis

Students meet with their thesis committee at least once a quarter, and more if needed, and with additional thesis advisors throughout their second year as they develop their thesis projects. For the M.F.A. thesis capstone, each student is required to present a public facing exhibition and/or other presentation of their creative work and submit a thesis paper that describes their thesis, research and findings, which will be no less than 25 pages. Students will also be required to pass an oral examination with their thesis committee.

The final exhibition may take place on campus or off campus with an accompanying component on campus. The M.F.A. thesis review committee will review each final thesis project in the spring quarter of the second year or after a student has completed a minimum of 71 credits. While form and media will vary greatly, completed thesis projects will reflect original creative research and professional level production (individually or collaboratively authored), as well as command of the field.

Applying for Graduation

Students should contact the department advisor to confirm all requirements for the degree have been completed. Students must submit an Application for the M.F.A. to the department for review by the end of the second week of the quarter in which you intend to receive the certificate.

ENVIRONMENTAL ART AND SOCIAL PRACTICE M.F.A. ELECTIVES

Suggested Electives for the Environmental Art and Social Practice M.F.A.

Environmental Art and Social Practice (EASP) students are required to take 20 credits of electives to support the development of their thesis project. Electives can be selected from any department of the university but students must have their elective choices approved by the director of Graduate Studies (first year) or the student's Committee Chair (second year). The list below provides examples of courses that EASP students have taken or might take, but it is not comprehensive and not all courses are offered each year. Electives can be graduate (ART 200+) or upper-division (ART 100+) courses, including upper-division art studio courses. However, students can take no more than 15 credits of upper-division coursework. Some courses may require consent of the instructor or have prerequisites. Consult with the affiliated department for more information.

Creative Technologies

Arts Division Dean's Office
302 Digital Arts Research Center
creative@ucsc.edu

Creative Technologies (CT) is the University of California's first online undergraduate major. Housed in the Arts Division, the major focuses on the arts, media, and design, emphasizing the study of conscientious creativity in digital environments. Digital arts/design environments are powerful and exciting spaces for the pursuit of justice, freedom of inquiry, and imagination, as well as for the cultivation of knowledge, democracy, and stronger communities. Students majoring in creative technologies may complete all of the major

requirements online, provided they have completed three prior quarters of in-person instruction (with at least six credits of in-person instruction per quarter) at a UC campus.

The CT program combines online and in-person modalities to allow UC Santa Cruz Arts students to earn their degree with fewer quarters of on-campus residency. It also combines courses from many arts genres and arts disciplines, allowing its students to pursue arts and design training without being stuck "in the box" of traditional arts genres or disciplines—instead, they move freely between those practices to gain more contemporary, collaborative, and multimedia arts experience.

Creative Technologies arose from a community need identified at UC Santa Cruz to comprehend how new media and new technology can be sites where we bring society's best futures into reality: futures in which justice, democracy, and sustainability arise from truly participatory works of art and design.

Creative Technologies graduates will be highly skilled users of technology in a job market that increasingly centers creative work. They will work in film, music, television, games, and other media, but increasingly, creative work is transformative in fields like law, healthcare, politics, non-profit organizations, schools, and in traditional businesses. CT grads will not just be artist-scholars, but user-experience designers, journalists, teachers, and other cultivators and curators of human knowledge.

CREATIVE TECHNOLOGIES B.A.

Information and Policies

Introduction

Creative Technologies (CT) is an online interdisciplinary arts and design major, with contributions from faculty across the Arts Division. Its curriculum features innovative teaching and learning environments, paired with an emphasis on emerging arts and design technologies and the active roles of artists and designers in cultivating a just and ethical society. Our courses intersect faculty commitments to justice, accessibility, equity, diversity, and inclusion—along cultural, gender, racial, economic, and social dimensions—with commitments to expanding access to innovative arts education, re-contextualizing and challenging Western and other hegemonic frameworks for art and design, and amplifying marginalized and historically silenced voices.

Students in creative technologies develop fluency in the languages and tools of contemporary media, arts, and design technologies, including technologies for creativity in sound, image, and animation; games and playable media; documentary and knowledge-curation media; web-based and participatory media; and creative interactions with machine learning and AI. At the core of the creative technologies ethos is a conviction that *technology literacy* is inseparable from *technology ethics*. Artists and designers are primary curators of knowledge, dialogue, and cultural representation; with those roles we hold a responsibility to cultivate community agency, democracy, environmental justice including climate action, and broad access to knowledge and social dialogue. To support that crucial work, the creative technologies program aims to prepare students for a lifetime of relevant, meaningful, and impactful creative engagement—while instilling capacity for work and play, activism and education, self-expression, self-efficacy, and even fun.

This program is delivered in lab-based online environments, operating both synchronously and asynchronously. The majority of its first-year curriculum, and some of its second, involves real-time interactions with teachers and classmates, via video and other live remote learning technologies. Courses will sometimes be offered "asynchronously," allowing students to navigate all materials at paces that suit their needs and interests. In both types of learning, creative technologies generates a robust community in which students learn through their collaborative journeys of art-making, engaging in critical inquiry, and critique. We aim to inspire collaborative art and design that connect online and traditional communities with creative vitality, critical inquiry, improvisation, and lasting meaning. You will learn how to navigate the platforms and venues in which sound and image, story and play, character and action, can be brought effectively to a wide and inquisitive public. And you will learn effective production practices—including improvisation, dialogue, research skills, and styles of collaboration—that bring complex, impactful projects to fruition.

Program Learning Outcomes

1. **Gain literacy in creative tools for digital expression**, and in the effective use of technology in arts and design: including digital platforms and algorithms, AI- and algorithmic arts and design tools, and emerging technology in a variety of media.

2. **Critically comprehend media and media culture**, potentially including institutions, creative labor and labor practices; the ethics of data, information, and digital platforms; with a focus on digital media's diverse impacts on dialogues surrounding tradition, culture, and racial, social, and environmental justice.

3. **Understand contemporary creative practices in their contexts**: relating them to the impactful practices of our contemporaries and predecessors; contextualized by theory, history, and ethics in the arts, design, and media.

4. **Learn strategies for bringing complex work to completion**, individually and collaboratively, across a variety of media, including written, image- and sound-based, performance-based, and socially engaged media.

5. **Cultivate a mindset of curiosity, dialogue, and growth**, with respect to one's work and process, and its social and ethical impact. We learn from mistakes as well as triumphs—ours and others'—as we work toward meaningful creative work and social change.

6. **Learn to engage in informed social practices**, shaped by reflection on practical activism for positive change; individual and collective identity; sustainability; equity; and justice; and by a community-focused commitment to re-contextualize and challenge Western and other hegemonic frameworks for art and design.

Academic Advising for the Program

Students who plan to major in creative technologies should meet with the undergraduate advisor early in their UC Santa Cruz career to create an academic plan that can accommodate the inflexible nature of major course offerings.

For more information and advising on the creative technologies major, please contact the undergraduate advisor at creative@ucsc.edu.

Getting Started in the Major: Frosh

Students interested in majoring in creative technologies are encouraged to speak with the undergraduate advisor early in their academic career. Due to the rigid nature of the courses, students move through the program in cohorts beginning their junior year. Incoming frosh do not need to satisfy any requirements prior to arriving at UCSC.

During the first two years, students should complete their general education requirements and major qualification requirements. Instruction in coding, 2D drawing, 3D modeling, and/or audio design is encouraged.

Transfer Information and Policy

Creative technologies is a non-screening major. Transfer students planning to apply to UC Santa Cruz with this major are not required to complete specific major preparation courses for consideration of admission.

Recommended Pre-Transfer Courses

To establish foundational knowledge and practices in arts and/or design prior to the major, the following courses are *recommended* prior to transfer:

- Coursework in programming, 2D drawing, 3D modeling, or sound design.
- At least one course in a justice-related topic, including *but not limited to*: courses in critical race and ethnic studies (or similar), indigenous studies, labor studies, disability and accessibility, feminist studies, gender studies, and/or courses on postcolonial or decolonizing practices.
- At least one course in critical art and media studies, including *but not limited to:* courses in the dissemination and interpretation of contemporary media; visual and aural culture studies; film studies; documentary or archive studies; media history; relationships between media, power, and representation; and critical studies of journalism, social media, or popular culture.

Planning for General Education:

Due to the availability of online courses outside of creative technologies, students are encouraged to complete the UCSC general education requirements in one of three ways:

1. Complete the Intersegmental General Education Transfer Curriculum (IGETC) or the California General Education Transfer Curriculum (CalGETC) from a California community college.
2. Complete the general education requirement from another University of California campus, if transferring from another UC.
3. Complete equivalent courses at another institution to apply toward the general education requirements at UCSC.

If students have not completed the general education requirements, they should ensure, prior to transferring, that they have completed coursework that satisfies the Ethnicity and Race (ER), Scientific Inquiry (SI), Statistical Reasoning (SR), and Composition (C) general education requirements. The Creative Technologies curriculum satisfies the remaining GE requirements.

Getting Started in the Major: Transfer Students

Students are admitted to UC Santa Cruz with a "proposed major" in most cases, and later petition to officially declare the major. Junior transfer students must be formally declared by the deadline in their second quarter of enrollment.

Transfer students are strongly encouraged to participate conscientiously in Summer Orientation, connect with the undergraduate advisor, and utilize transfer-focused campus partners like STARRS upon their arrival.

Major Qualification Policy and Declaration Process

Major Qualification

Qualification for the creative technologies major is determined by *required coursework* and a *personal statement*. In addition, prospective students are advised to consider a range of recommended courses that can help prepare them for the major.

Major Qualification Coursework:

Courses in the following two categories are required as part of the major qualification process:

- One introductory arts course in theory or history
- One practice-based, "maker"/production-oriented arts course

Students should consult the list of approved major qualification courses for examples of courses fulfilling the categories above. Courses not listed there may fulfill the requirement; please consult with the undergraduate advisor for information about the process to petition for that approval.

Personal Statement:

Prospective majors' personal statements should address three issues:

- (~1 paragraph) Describe relevant courses you have taken that you believe support your goals in the creative technologies major. You may wish to consult our list of "Recommended Courses" below.
- (~2 paragraphs) Describe a creative project that you are proud of, completed either in a course or in your own personal practice as an artist. Did you intend it for a specific audience, and if so, how did that intention shape the work? What did you hope audiences would gain from it? You may opt to describe a series of smaller projects, if you wish.
- (~1 paragraph) What are your aims in creative technologies? What kind of creative arts or design practices do you envision working on after you have completed your degree?

Additional Recommended Courses:

In addition, the following courses are recommended prior to qualification:

- Coursework in programming, 2D drawing, 3D modeling, or sound design.
- At least one course in a justice-related topic, including *but not limited to*: courses in critical race and ethnic studies (or similar), indigenous studies, labor studies, disability and accessibility, feminist studies, gender studies, and/or courses on postcolonial or decolonizing practices.
- At least one course in critical art and media studies, including *but not limited to:* courses in the dissemination and interpretation of contemporary media; visual and aural culture studies; film studies; documentary or archive studies; media history; relationships between media, power, and representation; and critical studies of journalism, social media, or popular culture.

Students who enter as frosh need to complete these major qualification courses early in their studies so that the petition to major status is accomplished by the end of their sophomore year.

Transfer students should complete the required coursework and declare the major by the end of their second quarter.

Appeal Process

Students who are informed that they are not eligible to declare the major can email the undergraduate advisor at creative@ucsc.edu for further information on the appeal process.

How to Declare a Major

Students should submit a petition to declare as soon as they complete the major qualification requirements or reach their declaration deadline quarter (whichever comes first). Please note that an academic plan must be on file for your petition to declare to be processed.

The Petition for Major/Minor is available in MyUCSC. Go to your Student Homepage and select the Undergraduate Student eForms tile > Petition for Major/Minor.

Students will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification courses.

Letter Grade Policy

This program does not have a letter grade policy outside the university's Pass/No Pass limit and minimum grade requirement (more information is available on the Pass/No Pass website).

Course Substitution Policy

Double Majors and MajorMinor Combinations Policy

Required Equipment

Given the online nature of creative technologies and its subject matter, students are required to own either a laptop computer, or a desktop computer and a tablet. Technology chosen in these categories need not be brand new, but should be capable of running the latest version of its respective (Mac, iOS, PC, etc.) operating system. All current creative technologies courses require a webcam and microphone, which are integrated into most recent devices.

Requirements and Planners

Course Requirements

Colloquium

Students must take at least three quarters of colloquium.

CT 1	Creative Interventions: A Colloquium in Contemporary Media	2

Breadth of Arts Electives

Students must take three Breadth of Arts elective courses. At least one of the three Breadth of Arts elective courses must be upper-division (numbered 100 and above). Courses relevant to the requirement, but not listed here (including graduate seminars), may be proposed to fulfill this requirement via petition; please contact the undergraduate advisor to learn about the petition process.

Students are encouraged to take courses in their preferred artistic media.

Students may choose from the following list of Breadth of Arts elective courses:

ART 10D	2D Foundation	5
ART 10E	3D Foundation	5
ART 10F	4D Foundation	5
ART 20L	Introduction to Drawing	5
ART 80E	Environmental Art in the Expanded Field	5
ARTG 80G	Visual Communication and Interaction Design	5
ART 80T	Digital Tools for Contemporary Art Practice	5
ART 101	Introduction to Computer Programming for the Arts	5
ART 104	Digital Video	5
ART 106O	2D Animation	5
ART 113	Illustrating Stories: Fantasy and Documentary Narratives	5
ART 125	Environmental Art Studio	5
ART 135	Digital Painting	5
ART 145	Vector Art and Illustration	5
ART 172	Public Art: Memory, Landscape, and Artist as Activist	5
ARTG 80H	Critical History of Digital Games	5
ARTG 91	Introduction to Game Art Production	5
ARTG 131	3D Game Art Production	5
ARTG 132	3D Character Rigging and Animation for Video Games	5
FILM 80A	The Film Experience	5
FILM 80M	Understanding Media	5
FILM 80S	Special Topics in Film and Digital Media	5
FILM 80T	Technothrillers	5
FILM 80V	Video Games as Visual Culture	5
FILM 80X	Sex in the Cinema	5
MUSC 11C	Popular Music in the United States	5
MUSC 11E	Global Popular Music	5
MUSC 14	Beginning Western Theory and Musicianship	5

Lower-Division CT Courses

Students take three lower-division core courses.

CT 10	Understanding Digital Design	5
CT 11	Digital Media Perspectives	5
CT 20	Introduction to Creative Coding	5

Upper-Division CT Courses

Students take eight upper-division courses; the Breadth of Arts elective (outlined above), plus the following. Courses marked with an asterisk are pending approval in the 2024-25 academic cycle.

- CT 100 - Digital Platforms: Observations and Practices
- CT 101 - Persuasion and Resistance: Power in Contemporary Digital Media *
- CT 110 - Sensors, Signals, and Interaction *
- CT 120 - Intermediate Creative Coding
- CT 125 - Collaborative Production Practicum *
- CT 195 - Creative Technologies Senior Studio *

Upper-Division CT Special Topics

Students choose one course from the CT 160 series:

- CT 160 - Fabrication and Production Studio *
- CT 161 - Narration and Participation: Modes of Representation in Media
- CT 162 - Immersive Reality Studio *
- CT 163 - Queer Art

Disciplinary Communication DC Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. The DC requirement in creative technologies is satisfied by completing the following two courses:

- CT 101 - Persuasion and Resistance: Power in Contemporary Digital Media *
- CT 195 - Creative Technologies Senior Studio *

Comprehensive Requirement

Students satisfy the senior comprehensive requirement by completing:

- CT 195 - Creative Technologies Senior Studio *

Planners

Major Program Planners

Film and Digital Media Ph.D. (p. 70)

Film and Digital Media Designated Emphasis (p. 73)

Social Documentation Designated Emphasis (p. 73)

UNDERGRADUATE PROGRAM

How do I translate my ideas into images and sounds? What is the role of media in an era of climate crisis? Are documentaries real? Does social media change democracy? How does listening inform our understanding of culture and environment? How can we move toward an algorithmically ethical future? Who and what has been left out of the history of cinema and television? Do streaming services make film history more or less accessible? Who should be responsible for caring for historical media? How can the study of media contribute to forging a more just and sustainable future?

Sound, images and code shape today's reality and our perspectives on the world. Students from diverse backgrounds join our program for its inclusiveness and the opportunity to explore media's past, present and future in relation to race, ethnicity, gender and sexuality, class, intersectionality, community, place, and environment, among others.

The Film + Digital Media general major is neither strictly a theory program nor a production program; it is both—a liberal arts program using a rich toolbox of practical skills and collaborative strategies (writing, research, coding, editing, image making, recording, cinematography) to ask questions critical to our shared future. The major prepares students to analyze and contribute to an ever-evolving and interconnected landscape of film, TV, animation, games, software, social media, and other media forms. Courses in the major connect students with faculty research strengths in nonfiction media, screen representation and race, feminist media, queer theory, experimental and avant-garde movements, animation, games and playable media, global cinema, video and computer art, personal media, and collections and archives. Students in the program have many opportunities to work with one another and to work closely with faculty members as mentors, critics, and sponsors of independent studies. Together, we share the excitement of remaking the study of film and other media for the 21st century, equipping students to critique and produce in ways that will create a more just, inclusive, equitable, and environmentally sustainable world.

Our curriculum reflects an understanding that intellectual and creative work are related forms of production and inquiry. Undergraduates in Film + Digital Media may enroll in both critical studies and production-focused classes, and some of our classes incorporate overlapping skills and knowledge. Each of our pathways through the major equips our students with a foundation in historical and theoretical concepts, and exposes them to global and cross-cultural perspectives on a constantly widening media spectrum.

GRADUATE PROGRAM

The Doctor of Philosophy (Ph.D.) program in film and digital media challenges the traditionally conceived borders between creative and critical practice. The program enables dialogue between creative practice and theoretical knowledge as related forms of intellectual work and provides the conditions for students to realize a wide range of possible projects, including those that exist across the traditional divides of critical studies and production.

FILM AND DIGITAL MEDIA B.A.

Information and Policies

Introduction

Students in the general film and digital media (FDM) major develop an understanding of major movements in world cinema and different aesthetic approaches to the medium while studying the cultural impact of television and the rise of video and digital art in recent decades.

The integrated critical practice concentration is designed for film and digital media majors who have a special aptitude for and interest in combining work in critical studies and production. The concentration provides them with a more rigorous pathway through the major and, in their senior year, allows them to work on a senior project that integrates creative and intellectual work.

Students in all facets of the major acquire skills in media analysis while maintaining a broadly based, liberal arts perspective.

Students enrolled in film and digital media production classes have access to audio, video, and digital production and postproduction equipment. Facilities include a digital media lab; stop-motion animation lab audio recording studio; sound stage with green screen; motion capture facility; digital nonlinear editing rooms; video format conversion rooms; a computerized sound effects library; and student equipment checkout. Additionally, computer laboratories equipped for digital image manipulation, web authoring, and interactive interface design and viewing rooms are available. The critical studies facilities include classrooms equipped for high-end film, video, and data projection. The library holdings in film and video history, theory, and literature are complemented by a large collection of films, videos, laser disks, and DVDs, including a diverse range of international feature films, experimental film and video work, animation, silent films, and documentaries.

Some courses offered by the Film and Digital Media Department are restricted in enrollment; admission is based on the completion of prerequisites and other specific written application requirements.

Upper-division digital media and production studio courses require coursework to be completed on computers. Instruction in and software for production courses utilizes the macOS platform and primarily consists of Apple and Adobe video production software packages. Many University of California, Santa Cruz, students purchase laptop computers. Film and digital media students who are considering purchasing a laptop computer for production work are encouraged to consult with the department's operations staff. A list of recommended computer configurations and information regarding education pricing on software packages is available on the Film and Digital Media website.

Program Learning Outcomes

Students who earn a B.A. in the film and digital media major will gain the skills, knowledge, and understanding that will enable them to:

1. Demonstrate their ability to employ research skills, including the use of appropriate print and technology sources in the discipline, to construct effective arguments.
2. Demonstrate that they understand the pre-production, production, and postproduction digital media and filmmaking process.
3. Demonstrate the relationship between different types of form and meaning through the creation of film and digital media projects or the critical analysis of them.
4. Demonstrate their ability to work collaboratively to produce a film or digital media project.
5. Demonstrate broad knowledge of film and media history internationally.
6. Demonstrate scholarly writing skills appropriate to the discipline of film and digital media.
7. Demonstrate an ability to analyze, interpret, and critique films and media from a variety of theoretical perspectives using the critical vocabulary and methodologies of the discipline.
8. Demonstrate their ability to articulate and defend their research and practice in a critical environment.

Academic Advising for the Program

Academic advising for the film and digital media major is done via email and advising appointments. Please email fdmadvising@ucsc.edu and refer to the department's website for the most up-to-date advising information.

Transfer students should review the Transfer Information and Policy Section.

Getting Started in the Major: First-Year Students

For information about getting started in the film and digital media major please see the Getting Started in the Major guide for first-year students.

This major is not highly sequential or course intensive. Students may begin taking courses toward the major in the first year, but it is not required.

Transfer Information and Policy

Transfer Admission Screening Policy

Film and digital media is a non-screening major. Students planning to apply in this major are not required to complete specific major preparation courses for consideration of admission to UC Santa Cruz.

Transfer students can finish the film and digital media general major requirements within two years. While not required for admission, transfer students are encouraged to complete UCSC general education requirements. the Intersegmental General Education Transfer Curriculum (IGETC), or the California General Education Transfer Curriculum (CalGETC) prior to transferring.

Getting Started in the Major: Transfer Students

To meet major qualifications, all major qualification courses (FILM 20A, AND either FILM 20B or FILM 20C) must be completed by the end of their first quarter in residence.

A maximum of two courses from another department or institution may be substituted if articulated through assist.org or approved by Film and Digital Media faculty. At least one of the major qualification courses must be taken at UCSC.

Transfer students are strongly encouraged to participate in the campus orientation programs, connect with the undergraduate advisor, and utilize transfer-focused campus partners like STARRS upon their arrival.

Major Qualification Policy and Declaration Process

Major Qualification

Students must complete two courses: FILM 20A, AND either FILM 20B or FILM 20C with letter grades of C or better or P grades to qualify for the film and digital media major. Letter grades of C- or below, and NP grades, may not be used to fulfill the major qualification requirements.

At least one of the major qualification courses must be taken at UC Santa Cruz.

FILM 20A	Introduction to Film Studies	5
	AND	
	Either one of these courses	
FILM 20B	Introduction to Television Studies	5
FILM 20C	Introduction to Digital Media	5

Appeal Process

Students may appeal a negative decision within 15 days by submitting an appeal letter to the film and digital media undergraduate advisor. The department will notify the student of the outcome within 15 days of receipt of the appeal.

How to Declare a Major

Students must submit a petition to declare and complete the major declaration workshop as soon as they complete the major qualification requirements or reach their declaration deadline quarter (whichever comes first).

Please see the department's website for details on the process for submitting the petition to declare and completing the declaration of major workshop.

Students petitioning to declare when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh; in their second quarter, for students admitted as junior transfers), will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification (MQ) courses.

Acceptance into the film and digital media major does not constitute acceptance into a concentration.

Letter Grade Policy

Letter grades of C or better or P grades are required in the major requirement courses (See Major Qualification above). Letter grades of C- or below, or NP grades, may not be used to fulfill the major's requirements. Students must follow the campus policy on grading requirements, including the P/NP grading policy.

[Optional Catchall]

Course Substitution Policy

A maximum of two courses from another department or institution may be substituted if articulated through assist.org or approved by Film and Digital Media faculty. For transfer students, FILM 20 equivalents completed at another institution do not count toward the two course maximum.

Double Majors and Major/Minor Combinations Policy

Study Abroad

The department strongly encourages students to explore studying abroad while attending UC Santa Cruz. Please see the UCSC Global Learning website for more information and consult with the undergraduate advisor as early as possible to discuss planning.

Film and digital media has unique department-based exchanges with the University of Sussex in England and the University of Bergen in Norway. UCSC Global Seminars taught by our Film and Digital Media faculty in Italy and Morocco are also offered. Students in these programs may be allowed an additional substitution for participation in these programs. Please see the Film and Digital Media Department's website for more information.

Honors

Honors in film and digital media are awarded to graduating seniors who meet or exceed a cumulative GPA of 3.5 in the required major courses.

Three-Year Pathway

The Film and Digital Media Department has designed a three-year pathway for students who want to complete their film

and digital media B.A. in three years. It is an intensive program that includes all of the courses for the current film and digital media general major as well as all general education requirements and electives required for the university. The three-year pathway is designed for the FDM general major; completing a concentration is not feasible for a three-year pathway. Students should begin the FDM general major three-year pathway in their first year to be able to complete the required courses in three years. A sample planner can be found on the university advising website. For more information, contact the Film and Digital Media undergraduate advisor.

Critical Studies and Production Pathways

For students interested in pursuing a focused area of study, the film and digital media major offers unique pathways embedded within the general major in critical studies and in production. If interested in pursuing these specialized academic plans, please contact the undergraduate advisor as early as possible. Please note that these pathways are not officially recognized on your transcript.

General Film and Digital Media Major

The film and digital media general major requires:

- Three lower-division courses
- Ten upper-division courses
- At least one of the upper-division courses must meet the department's diversity requirement
- Satisfaction of the senior comprehensive requirement
- Satisfaction of the Disciplinary Communication (DC) requirement.

Course Requirements

Lower-Division Courses

Take the following course:

FILM 20A	Introduction to Film Studies	5

Plus two additional 20-level courses:

FILM 20B	Introduction to Television Studies	5
FILM 20C	Introduction to Digital Media	5
FILM 20P	Introduction to Production Technique	5

FILM 20P cannot be used toward declaring the major.

Upper-Division Courses

Core Curriculum

The core curriculum consists of the following course, plus one course from each of the three groups below.

FILM 120	Introduction to Media Theory	5

One course from each of the following three groups:

Group 1:

FILM 130	Silent Cinema	5
FILM 132A	International Cinema to 1960	5
FILM 132B	International Cinema, 1960 to Present	5

Group 2:

FILM 134A	American Film, 1930-1960	5
FILM 134B	American Film, 1960-Present	5

Group 3:

FILM 136A	Experimental Film and Video	5
FILM 136B	History of Television	5
FILM 136C	Visual Culture and Technology: History of New Media	5
FILM 136D	Documentary Film and Video	5

Plus the Diversity Requirement

Students take at least one course from the following list focusing on non-Western perspectives, races, ethnicities, genders, classes, sexualities, or abilities. The course chosen will satisfy the Diversity Requirement along with its respective category of the Core Curriculum or upper-division elective requirement.

ANTH 110P	India and Indian Diaspora through Film	5
FILM 132A	International Cinema to 1960	5
FILM 132B	International Cinema, 1960 to Present	5
FILM 165A	Film, Video, and Gender	5
FILM 165B	Race on Screen	5
FILM 165C	Lesbian, Gay, and Queer Film and Video	5
FILM 165D	Asian Americans and Media	5
FILM 165E	Chicana/o Cinema, Video	5
FILM 165G	Gender and Global Cinema	5
FILM 168A	Arab and North African Cinemas	5
FILM 168F	Francophone African Cinema	5
FILM 168M	National Cinema and Culture: Morocco	5
HAVC 141O	Sex, Lies, and Surveillance: Contemporary Documentary Arts	5
LALS 122	Media and Nationalism	5

Non-FILM courses on this list will count toward the two-course maximum outlined in the Course Substitution Policy.

Students may submit a petition to the department to have other courses reviewed to satisfy the diversity requirement. Please send course syllabi to fdmadvising@ucsc.edu for review.

Plus one course from the following to satisfy the senior comprehensive requirement:

FILM 194A	Film Theory Seminar	5

FILM 194B	Electronic Media Theory Seminar	5
FILM 194C	New Media Theory Seminar	5
FILM 194D	Film History Seminar	5
FILM 194E	International Cinemas	5
FILM 194F	Film and the Other Arts	5
FILM 194G	New(s) Media	5
FILM 194H	Ethics and Documentary Filmmaking	5
FILM 194S	Special Topics Seminar	5
FILM 196A	Senior Project in Narrative Production	5
FILM 196B	Senior Project in Screenwriting	5
FILM 196C	Senior Project in Documentary	5
FILM 197	Senior Digital Media Workshop	5

Electives

Five (5-credit) upper-division elective courses are to meet the following criteria:

- Five courses total, in any combination of 5-credit critical studies (FILM 145, FILM 160 and the 180 series), production (FILM 150 and 170 series), and/or additional Core Curriculum courses (FILM 130/FILM 132/FILM 134/FILM 136 course, taken after its respective Core Curriculum requirement has been satisfied). FILM 185F (a two-credit course) is excluded from this list.
- A maximum of two upper-division electives may be taken in another department or at another institution if pre-approved by the Film and Digital Media Department.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement.

The DC requirement is met by passing one course from each of the two following categories:

First Category

FILM 130	Silent Cinema	5
FILM 132A	International Cinema to 1960	5
FILM 132B	International Cinema, 1960 to Present	5
FILM 134A	American Film, 1930-1960	5
FILM 134B	American Film, 1960-Present	5

Second category:

FILM 194A	Film Theory Seminar	5
FILM 194B	Electronic Media Theory Seminar	5
FILM 194C	New Media Theory Seminar	5
FILM 194D	Film History Seminar	5
FILM 194E	International Cinemas	5
FILM 194F	Film and the Other Arts	5
FILM 194G	New(s) Media	5
FILM 194H	Ethics and Documentary Filmmaking	5
FILM 194S	Special Topics Seminar	5
FILM 196A	Senior Project in Narrative Production	5
FILM 196B	Senior Project in Screenwriting	5
FILM 196C	Senior Project in Documentary	5
FILM 197	Senior Digital Media Workshop	5

Comprehensive Requirement

Senior Seminar

Seniors in the general film and digital media major satisfy the comprehensive requirement with one of the following senior-level classes.

FILM 194A	Film Theory Seminar	5
FILM 194B	Electronic Media Theory Seminar	5
FILM 194C	New Media Theory Seminar	5
FILM 194D	Film History Seminar	5
FILM 194E	International Cinemas	5
FILM 194F	Film and the Other Arts	5
FILM 194G	New(s) Media	5
FILM 194H	Ethics and Documentary Filmmaking	5
FILM 194S	Special Topics Seminar	5
FILM 196A	Senior Project in Narrative Production	5
FILM 196B	Senior Project in Screenwriting	5
FILM 196C	Senior Project in Documentary	5
FILM 197	Senior Digital Media Workshop	5

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Plan One is a guideline for students beginning the major early in the first term of their academic career.

Plan Two is a guideline for students considering the major after their first term.

Students following either plan are able to meet the campus' major declaration deadline and complete their degree in four years. In addition to the specific courses shown in these planners, a student must complete courses satisfying the UC Santa Cruz general education and degree requirements.

Plan One

Year	Fall	Winte	Spring	Summ

		r		**er**
Entering				College 1A Summer Edge (optional)
1st (frosh)	FILM 20A	FILM 20C WRIT 1/WRIT 1E (if needed)	FILM 20B or FILM 20P	
2nd (soph)	FILM 130 or FILM 132 or FILM 134 or FILM 136 WRIT 2*	FILM 120	FILM 130 or FILM 132 or FILM 134 or FILM 136	
3rd (jr)	FILM 130 or FILM 132 or FILM 134 or FILM 136 FILM Upper-Division Elective 1	FILM Upper-Division Elective 2	FILM Upper-Division Elective 3 (Diversity Requirement)	
4th (sr)	FILM Upper-Division Elective 4	FILM 194 or FILM 196 or FILM 197	FILM Upper-Division Elective 5	

* WRIT 2 should be taken in or before spring quarter of the second year.

Plan Two

Year	**Fall**	**Winter**	**Spring**	**Summer**
Entering				College 1A Summer Edge (optional)
1st (frosh)	FILM 80	WRIT 1/WRIT 1E (if needed)	FILM 20A	
2nd (soph)	FILM 20B WRIT 2*	FILM 20C or FILM 20P FILM 120	FILM 130 or FILM 132 or FILM 134 or FILM 136	

3rd (jr)	FILM 130 or FILM 132 or FILM 134 or FILM 136	FILM 130 or FILM 132 or FILM 134 or FILM 136	FILM Upper-Division Elective 3 (Diversity Requirement)
	FILM Upper-Division Elective 1	FILM Upper-Division Elective 2	
4th (sr)	FILM Upper-Division Elective 4	FILM 194 or FILM 196 or FILM 197	FILM Upper-Division Elective 5

* WRIT 2 should be taken in or before spring quarter of the second year.

Two-Year Transfer Planner

Year	Fall	Winter	Spring	Summer
Entering				KRSG 1T
				FILM 20A (Summer Edge - optional)
3rd (jr)	FILM 20A	FILM 20C or FILM 20P	FILM 130 or FILM 132 or FILM 134 or FILM 136	
	FILM 20B	FILM 120	FILM Upper-Division Elective 1	
4th (sr)	FILM 130 or FILM 132 or FILM 134 or FILM 136	FILM 194 or FILM 196 or FILM 197	FILM Upper-Division Elective 4	
	FILM Upper-Division Elective 2(Diversity Requirement)	FILM 130 or FILM 132 or FILM 134 or FILM 136	FILM Upper-Division Elective 5	
	FILM Upper-Division Elective 3			

General education requirements can be satisfied with Film and Digital Media courses are: IM, ER, CC, PE-T, PR-E, PR-C, DC.

General education requirements not satisfied with Film and Digital Media courses are: MF, SI, SR, TA, C

Integrated Critical Practice Concentration

The integrated critical practice concentration (ICPC) provides a rigorous pathway beyond the general major requirements. ICPC offers classes specifically reserved for seniors with exceptional abilities in both critical studies and production who seek to combine creative and scholarly work. The concentration consists of three lower-division and 13 upper-division courses. The senior comprehensive requirement and the disciplinary communication requirement are included within the 13 upper-division courses.

Admission to the integrated critical practice concentration will be granted to students who have excellent grades in film and digital media courses, an outstanding writing sample, a clear statement of purpose outlining a senior project that integrates critical studies and production work, and a strong Film and Digital Media faculty endorsement.

Students are eligible to apply for the integrated critical practice concentration in the last quarter of their junior year. Students may apply a second time if not accepted, but not later than the first quarter of their senior year.

Application materials and instructions are available on the department's website. Student application materials are reviewed by a committee of Film and Digital Media faculty.

ICPC course requirements at the time of application:

- Completed or are currently enrolled in FILM 120
- Completed or are currently enrolled in at least three other upper-division critical studies classes
- Completed FILM 170A or FILM 170B
- Completed one other course from the 150 or 170 series
- Declared film and digital media major
- In good academic standing.

ICPC application materials:

- Completed application form
- One-page statement of purpose
- Sample essay
- Statement of support from FDM faculty (submitted directly to the department undergraduate advisor)

Course Requirements

Lower-Division Courses

Take the following course:

FILM 20A	Introduction to Film Studies	5

Plus two additional 20-level courses

FILM 20B	Introduction to Television Studies	5
FILM 20C	Introduction to Digital Media	5
FILM 20P	Introduction to Production Technique	5

FILM 20P cannot be used toward declaring the major

Upper-Division Courses

Students in the integrated critical practice concentration complete the following required upper-division core curriculum:

FILM 120	Introduction to Media Theory	5

One course from each of the following five groups

Group 1:

FILM 130	Silent Cinema	5
FILM 132A	International Cinema to 1960	5
FILM 132B	International Cinema, 1960 to Present	5

Group 2:

FILM 134A	American Film, 1930-1960	5
FILM 134B	American Film, 1960-Present	5

Group 3:

FILM 136A	Experimental Film and Video	5
FILM 136B	History of Television	5
FILM 136C	Visual Culture and Technology: History of New Media	5
FILM 136D	Documentary Film and Video	5

Group 4:

FILM 170A	Fundamentals of Digital Media Production	5
FILM 170B	Fundamentals of Film and Video Production	5

Group 5:

FILM 194A	Film Theory Seminar	5
FILM 194B	Electronic Media Theory Seminar	5
FILM 194C	New Media Theory Seminar	5
FILM 194D	Film History Seminar	5
FILM 194E	International Cinemas	5
FILM 194F	Film and the Other Arts	5
FILM 194G	New(s) Media	5
FILM 194H	Ethics and Documentary Filmmaking	5
FILM 194S	Special Topics Seminar	5

Two courses to satisfy the senior comprehensive requirement:

The following course:

FILM 199	Tutorial	5

Plus one of the following courses:

FILM 195	Senior Thesis/Project	5
FILM 196A	Senior Project in Narrative Production	5
FILM 196B	Senior Project in Screenwriting	5
FILM 196C	Senior Project in Documentary	5
FILM 197	Senior Digital Media Workshop	5

Electives

Five upper-division elective courses to be chosen from the following:

Two upper-division critical studies courses

In film and digital media chosen from the following:

FILM 145	Social Media Documentary Theory and Production	5
FILM 160	Film Genres	5
FILM 162	Film Authors	5
FILM 162F	Female Filmmakers	5
FILM 165A	Film, Video, and Gender	5

FILM 165B	Race on Screen	5
FILM 165C	Lesbian, Gay, and Queer Film and Video	5
FILM 165D	Asian Americans and Media	5
FILM 165E	Chicana/o Cinema, Video	5
FILM 165G	Gender and Global Cinema	5
FILM 168	National Cinema and Culture	5
FILM 168A	Arab and North African Cinemas	5
FILM 168M	National Cinema and Culture: Morocco	5
FILM 180	Writing About Film, Television, and Digital Media	5
FILM 185D	Sound and Image in Theory and Criticism	5
FILM 185R	The Film Remake	5
FILM 185S	Advanced Topics in Film Studies	5
FILM 185X	EyeCandy Seminar	5
FILM 187	Advanced Topics in Television Studies	5
FILM 189	Advanced Topics in Digital and Electronic Media Studies	5

Three upper-division production courses

In film and digital media chosen from the following:

FILM 145	Social Media Documentary Theory and Production	5
FILM 150	Screenwriting	5
FILM 151	Film Directing	5
FILM 170A	Fundamentals of Digital Media Production	5
FILM 170B	Fundamentals of Film and Video Production	5
FILM 171A	Sound	5
FILM 171C	Special Topics Workshop: Found Footage	5
FILM 171D	Social Information Spaces	5
FILM 171F	Special Topics Workshop: Autobiographical Film	5
FILM 171S	Special Topics in Film and Digital Media Production	5
FILM 172	Narrative Video Workshop	5
FILM 173	Narrative Digital Media Workshop	5
FILM 175	Documentary Video Workshop	5
FILM 176	Experimental Video Workshop	5
FILM 177	Digital Media Workshop: Computer as Medium	5
FILM 178A	Personal Computers in Film and Video	5
FILM 178B	Advanced Personal Computers in Film and Video	5
FILM 179A	Special Topics in Animation	5
FILM 179B	Documentary Animation Workshop	5

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement.

The DC requirement is met by passing one course from each of the two following categories:

First category

FILM 130	Silent Cinema	5
FILM 132A	International Cinema to 1960	5
FILM 132B	International Cinema, 1960 to Present	5
FILM 134A	American Film, 1930-1960	5
FILM 134B	American Film, 1960-Present	5

Second category

FILM 194A	Film Theory Seminar	5
FILM 194B	Electronic Media Theory Seminar	5
FILM 194C	New Media Theory Seminar	5
FILM 194D	Film History Seminar	5
FILM 194E	International Cinemas	5
FILM 194F	Film and the Other Arts	5
FILM 194G	New(s) Media	5
FILM 194H	Ethics and Documentary Filmmaking	5
FILM 194S	Special Topics Seminar	5
FILM 196A	Senior Project in Narrative Production	5
FILM 196B	Senior Project in Screenwriting	5
FILM 196C	Senior Project in Documentary	5
FILM 197	Senior Digital Media Workshop	5

Comprehensive Requirement

One of the following courses

Seniors in the integrated critical practice concentration must complete one of the following courses:

FILM 195	Senior Thesis/Project	5
FILM 196A	Senior Project in Narrative Production	5
FILM 196B	Senior Project in Screenwriting	5
FILM 196C	Senior Project in Documentary	5
FILM 197	Senior Digital Media Workshop	5

Plus the following course

FILM 199	Tutorial	5

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

The following are two recommended academic plans for students pursuing the integrated critical practice concentration for the film and digital media major.

Plan One is a guideline for students pursuing the major, beginning in the first term of their academic career.

Plan Two is for students who begin pursuing the major after their first term.

Students who are interested in the integrated critical practice concentration should consider Plan One to be better prepared for application to production studio classes in their junior year. Four-year students following Plan Two should be able to pursue a concentration and still meet their expected graduation term.

In addition to the specific courses shown in these planners, a student must complete courses satisfying the UC Santa Cruz general education and degree requirements.

Plan One

Year	Fall	Winter	Spring	Summer
Entering				College 1A Summer Edge (optional)
1st (frosh)	FILM 20A College 1	FILM 20C WRIT 1/WRIT 1E (if needed)	FILM 20B or FILM 20P	
2nd (soph)	FILM 130 or FILM 132 or FILM 134 or FILM 136 WRIT 2*	FILM 120	FILM 130 or FILM 132 or FILM 134 or FILM 136 FILM Upper-Division Elective (Critical Studies)	
3rd (jr)	FILM 170A or FILM 170B	FILM 130 or FILM 132 or FILM 134 or FILM 136 FILM Upper-Division Elective (Production)	FILM Upper-Division Elective (Critical Studies)(Diversity Requirement) FILM Upper-Division Elective (Production)	
4th (sr)	FILM 194 FILM Upper-Division Elective (Production)	FILM 199	FILM 195 or FILM 196 or FILM 197	

* WRIT 2 should be taken in or before spring quarter of the second year.

Plan Two

Year	Fall	Winter	Spring	Summer
Entering				College 1A Summer Edge (optional)
1st	FILM		FILM	

(frosh)	80	WRIT 1/WRIT 1E (if needed)	20A
2nd (soph)	FILM 20B	FILM 20C or FILM 20P	FILM 130 or FILM 132 or FILM 134 or FILM 136
	WRIT 2*	FILM 120	
3rd (jr)	FILM 130 or FILM 132 or FILM 134 or FILM 136	FILM 130 or FILM 132 or FILM 134 or FILM 136	FILM Upper-Division Elective (Critical Studies)
	FILM 170A or FILM 170B	FILM Upper-Division Elective (Production)	FILM Upper-Division Elective (Production)
4th (sr)	FILM 194	FILM 199	FILM 195 or FILM 196 or FILM 197
	FILM Upper-Division Elective (Critical Studies)	FILM Upper-Division Elective (Production)	

* WRIT 2 should be taken in or before spring quarter of the second year.

Two-Year Transfer Planner

Year	Fall	Winter	Spring	Summer
Entering				KRSG 1T FILM 20A (Summer Edge - optional)
3rd (junior)	FILM 20A	FILM 20C or FILM 20P	FILM 130 or FILM 132 or FILM 134 or FILM 136	
	FILM 20B	FILM 120	FILM Upper-Division Elective (Critical Studies)	
	FILM 130 or FILM 132 or FILM 134 or FILM 136	FILM 170A or FILM 170B	FILM Upper-Division Elective (Production)	
4th (senior)	FILM 194	FILM 199	FILM 195 orFILM 196 or FILM 197	

FILM 130 or FILM 132 or FILM 134 or FILM 136	FILM Upper-Division Elective (Production)	FILM Upper-Division Elective (Critical Studies)
FILM Upper-Division Elective (Production)		

The following general education requirements can be satisfied with Film and Digital Media courses: IM, ER, CC, PE-T, PR-E, PR-C, DC.

General education requirements not satisfied with Film and Digital Media courses are: MF, SI, SR, TA, C.

FILM AND DIGITAL MEDIA MINOR

The minor in film and digital media offers a foundation in visual culture and contributes important scholarly techniques of value to other disciplines.

Students earn a minor in film and digital media by completing eight courses: FILM 20A and either FILM 20B or FILM 20C, and six upper-division courses including three from the core curriculum of the general major and three electives. There is no production component or comprehensive requirement in the minor. Courses may be completed for a letter grade or pass/no pass.

Declaring the Film and Digital Media Minor

Students who pass FILM 20A and either FILM 20B or FILM 20C are eligible to declare the film and digital media minor. To enroll in these classes, students contact the instructor and request a permission code.

Course Requirements

Lower-Division Courses

Complete the following course:

FILM 20A	Introduction to Film Studies	5

Plus one of the following courses:

FILM 20B	Introduction to Television Studies	5
FILM 20C	Introduction to Digital Media	5

Upper-Division Courses

Students in the minor must complete the following upper-division core curriculum.

One course from each of the following three groups:

Choose one of the following courses:

FILM 130	Silent Cinema	5
FILM 132A	International Cinema to 1960	5
FILM 132B	International Cinema, 1960 to Present	5

Plus one of the following courses:

FILM 134A	American Film, 1930-1960	5
FILM 134B	American Film, 1960-Present	5

Plus one of the following courses:

FILM 136A	Experimental Film and Video	5
FILM 136B	History of Television	5
FILM 136C	Visual Culture and Technology: History of New Media	5
FILM 136D	Documentary Film and Video	5

And three electives

Students take three additional 5-credit, upper-division film and digital media critical studies courses numbered FILM 100-149, FILM 152-169, FILM 180-189, or from the FILM 194 series. Production studio courses (FILM 150, FILM 151, and FILM 170A through FILM 179B) may not be used to satisfy this requirement.

Courses used to satisfy other requirements of the minor may not count toward the electives. One of the electives may be substituted from another department or institution. Course substitutions must be approved by the Film and Digital Media Department. For transfer students, FILM 20 equivalents completed at another institution do not count toward the one course maximum.

SOCIAL DOCUMENTATION M.F.A.

Introduction

The Master's of Fine Arts (M.F.A.) in Social Documentation (SocDoc) is an innovative interdisciplinary two-year program in the Film and Digital Media Department (FDM) that trains students to critically analyze, frame, and reflect on contemporary social issues through the art of documentary media. Designed for future documentarians committed to social change and to documenting communities, cultures, issues, and individuals who are marginalized in our current landscape of representation, the SocDoc Program supports students who share a commitment to social justice and human rights and who have a desire to study their subject areas in depth. In a rapidly expanding and changing field, SocDoc invites students to investigate critical social issues through an approach that fuses arts-based, social science and humanities research methods to artful and ethical documentary media practices. We prepare graduates for careers in independent and community media, public broadcasting, media education, human rights work and more.

Objectives

The Social Documentation M.F.A. program aims to train graduate students in critical thinking, social science analysis, arts-based approaches, and ethical standards for engaging with and documenting underrepresented communities. The curriculum concentrates on the analysis of social and structural systems, the creation of a rigorous and ethical approach in the collection and presentation of documentary material, and on the potential role of the documentary in social change.

SocDoc leverages faculty advisors across the campus to provide students with access to interdisciplinary expertise, grounding M.F.A. students in a deep understanding of their research subjects as well as in fluency with documentary production and postproduction techniques. Benefiting from deep faculty experience with media-making, documentary history, and community organizing, students in our program hone documentary approaches suited to their topical interests, ground themselves in social science analysis and research methodologies, and acquire professional skills, while maintaining a commitment to social justice and to communities in need. Central to our ethos is training in critical documentary frameworks, documentary ethics, and modes of community engagement and collaboration.

M.F.A. candidates build a curriculum around a required set of core courses that offer a foundation in the theory, methods, and production practices of social documentary, combined with elective courses in their substantive area of interest. The culminating work in the program is the creation of a creative documentary thesis project, developed in stages across the duration of the two-year degree.

Requirements

Course Requirements

The Social Documentation M.F.A. program offers a required and foundational core curriculum in the theory, history and practice of social documentary. Students work with three faculty advisors to design an individualized course of study that supplements the core curriculum with classes that support the student's specific project, both in terms of content and technical production. Toward that end, students take elective courses in their area of interest in the social sciences and/or humanities, write and develop a written thesis, and then create a final documentary media project.

A total of 72 credits is required to complete the SocDoc M.F.A. Required courses include seminars on social documentary history; practice, theory, and social science research; and technical instruction on production and post-production processes and techniques. Full-time enrollment is required.

First Year (32 credits):

Students must successfully complete all first-year core courses below, one FILM or SOCD graduate-level production elective, and one interdisciplinary elective related to their project research area. Students must enroll in at least one graduate-level FDM production elective every year.

Sometimes, this elective is a production elective with a SocDoc course number (for example SOCD 202 or SOCD 293, which offer instruction in a variety of different media platforms and are taught by a rotating group of instructors), but you may also choose from other graduate electives that have FILM course numbers, so long as the class has a production/making focus. The department regularly offers joint Ph.D. SocDoc making-focused courses with topics that change from year to year. Recent examples of these electives include: The Film/Video Essay (FILM 223), Expanded Documentary (FILM 230), Representing Memory (FILM 227), and Audiovisual Ethnography (FILM 232).

SOCD 200	Approaches to Social Documentation	5
SOCD 201A	Introduction to Documentary Field Production and Editing	5
SOCD 201B	Advanced Documentary Field Production and Editing	5
SOCD 201C	Project Planning for the Social Documentary	5
SOCD 203	Documentary Research Methods and Social Science Representation	5
FILM 202	Pedagogy in Film and Digital Media	2

Second Year (25 credits):

SOCD 294A	Production/Analysis/Editing	5
SOCD 294B	Production/Analysis/Editing	5
SOCD 294C	Production/Analysis/Editing	5
SOCD 295	Project Completion	5

Additional Course Requirements

Electives (15 credits)

In addition to the required courses above, 15 credits of electives (offered by departments) are identified individually in consultation with the director of Graduate Studies and faculty advisors. SocDoc students choose elective courses based on their research needs and interests and will be advised to take graduate elective courses offered by their thesis advisors. Students may also elect to take independent studies with their advisors as a form of concentrated study in a specialized area. (Please note that independent studies not may not be used to fulfill elective requirements.)

Advancing to Candidacy

To satisfy requirements for the M.F.A. degree, a student must complete and pass all of the required first-year courses and electives, assemble a committee of three (or more) advisors, develop a thesis proposal and successfully pass a qualifying examination (QE). The written thesis proposal serves as the basis for the QE. Approval of the written proposal and satisfactory completion of the qualifying examination is a prerequisite for advancement to further coursework or fieldwork on the master's project. The successful pre-

qualifying examination proposal should address the following:

- A detailed description of the subject to be documented
- A creative treatment
- A work plan including budget and timeline
- A preliminary annotated bibliography and filmography/videography of related works

The second year is focused on completion of the final documentary project, required for the M.F.A. degree. This project must reflect original research and creative activity while demonstrating a command of the field or topic of study. With an understanding of budgetary, equipment, and time limitations, students' projects should reflect a level of quality appropriate for exhibition.

Typically, the thesis expectation is as follows:

Documentary Film/Video: One 20-minute documentary suitable for broadcast and/or festival exhibition. Moving image work must include open captions to make the work accessible for deaf and hard-of-hearing viewers. All thesis films must be screened in an end-of-year M.F.A. exhibition screening.

Our core curriculum is oriented around filmmaking skills and the majority of our students create documentary films. Occasionally, SocDoc students have opted to create a social documentation creative project in a different format. There is some precedent for students working in: documentary still photography, audio documentary, animation, web-based/interactive documentary, documentary installation, and documentary performance. It may be possible to work in these and other forms, provided that appropriate advisors and resources can be available to support the project for the duration of the student's time in the program. The final presentation format for any non-film thesis projects must be determined in consultation with the advisors and director of Graduate Studies.

In addition to the creative thesis component, each student must produce a written thesis document (typically 15-20 pages), which should include an updated description of all the elements first elaborated in the first-year proposal, and should further reflect on the conceptualization, rationale, and methodology of the project in its finished form. A new section of analytical writing, describing the relationship between the documentary project and the field of social documentation, should be added. Bibliographies/mediographies (as appropriate to the discipline and form of the project) should also be revised and updated, in discussion with faculty advisors. The final M.F.A. critique consists of a thesis defense—a presentation and discussion of the student's thesis work with their advisors.

Final deliverables also include a basic website for the thesis project along with a trailer, a press kit, and other promotional materials. The public presentation of the project will complete graduation requirements. All materials will be filed in digital form and archived for future reference and access. All final projects, in every medium, must be submitted in the formats specified by the director of Graduate Studies.

[Optional Catchall]

Applying for Graduation

You must submit an Application for the M.F.A. to your graduate coordinator for review by the end of the second week of the quarter in which you intend to receive the certificate. The graduate coordinator will forward your application to the Graduate Division.

Please see Registration Requirements for all Graduate Degrees for details about registration requirement the quarter you intend to graduate.

For additional forms and information please visit the UC Santa Cruz Graduate Division website.

FILM AND DIGITAL MEDIA PH.D.

Introduction

This doctoral program integrates advanced media studies with practice-led research creation, enabling students to examine and produce work responsive to diverse forms of media in transition and in consideration of small- and large-scale cultural and environmental shifts. Through innovative coursework and close mentorship from program faculty, students develop rigorous interdisciplinary and practice-oriented methodologies for media research while pursuing their own creative practice. While our program is oriented by traditional film and media studies through a grounding in a range of forms including commercial and amateur cinema, radio transmission, television, sound and video art, and emerging digital media platforms, our faculty and affiliated faculty are attuned to pressing questions related to human and nonhuman existence, social justice, and cultural politics.

The program emphasizes international and cross-cultural perspectives, encouraging students to situate their media-making research within specific global contexts. This approach enables them to identify points of convergence across cultures while advancing new understandings of how media shapes broader cultural and historical transformations.

Graduates are prepared for careers in higher education, including teaching and research positions in media studies, film and television studies, digital culture, and related fields. The program's combination of theoretical rigor and creative practice also positions graduates for leadership roles in cultural institutions such as museums, film archives, arts organizations, and other spaces dedicated to moving image curation and preservation.

Advancement to Candidacy

Course Requirements

- A minimum of 108 units of study in coursework at UC Santa Cruz. Residence for a minimum of six quarters.

    - Applicants who already hold an M.A. or M.F.A. degree may petition to waive up to 30 credits of coursework; including up to two of the six required Film and Digital Media (FDM) Ph.D. electives; such a waiver is subject to the approval of the director of Graduate Studies. Such a waiver would advance the normative timeline described below; students will determine the exact timing of milestones with their advisors and the director of Graduate Studies.
- Residence for a minimum of six quarters.
- When in residence, students will take a minimum of 36 credits per year until advancement to candidacy.
- First-year students will be required to take the three foundational courses (FILM 200A-FILM 200B-FILM 200C), FILM 202 (Pedagogy in Film and Digital Media, 2 credits), plus at least two film and digital media graduate elective courses.*
- FILM 296F must be taken quarterly with the primary advisor until advancement to candidacy.
- Second-year students must then take at least four film and digital media graduate elective courses.*
- FILM 203 (Professional Development in Film and Digital Media) is a required course, to be taken after the first year.
- Students are not permitted to enroll in FILM 295 (Directed Reading) classes during their first year and are limited to one during their second year, unless they enter the program with an M.A. or M.F.A.
- Third-year students arrange three Directed Readings (FILM 295) to prepare for the three topic areas of their qualifying examination.
- Prior to advancing to candidacy, students will continue to meet the minimum number of credits with other 2-5 credit elective courses as appropriate.
- A student will thus take at least nine film and digital media graduate courses over the degree, not including FILM 295, FILM 297 and FILM 299 classes.
    - The remaining course units may be selected from film and digital media graduate courses or graduate courses other departments, subject to approval from the student's faculty advisor.
    - Any course taken to fulfill the six-course Film and Digital Media (FDM) Ph.D. elective requirement may only count once toward satisfaction of this elective requirement.
- Students must obtain permission from the director of Graduate Studies, their faculty advisor to take advanced undergraduate courses.
- Students are expected to complete at least one year of supervised teaching as part of the degree requirements.

*Non-film and digital media graduate courses that are taught by film and digital media faculty can count as film and digital media graduate electives. Graduate electives in this category are listed in the annual and quarterly courses posted on the Programs page on department's website, select Courses.

Foreign Language Requirements

Students must demonstrate proficiency in a language other than English. This may include a computer programming language instead of a natural language when such a language is integral to the student's field of study. The language requirement may be satisfied in one of two ways:

- by passing an upper-division course in a language related to the student's research;
- by passing a reading proficiency test administered by a qualified person approved by the director of Graduate Studies.

A student must pass the language requirement before taking Ph.D. qualifying examinations. There are three exceptions. (Documentation for the exception must be received and approved by the director of Graduate Studies at least two months before the qualifying examination.)

- The "foreign" language requirement may be waived for a non-English native speaker who has passed the proficiency test in English required for admission.
- The requirement may be waived for a student who is a native speaker of another language in addition to English. The student must submit a statement to the director of Graduate Studies attesting to their proficiency in the additional native language.
- The requirement may be waived if a student has proof of proficiency in a language other than English in the form of a language major or minor from recent undergraduate or master's level education or equivalent. This must have been completed within the past five years at an accredited institution.

Teaching Requirement

Students are expected to complete at least one year of supervised teaching as part of the degree requirements.

Pre-Qualifying Requirements

During the first year of study in FILM 200A-FILM 200B-FILM 200C classes, students will be introduced to the methodologies of developing a critical practice approach. This will occur while students simultaneously strengthen, with the appropriate elective classes, areas of theory or practice that pertain to their focus.

During the second year, the student will focus on selecting classes from the film and digital media elective series numbered FILM 200–FILM 289. Students will also be encouraged to take electives from other graduate programs on campus.

At the end of the second year, students undergo a second year review which functions as the master's examination. Students will submit four to five coursework projects for the examination. One of these must be the final project from FILM 200C. Students will also submit a statement about that work and its contexts, which will form the basis for oral examination questions by faculty members.

Students may nominate faculty members to the committee. The student's faculty advisor and the director of Graduate Studies will assemble the committee, taking into account the student's nominations. The committee will have a minimum of three faculty members, at least two of whom must be from the film and digital media faculty. One of those two must be the faculty advisor, who will chair the meeting. The committee must also include the director of Graduate Studies. (The director of Graduate Studies will not necessarily sit on the student's committee for future exams/reviews.) The examination is closed; only the student and the faculty committee will be present.

For students entering without a master's degree, the committee will recommend one of three grades for the M.A. examination: fail, pass, or pass with permission to proceed. Students who fail may retake the oral component of the examination one time. A student with a pass only may leave the program with the degree of master of arts. Students who pass with permission to proceed may enter the third year of coursework toward the Ph.D. For students entering with a master's degree, the committee will discuss the result of the review and its recommendations for further progress in the program, including the timeline to the Ph.D. qualifying examination (QE).

Qualifying Examination

The third year will be spent developing three qualifying examination topics that will lead to the dissertation in close consultation with the student's faculty advisor. (This may occur earlier for students who enter with a master's degree.) Students work with three faculty members to develop three distinct topic areas with a corresponding bibliography/mediagraphy in FILM 295 (Directed Reading). Topic areas must be pre-approved by the director of Graduate Studies who will ensure that the breadth requirement is met.

Students will also begin assembling a qualifying examination (QE) committee. The QE committee will be comprised of three faculty members, at least one of whom must be from another discipline at UC Santa Cruz or from another campus. Students will also nominate a faculty member to chair the examination committee. The chair should be a tenured faculty member from the Film and Digital Media Department, holding a Ph.D., but should not be the student's primary faculty advisor or the person who will chair the dissertation. The composition of the QE committee must be approved by the Graduate Division and must be submitted to the director of Graduate Studies at least five weeks prior to the written examination.

The qualifying examination will typically be scheduled for the fall of the fourth year and no later than the end of the fourth year. (Students who enter with a master's degree may be eligible to take the qualifying examination before their fourth year.) The QE will consist of a written examination and an oral examination. A student who fails the Ph.D. qualifying examination will be permitted to re-take it one time. During the qualifying examination quarter, students may enroll in up to two FILM 299 (Thesis Research) classes with members of their committee.

Post-Qualifying Examination Requirements

No later than two academic quarters after successfully passing the qualifying examination, students must submit and defend a Dissertation Prospectus. The candidate's dissertation committee must approve this prospectus. After the dissertation prospectus has been approved, the student will schedule a dissertation colloquium open to all film and digital media faculty and graduate students. The colloquium can be scheduled before or shortly after the official advancement to candidacy.

Students will advance to candidacy once they have successfully:

- completed all required coursework with satisfactory grade;
- satisfied the language requirement;
- passed the Ph.D. qualifying examination;
- organized an approved dissertation committee, through the dissertation nomination form; and
- defended a dissertation prospectus and had it approved by their dissertation committee.

[Optional Catchall]

Dissertation

Dissertation

Completion of the Degree

Upon successful advancement to candidacy, students must then complete the following requirements for the Ph.D.

The dissertation, or Ph.D. thesis, is to be an original contribution of high quality to the field of film and digital media. If a student's thesis contains a substantial creative component, the thesis project must also include a written component of no less than 75 pages. The dissertation must be approved by a committee consisting of a minimum of three faculty members. The dissertation chair must be a film and digital media faculty member and at least two committee members must be from the film and digital media faculty. If the dissertation chair does not hold a Ph.D. degree, then the majority of the remaining committee members must hold Ph.D.s. Also, the majority of the dissertation committee membership shall be members of the Santa Cruz Division of the Academic Senate.

The Ph.D. candidate shall submit the dissertation providing a minimum of 45 days for the committee members to review it. Once the committee has deemed it ready to defend, the

candidate will work with the department and committee to schedule the oral dissertation defense.

Dissertation Defense

The oral defense will be comprised of a brief introduction of the dissertation's form and content, and an articulation of the scholarly and artistic intervention it forges; the student will then answer questions posed by their dissertation committee. Invited members of the academic community may attend the defense, but the discussion will remain among the candidate and the committee.

Once the student has passed the oral dissertation defense, responds to any questions or suggestions for revisions, and has the dissertation approved by the committee, they will be eligible to "Announce Candidacy for Ph.D." by submitting the dissertation and required documents to the Division of Graduate Studies.

Academic Progress

Normative time for completion of the program is six years. The first two years of the program are primarily devoted to coursework. Preliminary exams for the master's degree occur in the spring of the second year. By the end of the third year, students should have formulated a dissertation topic and proposal deriving from their work in that year and should have nominated a Ph.D. qualifying examination committee and dissertation committee. Qualifying examinations for advancement to Ph.D. candidacy typically occur in the fall of the fourth year. These are approximate timelines, subject to variation depending on previous degree(s), transfer credits, substitutions, progress in program, leaves and/or other factors.

Applying for Graduation

You must submit an application for the Ph.D. to your graduate coordinator for review by the end of the second week of the quarter in which you intend to receive the certificate. The graduate coordinator will forward your application to the Graduate Division.

Please see Registration Requirements for all Graduate Degrees for details about registration requirement the quarter you intend to graduate.

For additonal forms and information please visit the UCSC Graduate Division website.

[Optional Catchall]

FILM AND DIGITAL MEDIA DESIGNATED EMPHASIS

Introduction

UC Santa Cruz graduate students enrolled in doctoral programs may obtain a designated emphasis in film and digital media as part of their Ph.D. degree.

Requirements

Students must meet the following requirements in order to obtain the designated emphasis:

Committee Composition and Departmental Approvals

Secure approval from a member of the film and digital media core faculty to serve as the advisor for the designated emphasis.

Course Requirements

Successfully complete four graduate courses (not independent studies) taught by either core or affiliated faculty of the film and digital media Ph.D. program. The courses must be pre-approved by the student's designated emphasis advisor.

Writing, Research and/or Teaching Requirements

Submit a significant piece of writing, or a project that includes both writing and creative practice, that demonstrates competence in the field of film and digital media. A writing submission could take the form of a seminar paper or dissertation chapter. A writing/creative project may be constituted from a range of possible media such as film, video, web-based or other digital media. The submitted project must meet the approval of the student's film and digital media advisor.

[Optional Catchall]

SOCIAL DOCUMENTATION DESIGNATED EMPHASIS

Introduction

UC Santa Cruz graduate students enrolled in doctoral programs may obtain a designated emphasis in social documentation as part of their doctoral or master of fine arts degree.

Requirements

Students must meet the following requirements in order to obtain the designated emphasis:

Committee Composition and Departmental Approvals

Secure approval from a member of the Film and Digital Media (FDM) faculty to serve as the adviser for the designated emphasis.

Have one faculty member from the FDM faculty serve on the student's qualifying examination committee or dissertation committee.

Course Requirements

Successfully complete four graduate courses within the Social Documentation Program curriculum. The courses must be pre-approved by the student's FDM faculty adviser. In most cases, these courses would include SOCD 200, SOCD 202,

and two others, but may be adapted to fit the needs of particular students.

Writing, Research and/or Teaching Requirements

Submit a significant piece of documentary work that demonstrates competence in the field of social documentation. This project could consist of a digital video or photography project, or possibly an audio or web-based piece, focused on the student's area of study and thus constituting a parallel investigation into the subject of the Ph.D. or M.F.A. dissertation. In certain circumstances, a documentary project on a subject other than the dissertation could be approved, but generally that would not be the case. The submitted project must meet the approval of the student's FDM faculty adviser.

[Optional Catchall]

History of Art and Visual Culture

D-201 Porter College
(831) 459-4564
havc@ucsc.edu
https://havc.ucsc.edu

PROGRAMS OFFERED

History of Art and Visual Culture B.A. (p. 74)

History of Art and Visual Culture Minor (p. 81)

Visual Studies Ph.D. (p. 81)

Visual Studies Designated Emphasis (p. 83)

UNDERGRADUATE PROGRAM

In the History of Art and Visual Culture (HAVC) Department, students study the production, use, form, and reception of visual products and cultural manifestations past and present. Objects of study include paintings, sculptures, and architecture, which are within the traditional purview of art history, as well as art and non-art objects and visual expressions that sit beyond disciplinary boundaries. The HAVC Department offers courses covering a wide variety of material from the cultures of Africa, the Americas, Asia, Europe, the Mediterranean, and the Pacific Islands, including media as diverse as ritual, performative expression, bodily adornment, landscape, the built environment, installation art, textiles, manuscripts, books, photography, film, video games, apps, websites, and data visualizations.

HAVC students at UC Santa Cruz investigate complex questions concerning the social, political, economic, religious, and psychological impact of images from the perspective of their producers, users, and viewers. Visual objects play a central role in the formation of values and beliefs, including the perception of gender, sexuality, ethnicity, race, and class. Through attentive historical study and close analysis, students are taught to recognize and assess these systems of value, and are introduced to theoretical and methodological frameworks for future research.

COURSES FOR NON-MAJORS

HAVC courses numbered 10-85 are lower-division introductory courses appropriate for non-majors. Most upper-division HAVC courses are also open to non-majors, but we recommend first completing at least one year of university coursework before taking upper-division classes.

GRADUATE PROGRAM

The Visual Studies Ph.D. offers an interdisciplinary program focused on visual-cultural scholarship, comprising specialized coursework and individual dissertation research in close coordination with faculty supervision. The expansive expertise of our diverse faculty addresses, and offers a broad scope of supervisory possibilities in researching, a variety of art forms and visual cultures with historical and contemporary perspectives and with global reach, including such regions as Sub-Saharan Africa, the Middle East, North America, Latin America, the Indigenous Americas (including pre-colonial California), Asia, Europe, the Mediterranean, and the Pacific Islands. Our program provides students with unparalleled opportunities to consider the role of social, political, and cultural forces in both shaping and being shaped by assorted modes of visual experience and their relations as well as to complex workings of multisensory perception. Areas of particular concern, both historical and current, include spatial and visual theories, environmental, social, and racial justice, colonial and decolonial visual culture, Anthropocene and Indigenous studies.

HISTORY OF ART AND VISUAL CULTURE B.A.

Information and Policies

Introduction

The history of art and visual culture (HAVC) curriculum guides students in acquiring skill in critical thinking about art and visual culture, leading to a bachelor of arts (B.A.) degree. The lower-division HAVC courses numbered 10-85, intended for general education students and prospective majors, provide an introduction to the field of visual culture according to geographic areas and visual traditions within those areas. Upper-division HAVC courses numbered 110-189 cover a broad range of issues in various aspects of world cultures from earliest times to the present. The most advanced HAVC courses, numbered in the 190-191 series, are taught in seminar format. Students also have the opportunity to take independent study courses and write senior theses.

Program Learning Outcomes

Graduates from the history of art and visual culture B.A. program will have demonstrated the following:

Program Learning Outcome (PLO) 1: Breadth of Knowledge

1a. Develop knowledge and understanding of diverse visual creations in different social and cultural contexts and/or historical periods.

1b. Develop knowledge of modes of production as well as technical and physical properties of the architecture, objects, images, and material cultures studied.

PLO 2: Analysis and Interpretation

2a. Conduct visual analysis proficiently using culturally and historically appropriate terms.

2b. Contextualize, evaluate, and/or explain visual, material, and historical cultural forms and values.

PLO 3: Research and Critique/Contextualization

3a. Formulate research questions and conduct research based on knowledge and critical evaluation of primary and secondary sources (archival, library, and/or field research) relevant to the discipline.

3b. Develop original interpretations and thesis statements based on factual evidence and critical argumentation.

3c. Identify and analyze dynamics of injustice, inequity, and other issues of critical/political concern that determine the production, reception, and continued legacy of visual, material, architectural, or spatial forms.

PLO 4: Critical Thinking and Reading

4a. Recognize, interpret, contextualize, and critically analyze different scholarly arguments, debates, and/or primary source materials.

4b. Consult and synthesize relevant literature in history of art, visual culture, and other disciplines to present independent analysis.

PLO 5: Written Communication

5a. Write clear, concise prose to present visual and historical analysis and interpretation.

5b. Formulate, present, and support strong, cohesive arguments in writing.

5c. Apply scholarly methods of citation, formatting, etc.

Academic Advising for the Program

Undergraduate Advisor

The undergraduate advisor offers specific information about navigating through the program and the curriculum and assists students with academic planning, requirements, policies and procedures, learning support, scholarships, and enrichment opportunities. Please contact the HAVC undergraduate advisor at havc@ucsc.edu.

Faculty Advisors

Faculty are the best resource for learning about the philosophies and foundations of history of art and visual culture. Faculty advisors can work individually with students to develop a specific course of study, recommend additional courses of interest, and discuss long-term career goals including education beyond the baccalaureate. A faculty advisor is selected by the student within one quarter of declaring the major or minor. Students choose a faculty advisor who specializes in their field of interest within HAVC.

Getting Started in the Major: Frosh

The HAVC major is not highly sequential or course intensive. Although it is advisable to begin taking courses toward the major in the first year, it is not required.

Lower-Division Coursework

It is recommended that students begin by taking four lower-division HAVC courses, each from a different geographic region. Students are encouraged to consult with the HAVC undergraduate advisor to develop a plan of study.

Languages

Though not required, all majors are encouraged to study at least one foreign language. Graduate programs in visual culture, art history, and other related disciplines generally require competence in one or more languages beyond English. Students are encouraged to consult with their faculty advisor to discuss an appropriate course of language study.

Transfer Information and Policy

Transfer Admission Screening Policy

Students may pursue the HAVC major even if they did not list it on their application. Students planning to apply in this major are not required to complete specific major preparation courses for consideration of admission to UC Santa Cruz. Transfer students are, however, encouraged to complete some of their lower-division history of art and visual culture requirements prior to transfer. Refer to the ASSIST articulation agreements at www.assist.org for approved lower-division courses offered at California community colleges. Transfer credit for courses from four-year institutions or for community college courses not included in the ASSIST system is evaluated on a case-by-case basis. To petition for transfer credit, submit a comprehensive syllabus and any supporting documentation (reading lists, papers written, etc.) to the HAVC undergraduate advisor by email to havc@ucsc.edu and specify the requirement you are petitioning to satisfy.

A student may transfer up to three lower-division and two upper-division art history courses toward the major. HAVC majors must take a minimum of eight regularly scheduled HAVC courses. Please keep in mind that the four lower-division courses required for the HAVC major must each satisfy a different geographic region.

Prospective students are also encouraged to complete the Intersegmental General Education Transfer Curriculum (IGETC), California General Education Transfer Curriculum (CalGETC), or to complete all UC Santa Cruz general education requirements before matriculation.

Getting Started in the Major: Transfer Students

Students seeking to declare the HAVC major should consult with the undergraduate advisor for assistance with academic planning. Please email havc@ucsc.edu.

Major Qualification Policy and Declaration Process

Major Qualification

To be eligible to declare the major, students must pass two lower-division HAVC courses, each from a different geographic region listed below:

- HAVC courses 10-19: Africa and its Diaspora
- HAVC courses 20-29: Asia and its Diaspora
- HAVC courses 30-49: Europe and the Americas
- HAVC courses 50-59: Mediterranean
- HAVC courses 60-69: Native Americas
- HAVC courses 70-79: Oceania and its Diaspora

HAVC 80 may be used to fulfill a lower-division requirement for one of the following geographic regions: 10s (Africa), 60s (Native Americas), or 70s (Oceania).

Upper-division HAVC courses may also be used to meet the major qualification criteria, as long as the lower- and upper-division courses cover two different geographic regions.

Appeal Process

The HAVC Department will make every effort to support students in declaring their major. Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the department chair within 15 days from the date of the notification. Within 15 days of receipt of the appeal, the department will notify the student and college of the decision. Students should submit their appeal via email to havc@ucsc.edu.

How to Declare a Major

Petition to declare your major as soon as you have met qualification requirements and/or reach your declaration deadline quarter, whichever comes first.

Step 1: Log into MyUCSC and click the link to submit the Petition for Major/Minor.

- If you are not logged into MyUCSC prior to clicking the petition link, you will need to navigate to your Student Homepage and select the Undergraduate Student eForms tile > Petition for Major/Minor to access the form.

Step 2: Schedule an advising appointment with the undergraduate advisor to develop an academic plan and review important information. This step is required to successfully declare. Please schedule an appointment via Navigate Slug Success.

Letter Grade Policy

Only courses completed with grades of C or better (or Pass) may be used to satisfy major requirements. Courses in which students receive a grade of C-, D+, D, D- or F cannot be used to satisfy major requirements. The HAVC major does not impose any limits on selecting the Pass/No Pass grading option to fulfill major requirements, but the university has an overall limit on how many courses can be taken Pass/No Pass. Please consult with your college academic advising office or the Office of the Registrar regarding those limits.

[Optional Catchall]

Course Substitution Policy

For the major, a student may transfer up to three lower-division and up to two upper-division art history courses taken from other institutions. To petition for transfer credit, submit a comprehensive syllabus and any supporting documentation (reading lists, papers written, etc.) to the HAVC undergraduate advisor by email to havc@ucsc.edu and specify the requirement you are petitioning to satisfy.

Double Majors and Major/Minor Combinations Policy

Study Abroad

UC Santa Cruz Global Learning provides excellent opportunities to take courses related to history of art and visual culture in a range of locations. The department strongly encourages HAVC majors and minors to take advantage of these educational opportunities. Students who wish to petition for credit toward HAVC major requirements for courses taken abroad must petition for transfer credit upon their return (courses do not automatically satisfy major requirements). Petitions are evaluated on a case-by-case basis. We look for evidence that the course(s) provided critical analysis of the class material in its social and cultural context, as well as significant reading and writing requirements. Please retain all relevant documentation (syllabi, reading lists, papers written, etc.) to support your case, and consult with the HAVC undergraduate advisor to plan your courses in advance.

Honors

Honors and Highest Honors in the Major

Honors and highest honors are awarded in the history of art and visual culture major to students who have shown a consistently outstanding level of performance throughout their coursework and maintained a superior GPA in the major. These distinctions are earned by only a small percentage of each graduating class. This notation appears on the transcript as well as on the diploma.

- Honors in the major are awarded to students with a GPA of 3.7 and above in all HAVC courses and with HAVC Department approval.*
- Highest honors in the major are awarded to students with a GPA of 3.9 and above in all HAVC courses and with HAVC Department approval.*

* Department approval is guided by consideration of criteria such as overall performance in HAVC coursework and the number of courses taken for a letter grade.

Honors in the Senior Comprehensive Requirement

All seniors must complete one HAVC seminar (courses in the 190-191 series) as their "senior exit" course to satisfy the senior comprehensive requirement. Seminars can be taken for senior exit credit only by permission of the instructor. Within the context of this advanced seminar, students will work under the close supervision of their professor to produce a written project that demonstrates a high level of achievement in research, writing, and critical thinking. Students whose performance is outstanding are eligible for honors in the senior comprehensive requirement.

[Optional Catchall]

Careers

The preparation students receive from the bachelor of arts (B.A.) degree in HAVC can lead to successful careers in education, law, business, and social services, in addition to more disciplinary-specific careers in museum curating, art restoration, library and information science, heritage studies, design, criticism, arts education and administration, and advanced studies in architecture, visual culture, and art history.

General Major

Course Requirements

The HAVC major requires four lower-division and nine upper-division courses for a total of 13 courses, including the satisfactory completion of the senior comprehensive requirement. Students must take courses in each of the six different geographic regions listed below to ensure cultural, methodological, and disciplinary breadth.

- For course offerings that satisfy specific geographic regional requirements, please see the Course List by Geographic Region.
- For a tentative list of courses offered during the current academic year, please visit the Undergraduate Courses page of the HAVC website.
- For a comprehensive list of all HAVC courses, please see the 'Courses' section of the general catalog.

Lower-Division Courses

Take four lower-division courses, each from a different geographic region listed below:

- HAVC courses 10-19: Africa and its Diaspora
- HAVC courses 20-29: Asia and its Diaspora
- HAVC courses 30-49: Europe and the Americas
- HAVC courses 50-59: Mediterranean
- HAVC courses 60-69: Native Americas
- HAVC courses 70-79: Oceania and its Diaspora

HAVC 80 may be used to fulfill a lower-division requirement for one of the following geographic regions: 10s (Africa), 60s (Native Americas), or 70s (Oceania).

Upper-Division Courses

Take the following course:

HAVC 100A	Approaches to Visual Studies	5

Plus two upper-division geographic regional courses:

Take two upper-division geographic regional courses, one each from the two geographic regions **not** studied at the lower-division level. These are:

- HAVC courses 110-119: Africa and its Diaspora
- HAVC courses 120-129: Asia and its Diaspora
- HAVC courses 130-149: Europe and the Americas
- HAVC courses 150-159: Mediterranean
- HAVC courses 160-169: Native Americas
- HAVC courses 170-179: Oceania and its Diaspora

Plus five upper-division electives:

These are any HAVC courses numbered 110-191.

The department encourages students to take cross-regional and topical courses. These are HAVC courses numbered 180-189, which can fulfill upper-division major elective requirements but do not fulfill specific regional requirements.

Plus one senior exit seminar:

HAVC seminar courses are numbered 190-191. The senior exit seminar can be taken any quarter in which a student is in senior standing. Seminars can be taken for senior exit credit only by permission of the instructor.

Electives

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. Students in HAVC meet the DC requirement by completing:

HAVC 100A	Approaches to Visual Studies	5

Comprehensive Requirement

All seniors must complete one HAVC seminar (courses in the 190-191 series) as their "senior exit" course to satisfy the senior comprehensive requirement. Seminars can be taken for senior exit credit only by permission of the instructor. Within the context of this advanced seminar, students will work under the close supervision of their professor to produce a written project that demonstrates a high level of achievement in research, writing, and critical thinking. Students whose

performance is outstanding are eligible for honors in the senior comprehensive requirement.

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information. Some general education requirements may be satisfied with HAVC courses.

Please note that LD = lower-division and UD = upper-division.

Four-Year Freshman Planner

	Fall	Winter	Spring	**Summer**
Entering				College 1A Summer Edge (optional)
Year 1 (Fr)	HAVC LD regional requirement	HAVC LD regional requirement WRIT 1/WRIT 1E (if needed)	HAVC LD regional requirement	
Year 2 (So)	HAVC LD regional requirement WRIT 2*	HAVC 100A	HAVC UD regional requirement	
Year 3 (Jr)	HAVC UD regional requirement	HAVC UD (any region)	HAVC UD (any region)	
Year 4 (Sr)	HAVC UD (any region)	HAVC UD (any region)	HAVC UD (any region) HAVC seminar	

*WRIT 2 must be taken before enrolling in HAVC 100A, and should always be taken in or before spring quarter of the second year.

In addition to the specific courses shown in this four-year planner, students must complete all general education requirements, some of which may be satisfied by HAVC courses.

Two-Year Transfer Planner

	Fall	Winter	Spring	Summer
Entering				KRSG 1T Summer Edge (optional)
Year 1 (Jr)	HAVC LD regional requirement	HAVC 100A	HAVC LD regional requirement	
	HAVC LD regional requirement	HAVC LD regional requirement	HAVC UD regional requirement	
			HAVC UD (any region)	
Year 2 (Sr)	HAVC UD regional requirement	HAVC UD (any region)	HAVC UD (any region)	
	HAVC seminar	HAVC UD (any region)	HAVC UD (any region)	

Concentration in Curation, Heritage, and Museums

This program is for HAVC majors who wish to pursue the study and practice of curation, heritage, and museums. Students will expand on the broad knowledge they gain through the major by means of a variety of historical, theoretical, and practical courses within the domains of

curation, museum studies, and critical cultural heritage studies. Students can use the concentration as a launching point toward internships or jobs in museums or cultural heritage institutions or to identify their interests for future graduate study.

Course Requirements

The HAVC major requires four lower-division and nine upper-division courses for a total of 13 courses, including the satisfactory completion of the senior comprehensive requirement. Students must take courses in each of the six different geographic regions listed below to ensure cultural, methodological, and disciplinary breadth.

- For course offerings that satisfy specific geographic regional requirements, please see the Course List by Geographic Region.
- For a tentative list of courses offered during the current academic year, please visit the Undergraduate Courses page of the HAVC website.
- For a comprehensive list of all HAVC courses, please see the 'Courses' section of the general catalog.

In fulfilling the major requirements, students in the concentration must successfully complete four courses from the “Approved Concentration Courses” list below. No more than one of the four courses can be lower-division and at least two of the four courses must be HAVC-sponsored courses. Upper-division concentration courses fulfill elective requirements for the major, or if appropriate, concentration courses can be used to fulfill geographic regional requirements. Students can petition to apply courses that are not on the approved list. Approval of petitions will be determined by the amount of relevant course content and assignments.

Lower-Division Courses

Take four lower-division courses, each from a different geographic region listed below:

- HAVC courses 10-19: Africa and its Diaspora
- HAVC courses 20-29: Asia and its Diaspora
- HAVC courses 30-49: Europe and the Americas
- HAVC courses 50-59: Mediterranean
- HAVC courses 60-69: Native Americas
- HAVC courses 70-79: Oceania and its Diaspora

HAVC 80 may be used to fulfill a lower-division requirement for one of the following geographic regions: 10s (Africa), 60s (Native Americas), or 70s (Oceania).

Upper-Division Courses

Take the following course:

HAVC 100A	Approaches to Visual Studies	5

Plus two upper-division geographic regional courses:

Take two upper-division geographic regional courses, one each from the two geographic regions **not** studied at the lower-division level. These are:

- HAVC courses 110-119: Africa and its Diaspora
- HAVC courses 120-129: Asia and its Diaspora
- HAVC courses 130-149: Europe and the Americas
- HAVC courses 150-159: Mediterranean
- HAVC courses 160-169: Native Americas
- HAVC courses 170-179: Oceania and its Diaspora

Plus five upper-division electives:

These are any HAVC courses numbered 110-191. Students in the concentration should note that courses from the "Approved Concentration Courses" list below will most likely be taken in the process of completing the five upper-division electives.

The department encourages students to take cross-regional and topical courses. These are HAVC courses numbered 180-189, which can fulfill upper-division major elective requirements but do not fulfill specific regional requirements.

Plus one senior exit seminar:

HAVC seminar courses are numbered 190-191. The senior exit seminar can be taken any quarter in which a student is in senior standing. Seminars can be taken for senior exit credit only by permission of the instructor.

Electives

Approved Concentration Courses List

HAVC 40	Museum Cultures: The Politics of Display	5
HAVC 141L	Museums in the Internet Era	5
HAVC 141M	Museum Practices	5
HAVC 141N	Data Cultures: Art, Technology, and the Politics of Visual Representation	5
HAVC 142M	Museum Exhibitions	5
HAVC 143F	Memory, Place, and Preservation in Modern Architecture	5
HAVC 178	Museums and Cultural Heritage in Oceania	5
HAVC 185	Community Engagement Through the Arts	5
HAVC 188A	Introduction to Curatorial Studies	5
HAVC 188B	Biennials and Mega-Exhibitions	5
HAVC 188C	Site-Specific Art, Installations, Artists and Institutional Practice	5
HAVC 188M	Visual Culture of Memory	5

ANTH 187	Cultural Heritage in Colonial Contexts	5
ANTH 187B	Cultural Resource Management	5
ANTH 196J	Imagining America	5
HIS 104D	Museums and the Representation of Native American History, Memory, and Culture	5

Students may petition for HAVC 199 or HIS 199 to count for a concentration course under certain circumstances. Students should consult the HAVC undergraduate advisor prior to enrolling.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. Students in HAVC meet the DC requirement by completing:

HAVC 100A	Approaches to Visual Studies	5

Comprehensive Requirement

All seniors must complete one HAVC seminar (courses in the 190-191 series) as their "senior exit" course to satisfy the senior comprehensive requirement. Seminars can be taken for senior exit credit only by permission of the instructor. Within the context of this advanced seminar, students will work under the close supervision of their professor to produce a written project that demonstrates a high level of achievement in research, writing, and critical thinking. Students whose performance is outstanding are eligible for honors in the senior comprehensive requirement.

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information. Some general education requirements may be satisfied with HAVC courses.

Please note that LD = lower-division and UD = upper-division.

HISTORY OF ART AND VISUAL CULTURE MINOR

The history of art and visual culture (HAVC) minor works well when combined with other programs offered at UC Santa Cruz. Many students choose to combine HAVC with other major/minor programs including but not limited to anthropology, art, business management economics, classical studies, critical race and ethnic studies, education, history, legal studies, literature, politics, psychology, and sociology.

For the minor, a student may transfer up to three lower-division art history courses taken from other institutions. Each course must satisfy a different geographic regional requirement. Refer to the articulation agreements at www.assist.org for approved lower-division courses offered at California community colleges. Transfer credit for courses from four-year institutions or for community college courses not included in the ASSIST system is evaluated on a case-by-case basis. To petition for transfer credit, submit a comprehensive syllabus and any supporting documentation (reading lists, papers written, etc.) to the HAVC undergraduate advisor by email to havc@ucsc.edu and specify the requirement you are petitioning to satisfy.

Students are eligible to declare the HAVC minor any time after declaring a major. Please visit the How To Declare page of the HAVC website for instructions.

Course Requirements

The HAVC minor requires three lower-division and six upper-division courses for a total of nine courses.

- For course offerings that satisfy specific geographic regional requirements, please see the Course List by Geographic Region.
- For a tentative list of courses offered during the current academic year, please visit the Undergraduate Courses page of the HAVC website.
- For a comprehensive list of all HAVC courses, please see the 'Courses' section of the general catalog.

Courses may be taken for a letter grade or pass/no pass.

Lower-Division Courses

Three lower-division courses, each from a different geographic region listed below:

- HAVC courses 10-19: Africa and its Diaspora
- HAVC courses 20-29: Asia and its Diaspora
- HAVC courses 30-49: Europe and the Americas
- HAVC courses 50-59: Mediterranean
- HAVC courses 60-69: Native Americas
- HAVC courses 70-79: Oceania and its Diaspora

HAVC 80 may be used to fulfill a lower-division requirement for one of the following geographic regions: 10s (Africa), 60s (Native Americas), or 70s (Oceania).

Upper-Division Courses

Six upper-division courses. These are HAVC courses numbered 110-191.

VISUAL STUDIES PH.D.

Introduction

The History of Art and Visual Culture Department offers a course of study leading to the Ph.D. in visual studies. Visual studies is an interdisciplinary program focused on visual-cultural scholarship, comprising specialized coursework and individual dissertation research in close coordination with faculty supervision. The expansive expertise of our diverse faculty addresses, and offers a broad scope of supervisory possibilities in researching, a variety of art forms and visual cultures with historical and contemporary perspectives and with global reach, including such regions as Sub-Saharan Africa, the Middle East, North America, Latin America, the Indigenous Americas (including pre-colonial California), Asia, Europe, the Mediterranean, and the Pacific Islands.

Our program provides students with unparalleled opportunities to consider the role of social, political, and cultural forces in both shaping and being shaped by assorted modes of visual experience and their relations as well to complex workings of multisensory perception. Areas of particular concern, both historical and current, include spatial and visual theories, environmental, social, and racial justice,

colonial and decolonial visual culture, Anthropocene and Indigenous studies.

Our graduates consider a range of theoretical approaches and significant methodologies for the study of visuality, including object-centered, ecocritical, de- and post-colonial, new materialist, and social-historical (feminist, antiracist, Indigenous, and Marxist) varieties. Students explore diverse cultural perspectives across time and space, and cultivate the necessary skills, knowledge, and expertise—including those of archival analysis, site-specific research, live interview and digital humanities techniques—in order to excel in academic, curatorial, publishing, and other related professional careers.

Focusing on a wide range of visual culture, our program is unconstrained by traditional mediums of art or conventional canons of art history. The capacious array of subjects examined in our courses and in the research of our faculty and students are as diverse as landscapes, ritual, performance, material culture, bodily adornment, popular entertainment, digital art and cybernetic data, photography, film, advertising, and design, as well as painting, sculpture, and architecture. Our Ph.D. program is particularly strong in comparative studies with historical and geographical expansiveness, examining significant differences in how disparate cultural groups engage, shape, and interpret their visual worlds.

Advancement to Candidacy

Course Requirements

Students take a minimum of 60 credits during their first two years of study, comprised of three core courses and nine electives.

Take the following three core courses:

HAVC 201A	Introduction to Visual Studies and Critical Theory	5
HAVC 202	Introduction to Visual Studies Methods	5
HAVC 204	Grant Writing, Pedagogy, and Professional Development	5

HAVC 201A: fall of the first year

HAVC 202: winter of the first year

HAVC 204: second year

Nine electives

Of the nine elective courses to be taken, at least five must have a visual studies designation (i.e., taught by core or affiliated faculty), and at least three must be drawn from departments outside of visual studies. Among the five visual studies electives, at least three must be from the HAVC courses numbered 212-282 and taught by core faculty, and at least one of the three must be a seminar course on a subject outside the student's disciplinary focus. Only two of the five visual studies electives may be independent study courses. Please review the visual studies website for a list of electives offered in the current year.

Field Clusters/Field Specialties

Appreciating that most of our graduates will be required to fit themselves back into traditional disciplinary structures once they enter the academic job market, the program is designed to provide students with both new means of interpreting visual evidence and suitable depth of understanding in older disciplinary traditions. While all graduates will acquire a shared foundation in different approaches to visuality (attained through our core course requirements), individual student programs vary considerably depending on the type of department or other intellectual and professional context in which the student hopes to secure employment after graduation. In addition to completion of the core courses required of all students, students will develop a cluster of individualized field courses in consultation with their advisor based on their particular professional goals.

To provide our students with the disciplinary background to facilitate employment within curatorial departments in museums and non-visual studies departments at colleges and universities, each student is required to take a minimum of four 5-credit courses in a disciplinary cluster (beyond the core course requirements). This requirement pertains both to students entering with a B.A. and an M.A. Acceptable field cluster courses might center on a medium (i.e., painting or architecture), a temporal/stylistic category (i.e., Early Modern or Postmodernism), a cultural, national, or social group (i.e., Pacific Islanders or China), or a disciplinary approach (i.e., cultural anthropology or gender studies). Field clusters are developed in consultation with the student's advisor based on the student's intellectual and professional goals. To count toward the degree, field clusters must receive prior approval from the director of graduate studies.

Foreign Language Requirements

Students must demonstrate reading knowledge of one foreign language prior to the start of their second year (either by attaining a score of 550 or higher on the Educational Testing Service Graduate Student Foreign Language Test or by passing a reading/translation examination administered by the department).

Students are encouraged to master a second foreign language. Based on a student's area of interest, and the joint assessment of the student's advisor and the director of graduate studies, proof of proficiency in an additional language or languages may be required prior to the student being admitted to candidacy for the Ph.D. Should proficiency in additional languages be required, it must be demonstrated prior to the close of the student's third year of study.

Teaching Requirement

Pre-Qualifying Requirements

Qualifying Examination

After completing all coursework and passing one language examination, students are required to pass a qualifying examination prior to the close of the winter quarter of their third year, unless a petition for an extension, demonstrating

reasonable cause, is approved by the visual studies director of graduate studies. The qualifying examination is divided into three topic areas, with each one including a written and an oral component. Each topic area should display historical breadth and variety of media. Two of the topic areas should ideally relate to the future dissertation topic, while one of the remaining must constitute an outside area, examining a topic that is chronologically, geographically, and/or methodologically distinct from the other two.

During their second year, a student should consult with their advisor to assemble a group of four faculty members who will serve as examiners and aid the student in assembling the necessary topic areas, compiling the needed reading lists, and preparing for the written and oral components of the examination in each area. The examination will have two parts. In part one, students will respond in writing to three general questions, posed by three of their examiners in the pre-arranged topic areas. In part two, students will gather together with their examiners to field questions probing and clarifying the previously submitted written component of the qualifying examination. In order to pass the qualifying examinations, students must receive the unanimous endorsement of the committee members.

Post-Qualifying Requirements

Dissertation Prospectus and Colloquium

After passing the qualifying examination, a student must complete an approved dissertation prospectus and a colloquium. The written dissertation prospectus is due no later than the end of the second quarter following the student's completion of the qualifying examination. The prospectus is a brief, concise essay of approximately 3000-5000 words (with bibliography) that defines the scope, methodology, and rationale for the proposed dissertation. It is prepared in consultation with the student's dissertation advisor, who must approve of the document prior to sending it to the colloquium committee. The prospectus must be sent to the colloquium committee at least one month before the colloquium.

The student and the dissertation advisor will invite three to four faculty members (including the advisor), in appropriate fields, to be on the colloquium committee, attend the colloquium, provide input on the prospectus, and assess the student's preparedness to begin researching and writing the dissertation. Faculty participating in the colloquium may or may not have been members of the qualifying examination committee, and should represent faculty whose expertise has bearing on the student's project. A student will pass the colloquium after having demonstrated to the satisfaction of all colloquium committee members adequate preparation to begin researching and writing the dissertation.

Advancement to Candidacy

Advancement to candidacy follows and is contingent upon passing the qualifying examination and all needed language examinations, completing an approved dissertation prospectus, passing the colloquium, and the subsequent appointment of a dissertation reading committee of at least three members. The requirements for advancement to candidacy must be completed no later than the end of the winter quarter of the fourth year.

MA En Route

Continuing Ph.D. students are eligible to apply for a non-terminal master of arts (M.A.) after fulfilling the following visual studies requirements:

- Complete the required Ph.D. coursework.
- Pass the language exam.
- Successfully complete the qualifying examination.

Dissertation

Dissertation

The dissertation must make a significant and original contribution to the field of visual studies, as judged by each dissertation committee member.

Dissertation Defense

An oral defense of the dissertation is the only final examination requirement, unless a petition to waive the oral defense, demonstrating reasonable cause, is approved by the student's primary advisor and the visual studies director of graduate studies. The student's dissertation committee, under the direction of an exam moderator, will conduct the examination. The moderator is selected in consultation with the faculty advisor and must be a visual studies core or affiliated tenured faculty who is not part of the dissertation reading committee.

Academic Progress

Applying for Graduation

Normative Time from Matriculation to Degree

The visual studies Ph.D. program at UCSC is designed to require six years of study. During the pre-candidacy period students will devote themselves to coursework, completion of the language examination, some teaching, preparation for and completion of qualifying examinations, completion of an approved version of their prospectus, passing their colloquium and selecting their dissertation committee. Requirements for advancing to candidacy must be completed by the end of winter quarter of the fourth year. Students will finish their dissertation and successfully defend it before the end of their sixth year.

[Optional Catchall]

VISUAL STUDIES DESIGNATED EMPHASIS

Introduction

UC Santa Cruz graduate students enrolled in doctoral programs may obtain a designated emphasis in visual studies as part of their Ph.D. degree.

Requirements

Graduate students enrolled in doctoral programs at UC Santa Cruz may obtain a Designated Emphasis in visual studies on their Ph.D. degree by meeting the following requirements:

Committee Composition and Departmental Approvals

Secure approval from a core member of the visual studies faculty to serve as an adviser for their designated emphasis.

Have at least one core member of the visual studies faculty serve on either their qualifying examination or dissertation committee.

Course Requirements

Successfully complete four graduate courses taught by either core or affiliated members of the Visual Studies program. The courses must form a coherent cluster in visual studies and be pre-approved by the student's designated emphasis adviser.

Writing, Research and/or Teaching Requirements

Submit a significant piece of writing that demonstrates competency in the field. The writing could take the form of a seminar paper or dissertation chapter. The essay must meet the approval of the student's visual studies adviser.

[Optional Catchall]

HISTORY OF ART AND VISUAL CULTURE COURSES BY GEOGRAPHIC REGION

Course List by Geographic Region

The courses listed herein fulfill geographic regional requirements for the history of art and visual culture (HAVC) major and minor. Please see the 'Courses' section of the general catalog for a comprehensive list of all HAVC course offerings, including cross-regional and topical courses (80s and 180s) and advanced seminars (190-191).

Note: Not all courses are offered each academic year.

Lower-Division Courses

HAVC 10 - HAVC 19: Africa and its Diaspora

HAVC 10	Introduction to African Visual Culture	5

HAVC 20 - HAVC 29: Asia and its Diaspora

HAVC 20	Visual Cultures of Asia	5
HAVC 22	Religion and Visual Culture in China	5
HAVC 24	Southeast Asia Visual Culture	5
HAVC 27	Image and Ideology in Indian Art	5
HAVC 28	Ghosts, Haunting, Memory, and Erasure in the Films of Asia	5

HAVC 30 - HAVC 49: Europe and the Americas

HAVC 30	Introduction to European Visual Culture	5
HAVC 35	European Visual Culture in a Global Context 1500-1900	5
HAVC 39	African-American Art	5
HAVC 40	Museum Cultures: The Politics of Display	5
HAVC 41	Introduction to Modern Art	5
HAVC 43	History of Modern Architecture	5
HAVC 44	Designing California: Architecture, Design, and Environment	5
HAVC 45	Photography Now	5
HAVC 46	Introduction to U.S. Art and Visual Culture	5
HAVC 47	Introduction To Contemporary Art	5
HAVC 48	Climate Justice Now! Art, Activism, Environment Today	5
HAVC 49	From Memes to Metadata: an Introduction to Digital Visual Culture	5

HAVC 50 - HAVC 59: Mediterranean

HAVC 50	Ancient Mediterranean Visual Cultures	5
HAVC 51	Greek Eyes: Visual Culture and Power in the Ancient Greek World	5
HAVC 55	Unclothed: The Naked Body from Antiquity to the Present	5
HAVC 58	Gardens of Delight: Fifteen Centuries of Islamic Visual Culture	5

HAVC 60 - HAVC 69: Native Americas

HAVC 60	Indigenous American Visual Culture	5
HAVC 64	Indigenous North American Materiality and Resistance	5
HAVC 65	Native American Art and the Environment	5

HAVC 70 - HAVC 79: Oceania and its Diaspora

HAVC 70	Visual Cultures of the Pacific Islands	5
HAVC 76	Oceanic Digital Arts	5

HAVC 80 may be used to fulfill a lower-division requirement for one of the following geographic regions: 10s (Africa), 60s (Native Americas), or 70s (Oceania).

Upper-Division Courses

HAVC 110 - HAVC 119: Africa and its Diaspora

HAVC 110	Visual Cultures of West Africa	5
HAVC 111	Visual Cultures of Central Africa	5
HAVC 115	Gender in African Visual Culture	5
HAVC 116	African Architecture	5
HAVC 117	Contemporary Art of Africa	5
HAVC 118	Art of the Contemporary African Diaspora	5
HAVC 119	Arts and Politics of African Urban Space	5

HAVC 120 - HAVC 129: Asia and its Diaspora

HAVC 122A	Sacred Geography of China	5
HAVC 122B	Constructing Lives in China: Biographies and Portraits	5
HAVC 122C	Writing in China	5
HAVC 122D	Chinese Landscape Painting	5
HAVC 122E	Art and Propaganda in China	5
HAVC 122F	Bodies in Chinese Culture	5
HAVC 123A	Modernity and the Arts of India	5
HAVC 123B	Religions and Visual Culture of South Asia	5
HAVC 124A	Arts of Ancient Southeast Asia	5
HAVC 124B	History of Photography in Southeast Asia	5
HAVC 124C	Arts and Politics in Theravada Traditions	5
HAVC 124D	Contemporary Art of Southeast Asia and its Diaspora	5
HAVC 124E	Southeast Asian-American and Diasporic Visual Culture	5
HAVC 127A	Buddhist Visual Worlds	5
HAVC 127B	Buddhist Pure Lands	5
HAVC 127C	Ritual in Asian Religious Art	5
HAVC 127D	Storytelling in Asian Art	5
HAVC 127E	Modern/Contemporary Architecture of the Asia Pacific	5
HAVC 127F	The Politics of Exclusion: Asian American Visual Culture	5

HAVC 130 - HAVC 149: Europe and the Americas

HAVC 133A	Themes in the Study of Medieval Visual Culture	5
HAVC 135B	German Art, 1905-1945	5
HAVC 135D	Art, Revolt, and Revolution in Europe 1750-1850	5
HAVC 135E	Jewish Identity and Visual Representation	5
HAVC 135F	Art of the Book in Western Europe 500-1600	5
HAVC 135G	Blood, Guts, and Gore: Representing War from Leonard da Vinci to Abu Ghraib	5
HAVC 135H	Topics in European and Euro-American Visual Culture	5
HAVC 135K	Art and Science in Europe 1500-1900	5
HAVC 135L	Nineteenth-Century Europe in Prints	5
HAVC 135P	Paris, Capital of the 19th Century	5
HAVC 137A	Northern Renaissance Art	5
HAVC 137E	Renaissance Prints	5
HAVC 140A	America in Art	5
HAVC 140B	Victorian America	5
HAVC 140C	Race and American Visual Arts	5
HAVC 140D	Chicano/Chicana Art: 1970-Present	5
HAVC 140E	Art and Science in America: Contact to circa 1900	5
HAVC 140F	Black Visual Culture	5
HAVC 140P	Pop Culture as High Art	5
HAVC 141A	Modern Art: Realism to Cubism	5
HAVC 141B	Death, Desire, and Modernity	5
HAVC 141C	Modern Art: Pop to Present	5
HAVC 141E	Histories of Photography	5
HAVC 141F	The Camera and the Body	5
HAVC 141H	Media History and Theory	5
HAVC 141I	Be Here Now: Art, Land, Space	5
HAVC 141J	Critical Issues in Contemporary Art and Visual Culture	5
HAVC 141K	Activist Art Since 1960: Art, Technology, Activism	
HAVC 141L	Museums in the Internet Era	5
HAVC 141M	Museum Practices	5
HAVC 141N	Data Cultures: Art, Technology, and the Politics of Visual Representation	5
HAVC 141O	Sex, Lies, and Surveillance: Contemporary Documentary Arts	5
HAVC 141P	Networks and Natures: Art, Technology, and the Nonhuman	5
HAVC 142	Contemporary Art and Ecology	5
HAVC 142M	Museum Exhibitions	5
HAVC 143A	Contemporary Architecture and Critical Debates	5
HAVC 143B	History of Urban Design	5

HAVC 143C	Latin American Modern Architecture	5
HAVC 143D	Architecture and the City in Modern and Contemporary Visual Culture	5
HAVC 143E	History of Design: The Objects of Technology, 1850-The Present	5
HAVC 143F	Memory, Place, and Preservation in Modern Architecture	5
HAVC 143G	After Utopia: Architecture and the City, 1968-Present	5
HAVC 144A	Latin American Art and Visual Culture	5

HAVC 150 - HAVC 159: Mediterranean

HAVC 151	Greek Myths Antiquity to the Present	5
HAVC 152	Roman Eyes: Visual Culture and Power in the Ancient Roman World	5
HAVC 153	Neither Venus Nor Virgin: Women's Lives Beyond Men's Constructs in Late Antiquity and Byzantium	5
HAVC 154	Byzantine Visual Culture: Politics and Religion in the Empire of Constantinople, 330-1453 A. C	5
HAVC 155	Constructing Cleopatra: Power, Sexuality, and Femininity Across the Ages	5
HAVC 157B	Italian Renaissance: Art and Architecture	5
HAVC 157C	High Renaissance	5
HAVC 157D	Art of the Venetian Renaissance	5

HAVC 160 - HAVC 169: Native Americas

HAVC 160A	Indigenous American Visual Culture Before 1550: Mexico	5
HAVC 160B	Indigenous American Visual Culture Before 1550: The Andes	5
HAVC 162A	Special Studies in Early Indigenous American Visual Culture: The Ancient Maya	5
HAVC 162B	Special Studies in Early Indigenous American Visual Culture: The Inka	5
HAVC 163	The Native in Colonial Spanish America	5
HAVC 164A	Art and Visual Culture of Indigenous California	5
HAVC 165	Indigenous Artists and the Borderland Missions	5

HAVC 170 - HAVC 179: Oceania and its Diaspora

HAVC 170	Art of the Body in Oceania	5
HAVC 172	Textile Traditions of Oceania	5
HAVC 178	Museums and Cultural Heritage in Oceania	5
HAVC 179	Topics in Oceanic Visual Culture	5

PROGRAMS OFFERED

Music B.A. (p. 87)

Music B.M. (p. 102)

Western Music Minor (p. 109)

Electronic Music Minor (p. 111)

Jazz, Spontaneous Composition, and Improvisation Minor (p. 113)

Music M.A. (p. 115)

Music DMA (p. 116)

Music Ph.D. (p. 119)

UNDERGRADUATE PROGRAM

The Music Department at UC Santa Cruz offers two undergraduate degrees: a Bachelor of Arts (B.A.) and a Bachelor of Music (B.M.). The B.A. degree offers a uniquely diverse curriculum, with the option of completing a concentration in either “Compositional Practices,” “Global Musics,” or “Western Music.” The B.M. degree is designed for students who intend to pursue a career in music performance. The department also offers minors in “Electronic Music,” “Jazz, Spontaneous Composition and Improvisation,” and “Western Music,” making the study of music more accessible to undergraduates majoring in other disciplines. Both B.A. and B.M. degrees are distinctive in that they integrate elements of performance, theory, composition, literature, history, and culture in order to produce graduates that are accomplished scholar-performers. Students leave UC Santa Cruz prepared for graduate studies and music careers in performance, teaching, and the digital arts.

Through these curricular offerings, students will encounter an extraordinarily rich variety of performance opportunities. Specifically, our students engage with music:

- as a cultural practice in ensembles focusing on musical traditions from Europe, Central Asia, Latin America, North America, South Africa, South Asia, and Southeast Asia;

- temporally in ensembles based on Baroque, Classical, Romantic, and contemporary idioms to deepen their understanding of performance practices;

● technologically in electronic music ensembles and workshops where students experiment with innovative technologies to develop their own projects with the support of their advisors and peers;

● collaboratively in seminars geared toward student composition and improvisation.

Students at UC Santa Cruz have extraordinary performance, composition, and professionalization opportunities. All instrument and voice faculty are celebrated professional musicians who provide unparalleled guidance for students in performance and professional development. Ensemble courses culminate in an end-of-quarter performance, providing students with regular performance opportunities in a world-class recital hall. Student composers frequently collaborate with Arts Division faculty and peers to create and showcase their works. The electronic music minor provides hands-on opportunities for students to learn a variety of techniques related to electronic sound production, composition, and recording in a state-of-the-art studio facility. The Opera Program allows students to be involved in every step of a major production, from concept and design considerations to marketing and arts management. As performers, composers, artistic collaborators, and event organizers, these programs allow students to develop musically and professionally for diverse career paths and industries.

Our programs shape responsible, independent, and highly capable young artists that will push the frontiers of their fields. Graduates from the Music Department at UC Santa Cruz are musically-attuned and socially-engaged global citizens in the 21st century.

COURSES FOR NON-MAJORS

All music courses are open to non-majors, with many fulfilling general education requirements while offering exploration in the field of music. Courses in the MUSC 11, MUSC 80, and MUSC 81 series cover a wide array of topics that may interest students, and do not have prerequisites for enrollment. Non-majors are also able to enroll in all performing ensembles and performance practice workshops. Non-majors are also able to enroll in applied lessons on instruments or voice (pending enrollment availability; lesson space is limited and declared music majors and minors are prioritized). Certain upper-division music courses are also open to students who have taken the relevant lower-division courses (such as those in the MUSC 11/MUSC 80/MUSC 81 series, and/or preparatory music theory courses). Students should consult music.ucsc.edu for further information regarding preparation and auditions, and contact the Music Department if they have further questions.

GRADUATE PROGRAM

There are three graduate programs in music: the Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in music and the Doctor of Musical Arts (D.M.A.) degree in music composition. The M.A. degree in music has emphases in composition, musicology/ethnomusicology, or performance practice, and integrates studies in performance, composition/analysis, and research. The Ph.D. degree in music has an emphasis in cross-cultural studies, and aims to provide doctoral students with an integrative framework for music scholarship, emphasizing the ways in which musicology and ethnomusicology interact and complement one another. The D.M.A. degree in music composition allows doctoral students to pursue various and intersecting areas of emphasis such as algorithmic/computer-assisted composition, cross-cultural compositional practices, improvisation, collaborative composition, and other contemporary practices, to provide a broad awareness of the diverse styles, cultural influences, media, venues, and technical means available to them in the 21st century.

FACILITIES

The Music Center includes a 400-seat recital hall that has recording facilities, specially equipped classrooms, individual practice and teaching studios, a student computer laboratory, rehearsal space for ensembles, a gamelan studio, and studios for electronic and computer music. McHenry Library has a separate music section and listening rooms that have individual audio and video facilities. Recording and media equipment is available from the Learning Technologies center.

MUSIC B.A.

Information and Policies

Introduction

The Music Department supports an unusually diverse curriculum for a department of its size. By a choice of concentrations within the bachelor of arts (B.A.) degree, the student can emphasize different aspects of music. The “Compositional Practices” and “Global Musics” concentrations offer a variety of modules (groupings of courses with various focuses) that students will be required to select from in addition to core requirements designed specifically for each concentration. All students pursuing the B.A. degree must select one of the three concentrations.

The concentrations and corresponding modules relevant to each concentration are:

Compositional Practices Concentration. A concentration emphasizing composition and improvisation across multiple genres of music composition. Modules offered are:

- Global Art Musics
- Spontaneous Composition and Improvisation
- Experimental Contemporary Musics. This module offers a variety of electronic music studio courses.

All module offerings are based on availability within the curriculum plan. Students should visit the Music Department website for a list of when each module’s courses will be offered.

Global Musics Concentration. A concentration emphasizing global music research, performance, and writing. Modules offered are:

- Africa and the Americas
- Asia
- Contemporary/Experimental
- Europe
- Jazz
- Popular Music
- World Music

All module offerings are based on availability within the curriculum plan. Students should visit the Music Department website for a list of when each module's courses will be offered.

Western Music Concentration. A concentration emphasizing classical Western art music performance, theory and history. This concentration requires some performance ability on a standard orchestral instrument or voice in classical repertoire (or improvisational repertoire for drum set majors) upon entry to the concentration. This concentration does not have a set of modules, but rather has a set course list of requirements.

The list of course requirements and when the courses are offered can be found on the Music Department website.

Program Learning Outcomes

The Bachelor of Arts in Music program in music is designed to help students accomplish the following learning outcomes:

1. Demonstrate critical familiarity with differences and commonalities among musical practices and their material conditions, across a diverse range of genres, cultures, and histories.
2. Demonstrate familiarity with analytical tools arising in theories of music, including those in music theory, ethnomusicology, and sound studies, as they are applied to musical sounds, practices, and repertoires in diverse musical contexts.
3. Demonstrate skills in listening, interpretation, and collaboration as they pertain to music-making across diverse oral and notational repertoires.
4. Demonstrate performance proficiency on a specific instrument (including voice specializations) across a range of musical genres, periods, and/or practices.
5. Demonstrate skills in music composition, improvisation and/or production including skills in audio technologies.
6. Demonstrate working knowledge of social science, humanities, and/or arts approaches to research in music-relevant topics.This includes qualitative and quantitative research methods for, gathering or obtaining research data, finding/using primary sources, and other research approaches/methods.
7. Demonstrate effective writing and interpretive skills to participate in disciplinary and interdisciplinary dialogue about musical practices, traditions, genres, ideas, and music-making spaces.

Academic Advising for the Program

General information about the music degrees is available on the department website. Students are also strongly encouraged to consult early with the Music Department advisor to create an academic plan for the major or a minor far in advance of declaration, as early as the summer before beginning at the university.

Transfer students should consult the Transfer Information and Policy section.

Please contact the department advisor by emailing music@ucsc.edu or calling (831) 459-2292. Slug Success is also available to make an appointment.

Getting Started in the Major: Frosh

This is a course-intensive and/or sequential program, and students who intend to pursue this major must begin taking classes for the major in their first year at the University of California, Santa Cruz. All students intending to major in music are strongly encouraged to email music@ucsc.edu to schedule a phone-advising appointment with the undergraduate advisor at some point during their first year.

The Theory Placement Exam is for placement of students, including transferring or re-entering students, into the appropriate Western music theory course (MUSC 14, or MUSC 30A). It includes written sections in the areas of theory and musicianship that emphasize aural recognition and identification of musical structures (intervals, chords, rhythms, meters, etc.). Students may prepare for the exam by honing skills in reading both bass and treble clef and in recognizing melodic and harmonic structures, and complex rhythmic patterns.

Students without any theory background, or weak aural skills, should plan to enroll in MUSC 20A in their first year in order to prepare for MUSC 14 and the placement exam. Admission to MUSC 30A is primarily based on the Theory Placement Exam scores, but students who get a final grade of "A" or "A+" in MUSC 14 are eligible to automatically place into MUSC 30A.

The Theory Placement Exam is held twice a year: on the Tuesday before instruction begins in fall quarter, from 10:00 a.m.-12:30 p.m., and right before the beginning of Winter quarter (schedule TBA). No signup is necessary. Students should bring a pencil. Students can visit the Music Department website to view the sample exam.

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to apply to UC Santa Cruz in this major are not required to complete specific courses for consideration of admission to UCSC.

Transfer students are strongly recommended to take some music theory courses before transfer to UC Santa Cruz, which generally enables them to test into one of MUSC 14 or MUSC 30A. They should also have completed most general education requirements, although some GE requirements may be fulfilled by lower-division courses in the major (such as courses in the MUSC 11, MUSC 80, and MUSC 81 series).

Getting Started in the Major: Transfer Students

Transfer students should plan to take the Theory Placement Exam before the start of fall quarter to place into MUSC 14 or MUSC 30A. It is an option for transfer students to take the examination prior to applying to UC Santa Cruz as a practice guide for future preparation, or in the spring quarter before their first fall quarter. Students can also visit the Music Department website to view the sample examination.

Transfer students can also take MUSC 14 when offered during Summer Session at UCSC prior to fall of their arrival. Taking MUSC 14 will help prepare students for the Theory Placement Exam and generally results in students placing into MUSC 30A. Admission to MUSC 30A is primarily based on the Theory Placement Exam scores, but students who get a final grade of “A” or "A+" in MUSC 14 are eligible to automatically place into MUSC 30A.

The Theory Placement Exam is held twice a year: on the Tuesday before instruction begins, from 10:00 a.m.-12:30 p.m. in the Music Center Recital Hall, and right before the beginning of winter quarter (schedule TBA). No signup is necessary. Students should bring a pencil.

All transfer students are strongly encouraged to email music@ucsc.edu to schedule a phone-advising appointment with the undergraduate advisor prior to application.

Major Qualification Policy and Declaration Process

Major Qualification

In order to qualify for the music major, students must successfully complete MUSC 14 or MUSC 30A (depending on major track) with a grade of "C" or better. A "Pass" grade is also acceptable since letter grades are not required for lower-division courses. Students in the Western Music concentration also need signature approval by the applied instrument instructor on the primary instrument authorization form.

Students approaching their major declaration deadline quarter (sixth quarter for four-year students, second quarter for transfer students), should reach out to the Music Department office as soon as possible to set up a declaration advising appointment.

Transfer students should also see the "Transfer Information and Policy" section below.

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the department chair within 15 days from the date the notification was mailed.

The appeal process can be started by emailing the undergraduate advisor in the music office.

Within 15 days of receipt of the appeal, the department will notify the student and college of the decision.

How to Declare a Major

All students should meet with the academic advisor to begin the major declaration process either by making an appointment (via Slug Success), by email to music@ucsc.edu, or by stopping by the department office, Music Center, Room 244 or 248. Students are also required to meet with a faculty advisor (assigned with help from the academic advisor) as part of the declaration process.

Students should submit a petition to declare as soon as they complete the major qualification requirements or reach their declaration deadline quarter (whichever comes first). The declaration deadline for four-year students is their sixth quarter, and the second quarter for transfer students.

Students petitioning when the campus declaration deadline is imminent, will either be approved, denied, or provided with conditions (e.g. completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification courses.

Letter Grade Policy

All upper-division courses applied toward the music majors must be taken for a letter grade, except MUSC 120 (Seminar in Composition) and upper-division workshops performing ensembles, which may be taken Pass/No Pass.

All lower-division courses, including those in the MUSC 30-series, may be taken Pass/No Pass.

Course Substitution Policy

Students who have taken introductory or topical large lecture music courses at other institutions may email the curriculum committee to propose course substitutions. To begin this process, email music@ucsc.edu.

Double Majors and Major/Minor Combinations Policy

Double majors **are** possible for the music major. A student can double major with a Music Bachelor of Arts (B.A.) Degree or a Bachelor of Music (B.M.) Degree, and a major

from another department. Students that plan to double major should meet with the music undergraduate advisor for course planning in fall quarter of their first year.

It is not possible to double major as a music B.A. and a music B.M. However, it is possible to pursue the B.M. and add the "Jazz, Spontaneous Composition and Improvisation Minor" or "Electronic Music minor." It is not possible to add the "Western Music Minor" to the Music B.A. or Music B.M. degrees.

Students are generally not able to add the "Western Music Minor" or "Jazz, Spontaneous Composition and Improvisation Minor" to the Music B.A. Compositional Practices or Global Musics concentrations in the Music B.A , due to potential overlap between these curricula. Similarly, the "Electronic Music Minor" cannot be added to the Compositional Practices concentration. **However, in rare cases, and with careful planning, these major/minor combinations can be possible**.

The "Jazz, Spontaneous Composition and Improvisation Minor" can be added to the Western Music concentration. The "Electronic Music Minor" can still be added to the Global Musics or Western Music concentration.

Study Abroad

The department encourages students to explore studying abroad while attending UC Santa Cruz. In particular, the UCSC Music Department has an exchange program agreement with the Music Department at the University of Sussex. University of Sussex offers many courses that can be substituted for music major or minor requirements.

For more information on approved course substitutions and the exchange program please visit the Global Learning website.

Honors

Honors in the major are conferred by vote of the music faculty. B.A. or B.M. students can be awarded honors for excellent work in individual areas, including coursework and a capstone course (research thesis or creative portfolio). Excellent work in any two of these areas normally results in honors in the major.

To be considered for highest honors in the major, B.A. students must also complete an additional senior project (not required for their concentration) and B.M. students must complete a capstone course (not required for the B.M. degree). Honors in all three areas—coursework, senior project, and capstone course—normally results in highest honors in the major.

How Music Majors Are Assessed

For students in the Western Music concentration:

1. Placement exams at the outset of studies assess students' musical competence, and determine their place in the required lower-division theory and harmony courses.
2. Admission to most performance ensembles is by audition. Assessment is based on successful public performances.
3. A juried "advisory audition" is required for students enrolled in MUSC 30A to give students feedback so that they can work toward meeting the requirements for the proficiency audition at the end of the next fall quarter.
4. A juried "proficiency audition" is required for students enrolled in MUSC 150H. All students must exhibit an upper-intermediate or higher level on their major instrument or voice.
5. Students will always declare as a music B.A. If you are interested in becoming a music B.M. student, auditions for admission to the B.M. program are held at the end of each fall quarter. Students accepted to the program are required to audition twice a year for continuing review and critique. Students in the B.M. program present a senior recital which is evaluated by faculty. See the music B.M. page for more information.
6. In required and elective seminars, critical thinking and writing are assessed when students present a major independent project at the end of term.
7. Compositional skills are assessed through the rehearsal and public performance of student works.

For students in the Global Musics concentration:

1. Placement exams at the outset of studies assess students' musical competence, and determine their place in the required lower-division theory and harmony courses.
2. Admission to most performance ensembles is by audition. Assessment is based on successful public performances.
3. In required and elective seminars, critical thinking and writing are assessed when students present a major independent project at the end of term.
4. Compositional skills are assessed through the rehearsal and public performance of student works, when applicable.

For students in the Compositional Practices concentration:

1. Placement exams at the outset of studies assess students' musical competence, and determine their place in the required lower-division theory and harmony courses.
2. Admission to most performance ensembles is by audition. Assessment is based on successful public performances.
3. Compositional skills are assessed through the rehearsal and public performance of student works, when applicable. Additionally, students will be expected to

present a senior composition recital at the end of their residency.

4. In required and elective seminars, critical thinking and writing are assessed when students present a project or paper at the end of term.

Compositional Practices Concentration

Course Requirements

In addition to the core course work and electives listed below, students pursuing the Compositional Practices concentration are required to complete three modules, relating to cross-cultural themes and genres:

- Experimental Contemporary Musics
- Global Art Musics
- Spontaneous Composition and Improvisation

The following course list outlines the general concentration requirements. See the list of approved courses relevant to each module.

Lower-Division Theory

MUSC 14 is meant for students with some experience with Western music theory. Students can bypass MUSC 14 by placing directly into MUSC 30A via the Theory Placement Exam. Students may also place into MUSC 30A by receiving a final grade of "A" or "A+" in MUSC 14.

The Theory Placement Exam is offered twice per year: in fall quarter, the Tuesday before classes start; and in the beginning of winter quarter. See the Music Department website for exam details.

MUSC 14	Beginning Western Theory and Musicianship	5
MUSC 20B	Theoretical Foundations of Music	5
MUSC 30A	Theory, Literature, and Musicianship I	5
MUSC 30B	Theory, Literature, and Musicianship II	5

Lower-division musicianship

The following course should be taken alongside MUSC 30-series classes

MUSC 31	Ear Training	2

Upper-Division Requirements

Upper-division Composition

Students must take MUSC 120 at least twice, with different instructors when possible.

MUSC 120	Seminar in Music Composition	5

Upper-division Composition/Analysis

Choose one of the courses below to take. If choosing MUSC 120, it must be taken with a different instructor as your previous two times, if possible.

MUSC 120	Seminar in Music Composition	5
MUSC 121A	Jazz Analysis	5
MUSC 121B	Orchestration	5

Upper-Division History

MUSC 101C	Western Music History (1910-present)	5

Modular Requirements

Each module consists of:

- a lower-division MUSC 11, MUSC 80, or MUSC 81-series course specific to each module (three total)
- an upper-division MUSC 150 or equivalent (theory/composition-based) course specific to each module (three total)
- two quarters of performing ensembles or performance practice workshops specific to each module (six total)

See the list of approved courses relevant to each module.

Electives

History/Culture Elective

Students must take one course from the MUSC 101, Foundational History/Culture, or MUSC 105, Topical History, series to fulfill their upper-division elective.

Courses **may not** be repeated for credit, and courses that cannot be repeated for credit cannot be double-counted toward major requirements.

Students may also elect to take a graduate-level seminar in place of their final elective. All graduate courses require instructor and/or department permission to add.

MUSC 101A	Western Music History (c. 1150 - 1750)	5
MUSC 101B	Western Music History (1750-1910)	5
MUSC 101E	Musics of South and Southeast Asia	5
MUSC 101F	Musics of Africa and the Americas	5
MUSC 101G	Musics of Central Asia	5
MUSC 101H	Music of Insular Southeast Asia	5
MUSC 105A	Music of the United States	5
MUSC 105C	Folk and Traditional Music in California	5

MUSC 105E	Early Keyboard Music	5
MUSC 105H	Hip Hop Music and Culture in the 20th Century	5
MUSC 105I	Improvisation and Collaborative Practices in the 20th Century	5
MUSC 105L	The Music and Life of Prince	5
MUSC 105M	Solo Song: from Monophony to Monody	5
MUSC 105O	Opera from Peri to Pergolesi	5
MUSC 105P	The Piano	5
MUSC 105Q	The String Quartet from Haydn to the Present	5
MUSC 105R	History of Russian Music	5
MUSC 105S	The Politics of Aesthetics and Spirituality	5
MUSC 105T	Tuning and Acoustics Through Monophony, Heterophony, and Polyphony	5
MUSC 105V	Mexican Music and Conviviality	5

Elective Ensembles/Performance Practice Workshops

Take three quarters of any of the following courses. All courses except MUSC 74, MUSC 20C, MUSC 71, and MUSC 167R may be repeated for credit, and can count toward multiple elective requirements if repeated.

These courses **cannot** double-count with modular ensemble/workshop requirements. However, you can take repeatable courses enough times to count for **both** modular and elective requirements.

MUSC 1C	University Concert Choir	2
MUSC 2	University Orchestra	2
MUSC 3	Large Jazz Ensemble	2
MUSC 5A	Beginning Sundanese Gamelan	2
MUSC 5B	Intermediate Sundanese Gamelan	2
MUSC 5C	Advanced Sundanese Gamelan	2
MUSC 8B	Advanced Balinese Gamelan	2
MUSC 8A	Beginning Balinese Gamelan	2
MUSC 9	Wind Ensemble	2
MUSC 10	Central Asian Ensemble	2
MUSC 12	Mariachi Ensemble	2
MUSC 12B	Mexican Folklorico Music and Dance	2
MUSC 20C	Beginning Jazz Theory	5
MUSC 53A	Beginning Ghanaian Ensemble	2
MUSC 54	North Indian Music Workshop	2
MUSC 55	Rhythms of North India	2
MUSC 55A	Intermediate Rhythms of North India	2
MUSC 58	Songwriting Craft and Practice	5
MUSC 61	Individual Lessons: Half Hour	2
MUSC 62	Individual Lessons: One Hour	3
MUSC 70	Hip Hop's Global Inclusiveness & African Roots	2
MUSC 73	Music and the Ocean	3
MUSC 74	Beginning Spontaneous Composition and Improvisation	5
MUSC 77	Raga Jazz: Application of Indian Music to Western Instruments	5
MUSC 78	Popular and Raga-Based Songs of South Asia	2
MUSC 71	Laptop Music	5
MUSC 102	University Orchestra	2
MUSC 103	University Concert Choir	2
MUSC 129	Live Electroacoustic Music Ensemble	2
MUSC 158	South African Music Ensemble	2
MUSC 161	Individual Lessons: One Hour	3
MUSC 161A	Individual Lessons: Half Hour	2
MUSC 163	Early Music Band	2
MUSC 164	Jazz Combos	2
MUSC 165	Chamber Music Workshop	2
MUSC 166	Chamber Singers	2
MUSC 167	Workshop in Electronic Music	2
MUSC 167R	Recording Workshop	2
MUSC 168	Experimental Music Ensemble	2

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement.

The DC requirement for the Compositional Practices concentration of the music B.A. degree is satisfied by completing **one** of the following courses. Some courses may already be core or elective requirements for the major track, meaning students would satisfy the DC requirement through the natural progression of their degree.

MUSC 101A	Western Music History (c. 1150 - 1750)	5
MUSC 101B	Western Music History (1750-1910)	5
MUSC 101C	Western Music History (1910-present)	5
MUSC 101F	Musics of Africa and the Americas	5
MUSC 101G	Musics of Central Asia	5
MUSC 105A	Music of the United States	5
MUSC 105C	Folk and Traditional Music in California	5
MUSC 105M	Solo Song: from Monophony to Monody	5
MUSC 105Q	The String Quartet from Haydn to the Present	5

MUSC 105T	Tuning and Acoustics Through Monophony, Heterophony, and Polyphony	5
MUSC 150D	Theory of Southeast Asia	5

Comprehensive Requirement

For their Senior Capstone project, students in the Compositional Practices concentration must present a senior composition recital or portfolio.

Students should consult their faculty advisor (chosen when you declare the major) and department advisor when planning their recital/portfolio.

MUSC 196A	Senior Recital Preparation (without individual lessons)	5

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

In addition to core curriculum requirements for the Compositional Practices Concentration, students must also complete three modules. Each module will consist of:

- a lower-division MUSC 11, MUSC 80, or MUSC 81-series course specific to each module (three total);
- an upper-division MUSC 150 or equivalent (theory/composition-based) course specific to each module (three total);
- two quarters of performing ensembles or performance practice workshops specific to each module (six total).

Please see sample two and four-year plans below.

Four-Year Plan for Incoming Frosh

Year	Fall	Winter	Spring	Summer
Entering				College 1A Summer Edge (optional)
1st (frosh)	MUSC 14 (if necessary)	MUSC 20B	Module: Lower-div 1	Module: Lower-div 2 WRIT 1/WRIT 1E (if needed)
2nd (soph)	MUSC 30A/MUSC 31	MUSC 30B/MUSC 31	MUSC 101C (D.C.)	
	WRIT 2*		Module: Upper-div 1	
	Module: Ensemble 1	Module: Ensemble 1	Elective ensemble	
3rd (jr)	MUSC 121B	MUSC 120	Module: Upper-div 2	
		Elective upper-div history		
	Module: Ensemble 2	Module: Ensemble 2	Module: Ensemble 3	
4th (sr)		MUSC 120	MUSC 196A	
		Module: Upper-div 3		
	Module: Ensemble 3	Elective ensemble	Elective ensemble	

* WRIT 2 should be taken in or before spring quarter of the second year.

Two-Year Plan for Transfer Students

Year	Fall	Winter	Spring	Summer
Entering				KRSG 1T

			Summer Edge (optional)
1st (junior)	MUSC 30A/MUSC 31	MUSC 30B/MUSC 31	MUSC 101C (D.C.)

	Module: Ensemble 2	Module: Ensemble 3	Module: Ensemble 3
	Elective ensemble	Elective ensemble	Elective ensemble

General Education (GE) Codes

MUSC 11, MUSC 80, and MUSC 81 series courses will fulfill a variety of GE requirements including: IM, CC, ER, MF, PE-E, PE-H, PE-T, and PR-C.

MUSC 150C, MUSC 150P, MUSC 150T, MUSC 150X fulfill the IM GE requirement. MUSC 150I fulfills the CC GE.

Most, but not all, ensembles satisfy the PR-C or PR-E code GE requirement. Students should check to confirm which courses from the ensembles course list satisfy GE codes.

Students must complete all other general education requirements.

Transfer Student Progress

Some courses from the MUSC 11, MUSC 80, and MUSC 81 series, along with some performing ensembles, can be articulated from courses taken at other institutions. Please email music@ucsc.edu with any questions about course articulations/substitutions.

Global Musics Concentration

Course Requirements

In addition to the core course work and electives listed below, students pursuing the Global Musics concentration are required to complete three modules, relating to geographical areas, themes, and genres:

- Africa the Americas
- Asia
- Contemporary/Experimental Music
- Europe
- Jazz
- Popular Music
- World Musics

The following course list outlines the general concentration requirements. See the list of approved courses relevant to each module.

Lower-Division Theory

MUSC 14 is meant for students with some Western music theory experience. Students can bypass this requirement by placing directly into MUSC 30A via the Theory Placement Exam.

The Theory Placement Exam is offered twice per year: in fall quarter, the Tuesday before classes start; and in the beginning of winter quarter. See the Music Department website for exam details.

MUSC 14	Beginning Western Theory and Musicianship	5
MUSC 20A	Global Music Theory and Musicianship	5
MUSC 20B	Theoretical Foundations of Music	5

Upper-Division Courses

Modular Requirements

Each modules consists of:

- a lower-division MUSC 11, MUSC 80, or MUSC 81-series course specific to each module (three total)
- an upper-division MUSC 101, MUSC 105, or MUSC 150 course specific to each module (three total)
- two quarters of performing ensemble or performance practice workshop specific to each module (six total)

See the list of approved courses relevant to each module.

Electives

Take three (3) lectures or seminars from the upper-division music catalog. These elective courses **cannot** double count with modular courses, unless the course is repeatable for credit and is taken more than once with a different instructor.

Elective Upper-Division Lectures/Seminars

MUSC 101A	Western Music History (c. 1150 - 1750)	5
MUSC 101B	Western Music History (1750-1910)	5
MUSC 101C	Western Music History (1910-present)	5
MUSC 101E	Musics of South and Southeast Asia	5
MUSC 101F	Musics of Africa and the Americas	5
MUSC 101G	Musics of Central Asia	5
MUSC 101H	Music of Insular Southeast Asia	5
MUSC 105A	Music of the United States	5
MUSC 105C	Folk and Traditional Music in California	5
MUSC 105E	Early Keyboard Music	5
MUSC 105H	Hip Hop Music and Culture in the 20th Century	5
MUSC 105I	Improvisation and Collaborative Practices in the 20th Century	5
MUSC 105L	The Music and Life of Prince	5
MUSC 105M	Solo Song: from Monophony to Monody	5
MUSC 105O	Opera from Peri to Pergolesi	5
MUSC 105P	The Piano	5
MUSC 105Q	The String Quartet from Haydn to the Present	5
MUSC 105R	History of Russian Music	5
MUSC 105S	The Politics of Aesthetics and Spirituality	5
MUSC 105T	Tuning and Acoustics Through Monophony, Heterophony, and Polyphony	5
MUSC 105V	Mexican Music and Conviviality	5
MUSC 120	Seminar in Music Composition	5
MUSC 121A	Jazz Analysis	5
MUSC 121B	Orchestration	5
MUSC 122	Conducting	2
MUSC 150A	Music Analysis for Performers	5
MUSC 150B	Music Analysis and Composition	5
MUSC 150C	Tonal Counterpoint	5
MUSC 150D	Theory of Southeast Asia	5
MUSC 150H	Harmony & Form in 19th-century Western Art Music	5
MUSC 150I	Hindustani Music Theory	5
MUSC 150J	Intermediate Spontaneous Composition and Improvisation	5
MUSC 150K	Intermediate Jazz Theory	5
MUSC 150N	Noise, Music, Politics	5
MUSC 150P	20th-Century Popular Song	5
MUSC 150S	Focus on Spontaneous Composition	5
MUSC 150T	Post Tonal Analysis	5
MUSC 150X	Theoretical Practices of American Music	5
MUSC 150Z	Interdisciplinary Arts Production Lab	5

Elective Ensembles/Performance Practice Workshops

Take three quarters of any of the following courses. All courses except MUSC 74, MUSC 20C, MUSC 71, and MUSC 167R may be repeated for credit, and can count toward multiple elective requirements if repeated.

These courses **cannot** double-count with modular ensemble/workshop requirements. However, you can take repeatable courses enough times to count for **both** modular and elective requirements.

MUSC 1C	University Concert Choir	2
MUSC 2	University Orchestra	2
MUSC 3	Large Jazz Ensemble	2
MUSC 5A	Beginning Sundanese Gamelan	2
MUSC 5B	Intermediate Sundanese Gamelan	2
MUSC 5C	Advanced Sundanese Gamelan	2
MUSC 8B	Advanced Balinese Gamelan	2
MUSC 8A	Beginning Balinese Gamelan	2
MUSC 9	Wind Ensemble	2
MUSC 10	Central Asian Ensemble	2
MUSC 12	Mariachi Ensemble	2
MUSC 12B	Mexican Folklorico Music and Dance	2
MUSC 20C	Beginning Jazz Theory	5
MUSC 53A	Beginning Ghanaian Ensemble	2

MUSC 54	North Indian Music Workshop	2
MUSC 55	Rhythms of North India	2
MUSC 55A	Intermediate Rhythms of North India	2
MUSC 58	Songwriting Craft and Practice	5
MUSC 61	Individual Lessons: Half Hour	2
MUSC 62	Individual Lessons: One Hour	3
MUSC 70	Hip Hop's Global Inclusiveness & African Roots	2
MUSC 71	Laptop Music	5
MUSC 72	Fundamentals of Music Technology	2
MUSC 73	Music and the Ocean	3
MUSC 74	Beginning Spontaneous Composition and Improvisation	5
MUSC 78	Popular and Raga-Based Songs of South Asia	2
MUSC 77	Raga Jazz: Application of Indian Music to Western Instruments	5
MUSC 102	University Orchestra	2
MUSC 103	University Concert Choir	2
MUSC 129	Live Electroacoustic Music Ensemble	2
MUSC 150J	Intermediate Spontaneous Composition and Improvisation	5
MUSC 158	South African Music Ensemble	2
MUSC 161	Individual Lessons: One Hour	3
MUSC 161A	Individual Lessons: Half Hour	2
MUSC 163	Early Music Band	2
MUSC 164	Jazz Combos	2
MUSC 165	Chamber Music Workshop	2
MUSC 166	Chamber Singers	2
MUSC 167	Workshop in Electronic Music	2
MUSC 167R	Recording Workshop	2
MUSC 168	Experimental Music Ensemble	2
MUSC 203H	Area Studies in Performance Practice	5
MUSC 267	Workshop in Computer Music and Visualization	2

Graduate-Level Research Requirement

Students in the Global Musics concentration are also required to take **one** graduate-level course. Students may select from a range of courses focused on developing research skills, or seminars providing cross-cultural foundations in social and music theory.

MUSC 200 **cannot** be double counted if taken to satisfy the Research Project option within the Comprehensive Requirement.

MUSC 200	Introduction to Research Methods	5
MUSC 203G	Concepts, Issues, and the Practice of Ethnomusicology	5
MUSC 253A	Historical Perspectives in Musicology and Ethnomusicology	5
MUSC 253B	Rhythm, Time, and Form	5
MUSC 253C	Music and Discourse	5
MUSC 253D	Issues in the Ethnography of Music	5
MUSC 253S	The Politics of Aesthetics and Spirituality	5

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement.

The DC requirement for the global musics concentration of the music B.A. degree is satisfied by completing **one** of the following courses. Some courses may already be core or elective requirements for the major track, meaning students would satisfy the DC requirement through the natural progression of their degree.

MUSC 101A	Western Music History (c. 1150 - 1750)	5
MUSC 101B	Western Music History (1750-1910)	5
MUSC 101C	Western Music History (1910-present)	5
MUSC 101F	Musics of Africa and the Americas	5
MUSC 101G	Musics of Central Asia	5
MUSC 105A	Music of the United States	5
MUSC 105C	Folk and Traditional Music in California	5
MUSC 105M	Solo Song: from Monophony to Monody	5
MUSC 105Q	The String Quartet from Haydn to the Present	5
MUSC 105T	Tuning and Acoustics Through Monophony, Heterophony, and Polyphony	5
MUSC 150D	Theory of Southeast Asia	5

Comprehensive Requirement

The senior comprehensive requirement (capstone) is a two-part requirement that is satisfied by 1) enrollment in one of the course listed below, and 2) an independent study course with your faculty advisor. The options for senior capstones focus in two areas: A) **research project** or B) **creative portfolio project**.

A) The research project option requires a 15-25 page research paper, which is accomplished by taking the independent study course MUSC 195A (Senior Thesis) with their faculty advisor, concurrently with one of the listed research courses.

B) The creative portfolio option typically requires either a senior composition project or composition recital, both accompanied by a 7-10 page short thesis. If a student chooses to do the creative portfolio options, they must concurrently enroll in the independent study course MUSC 196A (Global Musics Capstone) with their faculty advisor.

Research Project

Choose one of the following courses. Cannot double count with modular or upper-division electives.

MUSC 200 **cannot** be double counted if taken to satisfy the Graduate-Level Research Requirement.

MUSC 101E	Musics of South and Southeast Asia	5
MUSC 101F	Musics of Africa and the Americas	5
MUSC 101G	Musics of Central Asia	5
MUSC 101H	Music of Insular Southeast Asia	5
MUSC 105A	Music of the United States	5
MUSC 105C	Folk and Traditional Music in California	5
MUSC 105E	Early Keyboard Music	5
MUSC 105H	Hip Hop Music and Culture in the 20th Century	5
MUSC 105I	Improvisation and Collaborative Practices in the 20th Century	5
MUSC 105L	The Music and Life of Prince	5
MUSC 105M	Solo Song: from Monophony to Monody	5
MUSC 105O	Opera from Peri to Pergolesi	5
MUSC 105P	The Piano	5
MUSC 105Q	The String Quartet from Haydn to the Present	5
MUSC 105R	History of Russian Music	5
MUSC 105S	The Politics of Aesthetics and Spirituality	5
MUSC 105T	Tuning and Acoustics Through Monophony, Heterophony, and Polyphony	5
MUSC 105V	Mexican Music and Conviviality	5
MUSC 199	Tutorial	5
MUSC 200	Introduction to Research Methods	5

Take concurrently with selected course above

Students that select the research option for their capstone must also enroll in:

MUSC 195A	Senior Thesis	5

Creative Portfolio Project

Choose one of the following courses. This course **cannot** double count with modular electives, unless the course is repeatable for credit and is taken more than once.

MUSC 120	Seminar in Music Composition	5
MUSC 150A	Music Analysis for Performers	5
MUSC 150B	Music Analysis and Composition	5
MUSC 150C	Tonal Counterpoint	5
MUSC 150D	Theory of Southeast Asia	5
MUSC 150I	Hindustani Music Theory	5
MUSC 150N	Noise, Music, Politics	5
MUSC 150P	20th-Century Popular Song	5
MUSC 150R	Field Recording: Mapping and Composing Sound, Identity, and Place	5
MUSC 150S	Focus on Spontaneous Composition	5
MUSC 150T	Post Tonal Analysis	5
MUSC 150X	Theoretical Practices of American Music	5
MUSC 150Z	Interdisciplinary Arts Production Lab	5
MUSC 199	Tutorial	5
MUSC 203H	Area Studies in Performance Practice	5

Take concurrently with selected course above

Students that select the creative portfolio option for their capstone must also enroll in:

MUSC 196A	Senior Recital Preparation (without individual lessons)	5

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

In addition to core curriculum requirements for the Global Musics Concentration, students must also complete three modules. Each module will consist of:

- a lower-division MUSC 11, MUSC 80, or MUSC 81-series course specific to each module (three total)
- an upper-division MUSC 101, MUSC 105, MUSC 150, or MUSC 180 course specific to each module (three total)
- two quarters of performing ensemble or performance practice workshop specific to each module (six total)

Four-Year Plan for Incoming Frosh

Year	Fall	Winter	Spring	Summer

General Education (GE) Codes

MUSC 11, MUSC 80 and MUSC 81 series courses will fulfill a variety of GE requirements including: IM, CC, ER, MF, PE-E, PE-H, PE-T, and PR-C.

MUSC 150C, MUSC 150P, MUSC 150T, MUSC 150X fulfill the IM GE requirement. MUSC 150I fulfills the CC GE.

Most, but not all, ensembles satisfy the PR-C or PR-E code GE requirement. Students should check to confirm which courses from the ensembles course list satisfy GE codes.

Students must complete all other general education requirements.

Transfer Student Progress

Some courses from the MUSC 11, MUSC 80, and MUSC 81 series, along with some performing ensembles, can be articulated from courses taken at other institutions. Please email music@ucsc.edu with any questions about course articulations/substitutions.

Western Music Concentration

Course Requirements

Lower-Division Courses

Lower-Division Theory

Take all of the following courses. Students are accepted to MUSC 30A if they have taken MUSC 14 at UCSC and received an "A" or "A+", or have tested in via the Theory Placement Exam. See the music department for more information on the TPE: https://music.ucsc.edu/programs/theory-placement-exam

MUSC 30A	Theory, Literature, and Musicianship I	5
MUSC 30B	Theory, Literature, and Musicianship II	5
MUSC 30C	Theory, Literature, and Musicianship III	5

Lower-Division Keyboard and Musicianship

The following courses should be taken alongside MUSC 30-series classes.

MUSC 31	Ear Training	2
MUSC 60	Fundamental Keyboard Skills	2

MUSC 60 enrollment may be waived by instructor approval, or if the student is taking piano lessons from a UC Santa Cruz instructor.

Upper-Division Courses

Core Upper-Division History/Culture

Take two of these courses

MUSC 101A	Western Music History (c. 1150 - 1750)	5
MUSC 101B	Western Music History (1750-1910)	5
MUSC 101C	Western Music History (1910-present)	5

Plus two of these courses

Students **may not** double count courses between the MUSC 101A-C list and MUSC 101A-H list.

MUSC 101A	Western Music History (c. 1150 - 1750)	5
MUSC 101B	Western Music History (1750-1910)	5
MUSC 101C	Western Music History (1910-present)	5
MUSC 101E	Musics of South and Southeast Asia	5
MUSC 101F	Musics of Africa and the Americas	5
MUSC 101G	Musics of Central Asia	5
MUSC 101H	Music of Insular Southeast Asia	5

Elective Upper-Division History

Take one of these courses

MUSC 105A	Music of the United States	5
MUSC 105C	Folk and Traditional Music in California	5
MUSC 105E	Early Keyboard Music	5
MUSC 105H	Hip Hop Music and Culture in the 20th Century	5
MUSC 105I	Improvisation and Collaborative Practices in the 20th Century	5
MUSC 105L	The Music and Life of Prince	5
MUSC 105M	Solo Song: from Monophony to Monody	5
MUSC 105O	Opera from Peri to Pergolesi	5
MUSC 105P	The Piano	5
MUSC 105Q	The String Quartet from Haydn to the Present	5

MUSC 105R	History of Russian Music	5
MUSC 105S	The Politics of Aesthetics and Spirituality	5
MUSC 105T	Tuning and Acoustics Through Monophony, Heterophony, and Polyphony	5
MUSC 105V	Mexican Music and Conviviality	5

Upper-Division Theory

Core Upper-Division Theory

Take the following course

MUSC 150H	Harmony & Form in 19th-century Western Art Music	5

Elective Upper-Division Theory

Take one of the following courses

MUSC 150A	Music Analysis for Performers	5
MUSC 150B	Music Analysis and Composition	5
MUSC 150C	Tonal Counterpoint	5
MUSC 150D	Theory of Southeast Asia	5
MUSC 150I	Hindustani Music Theory	5
MUSC 150J	Intermediate Spontaneous Composition and Improvisation	5
MUSC 150K	Intermediate Jazz Theory	5
MUSC 150N	Noise, Music, Politics	5
MUSC 150P	20th-Century Popular Song	5
MUSC 150R	Field Recording: Mapping and Composing Sound, Identity, and Place	5
MUSC 150S	Focus on Spontaneous Composition	5
MUSC 150T	Post Tonal Analysis	5
MUSC 150X	Theoretical Practices of American Music	5
MUSC 150Z	Interdisciplinary Arts Production Lab	5

Final Upper-Division Elective

Students can fulfill their final upper-division elective by taking:

- One additional class from the MUSC 150 series, not already taken;
- One additional class from the MUSC 101 series, not already taken; or
- One of the courses listed below:

MUSC 121B	Orchestration	5
MUSC 122	Conducting	2
MUSC 123B	Electronic Music: Synthesis & Composition II	5

Performing Ensembles

Music B.A. (Western Music) students are expected to complete six quarters of performing ensembles on their primary instrument or voice.

All ensembles are 2 credits each and may be repeated for credit.

A maximum of one ensemble per quarter can be counted toward fulfillment of the total six quarter requirement. If two ensembles in one quarter need to be taken to meet time to degree plans approval can be requested to the department Curriculum Committee by email to music@ucsc.edu.

MUSC 1C	University Concert Choir	2
MUSC 2	University Orchestra	2
MUSC 3	Large Jazz Ensemble	2
MUSC 5A	Beginning Sundanese Gamelan	2
MUSC 5B	Intermediate Sundanese Gamelan	2
MUSC 5C	Advanced Sundanese Gamelan	2
MUSC 8A	Beginning Balinese Gamelan	2
MUSC 8B	Advanced Balinese Gamelan	2
MUSC 9	Wind Ensemble	2
MUSC 10	Central Asian Ensemble	2
MUSC 12	Mariachi Ensemble	2
MUSC 102	University Orchestra	2
MUSC 103	University Concert Choir	2
MUSC 158	South African Music Ensemble	2
MUSC 160	University Opera Theater	5
MUSC 163	Early Music Band	2
MUSC 164	Jazz Combos	2
MUSC 165	Chamber Music Workshop	2
MUSC 166	Chamber Singers	2
MUSC 168	Experimental Music Ensemble	2

Individual Applied Lessons

Music B.A. (Western Music) students are expected to complete six quarters of applied lessons on their primary instrument or voice.

Students can contact the applied instrument instructor of their primary instrument to arrange an audition prior to the start of the quarter. Applied instrument instructor emails are listed on the Music Department website.

Students should work with the applied instructor of their primary instrument to determine which of the courses listed would be appropriate.

The lessons carry an additional course fee. Concurrent enrollment in an appropriate ensemble is required. Consult the Music Student Handbook for more details.

MUSC 61	Individual Lessons: Half Hour	2
MUSC 62	Individual Lessons: One Hour	3

MUSC 161	Individual Lessons: One Hour	3
MUSC 161A	Individual Lessons: Half Hour	2
MUSC 162	Advanced Individual Lessons: One Hour	5
MUSC 196B	Senior Recital Preparation (with individual lessons)	5

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement.

The DC requirement for the western art music concentration of the music B.A. degree is satisfied by completing **one** of the following courses. Some courses may already be core or elective requirements for the major track, meaning students would satisfy the DC requirement through the natural progression of their degree.

MUSC 101A	Western Music History (c. 1150 - 1750)	5
MUSC 101B	Western Music History (1750-1910)	5
MUSC 101C	Western Music History (1910-present)	5
MUSC 101F	Musics of Africa and the Americas	5
MUSC 101G	Musics of Central Asia	5
MUSC 105A	Music of the United States	5
MUSC 105C	Folk and Traditional Music in California	5
MUSC 105M	Solo Song: from Monophony to Monody	5
MUSC 105Q	The String Quartet from Haydn to the Present	5
MUSC 105T	Tuning and Acoustics Through Monophony, Heterophony, and Polyphony	5
MUSC 150D	Theory of Southeast Asia	5

Comprehensive Requirement

To fulfill the the comprehensive requirement, students may either take an additional MUSC 105-series course, not already taken, or the following course:

MUSC 120	Seminar in Music Composition	5

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Four-Year Plan for Incoming Frosh

	Fall	Winter	Spring	Summer
Entering				College 1A Summer Edge (optional)
1st (frosh)	MUSC 11A (recommended) College 1	MUSC 14 WRIT 1/WRIT 1E (if needed)		
2nd (soph)	MUSC 30A*/MUSC 31 MUSC 60 WRIT 2*** Individual Lessons[1] Ensemble[2]	MUSC 30B/MUSC 31 MUSC 60 MUSC 101A Individual Lessons Ensemble[2]	MUSC 30C/MUSC 31 MUSC 60 MUSC 101B Individual Lessons Ensemble[2]
3rd (junior)	MUSC 150H* MUSC 101C Individual Lessons Ensemble[2]	MUSC 105 Individual Lessons Ensemble[2]	MUSC 150 Individual Lessons Ensemble[2]
4th (senior)	MUSC 121B**	MUSC 120	MUSC 101E	

* Indicates a performance jury requirement at the end of the quarter.

** Select from the following list of options to fulfill this requirement: one additional class from the MUSC 150 or MUSC 180 series, MUSC 121, MUSC 122, or MUSC 123A.

*** WRIT 2 should be taken in or before spring quarter of the second year.

[1]Students fulfill the individual lessons requirement by taking one of the following courses: MUSC 61, MUSC 62, or MUSC 161.

General Education (GE) Codes

MUSC 11A will fulfill the IM GE requirement.

[2]Most, but not all, ensembles satisfy the PR-C or PR-E code GE requirement. Students should check to confirm which courses from the ensembles course list satisfy GE codes.

MUSC 150H will fulfill the MF GE requirement.

Students must complete all other general education requirements.

Two-Year Plan for Transfer Students

The following two-year plan assumes that the student places into MUSC 30A and has completed most GE requirements.

	Fall	Winter	Spring	Summer
Entering				KRSG 1T Summer Edge (optional)
1st (jr)	MUSC 30A*/MUSC 31 MUSC 60 Individual Lessons[1] Ensemble[2]	MUSC 30B/MUSC 31 MUSC 60 MUSC 101A Individual Lessons[1] Ensemble[2]	MUSC 30C/MUSC 31 MUSC 60 MUSC 101B Individual Lessons[1] Ensemble[2]	
2nd (sr)	MUSC 150H* MUSC 101C MUSC 121B Individual Lessons[1] Ensemble[2]	MUSC 105 MUSC 120 Individual Lessons[1] Ensemble[2]	MUSC 150 MUSC 101G Individual Lessons[1] Ensemble[2]	

* Indicates a performance jury requirement at the end of the quarter.

[1]Students fulfill the individual lessons requirement by taking one of the following courses: MUSC 61, MUSC 62, or MUSC 161.

General Education Codes

MUSC 11A will fulfill the IM GE requirement.

[2]Most, but not all, ensembles satisfy the PR-C or PR-E GE requirement. Students should check to confirm which courses from the ensembles course list satisfy GE codes. .

Students must complete all other GE requirements.

MUSIC B.M.

Information and Policies

The Music Department at University of California, Santa Cruz, offers two undergraduate degrees: a Bachelor of Arts (B.A.) and a Bachelor of Music (B.M.). The B.A. degree offers a uniquely diverse curriculum, with the option of completing a concentration in either “Compositional Practices,” “Global Musics,” or “Western Music.” The B.M. degree is designed for students who intend to pursue a career in music performance. The department also offers minors in “Electronic Music,” “Jazz, Spontaneous Composition, and Improvisation,” and “Western Music,” making the study of music more accessible to undergraduates majoring in other disciplines. Both B.A. and B.M. degrees are distinctive in that they integrate elements of performance, theory, composition, literature, history, and culture in order to produce graduates that are accomplished scholar-performers. Students leave UC Santa Cruz prepared for graduate studies and music careers in performance, teaching, and the digital arts.

Through these curricular offerings, students will encounter an extraordinarily rich variety of performance opportunities. Specifically, our students engage with music:

● as a cultural practice in ensembles focusing on musical traditions from Europe, Central Asia, Latin America, North America, South Africa, South Asia, and Southeast Asia;

● temporally in ensembles based on Baroque, Classical, Romantic, and contemporary idioms to deepen their understanding of performance practices;

● technologically in electronic music ensembles and workshops where students experiment with innovative technologies to develop their own projects with the support of their advisors and peers;

● collaboratively in seminars geared toward student composition and improvisation.

Students at UC Santa Cruz have extraordinary performance, composition, and professionalization opportunities. All instrument and voice faculty are celebrated professional musicians who provide unparalleled guidance for students in performance and professional development. Ensemble courses culminate in an end-of-quarter performance, providing students with regular performance opportunities in a world-class recital hall. Student composers frequently collaborate with Arts Division faculty and peers to create and showcase their works. The Electronic Music Minor provides hands-on opportunities for students to learn a variety of techniques related to electronic sound production, composition, and recording in a state-of-the-art studio facility. The Opera Program allows students to be involved in every step of a major production, from concept and design considerations to marketing and arts management. As performers, composers, artistic collaborators, and event organizers, these programs allow students to develop musically and professionally for diverse career paths and industries.

Our programs shape responsible, independent, and highly capable young artists that will push the frontiers of their fields. Graduates from the Music Department at UC Santa Cruz are musically-attuned and socially-engaged global citizens in the 21st century.

Introduction

The B.M. degree is for students who aspire to academic excellence and an advanced performance level. The B.M. degree is designed for exceptionally talented performers. It requires considerably more performance credits and slightly fewer courses in theoretical disciplines. B.M. students will major in an instrument or voice.

Once accepted to the B.M. program, students must take two juries per academic year: at the end of both fall and spring quarter, for continuing review and criticism of proficiency at their primary instrument.

If a student fails to participate in continuing B.M. juries, or does not attain, or maintain, an advanced level, and fails to maintain academic excellence, the Bachelor of Music Committee will re-examine the student's continued participation in the B.M. degree in consultation with the applied instructor. In cases in which the B.M. Committee finds the student did not meet these requirements the students will be dismissed from the B.M. program with an option to switch to the B.A. degree.

Time to degree: The determination of a dismissal can be made by the committee as long as a student has three remaining quarters before their expected graduation date. This will ensure enough time to make course changes from a B.M. to B.A. degree.

Students may appeal a dismissal of the B.M. degree by petition to the chair of the Music Department. A letter to the department chair must be submitted within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal, the department will notify the student, college, and Office of the Registrar of the decision.

Program Learning Outcomes

The Bachelor of Music program in music is designed to help students accomplish the following learning outcomes:

1. Demonstrate critical familiarity with differences and commonalities among musical practices and their material conditions, across a diverse range of genres, cultures, and histories.
2. Demonstrate familiarity with analytical tools arising in theories of music, including those in music theory, ethnomusicology, and sound studies, as they are applied to musical sounds, practices, and repertoires in diverse musical contexts.
3. Demonstrate musicianship skills across diverse oral and notational repertoires.
4. Demonstrate performance proficiency on a specific instrument (including voice specializations) across a range of musical genres, periods, and/or practices.
5. Demonstrate skills in music composition, improvisation and/or production including skills in audio technologies.
6. Demonstrate working knowledge of social science, humanities, and/or arts approaches to research in music-relevant topics.This includes qualitative and quantitative research methods for, gathering or obtaining research data, finding/using primary sources, and other research approaches/methods.
7. Demonstrate effective writing and interpretive skills to participate in disciplinary and interdisciplinary dialogue about musical practices, traditions, genres, ideas, and music-making spaces.
8. Demonstrate familiarity with multiple languages associated with music performance, scholarship, and composition.

Academic Advising for the Program

General information about the music degrees is available on the department website. Students are also strongly encouraged to consult early with the Music Department advisor to create an academic plan for the major or a minor far in advance of declaration, as early as the summer before beginning at the university.

Transfer students should consult the Transfer Information and Policy section.

Please contact the department advisor by emailing music@ucsc.edu or calling (831) 459-2292. You may also use Slug Success to make an appointment.

Getting Started in the Major: Frosh

This is a course-intensive and/or sequential program, and students who intend to pursue this major must begin taking classes for the major in their first year at UC Santa Cruz.

The Theory Placement Exam is for placement of students, including transferring or re-entering students, into the appropriate Western music theory course (MUSC 14, or MUSC 30A). It includes written sections in the areas of theory and musicianship that emphasize aural recognition and identification of musical structures (intervals, chords, rhythms, meters, etc.). Students may prepare for the exam by honing skills in reading both bass and treble clef and in recognizing melodic and harmonic structures, and complex rhythmic patterns.

Students with some theory background should plan to take the Theory Placement Exam to place into MUSC 14 or MUSC 30A. Students without any theory background, or weak aural skills, should enroll in MUSC 20A in their first year in order to prepare for the placement exam. Admission to MUSC 30A is primarily based on the Theory Placement Exam scores, but students who get a final grade of “A” or "A+" in MUSC 14 are eligible to automatically place into MUSC 30A.

The Theory Placement Exam is held twice a year: on the Tuesday before instruction begins in fall quarter, from 10:00 a.m.-12:30 p.m., and right before the beginning of winter quarter (schedule TBA), both in the Music Center Recital Hall. No signup is necessary. Students should bring a pencil. Students can visit the Music Department website to view the sample exam.

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to apply in this major are not required to complete specific courses for consideration of admission to UC Santa Cruz.

Transfer students are strongly recommended to take some music theory courses before transfer to UC Santa Cruz, which generally enables them to test into MUSC 30A in their first quarter. They should also have completed most general education requirements. Voice students should have completed one introductory college-level language course each in Italian, French, and German.

Getting Started in the Major: Transfer Students

Transfer students should plan to take the Theory Placement Exam to place into MUSC 14 or MUSC 30A. All transfer students should take the Theory Placement Exam in the fall of their first quarter. It is an option for transfer students to take the examination prior to applying to UC Santa Cruz as a practice guide for future preparation, or in the spring quarter before their first fall quarter. Students can also visit the Music Department website to view the sample examination.

Transfer students can also take MUSC 14 when offered during Summer Session at UCSC prior to fall of their arrival. Taking MUSC 14 will help prepare students for the Theory Placement Exam and generally results in students placing into MUSC 30A. Admission to MUSC 30A is primarily based on the Theory Placement Exam scores, but students who get a final grade of “A” or "A+" in MUSC 14 are eligible to automatically place into MUSC 30A.

The Theory Placement Exam is held twice a year: on the Tuesday before instruction begins, from 10:00 a.m.-12:30 p.m. in the Music Center Recital Hall, and right before the beginning of winter quarter (schedule TBA). No signup is necessary. Students should bring a pencil.

All transfer students are strongly encouraged to email music@ucsc.edu to schedule a phone or zoom advising appointment with the undergraduate advisor prior to application.

Major Qualification Policy and Declaration Process

Major Qualification

In order to qualify for the music major, students must successfully complete MUSC 30A with a grade of "C" or better. A "Pass" grade is also acceptable since letter grades are not required for lower-division courses.

Bachelor of music students must also audition in the fall or spring juries as a "B.M. Audition." Applied instructor approval is required to sign-up for this audition. If the B.M. committee determines that the performance level demonstrated is appropriate for the B.M. program, the student can then declare the B.M. major (in addition to passing MUSC 30A). Students can consult with their applied instrument instructor about this potential. If faculty supports this option they can sign up with the undergraduate advisor for the next available jury.

Students approaching their major declaration deadline quarter (sixth quarter for four-year students, second quarter for transfer students), should reach out to the Music office as soon as possible to set up a declaration advising appointment.

Transfer students should also see the "Transfer Information and Policy" section below.

Appeal Process

Students may appeal a dismissal of the B.M. degree by petition to the chair of the Music Department. A letter to the department chair must be submitted within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal, the department will notify the student, college, and Office of the Registrar of the decision. Appeals should be submitted in person at Music Center 244, or sent to music@ucsc.edu care of the undergraduate advisor.

If a student is not accepted into the B.M. program via the results of their B.M. audition, they can sign up for the next available jury. Students may audition for the B.M. program a maximum of two times. The latest that they can audition for the B.M. program is in spring quarter of their junior year.

How to Declare a Major

All students should meet with the academic advisor to begin the major declaration process either by making an appointment (via Slug Success), by email to music@ucsc.edu, or by stopping by the department office, Music Center, Room 244 or 248. Students are also required to meet with a faculty advisor (assigned with help from the academic advisor) as part of the declaration process.

Students should submit a petition to declare as soon as they complete the major qualification requirements or reach their declaration deadline quarter (whichever comes first). The declaration deadline for four-year students is their sixth quarter, and the second quarter for transfer students.

Students petitioning when the campus declaration deadline is imminent, will either be approved, denied, or provided with conditions (e.g. completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification courses.

Letter Grade Policy

All upper-division courses applied toward the Music B.M. must be taken for a letter grade, except for upper-division performing ensembles, which may be taken Pass/No Pass.

All lower-division courses, including those in the MUSC 30 series, may be taken Pass/No Pass.

Course Substitution Policy

Double Majors and Major/Minor Combinations Policy

Double majors **are** possible for the music major. A student can double major with a Music Bachelor of Arts (B.A.) Degree or a Bachelor of Music (B.M.) Degree, and a major from another department. Students that plan to double major should meet with the music undergraduate advisor for course planning in fall quarter of their first year.

It is not possible to double major as a music B.A. and a music B.M. However, it is possible to pursue the B.M. and add the "Jazz, Spontaneous Composition and Improvisation Minor" or "Electronic Music minor." It is not possible to add the "Western Music Minor" to the music B.A. or music B.M. degrees.

Students are not able to add the "Western Music Minor" or "Jazz, Spontaneous Composition and Improvisation Minor" to the music B.A. Compositional Practices or Global Musics concentrations in the music B.A , due to potential overlap between these curricula. Similarly, the "Electronic Music Minor" cannot be added to the compositional practices concentration.

The "Jazz, Spontaneous Composition and Improvisation Minor" can be added to the Western Music concentration. The "Electronic Music Minor" can still be added to the Global Musics or Western Music concentration.

Study Abroad

The department encourages students to explore studying abroad while attending UC Santa Cruz. In particular, the UC Santa Cruz Music Department has an exchange program agreement with the Music Department at the University of Sussex. University of Sussex offers many courses that can be substituted for music major or minor requirements.

However, due to the intense nature of the Music B.M. program, students are encouraged to plan potential study abroad far in advance to ensure they are able to maintain their UC Santa Cruz studies.

For more information on approved course substitutions and the exchange program please visit the Global Learning website.

Honors

Honors in the major are conferred by vote of the music faculty. B.A. or B.M. students can be awarded honors for excellent work in individual areas, including coursework, senior project (thesis or recital), or a capstone course. Excellent work in any two of these areas normally results in honors in the major.

To be considered for highest honors in the major, B.A. students must complete a senior project (not required for the B.A. degree) and B.M. students must complete a capstone course (not required for the B.M. degree). Honors in all three areas—coursework, senior project, and capstone course—normally results in highest honors in the major.

How Music Majors are Assessed

1. Placement exams at the outset of studies assess students' musical competence, and determine their place in the required lower-division theory and harmony courses.
2. Admission to most performance ensembles is by audition. Assessment is based on successful public performances.
3. A juried "advisory audition" is required for students enrolled in MUSC 30A to give students feedback so that they can work toward meeting the requirements for the proficiency audition at the end of the next fall quarter.
4. A juried "proficiency audition" is required for students enrolled in MUSC 150H. All students must exhibit an upper-intermediate or higher level on their major instrument or voice.
5. Auditions for admission to the B.M. program are held at the end of each fall quarter. Students accepted to the program are required to audition twice a year for continuing review and critique. Students in the B.M. program present a Senior Recital which is evaluated by faculty.

6. In required and elective seminars, critical thinking and writing are assessed when students present a major independent project at the end of term.
7. Compositional skills are assessed through the rehearsal and public performance of student works.

Requirements and Planners

Course Requirements

Lower-Division Courses

Lower-Division Theory

Take all of the following courses. Students are accepted to MUSC 30A if they have taken MUSC 14 at UCSC and received an "A" or "A+", or have tested in via the Theory Placement Exam. See the Music Department website for more information on the TPE.

MUSC 30A	Theory, Literature, and Musicianship I	5
MUSC 30B	Theory, Literature, and Musicianship II	5
MUSC 30C	Theory, Literature, and Musicianship III	5

Lower-Division Keyboard and Musicianship

The following courses should be taken alongside MUSC 30 series classes.

MUSC 31	Ear Training	2
MUSC 60	Fundamental Keyboard Skills	2

MUSC 60 enrollment may be waived by instructor approval, or if the student is taking piano lessons from a UC Santa Cruz instructor.

Foreign Language Requirement

FREN 1, GERM 1, and ITAL 1 are required for B.M. voice students. High school transcripts or Advanced Placement (AP) examination scores may satisfy this requirement. The quarter varies for when each class is offered. Students should check with the departments offering these courses to determine when they are regularly offered. Students may also take these courses during Summer Session at UC Santa Cruz, or at another institution.

There are no foreign language requirements for other students in the B.A. or B.M. programs; however, students who are planning to apply for graduate school are strongly advised to study a language pertinent to their research area.

Please see the Language and Applied Linguistics Department page for further information on language courses.

Upper-Division Courses

Core History/Culture

Take all of the following courses

MUSC 101A	Western Music History (c. 1150 - 1750)	5
MUSC 101B	Western Music History (1750-1910)	5
MUSC 101C	Western Music History (1910-present)	5

Elective History/Culture

Take one of these courses

MUSC 101E	Musics of South and Southeast Asia	5
MUSC 101F	Musics of Africa and the Americas	5
MUSC 101G	Musics of Central Asia	5
MUSC 101H	Music of Insular Southeast Asia	5

Elective History/Culture

Take one of these courses

MUSC 105A	Music of the United States	5
MUSC 105C	Folk and Traditional Music in California	5
MUSC 105E	Early Keyboard Music	5
MUSC 105H	Hip Hop Music and Culture in the 20th Century	5
MUSC 105I	Improvisation and Collaborative Practices in the 20th Century	5
MUSC 105L	The Music and Life of Prince	5
MUSC 105M	Solo Song: from Monophony to Monody	5
MUSC 105O	Opera from Peri to Pergolesi	5
MUSC 105P	The Piano	5
MUSC 105Q	The String Quartet from Haydn to the Present	5
MUSC 105R	History of Russian Music	5
MUSC 105S	The Politics of Aesthetics and Spirituality	5
MUSC 105T	Tuning and Acoustics Through Monophony, Heterophony, and Polyphony	5
MUSC 105V	Mexican Music and Conviviality	5

Core Theory

Take the following course

MUSC 150H	Harmony & Form in 19th-century Western Art Music	5

Elective Theory

Take one of the following courses

MUSC 150A	Music Analysis for Performers	5

MUSC 150B	Music Analysis and Composition	5
MUSC 150C	Tonal Counterpoint	5
MUSC 150D	Theory of Southeast Asia	5
MUSC 150I	Hindustani Music Theory	5
MUSC 150J	Intermediate Spontaneous Composition and Improvisation	5
MUSC 150K	Intermediate Jazz Theory	5
MUSC 150N	Noise, Music, Politics	5
MUSC 150P	20th-Century Popular Song	5
MUSC 150R	Field Recording: Mapping and Composing Sound, Identity, and Place	5
MUSC 150S	Focus on Spontaneous Composition	5
MUSC 150T	Post Tonal Analysis	5
MUSC 150X	Theoretical Practices of American Music	5
MUSC 150Z	Interdisciplinary Arts Production Lab	5

Performing Ensembles

Students must participate in performing ensembles for every quarter they are in the B.M. program, for a minimum of six (6) quarters (for transfer students), and nine (9) quarters (for frosh students).

All ensembles are 2 credits each and may be repeated for credit.

A maximum of one ensemble per quarter can be counted toward fulfillment of the total requirement. If two ensembles in one quarter need to be taken to meet time to degree plans approval can be requested to the department Curriculum Committee by email to music@ucsc.edu.

MUSC 1C	University Concert Choir	2
MUSC 2	University Orchestra	2
MUSC 3	Large Jazz Ensemble	2
MUSC 5A	Beginning Sundanese Gamelan	2
MUSC 5B	Intermediate Sundanese Gamelan	2
MUSC 5C	Advanced Sundanese Gamelan	2
MUSC 8A	Beginning Balinese Gamelan	2
MUSC 8B	Advanced Balinese Gamelan	2
MUSC 9	Wind Ensemble	2
MUSC 12	Mariachi Ensemble	2
MUSC 102	University Orchestra	2
MUSC 103	University Concert Choir	2
MUSC 158	South African Music Ensemble	2
MUSC 160	University Opera Theater	5
MUSC 163	Early Music Band	2
MUSC 164	Jazz Combos	2
MUSC 165	Chamber Music Workshop	2
MUSC 166	Chamber Singers	2
MUSC 168	Experimental Music Ensemble	2

Individual Applied Lessons

Students must take applied lessons with UCSC faculty for every quarter they are in the B.M. program, for a minimum of six (6) quarters (for transfer students), and nine (9) quarters (for frosh students).

Students can contact the applied instrument instructor of their primary instrument to arrange an audition prior to the start of the quarter. Applied instrument instructor emails are listed on the department website.

Students should work with the applied instructor of their primary instrument to determine which of the courses listed would be appropriate.

The lessons carry an additional course fee. Concurrent enrollment in an appropriate ensemble is required. Consult the Music Student Handbook for more details.

MUSC 61	Individual Lessons: Half Hour	2
MUSC 62	Individual Lessons: One Hour	3
MUSC 161	Individual Lessons: One Hour	3
MUSC 161A	Individual Lessons: Half Hour	2
MUSC 162	Advanced Individual Lessons: One Hour	5

Continuing B.M. Juries

Demonstration of an advanced level at Continuing B.M. juries each fall and spring quarter.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement.

The DC requirement for the Music B.M. degree is satisfied by completing **one** of the following courses. Some courses may already be core or elective requirements for the major track, meaning students would satisfy the DC requirement through the natural progression of their degree.

MUSC 101A	Western Music History (c. 1150 - 1750)	5
MUSC 101B	Western Music History (1750-1910)	5
MUSC 101C	Western Music History (1910-present)	5
MUSC 101F	Musics of Africa and the Americas	5
MUSC 101G	Musics of Central Asia	5
MUSC 105A	Music of the United States	5
MUSC 105C	Folk and Traditional Music in California	5
MUSC 105M	Solo Song: from Monophony to Monody	5
MUSC 105Q	The String Quartet from Haydn to the Present	5
MUSC 105T	Tuning and Acoustics Through Monophony, Heterophony, and Polyphony	5

MUSC 150D	Theory of Southeast Asia	5

Comprehensive Requirement

Students fulfill the comprehensive requirement for the Music B.M. degree by completing MUSC 196B: Senior Recital Preparation (w/ lessons). Enrollment in MUSC 196B will replace applied lessons for the quarter.

MUSC 196B	Senior Recital Preparation (with individual lessons)	5

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

B.M.—Four-Year Plan for Incoming Frosh

	Fall	Winter	Spring	Summer
Entering				College 1A Summer Edge (optional)
1st (frosh)	MUSC 11A (recommended) Individual Lessons[2] Ensemble[3] College 1	MUSC 14 (if necessary) Individual Lessons[2] Ensemble[3] WRIT 1/WRIT 1E (if needed)	Language[1] Individual Lessons[2] Ensemble[3]	
2nd (soph)	MUSC 30A*/MUSC 31 WRIT 2***	MUSC 30B/MUSC 31 MUSC 101A	MUSC 30C**/MUSC 31 MUSC 101B	
3rd (junior)	MUSC 150H** MUSC 101C Individual Lessons[2] Ensemble[3]	MUSC 105 Individual Lessons[2] Ensemble[3]	MUSC 150** Individual Lessons[2] Ensemble[3]	
4th (senior)	Language[1] Individual Lessons[2] Ensemble[3]	Language[1] Individual Lessons[2] Ensemble[3]	MUSC 101E MUSC 196B Ensemble[3]	

* Indicates a performance jury requirement at the end of the quarter.

**Following acceptance to the B.M. program via audition (can be done anytime up to the end of the third year), continuing B.M. students complete "Continuing B.M." juries at the end of each fall and spring quarter.

***WRIT 2 should be taken in or before spring quarter of the second year.

[1]Bachelor of music voice majors are required to take FREN 1, GERM 1, and ITAL 1. High school transcripts or AP scores may satisfy this requirement. The quarter varies for when each class is offered. Students should check with the departments offering these courses to determine when they are regularly offered. Students may also take these courses during Summer Session at UC Santa Cruz, or at another institution.

[2]Students fulfill the individual lessons requirement by taking one of the following courses: MUSC 61, MUSC 62, or MUSC 161.

General Education (GE) Codes

MUSC 11A will fulfill the IM general education requirement.

[3]Most, but not all, ensembles satisfy the PR-C or PR-E general education requirement. Students should check to confirm which courses from the ensembles course list satisfy GE codes.

Students must complete all other GE requirements.

B.M.—Two-Year Plan for Incoming Transfer Students

The two-year plan assumes that the student places into MUSC 30A before their first fall quarter, and has previously completed most GE requirements. Voice students are assumed to have completed introductory language courses prior to transfer. Transfer students are required to take six quarters of lessons and ensembles at UC Santa Cruz.

	Fall	Winter	Spring	Summer
Entering				KRSG 1T Summer Edge (optional)
1st (junior)	MUSC 30A*/MUSC 31	MUSC 30B/MUSC 31	MUSC 30C**/MUSC 31	
	Language[1]	MUSC 101A	MUSIC 101B	
	Individual Lessons[2]	Individual Lessons[2]	Individual Lessons[2]	
	Ensemble[3]	Ensemble[3]	Ensemble[3]	
2nd (senior)	MUSC 150H*	MUSC 105	MUSC 196B	
	MUSC 101C	MUSC 150	MUSC 101H	
	Individual Lessons[2]	Individual Lessons[2]	Individual Lessons[2]	
	Ensemble[3] Language[1]	Ensemble[2]	Ensemble[3] Language[1]	

* Indicates a performance jury requirement at the end of the quarter.

**Following acceptance to the B.M. program via audition (can be done anytime up to the end of the third year), continuing B.M. students complete "Continuing B.M." juries at the end of each fall and spring quarter.

[1]Bachelor of music voice majors are required to take FREN 1, GERM 1, and ITAL 1. High school transcripts or AP scores may satisfy this requirement. The quarter varies for when each class is offered. Students should check with the departments offering these courses to determine when they are regularly offered. Students may also take these courses during Summer Session at UC Santa Cruz, or at another institution.

[2]Students fulfill the individual lessons requirement by taking one of the following courses: MUSC 61, MUSC 62, or MUSC 161.

General Education Codes

[3]Most, but not all, ensembles satisfy the PR-C or PR-E general education requirement. Students should check to confirm which courses from the ensembles course list satisfy GE codes.

WESTERN MUSIC MINOR

The goal of the Western music minor is to provide a focus for musicmaking activities, as well as provide a background in music theory and history.

Course Requirements

Complete the following requirements. All upper-division courses attempted toward the minor must be taken for a letter grade. Lower-division courses can be taken for a letter grade or Pass/No Pass.

Lower-Division Courses

Lower-Division History

Take one of the following courses

MUSC 11A	Introduction to Western Classical Music	5
MUSC 11B	Introduction to Jazz	5
MUSC 11D	Introduction to World Music	5

Lower-Division Theory

Take all of the following courses. Students are accepted to MUSC 30A if they have taken MUSC 14 at UCSC and received an "A" or "A+", or have tested in via the Theory Placement Exam. See the Music Department website for more information on the TPE.

MUSC 30A	Theory, Literature, and Musicianship I	5
MUSC 30B	Theory, Literature, and Musicianship II	5
MUSC 30C	Theory, Literature, and Musicianship III	5

Lower-Division Keyboard and Musicianship

The following courses should be taken alongside MUSC 30 series classes.

MUSC 31	Ear Training	2
MUSC 60	Fundamental Keyboard Skills	2

MUSC 60 enrollment may be waived by instructor approval, or if the student is taking piano lessons from a UC Santa Cruz instructor.

Lower-Division Applied Lessons

Take three quarters of applied lessons from any course type on this list, on your primary instrument or voice.

MUSC 61	Individual Lessons: Half Hour	2
MUSC 62	Individual Lessons: One Hour	3
MUSC 63	Group Instrumental and Vocal Lessons	2

Lower-Division Performing Ensembles

Take three quarters of performing ensembles from any course on this list, on your primary instrument or voice. All courses may be repeated for credit.

Students who are taking applied piano lessons with UCSC faculty members can participate in ensembles on an instrument other than piano.

MUSC 1C	University Concert Choir	2
MUSC 2	University Orchestra	2
MUSC 3	Large Jazz Ensemble	2
MUSC 5A	Beginning Sundanese Gamelan	2
MUSC 5B	Intermediate Sundanese Gamelan	2
MUSC 5C	Advanced Sundanese Gamelan	2
MUSC 8A	Beginning Balinese Gamelan	2
MUSC 8B	Advanced Balinese Gamelan	2
MUSC 9	Wind Ensemble	2
MUSC 12	Mariachi Ensemble	2

Upper-Division Courses

Upper-Division Performing Ensembles

Take three quarters of performing ensembles from any course on this list, on your primary instrument or voice. All courses may be repeated for credit.

Students who are taking applied piano lessons with UCSC faculty members can participate in ensembles on an instrument other than piano.

If no upper-division ensembles are available for your instrument/voice type, you can petition additional quarters of lower-division ensembles. Contact the Music Department for more information.

MUSC 102	University Orchestra	2
MUSC 103	University Concert Choir	2
MUSC 158	South African Music Ensemble	2
MUSC 160	University Opera Theater	5
MUSC 163	Early Music Band	2
MUSC 164	Jazz Combos	2
MUSC 165	Chamber Music Workshop	2
MUSC 166	Chamber Singers	2
MUSC 168	Experimental Music Ensemble	2

Students can petition to take additional lower-division ensembles, if there are no upper-division ensembles available for their instrument/voice. Petitions can be sent to music@ucsc.edu.

Upper-Division Applied Lessons

Take three quarters of applied lessons from any course type on this list, on your primary instrument or voice.

MUSC 161	Individual Lessons: One Hour	3
MUSC 161A	Individual Lessons: Half Hour	2
MUSC 161B	Group Instrumental & Vocal Lessons	2
MUSC 162	Advanced Individual Lessons: One Hour	5

Upper-Division Electives

Take two (2) courses from the following list

MUSC 101A	Western Music History (c. 1150 - 1750)	5
MUSC 101B	Western Music History (1750-1910)	5
MUSC 101C	Western Music History (1910-present)	5
MUSC 101E	Musics of South and Southeast Asia	5
MUSC 101F	Musics of Africa and the Americas	5
MUSC 101G	Musics of Central Asia	5
MUSC 101H	Music of Insular Southeast Asia	5
MUSC 105A	Music of the United States	5
MUSC 105C	Folk and Traditional Music in California	5
MUSC 105E	Early Keyboard Music	5
MUSC 105M	Solo Song: from Monophony to Monody	5
MUSC 105O	Opera from Peri to Pergolesi	5
MUSC 105P	The Piano	5
MUSC 105Q	The String Quartet from Haydn to the Present	5
MUSC 105R	History of Russian Music	5

MUSC 105T	Tuning and Acoustics Through Monophony, Heterophony, and Polyphony	5
MUSC 150A	Music Analysis for Performers	5
MUSC 150B	Music Analysis and Composition	5
MUSC 150C	Tonal Counterpoint	5
MUSC 150H	Harmony & Form in 19th-century Western Art Music	5
MUSC 150I	Hindustani Music Theory	5
MUSC 150T	Post Tonal Analysis	5
MUSC 150X	Theoretical Practices of American Music	5

Planner

The table below is for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Two-Year Western Music Minor Plan

	Fall	Winter	Spring
1st	MUSC 11A*		
	MUSC 61, MUSC 62 or MUSC 63	MUSC 61, MUSC 62 or MUSC 63	MUSC 61, MUSC 62, or MUSC 63
	Performing ensemble	Performing ensemble	
2nd	MUSC 30A; MUSC 31 60	MUSC 30B; MUSC 31 60	MUSC 30C; MUSC 31 60
		MUSC 101B^	MUSC 105R^
	MUSC 161A, MUSC 161B or MUSC 161	MUSC 161A, MUSC 161B or MUSC 161	MUSC 161A, MUSC 161B or MUSC 161
	Performing ensemble	Performing ensemble	Performing ensemble

*Satisfies the lower-division history requirement; can be replaced with MUSC 11B or MUSC 11D.

^Satisfies upper-division elective requirement; can be replaced with other courses from the elective list.

General Education (GE) Codes

MUSC 11A satisfies the IM GE code, MUSC 11B satisfies the ER GE code, and MUSC 11D satisfies the CC GE code.

Most, but not all, ensembles satisfy the PR-C or PR-E code GE requirement. Students should check to confirm which courses from the ensembles course list satisfy GE codes.

ELECTRONIC MUSIC MINOR

The electronic music minor focuses on the study of creating music using the tools of modern technology. It is designed to complement the music major or programs in other media by providing instruction in advanced skills of audio production, sound synthesis, and computer-assisted composition.

Course Requirements

Complete the following requirements. All upper-division courses attempted toward the minor must be taken for a letter grade. Lower-division courses can be taken for a letter grade or Pass/No Pass.

Lower-Division Courses

Electronic Music History Requirement

Take the following course.

MUSC 80C	History, Literature, and Technology of Electronic Music	5

Lower-Division Music History Elective

Take one course from the following list. A similar music survey/history course taken here or at another institution may be approved by the department. Email music@ucsc.edu if you have questions regarding a possible substitution.

MUSC 11A	Introduction to Western Classical Music	5
MUSC 11B	Introduction to Jazz	5
MUSC 11C	Popular Music in the United States	5
MUSC 11D	Introduction to World Music	5
MUSC 11E	Global Popular Music	5

Lower-Division Music Theory Requirement

Students must take the Theory Placement Exam in order to test into the appropriate western music theory course (MUSC 14, or MUSC 30A). If a student places into MUSC 30A via the exam, they will automatically satisfy the minor's theory requirement. Students who place into MUSC 14 must pass the course to satisfy the minor's theory requirement.

MUSC 14	Beginning Western Theory and Musicianship	5

Technical Sound Elective

Take one course from the following list. A similar music course that has a technical focus may be approved by the department. Email music@ucsc.edu if you have questions regarding a possible substitution.

MUSC 71	Laptop Music	5
MUSC 72	Fundamentals of Music Technology	2
MUSC 80K	Listening to the Environment	5
MUSC 80L	Artificial Intelligence and Music	5
PHYS 80U	Physics and Psychophysics of Music	5
FILM 171A	Sound	5
THEA 114	Sound Design and Engineering for the Theater	5

Introductory Programming Elective

Take one of the following courses. A similar programming course taken here or at another institution may be approved by the department. Email music@ucsc.edu if you have questions regarding a possible substitution. A test-out option is available for CSE 20. If a student tests out of CSE 20 via the exam, they will automatically satisfy the minor's programming requirement. Students who place into CSE 20 must pass the course, or another from the list, to satisfy the minor's programming requirement.

CSE 5J	Introduction to Programming in Java	5
CSE 20	Beginning Programming in Python	5
ECE 101	Introduction to Electronic Circuits	5
ECE 153	Digital Signal Processing	5
ECE 171	Analog Electronics	5
PHYS 160	Practical Electronics	5

Upper-Division Courses

Upper-Division Lecture/Seminar Electives

Take four (4) of the following courses. Testing out of MUSC 123A (formerly MUSC 123) is possible via technical assessment. If a student tests out of MUSC 123A via assessment, they should plan to take another course from this list, outside the 123 series, to fulfill their last elective.

MUSC 105H	Hip Hop Music and Culture in the 20th Century	5
MUSC 123A	Electronic Music: Synthesis & Composition I	5
MUSC 123B	Electronic Music: Synthesis & Composition II	5
MUSC 123C	Electronic Music: Synthesis & Composition III	5
MUSC 150N	Noise, Music, Politics	5
MUSC 150P	20th-Century Popular Song	5
MUSC 150R	Field Recording: Mapping and Composing Sound, Identity, and Place	5
MUSC 150Z	Interdisciplinary Arts Production Lab	5
MUSC 206B	Computer-Assisted Composition	5
MUSC 206C	Composing for Instruments and Live Electronics	5

Upper-Division Workshop/Ensemble Electives

Take three (3) of the following courses. All courses in list, except MUSC 167R, can be repeated for credit.

MUSC 73	Music and the Ocean	3
MUSC 129	Live Electroacoustic Music Ensemble	2
MUSC 167	Workshop in Electronic Music	2
MUSC 167R	Recording Workshop	2
MUSC 267	Workshop in Computer Music and Visualization	2

Planner

The table below is for informational purposes and does not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Two-Year Electronic Music Minor Plan

Fall	**Winter**	**Spring**	**1st**	MUSC 80C	MUSC 12C	MUSC 12C

			%	%
	CSE 20 ^	MUSC 14 ~		
2nd	MUSC 15 0Z %	MUSC 16 7R +	MUSC 16 7+	
		MUSC 80 L#	MUSC 11 B*	

^Satisfies programming elective; can be replaced with CSE 5J, or other classes from list

~Satisfies music theory requirement; can be fulfilled by placing directly into MUSC 30A via the Theory Placement Exam

#Satisfies technical sound elective; can be replaced with MUSC 71, MUSC 72, MUSC 80K, MUSC 80R, MUSC 80U, or other classes

*Satisfies the music history requirement; can be replaced with MUSC 11A, 11C 11D, or 11E

%Satisfies an upper-division elective requirement; can be replaced with other courses from the list

+Satisfies an upper-division workshop/ensemble requirement; can be replaced with other courses from the list

General Education (GE) Codes

The MUSC 11 requirement can satisfy one of the following GE codes: MUSC 11A - IM; MUSC 11B - ER, MUSC 11C - ER, MUSC 11D - CC; MUSC 11E - ER.

All workshops/ensembles listed satisfy the PR-C GE, except MUSC 167.

The technical sound elective can satisfy one of the following GE codes: MUSC 71 - PR-C; MUSC 80K - PE-E; MUSC 80L - MF; MUSC 80R - PE-T; MUSC 80U - MF.

The programming requirement can satisfy one of the following GE codes: CSE 5J - MF; and CSE 20 - MF.

JAZZ SPONTANEOUS COMPOSITION AND IMPROVISATION MINOR

The Jazz, Spontaneous Composition, and Improvisation minor focuses on the study of the history, theory, and performance of jazz and other improvised musics.

Course Requirements

The Jazz, Spontaneous Composition, and Improvisation minor focuses on the study of the history, theory, and performance of jazz and other improvised musics. In addition, students may be introduced to musical styles that have had profound influences on the uniquely American art form of jazz: folk and popular musics of Africa, Europe, South Asia and the United States and Western classical music.

The Jazz, Spontaneous Composition, and Improvisation minor is limited to students who have sufficient performance proficiency to pass auditions for entry into the jazz ensembles, MUSC 3 and MUSC 164.

All upper-division courses attempted toward the minor must be taken for a letter grade. Lower-division courses can be taken for a letter grade or Pass/No Pass.

Lower-Division Courses

Lower-Division History

Take one of the following courses

MUSC 11B	Introduction to Jazz	5
MUSC 11C	Popular Music in the United States	5
MUSC 11E	Global Popular Music	5

Lower-Division Theory

While MUSC 14, Beginning Western Theory and Musicianship, is the recommended starting place for students with only some prior music theory experience, students may test out of MUSC 14 by placing directly into MUSC 30A, Theory, Literature and Musicianship I, via the Music Theory Placement Exam. The Theory Placement Exam is offered twice per year—in fall quarter, the Tuesday before classes start; and in the beginning of either winter or spring quarter. See the Music Department website for exam details. If a student places into MUSC 30A via the exam, they are not required to take MUSC 14.

MUSC 60, Fundamental Keyboard Skills, is recommended to be taken alongside Western theory courses.

MUSC 14	Beginning Western Theory and Musicianship	5

MUSC 30A	Theory, Literature, and Musicianship I	5

Lower-Division Musicianship

The following course alongside MUSC 30A

MUSC 31	Ear Training	2

Lower-Division Theory and Improvisation

Take one of the following courses

MUSC 20C	Beginning Jazz Theory	5
MUSC 74	Beginning Spontaneous Composition and Improvisation	5

Or two quarters of the following course

MUSC 3	Large Jazz Ensemble	2

Upper-Division Courses

Upper-Division Theory and Improvisation

Take one of the following courses

MUSC 150J	Intermediate Spontaneous Composition and Improvisation	5
MUSC 150K	Intermediate Jazz Theory	5

Upper-Division Electives

Take three (3) of the courses from the following list.

MUSC 101C	Western Music History (1910-present)	5
MUSC 105A	Music of the United States	5
MUSC 105C	Folk and Traditional Music in California	5
MUSC 105H	Hip Hop Music and Culture in the 20th Century	5
MUSC 105I	Improvisation and Collaborative Practices in the 20th Century	5
MUSC 105V	Mexican Music and Conviviality	5
MUSC 121A	Jazz Analysis	5
MUSC 150D	Theory of Southeast Asia	5
MUSC 150I	Hindustani Music Theory	5
MUSC 150J	Intermediate Spontaneous Composition and Improvisation	5
MUSC 150K	Intermediate Jazz Theory	5
MUSC 150P	20th-Century Popular Song	5
MUSC 150S	Focus on Spontaneous Composition	5
MUSC 150Z	Interdisciplinary Arts Production Lab	5
MUSC 203B	Performance Practice in the Renaissance	5
MUSC 203F	Performance Practice in the 20th Century	5
MUSC 203H	Area Studies in Performance Practice	5

Performing Ensembles

Students in the Jazz, Spontaneous Composition, and Improvisation minor are required to take six quarters of performing ensembles: at least three quarters of a jazz-focused ensemble (MUSC 3 or MUSC 164), and three completely elective ensembles. Both MUSC 3 and MUSC 164 can be repeated for credit.

Jazz Ensembles

Take three quarters of MUSC 3 and/or MUSC 164. If a student elects to take two quarters of MUSC 3 instead of MUSC 74 or MUSC 20C, they are only required to do one additional quarter of a jazz ensemble, plus the three quarters of elective ensembles.

Contact the instructors of these ensembles directly for audition information.

MUSC 3	Large Jazz Ensemble	2
MUSC 164	Jazz Combos	2

Elective Ensembles

In addition to the three quarters of a jazz-focused ensemble, students pursuing this minor must take three elective ensembles. Students may repeat any of the ensembles listed below for credit.

MUSC 1C	University Concert Choir	2
MUSC 2	University Orchestra	2
MUSC 3	Large Jazz Ensemble	2
MUSC 5A	Beginning Sundanese Gamelan	2
MUSC 5B	Intermediate Sundanese Gamelan	2
MUSC 5C	Advanced Sundanese Gamelan	2
MUSC 8A	Beginning Balinese Gamelan	2
MUSC 8B	Advanced Balinese Gamelan	2
MUSC 9	Wind Ensemble	2
MUSC 10	Central Asian Ensemble	2
MUSC 12	Mariachi Ensemble	2
MUSC 53A	Beginning Ghanaian Ensemble	2
MUSC 54	North Indian Music Workshop	2
MUSC 55	Rhythms of North India	2
MUSC 55A	Intermediate Rhythms of North India	2
MUSC 77	Raga Jazz: Application of Indian Music to Western Instruments	5
MUSC 102	University Orchestra	2
MUSC 103	University Concert Choir	2
MUSC 129	Live Electroacoustic Music Ensemble	2
MUSC 158	South African Music Ensemble	2
MUSC 163	Early Music Band	2
MUSC 164	Jazz Combos	2
MUSC 165	Chamber Music Workshop	2
MUSC 166	Chamber Singers	2

MUSC 168	Experimental Music Ensemble	2

Planner

The table below is for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Two-Year Jazz Minor Plan

	Fall	Winter	Spring
1st	MUSC 11B~	MUSC 14*	MUSC 150Z^
	MUSC 74 or MUSC 20C	MUSC 150J or MUSC 150K	
	MUSC 3 or MUSC 164	MUSC 3 or MUSC164	MUSC 3 or MUSC 164
2nd	MUSC 30A/MUSC 31	MUSC 105C^	MUSC 121A^
	Elective ensemble	Elective ensemble	Elective ensemble

~Satisfies lower-division history requirement; can be replaced with other courses from this list (see above).

* May be satisfied by placing directly into MUSC 30A via the Theory Placement Exam.

^Satisfies upper-division elective requirement; can be replaced with other courses from this list (see above).

General Education (GE) Codes

MUSC 11B, MUSC 11C, and MUSC 11E all satisfy the ER GE code.

Most, but not all, ensembles satisfy the PR-C or PR-E code GE requirement. Students should check to confirm which courses from the ensembles course list satisfy GE codes.

MUSIC M.A.

Introduction

The Master of Arts (MA) degree program in music has emphases in composition, musicology/ethnomusicology, or performance practice, and integrates studies in performance, composition/analysis, and research. In consultation with a faculty advisor, the student pursues a two-year course of studies culminating in a final project that combines an original composition, written thesis, or essay with a related public performance or lecture recital.

Requirements

Course Requirements

A minimum of 60 course credits completed at UC Santa Cruz is required for the degree. All MA students are required to complete the following core courses:

MUSC 200	Introduction to Research Methods	5
MUSC 201	History of Music Theory from the Greeks Through Rameau	5
MUSC 202	Tonal and Posttonal Analysis	5
MUSC 252	Current Issues Colloquium	

Students entering the program Fall 2007 and later take MUSC 252 each quarter they are in residence.

Students with an emphasis in composition also complete:

MUSC 219	Techniques in Composition	5
MUSC 220	Graduate Seminar in Music Composition	5

Plus one course in the MUSC 203 Performance Practice series

MUSC 203A	Performance Practice in the Middle Ages	5
MUSC 203B	Performance Practice in the Renaissance	5
MUSC 203C	Performance Practice in the Baroque	5
MUSC 203D	Performance Practice in the Classic Period	5
MUSC 203E	Performance Practice in the Romantic Period	5
MUSC 203F	Performance Practice in the 20th Century	5
MUSC 203G	Concepts, Issues, and the Practice of Ethnomusicology	5
MUSC 203H	Area Studies in Performance Practice	5

Students with an emphasis in musicology/ethnomusicology or performance practice also complete:

Three courses from the Music 203 Performance Practice series

MUSC 203A	Performance Practice in the Middle Ages	5
MUSC 203B	Performance Practice in the Renaissance	5
MUSC 203C	Performance Practice in the Baroque	5
MUSC 203D	Performance Practice in the Classic Period	5
MUSC 203E	Performance Practice in the Romantic Period	5
MUSC 203F	Performance Practice in the 20th Century	5
MUSC 203G	Concepts, Issues, and the Practice of Ethnomusicology	5

MUSC 203H	Area Studies in Performance Practice	5

MUSC 206D: Music Perception and Cognition meets the requirement for one MUSC 203 course. It is possible, in some cases, to substitute a course from the MUSC 253 or MUSC 254 series for one MUSC 203 course. Students should contact the graduate advisor for more information on petitioning the Graduate Committee for course substitutions.

Language Proficiency Requirement

All M.A. students are required to demonstrate reading knowledge equivalent to at least one year of coursework for one language other than English. To complete this requirement, current skill in reading and comprehension of a language other than English, to be determined in consultation with your primary advisor, must be demonstrated in one of the following ways:

1. Native speakers of a language other than English will satisfy this requirement (no test is necessary).
2. Satisfactory completion of “level 3” (the third quarter) language instruction at UCSC, preferably in the first year of the program. These courses may be taken Satisfactory/Unsatisfactory. Submission of an official transcript documenting successful completion of one year of university-level language instruction at another institution (equivalent to level 3 at UCSC).
3. Passing a proficiency examination administered by the Music Department in French, Spanish, German, Italian, or Russian. (This test requires translation of a passage of at least 600 words with no resources other than a dictionary to be completed in 1.5 hours.) If a student does not pass this test, enrollment in the appropriate language at UCSC will be required. The proficiency examination may be taken only once.
4. For languages other than French, Spanish, German, Italian, or Russian, the department may accept completion of an online course as fulfilling the requirement if the student can demonstrate that the course builds skills equivalent to those gained in a “level 3” (third-quarter) language course at UCSC. The Graduate Committee will determine whether or not to accept any such course.

Other Requirements

The final project for the degree includes both performing and scholarly components, which vary according to the degree emphasis.

Two types of master’s degrees are offered: “A Thesis Plan I master's requires a research thesis, while a Capstone Plan II master's has a capstone requirement, which may be a comprehensive exam, an individual project, or a group project.”

Students with a composition emphasis will complete a Thesis Plan I masters. Students with this emphasis submit a thesis composition together with an essay that addresses historical, technical, and/or interpretive issues of the music (MUSC 299); and they complete a full-length recital (MUSC 298) of their compositional work.

Students with a musicology/ethnomusicology emphasis will complete a Thesis Plan I master's, regardless of whether or not they complete a performance or lecture-recital. Students with this emphasis will complete a thesis (MUSC 299) and may choose to give a short performance or lecture-recital related to the thesis (MUSC 298).

Students with a performance practice emphasis will usually complete a Capstone Plan II master's and write a short essay to accompany a recital, but may have the option to choose a Thesis Plan I master's instead. Students in this emphasis complete a full-length recital (MUSC 298) and an accompanying short essay that addresses historical, technical, and/or interpretive aspects of the music performed in the recital. Students in this emphasis whose main area is conducting complete a full-length recital (MUSC 298) and one of the following: a shorter lecture-recital, a short analytical or contextual essay on a different topic, or a collaboration with a graduate student composer or faculty composer on a premiere public performance. Students are encouraged to create a program involving corollary studies such as computer studies, area cultural studies, linguistics, anthropology, theater arts, and visual arts.

Letter Grade Policy

Graduate students must take all core courses for a letter grade. These courses include the following: MUSC 200, MUSC 201, MUSC 202, MUSC 203A-H, MUSC 206A-D, MUSC 219, MUSC 220, MUSC 253A-D, and MUSC 254A-X. Grades of C or D do not satisfy any course requirement for a music graduate degree.

The colloquium course (MUSC 252) must be taken with the Satisfactory/Unsatisfactory grade option.

Independent study courses (MUSC 261, MUSC 265, MUSC 295, MUSC 297, MUSC 298, and MUSC 299) may be taken with the Satisfactory/Unsatisfactory grade option.

[Optional Catchall]

Applying for Graduation

Students should contact the graduate advisor to confirm that all requirements for the MA degree have been met and to complete the Graduate Division "Application for the M.A. Degree" form.

MUSIC D.M.A.

Introduction

The Doctor of Musical Arts (D.M.A.) degree program in music composition allows for the development of broad and diverse compositional practices. The D.M.A. program seeks to develop accomplished, active, and articulate composers who have a broad awareness of the diverse practices, cultural influences, media, venues, and technical means available to them in the 21st century. Students participate in a range of

composition-focused seminars, including seminars in cross-cultural approaches to composition and performance—with emphases on indigenous, Asian, and African-diasporic musics—and computer-assisted composition, which focus on algorithmic approaches, constraint-based generation of musical materials and structures, digital synthesis, intermedia work, and real-time sound processing.

Advancement to Candidacy

Course Requirements

For students entering with the bachelor's degree, a minimum of 102 credits in coursework at UC Santa Cruz will be required. All students must be in residence for a minimum of nine quarters. Students must enroll in a minimum of 10 credits each quarter until they advance to candidacy. After advancing to candidacy, students remaining in residence must take a minimum of one 5-credit course each quarter.

For students entering with a master's degree from another institution, a minimum of 72 credits in coursework at UC Santa Cruz will be required. All students must be in residence for a minimum of six quarters. Students must enroll in a minimum of 10 credits each quarter until they advance to candidacy. After advancing to candidacy, students remaining in residence must take a minimum of one 5-credit course each quarter. D.M.A. students are expected to complete the degree within a maximum of six calendar years from entrance to the program (leaves of absence are not excluded from this count).

Students entering the D.M.A. program with a bachelor's degree must take the following course:

MUSC 200	Introduction to Research Methods	5

Students entering the D.M.A. with an MA degree in a field other than music should consult their adviser about taking MUSC 200, Research Methods.

All students entering the D.M.A. program must take the following courses:

MUSC 200	Introduction to Research Methods	5
MUSC 202	Tonal and Posttonal Analysis	5
MUSC 219	Techniques in Composition	5
MUSC 220	Graduate Seminar in Music Composition	5
MUSC 206A	Global Music Composition	5

Plus one of the following:

MUSC 206B	Computer-Assisted Composition	5
MUSC 206C	Composing for Instruments and Live Electronics	5

Current Issues Colloquium

Before advancing to candidacy, all D.M.A. students must enroll in MUSC 252, Current Issues Colloquium, each quarter in residence.

Five quarters of independent study:

MUSC 297	Independent Study	5
MUSC 298	Graduate Recital	5
MUSC 299	Thesis Research	5

D.M.A. students must take at least five quarters of independent study.

MUSC 297 is typically taken in preparation for the Qualifying Exams.

MUSC 298 is typically taken the quarter of the Qualifying Recital.

MUSC 299 is usually taken after advancing to candidacy, in preparation for the dissertation.

Elective Requirements

D.M.A. students must take at least two of the following elective courses.

Note that if students elect to take MUSC 267, Workshop in Computer Music and Visualization, to satisfy one elective requirement, two quarters of the course are required.

MUSC 201	History of Music Theory from the Greeks Through Rameau	5
MUSC 203G	Concepts, Issues, and the Practice of Ethnomusicology	5
MUSC 203H	Area Studies in Performance Practice	5
MUSC 267	Workshop in Computer Music and Visualization	2

Language Proficiency Requirements

All D.M.A. students are required to demonstrate reading knowledge equivalent to at least one year of coursework for one language other than English. This requirement must be met before taking the Qualifying Exams (see below).

To complete this requirement, current skill in reading and comprehension of a language other than English, to be determined in consultation with your primary advisor, must be demonstrated in one of the following ways:

1. Native speakers of a language other than English will satisfy this requirement (no test is necessary).

2. Satisfactory completion of the third quarter of instruction in a language other than English, at UCSC, preferably in the first year of the program. These courses may be taken satisfactory/unsatisfactory. Submission of an official transcript documenting successful completion of one year of university-level language instruction at another institution (equivalent to level 3 at UCSC).

3. Passing a proficiency examination administered by the Music Department in French, Spanish, German, Italian, or Russian. (This test requires translation of a passage of at least 600 words, with no resources other than a dictionary, to be completed in 1.5 hours.) If a student does not pass this test, enrollment in the appropriate

language at UCSC will be required. The proficiency examination may be taken only once.

4. For languages other than French, Spanish, German, Italian, or Russian, the department may accept completion of an online course as fulfilling the requirement if the student can demonstrate that the course builds skills equivalent to those gained in a "level 3" (third-quarter) language course at UCSC. The Graduate Committee will determine whether or not to accept any such course.

Graduate Division policy states that the language requirement must be completed prior to taking the Qualifying Exam. In order to advance to candidacy, a Report on Language Requirement form must be submitted to Graduate Division.

Teaching Requirement

Qualifying Examination

Advancement to candidacy is contingent upon the passing of a written examination and an oral examination normally administered at the end of year three for students entering with a bachelor's degree, and the end of year two or the beginning of year three for students entering with a master's degree from another institution. For the written portion of the examination, the qualifying examination committee provides questions on the three topics assigned as areas of emphasis. The oral examination is administered by the student's qualifying examination committee and may concern any aspect of the assigned topics with an emphasis on those issues addressed in the written portion of the examination. Advancement to candidacy will be granted after successful completion of the written and oral examinations, acceptance of the dissertation reading committee form, satisfactory completion of coursework and the foreign language requirement, and the payment of the necessary fees.

Post-Qualifying Requirements

After advancing to candidacy, students must enroll in at least two quarters of MUSC 297, Independent Study, and one quarter of MUSC 299, Thesis Research, in preparation for the dissertation. Students may substitute additional quarters of MUSC 299 for MUSC 297.

Letter Grade Policy

Graduate students must take all core courses for a letter grade. These courses include the following: MUSC 200, MUSC 201, MUSC 202, MUSC 203A-MUSC 203H, MUSC 206A-MUSC 206D, MUSC 219, MUSC 220, MUSC 253A-MUSC 253D, and MUSC 254A-MUSC 254X. Grades of C or D do not satisfy any course requirement for a music graduate degree.

The colloquium course (MUSC 252) must be taken with the satisfactory/unsatisfactory grade option.

Independent study courses (MUSC 261, MUSC 265, MUSC 295, MUSC 297, MUSC 298, and MUSC 299) may be taken with the satisfactory/unsatisfactory grade option.

Non-Terminal Master's Degree

Students who entered the D.M.A. program with a bachelor's degree may apply for the Non-Terminal M.A. degree after completion of a minimum of five quarters in residence, evidence of the completion of the equivalent of one year of a language other than English at UC Santa Cruz, and the courses listed in the chart below. After completion of the required courses, students should take MUSC 297 in connection with their primary advisor in order to complete a capstone composition project, ideally stemming from foundations of technique and/or critical studies developed in one of the seminars. In consultation with the primary advisor, the capstone composition project should have a secondary reader, whose signature in combination with that of the primary advisor, and confirmation (by the department chair) of other requirements above fulfilled constitutes nomination for the conferral of the master's of arts degree.

MUSC 200	Introduction to Research Methods	5
MUSC 202	Tonal and Posttonal Analysis	5
MUSC 206A	Global Music Composition	5
MUSC 206B	Computer-Assisted Composition	5
MUSC 219	Techniques in Composition	5
MUSC 220	Graduate Seminar in Music Composition	5
MUSC 252	Current Issues Colloquium	

Two elective seminars from the following list:

MUSC 201	History of Music Theory from the Greeks Through Rameau	5
MUSC 203G	Concepts, Issues, and the Practice of Ethnomusicology	5
MUSC 203H	Area Studies in Performance Practice	5
MUSC 267	Workshop in Computer Music and Visualization	2

Students must enroll in MUSC 267 for two quarters should they choose to use it as an elective seminar as it is a 2-credit class.

Dissertation

Dissertation

D.M.A. students must complete a dissertation consisting of a substantial musical composition accompanied by an essay. One to two years of work beyond the qualifying examinations should be sufficient for the completion of the dissertation, except in cases where extended fieldwork is required.

Dissertation Defense

The final examination will be a public oral defense of the dissertation. After an oral presentation by the candidate, the candidate will be questioned by the dissertation committee.

Academic Progress

For more information about maintaining academic good standing, students should consult the Academic Requirements and Standards section of the Division of Graduate Studies Handbook.

Applying for Graduation

For more information on applying for graduation, students should make an appointment with the Graduate Program adviser and consult UCSC's Graduate Division Handbook.

[Optional Catchall]

MUSIC PH.D.

Introduction

The Doctor of Philosophy (Ph.D.) degree in music has an emphasis in cross-cultural studies, and aims to provide doctoral students with an integrative framework for music scholarship, emphasizing the ways in which musicology and ethnomusicology interact and complement one another.

In addition to cultural approaches to musical style, the program also encourages the integration of scholarly research with musical performance, emphasizing the manner in which performance serves both rhetorical and symbolic ends within various cultural settings. To this end the concept of "performance practice" plays a significant role in this program, given that the concept of historically or culturally informed performance is applicable to music from the earliest times to the present day in all geographical and cultural regions, and can encompass research activities as diverse as fieldwork, historical editing, and recording, as well as publishing of books and articles on the traditions of composition and performance.

Advancement to Candidacy

Course Requirements

Students entering the Ph.D. program with a bachelor's degree are required to complete the following:

This course

MUSC 200	Introduction to Research Methods	5

Plus three courses from the MUSC 203 Performance Practice series:

MUSC 203A	Performance Practice in the Middle Ages	5
MUSC 203B	Performance Practice in the Renaissance	5
MUSC 203C	Performance Practice in the Baroque	5
MUSC 203D	Performance Practice in the Classic Period	5
MUSC 203E	Performance Practice in the Romantic Period	5
MUSC 203F	Performance Practice in the 20th Century	5
MUSC 203G	Concepts, Issues, and the Practice of Ethnomusicology	5
MUSC 203H	Area Studies in Performance Practice	5

MUSC 206D or a course in the MUSC 254 series may each substitute for one 203 course.

Plus two courses from the MUSC 253 series:

MUSC 253A	Historical Perspectives in Musicology and Ethnomusicology	5
MUSC 253B	Rhythm, Time, and Form	5
MUSC 253C	Music and Discourse	5
MUSC 253D	Issues in the Ethnography of Music	5

Plus three courses from the MUSC 254 series:

MUSC 254C	Performativity and Music	5
MUSC 254D	Organology and Acoustics	5
MUSC 254E	Asian Resonances in 20th-Century American and European Music	5
MUSC 254F	Beethoven	5
MUSC 254J	Jazz Historiography	5
MUSC 254K	Music, Gender, and Sexuality	5
MUSC 254L	John Cage: Innovation, Collaboration, and Performance Technologies	5
MUSC 254M	Music in San Francisco, 1850-1950	5
MUSC 254N	Cruising the Postcolony	5
MUSC 254O	Historiography of American Music	5
MUSC 254R	Research Design and Grant Writing for Music Scholars	5
MUSC 254X	Minimalism	5
MUSC 254Z	Issues in Contemporary and Experimental Music	5

Plus the following course during each quarter of residence:

MUSC 252	Current Issues Colloquium

Students must enroll in MUSC 252, Current Issues Colloquium, until advancing to candidacy.

Elective Requirements

Students entering the Ph.D. program with a bachelor's degree must take three elective graduate seminars, one of which must be outside of the Music Department. Elective seminars should be selected in consultation with the student's faculty adviser.

Electives in the Music Department might include an additional course from the MUSC 203 Performance Practice series, an additional course from the MUSC 253 series, or an additional course from the MUSC 254 series.

Elective course options also include the following seminars:

MUSC 201	History of Music Theory from the Greeks Through Rameau	5
MUSC 202	Tonal and Posttonal Analysis	5
MUSC 253S	The Politics of Aesthetics and Spirituality	5

Second Year Research Paper

Ph.D. students entering the program with a bachelor's degree are required to submit a research paper by the end of their second year in residence (sixth quarter), which will be revised under the supervision of the student's faculty adviser, and will be evaluated at the end of the year by the adviser and an additional faculty member.

Students entering the Ph.D. program with a master's degree are required to complete following courses:

Three courses from the MUSC 203 Performance Practice series:

MUSC 203A	Performance Practice in the Middle Ages	5
MUSC 203B	Performance Practice in the Renaissance	5
MUSC 203C	Performance Practice in the Baroque	5
MUSC 203D	Performance Practice in the Classic Period	5
MUSC 203E	Performance Practice in the Romantic Period	5
MUSC 203F	Performance Practice in the 20th Century	5
MUSC 203G	Concepts, Issues, and the Practice of Ethnomusicology	5
MUSC 203H	Area Studies in Performance Practice	5

Two courses from the MUSC 253 series

MUSC 253A	Historical Perspectives in Musicology and Ethnomusicology	5
MUSC 253B	Rhythm, Time, and Form	5
MUSC 253C	Music and Discourse	5
MUSC 253D	Issues in the Ethnography of Music	5

Three courses from the MUSC 254 series

MUSC 254C	Performativity and Music	5
MUSC 254D	Organology and Acoustics	5
MUSC 254E	Asian Resonances in 20th-Century American and European Music	5
MUSC 254F	Beethoven	5
MUSC 254J	Jazz Historiography	5
MUSC 254K	Music, Gender, and Sexuality	5
MUSC 254L	John Cage: Innovation, Collaboration, and Performance Technologies	5
MUSC 254M	Music in San Francisco, 1850-1950	5
MUSC 254N	Cruising the Postcolony	5
MUSC 254O	Historiography of American Music	5
MUSC 254R	Research Design and Grant Writing for Music Scholars	5
MUSC 254X	Minimalism	5
MUSC 254Z	Issues in Contemporary and Experimental Music	5

Plus the following course during each quarter of residence:

MUSC 252	Current Issues Colloquium	

Students must enroll in MUSC 252, Current Issues Colloquium, until advancing to candidacy.

Plus the following course:

MUSC 299	Thesis Research	5

Elective Requirement

Students entering the Ph.D. program with a master's degree must take one elective graduate seminar from outside the Music Department. This seminar should be selected in consultation with the student's faculty adviser.

Language Proficiency Requirement

All Ph.D. students are required to demonstrate reading knowledge equivalent to at least one year of coursework for two languages other than English. One of these two languages must be relevant to their area of interest. This requirement must be met before taking your program's Qualifying Exams (see below).

To complete this requirement, current skill in reading and comprehension of a language other than English must be demonstrated in one of the following ways:

1. Native speakers of a language other than English will satisfy this requirement.
2. Satisfactory completion of the third quarter of a language other than English at UCSC, or a year equivalent of a summer intensive language course at an accredited university, preferably in the first year of the program. These courses may be taken with a satisfactory/unsatisfactory grading status.
3. Submission of an official transcript documenting successful completion of one year of university-level language instruction at another institution (equivalent to level 3 at UCSC).
4. Passing a language proficiency examination administered by the Music Department in French, Spanish, German, Italian, or Russian. This test requires translation of a passage of at least 600 words with no resources other than a dictionary, to be completed in 1.5 hours. If a student does not pass this test, enrollment in the appropriate language at UCSC will be required. You may only attempt this proficiency examination once.

5. For languages other than French, Spanish, German, Italian, or Russian, the department may accept completion of an online course as fulfilling the requirement, if the student can demonstrate that the course builds skills equivalent to those gained in a "level 3" (third-quarter) language course at UCSC. The Graduate Committee will determine whether or not to accept any such course.

Graduate Division policy states that the language requirement must be completed prior to taking the Qualifying Exam. In order to advance to candidacy, a Report on Language Requirement form must be submitted to Graduate Division.

Teaching Requirements

Qualifying Examination

Advancement to candidacy is contingent upon passing both written and oral examinations. The written qualifying examination will test knowledge absorbed through the two years of coursework as well as material in the student's field of concentration. The oral examination will focus on the previously completed written examinations well as the student's developed expertise in her/his chosen specialization. Students must be registered in the quarter in which they take their qualifying examination.

The examinations will normally be administered in year 4 for students entering with a bachelor's degree, and in year 3 for students entering with a master's degree.

Advancement to candidacy will be granted after successful completion of the written and oral examinations, acceptance of the dissertation reading committee form, satisfactory completion of coursework and the foreign language requirement, and the payment of the necessary fees.

Letter Grade Policy

Graduate students must take all core courses for a letter grade. These courses include the following: MUSC 200, MUSC 201, MUSC 202, MUSC 203A-MUSC 203H, MUSC 206A-MUSC 206D, MUSC 219, MUSC 220, MUSC 253A-MUSC 253D, and MUSC 254A-MUSC 254X. Grades of C or D do not satisfy any course requirement for a music graduate degree.

The colloquium course (MUSC 252) must be taken with the Satisfactory/Unsatisfactory grade option.

Independent study courses (MUSC 261, MUSC 265, MUSC 295, MUSC 297, MUSC 298, and MUSC 299) may be taken with the Satisfactory/Unsatisfactory grade option.

Non-Terminal Master's Degree

Students who entered the Ph.D. program with a bachelor's degree may apply for the MA degree after completion of a minimum of five quarters in residence, evidence of the completion of the equivalent of one year of a foreign language at UC Santa Cruz, the second year research paper, and the following courses: MUSC 200, one course from the MUSC 203 series, MUSC 252 each quarter in residence, one course each from the MUSC 253 and MUSC 254 seminar series, two elective graduate seminars (one of which may be outside of the Music Department), and MUSC 297.

Optional Catchall

Dissertation

Dissertation

To satisfy requirements for the Ph.D. degree, students must complete a dissertation and are strongly encouraged to present a related formal lecture or lecture-recital. The student will develop a dissertation prospectus, which will be due six months after advancement to candidacy. Guidelines for the format and content of the prospectus can be found on the Music Department web site. The dissertation must embody substantial and original scholarly work based on a clearly distinguishable contemporary or historical music-cultural tradition, in any music-culture(s) of the world in which the UCSC program offers expertise. The public lecture or performance must demonstrate the student's grasp of the pertinent music-cultural performance tradition or music-cultural and/or music-historical concepts.

Dissertation Preparation Course Requirements

Students preparing for the dissertation should complete at least one quarter of MUSC 299, Thesis Research, with the faculty adviser.

Dissertation Defense

The final examination will be an oral defense of the dissertation open to the university faculty.

Successful completion of this examination will be determined by a majority vote of the dissertation reading committee.

Additional information about the program, including application and admission, is available from the Division of Graduate Studies and on the department website.

Academic Progress

For more information about maintaining academic good standing, students should consult the Academic Requirements and Standards section of the Division of Graduate Studies Handbook.

Applying for Graduation

For more information on applying for graduation, students should make an appointment with the Graduate Program adviser and consult UCSC's Graduate Division Handbook.

CONTEMPORARY PRACTICES CONCENTRATION MODULE COURSE LIST

Courses by Module

Compositional Practices Modules

In addition to the core course requirements for the Music Bachelor of Arts degree, students in the Compositional Practices concentration must complete three modules, relating to cross-cultural themes and genres.

Each module consists of:

- a lower-division MUSC 11, MUSC 80, or MUSC 81-series course specific to each module (three total)
- an upper-division MUSC 150 or equivalent (theory/composition-based) course specific to each module (three total)
- two quarters of performing ensembles or performance practice workshops specific to each module (six total). Most ensemble/performance practice courses may be repeated for credit.

Global Art Musics

Lower-Division History/Culture

Take one of the following courses. **Cannot** double count with other modular or elective requirements.

MUSC 11A	Introduction to Western Classical Music	5
MUSC 11B	Introduction to Jazz	5
MUSC 80B	Music of Asia	5
MUSC 80I	Music of Modern Israel	5
MUSC 80S	Women in Music	5
MUSC 80T	Mizrach: Jewish Music in the Lands of Islam	5
MUSC 80X	Musics of South Asia	5
MUSC 80Y	Music, Anti-Semitism, and the Holocaust	5
MUSC 81D	Music and Empire	3
MUSC 81G	A Cultural History of the Guitar	5
MUSC 81P	History of Jewish Music	5

Upper-Division Theory

Take one of the following courses. **Cannot** double count with other modular or elective requirements.

MUSC 150A	Music Analysis for Performers	5
MUSC 150B	Music Analysis and Composition	5
MUSC 150C	Tonal Counterpoint	5
MUSC 150D	Theory of Southeast Asia	5
MUSC 150H	Harmony & Form in 19th-century Western Art Music	5
MUSC 150I	Hindustani Music Theory	5
MUSC 150T	Post Tonal Analysis	5

Ensembles/Performance Practice

Take two of the following courses. **Cannot** double count with other modular or elective requirements, but if a course is repeated for credit, it can be used to count toward multiple requirements.

MUSC 1C	University Concert Choir	2
MUSC 103	University Concert Choir	2
MUSC 2	University Orchestra	2
MUSC 102	University Orchestra	2
MUSC 5A	Beginning Sundanese Gamelan	2
MUSC 5B	Intermediate Sundanese Gamelan	2
MUSC 5C	Advanced Sundanese Gamelan	2
MUSC 8A	Beginning Balinese Gamelan	2
MUSC 8B	Advanced Balinese Gamelan	2
MUSC 9	Wind Ensemble	2
MUSC 54	North Indian Music Workshop	2
MUSC 55	Rhythms of North India	2
MUSC 55A	Intermediate Rhythms of North India	2
MUSC 158	South African Music Ensemble	2
MUSC 163	Early Music Band	2
MUSC 165	Chamber Music Workshop	2
MUSC 166	Chamber Singers	2
MUSC 168	Experimental Music Ensemble	2

Experimental and Contemporary Musics

Lower-Division History/Culture

Take one of the following courses. **Cannot** double count with other modular or elective requirements.

MUSC 11C	Popular Music in the United States	5
MUSC 11E	Global Popular Music	5
MUSC 80C	History, Literature, and Technology of Electronic Music	5
MUSC 80E	Race and American Music	5
MUSC 80G	American Musical Theater	5
MUSC 80H	The Hollywood Musical	5
MUSC 80I	Music of Modern Israel	5
MUSC 80J	American Folk Music	5
MUSC 80K	Listening to the Environment	5
MUSC 80L	Artificial Intelligence and Music	5
MUSC 80M	Film Music	5
MUSC 80N	Music of the Grateful Dead	5
MUSC 80O	Music, Politics, and Protest	5
MUSC 80R	Music in the Digital Age	5
MUSC 80S	Women in Music	5
PHYS 80U	Physics and Psychophysics of Music	5
MUSC 80V	The Music of the Beatles	5
MUSC 80W	Music Business	5
MUSC 80Y	Music, Anti-Semitism, and the Holocaust	5
MUSC 81A	Survey of Rap and Hip Hop Music	5
MUSC 81F	Music, Mass Media, and Marketing	5

MUSC 81G	A Cultural History of the Guitar	5
MUSC 81H	The Golden Age of Hip Hop	3
MUSC 81K	Scenes and Subcultures	5
MUSC 81L	Music in Animated Film	5
MUSC 81P	History of Jewish Music	5
MUSC 81R	The 1970s: A Decade in Rock	3
MUSC 81S	Music and Science Fiction	3

Upper-Division Theory

Take one of the following courses. **Cannot** double count with other modular or elective requirements.

MUSC 105H	Hip Hop Music and Culture in the 20th Century	5
MUSC 105I	Improvisation and Collaborative Practices in the 20th Century	5
MUSC 121A	Jazz Analysis	5
MUSC 123A	Electronic Music: Synthesis & Composition I	5
MUSC 123B	Electronic Music: Synthesis & Composition II	5
MUSC 123C	Electronic Music: Synthesis & Composition III	5
MUSC 150N	Noise, Music, Politics	5
MUSC 150P	20th-Century Popular Song	5
MUSC 150R	Field Recording: Mapping and Composing Sound, Identity, and Place	5
MUSC 150S	Focus on Spontaneous Composition	5
MUSC 150T	Post Tonal Analysis	5
MUSC 150X	Theoretical Practices of American Music	5
MUSC 150Z	Interdisciplinary Arts Production Lab	5
MUSC 203F	Performance Practice in the 20th Century	5

Ensembles/Performance Practice

Take two of the following courses. **Cannot** double count with other modular or elective requirements, but if a course is repeated for credit, it can be used to count toward multiple requirements.

MUSC 3	Large Jazz Ensemble	2
MUSC 58	Songwriting Craft and Practice	5
MUSC 70	Hip Hop's Global Inclusiveness & African Roots	2
MUSC 71	Laptop Music	5
MUSC 72	Fundamentals of Music Technology	2
MUSC 73	Music and the Ocean	3
MUSC 77	Raga Jazz: Application of Indian Music to Western Instruments	5
MUSC 78	Popular and Raga-Based Songs of South Asia	2
MUSC 129	Live Electroacoustic Music Ensemble	2
MUSC 164	Jazz Combos	2
MUSC 165	Chamber Music Workshop	2
MUSC 167	Workshop in Electronic Music	2
MUSC 167R	Recording Workshop	2
MUSC 168	Experimental Music Ensemble	2
MUSC 267	Workshop in Computer Music and Visualization	2

Spontaneous Composition and Improvisation

Lower-Division History/Culture

Take one of the following courses. **Cannot** double count with other modular or elective requirements.

MUSC 11B	Introduction to Jazz	5
MUSC 11D	Introduction to World Music	5
MUSC 80A	Music of the Silk Road	5
MUSC 80B	Music of Asia	5
MUSC 80E	Race and American Music	5
MUSC 80F	Music in Latin American Culture: Regional Traditions	5
MUSC 80I	Music of Modern Israel	5
MUSC 80J	American Folk Music	5
MUSC 80Q	A Survey of African Music	5
MUSC 80S	Women in Music	5
MUSC 80T	Mizrach: Jewish Music in the Lands of Islam	5
MUSC 80X	Musics of South Asia	5
MUSC 81A	Survey of Rap and Hip Hop Music	5
MUSC 81E	Music and Resilience in Latin America	5
MUSC 81G	A Cultural History of the Guitar	5
MUSC 81H	The Golden Age of Hip Hop	3
MUSC 81I	Music of Indonesia	5
MUSC 81J	Jazz Mirror of Global Interconnection	5
MUSC 81M	Chicano/Latino Music in the United States	5

Upper-Division Theory

Take one of the following courses. **Cannot** double count with other modular or elective requirements.

MUSC 105H	Hip Hop Music and Culture in the 20th Century	5
MUSC 105I	Improvisation and Collaborative Practices in the 20th Century	5
MUSC 121A	Jazz Analysis	5
MUSC 150D	Theory of Southeast Asia	5
MUSC 150I	Hindustani Music Theory	5
MUSC 150J	Intermediate Spontaneous Composition and Improvisation	5
MUSC 150K	Intermediate Jazz Theory	5

MUSC 150S	Focus on Spontaneous Composition	5
MUSC 150Z	Interdisciplinary Arts Production Lab	5
MUSC 203B	Performance Practice in the Renaissance	5
MUSC 203F	Performance Practice in the 20th Century	5
MUSC 203H	Area Studies in Performance Practice	5

Ensembles/Performance Practice

Take two of the following courses. **Cannot** double count with other modular or elective requirements, but if a course is repeated for credit, it can be used to count toward multiple requirements.

MUSC 3	Large Jazz Ensemble	2
MUSC 5A	Beginning Sundanese Gamelan	2
MUSC 5B	Intermediate Sundanese Gamelan	2
MUSC 5C	Advanced Sundanese Gamelan	2
MUSC 8A	Beginning Balinese Gamelan	2
MUSC 8B	Advanced Balinese Gamelan	2
MUSC 10	Central Asian Ensemble	2
MUSC 12	Mariachi Ensemble	2
MUSC 12B	Mexican Folklorico Music and Dance	2
MUSC 20C	Beginning Jazz Theory	5
MUSC 53A	Beginning Ghanaian Ensemble	2
MUSC 55	Rhythms of North India	2
MUSC 54	North Indian Music Workshop	2
MUSC 55A	Intermediate Rhythms of North India	2
MUSC 57	Survey of Jazz Guitar Styles	2
MUSC 70	Hip Hop's Global Inclusiveness & African Roots	2
MUSC 74	Beginning Spontaneous Composition and Improvisation	5
MUSC 77	Raga Jazz: Application of Indian Music to Western Instruments	5
MUSC 78	Popular and Raga-Based Songs of South Asia	2
MUSC 164	Jazz Combos	2

GLOBAL MUSICS CONCENTRATION MODULE COURSE LIST

Courses by Module

Global Musics Modules

In addition to the core course requirements for the Music Bachelor of Arts degree, students in the Global Musics concentration complete three modules, relating to geographical areas, themes, and genres.

Each module consists of:

- a lower-division MUSC 11, MUSC 80, or MUSC 81-series course specific to each module (three total)
- an upper-division MUSC 101, MUSC 105, or MUSC 150 course specific to each module (three total)
- two quarters of performing ensemble or performance practice workshop specific to each module (six total). Courses may be repeated.

Africa and the Americas

Lower-Division History and Culture

MUSC 11B	Introduction to Jazz	5
MUSC 80E	Race and American Music	5
MUSC 80F	Music in Latin American Culture: Regional Traditions	5
MUSC 80G	American Musical Theater	5
MUSC 80J	American Folk Music	5
MUSC 80Q	A Survey of African Music	5
MUSC 81E	Music and Resilience in Latin America	5
MUSC 81G	A Cultural History of the Guitar	5
MUSC 81J	Jazz Mirror of Global Interconnection	5
MUSC 81M	Chicano/Latino Music in the United States	5

Upper-Division History and Culture or Theory

MUSC 101F	Musics of Africa and the Americas	5
MUSC 105C	Folk and Traditional Music in California	5
MUSC 105H	Hip Hop Music and Culture in the 20th Century	5
MUSC 105V	Mexican Music and Conviviality	5
MUSC 150S	Focus on Spontaneous Composition	5
MUSC 150J	Intermediate Spontaneous Composition and Improvisation	5

Performance Practice

MUSC 12	Mariachi Ensemble	2
MUSC 12B	Mexican Folklorico Music and Dance	2
MUSC 53A	Beginning Ghanaian Ensemble	2
MUSC 70	Hip Hop's Global Inclusiveness & African Roots	2

MUSC 74	Beginning Spontaneous Composition and Improvisation	5
MUSC 158	South African Music Ensemble	2
MUSC 150J	Intermediate Spontaneous Composition and Improvisation	5
MUSC 203H	Area Studies in Performance Practice	5

Asia

Lower-Division History and Culture

MUSC 11D	Introduction to World Music	5
MUSC 80A	Music of the Silk Road	5
MUSC 80S	Women in Music	5
MUSC 80X	Musics of South Asia	5
MUSC 81I	Music of Indonesia	5

Upper-Division History and Culture or Theory

MUSC 101E	Musics of South and Southeast Asia	5
MUSC 101G	Musics of Central Asia	5
MUSC 150D	Theory of Southeast Asia	5
MUSC 150I	Hindustani Music Theory	5

Performance Practice

MUSC 5A	Beginning Sundanese Gamelan	2
MUSC 5B	Intermediate Sundanese Gamelan	2
MUSC 5C	Advanced Sundanese Gamelan	2
MUSC 8A	Beginning Balinese Gamelan	2
MUSC 8B	Advanced Balinese Gamelan	2
MUSC 10	Central Asian Ensemble	2
MUSC 54	North Indian Music Workshop	2
MUSC 55	Rhythms of North India	2
MUSC 55A	Intermediate Rhythms of North India	2
MUSC 77	Raga Jazz: Application of Indian Music to Western Instruments	5
MUSC 78	Popular and Raga-Based Songs of South Asia	2
MUSC 203H	Area Studies in Performance Practice	5

Contemporary/Experimental Music

Lower-Division History and Culture

MUSC 11C	Popular Music in the United States	5
MUSC 80C	History, Literature, and Technology of Electronic Music	5
MUSC 80E	Race and American Music	5
MUSC 80K	Listening to the Environment	5
MUSC 80L	Artificial Intelligence and Music	5
MUSC 80R	Music in the Digital Age	5
MUSC 80S	Women in Music	5
PHYS 80U	Physics and Psychophysics of Music	5
MUSC 81A	Survey of Rap and Hip Hop Music	5
MUSC 81H	The Golden Age of Hip Hop	3

Upper-Division History and Culture or Theory

MUSC 101C	Western Music History (1910-present)	5
MUSC 105A	Music of the United States	5
MUSC 105I	Improvisation and Collaborative Practices in the 20th Century	5
MUSC 105P	The Piano	5
MUSC 105T	Tuning and Acoustics Through Monophony, Heterophony, and Polyphony	5
MUSC 150N	Noise, Music, Politics	5
MUSC 150R	Field Recording: Mapping and Composing Sound, Identity, and Place	5
MUSC 150X	Theoretical Practices of American Music	5

Performance Practice

MUSC 73	Music and the Ocean	3
MUSC 71	Laptop Music	5
MUSC 72	Fundamentals of Music Technology	2
MUSC 129	Live Electroacoustic Music Ensemble	2
MUSC 165	Chamber Music Workshop	2
MUSC 167	Workshop in Electronic Music	2
MUSC 167R	Recording Workshop	2
MUSC 168	Experimental Music Ensemble	2
MUSC 267	Workshop in Computer Music and Visualization	2

Europe

Lower-Division History and Culture

MUSC 11A	Introduction to Western Classical Music	5
MUSC 80Y	Music, Anti-Semitism, and the Holocaust	5
MUSC 81D	Music and Empire	3
MUSC 81G	A Cultural History of the Guitar	5
MUSC 81P	History of Jewish Music	5

Upper-Division History and Culture or Theory

MUSC 101A	Western Music History (c. 1150 - 1750)	5
MUSC 101B	Western Music History (1750-1910)	5
MUSC 101C	Western Music History (1910-present)	5
MUSC 105E	Early Keyboard Music	5

MUSC 105M	Solo Song: from Monophony to Monody	5
MUSC 105O	Opera from Peri to Pergolesi	5
MUSC 105P	The Piano	5
MUSC 105Q	The String Quartet from Haydn to the Present	5
MUSC 105R	History of Russian Music	5
MUSC 150A	Music Analysis for Performers	5
MUSC 150B	Music Analysis and Composition	5

Performance Practice

MUSC 1C	University Concert Choir	2
MUSC 103	University Concert Choir	2
MUSC 2	University Orchestra	2
MUSC 102	University Orchestra	2
MUSC 9	Wind Ensemble	2
MUSC 163	Early Music Band	2
MUSC 165	Chamber Music Workshop	2
MUSC 166	Chamber Singers	2
MUSC 168	Experimental Music Ensemble	2

Jazz

Lower-Division History and Culture

MUSC 11B	Introduction to Jazz	5
MUSC 80E	Race and American Music	5
MUSC 80G	American Musical Theater	5
MUSC 81J	Jazz Mirror of Global Interconnection	5

Upper-Division History and Culture or Theory

MUSC 105A	Music of the United States	5
MUSC 105I	Improvisation and Collaborative Practices in the 20th Century	5
MUSC 121A	Jazz Analysis	5
MUSC 150S	Focus on Spontaneous Composition	5
MUSC 150J	Intermediate Spontaneous Composition and Improvisation	5
MUSC 150K	Intermediate Jazz Theory	5
MUSC 203F	Performance Practice in the 20th Century	5

Performance Practice

MUSC 3	Large Jazz Ensemble	2
MUSC 74	Beginning Spontaneous Composition and Improvisation	5
MUSC 20C	Beginning Jazz Theory	5
MUSC 77	Raga Jazz: Application of Indian Music to Western Instruments	5
MUSC 150J	Intermediate Spontaneous Composition and Improvisation	5
MUSC 164	Jazz Combos	2

Popular Music

Lower-Division History and Culture

MUSC 11B	Introduction to Jazz	5
MUSC 11C	Popular Music in the United States	5
MUSC 11E	Global Popular Music	5
MUSC 80E	Race and American Music	5

OTHER PROGRAMS OF INTEREST

Computer Science: Computer Game Design B.S. (p. 547)

The Department of Performance, Play & Design (PPD) collectively embodies a process of rigorous experimentation and socially conscious analysis to create equitable, accessible, and interdisciplinary works of art and scholarship. We are deeply committed to practices, research, and teaching that speak to the current moment, disrupting oppressive narratives of the past and present, and re-centering historically marginalized communities through narratives, structures, aesthetics, ritual, engagement, and play. We strive in our department to put our performance practice at the forefront of the evolving cultures and identities of our society by immersing students in design, production, history, theory, writing, directing, and technical craft. We integrate these aspects with intersectional feminist, decolonial, and new media strategies and principles to help shape the performance-makers of the future. PPD students are a combined cohort that blends interest in traditional methods with new technologies, defying traditional categorization: experimenting with digital and physical game design, exploring theory on our multiple stages, learning their craft in our labs, studios and shops, and

bringing activism, artistry, and agency to their work on campus, online, and beyond.

ART & DESIGN: GAMES + PLAYABLE MEDIA B.A.

Information and Policies

Introduction

Art & Design: Games + Playable Media (AGPM) values a joyful and rigorous critical discourse in order to build new imaginaries of climate, gender, racial, and disability justice.

Our program is a community of artists that believe in the power of games as an artistic medium for transforming how we experience agency in a world fragmented by capitalism, colonialism, and systemic oppression. We critique art and games that capitalize on systemically toxic player culture, industrial standards that homogenize our approach to storytelling, and exploitative technologies that continue to oppress. Students build toward a multidisciplinary arts practice situated within the broader landscape of contemporary art, media art, performance, and/or social practice.

Our approach to games as a contemporary art practice foregrounds the importance of designing more thoughtful, nuanced, and radical systems for participation that cross medium, positionality, and forms of cultural expression. We support work that self-reflexively acknowledges its context, community, and the ethics that underlie its intention. We work to co-create spaces for thoughtful and transformative play to cultivate the embodied experience of connection, collectivity, and co-liberation in action. Students learn to create projects that are accountable to communities beyond the institution and are guided by a decolonial, intersectional and antiracist framework.

The AGPM major focuses on the following areas of study—students interested in the major should expect courses and curriculum centered around these topics:

- Digital and non-digital games as art, activism and social practice
- Feminist, anti-racist, LGBTQ games, art and media
- Participatory or performance-based games such as role playing games, urban/site-specific games and theater games
- Interactive art, performance art, and new media art
- Exhibition methods for games in traditional art spaces and public spaces

The Art & Design: Games + Playable Media (AGPM) Bachelor of Arts (B.A.) degree at the University of California, Santa Cruz, focuses on the creation of novel game systems, spaces, and configurations that can produce broad ranges of player experiences, for a wide variety of purposes.

Students in the AGPM major learn to understand game design as an art in and of itself, positioned within the context of a number of more disciplinary approaches. Furthermore, students understand game design as a practice of creation, within a much larger and deeper social and historical context.

Program Learning Outcomes

1. **Aesthetics.** Students demonstrate understanding of aesthetic fundamentals through sustained and intentional application of a range of visual arts and design practices, both physical and digital.
2. **Designing Experiences.** Students critically engage with audience feedback to iterate and revise an interactive project in a way that preserves the artist's creative and political goals.
3. **Games as Art.** With a foundation in existing artworks, students design, develop, and create a series of interactive artworks.
4. **Games as Activism.** Students develop a creative practice, and critical study, of games and interactive media by generating critiques of game systems through a lens of power and oppression, and utilizing these critiques in their artwork.
5. **Play as a Radical Endeavor.** Students explore and create a series of playful experiments towards expressive goals that embrace risk and build upon failure. Students analyze play as a vehicle for disruption, resistance, and joy.
6. **Sense of Self As Artist.** Students begin to establish and explore their unique sense of artistic identity and areas of intention and interest, demonstrated via a portfolio of artwork and written work, exhibition, or performance, that expands definitions of games, interactive art, and play.

Academic Advising for the Program

Please refer to the department website for the most up-to-date information on drop-in hours and appointments.

You can reach the AGPM office by emailing agpmadv@ucsc.edu or by calling (831)502-0051 during regular business hours.

Students are encouraged to consult early with the AGPM advisor to create an academic plan for the major far in advance of declaration. Transfer students, please see the "How to Declare a Major" and the "Transfer Information and Policy" sections below.

Getting Started in the Major: Frosh

Students are admitted to UC Santa Cruz with a "proposed major" in most cases, and later petition to declare the major. Admission to UCSC does not guarantee acceptance into a particular major. Students must be declared in a major by the end of their second year (or equivalent), so learning about and preparing for a major is a primary goal for first-year students.

Students interested in entering the Art Design: Games + Playable Media (AGPM) program as frosh can do so as long as they are admitted into UC Santa Cruz. Incoming frosh do not need to satisfy any programming or art requirements prior to arriving at UCSC. However, students interested in entering the program as frosh are urged to make interactive artwork—from paper game prototypes to text-based choose-your-own adventure stories. Developing an arts practice in any medium is also helpful, including theater, drawing, writing, music, sculpture, filmmaking, and others.

Students who enter as frosh should meet with their advising team as early as possible, or by the end of their first year, to gain a clear understanding of the degree requirements and to create a customized academic plan that demonstrates a path to graduation.

Transfer Information and Policy

Transfer Admission Screening Policy

In preparation for transfer to AGPM, students are required to demonstrate proficiency in design and visual art topics. Broadly this includes courses in 2D and 3D concepts, forms, or production; and specific art and design topics such as color theory, typography, interaction design, motion graphics, and performance.

The following courses or their equivalents are required prior to transfer, by the end of the spring term for students planning to enter in fall. Check assist.org for a list of courses at your community college that fulfill these areas.

Complete one courses or its equivalent from each of the following areas:

Intro to 2D Concepts

ART 10D	2D Foundation	5
ART 20G	Introduction to Print Media and Drawing	5
ART 20L	Introduction to Drawing	5
ART 80T	Digital Tools for Contemporary Art Practice	5
ARTG 80G	Visual Communication and Interaction Design	5
ARTG 91	Introduction to Game Art Production	5

Intro to 3D Concepts

ART 10E	3D Foundation	5
ART 20H	Introduction to Sculpture and Public Art	5
ARTG 118	Character Creation for Video Games	5
ARTG 131	3D Game Art Production	5
ARTG 132	3D Character Rigging and Animation for Video Games	5
CMPM 25	Introduction to 3D Modeling	5
CMPM 26	Introduction to 3D Animation	5

Art and Design Topics

ART 10F	4D Foundation	5
ART 20I	Introduction to Photography	5
ART 20K	Introduction to New Media and Digital Artmaking	5
CMPM 80K	Foundations of Video Game Design	5
FILM 20P	Introduction to Production Technique	5
MUSC 1C	University Concert Choir	2
MUSC 2	University Orchestra	2
MUSC 3	Large Jazz Ensemble	2
MUSC 6	Classical Guitar Ensemble	2
MUSC 9	Wind Ensemble	2
MUSC 14	Beginning Western Theory and Musicianship	5
MUSC 15	Preparatory Musicianship	5
MUSC 20A	Global Music Theory and Musicianship	5
MUSC 30A	Theory, Literature, and Musicianship I	5
THEA 10	Introduction to Theater Design and Technology	5
THEA 20	Introductory Studies in Acting	5
THEA 30	Introduction to Dance Theory and Technique	5

Additional Suggested Courses

In addition, the following courses are recommended prior to transfer to ensure timely graduation:

- Community college courses that are articulated for credit with courses in the Foundational Courses and Lower-Division Arts Requirements and Electives courses listed in the Requirements and Planners tab.
- One community college course that is articulated to courses or geographic region requirements in the History of Art and Visual Culture B.A.
- Transfer students who meet the requirements above and complete general education requirements will be able to complete the major in two years as shown in the academic plan in the Planners section of the Requirements and Planners tab on this page. Because of the number of credits required by the B.A., transfer students who have general education requirements remaining may need to take summer session courses and/or additional courses over the academic year to allow graduation in two years.
- Prospective students are encouraged to prioritize required and recommended major preparation, and may additionally complete courses that articulate to UC Santa Cruz general education requirements as time allows.

Getting Started in the Major: Transfer Students

Students are admitted to UC Santa Cruz with a "proposed major" in most cases, and later petition to declare the major. Admission does not guarantee acceptance into a particular major, although transfer students' records are screened for

preparation for many majors at the time of admission. Junior transfer students must be formally declared by the deadline in their second quarter of enrollment.

Transfer students are strongly advised to attend a UC Santa Cruz summer orientation session for transfer students. Students are encouraged to meet with AGPM advising in the summer prior to starting at UCSC or in the beginning of their first quarter to gain a clear understanding of the degree requirements and to create a customized academic plan that demonstrates a path to graduation. AGPM Transfers who have gone through screening will receive permission numbers to enroll in their major declaration courses in the fall and winter of their first year at UCSC. Students should consult with an AGPM academic advisor prior to enrolling in classes to determine their status and to begin the declaration of major process as soon as possible.

Please see a recommended academic plan for junior transfer students in the "Planners" section of the "Requirements and Planners" tab on this page.

Major Qualification Policy and Declaration Process

Major Qualification

To qualify for the AGPM major, students must complete the following major qualification courses:

The following course

ARTG 10	Aesthetic Designs	5

Plus one of these courses

ARTG 20	Games as Art	5
ARTG 25	Games as Art & Activism	5
ARTG 30	Games as Activism	5

Plus one of these courses

ARTG 40	Designing Experiences	5
ARTG 50	Play as a Radical Endeavor	5

Appeal Process

Denials of admission to the major may be appealed by submitting a letter to the AGPM advising staff, addressed to the chair of Performance, Play & Design within 15 days from the date the notification was sent. The appeal letter must describe why the prior performance is not an accurate reflection of the student's potential. Within 15 days of receipt of the appeal, the AGPM advising staff will notify the student and their college of the decision.

How to Declare a Major

Students should submit a petition to declare as soon as they complete the major qualification requirements or reach their declaration deadline quarter. Log into MyUCSC and click the link to submit the Petition for Major/Minor.

Students petitioning when the campus declaration deadline is imminent, will either be approved, denied, or provided with conditions (e.g. completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification (MQ) courses.

Letter Grade Policy

All courses used to satisfy any of the Art Design: Games + Playable Media major requirements can be taken for a letter grade or as Pass/No Pass. This includes both introductory lower-division and advanced upper-division requirements. Please note campus policy holds that no more than 25 percent of the UCSC credits applied toward graduation may be graded on a Pass/No Pass basis.

Course Substitution Policy

Students are able to petition a course to count as a substitute for any given elective requirement via the AGPM Course Substitution Petition form. Once submitted, requests are reviewed by the department chair. The AGPM advisor will reach out to the student and let them know whether their petition was approved or denied.

Requirements and Planners

Course Requirements

Complete the following requirements. Some courses may be satisfied via exam credit.

Lower-Division Courses

Foundational Courses

Complete the following three courses:

ARTG 10	Aesthetic Designs	5
ARTG 40	Designing Experiences	5
ARTG 50	Play as a Radical Endeavor	5

Plus one of the following three courses

ARTG 20	Games as Art	5
ARTG 25	Games as Art & Activism	5
ARTG 30	Games as Activism	5

Lower-Division Arts Elective

Complete one lower-division course from the following:

ART 10D	2D Foundation	5
ART 10E	3D Foundation	5
ART 10F	4D Foundation	5
ART 20L	Introduction to Drawing	5
ART 80T	Digital Tools for Contemporary Art Practice	5
ARTG 91	Introduction to Game Art Production	5
CMPM 25	Introduction to 3D Modeling	5
CMPM 26	Introduction to 3D Animation	5
CMPM 80K	Foundations of Video Game Design	5
FILM 80V	Video Games as Visual Culture	5
MUSC 1C	University Concert Choir	2
MUSC 2	University Orchestra	2

MUSC 3	Large Jazz Ensemble	2
MUSC 5A	Beginning Sundanese Gamelan	2
MUSC 5B	Intermediate Sundanese Gamelan	2
MUSC 5C	Advanced Sundanese Gamelan	2
MUSC 6	Classical Guitar Ensemble	2
MUSC 8A	Beginning Balinese Gamelan	2
MUSC 8B	Advanced Balinese Gamelan	2
MUSC 9	Wind Ensemble	2
MUSC 10	Central Asian Ensemble	2
MUSC 80L	Artificial Intelligence and Music	5
THEA 10	Introduction to Theater Design and Technology	5
THEA 14	Drawing	5
THEA 15	Special Topics in Textiles	5
THEA 17	Costume Construction	5
THEA 18C	Drafting-Computer Aided	5
THEA 19	Design Studio: Lighting Studio A	5
THEA 20	Introductory Studies in Acting	5
THEA 21	Acting Studio I: Psychological Realism	5
THEA 22	Indonesian Dance and Drama	5
THEA 30	Introduction to Dance Theory and Technique	5
THEA 31C	Dance Studio I: Contemporary Dance Theory and Technique	5
THEA 33C	Dance Studio I	5
THEA 36	Introduction to Dance Making	5
THEA 37	African Dance	5
THEA 40	Introduction to Directing	5
THEA 50	Fundamentals of Theater Production	2
THEA 80Z	Indian Dance	5

History of Art and Visual Culture Requirement

Complete any one 5-credit History of Art and Visual Culture (HAVC) course. This can be either a lower- or upper-division course.

Upper-Division Courses

The upper-division coursework for the AGPM major consists of a minimum of eight total upper-division courses of 5 credits or more. Students take one course from each of the three topic areas: Craft Refinement; Social Interventions; and Performance, Portfolio + Exhibition, plus one additional course from the Disciplinary Communication (DC) list. The remaining four upper-division courses may be chosen from ARTG courses 100-189, the three topic areas, and the upper-division electives list. All courses must be at least 5 credits and upper-division.

Craft Refinement

Complete at least one course from the following list:

ARTG 118	Character Creation for Video Games	5
ARTG 120	Game Design Experience	5
ARTG 131	3D Game Art Production	5
ARTG 132	3D Character Rigging and Animation for Video Games	5
ARTG 136	Digital Sculpting for Video Games	5
ARTG 137	Experimental Tabletop RPG Design	5
ARTG 140	Writing for Interactive Narrative	5
THEA 113	The History of Design for Theater	5
THEA 115A	Design Studio: Scenic Design	5
THEA 116A	History of Clothing and Costume	5
THEA 117	Design Studio: Costume	5
THEA 124	Movement for Performers	5
THEA 126	Acting Studio III	5
THEA 139	Random: With a Purpose	5
THEA 145R	From Hamlet to Hamilton: Performing Rhythm and Rhyme in the Twenty-first Century	5
THEA 151	Studies in Performance (Drama)	5
THEA 151A	Studies in Performance: African American Theater Arts Troupe	5
THEA 157	Playwriting	5

Social Interventions

Complete at least one course from the following list:

ARTG 138	Feminist Games	5
ARTG 139	Queer and Trans Art and Games	5
ARTG 142	Black Aesthetics: Interventions in Digital Media	5
THEA 100W	Black/African Diasporic World Theater	5
THEA 104	Multimedia Authoring	5
THEA 113	The History of Design for Theater	5
THEA 116A	History of Clothing and Costume	5
THEA 161M	Sexuality, Gender, Drama, and Performance	5
THEA 161P	Theater in the Chicano Power Movement	5
THEA 161Q	Queer Theatricks: Representations and Sensibilities	5
THEA 161R	Theatre of American Cultures: Fighting Oppression	5
THEA 164	Issues in Dance History and Theory	5
THEA 165	Dance Modernism	5
THEA 166	Ballet: A History	5

THEA 167	Africanist Aesthetics: Live Dialogues in the Americas and Africa	5
THEA 168	Disability and Performance	5

Performance/Portfolio/Exhibition

Complete at least one course from the following list:

ARTG 134	Spectacular Play: Performance, Ritual, and Making a Scene IRL	5
ARTG 143	Ecofutures	5
ARTG 170A	Game Design Studio I	5
ARTG 170B	Design Studio I: Individual Track	5
ARTG 171	Game Design Studio II	7
ARTG 172	Game Design Studio III	7
ARTG 180	Personal Narrative in Play	5
ARTG 181	Portfolio	5
THEA 139	Random: With a Purpose	5
THEA 151	Studies in Performance (Drama)	5
THEA 151A	Studies in Performance: African American Theater Arts Troupe	5
THEA 145R	From Hamlet to Hamilton: Performing Rhythm and Rhyme in the Twenty-first Century	5

ARTG 170A and ARTG 170B are equivalent courses; students cannot receive credit for both.

Disciplinary Communication and Senior Comprehensive Requirements

The course used to satisfy the Disciplinary Communication (DC) requirement may not also be used to satisfy a topic area above. The course used to satisfy the Performance/Portfolio/Exhibition topic area will also satisfy the senior comprehensive requirement.

Disciplinary Communication (DC) Requirement

Students satisfy the DC requirement by completing one additional course from the list below:

ARTG 170A	Game Design Studio I	5
ARTG 170B	Design Studio I: Individual Track	5
ARTG 180	Personal Narrative in Play	5
ARTG 181	Portfolio	5

ARTG 170A and ARTG 170B are equivalent courses; students cannot receive credit for both.

Senior Comprehensive Requirement

Students satisfy the senior comprehensive requirement by completing the Performance/Portfolio/Exhibition requirement above.

Upper-Division Electives

ART 101	Introduction to Computer Programming for the Arts	5
ART 104	Digital Video	5
ART 106A	2D Animation	5
ART 106E	3D Modeling and Animation	5
ART 106G	Immersive Nonfiction	5
ART 106O	2D Animation	5
ART 108	Art, Design, and Social Practice	5
ART 135	Digital Painting	5
CMPM 125	Game Technologies	5
CMPM 131	User Experience for Interactive Media	5
CMPM 146	Game AI	5
CMPM 147	Generative Design	5
CMPM 148	Interactive Storytelling	5
CMPM 150	Creating Digital Audio	5
CMPM 151	Algorithmic Music for Games	5
CMPM 152	Musical Data	5
CMPM 163	Game Graphics and Real-Time Rendering	5
CMPM 169	Creative Coding	5
CMPM 176	Game Systems	5
CMPM 177	Creative Strategies for Designing Interactive Media	5
CMPM 178	Human-Centered Design Research	5
CMPM 179	Game Design Practicum	5
CSE 118	Mobile Applications	5
CSE 183	Web Applications	5
DANM 140	Introduction to 3D Printing, Laser Cutting, and More	5
DANM 146	Game Design in Participatory Performance	5
DANM 148	Introduction to Game Prototyping	5
DANM 219	Introduction to Electronics for Artmaking	5
DANM 220	Introduction to Programming for the Arts	5
GAME 231	Game Technologies	5
GAME 280A	Games Proseminar	2
FILM 170A	Fundamentals of Digital Media Production	5
FILM 171D	Social Information Spaces	5
FILM 173	Narrative Digital Media Workshop	5
FILM 177	Digital Media Workshop: Computer as Medium	5
FILM 179A	Special Topics in Animation	5
FILM 179B	Documentary Animation Workshop	5
FILM 189	Advanced Topics in Digital and Electronic Media Studies	5
MUSC 123A	Electronic Music: Synthesis & Composition I	5
MUSC 123B	Electronic Music: Synthesis & Composition II	5
MUSC 123C	Electronic Music: Synthesis & Composition III	5

MUSC 167	Workshop in Electronic Music	2
THEA 100W	Black/African Diasporic World Theater	5
THEA 104	Multimedia Authoring	5
THEA 113	The History of Design for Theater	5
THEA 114	Sound Design and Engineering for the Theater	5
THEA 115A	Design Studio: Scenic Design	5
THEA 116A	History of Clothing and Costume	5
THEA 117	Design Studio: Costume	5
THEA 124	Movement for Performers	5
THEA 126	Acting Studio III	5
THEA 131B	Dance Studio II: Ballet	5
THEA 131C	Dance Studio II: Advanced Contemporary Forms and Practices	5
THEA 135	Choreography I	5
THEA 136	Choreography II	5
THEA 139	Random: With a Purpose	5
THEA 141	Play Direction Studio I	5
THEA 145R	From Hamlet to Hamilton: Performing Rhythm and Rhyme in the Twenty-first Century	5
THEA 151	Studies in Performance (Drama)	5
THEA 151A	Studies in Performance: African American Theater Arts Troupe	5
THEA 157	Playwriting	5
THEA 159	Advanced Playwriting	5
THEA 161M	Sexuality, Gender, Drama, and Performance	5
THEA 161P	Theater in the Chicano Power Movement	5
THEA 161Q	Queer Theatricks: Representations and Sensibilities	5
THEA 161R	Theatre of American Cultures: Fighting Oppression	5
THEA 164	Issues in Dance History and Theory	5
THEA 165	Dance Modernism	5
THEA 166	Ballet: A History	5
THEA 167	Africanist Aesthetics: Live Dialogues in the Americas and Africa	5
THEA 168	Disability and Performance	5

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Art and Design: Games and Playable Media B.A. Planner

	Fall	Winter	Spri ng	Sum mer
Ent erin g				Coll ege 1A Sum mer Edg e (opt iona l)
1st (fro sh)	ARTG 10	ARTG 20 or ARTG 25 or ARTG 30	AR TG 40 or AR TG 50	
	College 1	HAVC elective	Low er-divis ion arts elect ive**	
		WRIT 1/WRIT 1E (if needed)		
2nd (so ph)	ARTG 40 or ARTG 50 WRIT 2			
3rd (ju nio r)	Upper-div: Craft Refinement	Upper-div: Social Interventio ns	Upp er-div: elect ive 2	
	Upper-div: elective 1		Upp er-div: elect ive 3	

4th (senior)	Upper-div: DisciplinaryCommunication (DC/SC)	Upper-div: Performance,Portfolio and Exhibition	Upper-div: elective 4

** WRIT 2 should be taken in or before spring quarter of the second year.

In addition to the specific courses shown in the four-year planner, a student must complete courses satisfying the ER, MF, SI, SR, TA, PR and C (WRIT 2) general education requirements.

*Students must make sure they complete one course that satisfies the DC requirement and one course that satisfies their senior comprehensive requirement.

Transfer Students Planner

	Fall	Winter	Spring	Summer
Entering				KRSG 1T Summer Edge (optional)
1st (junior)	ARTG 10	ARTG 40 or ARTG 50	Upper-div: Craft Refinement	
	ARTG 20 or ARTG 25 or ARTG 30	Upper-div: elective 1	Upper-div: elective 2	
	ARTG 40 or ARTG 50		HAV C Elective	
2nd (senior)	Upper-div: DisciplinaryCommunication (DC/SC)	Upper-div: Performance,Portfolio and Exhibition	Upper-div: elective 4	
	Upper-div: elective 3	Upper-div: Social Interventions		

The two-year planner assumes that a student has completed all general education requirements before transferring to UC Santa Cruz.

*Students must make sure they complete one course that satisfies the DC requirement and one course that satisfies the senior comprehensive requirement.

THEATER ARTS B.A.

Information and Policies

Introduction

The Theater Arts B.A. combines drama, dance, critical studies, and theater design/technology to offer students an intensive program of theater as a unified field. The program stresses the interrelation of all disciplines as essential to the successful practice of the theater arts in the 21st century. Graduates of the University of California, Santa Cruz program typically pursue careers in professional theater and dance companies, in film and television, and in teaching at all levels—from university to high school to grade school. Many students go on to higher degrees at prestigious national programs. Others engage in careers in arts administration, dramatic writing, and related fields.

The lower-division curriculum requires a range of practical work in various areas and an interdisciplinary exposure to critical and historical studies. At the upper-division level, students are given the opportunity to focus on one or more areas of interest in limited-enrollment studios. At the same time, they are asked to expand their historical and theoretical perspectives through confrontation with performance theory and focused coursework in critical studies. The impact of

digital and new media on theater is also integrated into the curriculum.

In addition to classroom work, a wealth of hands-on production opportunities is available to students. This includes major productions directed by faculty or distinguished visiting artists each quarter, productions directed or choreographed by students, and faculty-directed workshops. The opportunity for undergraduate students to see their own writing, choreography, or developing concepts staged in department-sponsored productions is particularly valuable and unusual among university theater programs and is especially prominent in our department. Although majors are given preference in studio courses, most courses and productions welcome non-majors. Opportunities to study and perform non-Western as well as Euro-American traditions are also a significant part of the program.

The stage and studio spaces available to students in the department allow for a breadth of training and performance opportunities. The Theater Arts Center contains a 500-seat thrust stage; a 60' x 60' flexible black box theater; a 200-seat proscenium theater and a 48-seat studio theater dedicated to student productions; acting, directing, design and dance studios; costume, scene, and properties shops; a sound recording room; and a state-of-the-art computer lab. Located at the entrance of campus is our 150-seat Barn Theater which is currently closed, awaiting funding for a seismic retrofit.

Library holdings in theater literature and history are extensive, including journals in current theater, design/technology, and dance and a large image, audio, and video collection.

Program Learning Outcomes

Our program stresses dance, design, and drama as essential disciplines in the successful practice of theater arts in the contemporary world.

Graduates from the Theater Arts B.A. program should demonstrate the following:

1. Foundations of Performance. Students should be able to identify and apply basic theatrical techniques in dance, design, and drama.
2. Theatrical histories and theories. Students should be able to recognize and analyze performance works within the general culture and historical period that produced them.
3. Performance experience. Students should be able to translate theater arts concepts into performance, participating in any theatrical endeavor with the rigor, discipline, and imagination necessary to make a meaningful contribution.
4. Research proficiency. Students should be able to formulate personal research questions that expand their knowledge of theater arts, conducting independent research into the history and theory of at least one area of interest.
5. Creative practice. Students should be able to use theatrical practices and performance experiences to conceive, design, realize, and reflect on new performance projects.
6. Appreciation of diversity. Students should be able to recognize and appreciate a wide variety of approaches, cultures, and styles in both past and contemporary performance practice.
7. Communication and critical thinking. Students should be able to use critical vocabularies to communicate clearly about theater arts in written and oral forms.
8. Collaborative skills. Students should be able to work confidently and effectively in groups on a common project.

Academic Advising for the Program

General information about the theater arts major and minor and the dance minor is available on the Theater Arts program website. Students are strongly encouraged to consult early with the theater arts advisor to create an academic plan for the major or a minor far in advance of declaration, as early as the summer before beginning at the university. An academic plan is required as part of the declaration process. Please use Navigate Slug Success to make an advising appointment. You may also contact the theater arts academic advisor via email, theater-ugradadv@ucsc.edu (preferred), or by calling (831) 459-2974 during regular business hours.

Getting Started in the Major: Frosh

Students who start at UC Santa Cruz as frosh may begin taking courses toward the major in their first year, and are encouraged to do so, but it is not required. This major is not highly course intensive or highly sequential; however, students who enter as frosh should meet with the program's academic advisor as early as possible, by the beginning of their second year, to gain a clear understanding of the degree requirements, the non-standard enrollment procedures for certain required courses, and to create a customized academic plan that demonstrates a path to a timely graduation.

Students who start at UC Santa Cruz as frosh are encouraged to complete the three declaration qualification courses as early in their studies as possible so that they may declare the major no later than their sixth quarter, as required by the university. Because all of the steps to declare may require a significant amount of time to coordinate, students should start this process at the beginning of the quarter in which they plan to declare, or earlier. Review Major Qualification Requirements in the General Catalog.

Students who have taken college-level transferable classes that may apply to the requirements of this major should email unofficial transcripts as early as possible to theater-ugradadv@ucsc.edu, the program's academic advisor, for review.

Advising appointments are made through Navigate Slug Success once students are matriculated, or by email before that time.

Transfer Information and Policy

Transfer Admission Screening Policy

Students are not required to audition, submit a portfolio, or complete specific preparation courses to be considered for admission to UC Santa Cruz or to the theater or dance degree programs.

While not required for admission, it is highly recommended that transfer students complete as many general education requirements as possible before coming to UC Santa Cruz in order to ensure timely graduation. Students may also complete courses that are articulated specifically to UC Santa Cruz lower-division courses before coming to UCSC. Please consult with the theater arts academic advisor for more information.

Getting Started in the Major: Transfer Students

Transfer students are strongly advised to meet with the theater arts academic advisor prior to enrolling in classes their first quarter to create an academic plan and discuss course selection. Advising appointments may be made through Navigate Slug Success once students are matriculated, or by email (theater-ugradadv@ucsc.edu) before that time.

Transfer students may petition to have equivalent lower-division courses taken at other schools count toward lower-division major or minor requirements and should consult with the theater arts academic advisor about this possibility before enrolling in order to avoid repeating coursework unnecessarily.

As stated in the How to Declare a Major section below, transfer students may declare the major upon entering UC Santa Cruz and are encouraged to do so as soon as possible, even if they have not completed any theater arts courses prior to transferring to UC Santa Cruz. Transfer students entering as juniors must declare a major by the deadline in their second quarter, as required by the university.

Major Qualification Policy and Declaration Process

Major Qualification and Declaration

Students Admitted as Frosh/Four-Year Students

Students who begin UC Santa Cruz as frosh/four-year students must pass three classes as part of the declaration process (Transfer Students skip this section).

One course from:

THEA 61A	Ancient and Medieval Drama	5
THEA 61B	Drama from the Renaissance to the Modern Age	5
THEA 61C	The Birth of the Modern: Drama and Performance After the Renaissance	5

Plus two additional courses chosen from two of the following three categories:

Theater design and technology

THEA 10	Introduction to Theater Design and Technology	5

Acting

THEA 20	Introductory Studies in Acting	5
THEA 21	Acting Studio I: Psychological Realism	5

THEA 20 is a non-audition course designed for students with little or no experience in acting. THEA 21 is appropriate for students with some acting experience and is admission-by-audition (audition requirements are listed when classes are published in the Schedule of Classes). Please ask the theater arts advisor for more information.

Practice-based dance

THEA 30	Introduction to Dance Theory and Technique	5
THEA 31A	Dance Studio I: Asian or Asian Diasporic Practice	5
THEA 31B	Dance Studio I: Ballet	5
THEA 31C	Dance Studio I: Contemporary Dance Theory and Technique	5
THEA 31L	Dance Studio I: Introduction to Latin American Social Dances	5
THEA 31M	Introduction to Aikido	5
THEA 36	Introduction to Dance Making	5
THEA 37	African Dance	5
THEA 80Z	Indian Dance	5

Transfer Students

Transfer students are eligible to declare as early as their first quarter even if they have not completed any theater arts courses prior to transferring to UC Santa Cruz.

All Students

If non-course requirements remain incomplete by the campus deadline (in their sixth quarter for students admitted as frosh, and in their second quarter for transfer students), the student must be allowed to declare the major by the declaration deadline in their next academic term (excluding summer) without appeal.

How to Declare a Major

Transfer Students

Transfer students entering as juniors are required by the university to declare a major no later than the major declaration deadline in their second quarter on campus and are encouraged to do so as soon as possible. Transfer students entering as juniors may declare the theater arts major as early as their first quarter on campus, even if they have not completed any theater arts courses prior to transferring to UC Santa Cruz, by completing these steps:

1. Meet with the theater arts academic advisor to make an academic plan (advising appointments are scheduled through Navigate Slug Success).
2. Meet with a theater arts faculty mentor (assigned by the academic advisor during an advising meeting).
3. Submit a Petition for Major/Minor form by the deadline in your second quarter (or earlier if you have completed the above steps before your deadline quarter).

To access the declaration petition form, log into MyUCSC, go to your Student Homepage and select the Undergraduate Student eForms tile > Petition for Major/Minor. If using a mobile device, be sure to select Full Site Login when logging into MyUCSC.

Transfer students should also read the notes in the Transfer Information and Policy section.

Students Admitted as Frosh/Four-Year Students

Students who enter UC Santa Cruz as frosh are required by the university to declare the major no later than the major declaration deadline in their sixth term by completing these steps:

1. Meet with the theater arts academic advisor to make an academic plan (advising appointments are scheduled through Navigate Slug Success.
2. Meet with a theater arts faculty mentor (assigned by the academic advisor during an advising meeting).
3. Successfully complete three lower-division courses from the list specified above (students may begin taking these classes before completing steps 1 and 2 above).
4. Submit a Petition for Major/Minor form by the deadline in your sixth quarter (or earlier if you have completed the above steps before your deadline quarter).

To access the declaration petition form, log into MyUCSC, go to your Student Homepage and select the Undergraduate Student eForms tile > Petition for Major/Minor. If using a mobile device, be sure to select Full Site Login when logging into MyUCSC.

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the chair of the Department of Performance, Play Design within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal, the department will notify the student and college of the decision. Students should submit their appeal via email to theater-ugradadv@ucsc.edu.

Letter Grade Policy

This program does not have a letter grade policy aside from the university's Pass/No Pass limit and minimum grade requirement (more information is available on the university's Pass/No Pass web page).

[Optional Catchall]

Course Substitution Policy

Double Majors and Major/Minor Combinations Policy

Double counting upper-division courses between the theater arts major and another major or minor may be possible if the non-theater arts major/minor requires more than the minimum credits required by the university. It may be possible to double count the credits above the minimum with the permission of advisors in both programs.

Study Abroad

There are many opportunities for students to study abroad, potentially fulfilling major or minor requirements. Credits earned through study abroad programs or off-campus programs are considered on a case-by-case basis by the department faculty. Please consult with the theater arts academic advisor about this process.

It is important to learn about requirements and deadlines as early as possible from the Study Abroad/Global Learning office and then to carefully plan with major/minor and college advisors. Some required courses at UC Santa Cruz are only offered in certain quarters, for example; therefore, careful planning is essential.

Please read more about study abroad opportunities on the Global Learning website.

Honors

[Optional Catchall]

Requirements and Planners

Course Requirements

The theater arts major requires 41 lower-division credits comprised of eight courses, including six credits of course THEA 50. The major also requires 40 upper-division credits comprised of eight courses (inclusive of a senior seminar course, THEA 185). One course must be taken to fulfill the Production Requirement. Majors may organize their studies around areas of interest in accordance with the requirements outlined below.

Credits earned via the UC Education Abroad Program (EAP), or other off-campus programs are considered on a case-by-case basis by the department chair. Students should consult with their major/minor and college advisors as early as possible before planning studies outside of UC Santa Cruz. Please read more about study abroad opportunities on the Global Learning website.

Lower-Division Courses

One of the following courses:

THEA 20	Introductory Studies in Acting	5
THEA 21	Acting Studio I: Psychological Realism	5

Plus all of the following courses:

THEA 10	Introduction to Theater Design and Technology	5
THEA 61A	Ancient and Medieval Drama	5
THEA 61B	Drama from the Renaissance to the Modern Age	5
THEA 61C	The Birth of the Modern: Drama and Performance After the Renaissance	5

One of the following practice-based dance courses:

THEA 30	Introduction to Dance Theory and Technique	5
THEA 31A	Dance Studio I: Asian or Asian Diasporic Practice	5
THEA 31B	Dance Studio I: Ballet	5
THEA 31C	Dance Studio I: Contemporary Dance Theory and Technique	5
THEA 31L	Dance Studio I: Introduction to Latin American Social Dances	5
THEA 31M	Introduction to Aikido	5
THEA 37	African Dance	5
THEA 36	Introduction to Dance Making	5
THEA 80Z	Indian Dance	5

Plus the following production fundamentals course (three times):

THEA 50	Fundamentals of Theater Production	2

Note: This 2-credit course must be taken three times for a total of six credits. Students are highly encouraged to complete all six required credits of THEA 50 before their last two quarters, and to contact the theater arts advisor early to learn about the unique enrollment process for the class. This requirement is separate from the major's Production Requirement.

Plus one lower-division elective course

Students take one additional 5-credit THEA course numbered 1-99. One of the two lower-division production courses, THEA 55A or THEA 56R, may be used to satisfy both this requirement and the Production Requirement.

Upper-Division Courses

Eight upper-division courses must be taken as part of the major, as specified here:

The following course:

THEA 160	Dramatic Theories	5

Plus two studio courses chosen from:

THEA 103	Design Concept Development	5
THEA 106	Digital Illustration	5
THEA 114	Sound Design and Engineering for the Theater	5
THEA 115A	Design Studio: Scenic Design	5
THEA 115B	Design Studio: Scenic Design B	5
THEA 117	Design Studio: Costume	5
THEA 117A	Advanced Costume Construction	5
THEA 118	Design Studio: Scene Painting	5
THEA 119	Design Studio: Lighting Studio B	5
THEA 120	Voice and Movement for Performers	5
THEA 121	Acting Studio II: Shakespeare	5
THEA 123	Acting and Shakespeare	5
THEA 124	Movement for Performers	5
THEA 126	Acting Studio III	5
THEA 126M	The Meisner Technique: A Practical Exploration	5
THEA 131A	Dance Studio II: Asian or Asian Diasporic Practice	5
THEA 131B	Dance Studio II: Ballet	5
THEA 131C	Dance Studio II: Advanced Contemporary Forms and Practices	5
THEA 131L	Advanced Latin American Social Dances	5
THEA 135	Choreography I	5
THEA 136	Choreography II	5
THEA 141	Play Direction Studio I	5
THEA 142	Play Direction Studio II	5
THEA 145R	From Hamlet to Hamilton: Performing Rhythm and Rhyme in the Twenty-first Century	5
THEA 152	Advanced Stagecraft	5
THEA 157	Playwriting	5
THEA 158	New Play Festival	5
THEA 159	Advanced Playwriting	5
ARTG 118	Character Creation for Video Games	5
ARTG 134	Spectacular Play: Performance, Ritual, and Making a Scene IRL	5
ARTG 137	Experimental Tabletop RPG Design	5
ARTG 140	Writing for Interactive Narrative	5
ARTG 180	Personal Narrative in Play	5

Plus two history/theory/critical studies courses, chosen from:

THEA 100A	Asian Theater/Dance and Global Impacts	5
THEA 100B	Black Theater USA	5
THEA 100C	Courts, Courtesans, Shamans, and Clowns: Asian Drama	5

THEA 100W	Black/African Diasporic World Theater	5
THEA 104	Multimedia Authoring	5
THEA 108	Theater and Interaction Design	5
THEA 113	The History of Design for Theater	5
THEA 116A	History of Clothing and Costume	5
THEA 122	Indian Performance: Rama, Siva, Krishna	5
THEA 161	Advanced Dramaturgy	5
THEA 161B	Black Women and Diasporic Theatrical Expression	5
THEA 161C	Theater and Drama of the Renaissance	5
THEA 161D	Asian Theater: An Anthropological Approach	5
THEA 161H	Shakespeare In Asia	5
THEA 161M	Sexuality, Gender, Drama, and Performance	5
THEA 161P	Theater in the Chicano Power Movement	5
THEA 161Q	Queer Theatricks: Representations and Sensibilities	5
THEA 161R	Theatre of American Cultures: Fighting Oppression	5
THEA 161S	American Drama: Politics and Theater	5
THEA 161T	Women in Theater	5
THEA 161U	Performance of Story in Theater and Film	5
THEA 161Y	Modern Ancient Drama	5
THEA 163A	Shakespeare	5
THEA 163E	Chekhov and His Impact	5
THEA 163G	Special Studies in Playwrights: Artaud	5
THEA 163H	Henrik Ibsen and His Impact: Ghosts of the Future	5
THEA 163K	Special Studies in Playwrights: Euripides	5
THEA 164	Issues in Dance History and Theory	5
THEA 165	Dance Modernism	5
THEA 166	Ballet: A History	5
THEA 167	Africanist Aesthetics: Live Dialogues in the Americas and Africa	5
THEA 168	Disability and Performance	5
ARTG 138	Feminist Games	5
ARTG 139	Queer and Trans Art and Games	5
ARTG 142	Black Aesthetics: Interventions in Digital Media	5

Plus two upper-division elective courses:

One or both classes used to fulfill the upper-division elective requirements may be chosen from any of the courses listed in the upper-division studio section, the upper-division history/theory/critical studies section, or the Production Requirement section (excluding the lower-division THEA 55A and THEA 56R) as long as they are not being used to fulfill another requirement (unless they are repeatable for credit, in which case they may be used more than once).

Production Requirement

Theater arts majors must take one of the following classes to fulfill the major's Production Requirement. The two lower-division production courses, THEA 55A or THEA 56R, may fulfill both both production requirement and the lower-division elective requirement. The upper-division production courses listed (numbered 100 and above) may fulfill the production requirement and one of the two upper-division electives.

THEA 55A	Workshop in Performance: Barnstorm	5
THEA 56R	Rainbow Theater: An Introduction to Multicultural Theater	5
THEA 137	Studies in Performance (Dance)	5
THEA 137A	Studies in Performance (Dance): Asian	5
THEA 139	Random: With a Purpose	5
THEA 151	Studies in Performance (Drama)	5
THEA 151A	Studies in Performance: African American Theater Arts Troupe	5
THEA 151I	Studies in Performance: Indonesian Dance and Drama	5
THEA 155	Shakespeare to Go	5

The Production Requirement is separate from the three required enrollments in the 2-credit class THEA 50, Fundamentals of Theater Production. Enrollment in production classes is by audition or interview process; therefore, it is important that students begin trying to fulfill the requirement as early as possible as it cannot be predicted when they will be cast or chosen to participate. Contact the theater arts advisor for information. Details can also be found in the Theater Arts Undergraduate Handbook.

Plus this comprehensive requirement course:

THEA 185	Senior Seminar	5

The following courses DO NOT satisfy theater arts major requirements:

THEA 55B	Workshop in Performance: Barnstorm Lab	2
THEA 190	Group Projects	5
THEA 198	Independent Field Study	5
THEA 199	Tutorial	5

Electives

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major’s upper-division Disciplinary Communication (DC) Requirement. The

DC Requirement in Theater Arts B.A. is met by completion of the required courses:

THEA 160	Dramatic Theories	5
THEA 185	Senior Seminar	5

Comprehensive Requirement

THEA 185	Senior Seminar	5

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements (p. 1438) for more information.

Below are planners for frosh and junior transfer students.

Please note that **LD = lower division** (courses numbered 1–99), and **UD = upper division** (courses numbered 100–199).

Current course offerings can be found on the Theater Arts website.

Four-Year Frosh Planner

	Fall	Winter	Spring	Summer
Entering				College 1A Summer Edge (optional)
Year 1 (Frosh)	THEA 20 or THEA 21	THEA 61B (offered winter quarter only)	THEA 61C (offered spring quarter only)	
	College 1	WRIT 1/WRIT 1E (if needed)	THEA 10	
Year 2 (Soph)	THEA 61A (offered fall quarter only)	THEA lower-division elective [could be used to fulfill the Production Requirement – see info. below]	THEA upper-division studio	
	Lower-division practice-based THEA dance class (one of the following: THEA 30, THEA 31A, THEA 31B, THEA 31C, THEA 31L, THEA 31M, THEA 36, THEA 37, THEA 80Z)			
	*WRIT 2	THEA upper-division elective 1 [could be used to fulfill the Production Requirement – see info. below]		
	THEA 50 (2-credit)	THEA 50 (2-credit)	THEA 50 (2-credit)	
Year 3 (Jr)	THEA upper-division studio	THEA upper-division History/Theory/Critical Studies	THEA 160 (offered spring quarter only)	
	THEA UD History/Theory/Critical	THEA upper-division		

	Studies	elective 2 [could be used to fulfill the Production Requirement – see info. below]		
Year 4 (Sr)	THEA 185 (offered fall quarter only)			

*WRIT 2 should be taken in or before spring quarter of the second year.

The specific courses shown in this four-year planner satisfy the IM and TA general education (GE) requirements (p. 1441). Other courses taken to fulfill major requirements may fulfill additional GE requirements. Students must satisfy all university requirements, including GE requirements. Students should consult their college advising office with any questions about GEs or other university requirements.

Theater Arts majors must take one class to fulfill the Production Requirement. Classes which may be used to fulfill the Production Requirement are the lower-division production classes THEA 55A or THEA 56R (either of these could also be used to fulfill the major's lower-division elective requirement); or one of the upper-division production classes THEA 151, THEA 151A, THEA 151I, THEA 155, THEA 137, THEA 137A, THEA 139 (these upper-division production classes may also be used to fulfill one or both of the the major's two upper-division elective requirements). The Production Requirement is separate from the three required enrollments in the 2-credit class THEA 50, Fundamentals of Theater Production. Enrollment in production classes is by audition or interview process; therefore, it is important that students begin trying to fulfill the requirement as early as possible as it cannot be predicted when they will be cast or chosen to participate. Contact the theater arts advisor for information. Details can also be found in the Theater Arts Undergraduate Handbook.

Two-Year Transfer Planner

	Fall	Winter	Spring	
Entering				KRSG 1T Summer Edge (optional)
Year 1 (Jr)	THEA 61A (offered fall quarter only)	THEA 61B (offered winter quarter only)	THEA 61C (offered spring quarter only)	
	THEA 20 or THEA 21	Lower-division practice-based THEA dance class (one of the following: THEA 30, THEA 31A, THEA 31B, THEA 31C, THEA 31L, THEA 31M, THEA 36, THEA 37, THEA 80Z)	THEA 160 (offered spring quarter only)	
	THEA 10	THEA lower-division elective [could be used to fulfill the Production Requirement – see info. below]	THEA upper-division elective 1 [could be used to fulfill the Production Requirement – see info. below]	
		THEA 50 (2-credit)	THEA 50 (2-credit)	
Year 2 (Sr)	THEA 185 (offered fall	THEA upper-division History/Theory/Critical Studies	THEA upper-division History/Theory/Critical Studies	

quarter only)		
THEA upper-division studio	THEA upper-division studio	THEA upper-division elective 2 [could be used to fulfill the Production Requirement – see info. below]
THEA 50 (2-credit)		

The specific courses shown in this four-year planner satisfy the IM and TA general education (GE) requirements (p. 1441). Other courses taken to fulfill major requirements may fulfill additional GE requirements. Students must satisfy all university requirements, including GE requirements. Students should consult their college advising office with any questions about GEs or other university requirements.

Theater arts majors must take one class to fulfill the Production Requirement. Classes which may be used to fulfill the Production Requirement are the lower-division production class THEA 55A and THEA 56R (either of these could also be used to fulfill the major's lower-division elective requirement), or one of the upper-division production classes THEA 151, THEA 151A, THEA 151I, THEA 155, THEA 137, THEA 137A, THEA 139 (these upper-division production classes may also be used to fulfill one or both of the the major's two upper-division elective requirements). The Production Requirement is separate from the three required enrollments in the 2-credit class THEA 50, Fundamentals of Theater Production. Enrollment in production classes is by audition or interview process; therefore, it is important that students begin trying to fulfill the requirement as early as possible as it cannot be predicted when they will be cast or chosen to participate. Contact the Theater arts advisor for information. Details can also be found in the Theater Arts Undergraduate Handbook.

THEATER ARTS MINOR

Students earn a minor in theater arts by completing eight courses (seven 5-credit courses and one 2-credit course) comprising a background in the theory and practice of the theater arts as well as a focus on drama, theater design/technology, or dance. The course requirements are listed below. There is no comprehensive requirement for the minor.

Declaration of the minor

There are no course requirements for declaring the minor, though individual courses may have enrollment prerequisites, and a major must be officially declared before a minor may be declared.

To declare the minor:

1. Inform your major advising office that you wish to declare a minor and request that they update, sign and date your major academic planning form (or create one if one does not yet exist).
2. While that plan is current, schedule an appointment with the Theater Arts advisor to add a plan for and declare the minor (Theater Arts advising appointments are scheduled through Navigate Slug Success).
3. Submit a Petition for Major/Minor form in MyUCSC: go to your Student Homepage and select the Undergraduate Student eForms tile > Petition for Major/Minor. If using a mobile device, be sure to select Full Site Login when logging into MyUCSC.

Students are strongly encouraged to consult early with the department advisor to create an academic plan for a minor in theater arts. This may be done prior to declaration.

Transfer students may petition to have equivalent lower-division courses taken at other schools count toward lower-division minor requirements and should consult with the Theater Arts Department academic advisor as early as possible regarding this possibility.

Course Requirements

Complete the following requirements. This program does not have a letter grade policy aside from the university's Pass/No Pass limit and minimum grade requirement (more information is available on the university's Pass/No Pass web page)

Lower-Division Courses

Choose one from the following series:

THEA 61A	Ancient and Medieval Drama	5
THEA 61B	Drama from the Renaissance to the Modern Age	5
THEA 61C	The Birth of the Modern: Drama and Performance After the Renaissance	5

Plus one course in the student's area of focus chosen from:

THEA 10	Introduction to Theater Design and Technology	5
THEA 20	Introductory Studies in Acting	5
THEA 21	Acting Studio I: Psychological Realism	5
THEA 30	Introduction to Dance Theory and Technique	5
THEA 31A	Dance Studio I: Asian or Asian Diasporic Practice	5

THEA 31B	Dance Studio I: Ballet	5
THEA 31C	Dance Studio I: Contemporary Dance Theory and Technique	5
THEA 31L	Dance Studio I: Introduction to Latin American Social Dances	5
THEA 31M	Introduction to Aikido	5
THEA 33C	Dance Studio I	5
THEA 36	Introduction to Dance Making	5
THEA 37	African Dance	5
THEA 40	Introduction to Directing	5
THEA 80Z	Indian Dance	5

Plus the following production fundamentals course:

Students are highly encouraged to contact the department advisor early to learn about the unique enrollment process for THEA 50, as well as to complete this course as early as possible, before their last year on campus.

THEA 50	Fundamentals of Theater Production	2

Upper-Division Courses

Three history/theory/critical studies courses chosen from the following:

THEA 100A	Asian Theater/Dance and Global Impacts	5
THEA 100B	Black Theater USA	5
THEA 100C	Courts, Courtesans, Shamans, and Clowns: Asian Drama	5
THEA 100W	Black/African Diasporic World Theater	5
THEA 104	Multimedia Authoring	5
THEA 108	Theater and Interaction Design	5
THEA 113	The History of Design for Theater	5
THEA 116A	History of Clothing and Costume	5
THEA 122	Indian Performance: Rama, Siva, Krishna	5
THEA 160	Dramatic Theories	5
THEA 161	Advanced Dramaturgy	5
THEA 161B	Black Women and Diasporic Theatrical Expression	5
THEA 161C	Theater and Drama of the Renaissance	5
THEA 161D	Asian Theater: An Anthropological Approach	5
THEA 161H	Shakespeare In Asia	5
THEA 161M	Sexuality, Gender, Drama, and Performance	5
THEA 161P	Theater in the Chicano Power Movement	5
THEA 161Q	Queer Theatricks: Representations and Sensibilities	5
THEA 161R	Theatre of American Cultures: Fighting Oppression	5
THEA 161S	American Drama: Politics and Theater	5
THEA 161T	Women in Theater	5
THEA 161U	Performance of Story in Theater and Film	5
THEA 161Y	Modern Ancient Drama	5
THEA 163A	Shakespeare	5
THEA 163E	Chekhov and His Impact	5
THEA 163G	Special Studies in Playwrights: Artaud	5
THEA 163H	Henrik Ibsen and His Impact: Ghosts of the Future	5
THEA 163K	Special Studies in Playwrights: Euripides	5
THEA 164	Issues in Dance History and Theory	5
THEA 165	Dance Modernism	5
THEA 166	Ballet: A History	5
THEA 167	Africanist Aesthetics: Live Dialogues in the Americas and Africa	5
THEA 168	Disability and Performance	5

Plus two studio courses (one of which may be a 5-credit upper-division theater arts production; see separate section below):

THEA 103	Design Concept Development	5
THEA 106	Digital Illustration	5
THEA 114	Sound Design and Engineering for the Theater	5
THEA 115A	Design Studio: Scenic Design	5
THEA 115B	Design Studio: Scenic Design B	5
THEA 117	Design Studio: Costume	5
THEA 117A	Advanced Costume Construction	5
THEA 118	Design Studio: Scene Painting	5
THEA 119	Design Studio: Lighting Studio B	5
THEA 120	Voice and Movement for Performers	5
THEA 121	Acting Studio II: Shakespeare	5
THEA 123	Acting and Shakespeare	5
THEA 124	Movement for Performers	5
THEA 126	Acting Studio III	5
THEA 126M	The Meisner Technique: A Practical Exploration	5
THEA 131A	Dance Studio II: Asian or Asian Diasporic Practice	5
THEA 131B	Dance Studio II: Ballet	5
THEA 131C	Dance Studio II: Advanced Contemporary Forms and Practices	5
THEA 131L	Advanced Latin American Social Dances	5
THEA 135	Choreography I	5
THEA 136	Choreography II	5
THEA 141	Play Direction Studio I	5
THEA 142	Play Direction Studio II	5

THEA 145R	From Hamlet to Hamilton: Performing Rhythm and Rhyme in the Twenty-first Century	5
THEA 152	Advanced Stagecraft	5
THEA 155	Shakespeare to Go	5
THEA 157	Playwriting	5
THEA 159	Advanced Playwriting	5

Optional: one 5-credit upper-division theater arts production course, which may be used toward an upper-division studio requirement:

THEA 137	Studies in Performance (Dance)	5
THEA 137A	Studies in Performance (Dance): Asian	5
THEA 139	Random: With a Purpose	5
THEA 151	Studies in Performance (Drama)	5
THEA 151A	Studies in Performance: African American Theater Arts Troupe	5
THEA 151I	Studies in Performance: Indonesian Dance and Drama	5
THEA 155	Shakespeare to Go	5

The following DO NOT satisfy theater arts minor requirements:

THEA 55A	Workshop in Performance: Barnstorm	5
THEA 55B	Workshop in Performance: Barnstorm Lab	2
THEA 190	Group Projects	5
THEA 198	Independent Field Study	5
THEA 199	Tutorial	5

DANCE MINOR

Students earn a minor in dance by completing eight courses (seven 5-credit courses and one 2-credit course) comprising a background in the theory and practice of dance. The course requirements are listed below. There is no comprehensive requirement for the minor.

Declaration of the minor

There are no course requirements for declaring the minor, though individual courses may have enrollment prerequisites, and a major must be officially declared before a minor may be declared.

To declare the minor:

1. Inform your major advising office that you wish to declare a minor and request that they update, sign and date your major academic planning form (or create one if one does not yet exist).
2. While that plan is current, schedule an appointment with the Theater Arts advisor to add a plan for and declare the minor (Theater Arts advising appointments are scheduled through Navigate Slug Success).
3. Submit a Petition for Major/Minor form in MyUCSC: go to your Student Homepage and select the Undergraduate Student eForms tile > Petition for Major/Minor. If using a mobile device, be sure to select Full Site Login when logging into MyUCSC.

Students are strongly encouraged to consult early with the Theater Arts advisor to create an academic plan for the minor. This may be done prior to declaration. Advising appointments are scheduled through Navigate Slug Success, or questions may be addressed to the Theater Arts advisor by emailing theater-ugradadv@ucsc.edu.

Transfer students may petition to have equivalent lower-division courses taken at other schools count toward lower-division minor requirements and should consult with the Theater Arts academic advisor as early as possible regarding this possibility.

Course Requirements

Complete the following requirements. This program does not have a letter grade policy aside from the university's Pass/No Pass limit and minimum grade requirement (more information is available on the university's Pass/No Pass web page)

Lower-Division Courses

Lower-division courses may be used to fulfill requirements in both the theater arts major and dance minor, but separate upper-division courses must be taken to satisfy major and minor requirements for these degrees. Consult with the Theater Arts advisor if planning to pursue both the theater arts major and dance minor.

One course in creative practice, chosen from:

THEA 30	Introduction to Dance Theory and Technique	5
THEA 36	Introduction to Dance Making	5

Plus one course in cross-cultural techniques, chosen from:

THEA 31A	Dance Studio I: Asian or Asian Diasporic Practice	5
THEA 31B	Dance Studio I: Ballet	5
THEA 31C	Dance Studio I: Contemporary Dance Theory and Technique	5
THEA 31L	Dance Studio I: Introduction to Latin American Social Dances	5
THEA 31M	Introduction to Aikido	5
THEA 37	African Dance	5
THEA 80R	Bollywood Dance and Culture in India and Indian Diaspora	5
THEA 80U	Everybody Dance Now!	5
THEA 80Z	Indian Dance	5

The following production fundamentals course:

Students are highly encouraged to contact the Theater Arts advisor early to learn about the unique enrollment process for THEA 50, as well as to complete this course as early as possible, before their last year on campus.

THEA 50	Fundamentals of Theater Production	2

Upper-Division Courses

One course in creative practice or cross-cultural techniques, chosen from:

THEA 131A	Dance Studio II: Asian or Asian Diasporic Practice	5
THEA 131B	Dance Studio II: Ballet	5
THEA 131C	Dance Studio II: Advanced Contemporary Forms and Practices	5
THEA 131L	Advanced Latin American Social Dances	5
THEA 135	Choreography I	5
THEA 136	Choreography II	5

Plus one course in critical studies, chosen from:

ARTG 143	Ecofutures	5
THEA 161R	Theatre of American Cultures: Fighting Oppression	5
THEA 164	Issues in Dance History and Theory	5
THEA 165	Dance Modernism	5
THEA 166	Ballet: A History	5
THEA 167	Africanist Aesthetics: Live Dialogues in the Americas and Africa	5
THEA 168	Disability and Performance	5

Plus three upper-division elective courses, which may be chosen from the following:

THEA 100A	Asian Theater/Dance and Global Impacts	5
THEA 124	Movement for Performers	5
THEA 137	Studies in Performance (Dance)	5
THEA 137A	Studies in Performance (Dance): Asian	5
THEA 139	Random: With a Purpose	5
THEA 151I	Studies in Performance: Indonesian Dance and Drama	5
THEA 161D	Asian Theater: An Anthropological Approach	5

Any upper-division course listed in the Creative Practice/Cross-Cultural Techniques or Critical Studies sections may be used as an elective (but not double counted).

A select number of other courses may be used if approved by the department in advance (consult with the Theater Arts advisor).

Courses that list “Repeatable For Credit: Yes” in the General Catalog may be taken more than once.

THEA 139, Random With A Purpose, is repeatable for credit and may be used to fulfill up to two upper-division elective requirements for the dance minor.

The following DO NOT satisfy the dance minor requirements:

THEA 55A	Workshop in Performance: Barnstorm	5
THEA 55B	Workshop in Performance: Barnstorm Lab	2
THEA 158	New Play Festival	5
THEA 190	Group Projects	5
THEA 198	Independent Field Study	5
THEA 199	Tutorial	5

THEATER ARTS M.A.

Introduction

The Theater Arts M.A. program has been discontinued as of June 30, 2026. Applications will no longer be accepted effective July 1, 2025.

The Department of Performance, Play Design offers a 12-month Master of Arts (M.A.) in Theater Arts degree, which serves as a bridge from undergraduate work to professional work in a range of performance-related fields. It can also place students in an excellent position to pursue further graduate academic work, such as an M.F.A. or Ph.D. The Master of Arts degree combines intellectually rigorous coursework with challenging artistic practice. Like our undergraduate curriculum, our graduate program integrates the study of ancient and modern theater texts and practices, and it examines diverse approaches to performance. It encourages collaboration, initiative, and cross-disciplinary thinking.

Requirements

Course Requirements

Students are required to complete 40 credits for the M.A. in Theater Arts.

This includes three graduate seminars for a total of 15 credits:

THEA 290A	Research Methods for Performance and Practice	5
THEA 290B	Practice of Theory	5
THEA 290C	Performance Analysis	5

Students must also complete a 10-credit performance research project that includes a professional internship project:

THEA 293	Performance Research Project	10

Students must also complete the following three 5-credit courses:

THEA 294	Future Stages	5

THEA 295	Group Critique	5
THEA 299	Capstone Thesis	5

Other Requirements

[Optional Catchall]

Applying for Graduation

HUMANITIES DIVISION

500 Humanities 1 Building
https://humanities.ucsc.edu/

ENGAGED WITH THE WORLD

In the Humanities Division, we explore the entire human experience. We're driven to understand how humans seek meaning, forge identities and cultures, and strive to make their voices heard. But we're also the humanities at UC Santa Cruz, and that means we're thinkers and doers, fully engaged in the world and the biggest social justice challenges around us. The wealth of experiences you can have with us, in the classroom and beyond it, will help you become the kind of creative problem-solver and communicator that every profession—and the world itself—needs more than ever.

The questions and ideas we explore resist tidy boxes and conventional answers. There's never been one way to do the humanities at UC Santa Cruz—in fact, we're famous for inventing new ways of understanding and engaging with the world. We know that different fields of study offer you different lenses for looking at ideas and problems, so we won't lock you into a narrow set of classes or class materials. The possibilities for expressing what you've learned are equally broad: our students present their ideas in archival and data-driven research and in creative writing; they create exhibits, archives, podcasts, oral histories, and digital experiences.

Become a community co-creator, collaborator, and advocate. We're a trusted partner with grassroots organizations and communities striving for justice and equity—throughout the Bay Area, and in global settings from Okinawa to Oaxaca. Our innovative public humanities projects collaborate with people to share their histories, celebrate their resilience, and connect their cultures to new audiences. We welcome your talents on these projects: The people you'll meet will change your life, and you'll gain real-world professional experience.

AN ENVIRONMENT OF INNOVATION, DIVERSITY, AND INCLUSION

Our professors are doing ground-breaking work questioning conventional, canonical wisdom and exploring multiple cultures, histories, and languages of places, including East Asia, the Americas, North Africa, and South Asia. Delve into your own cultural legacy and open yourself up to new cultural traditions and values. Discover how humanity's capacity to imagine what's possible and impossible changes across time and space.

Connections—between ideas and people—are easy to make in the Humanities Division. You'll find people are eager to invest in your ideas and help you cross disciplinary boundaries. Your professors are dedicated to offering you opportunities that stretch your intellect and talents and encourage you to grow professionally.

We'll equip you with the tools for career success—and a meaningful life. The observational and analytical skills you learn in the humanities will help you see through biased and binary thinking, and confidently engage with complexity. You'll learn how to create opportunities to democratize knowledge. You'll listen empathically, connect ideas and collaborate across lines of difference, and communicate persuasively on any platform.

Find your people here. We're a diverse community of faculty and students at UC Santa Cruz. It's exciting to learn alongside people who bring so many different lived experiences to the table, who have such wide-ranging curiosity, and who believe that sharing ideas is fundamental to human-centered change.

UNDERGRADUATE STUDY

Undergraduate Majors

- Applied Linguistics and Multilingualism B.A.
- Classical Studies B.A.
- Critical Race and Ethnic Studies B.A.
- Feminist Studies B.A.
- History B.A.
- Jewish Studies B.A.
- Language Studies B.A.
- Linguistics B.A.
- Literature B.A.
  Creative Writing Concentration
- Philosophy B.A.
- Spanish Studies B.A.

Undergraduate Minors and Certificates

- Black Studies Minor
- Classical Studies Minor
- East Asian Studies Minor
- History Minor
- History of Consciousness Minor
- Italian Studies Minor
- Jewish Studies Minor
- Language Studies Minor
- Linguistics Minor
- Literature Minor
- Middle Eastern and North African Studies Minor
- Philosophy Minor
- Spanish Studies Minor
- Humanizing Technology Certificate Program
- Visualizing Abolition Studies Certificate Program

GRADUATE STUDY

- Critical Race and Ethnic Studies, Designated Emphasis for Ph.D. students
- Feminist Studies, Ph.D., Designated Emphasis for Ph.D. students
  Feminist Studies graduate programs are not accepting applications during the 2025-26 academic year.
- History, Ph.D.
- History of Consciousness, Ph.D., Designated Emphasis for Ph.D. students
- Linguistics, M.A., Ph.D.
- Literature, M.A., Ph.D., Designated Emphasis for Ph.D. students
- Philosophy, M.A., Ph.D., Designated Emphasis for Ph.D. students

EMPLOYING HUMANITIES

The Humanities Division is excited to introduce Employing Humanities, a new career readiness initiative designed to help students connect the skills and knowledge they gain in their classes to the career opportunities waiting for them after graduation. The study of humanities nurtures foundational skills that employers across industries value, such as critical thinking and problem-solving, communication, collaboration, and ethical judgment and decision-making. Honing these skills with practical, hands-on training helps students articulate their abilities and prepares them to succeed as socially-just leaders.

The Humanities Division has designated eight career-readiness competencies that we aim to develop in our students through experiential learning opportunities: ethical leadership, equity and inclusion, critical thinking, teamwork, communication, career and self development, professionalism and work ethic, and digital technology.

The Mellon Foundation saw the potential of Employing Humanities and provided $1 million to support humanities' undergraduate majors and minors with paid experiential learning opportunities that connect their classroom curriculum with hands-on training, including internships and undergraduate research.

Humanities majors and minors are eligible for two experiential learning programs—the Humanities EXCEL Internship program and the Humanities EXPLORE Undergraduate Research Program. These programs foster student achievement, increase career-mindedness and academic engagement, and build a sense of belonging for undergraduate majors and minors in the Humanities Division.

Humanities EXCEL

Internship Program: Experiential Career Exploration and Learning

Students in this cohort program hold paid positions with off-campus community partner organizations. They earn $20/hour and work 10-20 hours/week. This program aims to increase career-mindedness and support EXCEL Fellows in nurturing transferable skills that prepare them for professional and community-engaged settings. EXCEL Fellows gain practical experience while learning about industries and positions that build on their studies in the humanities.

Humanities EXPLORE

Undergraduate Research Program: Experiential Learning Opportunities in Research

Faculty in the Humanities Division apply to the EXPLORE program and mentor undergraduate researchers who work on their faculty-led projects. Researchers are selected for projects that align with their skills and academic expertise. Researchers are hired, earn $18-$20/hour, and contribute at least 100 hours per quarter to the project. EXPLORE Fellows are invited to attend quarterly workshops on professional development for researchers and build support networks with faculty mentors, staff, and peers.

THE HUMANITIES INSTITUTE

The Humanities Institute (THI) is a hub for the kind of innovative work in the humanities for which UC Santa Cruz is world-famous. THI promotes **Research Excellence** through Centers, Projects, and Clusters that address important issues and foster cross-disciplinary collaboration in emerging fields; we fund fellowships that provide faculty and students with time and resources critical to their groundbreaking research. THI supports **Student Success** through a pioneering public fellows program that gives humanities students hands-on training and professional development that prepares them for meaningful careers. We address social inequalities by offering additional resources to students from groups traditionally underrepresented in higher education. THI's Public Programs continue our long commitment to public scholarship through humanities projects that promote vibrant intellectual exchange beyond the university and through community-engaged work that helps build a more just and equitable society.

Excellence in the humanities cultivates critical thinking, equips us to grapple with an ever-more complex world, and helps prepare a new generation of leaders. From fellows archiving historical documents to collaborations with partners on campus and in the community, our work brings insight through both big ideas and subtle distinctions. We see the forest ***and*** the trees. To learn more, see our Annual Impact Reports, our Student Success Impact Reports, and our Research, Funding, and Fellows pages.

Critical Race and Ethnic Studies

PROGRAMS OFFERED

Critical Race and Ethnic Studies B.A. (p. 149)

Black Studies Minor (p. 156)

Critical Race and Ethnic Studies Designated Emphasis (p. 158)

OTHER PROGRAMS OF INTEREST

Critical Race and Ethnic Studies / Education MA/C Contiguous Bachelor's/Master's Pathway (p. 723)

UNDERGRADUATE PROGRAM

Launched in 2014-15, the Critical Race and Ethnic Studies (CRES) curriculum is structured so that undergraduate students may pursue organized study leading toward a bachelor of arts degree. CRES majors develop a deep understanding of how race and other modalities of power have structured human life and have informed the imagination of social transformation and justice in the past and the present. CRES accordingly offers a study of the dynamic power relations resulting from the cultural and institutional productions of the idea of "race" on a local, national, and global scale. Here, "race" is understood as a major ideological framework through which both practices of power and domination and struggles for liberation and self-determination have been articulated and enacted throughout modern history and in the contemporary moment. The study of race, as such, is a rigorous project, one which yields critical insights into the social, political, cultural, and economic processes that have defined and shaped the modern era—colonialism and slavery, conquest and displacement, genocide and warfare, migration and creolization, criminalization, imprisonment and disenfranchisement, globalization, and post-9/11 security state policies such as racial profiling. These phenomena orient our attention to particular academic fields with which CRES is necessarily in dialogue. These fields include postcolonial studies, settler colonial studies, human rights studies, indigenous studies, migration, diaspora and border studies, queer studies, legal studies, environmental studies, and science studies. CRES engages with queer and feminist critique, decolonial thought, and labor analysis in challenging asymmetrical and exploitative power relations, not only illuminating how race, racism, and racialization are socially reproduced in societies structures in dominance, but also, fostering emergent and contestatory forms of knowledge and praxis. A commitment to structural transformation is grounded in intersectional approaches to difference (race, class, gender, sexuality, and caste) defines the work we do.

Faculty from across the UC Santa Cruz campus have contributed significantly to conversations in critical race and ethnic studies for decades, with nationally renowned faculty in anthropology, community studies, feminist studies, film and digital media, history, history of art and visual culture, history of consciousness, Latin American and Latino studies, literature, music, performance, play, and design, politics, psychology, social documentation, sociology, and the sciences. In addition to courses specifically offered under the subject of CRES, many courses engaging critical race and ethnic studies are sponsored by these departments across campus.

BLACK STUDIES MINOR

Launched fall 2020, the Black studies minor offers students grounding in the intellectual histories, political movements, cultural expressions, and critical theories of the Black diaspora, all while engaging a range of methodologies from across disciplines. Attention to the significance of social justice is a hallmark of the minor. Supported by faculty expertise in Africa, the Caribbean, the Americas, Europe, and the Pacific, students can explore the globally multi-sited nature of Black freedom struggles, both past and present, and examine blackness through a comparative lens.

CRES AND EDUCATION MA/C CONTIGUOUS BACHELOR'S/MASTER'S PATHWAY

The MA/C Contiguous Bachelor's/Master's pathway, also known as a 4+1 pathway, is an option that allows undergraduates in the CRES major to finish the Education MA/Credential program in just one additional year. With the California Ethnic Studies Model Curriculum adopted in Spring 2021 and ethnic studies slated to be a high school requirement in California starting with the 2029-30 graduating class, the CRES/EDUC 4+1 program will train and prepare graduates to teach ethnic studies at the K-12 level.

GRADUATE PROGRAM

Also launched in 2014-2015, the Designated Emphasis (DE) in Critical Race and Ethnic Studies (CRES) is available for doctoral students to pursue alongside their doctoral degree program. To complete the DE, students must have a faculty advisor from the CRES faculty; complete four relevant courses, one of which is in CRES; and complete a significant piece of scholarly writing in the area of CRES. Students pursuing the designated emphasis are encouraged to serve as a teaching assistant for at least one CRES course, and may be eligible to teach a CRES course of their own design as a graduate student instructor.

CRITICAL RACE AND ETHNIC STUDIES B.A.

Information and Policies

Introduction

The B.A. program in critical race and ethnic studies (CRES) offers an interdisciplinary curriculum that enables majors to study the history of race and racialization both in the United States and across the globe and to learn how structures of race and racism have changed over time. By approaching race as a major ideological framework through which practices of power and domination as well as struggles for liberation and self-determination have been articulated and enacted throughout modern history and in the contemporary moment, our majors develop a deep understanding of how race and other modalities of power have informed the imagination and trajectory of social transformation and justice in the past and the present. The study of race in CRES yields critical insights into the social, political, cultural, and economic processes that have defined and shaped the modern era—colonialism, slavery, conquest, displacement, genocide, warfare, migration, creolization, criminalization, imprisonment, disenfranchisement, globalization, racial profiling, and post-9/11 security state policies. CRES engages with queer and feminist critique, decolonial thought, and analysis of labor in challenging asymmetrical and exploitative power relations, not only illuminating how race, racism, and racialization are socially reproduced in societies structured by dominance, but also fostering emergent and contestatory forms of knowledge and praxis. A commitment to structural transformation is grounded in intersectional approaches to difference (race, class, gender, sexuality, and caste) and defines the work we do.

The CRES major allows students flexibility at the upper-division level to design an interdisciplinary course of study that enables a general overview of areas of interest, while selecting electives from multiple areas of specific research and career interests. Alternatively, they can engage deeply with a key area of focus, taking a number of courses in a particular area in order to develop expertise in it. For example, they may wish to focus on a social group (e.g., members of the African diaspora), on a discipline (e.g., history), on a social phenomenon (e.g., social movements), or on a methodological or theoretical orientation (e.g., theories of race, gender, and sexuality).

Through immersion in a program of study that is multidisciplinary, comparative, and transnational in scope, CRES majors develop a critical perspective on race, racial relations, and racial justice in the United States and beyond. CRES also helps students develop skills in critical thinking, comparative analysis, the application of social theory, research, communication, and writing so that they can act effectively in an ever-changing, complex, and culturally diverse world. A student with a bachelor’s degree in CRES will be well prepared for employment and continuing educational opportunities in the humanities, social sciences, law, medicine/public health, education, and international affairs and strongly positioned to pursue careers in the private, public, and non-profit sectors.

Program Learning Outcomes

Students who complete the CRES major should emerge with the following skills, competencies, and knowledge:

Critical Frameworks

- Demonstrate deep knowledge of historical, contemporary, and intersectional perspectives on race and ethnicity.
- Demonstrate familiarity with different disciplinary methods applied to race and ethnicity.
- Demonstrate a critical perspective on institutional power and knowledge.

Communication

- Demonstrate ability to account for other people's arguments, to formulate one's own arguments, and to locate both arguments in the larger context of the field.
- Demonstrate ability to formulate an argument in alternative media, such as speech, audiovisual, digital, and other forms of non-written communication.
- Demonstrate writing effectively in the interdisciplinary field.

Research

- Demonstrate ability to design and implement a collaborative research project.
- Demonstrate ability to design and implement an independent research project.

Community Collaboration, Engagement, and Activism

- Demonstrate an understanding of the issues, ethics, and methods surrounding activist, collaborative, and community-based research projects.
- Demonstrate an understanding of collaborative knowledge that effectively integrates theoretical and experiential thinking about social justice.

Academic Advising for the Program

Email: cres@ucsc.edu
Phone: (831) 459-4246

CRES advising is held in Humanities 1, room 403 or via Zoom. Drop-in hours are posted on the CRES website. Students can make an appointment by using the Slug Success application found under Resources in their student portal (MyUCSC).

Transfer students should consult the Transfer Student Information and Policy section for specific requirements.

Getting Started in the Major: Frosh

This major is not highly sequential or course intensive. Students interested in CRES may declare at any time, including in their junior and even senior year. Students are encouraged to begin taking courses toward the major in their first year. To declare the CRES major, students are required to have completed CRES 10, or any 5-credit CRES-designated course with a passing grade (C or P) or better. (Please see the section "How to Declare a Major" for details.) All requirements of the major can be completed within two years. Although it is advisable to begin taking courses toward the major in the first year, it is not required.

Transfer Information and Policy

Transfer Admission Screening Policy

No major preparation courses are required prior to transfer; however, prospective students are strongly encouraged to complete the Intersegmental General Education Transfer Curriculum (IGETC) or to complete all University of California, Santa Cruz, general education requirements before matriculation. Students who did not list CRES on their application are welcome to pursue the major.

Getting Started in the Major: Transfer Students

Transfer students are encouraged to declare the major and enroll in CRES 10 as soon as possible to be assured entrance into the required core courses. Transfer students are encouraged to take advantage of the Summer Session offering of CRES 10 to jump-start their academic career. Transfer students and students in exceptional circumstances may substitute an equivalent course with the department chair or undergraduate director's approval. Students are recommended to make an advising appointment as soon as possible to plan their academic career.

Although rigorous, CRES major requirements are not numerous, and with guidance from a CRES advisor, they can easily be met during two years of study. The university also permits limited double-counting of upper-division electives, thus making possible for transfer students the pursuit of a double major in CRES and another field of study.

If you have completed prior college-level coursework in ethnic studies, American studies, or a similar field of study, please contact CRES advising as soon as possible and provide a copy of your unofficial transcript and course syllabi so the coursework can be reviewed for potential fulfillment of CRES major requirements. The CRES Department will consider, upon petition, which UC-transferable courses from other institutions are acceptable.

Major Qualification Policy and Declaration Process

Major Qualification

To declare the CRES major, students are required to have completed any 5-credit CRES-designated course with a passing grade (C or P) or better. CRES 10 is recommended. Exam credit awarding equivalency to CRES-designated courses may also satisfy this requirement. Courses cross-listed with CRES-designated courses are also accepted. Students may declare the CRES major at any time. Transfer students should consult the Transfer and Information Policy section above.

Appeal Process

A student may file an appeal with the CRES advisor within 15 days of the denial of major declaration. The CRES Department will notify the student and the college of the decision within 15 days of the receipt of the appeal.

How to Declare a Major

Students may declare the major by logging into MyUCSC and clicking the link to submit the Petition for Major/Minors to the department advisor. The major declaration should include a plan to complete CRES 10, CRES 100, and CRES 101 at the next possible opportunity. Students must complete all requirements for the major with a grade of P, C (2.0), or better.

Per campus policy, students must submit their major declaration no later than the third quarter of their sophomore year or, in the case of transfer students, no later than the second quarter of their junior year.

CRES welcomes students who are pursuing more than one major. If you are planning to declare a double major or major/minor program, each major advisor will need to approve your academic planner. Please follow the declaration protocol for each major before submitting the declaration of major petition on MyUCSC.

Letter Grade Policy

CRES does not have a letter grade policy outside of the university's letter grade policy.

[Optional Catchall]

Course Substitution Policy

CRES is an interdisciplinary major that includes courses taught by faculty in other departments (see the Electives section below for a list of approved courses). Students who wish to substitute a course not on the electives list should complete the Petition for Course Credit form available on the CRES website. A maximum of two courses may be petitioned for credit.

Double Majors and Major/Minor Combinations Policy

The CRES major works very well as a double major with numerous fields of study such as anthropology; community studies; creative writing; feminist studies; film and digital media; education; environmental studies; history; history of art and visual culture; legal studies; linguistics; languages; literature; music; performance, play, and design; politics; sociology; and more.

Study Abroad

Honors

CRES awards honors and highest honors in the major. Students are considered for honors and highest honors based on their cumulative GPA, calculated from grades earned in coursework and the senior exit requirement undertaken for completion of the major. For honors, students must earn a minimum GPA of 3.70 in the relevant courses, while for highest honors, the GPA must be 3.90 or higher. Writing a thesis is not a requirement for receiving honors or highest honors.

[Optional Catchall]

Requirements and Planners

Course Requirements

To graduate with a major in CRES, a student is required to complete 10 courses with the approval of the department. Some courses may be satisfied via exam credit.

Lower-Division Core

One lower-division foundation course:

CRES 10	Critical Race and Ethnic Studies: An Introduction	5

Upper-Division Core

Two upper-division core courses are required for the major:

CRES 100	Comparative Theories of Race and Ethnicity	5
CRES 101	Research Methods and Writing in Critical Race and Ethnic Studies	5

CRES 101 satisfies the Disciplinary Communication (DC) requirement.

Electives

Students must complete **six** electives from the General Electives, Transnational, and Social Movements lists below. Each course must be at least 5 credits. No more than one may be lower-division.

- At least **two** must be from the Transnational list. These are designated courses focusing on phenomena outside of the U.S. or on transnational or hemispheric subjects.
- At least **one** must be from the Social Movements list.
- One class may be used to satisfy **both** Transnational and Social Movement requirements, however, a total of six electives must still be completed.
- At least **two** must be CRES courses. These courses may overlap with the Transnational and Social Movements requirement above. Courses which are cross-listed with a CRES course may also count toward this requirement.

For current offerings, please visit the CRES course page.

Students are encouraged to supplement their upper-division coursework with language study, internships, and individual or group independent studies. Students may petition to have up to 10 credits (two courses) of such activities substituted for upper-division elective requirements, so long as these activities serve, or do not interfere with, the breadth requirements.

General Electives

CRES 12	Science and Justice: Critical Intro	5
CRES 14	Center for Racial Justice Service Learning	5
CRES 15	Resource Centers Service Learning Course	5
CRES 118	Abolitionist Futures	5
CRES 121	The Struggle for K-12 Ethnic Studies	5
CRES 150	Race, Gender and Algorithms	5
CRES 151	After Man: Race, Gender and Technology	5

CRES 161	The Racial and Gendered Economies of Housing	5
CRES 185	Race, Gender, and Science	5
CRES 188B	Topics in Black Studies	5
CRES 188S	Topics in Settler Colonial Critique	5
CRES 188T	Topics in Race, Science and Technology	5

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. The DC requirement in CRES is satisfied by completing CRES 101, Research Methods and Writing in Critical Race and Ethnic Studies. Students must complete their DC requirement prior to the Senior Seminar.

CRES 101	Research Methods and Writing in Critical Race and Ethnic Studies	5

Comprehensive Requirement

The comprehensive requirement is fulfilled by completing a senior seminar from the CRES 190 series, or one of the other senior seminars listed below. CRES 190 series courses in the current General Catalog are also listed below; any CRES 190 series course that is listed in a subsequent General Catalog will also satisfy the comprehensive requirement.

Prerequisites for the CRES 190 series include CRES 10, CRES 100, and CRES 101 and satisfaction of the Entry Level Writing and Composition requirements. Senior seminars outside of CRES may have additional enrollment restrictions or prerequisites.

ANTH 196G	Queer Worlds: Sexuality, Intimacy and Power in Contemporary Ethnography	5
CRES 190A	Critical Race Feminisms	5
CRES 190B	Critical Migration Studies	5
CRES 190C	The Black Transnational	5
CRES 190D	Black Geographies and the Imperative of Abolition	5
CRES 190F	Black Queer Film	5

CRES 190N	Science/Fiction and the Possible	5
CRES 190P	Trans of Color Performance and Media	5
CRES 190S	From Slavery to Precarity: Race, Logistics and Globalization	5
CRES 190T	The War on Terror: Imperialism Past and Present	5
CRES 190X	Racial Capitalism	5
CRES 190Y	Solidarity	5
FMST 194K	Black Diaspora	5
FMST 194M	Empire and Sexuality	5
FMST 194O	The Politics of Gender and Human Rights	5
FMST 194Q	Queer Diasporas	5
FMST 194R	HIstories of the Carceral State	5
FMST 194U	Touring War and Empire	5
FMST 194V	Marxism and Feminism	5

HIS 190C was previously offered as FMST 194L with a crosslisting of CRES 190L. The course is now offered as CRES 190L with a crosslisting of FMST 194L.

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Four-Year Sample Academic Plan For CRES Major (Frosh)

Students must have satisfied the English language and writing requirement (ELWR) and have completed the C1 requirement in order to enroll in CRES 10. Students who place into C2 in their first fall quarter may enroll in CRES 10 in their first fall quarter.

	Fall	Winter	Spring	Summer
Entering				College 1A Summer Edge (optional)

1st (frosh)	College 1	WRIT 1/WRIT 1E (if needed)	
2nd (soph)	CRES 10 WRIT 2*	CRES 100	CRES 101 CRES elective
3rd (junior)	CRES elective	CRES elective CRES elective	CRES elective
4th (senior)	CRES elective	CRES 190	

Students must also complete all general education requirements except for ER, which is satisfied by CRES 10.

*WRIT 2 should be taken in or before spring quarter of the second year.

Two-Year Sample Academic Plan for CRES Major (Transfer Students)

Transfer students should complete their general education (GE) requirements or IGETC before enrolling at UCSC, but this is not a requirement to complete the major within two years of transferring. The CRES major consists of 10 courses, allowing transfer students to complete about two CRES courses per quarter along with additional units to complete the required 180 units for graduation.

Sample Transfer-Students Academic Planner for CRES Major – Fall Admission

	Fall	**Winter**	**Spring**	**Summer**
Entering				KRSG 1T Summer Edge (optional)
1st (junior)	CRES 10	CRES 100 CRES elective	CRES 101 CRES elective	
2nd (senior)	CRES elective CRES elective	CRES elective CRES elective	CRES 190	

BLACK STUDIES MINOR

Housed in the Critical Race and Ethnic Studies (CRES) Department, the Black Studies minor offers students grounding in the intellectual histories, political movements, cultural expressions, and critical theories of the black diaspora, all while engaging a range of methodologies from across disciplines. Attention to the significance of social justice is a hallmark of the minor. Supported by faculty expertise in Africa, the Caribbean, the Americas, Europe, and the Pacific, students can explore the globally multi-sited nature of black freedom struggles, both past and present, and examine blackness through a comparative lens.

Through careful advising, students can pursue a set of electives, tailored to their interests, enabling broad or deep exploration of specific histories, geographic regions, and thematic concerns.

Course Requirements

To graduate with a minor in Black studies, a student is required to complete six courses. CRES 68, Approaches to Black Studies is the expected foundational course. Students will undertake an additional 25 credits—or five upper-division elective courses—drawn from the Arts, Humanities, and Social Sciences divisions. Students can select these five electives from a list of pre-approved courses. Students who wish to substitute a course not on the approved upper-division list should complete the Petition for Course Credit form available on the CRES website. A maximum of two courses may be petitioned for credit. Some courses may be satisfied via exam credit. Courses may be taken for a letter grade or Pass/No Pass.

Lower-Division Courses

Take the following course:

CRES 68	Approaches to Black Studies	5

Upper-Division Courses

Five upper-division courses from the General Electives list below. At least **two** of these electives must be CRES courses (i.e., under the CRES designation). Courses in the General Electives list that are cross-listed with a CRES course may also count toward the two required CRES courses.

General Electives

CRES 113	Music and Performance	5
CRES 115	Frantz Fanon: Resistance, Revolution, and Decolonization	5
CRES 118	Abolitionist Futures	5
CRES 131	Black Freedom Movements	5

CRITICAL RACE AND ETHNIC STUDIES DESIGNATED EMPHASIS

Introduction

UC Santa Cruz graduate students enrolled in doctoral programs may obtain a designated emphasis in Critical Race and Ethnic Studies as part of their Ph.D. degree. The designated emphasis is the equivalent of a “minor” for doctoral study. It will provide you with a framework for in-depth study in specialized fields in your area, and an opportunity for recognition of particular scholarly expertise.

Requirements

Doctoral students from other departments may obtain a designated emphasis in Critical Race and Ethnic Studies (CRES) by completing the following requirements in addition to the requirements for the doctorate in their home department:

Committee Composition and Departmental Approvals

The student must have a designated graduate advisor from the CRES principal faculty or by exception from affiliated faculty. The student must meet with this CRES advisor to develop a coherent plan for meeting the requirements for the designated emphasis, preferably before the end of the student’s first year. This plan must be approved by the CRES department chair.

A member of the CRES principal or affiliate faculty (usually the CRES graduate advisor) must serve on the student's qualifying examination committee and on the student's dissertation committee.

Course Requirements

The student must take four relevant graduate seminars taught by CRES principal faculty, at least one of which must have the CRES designation. Substitutions and other exceptions to this requirement may be approved on an individual basis by the CRES Department chair, in consultation with the student's advisor of record. One relevant graduate seminar taught by non-program faculty may be counted with the approval of the CRES Department chair. The department chair may also approve the substitution of an individual or group independent study addressing a set of readings or focused on research and writing for one of the four required graduate courses. The specific courses used must reflect a coherent plan of study that embodies both breadth and focus.

Current academic year courses recommended for the designated emphasis (DE) are listed on the CRES website, but eligible courses are not limited to this list.

Writing, Research and/or Teaching Requirements

The student must prepare a significant piece of scholarly writing in the area of CRES. This writing may take the form of a substantial seminar paper, a master's or qualifying exam essay, or a portion of the doctoral dissertation. The student's CRES advisor will determine whether a particular piece of writing meets this requirement.

Students pursuing the designated emphasis are encouraged to serve as a teaching assistant for at least one CRES core or elective course. CRES faculty are encouraged to appoint CRES designated emphasis students as teaching assistants when possible and appropriate.

Academic Progress

Proposing and Obtaining the Designated Emphasis

Once a plan for meeting the requirements is agreed upon, the student should complete the CRES DE application, obtain the CRES advisor’s and department chair's signatures, and submit the application to the CRES administrative office. The request for the designated emphasis must originate in the degree-granting department.

Once the requirements have been met, the student submits relevant documentation to the CRES administrative office for final approval by the CRES Department chair. At a minimum, the student should submit copies of the qualifying examination and/or Dissertation Committee Nomination forms and a note from the advisor confirming that the writing sample and proposed courses have been completed. If the proposed courses have changed, an explanation of the changes should be included.

The CRES administrative office will notify the student and the home department of approval for the designated emphasis.

[Optional Catchall]

Feminist Studies

403 Humanities 1
fmstad@ucsc.edu
https://feministstudies.ucsc.edu/

PROGRAMS OFFERED

Feminist Studies B.A. (p. 159)

Feminist Studies Ph.D. (p. 164) (suspended)

Feminist Studies Designated Emphasis (p. 167) (suspended)

The feminist studies degree programs at the University of California, Santa Cruz, are dedicated to an interdisciplinary investigation of gender relations and their centrality to social,

political, economic, and cultural formations. Initially established as a program in Women's Studies in 1974 and then a department in 1996, it re-envisioned and defined its epistemological emphasis through feminist analytics and became the first in the nation to change its name to Feminist Studies in 2005. In 2025, the department disestablished, but the degree programs continue (the graduate programs are currently on suspension). The faculty, who represent a range of expertise, are invested in a rigorous analysis of capitalism, racism, and colonialism and its legacies through persistent critique. Rather than conceive of "woman" as an always already known category or an object of study, feminist studies is invested in analyzing how knowledge about gender, sexuality, race and class has been constructed over time and reveals the historical processes through which concepts like equity and justice (including gender and racial justice) acquire meaning.

We offer an undergraduate major, a Ph.D. program, and a designated emphasis, however, the Ph.D. and designated emphasis programs are not currently accepting new applications. The feminist studies degrees provide students with a unique interdisciplinary and transnational perspective by emphasizing theories and practices derived from multiracial and multicultural contexts.

FEMINIST STUDIES B.A.

Information and Policies

Introduction

Note: Students admitted after fall of 2025 may not be guaranteed admission to the major.

Feminist studies is an interdisciplinary field of analysis in the humanities that investigates how relations of gender are embedded in social, political, and cultural formations. The undergraduate program in feminist studies provides students with a unique interdisciplinary and transnational perspective. The program emphasizes theories and practices derived from multiracial and multicultural contexts. Some topics you will find in our curriculum include: Black/Africana studies; colonialism and decolonization; trans, queer, and sexuality studies; media studies; law, politics, and social change; and science and technology studies. Feminist studies prepares undergraduates for a variety of careers. The Bachelor of Arts (B.A.) in Feminist Studies provides excellent grounding for undergraduates who have career aspirations in, for example, law, health, non-governmental organizations, museum curation, politics, media and film, research institutes, journalism, community organizations, and social services.

Students wishing to pursue doctoral work also will find that interdisciplinary training in Feminist studies equips them with theoretical and methodological strengths in most disciplines and applied research fields including American Studies, Ethnic Studies, Science Studies, Anthropology, Communications, and Legal Studies.

Specialists in feminist studies are employed as consultants in industry, higher education, and human resources. State and federal government agencies employ people who have special training in understanding gender and race relations. Educational institutions need specialists to develop and administer Feminist Studies programs, women's centers, and other institutional structures designed specifically to study and assist marginalized peoples, including women.

Program Learning Outcomes

Students who complete the Feminist Studies major should demonstrate the following skills upon graduation:

Outcome 1: Application of Feminist Approaches to Critical Interpretation

Students should be able to:

- Discuss a diversity of feminist approaches to understanding social, political, cultural, and scientific phenomena
- Connect feminist inquiry to a variety of other social phenomena including but not limited to race, nation, class, and sexuality
- Distinguish and evaluate assumptions underlying data and claims
- Place divergent interpretive frameworks in dialogue
- Perform close reading of texts and/or other objects

Outcome 2: Original Research

Students should be able to:

- Develop specific and detailed research questions
- Identify appropriate primary sources for feminist research projects
- Collect, evaluate, and analyze source material using appropriate theoretical framework(s)
- Identify key findings and draw conclusions for research and/or application

Outcome 3: Argumentative Communication

Students should be able to:

- Effectively formulate written arguments to frame research questions and analyze source material
- Present appropriate evidence to substantiate claims
- Logically organize arguments over the course of a research paper
- Use appropriate mechanics/grammar

Academic Advising for the Program

Email: fmstad@ucsc.edu

Feminist Studies advising is held remotely and in Humanities 1, Room 403. Drop-in hours are posted on the Feminist Studies website. Students can make an appointment by using

the Slug Success application found under Resources in their student portal (MyUCSC).

Transfer students should also consult the Transfer Student Information and Policy section for specific requirements.

Getting Started in the Major: Frosh

Acceptance to the Feminist Studies major: This major is not highly sequential or course intensive. Although it is advisable to begin taking courses in the major in the first year, it is not required.

Students are encouraged to declare the major as soon as possible to be assured entrance into the required core courses. Please see the section How to Declare a Major for more details.

There are no prerequisite courses that must be satisfied before declaring the Feminist Studies major.

Students should plan to enroll in FMST 01, Feminist Studies: An Introduction, in the fall quarter of their sophomore year if they did not complete the course during their first year at UC Santa Cruz. Please refer to the Four-Year Plan in the Planners section of the catalog.

Transfer Information and Policy

Transfer Admission Screening Policy

No major preparation courses are required prior to transfer. Prospective students are encouraged to complete the Intersegmental General Education Transfer Curriculum (IGETC) or to complete all UC Santa Cruz general education requirements before matriculation. Transfer students may potentially pursue the Feminist Studies major even if they did not enter UC Santa Cruz with a proposed Feminist Studies major.

Getting Started in the Major: Transfer Students

Transfer students are encouraged to declare the major as soon as possible to be assured entrance into the required core courses. Please see the section How to Declare a Major for more details.

Transfer students may use an articulated equivalent of FMST 1 to satisfy the FMST 1 requirement. Please check assist.org for current articulation agreements.

If you have completed prior college-level coursework in Feminist Studies, Women's Studies, or a similar field of study, please contact Feminist Studies advising as soon as possible and provide a copy of your unofficial transcript and course syllabi so the coursework can be reviewed for potential fulfillment of Feminist Studies major requirements.

The feminist studies program will consider, upon petition, which UC-transferrable courses from other institutions are acceptable. FMST 1, one Feminist Studies (FMST) lower-division course, and FMST 100 must be completed before the senior year so that the comprehensive requirement may be completed in the senior year.

Major Qualification Policy and Declaration Process

Major Qualification

Undeclared students may declare the Feminist Studies major at any time. While specific courses are not required in order to declare, students ideally will have completed or be enrolled in FMST 1, Feminist Studies: An Introduction.

Appeal Process

How to Declare a Major

Petition to declare the Feminist Studies major before you reach your declaration deadline quarter. Students who enter UC Santa Cruz as frosh or sophomores must be formally declared in a major before enrolling in their third year (or equivalent). Junior transfer students must be declared in a major by the deadline in their second term at UCSC.

For a single major: Familiarize yourself with the content of the Feminist Studies website. Log into MyUCSC and click the link to submit the Petition for Major/Minor. Before submitting the petition, students are required to meet with Feminist Studies advising to create and/or update their academic planner. A template planner can be found here.

If you are planning to declare a double major or major/minor program, each major advisor will need to approve your academic planner. Please follow the declaration protocol for each major before submitting the declaration of major petition on MyUCSC.

If your proposed program exceeds your expected graduation term (EGT), your major advisor(s) will use the extension section of your academic planner to assign your college advising office to review the extension of enrollment request. Your college advising office will approve or deny the request and update your expected graduation term.

Students should submit a petition to declare as soon as they reach their declaration deadline quarter.

Students petitioning when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh), will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter.

Letter Grade Policy

Letter grades are required for 10 of the 11 courses applied toward the Feminist Studies major. FMST 100 and the comprehensive requirement course (FMST 194 or FMST 195) must be taken for a letter grade.

[Optional Catchall]

Course Substitution Policy

Feminist Studies is an interdisciplinary major that includes courses taught by affiliated faculty in other departments (see the Courses page of the feminist studies website for current year offerings). However, a minimum of five courses

counting toward major requirements must be taken at UC Santa Cruz taught directly in the feminist studies program, (i.e., courses designated FMST, not including FMST 193, FMST 198, or FMST 199). At most three courses may be transferred to count toward the major, including three Education Abroad Program (EAP) courses or courses from another university. Courses cross-listed with FMST courses count toward this five-course minimum..

Double Majors and Major/Minor Combinations Policy

The Feminist Studies major works very well as a double major with fields of study such as Community Studies, Critical Race and Ethnic Studies, Sociology, Politics, Education, Legal Studies, Literature, Psychology, and more.

Study Abroad

As stated in the course substitution policy, a maximum of three courses may be transferred to count toward the major, including courses from an Education Abroad Program (EAP).

Feminist Studies majors are strongly encouraged to consider enriching their time at UCSC with Study Abroad opportunities. International classes are an exciting chance to broaden and deepen your feminist education by bringing questions around gender, sexuality, and social justice into dialog with different regions, nations, and cultures around the world.

Students should refer to the list of Feminist Studies approved Study Abroad classes offered at colleges around the globe. This list is being updated with more approved courses from more countries on an ongoing basis.

As noted above, students can use up to three approved Study Abroad courses to fulfill Feminist Studies upper-division elective requirements. Interested students should review the Feminist Studies major requirements and refer to these two- and four-year academic planners for examples of how to incorporate international classes into the Feminist Studies curriculum.

Honors

Feminist Studies awards honors and highest honors in the major. At the end of each quarter, a faculty committee meets to review graduating students' files. Students are considered for honors and highest honors based on their cumulative GPA, calculated from grades earned in coursework and the comprehensive requirement undertaken for completion of the major. For honors, students must earn a minimum GPA of 3.70 in the relevant courses, while for highest honors, the GPA must be 3.90 or higher. Writing a thesis is not a requirement for receiving honors or highest honors.

[Optional Catchall]

Requirements and Planners

Course Requirements

Feminist Studies majors must complete 11 courses including a comprehensive requirement in the Feminist Studies Department program. The three core courses--FMST 1, one lower-division feminist studies course, and FMST 100--must be taken at UC Santa Cruz absent a petition. A minimum of five courses at UC Santa Cruz taught directly in the Feminist Studies Department, (i.e., courses designated FMST, not including FMST 193, FMST 198, or FMST 199) must be completed for the major.

Lower-Division Courses

Take the following course:

FMST 1	Feminist Studies: An Introduction	5

And one of the following courses:

FMST 10	Feminisms of/and the Global South	5
FMST 12	Podcasting: Feminist Files	5
FMST 14	Popular Culture in South Asia	5
FMST 15	Gender, Sexuality, and Transnational Migration Across the Americas	5
FMST 16	Media Histories--News and New Media	5
FMST 18	Black Feminist Ethnographies	5
FMST 19	Black Feminisms: An Introduction	5
FMST 20	Feminism and Social Justice	5
FMST 21	Religion in American Politics and Culture	5
FMST 30	Feminism and Science	5
FMST 31	Disability Studies	5
FMST 40	Sexuality and Globalization	5
FMST 41	Trans Gender Bodies	5
FMST 43	Rasanblaj: On Wholeness and Well-Being	5
FMST 71	Introduction to Visualizing Abolition Studies	5

Upper-Division Courses

FMST 100	Feminist Theories	5

Students are required to complete FMST 100, Feminist Theories, at UC Santa Cruz absent a petition.

Electives

Students complete seven additional 5-credit upper-division electives. Courses may be chosen from FMST 100-199, or the lists of approved electives from affiliated departments below.

As stated in the Course Substitution Policy, a minimum of five courses used toward major requirements must be taken in the feminist studies program at UC Santa Cruz (i.e. courses designated FMST). FMST 193, 198, and 199 do not count toward this five-course minimum. Courses cross-listed with a FMST course will count toward this five-course minimum. At most three courses may be transferred to count toward the

major, including three Education Abroad Program (EAP) courses or courses from another university.

The Feminist Studies Tentative Curriculum is the definitive list of courses offered during the current academic year that will satisfy major requirements and is comprised of courses offered both from within the feminist studies program but also with approved courses originating from many different departments throughout UC Santa Cruz.

Please consult feminist studies advising with any questions regarding this requirement.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in feminist studies is satisfied by completing the comprehensive requirement (FMST 194 or FMST 195).

Comprehensive Requirement

Comprehensive requirement options include a senior seminar taught by core faculty or a senior thesis/project. Completion of the Entry Level Writing and Composition Requirements are prerequisites to FMST 194 and FMST 195.

Students who wish to complete FMST 195, Senior Thesis or Project, should consult early with the feminist studies advisor and a prospective faculty advisor. The senior thesis or project option is by petition only, and faculty advisors may request that students complete a Senior Seminar (FMST 194) before agreeing to supervise a senior thesis or project.

Double majors may be able to write a thesis of 50 or more pages over three quarters to satisfy the comprehensive requirements of feminist studies and the second major. The Feminist Studies Department will review and approve or deny proposals for a double thesis on a case-by-case basis.

Students should be aware that not all departments will accept a double thesis. Students who wish to propose a double thesis should consult with both major advisors before the end of their junior year. Such a proposal must be approved by both departments or referred to the Committee on Educational Policy. In evaluating such proposals, the departments will require the student to have completed significantly more work than the minimum required for the comprehensive requirement of each major. The student's work must clearly explain to the reader the relevance of the work to both disciplines.

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Four Year Plan

	Fall	Winter	Spring	Summer
Entering				College 1A Summer Edge (optional)
1st (frosh)	College 1 WRIT 2*	WRIT 1/WRIT 1E (if needed)		
2nd (soph)	FMST 1 WRIT 2*	FMST 100	FMST lower-division core	
3rd (junior)	FMST elective	FMST elective FMST elective	FMST elective	
4th (senior)	FMST elective	FMST 194 or FMST 195	FMST elective	

FMST 01 fulfills the CC general education (GE) requirement. Many FMST courses fulfill other GE requirements.

*WRIT 2 should be taken in or before spring quarter of the second year.

Two Year Plan for Transfer Students:

	Fall	Winter	Spring	Summer
Entering				Kresge 1T Summer Edge (optional)
3rd (junior)	FMST 1 FMST lower-division core FMST elective*	FMST 100	FMST elective FMST elective	
4th (senior)	FMST elective FMST elective	FMST elective FMST elective	FMST 194 or 195	

*Transfer students are strongly encouraged to enroll in FMST 105, Feminist Methodologies, a course designed specifically to aid in the transition to UC Santa Cruz's feminist studies major for incoming transfer students. FMST 105 is offered every fall. This course will also satisfy one FMST elective requirement.

FEMINIST STUDIES PH.D.

Introduction

Note: The Feminist Studies Ph.D. Program is not accepting applications in the 2025-26 Academic Year.

The inaugural class of students seeking a Doctor of Philosophy degree (Ph.D.) in Feminist Studies began in fall 2013. Feminism(s) today mandate new histories of the global. A Ph.D. in feminist studies at UC Santa Cruz is an interdisciplinary, transregional program committed to thinking inequity across regions both within and outside the U.S.. Our four key foci are: (1) the global south (2) justice (3) abolition (4) comparative colonialism(s). Combining intellectual diversity across disciplines and areas, we train graduate students to engage with pressing histories of the present. Our faculty work across field-formations of race and social justice, queer/sexuality/trans studies, law and society, popular media, music and the arts, politics and social movements, race and migration, development and political economy, and more.

UC Santa Cruz is committed to creating an academic environment that supports its diverse student body. If you are a student with a disability who requires accommodations to achieve equal access in this program, please notify the graduate coordinator of your program as soon as practical. All students are encouraged to consider how they may benefit from learning more about Disability Resource Center (DRC) services and to contact the DRC by phone at 831-459-2089 or by email at drc@ucsc.edu.

Advancement to Candidacy

Students are expected to take the Ph.D. qualifying examination in their third year and no later than their fourth year, by which point they also must fulfill the course requirements and demonstrate proficiency in a second language.

Course Requirements

Ph.D. students will complete most of their coursework during their first two years. Students are required to complete a total of 12 courses: three required courses–Feminist Theories (FMST 200), Feminist Methodologies (FMST 201), and Disciplining Knowledge (FMST 202)--and nine electives. Feminist studies requires FMST 200 and FMST 201 to be taken consecutively the fall and winter quarters of the first year, while FMST 202 will be offered in the spring of the second year.
In addition, students must enroll in three 2-credit advising courses (FMST 297F) with their first-year mentor or primary advisor. FMST 290, a 2-credit pedagogy training course, is to be taken prior to and/or in conjunction with the first teaching assistant appointment.

FMST 200	Feminist Theories	5
FMST 201	Topics in Feminist Methodologies	5
FMST 202	Disciplining Knowledge/Graduate Research	5

Elective Courses

Students may take elective courses in the feminist studies program as well as in other departments. Graduate seminars, independent studies, and directed readings with the Feminist Studies faculty count toward the elective course requirement. Graduate seminars from other departments may also be used to fulfill the elective requirement.

FMST 203	Feminist Pedagogies	5
FMST 207	Topics in Queer/Race Studies	5
FMST 211	Sexuality, Race, and Migration in the Americas	5
FMST 212	Feminist Theory and the Law	5
FMST 214	Topics in Feminist Science Studies	5
FMST 215	Postcolonial and Postsocialist Transactional Analytics	5
FMST 216	Archives/Genders/Histories: An Introduction	5
FMST 218	Militarism and Tourism	5
FMST 222	Religion, Feminism, and Sexual Politics	5
FMST 232	Topics in Postcolonial Studies	5
FMST 243	Feminism, Race, and the Politics of Knowledge	5
FMST 260	Black Feminist Reconstruction	5
FMST 270	Anthropology at Its Interfaces with Feminist, Postcolonial, and Decolonial STS	5

Foreign Language Requirements

Students normally satisfy the language requirement by the end of the second year; the requirement must be satisfied in order to pass the qualifying exam. Fulfillment of the language requirement in feminist studies can be documented in several ways. The documentation should demonstrate current ability to use the language in an appropriate way in scholarship. The language appropriate to research could be oral, gestural, or written, or a combination of these. Depending on the specific language and on the research needs of the student, functional language competence could include the ability to read the scholarly literature or other written material needed in research, the ability to conduct fieldwork in the language, or the ability to produce written work in the language. Students should discuss their language requirement with their faculty advisor who, along with the graduate director, has responsibility for determining whether a student has satisfied the requirement. If neither the advisor nor the graduate director have proficiency in the proposed language, then an outside person will be consulted to verify competency in the proposed language. According to Graduate Division policy, proficiency should be demonstrated **before** the qualifying examination committee can be appointed and at least one month prior to taking the qualifying examination.

Teaching Requirement

Pre-Qualifying Requirements

Qualifying Examination

Advancement to candidacy depends on the general quality of a student's work; demonstration of proficiency in a foreign language relevant to the student's area of work, either by passing a written examination administered by the department

or successfully completing a language course approved by the department; success in the qualifying examination, and proposal of an acceptable dissertation topic.

Students should consult their advisor when composing their qualifying examination committee. Per Academic Senate policy, committees must consist of at least four members, one of whom is not a member of the student's department. The chair of the committee must be tenured, and will not be the student's dissertation advisor. The outside member must be a tenured faculty member, or may be from a non-academic field. The feminist studies Ph.D program requires that at least two members of the committee must be members of the Feminist Studies faculty. The graduate dean has authority to approve committee nominations and grant authorities.

The qualifying examination focuses on the student's research project and on the fields of scholarship it presupposes. The qualifying examination consists of:

1. Written Portion (75-95 pages total)
    a. Introduction to the Qualifying Exam (15-20p): This document explains the intellectual trajectory of the student, the development of the student's research questions, and the relationship between the different written components submitted for the exam.
    b. Qualifying Essay(s) (50-60p): In consultation with the advisor, the student will submit one or two research essays totaling 50-60 pages. Depending on the nature of the student's project and method, as well as the advisor's preferences concerning the exam format, the Qualifying Essay(s) may consist of article- or chapter-length research paper(s), literature review(s), and/or field statement(s) related to the student's primary areas of research.
    c. Dissertation Prospectus (10-15p): A draft dissertation prospectus is due at the time of exam. A revised prospectus will be due to the committee no later than the end of the quarter following the oral exam. The prospectus outlines the primary research questions, fields of intervention, timeline, and potential claims of the dissertation project.
2. Oral Examination
    a. The oral examination typically lasts 2.5-3 hours. The student is invited to give a 10-minute introduction to the qualifying essay and research project. Each examiner on the QE Committee will have approximately 20-30 minutes to put questions to the student regarding the written portion of their examination. A general discussion typically follows the round-robin questioning. Upon completion of the questions and discussion, the student is excused and the committee members evaluate the student's performance with the goal of achieving some unanimity. The committee invites the student back to the room to share the group's evaluation, offer advice, and articulate any requirements. The committee will also suggest revisions to the dissertation prospectus, to be completed by the end of the quarter following the oral exam.
    b. The chair of the committee composes a final report based on the committee's evaluation of the student's performance. After approval by the other committee members, the report is submitted to the Graduate Division to recommend advancement to candidacy.

Post-Qualifying Requirements

Immediately after the qualifying examination, students will consult their primary advisor to convene a Dissertation Committee. The Dissertation Committee must be composed of at least three members, the majority of whom must be members of the UC Santa Cruz Academic Senate, and at least one of whom is a member in Feminist Studies. Advancement to candidacy will only take place after a committee is approved by the graduate dean.

Award of Master's Degree

The program admits students on the Ph.D. track. However, in exceptional circumstances, for example, if a student has to leave the program before completing the Ph.D., the Master of Arts (M.A.) degree in Feminist Studies may be conferred. In consultation with the advisor and graduate director, the M.A. requirements are as follows:

1. Completion of nine graduate seminars, including FMST 200, FMST 201, and FMST 202 to the satisfaction of the program. The remaining six seminars are to be selected from the feminist studies offerings to reflect the student's particular academic plan, agreed upon by the student and graduate advisor.
2. Successful completion of the qualifying examination, including all written and oral components.
3.

Completion of the master's degree cannot be accomplished in less than two full academic years.

Students who wish to petition for the M.A. degree in Feminist Studies must meet all guidelines for the degree established by the Graduate Division and petition for the degree prior to the due date set by the division. Upon successful completion of the qualifying examination, students must submit the completed qualifying examination written materials to the program as the final portfolio of work for the degree.

The Master's of Fine Arts (M.F.A.) in Social Documentation (SocDoc) is an innovative interdisciplinary two-year program in the Film and Digital Media Department (FDM) that trains students to critically analyze, frame, and reflect on contemporary social issues through the art of documentary media. Designed for future documentarians committed to social change and to documenting communities, cultures, issues, and individuals who are marginalized in our current landscape of representation, the SocDoc Program supports

students who share a commitment to social justice and human rights and who have a desire to study their subject areas in depth. In a rapidly expanding and changing field, SocDoc invites students to investigate critical social issues through an approach that fuses arts-based, social science and humanities research methods to artful and ethical documentary media practices. We prepare graduates for careers in independent and community media, public broadcasting, media education, human rights work and more.

Objectives

The Social Documentation M.F.A. program aims to train graduate students in critical thinking, social science analysis, arts-based approaches, and ethical standards for engaging with and documenting underrepresented communities. The curriculum concentrates on the analysis of social and structural systems, the creation of a rigorous and ethical approach in the collection and presentation of documentary material, and on the potential role of the documentary in social change.

SocDoc leverages faculty advisors across the campus to provide students with access to interdisciplinary expertise, grounding M.F.A. students in a deep understanding of their research subjects as well as in fluency with documentary production and postproduction techniques. Benefiting from deep faculty experience with media-making, documentary history, and community organizing, students in our program hone documentary approaches suited to their topical interests, ground themselves in social science analysis and research methodologies, and acquire professional skills, while maintaining a commitment to social justice and to communities in need. Central to our ethos is training in critical documentary frameworks, documentary ethics, and modes of community engagement and collaboration.

M.F.A. candidates build a curriculum around a required set of core courses that offer a foundation in the theory, methods, and production practices of social documentary, combined with elective courses in their substantive area of interest. The culminating work in the program is the creation of a creative documentary thesis project, developed in stages across the duration of the two-year degree.

[Optional Catchall]

Dissertation

Dissertation

After advancement to candidacy, expected by the end of the third year, students take courses in the 290 sequence (FMST 299A) until the dissertation is submitted. Successful revision of the dissertation prospectus will be due to the Dissertation Committee no later than the end of the quarter after completion of the oral examination to remain in good academic standing. Students submit the revised prospectus to their committee for approval and transmit the document to the graduate coordinator.

Upon approval of the revised dissertation prospectus, students concentrate on dissertation writing. The current normative time to degree limit is six years, although students should plan dissertation research and writing timelines keeping in mind the funding commitments made by the department at the time of matriculation. Students also have the option of doing advanced work in a traditional discipline and receiving a Designated Emphasis of this specialization. In such cases, students must satisfy the appropriate department's criteria (see the departmental web site for information). Students are expected to complete at least one year of supervised teaching as part of the degree requirements.

Dissertation Defense

The dissertation defense serves as the final opportunity for the student to receive focused feedback on research and writing, ideally with the goal of developing the dissertation into a book or other major project following completion of the Ph.D. The defense typically lasts two hours and is an occasion for thoughtful, constructive criticism and guidance; it is not an examination. For this reason, the defense will normally be conducted as a closed meeting between the committee and the student, along with a small audience of guests invited by the student and/or advisor. The student may elect to conduct a public defense with permission of the advisor. In such instances, the chair must convene a closed committee discussion at the end of the defense to complete conferral of the Ph.D.

Academic Progress

Normative time to completion of the Ph.D. is six years. Upon advancement to candidacy, students are expected to complete the dissertation within three years to make satisfactory academic progress.

Applying for Graduation

At the end of the dissertation writing process, the student must petition for the degree, format the dissertation according to Graduate Division guidelines, complete an oral dissertation defense with the Dissertation Committee, and obtain signatures of the committee members on the official title page. Once these items are complete, the student may file the dissertation to complete the Ph.D.

[Optional Catchall]

FEMINIST STUDIES DESIGNATED EMPHASIS

Introduction

Note: The Feminist Studies DE Program is not accepting applications in the 2025-26 Academic Year.

Graduate students may work toward a Doctor of Philosophy (Ph.D.) degree that notes a designated emphasis in feminist studies on the graduation documents. Students wishing to pursue this option should consult with the chair of their respective Ph.D. program and are encouraged to apply in the first or second year of graduate study. The application and an

annually updated list of regularly offered, approved graduate courses are available at the Feminist Studies website.

Requirements

The following are required for the designated emphasis:

Committee Composition and Departmental Approvals

The student must have a designated graduate advisor from the feminist studies core faculty who serves on the qualifying examination committee or in some other appropriate capacity.

Course Requirements

The student must take four graduate courses in feminist studies, two of which must be taught directly in the program Two courses can be selected from among the graduate offerings of any UC Santa Cruz department, as long as they are taught by core or affiliated feminist studies faculty.

FMST 200	Feminist Theories	5
FMST 201	Topics in Feminist Methodologies	5
FMST 202	Disciplining Knowledge/Graduate Research	5
FMST 203	Feminist Pedagogies	5
FMST 207	Topics in Queer/Race Studies	5
FMST 211	Sexuality, Race, and Migration in the Americas	5
FMST 212	Feminist Theory and the Law	5

SOCY 245	Feminist Theory	5
SOCY 249	Feminisms and Cultural Politics	5
SOCY 255	Engaging Cultural Studies	5
SOCY 264	Science, Technology, and Medicine	5

Writing, Research and/or Teaching Requirements

The student must prepare a significant piece of writing in the area of feminist studies. This writing may be a master’s essay, qualifying examination essay, or a chapter of the doctoral dissertation.

[Optional Catchall]

Queer and Sexuality Studies

Scholarship pertaining to the critical study of gender and sexuality can be found across a broad range of departments and programs at UCSC. This presence is manifested in a diverse faculty, in course offerings, and in research programs. Courses with queer content can be found across a broad range of departments, programs, and colleges at UCSC.

For more specialization, programs and departments such as Feminist Studies and Literature have sufficient flexibility to allow students to design a course of study within those majors to explore these interests. For students who prefer to take a more self-directed approach, there is the option of designing an individual major.

The Lionel Cantú GLBTI Resource Center serves as a clearinghouse for queer activities on the UCSC campus. Each quarter, the center prepares a list of all course offerings with queer content. Information is available at the Lionel Cantú Queer Center website or via e-mail to queer@ucsc.edu.

You could contact the following faculty for more information (this is not an exhaustive list): Anjali Arondekar (Humanties), Carla Freccero (Literature, History of Consciousness), Irene Gustafson (Film and Digital Media), Marcia Ochoa (Theater Arts, Performance, Play and Design and Critical Race and Ethnic Studies). Additional faculty contacts: Julie Bettie (Sociology), Benjamin Carson (Music), Sheila Crane (History of Art and Visual Culture), Jody Greene (Literature,), Herbert Lee (Applied Mathematics and Statistics), Peter Limbrick (Film and Digital Media), Catherine S. Ramírez (Latin American and Latino Studies), Jenny Reardon (Sociology), Daniel Selden (Literature), Elizabeth Stephens (Art).

Please contact the feminist studies program at fmstad@ucsc.edu for information about course offerings and resources.

UNDERGRADUATE PROGRAM

History is the stories humans tell about the past. For professional historians, those stories are based on evidence that is carefully collected and rigorously interpreted. Both the evidence and interpretation are passionately debated in the classroom, in articles and books, and in the public sphere. This makes history a dynamic enterprise. Students of history ask new questions, find new evidence, incorporate more voices, and reconsider old assumptions. Studying history enriches our understanding of the world by deepening our knowledge of the past and by pushing us to ask new questions that provide insight into our own time. Our History Department is committed to helping students learn to think historically, which entails asking not just what happened, but why it happened the way it did.

Thinking historically cultivates the empathy and imagination necessary to understand multiple perspectives on events both past and present.

It is impossible to understand the world we inhabit, including its complex global conflicts, climatic transformations, and fundamental shifts in understandings of individual identity, without history. Yet, as much as history can illuminate the present, its study also requires recognizing that often, "the past is a foreign country," where words, ideas, and even bodies themselves operate on radically unfamiliar terms. Our department's strengths in transnational, gender, environmental, cultural, and social history, including critical race and ethnic studies, enable students to engage in a variety of approaches to studying history.

This training equips students to be engaged citizens and prepares them for a wide range of careers. History majors develop skills in critical reading, effective research, analytical thinking, and clear, persuasive communication. Such skills are the essential foundation for jobs directly connected with the field, like teaching, research, and working in public history venues such as museums, archives, and libraries. These skills are also invaluable to careers in law, business, government, foreign service, management, publishing, journalism, social media, and many other areas. The ability to identify and access salient information, evaluate it critically, and use it to engage in constructive debate is essential for navigating a complex, dynamic, and global world.

Greek

The History Department offers instruction in elementary ancient Greek. It consists of a two-course sequence, GREE 1 and GREE 2, that begins in the fall quarter only. Students interested in Greek literature should see the course listings under Literature. Those interested in ancient studies should see the program description for ancient studies (p. 179).

Campus Language Laboratories and Placement Exams

No placement examination is required for entry into GREE 1. Contact the History Department for more information about these topics.

Latin

The History Department offers instruction in elementary Latin. It consists of a two-course sequence, LATN 1 and LATN 2, that begins in the fall quarter only. Students interested in Latin literature should see the course listings under Literature. Those interested in ancient studies should see the program description for ancient studies (p. 179).

Campus Language Laboratories and Placement Exams

No placement exam is required for entry into LATN 1. Contact the History Department for more information about these topics.

GRADUATE PROGRAM

The Ph.D. program in history at UCSC emphasizes an interdisciplinary and cross-cultural approach to historical studies. The History Department offers a rigorous program of instruction and independent work that trains students in the techniques of original historical research and equips them to teach university-level courses in history. The department only admits those highly motivated students who are most qualified to pursue advanced studies in history. The department also only admits those applicants who can best benefit from the specific strengths of our faculty. Just as the work of most professional historians centers around research and teaching, training in these areas constitutes the two essential poles of the graduate program in history.

HISTORY B.A.

Information and Policies

Introduction

History is about the past, but it is also about understanding the world we live in today. Our faculty seek to understand and help you understand how the challenges that confront us today like economic inequality, environmental degradation, and racism developed and changed over time. We also explore the patterns of social movements and political transformation that help us understand how people change the world.

Students often think of studying history as a matter of memorizing names and dates. While having a command of basic facts is important, college-level study of history shifts the focus to learning how to ask illuminating questions about the past. History majors at the University of California, Santa Cruz, cultivate a broad understanding of human history across time and space and develop deep knowledge of a particular region of the world. At the same time, they learn how to ask transformative questions, develop their ability to answer them through effective research, and convey their ideas clearly and persuasively through strong communication skills.

Students and their parents alike often express the sentiment that history is fascinating, but sometimes raise questions about its practicality as a college major. However, substantial research demonstrates that history majors thrive in their careers, and employers often express a need for the skills that studying history instills. A history major isn't just fascinating; it's a path to success. History majors develop skills in critical reading, effective research, analytical thinking, and clear, persuasive communication. Such skills are the essential foundation for jobs directly connected with the field, like teaching, research, and working in public history venues such as museums, archives, and libraries. These skills are also invaluable to careers in law, business, government, foreign service, management, publishing, journalism, social media, and many other areas. The ability to identify and access salient information, evaluate it critically, and use it to engage in constructive debate is essential for navigating a complex, dynamic, and global world. Visit our website for selected reports on the value of the history major.

Program Learning Outcomes

Students who complete the history major graduate with the following:

History

- Understanding of a basic narrative of historical events in a specific region of the world.

Critical Reading

- The ability to distinguish primary and secondary sources.
- The ability to evaluate historical ideas, arguments, and points of view.
- The ability to evaluate competing interpretations and multiple narratives of the past.

Research and Evidence

- The ability to gather and assess primary historical evidence.
- The ability to compile a bibliography.

Communication

- The ability to present clear and compelling arguments, based on critical analysis of diverse historical sources, and effectively communicate your interpretations in written essays and/or other media.

- The ability to develop a research question and complete a well-supported piece of historical writing about it.

Scope and Thematics

- Through completion of a combination of courses, become familiar with the history of:
    - The pre-modern world
    - The modern world
    - Transnational or transcultural circulations of ideas, people, and material goods
    - One or more national histories
    - Regional comparisons

Academic Advising for the Program

Academic advising is an important part of your undergraduate education. The History Department undergraduate program coordinator can help you clarify your educational goals, select classes that complement your academic interests and develop an individualized plan of study. The undergraduate program coordinator can also help you identify faculty mentors and enrichment opportunities within and related to your major.

Advising is held in Humanities 1, room 201. Undergraduate advising email contact: historyundergrad@ucsc.edu

Transfer students are encouraged to additionally consult the "Transfer Information and Policy" information included below.

Getting Started in the Major: Frosh

This major is not highly sequential or course intensive. Although it is advisable to begin taking courses toward the major in the first year, it is not required. Four-year students considering the history major are encouraged to enroll in at least one lower-division history course during their first year. These offer a broad sweep of a historical period and give students a sense of how studying history in college differs from studying it in high school. Students are encouraged but not required to take three lower-division history courses, one from each of the three regions of concentration, during the first year. Taking courses from each of the three regions of concentration during the first year helps students decide on a concentration as their area of focus and clarify their educational goals (see the Regions of Concentration section below for more information).

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to apply in this major are not required to complete specific major preparation courses for consideration of admission to UC Santa Cruz.

Transfer students are advised to complete the Intersegmental General Education Transfer Curriculum (IGETC) or UC Santa Cruz general education requirements in preparation for transfer to UCSC. Transfer course agreements and articulation between the University of California and California community colleges can be found on the ASSIST.ORG website. Prospective transfer students may also wish to consult the UC Transfer Pathway for History.

Transfer students are enthusiastically encouraged to study history at UC Santa Cruz. Transfer students can finish all of the UC Santa Cruz history major requirements within two years, even if they haven't completed any preparatory history coursework prior to transferring. For additional information for transfer history majors please visit this transfer student information page.

Getting Started in the Major: Transfer Students

Transfer students are expected to complete HIS 100 within the first two quarters after transferring to UC Santa Cruz.

Transfer students are strongly encouraged to meet with the History Department undergraduate program coordinator before the end of their first quarter at UCSC. Transfer students are encouraged to declare their major during Slug Orientation!

Major Qualification Policy and Declaration Process

Major Qualification

The history major has no qualification. All students, including transfers, are eligible to pursue this major, even if they did not list history on their UC Santa Cruz application. It is advisable to complete at least one lower-division history course (1–99) before declaring, but it is not required. Students who plan on majoring in history are encouraged to declare as soon as possible (see information about declaring below). Students should submit a petition to declare before or by their declaration deadline quarter.

How to Declare a Major

To declare the history major students should create a history major academic plan and meet with the History Department undergraduate program coordinator. For planning documents and detailed major declaration instructions visit the declaring the history major webpage.

Letter Grade Policy

History majors may take up to two of their history major courses Pass/No Pass, with the exception of the Senior Comprehensive Requirement, provided students are in compliance with the university's Pass/No Pass regulation.

Optional Catchall

History Senior Check-in

In addition to all coursework, history majors must complete a senior check-in during the first quarter of their senior year. Students who do not submit their senior check-in for review may have their graduation date delayed. Please consult the department website for a more detailed description.

Course Substitution Policy

History majors must complete a minimum of five regularly scheduled history courses plus the comprehensive requirement taught by members of the UC Santa Cruz history faculty. Intensive history majors must complete a minimum of eight. Subject to the limits indicated in parentheses, courses from the following categories may also be applied to the history major:

- Courses completed at a California community college or other domestic university (limit of three)
- Education Abroad Program (limit of three)
- UCDC (limit of two)
- UC in Sacramento (limit of two)
- Interdisciplinary Coursework/upper-division courses taken in another UC Santa Cruz department (limit of one)
- Independent and field studies (limit of one)

For information and instructions on how to petition courses from the above categories, visit the History Department webpage on course substitutions.

Study Abroad

All history students are encouraged to consider studying abroad. UC Education Abroad Program (EAP) offers students an opportunity to study abroad in more than 40 countries with more than 150 program options. A variety of academic programs are available: language and culture programs facilitate language acquisition; "focus" programs allow students to concentrate on a plan of study applicable to their major. More than half of all EAP programs are in English, and there are traditional semester and yearlong program options. Subject to the limitations described above under "Course Substitution Policy," up to three courses in history completed through EAP may be applied toward major requirements. Consult the History Department website and speak with the undergraduate program coordinator for further details.

Honors

Honors are awarded to the top 10-15 percent of graduating students per quarter; highest honors may be granted to approximately the top five percent. Honors are determined by the Undergraduate Education Committee in consultation with the History Department faculty. The department considers each student's GPA in the history major, supplemented when appropriate by an assessment of work in the senior capstone course or honors thesis preparation. The history major GPA is calculated based upon all history courses attempted at UC Santa Cruz; grades from courses taken outside of the department will not be calculated into a student's history major GPA, even in cases when the student is allowed to use said courses toward their history major degree requirements. Summer, fall, and winter graduates will be reviewed at the end of each of their respective quarters. Spring graduates will be reviewed using their earned history major GPAs as of the spring announcement of candidacy deadline.

Interdisciplinary Coursework

The History Department encourages its majors to take upper-division courses in disciplines related to history, including sociology, literature, community studies, politics, Latin American and Latino studies, and others. Students may petition to substitute one such appropriate upper-division course for a history elective. At least 50 percent of the readings and written work in these courses must be historical in nature. Consult the History Department website and speak with the undergraduate program coordinator for further details.

These courses are subject to the limitations described above under the "Course Substitution Policy" section.

Regions of Concentration

The History Department curriculum and major is broadly organized along three regions of concentration. Each history major identifies one of three geographic regions of concentration as their primary area of focus:

The Americas and Africa

The Americas and Africa caucus invites students to explore the complex history of intercultural encounter, exchange, and conflict that connects South, Central, and North America and the diverse nations of Africa. Courses in this concentration locate these regions within larger global movements of people, goods, and ideas. Major topical themes in the concentration include Indigenous history, African diaspora, immigration, gender, labor, religion, social movements, politics, and critical history of race. Courses in this concentration extend from the colonial era to the modern day and reflect interdisciplinary approaches to historical practice.

Asia and the Pacific

The Asia and Pacific concentration—which encompasses East, South, and Central Asia along with the Pacific and the Indian Ocean—offers students the opportunity to explore gender, class, race, and ethnicity through the examination of premodern and modern empires and nations, their borders and peripheries, and their flows of people, materials, and ideas. Major topics of focus include the early modern and modern eras, Western and Japanese imperialisms, labor and other major social movements, socialist transformations, and cultural, intellectual, and science history.

Europe and the Mediterranean World

The Europe and the Mediterranean World concentration offers students the opportunity to explore the histories of Europe, North Africa, and the Middle East, and connections between these places and the larger world. We look at the continual flow of ideas, people, and material goods across this region, from the earliest states in the ancient world until today. We examine how empires, colonialism, religion, culture, the environment, and social and economic forces, including the development of capitalism and of the nation-state, shaped

these interactions in profound ways. Collectively, we trace more than 5,000 years of intersecting histories, examining linkages and conflicts forged by geography, trade, war, migration, imperial aspirations, colonial violence, religious and ethnic minorities, and struggles for liberation.

The caucus includes intensive study of the histories of Europe, Russia, North Africa and the Middle East, as well as imperial, colonial, and transnational histories that trace the changing relations among these places. Major periods and areas of focus include the ancient and medieval worlds, oceanic empires in the early modern period (1450-1800 A.D.), modern imperialism and colonialism, and decolonization and postcolonial states in the 20th century.

Optional Catchall

General History Major

Course Requirements

A minimum of 12 unique courses are required for the major, of which no more than four may be lower-division. At least eight of the 12 courses must be 5-credit upper-division courses, including the comprehensive requirement.

Distribution requirements. Among the 12 courses required for the major, at least three must meet chronological distribution requirements. One must be set before 600 C.E., and two must be set in periods prior to the year 1800 C.E.

Students are encouraged to reference the History Course List to determine how history courses may apply to the different geographic regions of concentration and the chronological distribution requirements. Students can also consult the department's website for a sortable version of this information.

Region of Concentration (5 Courses, Plus 1 Comprehensive Requirement)

Each history major identifies one of three geographic regions of concentration as their primary area of focus:

- The Americas and Africa
- Asia and the Pacific
- Europe and the Mediterranean World

Lower-Division Survey (1 Course)

At least one lower-division survey course within their chosen region of concentration. The survey course is one of the four allowed lower-divisions.

Americas/Africa

HIS 10A	United States History to 1877	5
HIS 10B	United States History, 1877 to 1977	5
HIS 11A	Latin America: Colonial Period	5
HIS 11B	Latin America: National Period	5
HIS 12	Introduction to Latino American History	5

Asia/Pacific

HIS 40A	Early Modern East Asia	5
HIS 40B	The Making of Modern East Asia	5
HIS 44	Modern South Asia, 1500 to Present	5

Europe/Mediterranean World

HIS 41	The Making of the Modern Middle East	5
HIS 58	From Pirates to Refugees: The History of the Modern Mediterranean	5
HIS 65B	Plagues, Peasants, and Pirates: Late Medieval Europe, 1000-1500	5
HIS 70A	Modern European History, 1500-1815	5
HIS 70B	Modern European History, 1815-present	5
HIS 74	Introduction to Jewish History and Cultures	5
HIS 74A	Introduction to Middle Eastern and North African Jewish History: Ancient to Early Modern	5
HIS 74B	Introduction to Middle Eastern and North African Jewish History, 1500-2000	5

Transfer coursework may or may not apply toward the survey course requirement; consult with the history undergraduate program coordinator.

Additional Concentration Courses (4 Courses)

Four additional courses in the region of concentration, at least three of which must be 5-credit upper-division courses.

Comprehensive Requirement

One comprehensive requirement: All students must complete either a research seminar (HIS 190 series, HIS 194 series, or HIS 196 series), or a senior thesis (HIS 195A and HIS 195B) in their area of concentration. Detailed information on the comprehensive requirement can be found below.

Breadth Requirements (4 Courses)

Two courses from each of the remaining two regions of concentration.

At least one of the four breadth courses must be a 5-credit upper-division course. If two lower-division courses (including the survey) are applied to the region of concentration, then at least two of the four breadth courses must be 5-credit upper-division courses.

Historical Skills and Methods (1 Course)

Students who enter UC Santa Cruz as frosh are expected to complete HIS 100 by the end of their second year. Transfer students are expected to complete HIS 100 no later than their second term at UC Santa Cruz. HIS 100 is a prerequisite for all history research seminars (HIS 190 series, HIS 194 series, and HIS 196 series).

HIS 100	Historical Skills and Methods	5

Elective (1 Course)

One 5-credit upper-division history course from any of the three regions of concentration.

Language Recommendation

Proficiency in a foreign language is strongly recommended for all history students and is essential for those who plan to pursue graduate studies in history. Many Ph.D. programs in history require applicants to read one or two languages besides English. The University of California Education Abroad Program (EAP) is appropriate for history majors as a means to both enhance language skills and take history courses elsewhere.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. History students fulfill the upper-division disciplinary communication (DC) requirement by completing a comprehensive requirement in their region of concentration. Students may complete a research seminar (one quarter: HIS 190 series, HIS 194 series, or HIS 196 series) or a thesis (two quarters: courses HIS 195A and HIS 195B). Please consult the department website for a more detailed description of these courses and refer to the updated DC information in the disciplinary communication chart.

Comprehensive Requirement

History majors may satisfy the UC Santa Cruz comprehensive requirement in one of two ways:

Research Seminar (one quarter: 190 series, 194 series, or 196 series)

In courses designated as History 190, 194, or 196, students participate in a small discussion-based senior research seminar, which provides an opportunity to acquire experience in practical research skills while developing a research project culminating in the writing of a substantial research paper. Students must complete HIS 100 before taking a research seminar. Seminars require submission of written work totaling approximately 25 pages and satisfy the disciplinary communication (DC) general education requirement. Seminars must be taken in the student's chosen area of concentration to qualify as their comprehensive requirement.

Thesis (Two Quarters: HIS 195A, Thesis Research and HIS 195B, Thesis Writing)

Before undertaking an independent thesis, students must complete one research seminar in their region of concentration. In extraordinary circumstances, students may petition the History Department for an exception to this requirement. The successful completion of both HIS 195A and HIS 195B will satisfy the comprehensive and disciplinary communication (DC) requirements for students who are granted an exception to the seminar requirement.

Students who want to write a thesis need to begin planning well in advance. Students must first find a faculty thesis adviser and a second reader to sponsor and advise on the thesis project. Once a thesis adviser and a second reader have been secured and a topic defined, students must submit a thesis proposal to the department for consideration. Proposals are due at least one quarter before the start of the research quarter. Completed theses must be at least 40 pages in length and are due on the last day of the writing quarter.

Please consult the department website for more information about the thesis option.

Research Pathways

The history program encourages its students to carve out their own research pathways. Pathways can be straight or meandering, cover one area exhaustively or take a student across broad stretches. Even though you are required to select one of three geographic regions—the Americas and Africa, Asia and the Pacific, Europe and the Mediterranean World—as your primary area of focus, we encourage you to also think about your degree progress along thematic lines: religion, social movements, science and environment, and gender, to name a few. Faculty and staff advisers will assist students who choose this option with their course selection.

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Each of these planners indicate only one of the many possibly pathways through the major. Individual student plans will vary. For assistance developing your history major plan, meet with the history undergraduate program coordinator.

Sample Four Year Plan

	Fall	Winter	Spring	Summer
Entering				College 1A Summer Edge (optional)

1st (frosh)	Lower-division survey, concentration	Lower-division breadth area No. 1 WRIT 1/WRIT 1E (if needed)	Lower-division breadth area No. 2	
2nd (soph)	Lower-division concentration	HIS 100 WRIT 2*	Upper-division breadth area No. 1	
3rd (junior)	Upper-division concentration	Upper-division breadth area No. 2	Upper-division concentration	
4th (senior)	Upper-division concentration	Exit seminar, concentration	Upper-division elective (any)	

Of the 12 courses listed, one must be set before 600 C.E., and two more must be set in periods prior to the year 1800 C.E.

In addition to the courses above, students will need to take courses that satisfy the Math and Formal Reasoning (MF) and Composition (C) general education requirements, along with any other general education requirements that are not satisfied by the classes they have chosen for the major. Most lower-division history courses satisfy the Cross-Cultural Analysis (CC) or Ethnicity and Race (ER) general education requirements. HIS 100 satisfies the Textual Analysis and Interpretation (TA) general education requirement.

*WRIT 2 should be taken in or before spring quarter of the second year.

Sample Three Year Plan

This plan is appropriate for students admitted to UC Santa Cruz as freshman who are considering the Three Year Accelerated Pathways program.

	Fall	Winter	Spring	Summer
Entering				College 1A Summer Edge (optional)
1st Year	Lower-division survey, concentration	Lower-division breadth area No. 1 WRIT 1/WRIT 1E (if needed)	Lower-division breadth area No. 2	
2nd Year	Lower-division concentration WRIT 2*	HIS 100 Upper-division concentration	Upper-division breadth area No. 1 Upper-division concentration	
3rd Year	Upper-division concentration	Exit seminar, concentration	Upper-division breadth area No. 2 Upper-division elective (any)	

*WRIT 2 should be taken in or before spring quarter of the second year.

Of the 12 courses listed, one must be set before 600 C.E., and two more must be set in periods prior to the year 1800 C.E.

Sample Transfer Plan

	Fall	Winter	Spring	Summer
Entering				KRSG 1T

				Summer Edge (optional)
Pre-Transfer	Lower-division survey, concentration	Lower-division breadth area No. 1	Lower-division breadth area No. 2	
1st (junior)	HIS 100	Lower-division concentration	Upper-division concentration	
	Upper-division concentration	Upper-division breadth area No. 1	Upper-division breadth area No. 2	
2nd (senior)	Upper-division concentration	Exit seminar, concentration	Upper-division elective (any)	

Of the 12 courses listed, one must be set before 600 C.E., and two more must be set in periods prior to the year 1800 C.E.

This planner assumes that a student has completed most of their general education requirements before coming to UC Santa Cruz. Students from California community colleges are advised to complete the Intersegmental General Education Transfer Curriculum (IGETC) in preparation for transfer to UC Santa Cruz.

Intensive History Major

The intensive major track offers history majors a pathway to enrich their study of history, refine their skills in writing and research, and receive a designation on their transcripts that signals their ambition and accomplishment to potential employers and graduate schools. All history majors are eligible to declare the intensive track, including junior transfers. If a student attempts but does not complete the intensive track, they may still graduate with a standard history degree, provided the appropriate major coursework has been completed.

Course Requirements

A minimum of 15 unique courses are required for the intensive history major, of which no more than four may be lower-division. At least 11 of the 15 courses must be 5-credit upper-division courses, including the comprehensive requirement. The intensive major also requires one year or equivalent of language study (see below).

Distribution requirements. Among the 15 courses required for the intensive major, at least three must meet chronological distribution requirements. One must be set before 600 C.E., and two must be set in periods prior to the year 1800 C.E.

Students are encouraged to reference the History Course List to determine how history courses may apply to the different geographic regions of concentration and the chronological distribution requirements. Students can also consult the department's website for a sortable version of this information.

Region of Concentration (5 Courses, Plus 1 Comprehensive Requirement)

Each history major identifies one of three geographic regions of concentration as their primary area of focus:

- The Americas and Africa
- Asia and the Pacific
- Europe and the Mediterranean World

Lower-Division Survey (1 Course)

At least one lower-division survey course within their chosen region of concentration. The survey course is one of the four allowed lower-divisions.

Americas Africa

HIS 10A	United States History to 1877	5
HIS 10B	United States History, 1877 to 1977	5
HIS 11A	Latin America: Colonial Period	5
HIS 11B	Latin America: National Period	5
HIS 12	Introduction to Latino American History	5

Asia Pacific

HIS 40A	Early Modern East Asia	5
HIS 40B	The Making of Modern East Asia	5
HIS 44	Modern South Asia, 1500 to Present	5

Europe Mediterranean

HIS 41	The Making of the Modern Middle East	5
HIS 58	From Pirates to Refugees: The History of the Modern Mediterranean	5

HIS 65B	Plagues, Peasants, and Pirates: Late Medieval Europe, 1000-1500	5
HIS 70A	Modern European History, 1500-1815	5
HIS 70B	Modern European History, 1815-present	5
HIS 74	Introduction to Jewish History and Cultures	5
HIS 74A	Introduction to Middle Eastern and North African Jewish History: Ancient to Early Modern	5
HIS 74B	Introduction to Middle Eastern and North African Jewish History, 1500-2000	5

Transfer coursework may or may not apply toward the survey course requirement; consult the history undergraduate program coordinator.

Additional Concentration Courses (4 Courses)

Four additional courses in the region of concentration, at least three of which must be 5-credit upper-division courses.

Comprehensive Requirement

One comprehensive requirement: All students must complete either a research seminar (HIS 190 series, HIS 194 series, or HIS 196 series), or a senior thesis (HIS 195A and HIS 195B) in their area of concentration. Detailed information on the comprehensive requirement can be found below.

Breadth Requirements (4 Courses)

Two courses from each of the remaining two regions of concentration.

At least one of the four breadth courses must be a 5-credit upper-division course. If two lower-division courses (including the survey) are applied to the region of concentration, then at least two of the four breadth courses must be 5-credit upper-division courses.

Historical Skills and Methods (1 Course)

Students who enter UC Santa Cruz as frosh are expected to complete HIS 100 by the end of their second year. Transfer students are expected to complete HIS 100 no later than their second term at UC Santa Cruz. HIS 100 is a prerequisite for all history research seminars (HIS 190 series, HIS 194 series, and HIS 196 series).

HIS 100	Historical Skills and Methods	5

Electives (4 Courses)

Four 5-credit upper-division history courses from any of the three regions of concentration.

Advanced Research Requirement

Three of the 15 courses required for the intensive major must require advanced historical research. Advanced research seminars (HIS 190 series, HIS 194 series, or HIS 196 series), the senior thesis (HIS 195A and HIS 195B) and/or independent studies (HIS 199) conducted under faculty supervisor may satisfy this requirement. At least one seminar or senior thesis must be completed in the student's chosen region of concentration to ensure the UC Santa Cruz comprehensive and disciplinary communication (DC) requirements are satisfied.

Language Requirement

Intensive majors must pursue training in a second language by completing three quarters of college-level language study (or equivalent) in a single, non-English modern or ancient language (e.g. SPAN 1–SPAN 3, ITAL 2–ITAL 4, etc.). Students with prior training in a second language are advised to complete a language placement exam to determine the appropriate level of language course instruction. With prior approval by the undergraduate director, the language training requirement may be satisfied by at least one quarter study abroad with foreign language instruction. Students do not necessarily need to pursue a language related to their region of concentration, but are encouraged to do so when possible. After consultation with the undergraduate director, students can petition for alternative ways by which to satisfy this requirement.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. History students fulfill the upper-division disciplinary communication (DC) requirement by completing a comprehensive requirement in their region of concentration. Students may complete a research seminar (one quarter: HIS 190 series, HIS 194 series, or HIS 196 series) or a thesis (two quarters: courses HIS 195A and HIS 195B). Please consult the department website for a more detailed description of these courses and refer to the updated DC information in the disciplinary communication chart.

Comprehensive Requirement

History majors may satisfy the UC Santa Cruz comprehensive requirement in one of two ways:

Research Seminar (one quarter: 190 series, 194 series, or 196 series)

In courses designated as History 190, 194, or 196, students participate in a small discussion-based Senior Research Seminar, which provides an opportunity to acquire experience in practical research skills while developing a research project culminating in the writing of a substantial research paper. Students must complete HIS 100 before taking a research seminar. Seminars require submission of written work totaling approximately 25 pages and satisfy the disciplinary communication (DC) general education requirement. Seminars must be taken in the student's chosen area of concentration to qualify as their comprehensive requirement.

Thesis (Two Quarters: HIS 195A, Thesis Research and HIS 195B, Thesis Writing)

Before undertaking an independent thesis students must complete one research seminar in their region of concentration. In extraordinary circumstances, students may petition the History Department for an exception to this requirement. The successful completion of both HIS 195A and HIS 195B will satisfy the comprehensive and disciplinary communication (DC) requirements for students who are granted an exception to the seminar requirement.

Students who want to write a thesis need to begin planning well in advance. Students must find a faculty thesis adviser and a second reader to sponsor and advise on the thesis project. Once a thesis adviser and a second reader have been secured and a topic defined, students must submit a thesis proposal to the department for consideration. Proposals are due at least one quarter before the start of the research quarter. Completed theses must be at least 40 pages in length and are due on the last day of the writing quarter.

Please consult the department website for more information about the thesis option.

Research Pathways

The history program encourages its students to carve out their own research pathways. Pathways can be straight or meandering, cover one area exhaustively or take a student across broad stretches. Even though you are required to select one of three geographic regions—the Americas and Africa, Asia and the Pacific, Europe and the Mediterranean World—as your primary area of focus, we encourage you to also think about your degree progress along thematic lines: religion, social movements, science and environment, and gender, to name a few. Faculty and staff advisers will assist students who choose this option with their course selection.

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Each of these planners indicates only one of the many possibly pathways through the major. Individual student plans will vary. For assistance developing your history major plan, meet with the undergraduate program coordinator.

Sample Intensive Major Four-Year Plan

	Fall	Winter	Spring	Summer
Entering				College 1A Summer Edge (optional)
1st (frosh)	Lower-division survey, concentration Language 1 College 1	Lower-division breadth area No. 1 Language 2 WRIT 1/WRIT 1E (if needed)	Lower-division breadth area No. 2 Language 3	
2nd (soph)	Lower-division concentration WRIT 2*	HIS 100	Upper-division breadth area No. 1	
3rd (junior)	Upper-division concentration	Upper-division breadth area No. 2 Upper-division concentration	Upper-division concentration	
4th (senior)	Exit seminar, concentration	Research course Upper-division elective (any)	Research course Upper-division elective (any)	

Of the 12 courses listed, one must be set before 600 C.E., and two more must be set in periods prior to the year 1800 C.E.

In addition to the courses above, students will need to take courses that satisfy the Math and Formal Reasoning (MF) and Composition (C) general education requirements, along with any other general education requirements that are not satisfied by the classes they have chosen for the major. Most lower-division history courses satisfy the Cross-Cultural Analysis (CC) or Ethnicity and Race (ER) general education requirements. HIS 100 satisfies the Textual Analysis and Interpretation (TA) general education requirement.

*WRIT 2 should be taken in or before spring quarter of the second year.

Sample Intensive Major Transfer Plan

	Fall	Winter	Spring	Summer
Entering				KRSG 1T Summer Edge (optional)
Pre-Transfer	Lower-division concentration	Lower-division breadth area No. 1	Lower-division breadth area No. 2	
1st (junior)	HIS 100	Lower-division concentration	Upper-division concentration	
	Upper-division concentration	Upper-division breadth area No. 1	Upper-division breadth area No. 2	
	Language 1	Language 2	Language 3	
2nd (senior)	Upper-division concentration	Research course	Research course	
	Exit seminar, concentration	Upper-division elective (any)	Upper-division elective (any)	

Of the 12 courses listed, one must be set before 600 C.E., and two more must be set in periods prior to the year 1800 C.E.

This planner assumes that a student has completed most of their general education requirements before coming to UC Santa Cruz. Students from California community colleges are advised to complete the Intersegmental General Education Transfer Curriculum (IGETC) in preparation for transfer to UC Santa Cruz.

HISTORY MINOR

Students whose major area of study is not history may nonetheless find that a minor in history makes an invaluable contribution to their studies.

Course Requirements

Eight history courses are required, five of which must be 5-credit upper-division courses. There are no distribution requirements, and there is no comprehensive requirement for the minor. Students are allowed to complete up to two of their minor courses for pass/no pass grades.

Lower-Division Courses

Three 5-credit lower-division (HIS 1–HIS 99) and/or 5-credit upper-division (HIS 100–HIS 199) history courses.

Upper-Division Courses

Five 5-credit upper-division (HIS 100–HIS 199) history courses.

ANCIENT STUDIES B.A.

Information and Policies

Introduction

Ancient studies at the University of California, Santa Cruz, combines features of traditional programs, such as solid grounding in the ancient languages, with innovative, interdisciplinary approaches. While the core of the program is focused on courses in the ancient Greek and Latin languages, the program also encompasses courses in history, the history of art and visual culture, literature, philosophy, politics, and theater arts, from the Bronze Age through the Early Christian era. Recent offerings have included everything from introductory surveys in ancient mythology and Greek and Roman history, to advanced courses in women and gender in Ancient Egypt and modern ancient drama. Students are encouraged to study the literary and material artifacts of Greece and Rome within the larger context of ancient Mediterranean and Near Eastern cultures.

The ancient studies program provides the nurturing atmosphere and personal attention associated with a small liberal arts college, in the context of a large university. We offer students an opportunity to work in small classes with a distinguished and dedicated teaching faculty and excellent fellow students. Public lectures, guest speakers, and frequent social events bring students and faculty together and strengthen the program.

Ancient studies students have the opportunity to give close, sustained attention to an area of study, from an almost unlimited variety of perspectives. For example, students with an interest in contemporary philosophy and political theory might want to concentrate in Greek, taking upper-division courses in Greek, history, philosophy, and politics. Students with an interest in European literature might want to concentrate in Latin, taking upper-division courses in Latin, history, and literature in translation. Students planning on pursuing a classics degree at the Ph.D. level should concentrate most of their coursework in the Greek and Latin languages themselves.

Ancient studies is excellent preparation for further study in a wide variety of graduate and professional programs including history, art history, comparative literature, English, philosophy, law, education, and publishing.

Program Learning Outcomes

Students who complete the ancient studies major graduate with the following knowledge and skills:

Language

- Competence in one or more ancient languages. At present offerings include Greek and Latin (full curriculum offered yearly). Majors have also taken Biblical Hebrew and Hieroglyphics (offered less often).

Interdisciplinary Exposure

- Familiarity with one or more of the disciplinary approaches represented by the faculty in the program, as well as other relevant approaches in the division and the university. Courses at present credited for the major include (but are not limited to) offerings in: history, literature, philosophy, archaeology, art history, and theater arts. For the skills and outcomes fostered by these disciplines see the reports of the relevant departments.

Collaboration

- Provide constructive and effective critiques of each other’s work.
- Complete a shared research project.

Research, Critical Reading, Writing

- Gather and engage critically with primary sources.
- Evaluate competing interpretations and multiple narratives.
- Compile a bibliography.
- Present clear and compelling arguments, based on critical analysis of diverse historical sources, and effectively communicate your interpretations in written essays and/or other media.

Scope and Thematics

- Through completion of a combination of courses, become familiar with the ancient cultures of:
    - the western Mediterranean
    - the eastern Mediterranean
    - the Near East
- Comparative study: whether of diverse ancient cultures or of ancient and later cultures
- Reception: ancient culture as understood by later traditions

Academic Advising for the Program

The ancient studies program is administered by the Department of History. Students in this program receive advising support from the history undergraduate program coordinator.

Transfer students are encouraged to additionally consult the "Transfer Information and Policy" information included below.

Getting Started in the Major: Frosh

This is a moderately course-intensive and/or sequential program, and students who intend to pursue ancient studies should begin taking classes for the major in their first or second year at UC Santa Cruz.

GREE 1 and LATN 1 are only offered in the fall quarter. Students seeking their degree in four years should complete the introductory sequence in elementary ancient Greek or Latin language no later than their second year.

Students with prior knowledge of ancient Greek or Latin are advised to consult with the ancient studies faculty to determine if they have satisfied any of the elementary language course requirements.

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to apply in this major are not required to complete specific major preparation courses for consideration of admission to UC Santa Cruz.

Transfer students from California Community Colleges are encouraged to complete the Intersegmental General Education Transfer Curriculum (IGETC) or UC Santa Cruz general education requirements in preparation for transfer to UC Santa Cruz.

Some background in history and in literary analysis and interpretation is desirable, but not essential. Since this is an interdisciplinary major, preparatory work in art history, history, literature, philosophy, or politics, depending on the student's interests, may also be useful.

Getting Started in the Major: Transfer Students

Transfer students entering at the junior level can readily complete the ancient studies major within two years, provided that they complete GREE 1 or LATN 1 during their first quarter of enrollment at UC Santa Cruz. These courses are only offered in the fall quarter. Transfer applicants seeking to enter in winter quarter will be screened by the program to confirm prior knowledge of ancient Greek or Latin. Please contact the ancient studies director at clstdirector@ucsc.edu to schedule this screening.

Transfer students are strongly encouraged to meet with the history undergraduate program coordinator before their first quarter of enrollment at UCSC.

Students with prior knowledge of ancient Greek or Latin are advised to consult with the ancient studies faculty to determine if they have satisfied any of the elementary language course requirements.

GREE 1	Elementary Ancient Greek	5
LATN 1	Elementary Latin	5

Major Qualification Policy and Declaration Process

Major Qualification

Ancient studies has no major qualification. Students should submit a petition to declare before or by their declaration deadline quarter.

While ancient studies does not have an official qualification policy, it should be noted that the major requires the successful completion of upper-division coursework in ancient Greek and/or Latin language literature. Students who are unable to successfully complete the introductory sequence in elementary ancient Greek or Latin language (or equivalent) will not be able to advance to the upper-division coursework required for this major.

All students, including transfers, are eligible to pursue this major, even if they did not list ancient studies on their UC Santa Cruz application.

Other Programs That May Be of Interest

Since ancient studies is an interdisciplinary field of study, many of the courses in this major are offered by other UC Santa Cruz departments. Students with an interest in the ancient world who would prefer to take courses in English are encouraged to consider the following majors and programs: history, history of art and visual culture, literature, philosophy, and politics.

How to Declare a Major

Students are permitted to declare the ancient studies major at any time but encouraged to do so only after they have successfully completed the lower-division sequence in elementary ancient Greek or Latin language (or equivalent):

1. Fill out a Ancient Studies Major Planning Worksheet. Include ancient studies courses you've completed, are currently taking, and plan on taking in the future.
2. Meet with the ancient studies academic advising coordinator to review and discuss your proposed plan of study. Obtain their signature on your worksheet.
3. Submit your approved Ancient Studies Major Planning Worksheet to the history undergraduate program coordinator for processing.

Letter Grade Policy

Students are allowed to complete up to two of their ancient studies major requirements for Pass/No Pass.

[Optional Catchall]

Course Substitution Policy

Double Majors and Major/Minor Combinations Policy

Study Abroad

We actively encourage our students to expand their horizons in interdisciplinary and international settings by taking advantage of the University of California Education Abroad Program (EAP). A quarter or year abroad may be seamlessly integrated into any ancient studies student's academic plan; up to three of the major or minor elective requirements may be completed abroad.

Honors

All students who announce candidacy during the academic year are reviewed for honors or highest honors in the major. The ancient studies faculty advisers determine honors based upon courses applied toward the ancient studies major. Performance in courses taken elsewhere and being transferred toward the major will be considered when applicable. The minimum standard applied is excellence in most courses for honors, and excellence in all courses for highest honors. Summer, fall, and winter graduates will be reviewed at the end of each of their respective quarters. Spring graduates will be reviewed as of the spring announcement of candidacy deadline.

[Optional Catchall]

Requirements and Planners

Course Requirements

The ancient studies major requires three lower-division courses (including two elementary language courses), nine 5-credit upper-division courses, and an additional two-credit upper-division seminar, CLST 197F, which is taken in the same quarter that the senior comprehensive examination is given (see Comprehensive Requirement section below for more information). These must include the following:

Lower-Division Courses

The lower-division sequence in elementary ancient Greek or Latin language (or equivalent):

	Either these courses	
GREE 1	Elementary Ancient Greek	5
GREE 2	Elementary Ancient Greek	5
	or these courses	
LATN 1	Elementary Latin	5
LATN 2	Elementary Latin	5

Ancient Studies Survey

One lower-division survey of ancient history or literature in translation:

HIS 5B	Cult, Church, Empire: History of Early Christianity, 0-431 C.E.	5

HIS 5C	The Bible in History, Culture, and Controversy	5
HIS 50	When Pharaohs Reigned: The History of Ancient Egypt	5
HIS 51	Pyramids of Earth: Religion and Symbol in the Ancient World	5
HIS 61	Classical Mythology	5
HIS 62A	Classical World: Greece	5
HIS 62B	Classical World: Rome	5
HAVC 50	Ancient Mediterranean Visual Cultures	5
HAVC 51	Greek Eyes: Visual Culture and Power in the Ancient Greek World	5
HAVC 55	Unclothed: The Naked Body from Antiquity to the Present	5
LIT 61M	Approaches to Classical Myth	5
LIT 61P	Introduction to Reading Poetry	5
LIT 61S	Sacred Texts	5
LIT 61X	Tragedy: Learning Through Suffering	5
LIT 80T	Practical Magic	5
LIT 80W	Captive Minds: The Literature of Pre-modern Slavery	5
LIT 81A	Homer's Odyssey	5
LIT 81D	The Prophet and the Qur'an	5
THEA 61A	Ancient and Medieval Drama	5

Upper-Division Courses

Three 5-credit upper-division courses in Greek (LIT 184A-LIT 184Z) and/or Latin literature (LIT 186A-LIT 186Z):

LIT 184A	Introduction to Greek Literature	5
LIT 184B	Greek Drama	5
LIT 184C	Greek Poetry	5
LIT 184D	Prose Authors	5
LIT 184E	Special Topics in Greek Literature	5
LIT 186A	Introduction to Latin Literature	5
LIT 186B	Roman Poetry	5
LIT 186C	Prose Authors	5
LIT 186D	Special Topics in Latin Literature	5

Electives

Six additional ancient studies 5-credit upper-division courses:

HIS 147A	History of Premodern India	5
HIS 150A	Emperors and Outcasts: Ancient Japan	5
HIS 159A	Cleopatra to Constantine: Greek and Roman Egypt	5
HIS 159B	Women and Gender in Ancient Egypt	5
HIS 159C	Temple and City: The Egyptian New Kingdom and the City of Thebes	5
HIS 159D	When Cities Were New: the Rise of Urbanism in the Ancient Near East and Mediterranean	5
HIS 160A	Athenian Democracy	5
HIS 160C	Topics in Greek History	5
HIS 161B	Topics in Roman History	5
HIS 163B	Genesis: A History	5
HIS 194S	Special Topics in Ancient Egyptian History	5
HIS 196S	Special Topics in Ancient History	5
HAVC 135F	Art of the Book in Western Europe 500-1600	5
HAVC 151	Greek Myths Antiquity to the Present	5
HAVC 152	Roman Eyes: Visual Culture and Power in the Ancient Roman World	5
HAVC 154	Byzantine Visual Culture: Politics and Religion in the Empire of Constantinople, 330-1453 A. C	5
HAVC 155	Constructing Cleopatra: Power, Sexuality, and Femininity Across the Ages	5
HAVC 190C	The Mediterranean from the Rise of Christianity to the Rise of Islam	5
LIT 116I	Philosophy in India	5
LIT 117A	Old Iranian Literature	5
LIT 118A	Hebrew Bible	5
LIT 121A	The Heroic Epic	5
LIT 125A	Ancient Novel	5
LIT 130A	Ancient Literature in Cross-Cultural Perspective	5
LIT 154B	Literature and the Arts	5
LIT 159M	The Curse of the Mummy	5
LIT 184A	Introduction to Greek Literature	5
LIT 184B	Greek Drama	5
LIT 184C	Greek Poetry	5
LIT 184D	Prose Authors	5
LIT 184E	Special Topics in Greek Literature	5
LIT 186A	Introduction to Latin Literature	5
LIT 186B	Roman Poetry	5
LIT 186C	Prose Authors	5
LIT 186D	Special Topics in Latin Literature	5
LIT 181A	Biblical Hebrew, Part 1	5
LIT 181B	Biblical Hebrew, Part 2	5
LIT 181D	Reading Egyptian Hieroglyphs, Part 1	5
LIT 181E	Reading Egyptian Hieroglyphs, Part 2	5

LIT 181F	Reading Egyptian Hieroglyphs, Part 3	5
LIT 190T	Topics in Modern Literary Studies	5
PHIL 100A	Ancient Greek Philosophy	5
PHIL 118	Stoic Ethics	5
POLI 105A	Ancient Political Thought	5

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in ancient studies is satisfied by completing two 5-credit upper-division courses in Greek literature or Latin literature from the following list:

Greek Literature:

LIT 184B	Greek Drama	5
LIT 184C	Greek Poetry	5
LIT 184D	Prose Authors	5
LIT 184E	Special Topics in Greek Literature	5

Latin Literature:

LIT 186B	Roman Poetry	5
LIT 186C	Prose Authors	5
LIT 186D	Special Topics in Latin Literature	5

Comprehensive Requirement

Ancient studies majors are required to pass a senior comprehensive examination. Each student shall identify a minimum of two ancient studies faculty members to serve on the examination committee, one of which shall be designated as the committee chair. Please consult the ancient studies website for a more detailed description of this requirement.

Enrollment in a 2-credit comprehensive examination preparatory course, CLST 197F, is required in the same quarter that the senior comprehensive examination will be given. The preparatory course will be taken with the chair of the student's examination committee.

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Sample Four-Year Plan

	Fall	Winter	Spring	Summer
Entering				College 1A Summer Edge (optional)
1st (frosh)	GREE 1 or LATN 1 CLST lower-division survey College 1	GREE 2 or LATN 2 WRIT 1/WRIT 1E (if needed)	LIT 184A or LIT 186A	
2nd (soph)	LIT 184-series/LIT 186-series WRIT 2*	LIT 184-series/LIT 186-series	Upper-division elective	
3rd (junior)	Upper-division elective	Upper-division elective	Upper-division elective	
4th (senior)	Upper-division elective	Upper-division elective	CLST 197F (2 credits)	

In addition to the specific courses shown above, a student must complete courses satisfying all of UC Santa Cruz's general education requirements. Individual student plans will vary, and some general education requirements may be satisfied within the ancient studies major requirements depending on each student's individual course selection.

*WRIT 2 should be taken in or before spring quarter of the second year

Sample Transfer Plan

	Fall	Winter	Spring	Summer
Entering				KRSG 1T Summer Edge (optional)
1st (junior)	GREE 1 or LATN 1 CLST lower-division survey Upper-division elective	GREE 2 or LATN 2 Upper-division elective	LIT 184A or LIT 186A Upper-division elective	
2nd (senior)	LIT 184-series/LIT 186-series Upper-division elective	LIT 184-series/LIT 186-series Upper-division elective	Upper-division elective CLST 197F (2 credits)	

This planner assumes that a student has completed most of their general education requirements before coming to UC Santa Cruz. Students from California community colleges are advised to complete the Intersegmental General Education Transfer Curriculum (IGETC) in preparation for transfer to UC Santa Cruz.

ANCIENT STUDIES MINOR

Course Requirements

The classical studies minor requires a minimum of seven courses: two lower-division ancient Greek or Latin language courses (or equivalent), and five 5-credit upper-division courses (minimum of 25 upper-division credits). Students are allowed to complete up to two of their minor courses for pass/no pass grades.

Lower-Division Courses

A minor in ancient studies requires the lower-division sequence in elementary Greek or Latin language (or equivalent):

	Either these courses	
GREE 1	Elementary Ancient Greek	5
GREE 2	Elementary Ancient Greek	5
	or these courses	
LATN 1	Elementary Latin	5
LATN 2	Elementary Latin	5

Students with prior knowledge of ancient Greek or Latin are advised to consult with the ancient studies faculty to determine if they have satisfied any of the elementary language course requirements.

Upper-Division Courses

Choose one of the following courses:

LIT 184A	Introduction to Greek Literature	5
LIT 186A	Introduction to Latin Literature	5

Reading proficiency in ancient Greek or Latin required for these courses. LIT 184A should be taken after GREE 2, and LIT 186A should be taken after LATN 2.

Plus any four of the upper-division courses listed below

HIS 147A	History of Premodern India	5
HIS 150A	Emperors and Outcasts: Ancient Japan	5
HIS 159A	Cleopatra to Constantine: Greek and Roman Egypt	5
HIS 159B	Women and Gender in Ancient Egypt	5
HIS 159C	Temple and City: The Egyptian New Kingdom and the City of Thebes	5
HIS 159D	When Cities Were New: the Rise of Urbanism in the Ancient Near East and Mediterranean	5
HIS 160A	Athenian Democracy	5
HIS 160C	Topics in Greek History	5
HIS 161B	Topics in Roman History	5
HIS 163B	Genesis: A History	5
HIS 194S	Special Topics in Ancient Egyptian History	5
HIS 196S	Special Topics in Ancient History	5
HAVC 135F	Art of the Book in Western Europe 500-1600	5
HAVC 151	Greek Myths Antiquity to the Present	5
HAVC 152	Roman Eyes: Visual Culture and Power in the Ancient Roman World	5

HAVC 154	Byzantine Visual Culture: Politics and Religion in the Empire of Constantinople, 330-1453 A. C	5
HAVC 155	Constructing Cleopatra: Power, Sexuality, and Femininity Across the Ages	5
HAVC 190C	The Mediterranean from the Rise of Christianity to the Rise of Islam	5
LIT 116I	Philosophy in India	5
LIT 117A	Old Iranian Literature	5
LIT 118A	Hebrew Bible	5
LIT 121A	The Heroic Epic	5
LIT 125A	Ancient Novel	5
LIT 130A	Ancient Literature in Cross-Cultural Perspective	5
LIT 154B	Literature and the Arts	5
LIT 159M	The Curse of the Mummy	5
LIT 184A	Introduction to Greek Literature	5
LIT 184B	Greek Drama	5
LIT 184C	Greek Poetry	5
LIT 184D	Prose Authors	5
LIT 184E	Special Topics in Greek Literature	5
LIT 186A	Introduction to Latin Literature	5
LIT 186B	Roman Poetry	5
LIT 186C	Prose Authors	5
LIT 186D	Special Topics in Latin Literature	5
LIT 181A	Biblical Hebrew, Part 1	5
LIT 181B	Biblical Hebrew, Part 2	5
LIT 181D	Reading Egyptian Hieroglyphs, Part 1	5
LIT 181E	Reading Egyptian Hieroglyphs, Part 2	5
LIT 181F	Reading Egyptian Hieroglyphs, Part 3	5
LIT 190T	Topics in Modern Literary Studies	5
PHIL 100A	Ancient Greek Philosophy	5
PHIL 118	Stoic Ethics	5
POLI 105A	Ancient Political Thought	5

EAST ASIAN STUDIES MINOR

East Asian studies addresses the three societies of China, Japan, and Korea in northeast Asia. We recognize that they compose a meaningful regional designation that contains a diverse range of peoples, languages, and cultures. Linked by centuries of common use of the Chinese writing system, a shared textual canon, general principles of statecraft, and the continual circulation of people and goods, the three societies nevertheless also possess distinctive languages, histories, and social identities, making it necessary to explore each society in its own right.

In recognition of this diversity within the common bonds, East Asian studies at UC Santa Cruz encourages students to explore East Asia in both depth and breadth. Building first upon developing language skills in Chinese or Japanese, students also begin their studies in a historical survey—HIS 40A, HIS 40B, HIS 80C, or HIS 81—which explore the broad regional forces that contextualize each society's particular trajectory. From these foundations, students are encouraged to investigate a broad range of questions pertinent to each society in classes across the university, including anthropology, economics, education, feminist studies, film and digital media, history, history of art and visual culture, languages, linguistics, literature, music, politics, sociology, and theater arts.

The East Asian studies minor is administered by the Department of History. For additional information on curriculum and advising, visit the East Asian studies website.

Study Abroad

Because the minor is designed to support the integration of language training with exploration of East Asian societies, we strongly endorse participation in one of the many education abroad programs available for UC students in East Asia where language skills acquired at the university are put to practical use in daily life and research. At present, there are UC Education Abroad Programs in China, Japan, Hong Kong, Korea, and Taiwan. Students who complete Chinese or Japanese language courses while studying abroad are expected to complete a language placement exam upon their return to UCSC. Instructions for the placement exam can be found on the Languages and Applied Linguistics website. For more information about study abroad, see the UC Education Abroad Program (UCEAP) and UCSC Global Learning websites.

Course Requirements

The East Asian studies minor requires a minimum of six courses, five of which must be 5-credit upper-division courses (minimum of 25 upper-division credits). Additional lower-division coursework in Chinese or Japanese language may be need in order to gain the proficiency necessary to take the upper-division Chinese or Japanese language courses required for this minor (see below). Students are allowed to complete up to two of their minor courses for pass/no pass grades.

Lower-Division Courses

Language

All East Asian studies minors are expected to gain proficiency in Chinese or Japanese language. Students without prior knowledge of Chinese or Japanese should enroll in beginning Chinese (CHIN 1) or Japanese (JAPN 1) no later than fall quarter of their second year. Students with prior knowledge of Chinese or Japanese are required to complete a language placement exam to determine which course of Chinese or Japanese language instruction best suits their skill level. Instructions for the placement exam may be found on the Languages and Applied Linguistics website. Students may also pursue study abroad opportunities as a way of acquiring Chinese or Japanese language instruction.

Either these courses

CHIN 1	First-Year Chinese	5
CHIN 2	First-Year Chinese	5
CHIN 3	First-Year Chinese	5
CHIN 4	Second-Year Chinese	5
CHIN 5	Second-Year Chinese	5
CHIN 6	Second-Year Chinese	5
	or these courses	
JAPN 1	First-Year Japanese	5
JAPN 2	First-Year Japanese	5
JAPN 3	First-Year Japanese	5
JAPN 4	Second-Year Japanese	5
JAPN 5	Second-Year Japanese	5
JAPN 6	Second-Year Japanese	5

Core Courses

Choose one of the following courses:

HIS 40A	Early Modern East Asia	5
HIS 40B	The Making of Modern East Asia	5
HIS 80C	Global China	5
HIS 81	Science in the Colonial World	5

Upper-Division Courses

Upper-Division Chinese or Japanese Language

All East Asian studies minors are required to complete two 5-credit upper-division courses in Chinese language instruction or two 5-credit upper-division courses in Japanese language instruction. Additional upper-division courses in Chinese or Japanese language may be applied to the upper-division electives requirements (see below).

Chinese Language Courses

CHIN 103	Advanced Chinese: Language and Society	5
CHIN 104	Advanced Chinese: Readings in Literature	5
CHIN 105	Advanced Chinese: Readings in History	5
CHIN 107	Introduction to Classical Chinese Prose	5
CHIN 108	Introduction to Classical Chinese Poetry	5

Japanese Language Courses

JAPN 103	Advanced Japanese	5
JAPN 104	Advanced Japanese	5
JAPN 105	Advanced Japanese	5
JAPN 109	Japanese Language, Culture, and Society	5

Upper-Division Electives

Three additional 5-credit upper-division courses from the East Asian studies curriculum, one of which may be a topically appropriate individual study: CHIN 199, HIS 199, JAPN 199, LIT 199, etc.

ANTH 130C	Politics and Culture in China	5
ANTH 130G	Asian Americans in Ethnography and Film	5
CHIN 103	Advanced Chinese: Language and Society	5
CHIN 104	Advanced Chinese: Readings in Literature	5
CHIN 105	Advanced Chinese: Readings in History	5
CHIN 107	Introduction to Classical Chinese Prose	5
CHIN 108	Introduction to Classical Chinese Poetry	5
CHIN 199	Tutorial	5
ECON 149	The Economies of East and Southeast Asia	5
HAVC 122A	Sacred Geography of China	5
HAVC 122B	Constructing Lives in China: Biographies and Portraits	5
HAVC 122C	Writing in China	5
HAVC 122D	Chinese Landscape Painting	5
HAVC 122E	Art and Propaganda in China	5
HAVC 122F	Bodies in Chinese Culture	5
HAVC 127A	Buddhist Visual Worlds	5
HAVC 127B	Buddhist Pure Lands	5
HAVC 190D	The World of the Lotus Sutra	5
HAVC 190F	Chan Texts and Images	5
HAVC 190G	Buddhist Wisdom Traditions	5
HIS 101D	World History of Science	5
HIS 101F	Global Environmental History	5
HIS 106B	Asian and Asian American History, 1941-Present	5
HIS 140B	History of Qing China, 1644-1911	5
HIS 140C	Revolutionary China 1895-1960	5
HIS 140D	Recent Chinese History	5
HIS 140E	Women in China's Long 20th Century	5
HIS 150A	Emperors and Outcasts: Ancient Japan	5
HIS 150B	Tokugawa Japan	5
HIS 150C	Inventing Modern Japan: The State and the People	5
HIS 150D	The Japanese Empire, 1868-1945	5
HIS 150E	History and Memory in the Okinawan Islands	5
HIS 150F	Engendering Empires: Women in Modern Japan and Korea	5
HIS 150G	History of Disabilities in East Asia	5
HIS 190G	Comparative History of Redress and Reparations	5
HIS 194C	Topics in Modern Chinese History	5
HIS 194E	Women in Japanese History	5
HIS 194M	Literati, Samurai, and Yangban: Comparative History of State and Elite in East Asia, 1600-1900	5
HIS 194U	The Cold War and East Asia	5

HIS 194Y	Memories of WWII in the U.S. and Japan	5
JAPN 103	Advanced Japanese	5
JAPN 104	Advanced Japanese	5
JAPN 105	Advanced Japanese	5
JAPN 199	Tutorial	5
JAPN 109	Japanese Language, Culture, and Society	5
LIT 133E	Contemporary Chinese Society, Culture, and Politics	5
LIT 133F	Pacific Rim Discourse	5
LIT 133G	The Nuclear Pacific	5
LIT 133H	Haunted by the Forgotten War: Literature and Film of the Korean War	5
LIT 133I	Global Japan: Literatures of the Japanese Diaspora	5
LIT 141B	Classical Chinese Culture and Literature, 10th Century B.C.E. through Sixth Century C.E	5
LIT 141C	Classical Chinese Culture and Literature, Sixth Century through 16th Century	5
LIT 149C	The 1960s	5
LIT 162B	Literature of the Asian Diaspora	5
POLI 140D	Politics of East Asia	5
POLI 141	Politics of China	5
POLI 161	The Rise of China	5
POLI 190T	Governance and Conflict in East Asia	5
SOCY 128	Law and Politics in Contemporary Japan and East Asian Societies	5
SOCY 128J	The World Jury on Trial	5
THEA 161D	Asian Theater: An Anthropological Approach	5

JEWISH STUDIES B.A.

Information and Policies

Introduction

The interdisciplinary program in Jewish studies introduces students to the study of classical, medieval, early modern, and modern Jewish cultures and to the range of disciplines that bear upon the field.

The Jewish studies major and minor offer students the chance to study Jewish communities and cultures across the world, with special reference (though not limited) to modern issues. The major and minor will help them prepare to move successfully into graduate programs in a variety of disciplines, especially in humanities, social sciences, and pre-professional programs, and will provide students with a grounding in materials fundamental to a liberal arts education. This program connects with a range of disciplines and programs on the University of California, Santa Cruz, campus that explore the meanings of modernity; at the same time, this program will help students develop analytical tools, methodological versatility, and critical literacy.

Note that modernity here is not defined as unfolding solely in Europe or North America; the Jewish studies program intends to speak to modernity as a global phenomenon, dealing with sites where Jews lived. In the 19th and 20th centuries Jews were widely spread across the globe and often played active and influential roles in their communities. These include such places as China, India, Latin America, North Africa, the Middle East, as well as Europe and North America.

Program Learning Outcomes

Jewish History and Culture

- Identify and interpret major events, figures, and topics in Jewish history and culture.

Holocaust

- Demonstrate thorough knowledge of the Holocaust as a historical phenomenon.
- Develop a nuanced understanding of the cultural dimensions of the Holocaust through an analysis of literature, films, art, and/or music.

Jewish Languages

- Develop basic competency in Hebrew (modern or Biblical) or Yiddish.

Critical Analysis

- Distinguish between primary and secondary sources.
- Evaluate competing interpretations and multiple narratives of the past.
- Analyze Jewish cultural sources, including literary texts, films, and music within a broader, cross-cultural context.

Effective Communication

- Present clear and compelling arguments, based on critical analysis of diverse literary, historical, film, and/or musical sources, and effectively communicate interpretations in written essays and/or other media.

Scope

- Classical through Modern periods.

Academic Advising for the Program

The Jewish studies program is administered by the Department of History. Students in this program receive advising support from the history undergraduate program coordinator.

Transfer students are encouraged to consult the "Transfer Information and Policy" information included below.

Getting Started in the Major: Frosh

This major is not highly sequential or course intensive. Although it is advisable to begin taking courses toward the major in the first year, it is not required.

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to apply in this major are not required to complete specific major preparation courses for consideration of admission to UC Santa Cruz.

Transfer students entering at the junior level can readily finish all of the Jewish Studies major requirements within two years, even if they haven't completed any preparatory coursework prior to transferring. Some background in history and in literary analysis and interpretation is desirable, but not essential. Since this is an interdisciplinary major, preparatory work in art history, philosophy, or politics, depending on the student's interests, may also be useful.

Transfer students are encouraged to complete the Intersegmental General Education Transfer Curriculum (IGETC) or UC Santa Cruz general education requirements in preparation for transfer to UC Santa Cruz.

Getting Started in the Major: Transfer Students

Transfer students are advised to complete the lower-division Jewish studies course requirements, including the language requirement, by the end of their first year. The upper-division courses required for this major may be taken simultaneously with the required lower-division courses. Please refer to the sample academic plan provided below.

Transfer students are strongly encouraged to meet with the history undergraduate program coordinator before the end of their first quarter at UC Santa Cruz.

Major Qualification Policy and Declaration Process

Major Qualification

Jewish studies has no major qualification. Students should submit a petition to declare before or by their declaration deadline quarter. While specific courses are not required in order to declare, students will have ideally completed some or all of the lower-division requirements.

All students, including transfers, are eligible to pursue this major, even if they did not list Jewish studies on their UC Santa Cruz application.

Appeal Process

How to Declare a Major

1. Fill out a Jewish Studies Major Planning Worksheet. Include Jewish studies courses you've completed, are currently taking, and plan on taking in the future.
2. Meet with a Jewish studies faculty advisor to review and discuss your proposed plan of study. Obtain their signature on your worksheet.
3. Submit your approved Jewish Studies Major Planning Worksheet to the history undergraduate program coordinator for processing.

Letter Grade Policy

Students are allowed to complete up to two of their Jewish studies major requirements for Pass/No Pass, with the exception of their comprehensive requirement.

[Optional Catchall]

Course Substitution Policy

Jewish studies majors must take a minimum of five regularly scheduled Jewish studies courses plus the comprehensive/disciplinary communications (DC) requirement from members of the UC Santa Cruz Jewish studies faculty. Subject to the limits indicated, courses from the following categories may be applied to the Jewish studies major:

- Courses transferred from a California Community College or other domestic university (limit of three)
- Education Abroad Program (limit of three)
- Related courses not currently on the pre-approved Jewish studies course list (limit of two)
- Independent and field studies (limit of one)

Double Majors and Major/Minor Combinations Policy

Study Abroad

The program in Jewish studies encourages students to take advantage of the UC Education Abroad Program (EAP). The University of California has developed educational opportunities abroad in conjunction with the Jerusalem Study Center at The Hebrew University of Jerusalem. Subject to the limitations described in the "Course Substitution Policy" section, up to three courses from EAP may be applied toward the Jewish studies major requirements.

Honors

All students who announce candidacy during the academic year are reviewed for honors or highest honors in the major. The Jewish studies faculty advisors determine honors based upon courses applied toward the Jewish studies major. Performance in courses taken elsewhere and being transferred toward the major will be considered when applicable. The minimum standard applied is excellence in most courses for honors, and excellence in all courses for highest honors. Summer, fall, and winter graduates will be reviewed at the end of each of their respective quarters. Spring graduates will be reviewed as of the spring announcement of candidacy deadline.

[Optional Catchall]

Requirements and Planners

Course Requirements

The Jewish studies major requires a minimum of 11 courses, including the comprehensive requirement, and an additional three language courses (or equivalent).

In consultation with a faculty advisor, students will plan a program of study to fulfill the following distribution of courses:

Lower-Division Courses

Language Requirement

Three quarters of lower-division instruction (or equivalent) in a Jewish language in any combination of the student's choosing:

HEBR 1	First-Year Hebrew	5
HEBR 2	First-Year Hebrew	5
HEBR 3	First-Year Hebrew	5
HEBR 4	Second-Year Hebrew	5
HEBR 80	Introduction to Biblical Hebrew	5
YIDD 1	First-Year Yiddish	5
YIDD 2	First-Year Yiddish	5
YIDD 3	First-Year Yiddish	5

Lower-Division Core Courses

Choose one of the following courses:

HIS 74	Introduction to Jewish History and Cultures	5
HIS 74A	Introduction to Middle Eastern and North African Jewish History: Ancient to Early Modern	5
HIS 74B	Introduction to Middle Eastern and North African Jewish History, 1500-2000	5
LIT 61J	Introduction to Jewish Literature and Culture	5

Plus one of the following courses:

HIS 75	Film and the Holocaust	5
HIS 76	Introduction to the Holocaust	5

Upper-Division Courses

Four 5-credit upper-division Jewish studies core courses:

HIS 155	History of Modern Israel	5
HIS 163B	Genesis: A History	5
HIS 172A	German History	5
HIS 172B	German Film, 1919-1945	5
HIS 178E	Modern Jewish Intellectual History	5
HIS 185C	Communism, Nationalism, and Zionism: Comparative Radical Jewish Politics	5
HIS 185I	Latin American Jewish History in the Modern Period	5
HIS 185J	The Modern Jewish Experience	5
HIS 185K	Jewish Life in Eastern Mediterranean Port Cities	5
HIS 185L	Where Civilizations Met--Jews, Judaism, and the Iberian Peninsula	5
HIS 185M	Zionism: An Intellectual History	5
HIS 185O	The Holocaust and the Arab World	5
HAVC 135E	Jewish Identity and Visual Representation	5
LGST 114	Jews, Anti-Semitism, and the American Legal System	5
LGST 115	Law and the Holocaust	5
LIT 118A	Hebrew Bible	5
LIT 164A	Jewish Travel Narratives	5
LIT 164B	Hebrew Poetry	5
LIT 164C	Global Jewish Writing	5
LIT 164D	Jewish Diaspora, Ethnicity, and Urban Life	5
LIT 164G	Literature and the Holocaust	5
LIT 164H	Jewish Writers and the European City	5
LIT 164J	Jewish Writers and the American City	5
LIT 181A	Biblical Hebrew, Part 1	5
PHIL 148	The Holocaust and Philosophy	5
LIT 181B	Biblical Hebrew, Part 2	5

Electives

Four additional Jewish studies courses of the student's choice, three of which must be 5-credit upper-division courses.

The following courses are electives only. Students may satisfy their Jewish studies elective requirements by taking additional language, lower-division core, and upper-division core courses from the Jewish studies curriculum.

HIS 2A	The World to 1500	5
HIS 2B	The World Since 1500	5
HIS 5C	The Bible in History, Culture, and Controversy	5
HIS 70A	Modern European History, 1500-1815	5
HIS 70B	Modern European History, 1815-present	5
HIS 78	Modern Authoritarianism in Europe and Beyond	5
HIS 167A	The First World War	5
HIS 167B	The Second World War in Europe	5
HIS 169	Dutch and Belgian History, 1500 to Present	5
HIS 172C	History of German Film, 1945 to Present	5
HIS 174	Spies: History and Culture of Espionage	5
HIS 176	Eastern Europe, 1848-2000	5

HIS 178A	European Intellectual History: The Enlightenment	5
HIS 178B	European Intellectual History: The 19th Century	5
HIS 178C	European Intellectual History, 1870-1970	5
HIS 184B	Racism and Antiracism in Europe: From 1870 to the Present	5
JWST 199	Tutorial	5
LIT 112I	Kafka	5
LIT 160U	Conspiracy Theories	5
MUSC 80I	Music of Modern Israel	5
MUSC 80T	Mizrach: Jewish Music in the Lands of Islam	5
MUSC 80Y	Music, Anti-Semitism, and the Holocaust	5
MUSC 81P	History of Jewish Music	5

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. The DC requirement in Jewish studies is satisfied by completing an exit seminar or thesis:

Choose an exit seminar

One quarter; choose one of the following courses:

HIS 190G	Comparative History of Redress and Reparations	5
HIS 194L	Exile, Diaspora, and Displacement: Jewish Lives from North Africa to the Middle East	5
HIS 194V	Fascism and Anti-Fascism: The Global Spanish Civil War	5
HIS 196E	Modern Irish History	5
HIS 196G	Topics in Modern Germany and Europe	5
HIS 196M	Shtetl: Eastern European Jewish Life	5
HIS 196N	Eastern European Jewish Social History	5
HIS 196S	Special Topics in Ancient History	5
LIT 190Y	Topics in Jewish Literature and Culture	5

Or a thesis

Two quarters; all-of-the-following-courses:

JWST 195A	Thesis Research	5
JWST 195B	Thesis Writing	5

Comprehensive Requirement

Students may satisfy the Jewish studies comprehensive exit requirement by completing an approved exit seminar or senior thesis:

Choose an exit seminar

One quarter; choose one of the following courses:

HIS 190G	Comparative History of Redress and Reparations	5
HIS 194L	Exile, Diaspora, and Displacement: Jewish Lives from North Africa to the Middle East	5
HIS 194V	Fascism and Anti-Fascism: The Global Spanish Civil War	5
HIS 196E	Modern Irish History	5
HIS 196G	Topics in Modern Germany and Europe	5
HIS 196M	Shtetl: Eastern European Jewish Life	5
HIS 196N	Eastern European Jewish Social History	5
HIS 196S	Special Topics in Ancient History	5
LIT 190Y	Topics in Jewish Literature and Culture	5

Or a thesis

Two quarters; all of the following courses:

JWST 195A	Thesis Research	5
JWST 195B	Thesis Writing	5

Classical Chronological Distribution Requirement

One course from the following:

HEBR 80	Introduction to Biblical Hebrew	5
HIS 74	Introduction to Jewish History and Cultures	5
HIS 74A	Introduction to Middle Eastern and North African Jewish History: Ancient to Early Modern	5
HIS 163B	Genesis: A History	5
LIT 61J	Introduction to Jewish Literature and Culture	5
LIT 118A	Hebrew Bible	5
LIT 181A	Biblical Hebrew, Part 1	5
LIT 181B	Biblical Hebrew, Part 2	5

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Sample Four Year Plan

	Fall	Winter	Spring	Summer
Entering				College 1A
				Summer Edge (optional)

				er
Entering				KRSG 1T
				Summer Edge (optional)
1st (junior)	Language 1	Language 2	Language 3	
	HIS 74 or HIS 74A or HIS 74B or LIT 61J	Upper-division core course	HIS 75 or HIS 76	
		Additional core or elective 1 (classical requirement)	Upper-division core course 2	
2nd (senior)	Upper-division core course 3	Upper-division core course 4	Upper-division additional core or elective 4	
	Upper-division additional core or elective 2	Upper-division additional core or elective 3	Exit seminar or thesis (DC)	

This planner assumes that a student has completed most of their general education requirements before coming to UC Santa Cruz. Students from California community colleges are advised to complete the Intersegmental General Education Transfer Curriculum (IGETC) in preparation for transfer to UC Santa Cruz.

These are sample plans. Actual student plans will vary according to annual course offerings and student's unique academic goals.

In addition to the specific courses shown in these planners, a student must complete courses satisfying all of UC Santa Cruz's general education requirements. Individual student plans will vary, and some general education requirements may be satisfied by Jewish studies major requirements depending on each student's individual course selection.

*WRIT 2 should be taken in or before spring quarter of the second year.

Sample Transfer Plan

	Fall	**Winter**	**Spring**	**Summ**
1st (frosh)	Language 1	Language 2	Language 3	
	HIS 74 or HIS 74A or HIS 74B or LIT 61J	WRIT 1/WRIT 1E (if needed)	HIS 75 or HIS 76	
	College 1			
2nd (soph)	Upper-division core course 1	Upper-division core course 2	Upper-division core course 3	
	WRIT 2*			
3rd (junior)	Upper-division core course 4	Additional core or elective 1 (classical requirement)	Upper-division additional core or elective 2	
4th (senior)	Upper division additional core or elective 3	Upper division additional core or elective 4	Exit seminar or thesis (DC)	

JEWISH STUDIES MINOR

Students whose major area of interest is not Jewish studies may nonetheless find that a minor in Jewish studies makes an invaluable contribution to their studies. This introduction to Jewish studies is helpful for students who plan to do graduate work in Jewish studies, whether through traditional academic disciplines or in Jewish studies programs, and also for students who plan to attend rabbinical schools or to find work with Jewish communities. For others with an interest in Jewish topics, but without such plans, a minor in Jewish studies offers intellectual enrichment and a focus within the student's chosen field.

Course Requirements

The minor requires a minimum of eight courses. A minimum of five 5-credit upper-division courses must be completed within the Jewish studies minor course requirements. Students are allowed to complete up to two of their minor courses for pass/no pass grades. In consultation with a faculty adviser, students will plan a program of study to fulfill the following distribution of courses:

Lower-Division Courses

One of the following Jewish studies core courses:

HIS 74	Introduction to Jewish History and Cultures	5
HIS 74A	Introduction to Middle Eastern and North African Jewish History: Ancient to Early Modern	5
HIS 74B	Introduction to Middle Eastern and North African Jewish History, 1500-2000	5
HIS 75	Film and the Holocaust	5
HIS 76	Introduction to the Holocaust	5
LIT 61J	Introduction to Jewish Literature and Culture	5

Upper-Division Courses

Three 5-credit upper-division Jewish studies core courses:

HIS 155	History of Modern Israel	5
HIS 163B	Genesis: A History	5
HIS 172A	German History	5
HIS 172B	German Film, 1919-1945	5
HIS 178E	Modern Jewish Intellectual History	5
HIS 185C	Communism, Nationalism, and Zionism: Comparative Radical Jewish Politics	5
HIS 185I	Latin American Jewish History in the Modern Period	5
HIS 185J	The Modern Jewish Experience	5
HIS 185K	Jewish Life in Eastern Mediterranean Port Cities	5
HIS 185L	Where Civilizations Met--Jews, Judaism, and the Iberian Peninsula	5
HIS 185M	Zionism: An Intellectual History	5
HIS 185O	The Holocaust and the Arab World	5
HAVC 135E	Jewish Identity and Visual Representation	5
LGST 114	Jews, Anti-Semitism, and the American Legal System	5
LGST 115	Law and the Holocaust	5
LIT 118A	Hebrew Bible	5
LIT 164A	Jewish Travel Narratives	5
LIT 164B	Hebrew Poetry	5
LIT 164C	Global Jewish Writing	5
LIT 164D	Jewish Diaspora, Ethnicity, and Urban Life	5
LIT 164G	Literature and the Holocaust	5
LIT 164H	Jewish Writers and the European City	5
LIT 164J	Jewish Writers and the American City	5
LIT 181A	Biblical Hebrew, Part 1	5
LIT 181B	Biblical Hebrew, Part 2	5
PHIL 148	The Holocaust and Philosophy	5

Electives

Four courses chosen from the list below or any courses not already taken in the above lower- or upper-division core requirements. Two of the electives must be 5-credit upper-division courses.

HEBR 1	First-Year Hebrew	5
HEBR 2	First-Year Hebrew	5
HEBR 3	First-Year Hebrew	5
HEBR 4	Second-Year Hebrew	5
HIS 2A	The World to 1500	5
HIS 2B	The World Since 1500	5
HIS 5C	The Bible in History, Culture, and Controversy	5
HIS 70A	Modern European History, 1500-1815	5
HIS 70B	Modern European History, 1815-present	5
HIS 78	Modern Authoritarianism in Europe and Beyond	5
HIS 167A	The First World War	5
HIS 167B	The Second World War in Europe	5
HIS 169	Dutch and Belgian History, 1500 to Present	5
HIS 172C	History of German Film, 1945 to Present	5
HIS 174	Spies: History and Culture of Espionage	5
HIS 176	Eastern Europe, 1848-2000	5
HIS 178A	European Intellectual History: The Enlightenment	5
HIS 178B	European Intellectual History: The 19th Century	5
HIS 178C	European Intellectual History, 1870-1970	5

HIS 184B	Racism and Antiracism in Europe: From 1870 to the Present	5
HIS 190G	Comparative History of Redress and Reparations	5
HIS 196E	Modern Irish History	5
HIS 196S	Special Topics in Ancient History	5
JWST 199	Tutorial	5
LIT 112I	Kafka	5
LIT 160U	Conspiracy Theories	5
MUSC 80I	Music of Modern Israel	5
MUSC 80T	Mizrach: Jewish Music in the Lands of Islam	5
MUSC 80Y	Music, Anti-Semitism, and the Holocaust	5
MUSC 81P	History of Jewish Music	5
YIDD 1	First-Year Yiddish	5
YIDD 2	First-Year Yiddish	5
YIDD 3	First-Year Yiddish	5

HISTORY M.A.

Introduction

The history M.A. program will accept applications in 2025-26 for the 2026-27 academic year. Changes to the M.A. curriculum to better align it with that of the history Ph.D. program are pending review.

The Department of History offers an M.A. degree in history for those individuals who are interested in postgraduate work, but who are not planning to complete a Ph.D. It is a degree program that can fulfill in-service education requirements for current teachers as well as for future teachers earning a single-subject credential in social studies. Part-time enrollment is allowed.

Each student will be required to choose one of three areas of specialization (U.S., Europe, East Asia). To complete the degree, each student must pass a total of 12 courses of 5 credits each and two courses of 2 credits each. Students are required to produce a substantial research essay (average word count of 8000-10,000) grounded in original research in primary historical documents. There is no language requirement.

Detailed information for prospective graduate students, including procedures for applications and admission to graduate studies, examinations and requirements is available from the Division of Graduate Studies admissions website.

Applications

Information on the History Department application deadline can be found on the Division of Graduate Studies admissions application deadlines webpage. Admission information and application material are on the Division of Graduate Studies website.

Requirements

The M.A. degree is awarded after two years in residence, provided that the following requirements have been met:

- Completion of 12 five-credit courses and two 2-credit proseminars
- Removal of all Incomplete notations on record
- Approval of an M.A. essay

Course Requirements

HIS 200	Methods and Theories of History	5
HIS 201	Directed Research Colloquium	5
HIS 202	Practicing World History	5

HIS 200: year 1, fall quarter

HIS 201: year 2, winter quarter

HIS 202: year 1, spring quarter

One research seminar during the first four quarters:

HIS 204A	History of Gender Research Seminar	5
HIS 204C	Colonialism, Nationalism and Race Research Seminar	5
HIS 204E	Transnationalism, Borderlands, and History	5

Three Proseminars of 2 credits each including:

HIS 280A	History Graduate Proseminar: Teaching Pedagogy	2
HIS 280B	History Graduate Proseminar: Research Presentations and Grant Writing	2
HIS 280C	History Graduate Proseminar: Job Market	2

HIS 280A: year 1

HIS 280B: year 1

HIS 280C: year 2

Six area of concentration electives of 5 credits each, two of which may be taken outside the History Department.

Courses taken must be graduate seminars, upper-division undergraduate courses, and independent study courses (maximum of two).

Reading seminars in the area of specialization:

U.S.:

HIS 210A	Readings in U.S. History	5
HIS 210B	Readings in U.S. History	5

Europe:

HIS 251A	Readings in Modern European History: Environment and Technology	5

HIS 251B	Readings in Modern European History: Empire	5

East Asia:

HIS 230A	Readings in Late Imperial China	5
HIS 230B	Engendering China	5
HIS 230C	Readings in 20th-Century China	5
HIS 242	Readings in Modern Japan	5
HIS 243	Transnational Japan	5
HIS 244	Gender and Japanese History	5

Other Requirements

[Optional Catchall]

Applying for Graduation

The final essay (hard copy and pdf copy) must be submitted to the graduate program coordinator by the spring quarter deadline. A completed Application for the Master's Degree must be filed with the graduate coordinator with the submission of your final essay.

Essay Review and Evaluation

The Graduate Committee evaluates the master's essays and makes recommendations to the graduate director on the awarding of the M.A. degree. Applicants are notified of the committee's decision in June.

HISTORY PH.D.

Introduction

The Ph.D. program in history at UC Santa Cruz has a global and transnational orientation, and emphasizes an interdisciplinary and cross-cultural approach to historical studies, encouraging innovative thinking about global historical processes. In consultation with their faculty advisors, Ph.D. students complete courses of study and original research that bring together their temporal, geographical and thematic or methodological interests. Every student also acquires expertise in a more broadly conceived primary teaching field, defined in terms of geography and period, as well as a secondary teaching field that is focused on a different region or analytical approach.

We offer a rigorous program of instruction and independent work that trains students in the techniques of original historical research and equips them to teach university-level courses in history. Just as the work of most professional historians centers around both research and teaching, training in these areas constitutes the two essential poles of the graduate program in history. We only admit those highly motivated students who are most qualified to pursue advanced studies in history. We also only admit those applicants who can best benefit from the specific strengths of our faculty.

Detailed information for prospective graduate students, including procedures for applications and admissions to graduate studies, examinations and requirement is available from the Division of Graduate Studies.

Applications

Information on the History Department application deadline can be found on the Graduate Admissions Deadlines webpage. Additional information and application material are on the Division of Graduate Studies website.

Advancement to Candidacy

Course Requirements

Until they pass the qualifying examination and are formally advanced to candidacy for the Ph.D. degree, students must be in residence at UC Santa Cruz and are expected to complete a minimum of 10 credits each quarter to maintain normal academic progress. Completion of a minimum of 10 courses of 5 credits each and one proseminar of 2 credits (HIS 280A) is required for advancement to candidacy. Courses taken are graduate seminars, independent study courses, and most upper-division courses.

Course Requirements

HIS 200	Methods and Theories of History	5
HIS 201	Directed Research Colloquium	5
HIS 202	Practicing World History	5
HIS 298A	Constructing a Field	5

HIS 200: year 1, fall quarter

HIS 298A: year 1, fall or winter quarter

HIS 201: year 2, winter quarter

HIS 202: year 1

One research seminar during the first four quarters:

HIS 204A	History of Gender Research Seminar	5
HIS 204C	Colonialism, Nationalism and Race Research Seminar	5
HIS 204E	Transnationalism, Borderlands, and History	5

One Proseminar of 2 credits:

HIS 280A	History Graduate Proseminar: Teaching Pedagogy	2

HIS 280A: year 1

Reading seminars in the research area and primary teaching field:

- Graduate students will complete at least five readings seminars in their research area / primary teaching field. These specializations must be defined in consultation with faculty advisors and declared by the end of the student's first year in the Ph.D. program. Students may substitute independent studies with advisors and other faculty members for two of these seminars.

- Course examples, but not limited to: HIS 200B, HIS 209A, HIS 210A, HIS 210B, HIS 217, HIS 244, HIS 263, HIS 265

Second teaching field:

Two courses from among Borderlands and Transnationalism; Critical Race and Indigeneity; East Asia; European; Gender and Sexuality; Latin American; Middle East and North Africa (MENA); Science, Technology and Environment; South Asia; Southeast Asia; U.S.; and World History.

Outside courses:

Two graduate courses outside the History Department, which may be from two different departments.

Foreign Language Requirements

Students whose research centers on a primarily English-speaking part of the world must demonstrate reading competency in at least one foreign language prior to taking the qualifying examination. Students working on all other parts of the world must demonstrate a reading competency in at least two foreign languages prior to taking the qualifying exam; competency in one of the languages must be demonstrated by the end of the sixth quarter of enrollment. Usually, competency will be demonstrated by passing a reading examination administered by a member of the history faculty. Students who are native speakers of the language in question or who believe that they have already demonstrated competency through previous coursework or through their performance on a standardized test should petition the graduate director to waive this language requirement.

Language requirements must be satisfied before taking the qualifying exam.

Teaching Requirements

Pre-Qualifying Requirements

Coursework

Students must successfully complete all required courses.

The M.A. Essay

Students are required to produce a substantial research essay grounded in original research in primary historical documents. A successful essay will reflect a general understanding of the field of inquiry along with a critical grasp of the scholarship that currently defines the field; deep knowledge of the specific subject under investigation; the application of appropriate analytical models; and a well-supported interpretation of the materials explored. This essay could (but need not) be a segment of a larger project; but it must be a complete, self-contained essay in and of itself.

Students enroll in HIS 201, Directed Research Colloquium, the winter quarter of their second year. The final essay (pdf copy) must be submitted to the graduate program coordinator by the spring quarter deadline.

Qualifying Examination (QE) Dossier Requirements

The QE dossier includes three sections, each of which students will prepare in consultation with their primary academic adviser and with the advice of the examiners. The dossier must include at least one field statement (and, ideally, more than one), two annotated syllabi drawn respectively from the primary and secondary teaching fields, and a 10-15-page dissertation prospectus. Specific requirements for the contents of the dossier may vary by geographic and thematic areas of emphasis. These requirements should be discussed with and agreed upon by the primary advisor and other members of the QE committee at least one full quarter prior to the oral exam date. Complete bibliographies must be appended to each piece of the QE dossier.

A commonly used model for dossiers in the department is the following:

1. Three field statement essay(s). The first and longest essay (25-30 pages) should review the state of the scholarship in students' main area of teaching expertise, broadly defined and reflecting primary fields of employment within the discipline. One of the two shorter essays (roughly 15-20 pages each) should survey the historiography on the student's more specific area of research. The other should focus either on interdisciplinary theoretical or methodological literature related to the student's program of study or a second area of geographical or thematic specialization (or both). The field statements should demonstrate students' broad competence in subject matter as well as mastery of the theoretical issues and historiographic debates in their designated research and teaching of expertise.

2. Two annotated syllabi that demonstrate students' preparation to teach undergraduate courses in their primary and secondary teaching fields. The syllabi should be annotated to show how each class session would be prepared: principal sources for lectures, principal questions for discussion, reasons for assigning particular readings, etc.

3. A 10 -15-page dissertation prospectus that includes an evaluative survey of the literature relevant to your proposed research topic, an explicit statement of research questions, a detailed discussion of the archival sources, and a consideration of the theoretical issues to be engaged. **Note:** Although no specific section of the dossier focuses upon the coursework completed outside the History Department, it is expected that this work will be incorporated into different sections of the portfolio, particularly the theoretical or methodological literature and the dissertation prospectus.

Qualifying Examination

The qualifying examination (QE) emphasizes field mastery, integration of material from different fields, and focused preparation for dissertation research. The QE culminates in a three-hour meeting during which a student presents and discusses a dossier that has been submitted to the student's committee at least three weeks in advance. The examination is taken by the spring quarter of the third year. Prior to taking

the QE, all incomplete notations (I) must be cleared from the student's record and students must take and pass their language examination(s). Additionally, the student must be registered the quarter the examination is taken.

The four exam fields are designed in consultation with your QE committee members. You will prepare for the exam through regularly offered courses and independent readings courses sponsored by your examiners. You are required to take at least five courses in research and primary teaching fields combined. You are also required to take at least two courses in the secondary teaching and outside fields. The fields are as follows:

- Research Field: In consultation with their faculty advisors, students will designate a primary field for research and teaching, defined by their temporal, geographical, and thematic or methodological interests, by the end of their first year in the program.
- Primary Field of Teaching: In consultation with their faculty advisors, students will designate a primary field for research and teaching, defined by their temporal, geographical, and thematic or methodological interests, by the end of their first year in the program. The link will include a current but not exhaustive list of these specializations.
- Second Teaching Field: Each Ph.D. student also prepares a second teaching field different from the primary area of research interest and can choose from among Borderlands and Transnationalism, East Asian, European, Critical Race and Indigeneity, Gender and Sexuality, Latin American, Middle East and North Africa (MENA), Science, Technology and Environment, U.S., and World History.
- Outside Field: One field outside history, such as anthropology, literature, feminist studies, politics, sociology, or history of consciousness. You will select a field of topical, thematic, or methodological relevance to your dissertation. Your faculty adviser must approve the outside field.

A pass or fail will be given after the examination based on the student's knowledge and research preparation as demonstrated by their dossier and their performance at the meeting. In order to pass the QE, students must receive passing marks from each member of the committee. Immediately following the exam, the QE committee chair will complete the Report on Qualifying Examination form and submit it to the History Department. If a student does not pass the QE the first time, they may retake only those sections not passed. No one will be permitted to take the QE more than twice.

Post-Qualifying Requirements

M.A. Degree

The master of arts (M.A.) degree is awarded to all Ph.D. students after two years in residence, successful completion of 12 courses of 5 credits each and the Teaching Pedagogy proseminar (HIS 280A) of 2 credits, demonstrated competency in at least one foreign language (for those whose research centers upon a part of the world whose primary language is not English), removal of all Incomplete notations (I) on record, and approval of a M.A. essay (average word count of 8000-10000, excluding footnotes and bibliography) grounded in original research in primary historical documents.

Dissertation

The dissertation represents an extensive, book-length project grounded in research in original historical documents. A successful dissertation will reflect a broad and deep understanding of the field of inquiry, a mastery of the scholarship that currently defines the field, detailed knowledge of the subject of study growing out of dedicated research, and the incorporation of appropriate interpretive models. The dissertation plan is laid out in the prospectus submitted with the qualifying examination, and it is expected that students remain in dialogue with their advisor and committee members about progress and any revisions to the original plan.

Dissertation Defense

Academic Progress

Evaluation of Academic Progress

Each spring, the History Department reviews the academic progress of all continuing students. All first-year students are required to meet with the Graduate Committee to discuss academic goals and progress.

Time to Degree

During your time in the graduate program, you will become familiar with the terms "normative time" or "timely progress." It is important to progress within expected timetables as it affects many aspects of financial support as well as good academic standing. Additional Information can be found in our Graduate Student Handbook.

Applying for Graduation

Degree Application

By the end of the first week of the quarter you intend to finish, an Application for Doctor of Philosophy Degree form, which requires dissertation adviser(s) and graduate director signatures, must be filed with the Graduate Division.

Dissertation Completion

The dissertation should be submitted to the dissertation reading committee before the end of the fifth week of the quarter in which the degree is to be conferred. As a courtesy to the committee, students should provide a hard copy draft unless the committee is willing to accept an electronic copy.

A copy of the **signed** title page along with a PDF of the dissertation must be filed with graduate program coordinator and one copy must be filed online with the Graduate Division by the deadline in the quarter in which the degree is to be conferred (see Academic and Administrative Calendar).

HISTORY COURSE LIST

Concentration Regions

The following is a summary list of undergraduate history courses and how they may apply to the different geographic regions of concentration. Questions about this list or how to apply courses to the history major should be directed to the history undergraduate program coordinator.

Americas and Africa

HIS 2A	The World to 1500	5
HIS 2B	The World Since 1500	5
HIS 4	History of the Present: Investigating the Historical Origins of Contemporary Problems	5
HIS 9	Introduction to Native American History	5
HIS 9C	California Indian History	5
HIS 10A	United States History to 1877	5
HIS 10B	United States History, 1877 to 1977	5
HIS 11A	Latin America: Colonial Period	5
HIS 11B	Latin America: National Period	5
HIS 12	Introduction to Latino American History	5
HIS 13	Introduction to American Religious Culture	5
HIS 15	The United States of America from its Founding through Our Time	5
HIS 20	U.S. Popular Music Movements	5
HIS 31A	African History to 1900	5
HIS 32A	Islam in Africa and the African Diaspora	5
HIS 80X	History of the Modern Civil Rights Movement	5
HIS 80Y	World War II Memories in the U.S. and Japan	5
HIS 82	California Gold Rush in Global History	5
HIS 90A	Nuclear Pacific	5
HIS 101C	Oceans in World History	5
HIS 101E	Global 1930s	5
HIS 101H	The Horse in World History	5
HIS 104C	Celluloid Natives: American Indian History on Film	5
HIS 104D	Museums and the Representation of Native American History, Memory, and Culture	5
HIS 106A	Vietnam War Memories	5
HIS 106B	Asian and Asian American History, 1941-Present	5
HIS 109A	Race, Gender, and Power in the Antebellum South	5
HIS 110A	Colonial America, 1500-1750	5
HIS 110B	Revolutionary America, 1740-1815	5
HIS 110D	The Civil War Era	5
HIS 110E	Rise of the Machines: Technology, Inequality, and the United States, 1877 to 1914	5
HIS 110F	World War USA: The United States from 1914 through 1945	5
HIS 110G	Strange Days: The USA and its National Security State, 1945-1991	5
HIS 110H	Greater Reconstruction: Race, Empire, and Citizenship in the Post-Civil War United States	5
HIS 112	American Feminist Thought, 1750-1950	5
HIS 113C	Women and American Religious Culture	5
HIS 114	Market Revolution in Antebellum U.S.	5
HIS 116	Slavery Across the Americas	5
HIS 116A	Unchained Memory: Slavery and the Politics of the Past	5
HIS 117	Wired Nation: Broadcasting & Telecommunications in the US from the Telegraph to the Internet	5
HIS 117A	From the Player Piano to Pandora	5
HIS 118	The Global Cold War, 1945-1991	5
HIS 118A	Conspiracy Planet: How Conspiracies, Conspiracy Theories, and Conspiracy Scandals Shape History	5
HIS 119	Indigenous Feminisms	5
HIS 120	W.E.B. Du Bois	5
HIS 121A	African American History to 1877	5
HIS 121B	African American History, 1877 to the Present	5
HIS 122A	Jazz and United States Cultural History, 1900-1945	5
HIS 122B	Jazz and United States Cultural History, 1945 to the Present	5
HIS 123	Immigrants and Immigration in U.S. History	5
HIS 124A	Panama Canal and U.S. Empire	5
HIS 128	Chicana/Chicano History	5
HIS 130	History of Modern Cuba	5
HIS 131	Women in Colonial Latin America	5
HIS 134A	Colonial Mexico	5
HIS 134B	History of Mexico, 1850 to Present	5
HIS 137E	Literary Culture in Africa	5
HIS 139C	Queer Pasts: A Radical Telling of LGBTQ History in the United States	5
HIS 151A	Medicine and the Body in the Colonial World	5
HIS 151B	Drugs in World History	5

HIS 158A	The Escapes of David George: Biographical Research on Slavery and Early America	5
HIS 158C	Slavery in the Atlantic World: Historical and Archaeological Perspectives	5
HIS 158D	The Atlantic Slave Trade, 1520-1866	5
HIS 177A	Slaves, Soldiers, and Scientists: History of the Tropics	5
HIS 181B	Africa and Britain in an Imperial World	5
HIS 185C	Communism, Nationalism, and Zionism: Comparative Radical Jewish Politics	5
HIS 185I	Latin American Jewish History in the Modern Period	5
HIS 190A	Slavery and Race in Latin America	5
HIS 190B	Race and the Nation in Latin America	5
HIS 190D	Asian and Latino Immigration Since 1875	5
HIS 190E	Topics in Chicana/o History	5
HIS 190F	Research Seminar in the Americas	5
HIS 190G	Comparative History of Redress and Reparations	5
HIS 190H	History of Time	5
HIS 190J	Mexican History in the Archives	5
HIS 190K	Wired Planet: Readings on the Global History of Broadcasting and Telecommunications	5
HIS 190N	Topics in African History	5
HIS 190P	Early American Society and Culture	5
HIS 190Q	The Novel and History	5
HIS 190R	Research in the History of American Religions	5
HIS 190T	Latin America in the Cold War	5
HIS 190U	Power, Culture, and the Federal Bureau of Investigation	5
HIS 190W	U.S. Civil War and Reconstruction	5
HIS 190X	History of the Atlantic World, 1492-1824	5
HIS 190Y	The Atlantic Slave Trade	5
HIS 190Z	The Long Civil Rights Movement	5
HIS 194N	Urbanites in the Global South, 18th Century to the Present	5
HIS 194V	Fascism and Anti-Fascism: The Global Spanish Civil War	5
HIS 194Y	Memories of WWII in the U.S. and Japan	5
HIS 196H	Sex and the City--The History of Sexuality in Urban Areas Around the Globe	5

Asia and the Pacific

HIS 2A	The World to 1500	5
HIS 2B	The World Since 1500	5
HIS 40A	Early Modern East Asia	5
HIS 40B	The Making of Modern East Asia	5
HIS 44	Modern South Asia, 1500 to Present	5
HIS 80C	Global China	5
HIS 80Y	World War II Memories in the U.S. and Japan	5
HIS 81	Science in the Colonial World	5
HIS 90A	Nuclear Pacific	5
HIS 101C	Oceans in World History	5
HIS 101D	World History of Science	5
HIS 101E	Global 1930s	5
HIS 101F	Global Environmental History	5
HIS 101H	The Horse in World History	5
HIS 105	Nations and Nationalism	5
HIS 106A	Vietnam War Memories	5
HIS 106B	Asian and Asian American History, 1941-Present	5
HIS 118	The Global Cold War, 1945-1991	5
HIS 140B	History of Qing China, 1644-1911	5
HIS 140C	Revolutionary China 1895-1960	5
HIS 140D	Recent Chinese History	5
HIS 140E	Women in China's Long 20th Century	5
LIT 141B	Classical Chinese Culture and Literature, 10th Century B.C.E. through Sixth Century C.E	5
LIT 141C	Classical Chinese Culture and Literature, Sixth Century through 16th Century	5
HIS 143B	History of the Philippines, 1815 to the Present	5
HIS 146A	Colonial South Asia 1750-1947	5
HIS 147A	History of Premodern India	5
HIS 147B	Political and Social History of Modern South Asia	5
HIS 147C	South Asia in the 20th Century	5
HIS 147D	Intellectual History of South Asia	5
HIS 147E	Imperial Sport: Cricket in South Asia, 1800s to the Present	5
HIS 149	Plants, People, and the Making of Modern Southeast Asia	5
HIS 149F	Southeast Asian Histories, Societies and Politics in Nine Tasty Foods	5
HIS 150A	Emperors and Outcasts: Ancient Japan	5
HIS 150B	Tokugawa Japan	5

HIS 150C	Inventing Modern Japan: The State and the People	5
HIS 150D	The Japanese Empire, 1868-1945	5
HIS 150E	History and Memory in the Okinawan Islands	5
HIS 150F	Engendering Empires: Women in Modern Japan and Korea	5
HIS 150G	History of Disabilities in East Asia	5
HIS 190D	Asian and Latino Immigration Since 1875	5
HIS 190G	Comparative History of Redress and Reparations	5
HIS 194C	Topics in Modern Chinese History	5
HIS 194E	Women in Japanese History	5
HIS 194K	Topics in the History of Southeast Asia	5
HIS 194M	Literati, Samurai, and Yangban: Comparative History of State and Elite in East Asia, 1600-1900	5
HIS 194N	Urbanites in the Global South, 18th Century to the Present	5
HIS 194O	South Asia in the Twentieth Century	5
HIS 194P	Urban South Asia	5
HIS 194T	Worlds of Labor in Asia	5
HIS 194U	The Cold War and East Asia	5
HIS 194Y	Memories of WWII in the U.S. and Japan	5
HIS 196H	Sex and the City--The History of Sexuality in Urban Areas Around the Globe	5

Europe and the Mediterranean World

HIS 2A	The World to 1500	5

SOCY 105A	Classical Social Theory	5

History of Consciousness

315 Humanities 1
(831) 459-4324
https://histcon.ucsc.edu

PROGRAMS OFFERED

History of Consciousness Minor (p. 203)

History of Consciousness Ph.D. (p. 203)

History of Consciousness Designated Emphasis (p. 204)

OTHER PROGRAMS OF INTEREST

Critical Race and Ethnic Studies B.A. (p. 149)

Feminist Studies B.A. (p. 159)

History of consciousness is an interdisciplinary graduate program centered in the humanities, with links to the social sciences and the arts. It is concerned with forms of expression and social action as they are manifested in specific historical, cultural, and political contexts. The program stresses flexibility and originality. Interest is focused on problems rather than disciplines. Although students are prepared to teach in particular fields, the emphasis is on questions that span a number of different approaches.

History of consciousness fosters problem-driven research vital to new forms of knowledge and intelligibility and to meet the challenges of imagining new modes of scholarship for the arts, social sciences, and humanities. The department emphasizes a variety of topics in its seminars and research pursuits. These areas of research include studies at the intersection of race, sexuality, and gender; global capitalism and cultural processes; psychoanalytic and semiotic theories of the image; science and technology studies; theories and histories of religion; social movements; and literary studies and poetics. Seminars are regularly offered in these and other areas of ongoing faculty research.

History of consciousness facilitates its expansive intellectual and pedagogical mission by maintaining strong cooperative relations with affiliated faculty from other campus programs who offer seminars and participate in advising, qualifying examinations, and dissertation committees. The formal list of affiliated faculty is a non-exhaustive indication of advising possibilities beyond the program’s core faculty. Campus research organizations, such as the UCSC Center for Cultural Studies, the Humanities Institute, critical race and ethnic studies, the Science and Justice Research Center, and the

Research Center for the Americas, also provide venues for collaborative work.

GRADUATE PROGRAM

Over almost 60 years of existence, the history of consciousness graduate program has become widely recognized as a leader of interdisciplinary scholarship. Program graduates are influential scholars at prominent universities, and their dissertations have been published by important trade and academic presses. Graduates currently find academic employment in a wide range of disciplines, including literature, feminist studies, science studies, anthropology, sociology, American studies, cultural studies, ethnic studies, communications, the study of religion, and philosophy. In addition, history of consciousness graduates work as filmmakers, museum researchers, free-lance writers, postdoctoral researchers, and academic administrators.

Since the curriculum concentrates on theoretical and methodological issues and is concerned with the integration of disciplines, candidates for admission are expected to have a relatively clear idea of the project they wish to pursue. Experience of advanced work in one or more fields is preferred, but not required.

Students also have the option of doing advanced work in a traditional discipline and receiving a designated emphasis in that specialization. In such cases, students must satisfy the appropriate department's criteria (see designated emphases for information).

HISTORY OF CONSCIOUSNESS MINOR

Course Requirements

Lower-Division Courses

Students take one of the following courses. Students may petition for approval of an alternative departmental lower-division course.

HISC 1	Introduction to History of Consciousness	5
HISC 12	Historical Introduction to Philosophy	5

Upper-Division Courses

Students are required to take five 5-credit, upper-division history of consciousness courses numbered HISC 100-199.

Students may, with permission of the instructor, petition the department to substitute a 5-credit graduate seminar for one of the required upper-division courses. In addition, students may petition to substitute an upper-division course offered by affiliated faculty in other departments.

Students must complete all requirements for the minor with a grade of P, C (2.0), or better.

PH.D.

Introduction

Detailed information for prospective graduate students, including procedures for application and admission to graduate studies, examinations, and requirements for the doctor of philosophy degree, is available from the Division of Graduate Studies and on the department website.

Applications

The deadline for applications to the history of consciousness (HISC) program usually falls in the second week of December. Please check the Graduate Admissions page for the specific date each year. Admissions information and application materials are available online. Applications are invited from students with backgrounds and interests in the humanities, arts, and social sciences and are especially encouraged from individuals with a clear idea of the project they wish to undertake. Strong preference is given to applicants working in areas for which the faculty resources in history of consciousness are appropriate and available. Graduate Record Examination (GRE) scores are optional. A writing sample is required of no more than 10 pages. Admission is for the fall quarter only.

It is important to note that in light of California's elimination of affirmative action as an admissions criterion, the History of Consciousness Department reaffirms its commitment to the principles of affirmative action. This means a commitment to diversity, equal opportunity, and outreach to underrepresented communities. Further, this commitment underlines our understanding that the very fabric and quality of our scholarship depends on the representation and interplay of diverse experience and perspectives. So defined, affirmative action is reflected in every aspect of the history of consciousness program, including scholarship, teaching, admissions, hiring, and the process of departmental governance.

Advancement to Candidacy

Course Requirements

The common requirements are:
• HISC 203A, Approaches, to be taken in fall quarter of the first year;
• HISC 240, Pedagogy of Teaching/Teaching Assistant Training, to be taken in the fall quarter of the first year;
• HISC 203B, the writing-intensive version of Approaches, to be taken in spring quarter of the first year;
• A minimum of five history of consciousness graduate seminars to be taken during the first two years (HISC 203A and four additional HISC seminar classes, not including HISC 203B);
• HISC 291, a two-credit advising course, to be taken each quarter;

Students register for a minimum of two courses (5 credits each) plus HISC 291 (2 credits) per quarter until after Advancement to Candidacy, at which time they may register for one course per quarter (normally HISC 299A) plus the 2-

credit HISC 291 in order to qualify for full-time enrollment. With the exception of HISC 203A, HISC 203B, HISC 240 and the five required history of consciousness seminars, courses taken to fulfill the university enrollment requirements may include not only history of consciousness seminars but also independent study courses with specific faculty and graduate seminars offered in other departments.

HISC 203A	Approaches to History of Consciousness	5
HISC 203B	Approaches to History of Consciousness	5
HISC 240	Basic Principles of University-Level Pedagogy	2
HISC 291	Advising	2

Minimum of five HISC grad seminars

A minimum of five history of consciousness graduate seminars during the first two years (HISC 203A and four additional HISC seminar classes, not including HISC 203B).

Foreign Language Requirements

Students must demonstrate a proficiency in a language other than English (as demonstrated by an undergraduate degree in the language, taking a translation examination, completing coursework, or petitioning for exemption).

Teaching Requirement

Students must complete three quarters of supervised teaching experience.

Pre-Qualifying Requirements

Qualifying Examination

The qualifying examination includes a written and oral component. The written component consists of a qualifying essay (normally drafts of one to two chapters of the proposed dissertation) that demonstrates the candidate's ability to do extended, dissertation-level research, analysis, and writing on an original topic. The written component also includes a dissertation prospectus. The oral examination focuses on the student's qualifying essay, dissertation prospectus, and relevant fields of scholarship.

Post-Qualifying Requirements

Advancement to Candidacy

Students are encouraged to advance to candidacy in their third year. In order to remain within normative time they must advance by the end of their fourth year in the program. In order to advance to candidacy, students must complete their coursework; demonstrate proficiency in a second language (by taking a translation examination, completing coursework, or petitioning for exemption), be in good academic standing, and complete and pass the written and oral portion of the qualifying examination.

[Optional Catchall]

Dissertation

After advancement to candidacy, students concentrate on dissertation writing. The current normative time to degree limit of seven years means that a student usually has a minimum of three years after advancement to candidacy for completion of the dissertation. Students register for one course per quarter (normally HISC 299A) plus the 2-credit HISC 291 which qualifies as full-time enrollment.

Dissertation Defense

A formal dissertation defense is optional. Please consult with the department if you want to pursue this option.

Academic Progress

In order to remain within normative progress, students must advance by the end of their fourth year in the program.

A student who has been advanced to candidacy for more than nine quarters is not considered to be making satisfactory progress.

For a complete list of Academic Requirements and Standards, visit the Graduate Division website.

Applying for Graduation

For information on how to apply for graduation, visit the Graduate Division website.

[Optional Catchall]

HISTORY OF CONSCIOUSNESS DESIGNATED EMPHASIS

Introduction

To receive a designated emphasis in history of consciousness, graduate students from other departments must complete the requirements in addition to degree requirements for the doctorate in their home department. Guidelines and application forms are available on the history of consciousness website.

Requirements

Committee Composition and Departmental Approvals

The student must have a faculty graduate advisor from core faculty in history of consciousness, who serves both on the qualifying exam committee and the dissertation reading committee. To obtain the designated emphasis in history of consciousness:

- The request for a designated emphasis must originate in the degree-granting department.
- The student should complete an application, obtain the history of consciousness advisor's signature and submit with supporting documentation (copies of the QE and

dissertation committee nomination forms) to the History of Consciousness Department office.

- The History of Consciousness Department will notify the student and the home department of approval for the designated emphasis.

Course Requirements

The student must take four graduate courses in history of consciousness. With the approval of the history of consciousness advisor, one of the four required graduate courses may be an independent study. Students are strongly encouraged to take courses offered by at least two different core history of consciousness faculty toward their DE requirements.

Writing, Research and/or Teaching Requirements

Languages and Applied Linguistics

Revised: 7/21/2025

Department of Languages and Applied Linguistics
218 Cowell College
(831) 459-2054
https://language.ucsc.edu

PROGRAMS OFFERED

Applied Linguistics and Multilingualism B.A. (p. 208)

Spanish Studies B.A. (p. 213)

Spanish Studies Minor (p. 218)

Teaching English as a Second or Other Language (p. 219)

OTHER PROGRAMS OF INTEREST

Language Studies B.A. (p. 227)

Linguistics B.A. (p. 221)

Language is an intellectual tool basic to all disciplines. In today's communities, multicultural and global, learning a second language is not a refinement but a necessity—the key to understanding and communicating with others near and far. The goal of the Department of Languages and Applied Linguistics at UC Santa Cruz is to allow students to achieve a substantial level of proficiency in languages other than English. Since such proficiency always includes cultural as well as linguistic comprehension, our courses examine the complex relationship between language and culture.

The Department of Languages and Applied Linguistics offers rigorous training by professional instructors. Most courses are taught in the target language from the very beginning. Currently, we offer courses in Arabic, Chinese, French, Hebrew, Italian, Japanese, Punjabi, Spanish, Spanish for heritage speakers, and Yiddish.

Students with previous language preparation who wish to continue in that language take a placement examination to determine the course level appropriate for them. Each language's placement examination format is described in the quarterly Schedule of Classes, along with the date ,time, and location of the examination.

Our upper-division courses further expand students' understanding of language in its social contexts, focusing on linguistic, historical, literary, sociological and cultural issues, among others.

Students may also use language courses for the following majors and minors that have a language requirement: classical studies, East Asian studies, global economics, human biology, Italian studies, Jewish studies, Latin American and Latino studies, linguistics, language studies, and literature.

Students of language who are interested in theater have the opportunity to participate in the annual International Playhouse, which presents highly successful programs every spring. To date, pieces have been performed in Chinese, French, German, Hebrew, Italian, Japanese, Latin, Punjabi, Russian, and Spanish.

Study abroad is an important component of language study at UCSC. Language students have various opportunities to study abroad, for a summer, quarter, semester, or year. Students may choose to study abroad through the Division of Global Engagement through the UCSC Summer Abroad Program, or through affiliate programs around the globe. The Division of Global Engagement offers programs in Argentina, Australia, Barbados, Botswana, Brazil, Canada, Chile, China, Costa Rica, Denmark, Egypt, France, Germany, Ghana, Hong Kong, India, Ireland, Israel, Italy, Japan, Korea, Mexico, Netherlands, New Zealand, Russia, Singapore, South Africa, Spain, Sweden, Taiwan, Tanzania, Thailand, Turkey, United Kingdom, and Vietnam. There are programs available for students of all levels of language ability, including Language and Culture programs for beginner or intermediate speakers, to full immersion programs for students with advanced language skills. For a list of current programs and requirements, please visit the following Global Engagement website.

UNDERGRADUATE PROGRAM

The department houses two vibrant majors, in applied linguistics and multilingualism, and in Spanish studies**,** as well as a minor in Spanish studies. The applied linguistics and multilingualism major is designed for students who wish to pursue the study of a particular language and, at the same time, gain an in-depth understanding of language use in bilingual and multilingual settings. Applied linguistics courses are taught in English and cover topics such as language and gender, second-language teaching, bilingualism, discourse analysis, and intercultural communication. In Spanish studies, the major and minor are both interdisciplinary programs that promote advanced linguistic proficiency in Spanish studies as well as a broad understanding of the historical and cultural developments of the Spanish-speaking world.

PLACEMENT EXAMS

Information about this topic can be found under the Department of Languages and Applied Linguistics website in the "placement" tab located in the navigation bar at the top of the page.

ACADEMIC ENGLISH

The Department of Languages and Applied Linguistics offers a series of courses in Academic English (ACEN) designed specifically for students whose native language is not English, and who would benefit academically by improving their English language skills. The main objective of these courses is to raise the linguistic, academic, and cultural competence of international students who are currently pursuing various majors at UCSC. ACEN courses help students develop and refine their knowledge of English usage, advanced grammar, vocabulary and idiomatic expressions, while at the same time developing their listening, oral communication, and academic reading and writing skills. The specific content of each course varies per quarter, and thus, none of the courses are prerequisites to the others.

ARABIC

Students interested in acquiring proficiency in Modern Standard Arabic can enroll in language courses from beginning to intermediate levels (ARBC 1 - ARBC 4). The curriculum aims to build a solid foundation in speaking, listening, reading, and writing, as well as imparting an understanding of culture and society in the modern Arabic-speaking world**.** Other courses at UC Santa Cruz that may be of interest to students of Arabic are detailed here**.**

Study Abroad

Students may apply to spend time in Jordan or Morocco, visit the Division of Global Engagement website for information about current programs.

CHINESE

Students interested in acquiring proficiency in Chinese can enroll in language courses from beginning to advanced levels. Only those with no prior experience with the language may enroll in CHIN 1, which is only offered fall quarter. Heritage learners and those with prior instruction are required to take a placement exam. In addition, students may select from among the following programs: a major in applied linguistics and multilingualism, a major in language studies or linguistics, a minor in East Asian studies through the History Department, an individual major in East Asian studies through their college, a major in literature with an emphasis in Chinese literature, or a major in global economics.

The sequence of lower-division courses CHIN 1–CHIN 6 is aimed at enabling students to gain proficiency in aural comprehension, speaking, reading, and writing skills. Instruction takes place mostly in Chinese from the second half of the first quarter. Students interested in studying abroad or in Chinese culture knowledge can enroll in CHIN 80, which is taught primarily in English and wish to learn a few phrases in Chinese Mandarin. Upper-level courses include CHIN 103, Language and Society; CHIN 104, Readings in Chinese Literature; CHIN 105, Readings in Chinese History; CHIN 107, Introduction to Classical Chinese Prose; and CHIN 108, Introduction to Classical Poetry.

Study Abroad

Students may apply to study intensive Chinese language at universities—in Taipei, Hong Kong, or Beijing—for periods ranging from a summer up to a full year through the Division of Global Engagement. Courses taken abroad can, with approval of an adviser, be applied to major requirements. For a list of current programs and requirements, visit the Division of Global Engagement website. For information on credit applied to a major, please contact the appropriate department.

FRENCH

Students interested in acquiring proficiency in French can enroll in language courses from beginning to advanced levels. In addition, students may select from among the following programs: a major in applied linguistics and multilingualism, a major in language studies, a major in literature with an emphasis in French literature, or a major in global economics.

Lower-division FREN 1–FREN 6 are taught entirely in French and prepare students for advanced study either on campus or abroad. They are designed to help students develop proficiency in aural comprehension, speaking, reading, and writing skills, and to introduce student to French and Francophone cultures. Upper-division courses, also taught in French, are offered on topics such as French phonetics, advanced grammar and composition, French civilization, French linguistics, history of the French language, French for professions, and French social activism through song.

Study Abroad

The Division of Global Engagement offers both semester and one-year programs in many regions of France, including Bordeaux, Lyon, Grenoble, Toulouse, and Paris. With the approval of an adviser, some French courses taken abroad may be applied to major requirements. For a list of current programs and requirements, visit the Division of Global Engagement website.

HEBREW

Students interested in acquiring proficiency in modern Hebrew can enroll in language courses from beginning to intermediate levels. In addition, credits from these courses may be counted toward the major or minor in Jewish studies. Lower-division courses are aimed at enabling students to gain proficiency in aural comprehension, speaking, reading, and writing. Attention is also given to developing an understanding of the culture, history, and religion that have been expressed through the Hebrew language from antiquity until today. HEBR 1, HEBR 2, and HEBR 3 (or equivalency) are required for the major in Jewish studies, and other Hebrew

courses are encouraged. In addition, credits from modern or biblical Hebrew courses may be counted toward the minor in Jewish studies.

ITALIAN

Students interested in acquiring proficiency in Italian can enroll in language courses from beginning to advanced levels. In addition, students may select from among the following programs: a major in applied linguistics and multilingualism, a minor in Italian studies, a major or minor in language studies, a major in global economics.

The sequence of lower-division courses ITAL 1–ITAL 6 is aimed at enabling students to gain proficiency in aural comprehension, speaking, reading, and writing. The ITAL 1, ITAL 2, ITAL 3 sequence starts once a year in the fall quarter. Classes are taught in Italian from the beginning level.

Students interested in Italian Culture Through Cinema can enroll in ITAL 80.

Upper-division courses, also taught in Italian, are offered on topics such as Advanced Italian Composition and Conversation, Italian Culture Through Food, and Italian Culture Through Film.

Study Abroad

The Division of Global Engagement sponsors programs of study in Italy. For a list of current programs and requirements, visit the Global Engagement website.

JAPANESE

Students interested in acquiring proficiency in Japanese can enroll in language courses from beginning (JAPN 1, JAPN 2, JAPN 3, JAPN 4, JAPN 5, JAPN 6) to advanced levels (JAPN 103, JAPN 104, JAPN 105, JAPN 106, JAPN 109). Only those with no prior experience with the language may enroll in JAPN 1, which is only offered fall quarter. Heritage learners and those with prior instruction are required to take a placement exam. See the placement website for more information.

The curriculum aims to build a solid foundation in all four aspects of linguistic skills (speaking, listening, reading, and writing) as well as sociolinguistic competence and cultural knowledge. Instruction takes place mostly in Japanese from the second half of the first quarter.

Students may use Japanese courses for the following majors and minors: a major in applied linguistics and multilingualism, a major in language studies (and minor), a major in linguistics (and minor), an East Asian minor, a major in global economics, or a major in literature (and a minor).

See the department's Japanese website for more information about the Japanese program.

Study Abroad

The Division of Global Engagement has information on study in Japan. There are study abroad—programs at many universities, including Doshisha, Hitotsubashi, ICU, Keio, Meiji Gakuin, Osaka, Tsuru, and Waseda. Courses taken abroad can, with approval of an adviser, be applied to major requirements. For a list of current programs and requirements, visit the Division of Global Engagement website. For information on credit applied to a major, contact the appropriate department.

PUNJABI

Students interested in acquiring proficiency in Punjabi can enroll in PUNJ 1, PUNJ 2, and PUNJ 3. These courses are intended for both heritage and non-heritage learners and are aimed at enabling students to gain proficiency in aural comprehension, speaking, reading, and writing. Attention is also given to developing an understanding of the culture that has been expressed through the Punjabi language. This program is part of Sikh and Punjabi studies at UCSC. Punjabi language courses are offered every other academic year.

SPANISH AND SPANISH FOR HERITAGE SPEAKERS

Students interested in acquiring proficiency in Spanish can enroll in a wide range of Spanish language or Spanish for heritage speakers (SPHS) courses, from beginning to advanced levels. The language and culture sequence of lower-division courses (SPAN 1-SPAN 6 as well as SPHS 4–SPHS 6) and upper-division series (SPAN 114, SPHS 115, SPAN 140-SPAN 142, SPAN 150-SPAN 155, and SPAN 156, and SPAN 157-SPAN 158 courses) are aimed at enabling students to gain proficiency in aural comprehension, speaking, reading, and writing as well as meta-linguistic and cultural competence. Students are strongly encouraged to finish year-long sequences without interruption and, if possible, to study in Spanish-speaking countries. Students can pursue a major in Spanish Studies or a minor in Spanish. Other programs that require some coursework in Spanish include a major or minor in language studies, a major in literature with an emphasis in Spanish/Latin American/Latino literatures, a major in Latin American and Latino studies, and a major in global economics.

SPANISH

Students interested in taking Spanish classes are required to take the placement examination to enroll in the appropriate level. Students finishing the first year of instruction in Spanish (SPAN 1–SPAN 2–SPAN 3) are encouraged to continue on to second-year (intermediate-level) by taking SPAN 4, SPAN 5, and SPAN 6.

Declared human biology majors have priority enrollment in SPAN 5M, Medical Spanish, but others may enroll if there is space availability. Students are also encouraged to continue with the third-year SPAN 114, SPHS 115, SPAN 140-SPAN 142, SPAN 150-SPAN 155, the SPAN 156 series, and SPAN

157-SPAN 158 in which a wide variety of topics are covered. For more information on the courses offered in Spanish, please see the course descriptions.

SPANISH FOR HERITAGE SPEAKERS

SPHS has been developed for heritage speakers who, although raised in Spanish-speaking communities or households, are not yet fully proficient in Spanish. SPHS courses take into account the experiences and influences of bilingual and bicultural upbringing.

SPHS students are encouraged to attend a group tutoring session once a week in addition to the regular class meetings. Some lower-division and all upper-division courses can fulfill requirements for several majors or departments, such as education, global economics, language studies, and Latin American and Latino studies.

Heritage speakers who are planning to continue with the Spanish studies major are strongly encouraged to take the SPHS 4–SPHS 5–SPHS 6 sequence of courses. Keep in mind that this is a sequence which starts in the fall.

STUDY ABROAD

The Division of Global Engagement offers programs ranging one quarter or one academic year in Buenos Aires; Argentina, Santiago, Chile; San Jose and Monteverde, Costa Rica; Morelia and Monterrey, Mexico, and Cordoba, Madrid, Alcala, Barcelona, and Granada, Spain. Generally, students must have completed SPAN 6 or SPHS 6 by the end of the sophomore year to qualify for a junior year abroad. Courses taken abroad can, with approval of an adviser, be applied to major requirements. For more information, see the Division of Global Engagement website. For information on credit applied to a particular major, contact the appropriate department.

YIDDISH

Students interested in acquiring proficiency in Yiddish can enroll in beginning language courses. In addition, some credit from these courses may be counted toward the major or minor in Jewish studies; consult with the Jewish studies program. Lower-division courses are aimed at enabling students to gain proficiency in aural comprehension, speaking, reading, and writing. Attention is also given to developing an understanding of the culture that has been expressed through the Yiddish language.

APPLIED LINGUISTICS AND MULTILINGUALISM B.A.

Information and Policies

Introduction

Applied linguistics is an interdisciplinary field that seeks to understand how languages are learned (first and second language acquisition), how more than one language is represented and accessed in the mind of the individual (bilingualism), the ways in which language and society intersect (sociolinguistics), how people from different cultural and linguistic backgrounds interact (intercultural communication), and methods and principles of language teaching (pedagogy).

The major in applied linguistics and multilingualism is designed for students who wish to pursue the study of a particular language (e.g., Chinese, French, Italian, Japanese, or Spanish), and at the same time, gain an in-depth understanding of language use in bilingual and multilingual settings. Coursework for the major presupposes some familiarity with theoretical linguistics, and thus majors are required to take three foundational courses offered in the Linguistics Department (LING 50 and LING 100; LING 111 or LING 112) in addition to APLX 80, the introductory course to applied linguistics. Since applied linguistics is integrally connected to other disciplines such as cognitive and developmental psychology, education, anthropology, and sociology, students have the option of taking some elective courses in these areas. Finally, majors are encouraged to pursue the study of more than one language in order to reflect on and enhance their understanding of the process of second language acquisition.

Program Learning Outcomes

Graduates from the applied linguistics and multilingualism studies bachelor of arts program should:

- **Demonstrate proficiency in a second language.** Students who successfully complete the applied linguistics and multilingualism major will reach an Intermediate-high level of proficiency in their second language (L2) as described in the scale of the American Council of Teachers of Foreign Languages (ACTFL). This is similar to the B2 level on the Common European Framework of Reference. Speakers who complete additional course work through study abroad (an aspect of the major that is very much encouraged) may reach the advanced level in their L2.
- **Be able to analyze critically the contexts and processes of (second and other) language acquisition.** Students will develop an in-depth understanding of processes of and issues relating to the acquisition of more than one language, bilingualism and multilingualism, including social, psycholinguistic and metalinguistic aspects of these processes.
- **Be able to analyze critically the contexts and uses of language in society.** Students will gain an in-depth understanding of social aspects of bilingualism and multilingualism, and issues of language in social contexts. Students will also develop an understanding of how different disciplines work together to make sense of human communication in multilingual contexts.
- **Demonstrate research skills appropriate for the field of applied linguistics, such as collecting and**

analyzing data. Students will develop the receptive and productive skills necessary for becoming members of this community of practice. Specifically, they will develop the disciplinary skills to summarize, interpret and critique both quantitative and qualitative research studies in applied linguistics. Through this process, students will develop the ability to engage in independent reading of scientific texts and research articles, to design basic research projects as well as to collect, analyze, and write about applied linguistic data.

- **Demonstrate effective written and oral communication appropriate for the discipline of applied linguistics.** Students will learn how to review and report on relevant applied linguistic research critically, using discipline-appropriate conventions in written and oral presentations (i.e., expected content, organization, register, and language).

Academic Advising for the Program

218 Cowell College
831-459-2054
languages@ucsc.edu

The earlier you declare your major in your academic career the better you will be able to plan your courses and the fulfillment of the requirements. If you declare your major early, you will receive more guidance, useful advice and close follow-up.

The Department of Languages and Applied Linguistics provides extensive orientation for the undergraduate major in applied linguistics and multilingualism. It is very important you plan the prerequisite and requisite courses in the appropriate sequence so as to complete your studies in the expected time.

Orientation is provided in two ways: large-group informational session at the beginning of fall quarter, and small-group or individual meetings with a faculty and/or staff advisor throughout the academic year.

Transfer students: Please also consult the Transfer Information and Policy section.

Getting Started in the Major: Frosh

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to apply in this major are not required to complete specific major preparation courses for consideration of admission to the University of California, Santa Cruz.

Transfer students are strongly advised to complete courses that will satisfy the campus general education requirements, the Intersegmental General Education Transfer Curriculum (IGETC), or the California General Education Transfer Curriculum (CalGETC). In addition, transfer students are strongly advised to complete two years of language study in accredited two and four year institutions. While two years of prior language study is strongly advised, transfer students should be able to complete the applied linguistics and multilingualism major in normative time as long as they place into language Level 4 (Level 5 for students entering UC Santa Cruz in the winter term) upon arrival at UC Santa Cruz.

Getting Started in the Major: Transfer Students

Transfer students may declare at any time after completing Level 4 of a non-English language with a grade of B- or better, following the process in "How to Declare a Major." Transfer students who place into Level 5 or higher of their language when they enter UC Santa Cruz can declare the major immediately.

Transfer students should consult an academic advisor at languages@ucsc.edu as soon as possible to learn about language placement tests and other information about the major.

Major Qualification Policy and Declaration Process

Major Qualification

To declare the major, students must have completed Level 4 of a non-English language (e.g., ARBC 4, CHIN 4, FREN 4, ITAL 4, JAPN 4, SPAN 4, SPHS 4) with a grade of B- or better, or place into Level 5 or higher via placement exam. Levels 1-3 may be taken P/NP. Please see the Letter Grade Policy section below for more details.

If your native language is other than English, please consult with the faculty director to discuss alternative options for meeting this requirement.

Transfer students: Please also consult the Transfer Information and Policy section.

ARBC 4	Second-Year Arabic	5
CHIN 4	Second-Year Chinese	5
FREN 4	Second-Year French	5
ITAL 4	Second-Year Italian	5
JAPN 4	Second-Year Japanese	5
SPAN 4	Second-Year Spanish	5
SPHS 4	Spanish for Heritage Speakers	5

Appeal Process

Students notified that they are not eligible to declare the major may appeal this decision by submitting a letter to the department chair within 15 working days from the date of notification. Within 15 working days of receipt of the student's appeal, the department will notify the student and their college of its decision regarding the appeal.

How to Declare a Major

Students should submit a petition to declare as soon as they complete the major qualification (MQ) requirements or reach their declaration deadline quarter (whichever comes first).

Students petitioning when the campus declaration deadline is imminent (i.e. in their sixth quarter, for students admitted as frosh), will either be approved, denied, or provided with conditions (e.g. completion of some courses with certain

grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification (MQ) courses.

Students must meet major qualification requirements prior to declaring the major.

To declare the major, students must first meet with the faculty advisor and then with the academic advisor. Please contact languages@ucsc.edu for further information.

Letter Grade Policy

A maximum of two courses that are used to satisfy the major requirements may be taken for a Pass/No Pass. Please note that the Level 4 course in the student's chosen language and APLX 190 must be taken for a letter grade.

[Optional Catchall]

Course Substitution Policy

Double Majors and Major/Minor Combinations Policy

Study Abroad

The Division of Global Engagement sponsors programs of study. Students who wish to major in applied linguistics and multilingualism are strongly encouraged to study abroad. For a list of current programs and requirements, visit Global Engagement.

Students who participate in study abroad may petition to apply up to three courses (up to 15 upper-division credits) toward the major.

Honors

Students who wish to be considered for honors should meet the deadline posted by the Office of the Registrar for declaring the intent to graduate. Determination of honors is based on the student’s grades for all courses relevant to the major and other factors relevant to an assessment of academic excellence, such as research papers of professional quality. Generally, honors in the major are awarded only to students with a GPA of 3.75 or higher in relevant coursework. Only those students whose performance in coursework is excellent will qualify. Highest honors are awarded only to students whose performance in relevant coursework is outstanding (GPA of 3.90 and above) and who have completed an outstanding original research paper.

[Optional Catchall]

Requirements and Planners

Course Requirements

There are a total of 65 credits (50 upper-division and 15 lower-division) required for the applied linguistics and multilingualism major. See below for a breakdown of the credit requirements.

Lower-Division Courses

All of the following courses:

APLX 80	Introduction to Applied Linguistics	5
LING 50	Introduction to Linguistics	5

Language Study: Completion of Level 6 is Required

CHIN 6	Second-Year Chinese	5
FREN 6	Second-Year French	5
ITAL 6	Second-Year Italian	5
JAPN 6	Second-Year Japanese	5
SPAN 6	Second-Year Spanish	5
SPHS 6	Spanish for Heritage Speakers	5

These courses have Level 1 to Level 5 language prerequisites that have to be completed or placed out of.

Upper-Division Courses

Foundation Courses

Take the following courses:

APLX 101	Second-Language Acquisition	5
LING 100	Sounds of the World's Languages: Phonetics I	5

and one of the following courses:

LING 111	Syntactic Structures	5
LING 112	Syntax I	5

Advanced Language Proficiency Courses

(10 credits total)

Students must take a minimum of two courses from the following list in the student’s target language (Arabic, Chinese, French, Italian, Japanese, or Spanish). The complete Advanced Language Proficiency course list is posted on the department’s web page. Courses used to fulfill the advanced language proficiency requirement cannot be counted toward the APLX electives. Students may petition to have other 5-credit, upper-division courses offered in the student’s target language count toward the advanced language proficiency requirement.

Although languages and applied linguistics does not currently offer upper-division coursework in Arabic students who have completed the two-year sequence in this language (or demonstrate equivalent proficiency) have the option to, and are welcome to, complete approved upper-division coursework in Arabic through the Division of Global Engagement in order to satisfy the upper-division language requirement for the major in applied linguistics and multilingualism. The department wants to accommodate students having studied Arabic and satisfaction of the upper-division courses via study abroad is one option to do so. However, participation in study abroad is not a requirement: If students are unable to participate in study abroad for any reason, they are able to choose to fulfill the upper-division language requirement in the Applied Linguistics and

Multilingualism major by studying a language that the Languages and Applied Linguistics Department offers at the upper-division level.

CHIN 103	Advanced Chinese: Language and Society	5
CHIN 104	Advanced Chinese: Readings in Literature	5
CHIN 105	Advanced Chinese: Readings in History	5
CHIN 107	Introduction to Classical Chinese Prose	5
CHIN 108	Introduction to Classical Chinese Poetry	5
FREN 108	French Cinema	5
FREN 111	Stylistics	5
FREN 114	French Phonetics	5
FREN 120	French Linguistics	5
FREN 121	History of the French Language	5
FREN 125A	French Civilization: 19th Century	5
FREN 125B	French Civilization: 20th Century	5
FREN 130	French for Professions	5
FREN 136	La Francophonie	5
FREN 131	Social Activism in France: The Tradition of Chanson Française Engagée	5
ITAL 100	Advanced Italian Composition and Conversation	5
JAPN 103	Advanced Japanese	5
JAPN 104	Advanced Japanese	5
JAPN 105	Advanced Japanese	5
JAPN 109	Japanese Language, Culture, and Society	5
LALS 171	Brazil in Black and White	5
SPAN 114	Advanced Conversation and Composition	5
SPHS 115	El ensayo lectura, análisis y redacción	5
SPAN 140	Sounds of Spanish	5

Disciplinary Communication (DC) Requirement

The Disciplinary Communication requirement (DC) is satisfied by successfully completing:

APLX 190	Research Seminar in Applied Linguistics	5

Comprehensive Requirement

(5 credits total)

In their senior year, applied linguistics and multilingualism majors must satisfy the senior exit requirement with:

APLX 190	Research Seminar in Applied Linguistics	5

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Four-Year Planner

Year	Fall	Winter	Spring	Summer
Entering				College 1A
				Summer Edge (optional)
1st (frosh)	Language 1	Language 2	Language 3	
	College 1	WRIT 1/WRIT 1E (if needed)		
2nd (soph)	Language 4	Language 5	Language 6	
	WRIT 2*			
3rd (junior)	APLX 80	APLX 101	LING 111 or LING 112	
	LING 50	LING 100 or 101	APLX elective	
4th (senior)	Adv Language course	Adv Language course	APLX 190	
	APLX elective	APLX elective	Non-APLX elective	

In addition to the specific courses shown in the planner, students must complete the ER, SR, IM, TA, PE, and PR general education requirements. Some electives may satisfy some of these requirements.

*WRIT 2 should be taken in or before spring quarter of the second year.

Transfer Planner

Year	Fall	Winter	Spring	Summer
Entering				KRSG 1T
				Summer Edge (optional)
1st (junior)	APLX 80	APLX 101	LING 111 or LING 112	
	LING 50	LING 100 or 101	APLX elective	
	Language 4	Language 5	Language 6	
2nd (senior)	Adv Language course	Adv Language course	APLX 190	
	APLX elective	APLX elective	Non-APLX elective	

This planner assumes that a student has completed most general education requirements before coming to UC Santa Cruz, and places into Level 4 or higher of the language they are studying when they enter UC Santa Cruz.

SPANISH STUDIES B.A.

Information and Policies

Introduction

The interdisciplinary major in Spanish studies is designed to offer students advanced linguistic proficiency in Spanish as well as a broad understanding of the historical and cultural developments of the Spanish-speaking world.

The Spanish studies major at UC Santa Cruz combines the strengths of language and applied linguistics with those of literary and cultural studies. The sequence of courses first exposes students to the academic registers of Spanish, a critical component for both heritage speakers and second language learners. Students then develop academic literacy in the language while gaining familiarity with the methods of analysis in different fields. The configuration of the major affords students flexibility in following their particular interests by choosing one of two tracks: (1) literature and culture or (2) language and linguistics.

These pathways within the major prepare students for a range of career possibilities that involve working with the Spanish-speaking public in a variety of professions (e.g., law, business, public service). Students may also pursue further training in teaching Spanish as a second language at the high school or university level.

Program Learning Outcomes

Graduates from the Spanish studies B.A. program should be able to demonstrate:

- **Advanced-level oral proficiency in Spanish.** Students will have the ability to use all the major timeframes (past, present, and future) in their speech and will be able to produce connected discourse of paragraph length. They will be able to satisfy the demands of work and/or school situations in Spanish with both accuracy and fluency.
- **Academic language and literacy skills in Spanish.** Students will be able to read and understand a wide range of authentic texts (e.g., academic articles, journalistic texts) in Spanish, including those with historical, sociological, and literary content. Students will be able to clearly explain their ideas in writing, demonstrating the ability to summarize, interpret, and substantiate an opinion or argument.
- **Metalinguistic awareness.** Students will be able to describe the main features of the Spanish language (e.g., the sound system, the structure of sentences) and will be able to identify the main regional varieties of Spanish. Students will be able to articulate some of the main differences between English and Spanish using precise terminology.
- **Critical analysis.** Students will be able to comment with critical insight on a range of topics and cultural productions (e.g., literary texts, film, music) of the U.S., Latin America, and Spain. They will be able to read closely in order to evaluate historical ideas, arguments, and points of view.
- **Cultural and historical competency.** Students will be able to compare and contrast multiple interpretations of the same phenomena in different cultures. Students will be able to recognize and reflect on the social, cultural, economic, and political changes that connect Latin America, Spain, and U.S. and Latina/o communities.

Academic Advising for the Program

218 Cowell College
831-459-2054
languages@ucsc.edu

The earlier you declare your major in your academic career, the better you will be able to plan your courses and the fulfillment of the requirements. If you declare your major early, you will receive more guidance, useful advice and close follow-up.

The Department of Languages and Applied Linguistics provides extensive orientation for the undergraduate major in Spanish studies. It is very important you plan the prerequisite and requisite courses in the appropriate sequence so as to complete your studies in the expected time.

Orientation is provided in two ways: quarterly large-group informational sessions, and small-group or individual meetings with a faculty and/or staff advisor.

Transfer students: Please also consult the Transfer Information and Policy section.

Getting Started in the Major: Frosh

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to apply in this major are not required to complete specific major preparation courses for consideration of admission to UC Santa Cruz.

Transfer students are strongly advised to complete courses that will satisfy the campus general education requirements, the Intersegmental General Education Transfer Curriculum (IGETC), or the California General Education Transfer Curriculum (CalGETC). In addition, transfer students are strongly encouraged to complete two years of Spanish language study at an accredited two- or four-year institution. While two years of prior Spanish language study is strongly advised, transfer students should be able to complete the Spanish studies major in normative time as long as they place

into Spanish language Level 4 (Level 5 for students entering UC Santa Cruz in the winter term) upon arrival at UC Santa Cruz.

Getting Started in the Major: Transfer Students

Transfer students may declare at any time after completing SPAN 4 or SPHS 4 with a grade of C or better, following the process in "How to Declare a Major." Transfer students who place into Spanish Level 5 or higher when they enter UC Santa Cruz can declare the major immediately.

Transfer students should consult an academic advisor at languages@ucsc.edu as soon as possible to learn about language placement tests and other information about the major.

Major Qualification Policy and Declaration Process

Major Qualification

To declare the Spanish Studies B.A., students must either: 1) complete SPAN 4 or SPHS 4 at UC Santa Cruz with a grade of C or better; 2) place into level 5 or higher via placement exam; or 3) demonstrate proficiency at this level.

Transfer students: Please also consult the Transfer Information and Policy section.

SPAN 4	Second-Year Spanish	5
SPHS 4	Spanish for Heritage Speakers	5

Appeal Process

Students notified that they are not eligible to declare the major may appeal this decision by submitting a letter to the department chair within 15 working days from the date of notification. Within 15 working days of receipt of the student's appeal, the department will notify the student and their college of its decision regarding the appeal.

How to Declare a Major

Students should submit a petition to declare as soon as they complete the major qualification requirements or reach their declaration deadline quarter (whichever comes first).

Students petition when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh), will either be approved, denied or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification courses.

Students must meet major qualification requirements prior to declaring the major.

To declare the major, students must first meet with the faculty advisor and then with the academic advisor. Please contact languages@ucsc.edu for further information.

Letter Grade Policy

Courses used to satisfy major requirements may be taken for a Pass/No Pass or letter grade, with the exception that the Level 4 Spanish course and senior comprehensive course must be taken for a letter grade.

[Optional Catchall]

Course Substitution Policy

Double Majors and Major/Minor Combinations Policy

Study Abroad

Spanish studies encourages students to take advantage of the Division of Global Engagement. Some programs do not require prior language study while others have language prerequisites. Many of these programs provide students with the language skills needed to participate in regular university courses taught in the language of the host country. Study abroad opportunities in Spanish include Argentina, Chile, Mexico, Spain, and Costa Rica.

Students who participate in study abroad may petition to apply up to three courses (up to 15 upper-division credits) from study abroad toward the major.

Honors

Students who wish to be considered for honors should meet the deadline posted by the Office of the Registrar for declaring the intent to graduate. Determination of honors is based on the student’s grades for all courses relevant to the major and other factors relevant to an assessment of academic excellence, such as research papers of professional quality. Generally, honors in the major are awarded only to students with a GPA of 3.75 or higher in relevant coursework. Only those students whose performance in coursework is excellent will qualify. Highest honors are awarded only to students whose performance in relevant coursework is outstanding (GPA of 3.90 and above) and who have completed an outstanding original research paper.

[Optional Catchall]

Requirements and Planners

Course Requirements

There are a total of 45 upper-division credits required for the Spanish studies major. See Program Major Requirements below for a breakdown of the credit requirements.

Lower-Division Courses

Either six courses in the regular track

SPAN 1	First-Year Spanish	5
SPAN 2	First-Year Spanish	5
SPAN 3	First-Year Spanish	5
SPAN 4	Second-Year Spanish	5
SPAN 5	Second-Year Spanish	5
SPAN 6	Second-Year Spanish	5

Or equivalent proficiency. SPAN 5M may substitute for SPAN 5.

Or three courses in the Spanish for Heritage Speakers (SPHS) track

SPHS 4	Spanish for Heritage Speakers	5
SPHS 5	Spanish for Heritage Speakers	5
SPHS 6	Spanish for Heritage Speakers	5

Or equivalent proficiency

Plus the following course:

LING 50	Introduction to Linguistics	5

Plus one of the following courses:

HIS 11A	Latin America: Colonial Period	5
HIS 11B	Latin America: National Period	5
HIS 12	Introduction to Latino American History	5

Upper-Division Courses

Four required Spanish studies core courses (20 credits total). Though some courses may be able to satisfy multiple requirements of the major, no course taken may count toward more than one requirement.

Literature: (5 credits)

Choose one of the following courses:

LIT 189A	De la conquista a Sor Juana	5
LIT 189B	El Siglo XIX en América Latina: cultura, política y sociedad	5

Spanish Studies: (5 credits)*

LIT 189C	Introducción a Spanish Studies	5

Linguistics: (5 credits)

SPAN 150	Topics in Hispanic Linguistics: Introduction to Hispanic Linguistics	5

Spanish Language: (5 credits)

Choose one of the following courses:

SPAN 114	Advanced Conversation and Composition	5
SPHS 115	El ensayo lectura, análisis y redacción	5

*LIT 189C/SPAN 105 and SPAN 150 must be taken prior to enrollment in or in conjunction with concentration courses.

Choice of Concentrations

Students must choose either the Languages and Linguistics Concentration or the Literature and Culture Concentration. The choice of concentration will dictate which concentration courses are taken below, as well as which capstone courses are available.

Languages and Linguistics Concentration

Three courses from the following list that are not used as an elective or capstone:

SPAN 140	Sounds of Spanish	5
SPAN 141	Advanced Spanish Grammar	5
SPAN 142	El mundo de las palabras. Spanish Morphology and Lexicon	5
SPAN 151	Topics in Hispanic Linguistics: Varieties of Spanish	5
SPAN 152	Topics in Hispanic Linguistics: Spanish in the U.S.	5
SPAN 153	Spanish Language Teaching	5
SPAN 154	Topics in Hispanic Linguistics: Spanish Pragmatics	5
SPAN 155	Topics in Hispanic Linguistics: Language Contact in the Spanish Speaking World	5
SPAN 156A	The Language of Latin America Cinema	5
SPAN 156E	Spanish Culture	5
SPAN 156F	El Humor en Espanol	5
SPAN 156J	Contemporary Central America	5
SPAN 156K	Spanish Discourse Analysis	5
SPAN 156L	Society and Sustainability in Latin America	5
SPAN 156M	Mexico and the Southwest	5
SPAN 157	Spanish Sociolinguistics	5
SPAN 158	Spanish in the U.S.-Mexico Borderlands	5

Other 5-credit Spanish-language courses numbered SPAN 100-SPAN 189, SPAN 199 (except SPAN 114, SPAN 150, SPHS 115, and LIT 189C/SPAN 105) may be accepted with the permission of the Spanish studies director (or faculty advisor).

Literature and Culture Concentration

Three 5-credit literature courses numbered LIT 188-LIT 189, LIT 199. Current courses within this range are listed below.

The courses LIT 189C/SPAN 105, LIT 189A, and LIT 189B may not be taken as a concentration or elective course if used as a core course.

LIT 188A	Literatura medieval	5
LIT 188B	Literatura peninsular: de los orígenes al siglo XVIII	5

LIT 188E	Teatro del Siglo de Oro español	5
LIT 188G	Literaturay vida en Don Quijote y otros textos cervantinos	5
LIT 188H	Erotismo y Mistica	5
LIT 188I	La novela picaresca	5
LIT 188M	Literatura peninsular: siglos XIX y XX	5
LIT 189F	Literaturas Latinas en los Estados Unidos: en inglés, español y Spanglish	5
LIT 189G	Cine y Literatura	5
LIT 189H	La Globalizacion en/del Cine Latin/o Americano	5
LIT 189I	Literatura e indigeneidad	5
LIT 189L	Poesía latinoamericana	5
LIT 189M	Prosa contemporánea hispanoamericana	5
LIT 189N	Latinoamericano testimonio	5
LIT 189O	El Cuento Hispanoamericano: Variedades esteticas de la literatura breve en America Latina	5
LIT 189Q	Ficción y marginalidad	5
LIT 189S	La cultura popular en la narrativa latinoamericana	5
LIT 189T	Historia de la lectura y los lectores: Recepcion y consumo cultural en el mundo Latino Americano	5
LIT 189U	Modernidad y literatura: El Boom de la novela latinoamericana	5
LIT 189V	Andean Indigenismo	5
LIT 189X	Estudios mediaticos	5

Electives

Choose one course from the list below or from the Languages and Linguistics or Literature and Culture Concentration lists above.

ANTH 130L	Ethnographies of Latin America	5
ANTH 130M	Inside Mexico	5
ANTH 176B	Meso-American Archaeology	5
APLX 101	Second-Language Acquisition	5
APLX 102	Bilingualism	5
APLX 103	Second Language Speech	5
APLX 105	Language Loss	5
APLX 112	Language and Gender	5
APLX 113	Inter-Cultural Communication	5
APLX 115	Language and Power	5
APLX 116	Discourse Analysis: Language Use and Context	5
APLX 122	Linguistic Diversity & Social Justice	5
APLX 124	Second Language Variation and Sociolinguistics	5
APLX 135	Second Language Teaching	5
APLX 138	English Grammar for TESOL	5
FMST 115	Gender, Sexuality, and Transnational Migration Across the Americas	5
FMST 175	Gender and Sexualities in Latina/o America	5
HAVC 143C	Latin American Modern Architecture	5
HAVC 160A	Indigenous American Visual Culture Before 1550: Mexico	5
HAVC 160B	Indigenous American Visual Culture Before 1550: The Andes	5
HAVC 162A	Special Studies in Early Indigenous American Visual Culture: The Ancient Maya	5
HAVC 162B	Special Studies in Early Indigenous American Visual Culture: The Inka	5
HAVC 163	The Native in Colonial Spanish America	5
HAVC 191B	The Virgin of Guadalupe: Images and Symbolism in Spain, Mexico, and the U.S	5
LALS 100	Concepts and Theories in Latin American and Latina/o Studies	5
LALS 122	Media and Nationalism	5
LALS 127	Genero, Nacion Y Modernidad En El Cine	5
LALS 133	Latina/o Art and Representation	5
LALS 144	Mexicana/Chicana Histories	5
LALS 145	Grassroots Social Change in Latin America	5
LALS 152	Consumer Cultures Between the Americas	5
LALS 155	Latin American and Latino Youth Movements	5
LALS 157	Revoluciones Sociales	5
LALS 165	Contemporary Peru	5
LALS 172	Visualizing Human Rights	5
LALS 175	Migration, Gender, and Health	5
LING 182	Structure of Spanish	5
LIT 155E	Cinema and Social Change in Latin America	5
POLI 140C	Latin American Politics	5
SOCY 156	U.S. Latinx Identities: Centers and Margins	5
SOCY 177A	Latinos/as and the American Global City	5

Disciplinary Communication (DC) Requirement

The Disciplinary Communication requirement (DC requirement) is satisfied by successfully completing one of the following courses:

SPAN 114	Advanced Conversation and Composition	5
SPHS 115	El ensayo lectura, análisis y redacción	5

Comprehensive Requirement

The senior comprehensive requirement is satisfied by completing one capstone course in the student's concentration listed below. The course must be taken senior year after completion of at least three of the four core courses. Courses used for the capstone requirement cannot be used for the elective or concentration requirements.

Languages and Linguistics Capstone Courses

SPAN 151	Topics in Hispanic Linguistics: Varieties of Spanish	5
SPAN 152	Topics in Hispanic Linguistics: Spanish in the U.S.	5
SPAN 153	Spanish Language Teaching	5
SPAN 154	Topics in Hispanic Linguistics: Spanish Pragmatics	5
SPAN 155	Topics in Hispanic Linguistics: Language Contact in the Spanish Speaking World	5
SPAN 157	Spanish Sociolinguistics	5
SPAN 158	Spanish in the U.S.-Mexico Borderlands	5

Literature and Culture Capstone Course

LIT 190X	Temas de la literatura y cultura espanolas y latinoamericanas	5

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Four-Year Planner for Non-Spanish Heritage Speakers

	Fall	Winter	Spring	Summer
Entering				College 1A Summer Edge (optional)
1st (frosh)	SPAN 1 College 1	SPAN 2 WRIT 1/WRIT 1E (if needed)	SPAN 3	
2nd (soph)	SPAN 4 LING 50 WRIT 2*	SPAN 5 HIS 12	SPAN 6

Transfer Planner

	Fall	Winter	Spring	Summer
Entering				KRSG 1T
				Summer Edge
				(optional)
1st (junior)	SPHS 4/SPAN 4	SPHS 5/SPAN 5	SPHS 6/SPAN 6	
	LING 50	HIS 12		
2nd (senior)	SPAN 105/ LIT 189C	LIT 189A or LIT 189B	Elective	
	SPAN 114 or SPHS 115	Concentration 1	Concentration 3	
	SPAN 150	Concentration 2	Capstone	

This planner assumes that a student places into Level 4 or higher of the language they are studying when they enter UCSC.

SPANISH STUDIES MINOR

Course Requirements

Complete the following courses. Courses may be taken for a letter grade or Pass/No Pass.

Lower-Division Courses

Either six courses in the regular track

SPAN 1	First-Year Spanish	5
SPAN 2	First-Year Spanish	5
SPAN 3	First-Year Spanish	5
SPAN 4	Second-Year Spanish	5
SPAN 5	Second-Year Spanish	5
SPAN 6	Second-Year Spanish	5

Or equivalent proficiency. SPAN 5M may substitute for SPAN 5.

Or three courses in the Spanish for Heritage Speakers (SPHS) track

SPHS 4	Spanish for Heritage Speakers	5
SPHS 5	Spanish for Heritage Speakers	5
SPHS 6	Spanish for Heritage Speakers	5

or equivalent proficiency

Plus the following course

LING 50	Introduction to Linguistics	5

Upper-Division Courses

There are a total of 25 upper-division credits required for the Spanish studies minor. Four required Spanish studies core courses (20 credits total), in addition to one upper-division Spanish studies elective course (5 credits total):

Literature (5 credits)

Choose one of the following courses:

LIT 189A	De la conquista a Sor Juana	5
LIT 189B	El Siglo XIX en América Latina: cultura, política y sociedad	5

Spanish Studies (5 credits)

LIT 189C	Introducción a Spanish Studies	5

Linguistics (5 credits)

SPAN 150	Topics in Hispanic Linguistics: Introduction to Hispanic Linguistics	5

Spanish Language (5 credits)

Choose one of the following courses:

SPAN 114	Advanced Conversation and Composition	5
SPHS 115	El ensayo lectura, análisis y redacción	5

Spanish Elective (5 credits)

Choose one of the following courses:

LIT 188A	Literatura medieval	5
LIT 188B	Literatura peninsular: de los orígenes al siglo XVIII	5
LIT 188E	Teatro del Siglo de Oro español	5
LIT 188F	Cuentos del Siglo de Oro español	5
LIT 188G	Literaturay vida en Don Quijote y otros textos cervantinos	5
LIT 188H	Erotismo y Mistica	5
LIT 188I	La novela picaresca	5
LIT 188L	Literatura de la guerra civil española	5
LIT 188M	Literatura peninsular: siglos XIX y XX	5
LIT 188R	Humanidades Ambientales	5
LIT 188Z	Literatura de España	5
LIT 189D	Sor Juana Ines de la Cruz	5
LIT 189E	Cuba	5
LIT 189F	Literaturas Latinas en los Estados Unidos: en inglés, español y Spanglish	5
LIT 189G	Cine y Literatura	5
LIT 189H	La Globalizacion en/del Cine Latin/o Americano	5
LIT 189I	Literatura e indigeneidad	5
LIT 189K	El ensayo latinoamericano	5

Teaching English to Speakers of Other Languages

The TESOL (Teaching English to Speakers of Other Languages) Certificate Program is designed to help prepare students who wish to teach English as second or additional language, whether overseas or in certain contexts in the United States. This certificate is an entry-level credential that serves as evidence for future employers that students' have received training in the theory and practice of English language teaching.

The TESOL certificate is not limited to applied linguistics and multilingualism majors. Students from any major are welcome to earn this certificate. The certificate requires the completion of six courses (LING 50, APLX 101, APLX 113, APLX 135, APLX 136, and APLX 138), and typically takes two academic years to complete.

In order to begin working toward the TESOL certificate, students should make an appointment with the faculty director of the applied linguistics and multilingualism major (https://language.ucsc.edu/) as early as possible in their academic career, as the coursework typically requires two academic years to complete.

REQUIRED COURSES

There are six required courses for this certificate (prerequisites in parentheses):

1. LING 50: Introduction to Linguistics
2. APLX 101: Second Language Acquisition (APLX 80 or LING 50)
3. APLX 113: Intercultural Communication (junior or senior standing)
4. APLX 135: Second Language Teaching (junior or senior standing)
5. APLX 136: Second Language Assessment (APLX 135)
6. APLX 138: English Grammar for TESOL (APLX 80 or LING 50)

Linguistics Ph.D. (p. 236)

OTHER PROGRAMS OF INTEREST

Applied Linguistics and Multilingualism B.A. (p. 208)

Cognitive Science B.S. (p. 843)

Computer Science B.S. (p. 577)

Computer Science B.A. (p. 583)

Natural Language Processing M.S. (p. 603)

Linguistics is an exact and structured discipline that examines human language. It has connections to many other fields in the humanities (philosophy, literature), the social sciences (anthropology, psychology, sociology), the natural sciences (biology, neuroscience, acoustics), computer science, computer engineering, and artificial intelligence.

The central areas of linguistics investigate the knowledge that speakers of a language have about its structure. Syntax is concerned with the rules that combine words into larger units of phrases and sentences. Semantics is the study of the meanings of linguistic units and how they are combined to form the meanings of sentences. Phonetics deals with the physical properties of language sounds. Phonology investigates the sound systems of particular languages and across languages. Morphology investigates the ways in which words are formed from prefixes, roots, and suffixes. Pragmatics is the study of language use. Psycholinguistics is concerned with the cognitive mechanisms by which we produce and perceive language.

The faculty in the Linguistics Department have primary research and teaching interests in one or more of these areas. Other perspectives on language study represented include computational and corpus linguistics, sociolinguistics, the study of poetic language, and the study of language change.

The programs offered by the Linguistics Department are designed to acquaint students with the central aspects of linguistic structure and the methodologies and perspectives of the field. The department offers two undergraduate majors, linguistics and language studies, and a graduate program in theoretical linguistics. The linguistics major leads to a bachelor of arts (B.A.) degree in linguistics; the language studies major leads to a B.A. degree in language studies (see Language Studies). The graduate program leads to the master of arts (M.A.) and doctor of philosophy (Ph.D.) degrees in linguistics.

The department also offers a combined B.A./M.A. pathway, which makes it possible for certain well-qualified, highly motivated students to complete the requirements for both degrees in five years rather than the usual six.

COURSES FOR NON-MAJORS

LING 50, Introduction to Linguistics, an introduction to the major areas, problems, and techniques of modern linguistics. (Gen Ed: SI)

LING 53, Semantics 1, introduction to the logical foundations of natural language semantics. A basic literacy course in the language of logical representation. (Gen Ed: MF)

LING 80C, Language, Society and Culture, the study of language from a sociological perspective. Multilingualism, language change and variation, pidgins and creoles, the origin and diversification of dialects. (Gen Ed: CC)

LING 80D, Language and Mind, a critical overview of the research program initiated by Noam Chomsky and its implications for theories of the human mind and brain. (Gen Ed: PE-H)

LING 80K, Invented Languages, explores invented languages, including Elvish and Klingon, as well as lesser-known ones that tackle ethical, social, or cognitive concerns. (Gen Ed: TA)

LING 80M, Language and Indigeneity in Mesoamerica, explores indigenous experiences in Mesoamerica, focusing on the role of language in the formation of indigenous identities, both historically and in contemporary society. (Gen Ed: ER)

LING 80S, The Science of Language, an introduction to linguistics for non-majors. (Gen Ed: SI)

LING 80V, Structure of the English Vocabulary, explores the historical origin and development of word elements, as well as their sound, meaning, and function in the contemporary language.

LING 100, Sounds of the World's Languages: Phonetics I, provides a comprehensive introduction to the sounds of human language.

LING 131, Spanglish, an investigation of Spanglish as a linguistic and cultural phenomenon. (Gen Ed: ER)

LING 133, Language OnLine (LOL): Communication in the digital era, an investigation of the language of memes and social media. (Gen Ed: PE-T)

LINGUISTICS B.A.

Information and Policies

Introduction

Linguistics is an exact and structured discipline that examines human language. It has connections to many other fields in the humanities (philosophy, literature), the social sciences (anthropology, psychology, sociology), the natural sciences (biology, neuroscience, acoustics), computer science, computer engineering, and artificial intelligence.

The central areas of linguistics investigate the knowledge that speakers of a language have about its structure. Syntax is concerned with the rules that combine words into larger units of phrases and sentences. Semantics is the study of the meanings of linguistic units and how they are combined to form the meanings of sentences. Phonetics deals with the physical properties of language sounds. Phonology investigates the sound systems of particular languages and across languages. Morphology investigates the ways in which words are formed from prefixes, roots, and suffixes. Pragmatics is the study of language use. Psycholinguistics is concerned with the cognitive mechanisms by which we produce and perceive language.

Program Learning Outcomes

The program learning outcomes for the linguistics major are the following:

1. **Analytical Thinking**
   Students will formulate testable hypotheses, and present them clearly and completely. Students will accurately and insightfully use relevant evidence to evaluate hypotheses and determine routes for future investigation.

2. **Writing**
   Students will formulate well-organized written arguments. At the micro-level, sentences will be grammatical, follow appropriate conventions, and strike an appropriate balance of clarity and complexity. At the macro-level, sentences will be linked together into paragraphs, and paragraphs into logical sections of a larger document.

3. **Properties of Language**
   Students will apply analytical techniques to identify general properties of language, including but not limited to sound structure, word structure, sentence structure, meaning, use, and language processing. Students will explain the significance of relevant universal properties in some domain.

4. **Linguistic Theory and Investigation**
   Students will demonstrate an active command of linguistic theory and linguistic investigation in at least one area of linguistic theory, including but not limited to morphology, phonetics, phonology, pragmatics, psycholinguistics, syntax, and semantics.

5. **Second Language Proficiency or Mathematics Competency**
   Linguistics majors will demonstrate either competence in the mathematical foundations of theories used in linguistics **or** proficiency in a second language at or above the intermediate-high level.

Academic Advising for the Program

241 Stevenson College
(831) 459-4988
ling@ucsc.edu

Undergraduate Advisor

The undergraduate advisor can advise you about requirements for the major, about prerequisites, and about many other aspects of your academic progress. During the academic year, there are regular drop-in office hours available and posted on the department website.

If none of the drop-in office hours work for you, email the undergraduate advisor at ling@ucsc.edu for an appointment.

Transfer students, please also refer to **Transfer Information and Policy.**

Peer Advisors

During the academic year, the department has a peer advising program to provide an additional advising resource for undergraduate majors. The peer advisors are advanced students in the major who can offer guidance and advice to other students. They hold regular office hours and provide one-on-one advising in the Linguistics Department office at Stevenson College (STEV 245). Peer advisors do not have signature authority on forms (i.e., Declaration of Major Petitions and study abroad planning forms). Students must see the undergraduate advisor for any forms requiring a department signature. We encourage any prospective and current linguistics majors to stop by during the peer advisors' office hours if they have questions about the linguistics program.

Faculty

You should feel free to meet with any faculty member for advising, but it may make sense to speak with the undergraduate advisor first, to find out which faculty member might be best placed to advise you about your interests or concerns. You can find the current office hours for all faculty members in the faculty directory. For issues specifically related to the undergraduate program, you can turn to the undergraduate program director.

Getting Started in the Major: Frosh

This major is not highly course intensive. Although it is advisable to begin taking courses toward the major in the first year, it is not required.

Here are four tips to keep in mind when embarking on your major in linguistics:

- Meet with a peer advisor to create your academic plan and get questions answered about your major.
- Determine how many language courses you need in order to fulfill your language competency requirement, as specified in the **Requirements and Planners** section. Begin any necessary language instruction as soon as possible. Visit the Languages and Applied Linguistics Department website to find out about language placement, articulation and course offerings. Many language placement exams take place just before classes start in September. You may opt to satisfy the mathematics/computer science requirement instead.
- Take at least one introductory linguistics course in your first year, and plan to take at least syntax and phonology in your second year. (Junior transfers: take all of these courses in your first year.) If linguistics is not for you, you should find this out early in order to consider a change in your plans.
- Plan to complete the bulk of your general education requirements early on. The sophomore, junior, and senior years can fill up quickly with major requirements (especially if you are planning to study abroad). Also, as general education courses are often lower-division courses, it can be frustrating to have to take them in the final quarters of your career when you would like to take more advanced courses.

Transfer Information and Policy

Transfer Admission Screening Policy

No major preparation courses are required prior to transfer for consideration of admission to UC Santa Cruz.

While not required for selection, transfer students are strongly encouraged to complete as much preparation as possible in the foreign language of their choosing. Transfer students admitted to UC Santa Cruz for the winter term who do not place into Level 2 or higher in a language placement test when they enter UC Santa Cruz may not be able to complete the major in a timely manner. Bear in mind that placement exams, and the resulting credit for the major, are only available for languages taught at UC Santa Cruz.

Prospective students are also encouraged to complete the Intersegmental General Education Transfer Curriculum (IGETC) or to complete all UC Santa Cruz general education requirements before matriculation.

Getting Started in the Major: Transfer Students

Consult with the undergraduate advisor before enrolling for your first term to create a two-year plan. Some required courses are only offered once a year, and careful planning is essential. Plan to take LING 50 and LING 53 in your first quarter, along with a language course. If you expect to test out of level 5 in your chosen language or plan to complete the Mathematics/Computer Science competency requirement, you need not enroll in a language course. Transfer students can declare the major in their second quarter after completing two gateway courses with a C+ or better.

Major Qualification Policy and Declaration Process

Major Qualification

The Linguistics Department has adopted a major qualification policy for linguistics majors that is intended to encourage students to take their performance in the gateway courses seriously and to help them lay a solid foundation for further course work in the major.

Transfer students, please also refer to **Transfer Information and Policy.**

In order to qualify for the linguistics major, a student must pass two gateway courses, with a grade of C+ or better in each:

LING 50	Introduction to Linguistics	5

And one of the following courses

LING 53	Semantics I	5
LING 101	Phonology I	5
LING 112	Syntax I	5
LING 171	Psycholinguistics I	5

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal the decision within 15 days from the date the notification was sent. They should do this by submitting a formal letter, addressed to the department's undergraduate program director, to the Linguistics Department office (Stevenson 241 or 243 or by email to ling@ucsc.edu). This letter should explain any extenuating circumstances that influenced performance in the gateway courses. Within 15 days of receipt of the appeal, the department will notify the student of the decision. The department may set conditions to be fulfilled within one quarter from the date of the appeal, such as achieving a minimum grade in a particular class.

How to Declare a Major

You should formally declare your major as early as possible in your academic career. Doing so will mean you get helpful advising. It will require you to plan out all the courses of the major. This means you will know you have time to meet all the necessary requirements for linguistics before you graduate.

Once you have successfully completed the two gateway courses, and/or you have reached your declaration deadline, you should do the following:

1) Please meet with the department advisor or a peer advisor, to complete or update your **academic plan**. If you are declaring a second major, please first complete an academic planning form with the advisor for your declared major. Major Degree Checklists are useful resources, which you may want to look over prior to the declaration session. You can find them in the Major Requirements section for the linguistics major on the department website.

2) **Petition to declare your major**. Log into MyUCSC and navigate to the Student Homepage. Select the Undergraduate Student eForms tile > Petition for Major/Minor. If you are already logged in to MyUCSC, you can simply use this link: Petition for Major/Minor via MyUCSC. The petition will automatically be routed to the department.

3) Attend one of the department's **Declaration Information Sessions**. These sessions are held in the first month of each quarter. Invitations to sign up for a declaration session are sent out by the first week of the quarter to all proposed majors through the Navigate/Slug Success system. If you have completed the gateway courses, and you do not receive an invitation by Week 2, please contact the department advisor for assistance. Please sign up well in advance, as these meetings tend to fill quickly.

The campus undergraduate advising website has further helpful information about declaring a major.

Letter Grade Policy

The two courses used for major qualification must be taken for a letter grade with a grade of C+ or better. All other courses used toward major requirements may be taken for a letter grade or pass/no pass. There is a campuswide requirement that you need to be aware of and to keep track of (no more than 25 percent of all of your UC Santa Cruz courses can be taken on a Pass/No Pass basis). Further information about campus letter grade policy is available at the website of the Office of the Registrar.

[Optional Catchall]

Course Substitution Policy

Students may substitute up to three outside courses for the upper-division electives requirement. These courses include Senior Thesis (LING 195), Independent Study (LING 199), courses from other UC Santa Cruz departments, and courses from other institutions. Substitutions must be upper-division courses and fit into a coherent program of study. A list of pre-approved outside courses is available for reference. Students should contact the department to inquire about using courses not on this list. Students may apply up to two quarters of LING 195 or one quarter of LING 199, but not both.

Double Majors and Major/Minor Combinations Policy

A student may **not** double major or major/minor in linguistics and language studies, as there is too much overlap between the two programs.

Study Abroad

Students majoring in linguistics should consider studying abroad in the course of their degree program. Studying abroad is a good way to cultivate and enhance your language skills, as well as to gain rich life experiences. Linguistics students have various opportunities to study abroad, for a summer, quarter, semester, or year. There are programs available for students of all levels of language ability, from language and culture programs for beginning or intermediate speakers, to full immersion programs for students with advanced language skills.

Study abroad does require careful planning, especially for those who wish to pursue a year-long program, or who wish to study abroad during the senior year. Meeting with your major advisor early and often throughout the study abroad planning process is encouraged. Before being approved for UC Education Abroad Program (EAP), you must declare your major. Also, majors must complete LING 101, and either LING 111 or LING 112, before they leave for any Global Learning programs that take place during the academic year. The department does not place any restrictions on summer study abroad.

If you plan to study abroad during your senior year and do not plan to return to UC Santa Cruz before graduating, your plan will be approved only when all major requirements have been completed prior to departure, and/or when it is clear that any remaining requirements can be satisfactorily completed abroad. Please consult with the undergraduate advisor before the end of your sophomore year if you are considering this option.

Most importantly: Students who wish to have a study-abroad course count toward the major must bring back syllabi, completed papers, and course evaluations to the department, so that the department can make a decision about whether the course satisfies a major requirement. Ideally, students should have courses pre-approved for the major before they go abroad. Students can visit the UCSC Campus Credit Abroad database to find pre-approved courses. A maximum of three outside courses may be used toward the major.

Students who are interested in studying abroad should contact the Global Learning Office (105 Classroom Unit, 459-2858). Global Learning staff can provide detailed information concerning Global Learning selection criteria and application procedures. The first step in preparing to study abroad is to set up a profile on the Global Learning website.

Honors

Students who wish to be considered for honors should meet the deadline posted by the Office of the Registrar for declaring the intent to graduate. It is important to minimize the number of major courses you take on a Pass/No Pass basis. Determination of honors is based on the student's

grades for all courses relevant to the major and other factors relevant to an assessment of academic excellence, such as research papers of professional quality. Generally, honors in the major are awarded only to the top 10 percent of those graduating in the major. Only those students whose performance in coursework is excellent will qualify. Highest honors are rarely awarded, and then only to students whose performance in coursework is outstanding and who have completed an outstanding senior thesis.

Preparation for the UC Santa Cruz Master's Degree

Every year, UC Santa Cruz undergraduates in the final year of their linguistics major can apply to be admitted into the graduate program to pursue the M.A. in theoretical linguistics. Interested students should discuss the possibility with one or more faculty members and formally apply online to the graduate program during the fall quarter of the senior year. For up-to-date information about the application process, consult the Linguistics Department's website; and see the Graduate Advisor and Program Coordinator. The combined B.A./M.A. program provides another pathway to the M.A. program.

Information About Linguistics Courses

The 80-level courses have no prerequisites. Although most of them will fulfill a general education requirement, they do not fulfill any requirements for the major. They are intended to introduce the concepts of linguistics through their relation to other areas of general interest.

LING 50, Introduction to Linguistics, introduces the subfields of the discipline. LING 53, Semantics 1; LING 100, Phonetics 1; LING 101, Phonology 1; LING 112, Syntax 1; and LING 171, Psycholinguistics 1, serve as entry courses to the specialized upper-division sequences. Upper-division courses often have at least two of these courses as prerequisites.

A variety of upper-division elective courses are offered each quarter. For a list of the current offerings, please see the department website.

To enroll in the graduate (200-level) courses, undergraduates need special permission from the instructor. Permission is usually granted only to especially motivated undergraduates who have completed all the named requirements for the major with excellent performance.

[Optional Catchall]

Requirements and Planners

Course Requirements

Lower-Division Courses

Take the following courses

LING 50	Introduction to Linguistics	5
LING 53	Semantics I	5

Foreign Language/Mathematics/Computer Science Requirement

Linguistics majors are required to demonstrate competency in either foreign language or mathematics/computer science. Choose one of the following options:

Foreign Language

Students opting to complete this requirement using foreign language may do so in one of the following three ways:

1. Demonstrate level 5 proficiency of a single language by completing one of the following courses or its equivalent: ARBC 5, CHIN 5, FREN 5, GERM 5, ITAL 5, JAPN 5, SPAN 5, SPHS 5. Each of these courses has prerequisites of levels 1-4 or their equivalent.

2. For languages at UCSC which are not offered through level 5 (Hebrew, Persian, Portuguese, Punjabi, or Yiddish), demonstrate level 3 proficiency by completing one of the following courses (or equivalent): HEBR 3, PERS 3, PORT 3, PUNJ 3, YIDD 3.
   In addition, students must complete level 3 of a second language. Level 3 of any language mentioned in options 1 or 2 are allowable for the second language. Each of these courses has prerequisites of levels 1 and 2 or their equivalent.

3. Demonstrate proficiency in Greek or Latin by completing either GREE 1, GREE 2, and one course from the LIT 184 series OR LATN 1, LATN 2, and one course from the LIT 186 series

Mathematics/Computer Science

Students with a strong formal background can choose to satisfy the mathematics/computer science competency requirement by demonstrating sufficient preparation in mathematics for advanced formal work in linguistics. This requirement is satisfied by passing two courses chosen from the following list:

CSE 5J	Introduction to Programming in Java	5
CSE 10	Introduction to Computer Science	5
CSE 12	Computer Systems and Assembly Language and Lab	7
CSE 13S	Computer Systems and C Programming	7
CSE 16	Applied Discrete Mathematics	5
CSE 20	Beginning Programming in Python	5
CSE 30	Programming Abstractions: Python	7
CSE 140	Artificial Intelligence	5
MATH 100	Introduction to Proof and Problem Solving	5
MATH 160	Mathematical Logic I	5
MATH 161	Mathematical Logic II	5
PHIL 9	Introductory Symbolic Logic	5

PHIL 108	Phenomenology	5
PHIL 123	Philosophy of Language	5
PSYC 100	Research Methods in Psychology	7
STAT 5	Statistics	5
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 131	Introduction to Probability Theory	5

CSE 20 has a test-out option which will be accepted for one of the two required courses.

STAT 7 has a required lab, STAT 7L. The linguistics major requires successful completion of the lecture, STAT 7. Successful completion of the lab, STAT 7L will count as credits toward total degree requirements.

Any course which has one of the courses listed above as a prerequisite may also be used toward the mathematics/computer science competency requirement.

PSYC 2 or SOCY 3B may substitute for STAT 5 in this requirement. These courses, however, are typically only available to majors and minors in those departments.

Upper-Division Courses

Students in the linguistics major are required to complete a minimum of 10 upper-division courses (50 upper-division credits) in linguistics and related disciplines, including seven named courses in linguistics:

Take the following courses:

LING 100	Sounds of the World's Languages: Phonetics I	5
LING 101	Phonology I	5
LING 171	Psycholinguistics I	5

Plus one of the following courses:

LING 111	Syntactic Structures	5
LING 112	Syntax I	5

And three of the following courses:

LING 102	Phonology II	5
LING 113	Syntax II	5
LING 116	Semantics II	5
LING 151	Phonetics II	5
LING 172	Psycholinguistics II	5

Electives

The major requires three five-credit courses chosen from LING 102-189 (excluding LING 111, LING 112, and LING 171) and/or LING 200-289 (one of which could satisfy the Senior Comprehensive). The three electives may be any combination of these two options. Students choosing to complete their senior comprehensive with a senior thesis may be able to apply up to two quarters of LING 195 toward their electives. See the Course Substitution Policy in the Information and Policies section for information on this and about using pre-approved outside courses not listed above. Students must receive instructor permission to enroll in graduate level courses.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in linguistics is satisfied by completing:

LING 101	Phonology I	5

Plus one of the following courses:

LING 111	Syntactic Structures	5
LING 112	Syntax I	5

Comprehensive Requirement

In their senior year, and after completing the Disciplinary Communication requirement, linguistics majors must satisfy the senior comprehensive requirement in one of three ways:

Option 1: Capstone course

Students complete a 2-credit senior research course, LING 190. Each instance of LING 190 is taught concurrently with one of the upper-division electives offered in that quarter. Students must enroll in **both** an instance of LING 190 (the **senior research course**) and its associated upper-division elective (the **capstone course**). This capstone course can also serve as one of the three linguistics electives required for the major.

Students must enroll *concurrently* in an upper-division elective and in the corresponding instance of the following course:

LING 190	Senior Research	2

Option 2: Senior thesis

The senior thesis is supervised by a faculty member. The proposal for a senior thesis must be submitted for approval by the department faculty at least three quarters prior to the quarter of graduation.

Students must enroll in the following course:

LING 195	Senior Thesis	5

Option 3: Graduate-level course

By exception, students in their senior year may enroll in a **graduate-level class**, by permission of instructor. This option is for students who have performed exceptionally in the available undergraduate courses in a particular sub-discipline of the field. Under these conditions, a graduate-level course may satisfy the senior exit requirement.

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit

requirements. See Undergraduate Graduation Requirements for more information.

Four-Year Linguistics Students

The following planner is a recommended academic plan **for four-year students** who wish to pursue the linguistics major.

Year	Fall	Winter	Spring	Summer
Entering				College 1A Summer Edge (optional)
1st (frosh)	College 1 LING 50	WRIT 1/WRIT 1E (if needed)	WRIT 2*	
2nd (soph)	LING 53 Foreign language level 1	LING 100 Foreign language level 2	LING 101 Foreign language level 3	
3rd (junior)	LING 111/LING 112 Foreign language level 4	LING 116 or LING 1XX elective Foreign language level 5	LING 113 or LING 1XX elective LING 171	
4th (senior)	LING 102 or LING 1XX elective	LING 1XX upper div elective	LING 190 Senior Research elective	**
	LING 1XX upper-div elective		LING 1XX capstone course or LING 195 Senior Thesis	

* WRIT 2 should be taken in or before spring quarter of the second year. It is a prerequisite for LING 101 and LING 111/LING 112.

**LING 190 is a 2-credit course taken concurrently with a capstone elective. Students who choose to write a thesis or take a graduate-level class need not take LING 190.

In addition to the specific courses shown in these planners, a student must complete courses satisfying the general education requirements. The courses in the four-year planner cover at least the following GE requirements: C, MF, SI, SR.

Linguistics Transfer Students

The following planner is a recommended academic plan **for junior transfer students** who wish to pursue the linguistics major.

Year	Fall	Winter	Spring	Summer
Entering				KRSG 1T Summer Edge (optional)
3rd (junior)	LING 50 LING 53 Foreign language level 1	LING 111/LING 112 LING 100 Foreign language level 2	LING 101 LING 171 Foreign language level 3	
4th (senior)	LING 102 or LING 1XX elective	LING 116 or LING 1XX elective	LING 113 or LING 1XX elective	

e		
LING 1XX upper-div elective	LING 1XX upper-div elective	LING 1XX capstone course or LING 195 Senior Thesis
Foreign language level 4	Foreign language level 5	LING 190 Senior Research*

*LING 190 is a 2-credit course taken concurrently with a capstone elective. Students who choose to write a thesis or take a graduate-level class need not take LING 190.

This planner assumes that a student has completed any required general education courses—including UC Santa Cruz or community college general education requirements—before coming to UCSC. This can be accomplished by completing the Intersegmental General Education Transfer Curriculum (IGETC).

Additional planning templates are available on the department website.

LINGUISTICS MINOR

Course Requirements

Complete the following requirements for the Linguistics Minor. Courses may be taken for a letter grade or Pass/No Pass.

Lower-Division Courses

LING 50	Introduction to Linguistics	5
LING 53	Semantics I	5

Upper-Division Courses

Take two of the following courses:

LING 100	Sounds of the World's Languages: Phonetics I	5
LING 101	Phonology I	5
LING 111	Syntactic Structures	5
LING 112	Syntax I	5
LING 171	Psycholinguistics I	5

Students may not apply both LING 111 and LING 112 toward the minor.

Upper-Division Electives

The minor requires three 5-credit courses chosen from LING 100-189 and/or LING 200-289.

The three courses may be any blend of these two options. As noted above, **students may not apply both LING 111 and LING 112 toward the minor**. See the Course Substitution Policy section for information about using pre-approved outside courses not listed above. Students must receive instructor permission to enroll in graduate level courses.

Course Substitution Policy

Students may substitute up to two outside courses for the Upper-Division Electives requirement. These courses include independent study (LING 199), courses from other UC Santa Cruz departments, and courses from other institutions. Substitutions must be upper-division courses and fit into a coherent program of study. A list of pre-approved outside courses is available for reference. Students should contact the department to inquire about using courses not on this list. Students may apply no more than one quarter of LING 199.

LANGUAGE STUDIES B.A.

Information and Policies

Introduction

Language studies is an interdisciplinary major offered by the Linguistics Department. It is designed to equip students with advanced competence in a foreign language and, at the same time, provide them with an understanding of the general nature of human language—its structure and use. The major also provides an opportunity to explore the culture or cultures connected with the language of concentration. The cultural context electives may include courses in art, history, literature or politics. Currently, majors may choose a concentration in Chinese, French, German, Italian, Japanese, or Spanish. Interested students should contact the Linguistics Department office early in their college careers to obtain essential information about requirements. The requirements for the major may also be found in the **Requirements and Planners tab** above.

Students interested in spending a portion of a year or a full year studying abroad should review the UCSC Global Learning website. A senior year abroad is approved only when all of the language proficiency requirements have been satisfied and when it is clear that any remaining courses can be satisfactorily completed abroad. Courses taken abroad may be used to satisfy major requirements only if approved by the undergraduate program director or a designated advisor. A maximum of three outside courses may be used toward the major.

Program Learning Outcomes

The program learning outcomes for this major are the following:

1. **Analytical Thinking**
   Students will formulate testable hypotheses, and present them clearly and completely. Students will accurately and insightfully use relevant evidence to evaluate hypotheses and determine routes for future investigation.

2. **Writing**
   Students will formulate well-organized written arguments. At the micro-level, sentences will be grammatical, follow appropriate conventions, and strike an appropriate balance of clarity and complexity. At the macro-level, sentences will be linked together into paragraphs, and paragraphs into logical sections of a larger document.

3. **Properties of Language**
   Students will apply analytical techniques to identify general properties of language, including but not limited to sound structure, word structure, sentence structure, meaning, use, and language processing. Students will explain the significance of relevant universal properties in some domain.

4. **Linguistics Theory and Investigation**
   Students will demonstrate an active command of linguistic theory and linguistic investigation in at least one area of linguistic theory, including but not limited to morphology, phonetics, phonology, pragmatics, psycholinguistics, syntax, and semantics.

5. **Second Language Proficiency**
   Students will demonstrate proficiency in a second language at an advanced level.

Academic Advising for the Program

241 Stevenson College
(831) 459-4988
ling@ucsc.edu

Undergraduate Advisor

The undergraduate advisor can advise you about requirements for the major, about prerequisites, and about many other aspects of your academic progress. During the academic year, there are regular drop-in office hours available and posted on the department website.

If none of the drop-in office hours work for you, email the undergraduate advisor at ling@ucsc.edu for an appointment.

Transfer students, please also refer to Transfer Information and Policy.

Peer Advisors

During the academic year, the department has a peer advising program to provide an additional advising resource for undergraduate majors. The peer advisors are advanced students in linguistics or language studies who can offer guidance and advice to other students. They hold regular office hours and provide one-on-one advising in the Linguistics Department office at Stevenson College (245 Stevenson). Peer advisors do not have signature authority on forms (i.e., Declaration of Major Petitions and study abroad planning forms). Students must see the undergraduate advisor for any forms requiring a department signature. We encourage any prospective and current language studies majors to stop by during the peer advisors' office hours if they have questions about the program.

Faculty

You should feel free to meet with any faculty member for advising, but it may make sense to speak with the undergraduate advisor first, to find out which faculty member might be best placed to advise you about your interests or concerns. You can find the current office hours for all faculty members in the faculty directory. For issues specifically related to the undergraduate program, you can turn to the undergraduate program director.

Getting Started in the Major: Frosh

This major is not highly course intensive. Although it is advisable to begin taking courses toward the major in the first year, it is not required.

Here are a few tips to keep in mind when embarking on your major in language studies:

- Meet with a peer advisor to create your academic plan and get questions answered about your major.
- Determine how many language courses you need and begin any necessary language instruction as soon as possible. Visit the Languages and Applied Linguistics Department website to find out about language placement, articulation and course offerings. Many language placement exams take place just before classes start in September.
- Prospective students should declare the major as early as possible so that they can complete the language, linguistics, and context requirements within the allowed period of enrollment. Major requirements are specified in the Requirements and Planners section of this statement.
- Students who wish to include a study abroad experience in their course of study will have to coordinate their choice of time abroad with the scheduling of UC Santa Cruz courses.
- Plan to complete the bulk of your general education requirements early on. The sophomore, junior, and senior years can fill up quickly with major requirements (especially if you are planning to study abroad). Also, as general education courses are often lower-division courses, it can be frustrating to have to take them in the final quarters of your career when you would like to take more advanced courses.

Transfer Information and Policy

Transfer Admission Screening Policy

No major preparation courses are required prior to transfer for consideration of admission to UC Santa Cruz.

While not required for selection, transfer students are strongly encouraged to complete as much preparation as possible in the foreign language of their choosing. Students pursuing the concentration in Japanese or Chinese should place into Level 4 (Level 5 for students entering in the winter term) or higher

when they enter UC Santa Cruz, if they wish to complete the major in two years. Students in other languages may be able to complete the major in two years if they have completed general education requirements. Transfer students admitted to UC Santa Cruz for the winter term who do not place into Level 2 or higher in a language placement test when they enter UC Santa Cruz may not be able to complete the major in a timely manner.

Prospective students are also encouraged to complete the Intersegmental General Education Transfer Curriculum (IGETC) or to complete all UC Santa Cruz general education requirements before matriculation.

Getting Started in the Major: Transfer Students

Consult with the undergraduate advisor before enrolling for your first term to create a two-year plan. Some required courses are only offered once a year, and careful planning is essential. Plan to take LING 50 and LING 53 in your first quarter, along with a language course. Visit the Languages and Applied Linguistics Department website to find out about language placement, articulation, and course offerings. Many language placement exams take place just before classes start in September. Transfer students can declare the major in their second quarter, after completing two gateway courses with a C+ or better.

Major Qualification Policy and Declaration Process

Major Qualification

The Linguistics Department has adopted a major qualification policy for language studies majors that is intended to encourage students to take their performance in the gateway courses seriously and to help them lay a solid foundation for further coursework in the major.

Transfer students, please also refer to **Transfer Information and Policy**

In order to qualify for the language studies major, a student must pass two gateway courses with a grade of C+ or better in each:

LING 50	Introduction to Linguistics	5

And one of the following courses

LING 53	Semantics I	5
LING 101	Phonology I	5
LING 112	Syntax I	5
LING 171	Psycholinguistics I	5

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal the decision within 15 days from the date the notification was sent. They should do this by submitting a formal letter, addressed to the department's undergraduate program director, to the Linguistics Department office (Stevenson 241 or 243 or by email to ling@ucsc.edu). This letter should explain any extenuating circumstances that influenced performance in the gateway courses. Within 15 days of receipt of the appeal, the department will notify the student of the decision. The department may set conditions to be fulfilled within one quarter from the date of the appeal, such as achieving a minimum grade in a particular class.

How to Declare a Major

You should formally declare your major as early as possible in your academic career. Doing so will mean you get helpful advising. It will require you to plan out all the courses of the major. This means you will know you have time to meet all the necessary requirements for language studies before you graduate.

Once you have successfully completed the two gateway courses, and/or you have reached your declaration deadline, you should do the following:

1) Please meet with the department advisor or a peer advisor, to complete or update your **academic plan**. If you are declaring a second major, please first complete an academic planning form with the advisor for your declared major. Major Degree Checklists are useful resources, which you may want to look over prior to the declaration session. You can find them in the Major Requirements section for the language studies major on the department website.

2) **Petition to declare your major**. Log into MyUCSC and navigate to the Student Homepage. Select the Undergraduate Student eForms tile > Petition for Major/Minor. If you are already logged in to MyUCSC, you can simply use this link: Petition for Major/Minor via MyUCSC. The petition will automatically be routed to the department.

3) Attend one of the department's **Declaration Information Sessions**. These sessions are held in the first month of each quarter. Invitations to sign up for a declaration session are sent out by the first week of the quarter to all proposed majors through the Navigate/Slug Success system. If you have completed the gateway courses, and you do not receive an invitation by Week 2, please contact the department advisor for assistance. Please sign up well in advance, as these meetings tend to fill quickly.

The campus undergraduate advising website has further helpful information about declaring a major.

Letter Grade Policy

The two courses used for major qualification must be taken for a letter grade with a grade of C+ or better. All other courses used toward major requirements may be taken for a letter grade or pass/no pass. There is a campuswide requirement that you need to be aware of and to keep track of (no more than 25 percent of all of your UC Santa Cruz courses can be taken on a Pass/No Pass basis). Further information about campus letter grade policy is available at the website of the Office of the Registrar.

Optional Catchall

Course Substitution Policy

Students may substitute up to three outside courses toward the upper-division electives requirement. These courses include

Senior Thesis (LING 195), Independent Study (LING 199), language-focused courses from other UC Santa Cruz departments, and courses from other institutions. Substitutions must be upper-division courses and fit into a coherent program of study. A list of pre-approved outside courses is available for reference. Students should contact the department to inquire about using courses not on this list. Students may apply up to two quarters of LING 195 or one quarter of LING 199, but not both. Advanced language courses taken at UCSC and courses listed as Cultural Context Courses do not count toward the three-course limit.

Double Majors and Major/Minor Combinations Policy

A student may **not** double major or major/minor in linguistics and language studies, as there is too much overlap between the two programs.

Study Abroad

Students majoring in language studies often spend at least one quarter studying abroad in the course of their degree program. Studying abroad is a good way to cultivate and enhance your language skills, as well as to gain rich life experiences. There are programs available for students of all levels of language ability, from language and culture programs for beginning or intermediate speakers, to full immersion programs for students with advanced language skills.

Study abroad does require careful planning, especially for those who wish to pursue a yearlong program, or who wish to study abroad during the senior year. Meeting with your major advisor early and often throughout the Global Learning planning process will help to mitigate lengthening time to degree. Before being approved for the UC Education Abroad Program (EAP), you must declare your major. Also, majors must complete LING 101, and either LING 111 or LING 112, before they leave for any study abroad programs that take place during the academic year. The department does not place any restrictions on summer study abroad.

If you plan to study abroad during your senior year and do not plan to return to UC Santa Cruz before graduating, your plan will be approved only when all major requirements have been completed prior to departure, and/or when it is clear that any remaining requirements can be satisfactorily completed abroad. Please consult with the department advisor before the end of your sophomore year if you are considering this option.

Language studies majors can satisfy certain major requirements in the course of study abroad; for instance, some of the context elective course requirements. No more than three elective course requirements can be satisfied abroad. Students can also make progress in the language component of the language studies major while studying abroad. In order to determine the level of proficiency achieved, they must take a placement exam upon return. Whether a given course requirement in linguistics can be satisfied abroad depends on the course and the study site.

Most importantly: Students who wish to have a study-abroad course count toward the major must bring back syllabi, completed papers, and course evaluations to the department, so that the department can make a decision about whether the course satisfies a major requirement. Ideally, students should have courses pre-approved for the major before they go abroad. Students can visit the UCSC Campus Credit Abroad database to find pre-approved courses. Remember that a maximum of three outside courses may be used toward the major.

Students who are interested in studying abroad should contact the Global Learning Office (105 Classroom Unit, 459-2858). Global Learning staff can provide detailed information concerning Global Learning selection criteria and application procedures. The first step in preparing to study abroad is to set up a profile on the Global Learning website.

Honors

Students who wish to be considered for honors should meet the deadline posted by the Office of the Registrar for declaring the intent to graduate. It is important to minimize the number of major courses you take on a Pass/No Pass basis. Determination of honors is based on the student's grades for all courses relevant to the major and other factors relevant to an assessment of academic excellence, such as research papers of professional quality. Generally, honors in the major are awarded only to the top 10 percent of those graduating in the major. Only those students whose performance in coursework is excellent will qualify. Highest honors are rarely awarded, and then only to students whose performance in coursework is outstanding and who have completed an outstanding senior thesis.

Preparation for the UC Santa Cruz Master's Degree

Every year, UC Santa Cruz undergraduates in the final year of their language studies major can apply to be admitted into the graduate program to pursue the M.A. in theoretical linguistics. Interested students should discuss the possibility with one or more faculty members and formally apply online to the graduate program during the fall quarter of the senior year. For up-to-date information about the application process, consult the Linguistics Department's website; and see the graduate advisor and program coordinator. The combined B.A./M.A. program provides another pathway to the M.A. program.

Information About Linguistics Courses

The 80-level courses have no prerequisites. Although most will fulfill a general education requirement, they do not fulfill any requirements for the major. They are intended to introduce the concepts of linguistics through their relation to other areas of general interest.

LING 50, Introduction to Linguistics, introduces the subfields of the discipline. LING 53, Semantics 1; LING 100, Phonetics 1; LING 101, Phonology 1; LING 112, Syntax 1; and LING 171, Psycholinguistics 1, serve as entry courses to the specialized upper-division sequences. Upper-division courses generally have at least two of these courses as prerequisites.

A variety of upper-division elective courses are offered each quarter. For a list of the current offerings, please see the department website.

To enroll in the graduate (200-level) courses, undergraduates need special permission from the instructor. Permission is usually granted only to especially motivated undergraduates who have completed all the named requirements for the major with excellent performance.

Optional Catchall

Requirements and Planners

Course Requirements

Language studies majors must satisfy course requirements in languages and linguistics and complete elective coursework in linguistics and/or the cultural context of the language of concentration.

Lower-Division

Lower-Division Language Requirements

Students must demonstrate a level of competency in the language of concentration. This is accomplished by completing one of the Level 6 language courses below, or its equivalent. These courses all have prerequisites of levels 1-5 or their equivalent.

CHIN 6	Second-Year Chinese	5
FREN 6	Second-Year French	5
ITAL 6	Second-Year Italian	5
JAPN 6	Second-Year Japanese	5
SPAN 6	Second-Year Spanish	5
SPHS 6	Spanish for Heritage Speakers	5

Lower-Division Linguistics Requirements

LING 50	Introduction to Linguistics	5
LING 53	Semantics I	5

Upper-Division

Students in the language studies major are required to complete a minimum of 10 upper-division courses (50 upper-division credits) in linguistics, cultural context, and advanced language study. The requirements include three named courses in linguistics and at least one upper-division course conducted in the language of concentration.

Advanced Language Course

For students concentrating in French, German, Italian, or Spanish, one 5-credit advanced language course is required. For students concentrating in Chinese or Japanese, two 5-credit advanced language courses are required, the second of which counts toward the upper-division electives requirement. Courses must be within the language of concentration and can be chosen from the following:

- Chinese: CHIN 100-199
- French: FREN 100-199 or from the LIT 182 series
- German: GERM 100-199 or from the LIT 183 series
- Italian: ITAL 100-199 (excluding ITAL 101) or from the LIT 185 series
- Japanese: JAPN 100-199
- Spanish: SPAN 100-199, SPHS 100-199, or from the LIT 188 or 189 series

Note: The LIT courses listed above may only be used to fulfill the Advanced Language requirement if a student has completed or tested out of Level 6 of the corresponding lower-division language prior to taking the class. If Level 6 has not yet been completed in that language, students may use the LIT courses toward the upper-division electives requirement.

Upper-Division Linguistics Requirements

LING 100	Sounds of the World's Languages: Phonetics I	5
LING 101	Phonology I	5

One of the following courses:

LING 111	Syntactic Structures	5
LING 112	Syntax I	5

Plus the Senior Comprehensive requirement

See Comprehensive Requirement section below for details.

Electives

The major requires five 5-credit upper-division elective courses. Courses may be chosen from:

- LING 102-189 (excluding LING 111 and LING 112)
- LING 200-289 (one of which could satisfy the senior comprehensive)
- The list of approved cultural context courses
- Additional advanced language courses listed above

The five electives may be any combination of these four options. Cultural context courses allow students to study disciplines such as literature, history, and politics as they relate to their language of concentration. Cultural context courses and advanced language courses must align with the language of concentration. Students choosing to complete their senior comprehensive with a Senior Thesis may be able to apply up to two quarters of LING 195 toward their electives. See the Course Substitution Policy in the Information and Policies section for information on this and about using pre-approved outside courses not listed above. Students must receive instructor permission to enroll in graduate level courses.

A list of course options being offered in the upcoming quarters is available on the Linguistics Department's Language Studies Major Requirements webpage.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. The DC requirement in language studies is satisfied by completing:

LING 101	Phonology I	5

Plus one of the following courses:

LING 111	Syntactic Structures	5
LING 112	Syntax I	5

Comprehensive Requirement

In their senior year, and after completing the Disciplinary Communication requirement, language studies majors must satisfy the senior comprehensive requirement in one of three ways:

Option 1: Capstone Course

Students complete a 2-credit senior research course, LING 190. Each instance of LING 190 is taught concurrently with one of the upper-division linguistics electives offered in that quarter. Students must enroll in **both** an instance of LING 190 and its associated upper-division elective. This elective can also serve as the one linguistics elective required for the major.

Students must enroll **concurrently** in an upper-division elective and in the corresponding instance of the following course:

LING 190	Senior Research	2

Option 2: Senior Thesis

The senior thesis is supervised by a faculty member. The proposal for a senior thesis must be submitted for the approval of the department faculty at least three quarters prior to the quarter of graduation. The senior thesis is an original investigation of the major language in some relevant way, such as the linguistic structure or history of the language or its historical, literary, cultural, sociological, ethnographic, or political context.

Students must enroll in the following course:

LING 195	Senior Thesis	5

Option 3: Graduate-Level Course

By exception, students in their senior year may enroll in a **graduate-level linguistics class**, by permission of the instructor. This option is for students who have performed exceptionally in the available undergraduate courses in a particular sub-discipline of the field. Under these conditions, a graduate-level course may may satisfy the senior exit requirement.

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Four-Year Students

The following is a recommended academic plan for four-year students who wish to pursue the language studies major.

	Fall	Winter	Spring	Summer
Entering				College 1A Summer Edge (optional)
1st(frosh)	College 1 LING 50	WRIT 1/WRIT 1E (if needed)	WRIT 2*	
2nd (soph)	LING 53 Foreign language level 1	LING 100 Foreign language level 2	LING 101 Foreign language level 3	
3rd (junior)	Context 1XX upper-division elective Foreign language level 4	LING 111/LING 112 Foreign language level 5	Context 1XX upper-division elective Foreign language level 6	
4th (senior)			LING 1XX capstone course	

		or LING 195 Senior Thesis
Context 1XX upper-division elective	Context 1XX upper-division elective *or* Foreign language 1XX upper-division language	LING 190 Senior Research **
Foreign language 1XX upper-division language	Context 1XX upper-division elective	

* WRIT 2 should be taken in or before spring quarter of the second year. It is a prerequisite for LING 101 and LING 111/ LING 112.

**LING 190 is a 2-credit course taken concurrently with a capstone elective. Students who choose to write a thesis or take a graduate-level class need not take LING 190.

The second upper-division foreign language course is required only for students with a concentration in Chinese or Japanese. In addition to the specific courses shown in these planners, a student must complete courses satisfying the general education requirements. The courses in the four-year planner cover at least the following general education requirements: C, CC, MF, SI.

Junior Transfer Students, Language Studies

The following is a recommended academic plan for junior transfer students who wish to pursue the language studies major.

	Fall	Winter	Spring	Summer
Entering				KRSG 1T Summer Edge (optional)
1st (junior)	LING 50 LING 53 Foreign language level 4	LING 100 LING 111/LING 112 Foreign language level 5	LING 101 Context 1XX upper-division elective Foreign language level 6	
2nd (senior)	Context 1XX upper-division elective Foreign language 1XX upper-division language	Context 1XX upper-division elective Context 1XX upper-division elective **or** Foreign language 1XX upper-division language	LING 1XX capstone course or LING 195 Senior Thesis LING 190 Senior Research* Context 1XX upper-division elective	

*LING 190 is a 2-credit course taken concurrently with a capstone elective. Students who choose to write a thesis or take a graduate-level class need not take LING 190.

Note: this major planner presumes that the student enters UC Santa Cruz having already completed three quarters of foreign language or having equivalent proficiency. The second upper-division foreign language course is required only for students with a concentration in Chinese or Japanese. This planner also

assumes that a student has completed any required GE courses — including UC Santa Cruz or community college GE requirements—before coming to UCSC. This can be accomplished by completing the Intersegmental General Education Transfer Curriculum (IGETC).

Additional planning templates are available on the department website.

LANGUAGE STUDIES MINOR

Course Requirements

Complete the following requirements for the language studies minor. Courses may be taken for a letter grade or Pass/No Pass.

Lower-Division Courses

Take the following course:

LING 50	Introduction to Linguistics	5

Lower-Division Language

Students must demonstrate a level of competency in the language of concentration. This is accomplished by completing one of the Level 6 language courses below, or its equivalent. These courses all have prerequisites of levels 1-5 or their equivalent.

CHIN 6	Second-Year Chinese	5
FREN 6	Second-Year French	5
ITAL 6	Second-Year Italian	5
JAPN 6	Second-Year Japanese	5
SPAN 6	Second-Year Spanish	5
SPHS 6	Spanish for Heritage Speakers	5

Upper-Division Courses

The minor requires 25 upper-division credits. These requirements are comprised of two required linguistics courses, one advanced language course, and two electives, as follows:

Take the following course:

LING 100	Sounds of the World's Languages: Phonetics I	5

Plus one of the following courses:

LING 111	Syntactic Structures	5
LING 112	Syntax I	5

Advanced Language Requirement

One 5-credit Advanced Language course is required. Courses must be within the language of concentration and can be chosen from the following:

- Chinese: CHIN 100-199
- French: FREN 100-199 or from the LIT 182 series
- German: GERM 100-199 or from the LIT 183 series
- Italian: ITAL 100-199 (excluding ITAL 101) or from the LIT 185 series
- Japanese: JAPN 100-199
- Spanish: SPAN 100-199, SPHS 100-199, or from the LIT 188 or 189 series

Note: The LIT courses listed above may only be used to fulfill the Advanced Language requirement if a student has completed or tested out of Level 6 of the corresponding lower-division language prior to taking the class. If Level 6 is not yet completed in that language, students may use the LIT courses toward the Cultural Context/Upper-Division Electives Requirement.

Upper-Division Electives

The minor requires two 5-credit upper-division elective courses. Courses may be chosen from:

- LING 101-189 (excluding LING 111 and LING 112)
- LING 200-289
- The list of approved cultural context courses
- Additional Advanced Language Courses listed above

The two courses may be any combination of these four options. Cultural context courses allow students to study disciplines such as literature, history, and politics as they relate to their language of concentration. Cultural context courses and advanced language courses must align with the language of concentration. See the Course Substitution Policy section for information about using pre-approved outside courses not listed above. Students must receive instructor permission to enroll in graduate-level courses.

A list of course options being offered in the upcoming quarters is available.

Course Substitution Policy

Students may substitute up to two outside courses toward the Upper-Division Electives requirement. These courses include independent study (LING 199), language-focused courses from other UC Santa Cruz departments, and courses from other institutions. Substitutions must be upper-division courses and fit into a coherent program of study. A list of pre-approved outside courses is available for reference. Students should contact the department to inquire about using courses not on this list. Students may apply no more than one quarter of LING 199. Advanced language courses taken at UCSC and courses listed as Cultural Context Courses do not count toward the two-course limit.

LINGUISTICS CONTIGUOUS BACHELOR'S/MASTER'S PATHWAY

The B.A./M.A. pathway in linguistics is a demanding, selective option that allows students who are well prepared

and well motivated to complete the requirements for both degrees in five years rather than the usual six.

Admission to the pathway has two stages. In the first stage, interested students consult with the undergraduate advisor to learn about the process and request the application form. They also arrange meetings with one or more linguistics faculty members. An application can be successful only if it has benefitted from this consultation with a linguistics faculty member at least once, and ideally more, to discuss the student's goals in linguistics. Students are required to do this before submitting their application.

Applications for the B.A./M.A. pathway in linguistics must be submitted by the last business day of the sixth full week of the first quarter of their junior year. Transfer students must apply by the end of their second quarter of enrollment. In order to be accepted at this first stage, students must have demonstrated outstanding performance across linguistics courses, including excellence in at least three courses that are named requirements for the linguistics major. Students accepted at this initial stage are assigned a faculty mentor who monitors their progress closely.

At the second stage of the admission procedure, students apply in their senior year to be admitted to the M.A. program through UC Santa Cruz's normal graduate admissions process. If accepted, ideally they complete all course requirements and complete and defend the M.A. thesis by the end of the fifth year.

Students in the B.A./M.A. pathway take a number of graduate courses in their senior year which are selected in close consultation with the faculty mentor. Performance in these courses forms a central part of the ongoing evaluation process. If a student's performance does not meet the standards set for the pathway, the student completes the B.A. at the end of the senior year and does not proceed to the M.A.

Graduate courses required for the M.A. are taken partly in the senior year and partly in the fifth year. The M.A. thesis is written in the fifth year. Thus, by the end of the fifth year, students in the pathway will have fulfilled the requirements for both the B.A. and the M.A. degrees. Students who need additional time may remain in the pathway until the M.A. thesis is completed and defended. Students admitted into the B.A./M.A. pathway must complete a minimum of 35 credits as an M.A. student, regardless of the number of graduate courses completed as an undergraduate.

LINGUISTICS M.A.

Introduction

The M.A. degree involves a two-year course of study. It may be completed in one year by students who have a B.A. in linguistics from UC Santa Cruz and who have taken a number of the core graduate courses during their undergraduate career; the combined B.A./M.A. program (p. 234) provides another pathway to the M.A. program.

Every year, UC Santa Cruz undergraduates in the final year of their linguistics or language studies major can apply to be admitted into the graduate program to pursue the M.A. in theoretical linguistics. Interested students should discuss the possibility with one or more faculty members and formally apply online to the graduate program during the fall quarter of the senior year.

For up-to-date information about the application process, consult the Linguistics Department's website; and see the graduate coordinator.

Requirements

Course Requirements

A minimum of 45 credits of graduate-level work.

In addition to the requirements outlined below, students must enroll in the following courses:

- LING 240 (The Pedagogy of Linguistics), to be taken in the fall quarter of years 1 and 2.
- LING 296 (Linguistics Colloquium), to be taken each quarter in the program.

LING 240 and LING 296 do not count toward the required 45 credits.

LING 240	The Pedagogy of Linguistics	1
LING 296	Linguistics Colloquium	2

The following courses must be taken by all students.

LING 211	Phonology A	5
LING 221	Syntax A	5
LING 231	Semantics A	5

All students are required to take two additional core courses drawn from the following list:

LING 212	Phonology B	5
LING 222	Syntax B	5
LING 232	Semantics B	5

Students must take the third core course from the above list of 'B' courses, or one course from the following list:

LING 214	Phonetics	5
LING 257	Psycholinguistics and Linguistic Theory	5
LING 280	Proseminar in Experimental Linguistics	5
LING 282	Field Methods	5

Electives

Additionally students must take **three electives** that form a coherent plan of study, as determined by the student's advisor in consultation with the student. These electives are typically drawn from graduate courses offered by Linguistics and other related disciplines and independent study courses with Linguistics faculty.

The nine required courses must be taken as 5-credit courses.

Foreign Language Requirements

Reading competence in one foreign language, to be demonstrated by examination at the end of the first year of study.

Master's Thesis

Students in the master's program complete a master's thesis in accordance with the thesis capstone (Plan I) curriculum. This thesis often grows out of a promising term paper written by the student, and is read by a committee composed of three faculty members in linguistics. Preparation for research projects should begin far in advance. In general, a good goal for those working on their M.A. thesis is to approach a possible thesis chair by the end of their first academic year.

In consultation with the thesis chair, a committee to read and evaluate the M.A. thesis is appointed by the department, and the department notifies the Graduate Division of the committee's members by the end of the second week of the quarter in which the degree is to be granted. The majority of the three-member thesis reading committee must be members of the Santa Cruz Division of the Academic Senate.

After the student defends the M.A. thesis, they must submit a copy of the completed thesis to the Graduate Division by the last day of the term in which the student expects to receive their degree. The thesis must be formatted according to UC Santa Cruz specifications (see Dissertation and Thesis Preparation Guidelines).

Optional Catchall

Applying for Graduation

See the Graduate Student Handbook for administrative requirements.

See the Academic and Administrative Calendar for Announcement of Candidacy dates.

Note: The completed master's thesis, and cover sheet, should be submitted to the Graduate Division and a pdf copy of the thesis, and cover sheet, should be submitted to the graduate coordinator.

LINGUISTICS PH.D.

Introduction

The graduate program in linguistics at the University of California, Santa Cruz is a small, focused program in linguistic theory leading to Doctor of Philosophy (Ph.D.) or Master of Arts (M.A.) degrees. The research interests of faculty and students draw mostly on the framework of generative grammar, with a primary focus on theoretical and experimental approaches to morphology, phonetics, phonology, pragmatics, psycholinguistics, semantics, and syntax. Research strengths also include the study of various languages, computational methods, and field methods.

While committed to training in theoretical depth, the program makes possible an unusual breadth of theoretical and experimental understanding. Research in syntax focuses on ways in which generative theory and language-particular analysis inform one another. Faculty expertise covers principles and parameters theory, minimalism, and experimental syntax. Research in phonetics and phonology is pursued in various current frameworks, including optimality theory and dispersion theory. The issues covered range from phonetics and the phonetics-phonology interface to prosodic theory, prosodic morphology, and the syntax-phonology interface. Research in semantics applies formal, model-theoretic techniques to illuminate the interface between syntactic structure and interpretation and the role of semantic competence in the pragmatics of utterance interpretation. Experimental research in these areas reaches out to a broad range of issues in psycholinguistics and cognitive science.

The faculty have expertise in a diverse range of languages, including Chamorro, German, Hebrew, Hindi, Hungarian, Irish, Japanese, Kaqchikel Mayan, Uspanteko Mayan, Latin, Northern Paiute, Persian, Polish, Romanian, Russian, Spanish, Turkish, and Zapotec.

From the beginning of their studies, students are engaged in original research and critical evaluation, since the program aims to provide sophisticated training as a foundation for a career in academic research and teaching. The program begins with a sequence of foundation courses in phonetics, phonology, syntax, semantics, and psycholinguistics, addressing both formal and experimental approaches. Subsequent coursework emphasizes depth; it is increasingly centered around the doctoral student's independent research, culminating in the completion of a dissertation.

Undergraduate Preparation

Applications are invited from students who have completed an undergraduate linguistics major or who have demonstrated excellence in some related discipline (psychology, mathematics, computer science, anthropology) and have the equivalent of a minor in linguistics. A student applying for admission to this program should, at a minimum, have a good foundation in at least one of the following: phonetics, phonology, psycholinguistics, morphology, semantics, or syntax. Students entering the program with a deficiency in one or more areas may need to take appropriate undergraduate courses at UC Santa Cruz during the first year of graduate study.

For information on applying and admissions, please consult the Linguistics Department website.

Advancement to Candidacy

Course Requirements

A minimum of 65 credits of graduate-level work.

In addition to the requirements outlined below, students must enroll in the following courses:

- LING 240 (The Pedagogy of Linguistics), to be taken in the fall quarter of years 1 and 2.
- LING 296 (Linguistics Colloquium), to be taken each quarter in the program.

LING 240 and LING 296 do not count toward the required 65 credits.

LING 240	The Pedagogy of Linguistics	1
LING 296	Linguistics Colloquium	2

All students are required to take the following eight core courses:

LING 211	Phonology A	5
LING 212	Phonology B	5
LING 214	Phonetics	5
LING 221	Syntax A	5
LING 222	Syntax B	5
LING 231	Semantics A	5
LING 232	Semantics B	5
LING 257	Psycholinguistics and Linguistic Theory	5

Plus one of the following courses:

LING 280	Proseminar in Experimental Linguistics	5
LING 282	Field Methods	5

Each student must also take four seminars.

One of these must be LING 290 (Research Seminar) and the remaining three seminars or proseminars must form a coherent program of study, as determined by the student's adviser in consultation with the student.

The 13 required courses must be taken as 5-credit courses.

Foreign Language Requirements

Reading competence in one foreign language, to be demonstrated by examination at the end of the first year of study.

Teaching Requirement

Pre-Qualifying Requirements

Two qualifying papers (QP), each in a distinct area, must be separately and orally defended by the end of the third year as part of the requirements for advancement to candidacy.

Qualifying Examination

After a student successfully defends the two qualifying papers, they proceed to prepare for the qualifying exam (QE) in order to advance to candidacy. The function of the qualifying exam is to determine whether the student has achieved sufficient competence in a chosen subfield to be able to proceed to dissertation research. The QE is based on a substantial research paper written by the student and presented to the committee at least two weeks in advance of the exam. The topic of this paper is decided by the QE chair in consultation with the student. In most cases, it will be a revised version of one of the QPs that the student has successfully defended. Whether or not the paper originated as a QP, it must be in the subfield in which the student plans to pursue dissertation research.

Post-Qualifying Requirements

Dissertation Prospectus
The dissertation prospectus lays out the direction of research that the student plans to pursue in the dissertation. It relates the student's planned research to previous relevant research and to the larger questions with which the field is engaged. This milestone can be satisfied by the QE paper at the discretion of the faculty adviser.

[Optional Catchall]

Dissertation

Dissertation

The final requirement for the Ph.D. degree is the completion of a dissertation representing a significant contribution in some central area of linguistic research. At the dissertation stage, students enroll each quarter in LING 299A (Thesis Research) and LING 296 (Linguistics Colloquium).

Dissertation Defense

Once a student has completed the dissertation, they defend it at a public dissertation defense that is generally attended by graduate students and faculty in linguistics. The candidate first presents the results of the dissertation and then responds to questions, first from committee members, and then, time permitting, from the audience. Afterwards, the committee confers privately and decides either to accept the dissertation, reject it, or accept it provisionally, pending specific revisions. Following the defense, the candidate will revise the dissertation according to the committee's recommendations and then submit the final copy to the Graduate Division and graduate coordinator. See the Graduate Handbook for administrative requirements.

A copy of the completed dissertation, formatted according to UC Santa Cruz specifications, should be electronically submitted to the Graduate Division office (see Dissertation and Thesis Submission Guidelines) and an original, signed cover sheet should be submitted to the Graduate Division office as well. In addition, a pdf copy of the dissertation and physical copy of the cover sheet should be submitted to the graduate coordinator.

Academic Progress

The Linguistics Department faculty meet at the end of spring quarter each year to ensure that all graduate students are making timely progress in the program. Students may receive letters from the faculty based on this discussion.

To remain in good academic standing, a student must make timely progress toward degree completion and satisfactorily meet the following standards of scholarship established by the Graduate Council. Please see the Graduate Division handbook for details about 'Academic Good Standing' and 'Time to Degree,'

Applying for Graduation

See the Graduate Handbook for administrative requirements.

See the Academic and Administrative Calendar for Announcement of Candidacy dates.

NOTE: The completed dissertation, and cover sheet, should be submitted to the Graduate Division and a pdf copy of the dissertation, and cover sheet, should be submitted to the graduate coordinator.

Middle Eastern and North African Studies (p. 264)

Philosophy (p. 266)

Spanish Studies (p. 213)

The study of literature at UCSC is organized as an interdisciplinary field coordinated through a single Department of Literature, including modern and ancient literatures in the original language and in translation, literary theory, and creative writing. This structure fosters innovative and comparative approaches to literature among both faculty and students. Courses in the department encompass traditional literary history and interpretation, cross-cultural inquiry and current theoretical debates, and new media. The Literature Department also sponsors the Italian studies minor.

UNDERGRADUATE PROGRAM

Literature majors learn to read, think, and write critically. These skills have wide applicability, and offer pathways into related disciplines such as history, philosophy, psychology, sociology, anthropology, politics, and the history of art and visual culture. Literature majors enter a variety of careers ranging from law and journalism to management, government, non-profits, international studies, publishing, technical writing, and teaching at all levels. The literature major prepares students for careers in digital storytelling and electronic media; film, television, and video; theater and the visual arts; and many other fields.

The Literature Department faculty requires that all literature majors have basic proficiency in a second language. Proficiency in more than one language enhances understanding of any literature and culture. Graduate programs in literature and other humanities disciplines generally require competence in at least one language other than English.

GRADUATE PROGRAM

The graduate program in literature is relatively small, and students work closely with an internationally recognized faculty throughout their graduate careers. Graduate students are able to take advantage of a rich array of intellectual and cultural events, to participate in collaborative research clusters, and to attend lectures by scholars whose work is transforming the discipline. The goal of the program is to develop scholars who will be qualified to teach in departments of national and comparative literatures, cultural studies, ethnic studies, and interdisciplinary programs.

Graduate study in literature includes Ph.D. and free-standing M.A. programs. M.A. students typically take two years to complete the degree and are well prepared to continue in a doctoral program elsewhere. Normative time for the Ph.D. is

seven years, and graduates go on to teach at institutions of higher learning across the world or work in many of the fields mentioned above. Ph.D. students are required to be able to read proficiently in at least two languages that are integral to their intellectual work, one of which may be English. Within these guidelines students create their own programs of study, with dissertations on a range of comparative, translingual and interdisciplinary projects. (See list of recent titles.)

COURSES FOR NON-MAJORS

The Literature Department invites students from all disciplines to take LIT 1 and courses in the LIT 60/LIT 61, LIT 80/LIT 81 and LIT 109-LIT 169 series.

LITERATURE B.A.

Information and Policies

Introduction

The Literature Department at UC Santa Cruz fosters innovative and comparative approaches to reading and interpretation in courses in a variety of languages that encompass traditional literary history, cross-cultural inquiry, current theoretical debates, and new media.

Literature prepares us to understand and explore how we think, feel, and see the world; what we are and what we want to be, for ourselves and in relation to others. Literature is crucial for freedom and its manyfold expressions, as seen in multiple fields for which the exploration and critical analysis of effective and transformational thought, feeling, and communication is key. Professional fields for which the study of literature is advantageous include careers in the teaching sector at its multiple levels, from primary school to college; the new technologies sector, such as game design and discourse and data analysis; governmental and non-profit work such as in municipalities, public service, and foundations; publishing and journalism; publicity and marketing in the old and new media contexts, and many more.

The Literature Department faculty requires that all literature majors have basic proficiency in a second language. Proficiency in more than one language enhances understanding of one's own culture and can be the access point to other literatures and cultures. Graduate programs in literature and other humanities disciplines generally require competence in at least one language other than English.

Program Learning Outcomes

Following is a summary of the program learning outcomes for the Literature B.A.:

Students who complete the literature major should emerge with the following knowledge and skills:

1. A capacity for critical analysis of texts that is attentive to:
    - the formal structures, genres, and rhetorical strategies of different kinds of writing, public discourse, and media;
    - the historical and social contexts of such texts;
    - the role cultural and linguistic differences play in the interpretation of texts read in translation and in a language not one's own.
2. Effective written communication that demonstrates the following abilities:
    - to evaluate multiple interpretations of texts;
    - to write effective argumentative prose;
    - to situate texts in relation to a critical/theoretical tradition;
    - to design and initiate a substantive independent project of research or creative activity.
3. Experience reading a variety of texts:
    - from a breadth of world cultures and traditions;
    - from different historical periods, including the pre-modern;
    - originally written in languages other than English.

4. The ability to clearly conceptualize and formulate a research problem or issue

- historically, by understanding the trajectory of the problem thus conceived;
- theoretically, by considering alternative approaches to the problem and their implications and relevance for the proposed analysis'
- conceptually, by meta critically interrogating the central concepts involved in the formulation of the problem (i.e. their origins, implications, premises, limitations, etc.).

Academic Advising for the Program

Staff advisors are available by appointment; advising appointments may be made through the Navigate app, or online at Navigate Slug Success. Students are encouraged to consult with an advisor once per quarter.

Transfer students should also consult the section Transfer Information and Policy.

Questions about the literature program can be directed to litdept@ucsc.edu, (831) 459-4778, or by visiting the Literature Department office in Humanities 1, room 303.

Getting Started in the Major: Frosh

All students considering a literature major or minor should consult with staff and/or faculty advisors at the Literature Department office as early as possible, and declare the major

or minor before the end of their sophomore year. Transfer students are urged to declare their major or minor during their first quarter at UC Santa Cruz, and should also consult the section Transfer Information and Policy.

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to apply to UC Santa Cruz in this major are not required to complete specific major preparation courses for consideration of admission to UC Santa Cruz.

Students transferring from California community colleges may use an articulated equivalent of LIT 1 to satisfy the LIT 1 course requirement. Students transferring from other colleges may petition to use an introduction to literature course to satisfy the LIT 1 course requirement. Another literature course may be applied toward the LIT 60/LIT 61 or the LIT 80/LIT 81 course requirement. LIT 61W, Writing and Research Methods, is a course designed for transfer and any other students who feel the need for strengthening fundamental writing, interpretation, and basic research skills.

Transfer students planning to major in literature are strongly recommended to complete the equivalent of one year of college-level study of a language other than English before entering UC Santa Cruz.

Transfer students planning to major in literature with a language literature concentration are strongly recommended to have completed two years of college-level language study (or have comparable ability) to allow for a two-year graduation.

Getting Started in the Major: Transfer Students

Transfer students may declare the literature major or minor after completing LIT 1 or its transfer equivalent, and are urged to declare the major during their first quarter at UC Santa Cruz.

For information about declaring the literature major or minor, please see the section How to Declare a Major.

A student may receive credit toward the lower-division requirements of the major or minor for up to two courses taken at other institutions.

Students who attend another campus of the University of California may petition to apply a maximum of three upper-division courses toward the literature major, or two upper-division courses toward the literature minor.

Students may not use upper-division coursework taken at non-UC colleges or universities to satisfy upper-division literature major or minor credit.

Major Qualification Policy and Declaration Process

Major Qualification

Students must complete LIT 1 or its transfer equivalent in order to declare the literature major.

Transfer students should also consult the section Transfer Information and Policy.

Appeal Process

Students notified that they are not eligible to declare the literature major may appeal this decision by submitting a letter to the department chair within 15 working days from the date of notification. Within 15 working days of receipt of the student's appeal, the department will notify the student and their college of its decision regarding the appeal.

How to Declare a Major

Students must complete LIT 1 or its transfer equivalent in order to declare the literature major. In order to declare the major, students meet with a department advisor to complete an Academic Planning Form and Declaration of Major/Minor petition. All students considering a major should consult with a department advisor as early as possible to make an academic plan.

Students who have not completed LIT 1 or its transfer equivalent and who are approaching the campus declaration deadline (their sixth quarter, for students admitted as frosh) may petition to declare the literature major. The petition will be approved or denied, or the student will be provided with conditions (completion of LIT 1 or its equivalent with a grade of C or better) that must be resolved within one additional quarter of enrollment.

Letter Grade Policy

Students in all concentrations, including both the intensive and non-intensive options, must take at least seven courses counting toward the upper-division requirements for a letter grade. The Comprehensive Requirement must be taken for a letter grade.

Optional Catchall

Course Substitution Policy

Students may substitute up to four upper-division courses. A maximum of three combined courses may come from another University of California campus and/or a UC Education Abroad Program. A maximum of one course may come from another UC Santa Cruz department. Courses taken at other four-year institutions will be handled on a case-by-case basis.

In order to petition for a course from another department to substitute for a literature elective, students should submit a current course syllabus to the literature undergraduate program coordinator by email (litdept@ucsc.edu). Courses accepted from other departments may not be used to satisfy the literature distribution requirements.

Double Majors and Major/Minor Combinations Policy

Study Abroad

A variety of study abroad opportunities are available and can be discovered through the campus office of Global

Engagement. Multiple UC providers are featured, including UCSC's summer Global Seminars, UC's Education Abroad Program (UCEAP), as well as programs run by other UC campuses. (Non-UC run programs are also a possibility). This means hundreds of opportunities are available for students to choose from. Students who participate in any of these programs may petition to apply up to three 5 credit or greater upper-division courses (in literature or a related discipline) toward the literature major, or two 5-credit or greater upper-division courses (in literature or a related field) toward the literature minor. UCSC Global Seminars are considered UCSC courses (currently, one literature offering is available and doesn't require petition).

Honors

Honors in the literature major are awarded to graduating seniors who have earned a 3.70 to 3.89 grade-point average in their upper-division literature courses. Highest honors in the literature major are awarded to graduating seniors who have earned a 3.90 or higher grade-point average in their upper-division literature courses. Honors are not awarded in the minor.

Language Proficiency and Exam Options

Students of all three concentrations must demonstrate Level 3 reading proficiency in a non-English language in one of the following ways:

- Pass a literature language proficiency exam
- Take a Language Placement Assessment and place into level 4 or higher
- Complete one of the following courses:

ARBC 3	First-Year Arabic	5
CHIN 3	First-Year Chinese	5
FREN 3	First-Year French	5
GREE 2	Elementary Ancient Greek	5
HEBR 3	First-Year Hebrew	5
ITAL 3	First-Year Italian	5
JAPN 3	First-Year Japanese	5
LATN 2	Elementary Latin	5
PUNJ 3	First-Year Punjabi 3	5
SPAN 3	First-Year Spanish	5
YIDD 3	First-Year Yiddish	5

These courses have prerequisites of levels 1 and/or 2 or their equivalent. Completion of GERM 1B is equivalent to GERM 3. Completion of ITAL 1B is equivalent to ITAL 3. Greek and Latin are both accelerated tracks which only require two courses.

Creative Writing Courses

Any qualified student may take creative writing courses for credit toward graduation. Only students accepted into the creative writing concentration, however, may use Literature/Creative Writing courses LIT 179A, LIT 179B, LIT 190V, LIT 190W, and LIT 195C to satisfy major requirements.

Senior Survey

Three quarters before anticipated graduation, all literature majors will receive a Senior Survey. The purpose of the survey is for students to self-assess progress toward graduation and the satisfaction of all major requirements. A department advisor will review the survey and meet with the student to discuss any pending requirements.

Credit for Repeated Courses

Courses that vary significantly in material or methodology from one presentation to the next may be repeated for credit and are so designated in the course description in the UC Santa Cruz General Catalog.

Individual Study Credit for the Major

Students may apply a maximum of two of the following courses–LIT 195 (Senior Essay), LIT 198 (Group Tutorial), and/or LIT 199 (Tutorial)–for satisfaction of literature major requirements. LIT 195 may be used only once for satisfaction of literature major requirements.

Intensive Literature Major Option

Students in each concentration may elect to pursue an intensive option. The intensive option is especially useful for students who plan to apply to graduate programs in literature and other humanities disciplines, or for students going into international and multilingual professional schools; those programs typically require students to do academic work in at least two languages.

The intensive option for each concentration requires students to take two additional upper-division electives in a second-language literature. For students in the General or Creative Writing concentration, these would be two non-English literature courses. For students in the Language Literature concentration, these may be additional courses in the language of concentration or courses in a different language, including English. See the Intensive Option section of each concentration for more details.

Optional Catchall

General Literature Concentration

Course Requirements

The general literature concentration of the Literature major requires: (1) basic proficiency in a second language; and (2) 12 courses in literature.

- Basic language proficiency: One year (three quarters or equivalent) of college-level study of a non-English language or demonstrated reading ability at this level.
- The 12 required courses must include two lower-division and 10 upper-division courses.

Lower-Division Requirements

Lower-division courses are introductions to critical reading and writing. Students should complete their lower-division coursework before beginning upper-division work.

Language Proficiency

Students must demonstrate Level 3 reading proficiency in a non-English language. Information on how to satisfy this requirement, as well as exam options, are in the Language Proficiency and Exam Options section of the Information and Policies.

Plus the following course:

LIT 1	Literary Interpretation	5

LIT 1 is a writing-intensive course

Plus one of the following options:

- One course from the LIT 60 or LIT 61-series, or
- One course from the LIT 80 or LIT 81-series

LIT 60/LIT 61-series courses focus on categories, methodologies, and problems of literary study.

LIT 80/LIT 81-series courses focus on topical, thematic, and comparative studies of literary and filmic texts.

LIT 60/LIT 61 and LIT 80/LIT 81 courses are also recommended for non-majors.

Upper-Division Requirements

The General Literature major consists of 10 upper-division courses; two required courses, seven electives, and the comprehensive requirement. Students pursuing the intensive option will take two additional upper-division electives, for a total of 12 courses. See the Intensive Option section below.

Take the following courses:

LIT 101	Theory and Interpretation	5
LIT 102	Translation Theory	5

Students must successfully complete the language proficiency requirement before enrolling in LIT 102.

Students may substitute one upper-division non-English literature course (numbered LIT 182-189) studied in the original language for LIT 102. Such a course may not fulfill any other major requirements.

Plus the Comprehensive Requirement

The comprehensive requirement is satisfied by one senior seminar (LIT 190 series) or a senior thesis (LIT 195A or 195B). See the Comprehensive Requirement section below for more details.

Upper-Division Literature Electives

Students take seven 5-credit upper-division literature electives numbered 109-189. Independent studies and internships may also count toward this requirement with department approval. Among these seven courses, students fulfill the Distribution Requirements specified below. One course may fulfill more than one requirement.

Upper-division courses provide detailed treatment of literary and theoretical problems, themes, and periods. Students are strongly encouraged to take courses across chronological periods and national boundaries, and to balance small seminars with lecture courses.

A list of annual course offerings indicating distribution codes for each course is available in the department office and on the Literature Department website.

Distribution Requirements

Students should consult the Distribution Requirements Course List to find courses which satisfy one or more of the following requirements:

- Two courses on literature written before 1750
- One course on Non-Western literature or literature from a global perspective
- One course on poetry and poetics

General Literature Intensive Option

Students wishing to complete the intensive option of the general Literature B.A. must take two additional upper-division electives, for a total of nine electives. These two courses must be in non-English literature, and may be chosen from any of the following:

- Ancient Literature (courses in the LIT 181 series)
- French Literature (courses in the LIT 182 series)
- German Literature (courses in the LIT 183 series)
- Greek Literature (courses in the LIT 184 series)
- Italian Literature (courses in the LIT 185 series)
- Latin Literature (courses in the LIT 186 series)
- Spanish/Latin American/Latino Literatures (courses in the LIT 188-LIT 189 series, LIT 190X)

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. Literature majors must satisfy the disciplinary communication requirement by passing:

LIT 101	Theory and Interpretation	5

Comprehensive Requirement

Students must successfully complete LIT 101 before taking any comprehensive requirement.

Seniors must select one of the following options to satisfy the campus exit requirement:

Senior Seminar

Students take one senior seminar. These are courses in the LIT 190 series. Several senior seminars are offered each quarter; extensive writing is required in all seminars.

Senior Thesis

Students who wish to propose a senior thesis (30–40 pages) must apply to a Literature Department faculty sponsor at least two quarters before the projected date of graduation. The application must include a proposed subject, a brief outline, a bibliography, and a sample of previous written work. Only those students who have received written permission from a faculty supervisor may complete a thesis to satisfy the senior exit requirement. Students enroll in one of the following courses:

LIT 195A	Senior Essay	5
LIT 195B	Senior Essay	5

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements (p. 1438) for more information.

Four-Year Major Planner

	Fall	Winter	Spring	Summer
Entering				College 1A Summer Edge (optional)
1st (frosh)	LIT 60/LIT 61 or LIT 80/LIT 81 College 1	LIT 60/LIT 61 or LIT 80/LIT 81 (optional) WRIT 1/WRIT 1E (if needed)	WRIT 2	
2nd (soph)	Upper-division LIT course	LIT 101 (if LIT 1 completed)	Upper-division LIT course	
	Language Level 1	Language Level 2	Language Level 3	
	LIT 1			
3rd (junior)	Upper-division LIT course (global distribution requirement)	LIT 102	Upper-division LIT course (poetry/poetics distribution requirement) Upper-division LIT course (pre-1750 distribution requirement)	
4th (senior)	Upper-division LIT course (pre-1750 distribution requirement)	LIT 190 (senior seminar)	Upper-division LIT course	

Courses required for the major fulfill the TA General Education requirement. Other GE requirements may be fulfilled depending on the choice of electives. The MF, SI and SR requirements are never fulfilled.

Transfer Student Planner #1 (for transfer students who have completed literature's lower-division and one-year language requirement at the time of transfer)

	Fall	Winter	Spring	Summer
Entering				KRSG 1T Summer Edge (optio

				nal)
3rd (junior)	Upper-division LIT course (pre-1750 distribution requirement)	LIT 102	LIT 101	
	Upper-division LIT course (poetry distribution requirement)	Upper-division LIT course (global distribution requirement)	Upper-division LIT course (pre-1750 distribution requirement)	
4th (senior)	Upper-division LIT course	LIT 190 (senior seminar)	Upper-division LIT course	
	Upper-division LIT course			

Transfer Student Planner #2 (for transfer students who have completed no literature requirements or language coursework at the time of transfer, but have completed most general education requirements)

	Fall	**Winter**	**Spring**	**Summer**
Entering				KRSG 1T Summer Edge (optional)
3rd (junior)	LIT 1	LIT 101	Upper-division LIT course (poetry distribution requirement)

4th (senior)	Upper-division LIT course (pre-1750 distribution requirement)	LIT 102	LIT 190 (senior seminar)	
	Upper-division LIT course	Upper-division LIT course	Upper-division LIT course	

Language Literature Concentration

The language literature concentration examines literature within the frameworks of particular languages or national and regional traditions, and requires that texts be read in the original language. Enrollment in upper-division language literature courses normally requires completion of two years of college-level language coursework, or the equivalent.

Course Requirements

The language literature concentration of the literature major requires: (1) completion of two years of college-level language coursework, or the equivalent; and (2) 12 courses in literature.

- The 12 required courses must include two lower-division and 10 upper-division courses.

Lower-Division Requirements

Lower-division courses are introductions to critical reading and writing. Students should complete their lower-division coursework before beginning upper-division work.

Language Proficiency

Students must demonstrate Level 3 reading proficiency in a non-English language. Information on how to satisfy this requirement, as well as exam options, are in the Language Proficiency and Exam Options section of the Information and Policies.

Students pursuing the language literature concentration are encouraged to study a language through Level 6. At UCSC, languages taught through level 6 are Arabic, Chinese, French, German, Italian, Japanese, and Spanish.

Take the following course

LIT 1	Literary Interpretation	5

LIT 1 is a writing-intensive course.

Plus one of the following options:

- One course from the LIT 60 or LIT 61-series, or
- One course from the LIT 80 or LIT 81-series

LIT 60/LIT 61-series courses focus on categories, methodologies, and problems of literary study.

LIT 80/LIT 81-series courses focus on topical, thematic, and comparative studies of literary and filmic texts.

LIT 60/LIT 61 and LIT 80/LIT 81 courses are also recommended for non-majors.

Upper-Division Requirements

The Language Literature concentration consists of 10 upper-division courses; two required courses, seven electives, and the comprehensive requirement. Students pursuing the intensive option will take two additional upper-division electives, for a total of 12 courses. See the Intensive Option section below.

Take the following courses:

LIT 101	Theory and Interpretation	5
LIT 102	Translation Theory	5

Students must successfully complete the language proficiency requirement before enrolling in LIT 102.

Students may substitute one upper-division non-English literature course (numbered LIT 182-189) studied in the original language for LIT 102. Such a course may not fulfill any other major requirements.

Plus the Comprehensive Requirement

The comprehensive requirement is satisfied by one senior seminar (LIT 190 series) or a senior thesis (LIT 195A or 195B). See the Comprehensive Requirement section below for more details.

Upper-Division Literature Electives

Students take seven 5-credit upper-division literature electives numbered 109-189. Independent studies and internships may also count toward this requirement with department approval. Among these seven courses, students fulfill the Distribution Requirements and Language Literature Requirements specified below. One course may fulfill more than one requirement.

Upper-division courses provide detailed treatment of literary and theoretical problems, themes, and periods. Students are strongly encouraged to take courses across chronological periods and national boundaries, and to balance small seminars with lecture courses.

A list of annual course offerings indicating distribution codes for each course is available in the department office and on the Literature Department website.

Distribution Requirements

Students should consult the Distribution Requirements Course List to find courses which satisfy one or more of the following requirements:

- Two courses on literature written before 1750
- One course on Non-Western literature or literature from a global perspective
- One course on poetry and poetics

Language Requirements

Language Literature Concentration students take five literature courses in their chosen language of concentration. These courses can overlap with one or more of the Distribution Requirements above. The course options below correspond to the languages of concentration:

Ancient Literature (courses in the LIT 181, LIT 184, and 186 series)

The study of the literature, languages, and cultural practices of ancient civilizations. Students take a minimum of three literature courses in the language they are using to satisfy the language requirement with the remaining two courses in another ancient language or languages. LIT 181 courses should be taken by students studying Arabic. LIT 184 courses should be taken by students studying Greek. LIT 186 courses should be taken by students studying Latin.

French Literature (courses in the LIT 182 series)

The study of French and Francophone literatures, languages, and cultural practices of France, Africa, and the Caribbean.

German Literature (courses in the LIT 183 series)

The study of the literature, language, and cultural practices of the German-speaking areas of central Europe including Germany, Austria, and Switzerland.

Greek Literature (courses in the LIT 184 series)

The study of the literature, languages, and cultural practices of ancient Greece.

Italian Literature (courses in the LIT 185 series)

The study of Italian literature, language, and cultural practices from the Middle Ages to the present.

Latin Literature (courses in the LIT 186 series)

The study of the literature, languages, and cultural practices of ancient Rome.

Spanish/Latin American/Latino Literatures (courses in the LIT 188-LIT 189 series, LIT 190X)

The study of literatures, language, and cultural practices of Spain, Latin America, and Latino populations in the United States.

Language Literature Intensive Option

Students wishing to complete the intensive option for the Language Literature concentration must take two additional upper-division electives, for a total of nine electives. Though these courses may be in the language of concentration, students are highly encouraged to pursue additional electives outside the language of concentration, including English.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. Literature majors must satisfy the disciplinary communication requirement by passing:

LIT 101	Theory and Interpretation	5

Comprehensive Requirement

Students must successfully complete LIT 101 before taking any comprehensive requirement.

Seniors must select one of the following options to satisfy the campus exit requirement:

Senior Seminar

Students take one senior seminar. These are courses in the LIT 190 series. Several senior seminars are offered each quarter; extensive writing is required in all seminars.

Senior Thesis

Students who wish to propose a senior thesis (30–40 pages) must apply to a Literature Department faculty sponsor at least two quarters before the projected date of graduation. The application must include a proposed subject, a brief outline, a bibliography, and a sample of previous written work. Only those students who have received written permission from the faculty supervisor may complete a thesis to satisfy the senior exit requirement. Students enroll in one of the following courses:

LIT 195A	Senior Essay	5
LIT 195B	Senior Essay	5

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Four-Year Major Planner

	Fall	Winter	Spring	Summer
Entering				College 1A Summer Edge (optional)
1st (frosh)	LIT 60/LIT 61 or LIT 80/LIT 81	LIT 60/LIT 61 or LIT 80/LIT 81 (optional)	WRIT 2	
	Language Level 1	Language Level 2	Language Level 3	
	College 1	WRIT 1/WRIT 1E (if needed)		
2nd (soph)	Upper-division LIT course (pre-1750 and poetry distribution requirements)	LIT 101 (if LIT 1 completed)	Upper-division LIT course (global distribution requirement)	
	Language Level 4	Language Level 5	Language Level 6	
	LIT 1

	Upper-division LIT course	LIT 190 (senior seminar)	

Creative Writing Concentration

The Literature Department offers a sequence of creative writing workshops from introductory through advanced levels. Admission to the creative writing concentration is selective. Interested students are required to take one lower-division creative writing workshop at UC Santa Cruz (LIT 90, LIT 90X, LIT 91A or LIT 91B) before applying to the concentration; however, students are strongly encouraged to complete two lower-division workshops (at least one at UCSC) before applying. To apply for admission to the creative writing concentration, students should submit a completed application form (available at the Literature Department office and on the Literature Department website). Once accepted into the concentration, students are required to declare (or redeclare) the major in literature, with a concentration in creative writing.

In addition to the distribution requirements required for all literature majors, students in the creative writing concentration must complete four of their eight upper-division literature courses in creative writing, including a senior project seminar.

Course Requirements

Lower-Division Requirements

Lower-division courses are introductions to critical reading and writing. Students should complete their lower-division coursework before beginning upper-division work.

Language Proficiency

Students must demonstrate Level 3 reading proficiency in a non-English language. Information on how to satisfy this requirement, as well as exam options, are in the Language Proficiency and Exam Options section of the Information and Policies.

Plus the following course:

LIT 1	Literary Interpretation	5

LIT 1 is a writing-intensive course

Plus one of the following options:

- One course from the LIT 60 or LIT 61-series, or
- One course from the LIT 80 or LIT 81-series

LIT 60/LIT 61-series courses focus on categories, methodologies, and problems of literary study.

LIT 80/LIT 81-series courses focus on topical, thematic, and comparative studies of literary and filmic texts.

LIT 60/LIT 61 and LIT 80/LIT 81 courses are also recommended for non-majors.

Plus at least one of the following

LIT 90	Introduction to Creative Writing	5
LIT 90X	Introduccion a la Escritura Creativa/Introduction to Creative Writing	5
LIT 91A	Intermediate Fiction/Prose Writing	5
LIT 91B	Intermediate Poetry Writing	5

An additional course from among LIT 90, LIT 90X, LIT 91A and LIT 91B is strongly encouraged.

Upper-Division Requirements

The Creative Writing concentration consists of10 upper-division courses; two required courses, seven electives, and the comprehensive requirement. Students pursuing the intensive option will take two additional upper-division electives, for a total of 12 courses. See the Intensive Option section below.

Take the following courses:

LIT 101	Theory and Interpretation	5
LIT 102	Translation Theory	5

Students must successfully complete the language proficiency requirement before enrolling in LIT 102.

Students may substitute one upper-division non-English literature course (numbered LIT 182-189) studied in the original language for LIT 102. Such a course may not fulfill any other major requirements.

Plus the Comprehensive requirement

The comprehensive requirement is satisfied by one creative project senior seminar (LIT 190V or LIT 190W) or a senior essay (LIT 195C). LIT 190V is strongly encouraged for students in the fiction/prose track, and LIT 190W is strongly encouraged for students in the poetry track. See the Comprehensive Requirement section below for more details.

Upper-Division Literature Electives

Students take seven 5-credit upper-division literature electives numbered 109-189. Independent studies and internships may also count toward this requirement with department approval. Among these seven courses, students fulfill the Distribution Requirements and Advanced Creative Writing Workshops

Requirement specified below. One course may fulfill more than one requirement.

Upper-division courses provide detailed treatment of literary and theoretical problems, themes, and periods. Students are strongly encouraged to take courses across chronological periods and national boundaries, and to balance small seminars with lecture courses.

A list of annual course offerings indicating distribution codes for each course is available in the department office and on the Literature Department website.

Distribution Requirements

Students should consult the Distribution Requirements Course List to find courses which satisfy one or more of the following requirements:

- Two courses on literature written before 1750
- One course on Non-Western literature or literature from a global perspective
- One course on poetry and poetics

Advanced Creative Writing Workshop Requirements

Creative Writing students take any three courses from the LIT 179 series. Though students may take any combination of these courses, fiction/prose students are encouraged to take at least one LIT 179A course, and poetry students are encouraged to take at least one LIT 179B course. Courses may be repeated.

Creative Writing Intensive Option

Students wishing to complete the intensive option of the [General or Creative Writing] concentration must take two additional upper-division electives, for a total of nine electives. These two courses must be in non-English literature, and may be chosen from any of the following:

- Ancient Literature (courses in the LIT 181 series)
- French Literature (courses in the LIT 182 series)
- German Literature (courses in the LIT 183 series)
- Greek Literature (courses in the LIT 184 series)
- Italian Literature (courses in the LIT 185 series)
- Latin Literature (courses in the LIT 186 series)
- Spanish/Latin American/Latino Literatures (courses in the LIT 188-LIT 189 series, LIT 190X)

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. Literature majors must satisfy the disciplinary communication requirement by passing:

LIT 101	Theory and Interpretation	5

Comprehensive Requirement

Students must successfully complete LIT 101 before taking any comprehensive requirement.

Seniors must select one of the following options to satisfy the campus exit requirement:

Senior Seminar

Students take one senior seminar from the following options. Extensive writing is required in all seminars. Creative writing senior seminars are offered only during spring quarter.

LIT 190V	Fiction Senior Seminar	5
LIT 190W	Poetry Senior Seminar	5

Senior Essay

Students who wish to propose a creative writing senior essay (30–40 pages) must apply to a Literature Department faculty sponsor at least two quarters before the projected date of graduation. The application must include a proposed subject, a brief outline, a bibliography, and a sample of previous written work. Only those students who have received written permission from a faculty supervisor may complete a senior essay to satisfy the senior exit requirement.

LIT 195C	Senior Essay	5

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Four-Year Major Planner

	Fall	Winter	Spring	Summer
Entering				College 1A Summer Edge (optional)
1st (frosh)	LIT 60/LIT 61 or LIT 80/LIT 81 College 1	LIT 60/LIT 61 or LIT 80/LIT 81 (optional) WRIT 1/WRIT 1E (if needed)	WRIT 2	

2nd (soph)	LIT 1	LIT 101 (if LIT 1 completed)	Upper-division LIT course (pre-1750 distribution requirement)
	Language Level 1	Language Level 2	Language Level 3
		LIT 90 or LIT 90X	LIT 91A or LIT 91B*
3rd (junior)	Upper-division LIT course (global distribution requirement)	LIT 102	LIT 179A, LIT 179B, or LIT 179C
		Upper-division LIT course (pre-1750 distribution requirement)	Upper-division LIT course (poetry/poetics distribution requirement)
4th (senior)	LIT 179A, LIT 179B, or LIT 179C	LIT 179A, LIT 179B, or LIT 179C	LIT 190V or LIT 190W (senior seminar)

*Not required for the major, but strongly recommended before applying for admission to the Creative Writing concentration.

Courses required for the major fulfill the TA general education requirement. Other requirements may be fulfilled depending on the choice of electives. The MF, SI and SR requirements are never fulfilled.

Transfer Student Planner #1 (for transfer students who have completed literature's lower-division and one-year language requirements, and one creative writing course, at the time of transfer)

	Fall	**Winter**	**Spring**	**Summer**
Entering				KRSG 1T Summer Edge (optional)
3rd (junior)	Upper-division LIT course (pre-1750 and poetry distribution requirements)	LIT 102	LIT 101	
	Upper-division LIT course	Upper-division LIT course (global distribution requirement)	LIT 179A, LIT 179B, or LIT 179C	
	LIT 90 or LIT 90X or LIT 91A or LIT 91B			
4th (senior)	LIT 179A, LIT 179B, or LIT 179C	LIT 179A, LIT 179B, or LIT 179C	LIT 190V or LIT 190W (senior seminar)	
	Upper-division LIT course (pre-1750 distribution requirement)			

Transfer Student Planner #2 (for transfer students who have completed no literature requirements, language coursework, or creative writing course at the time of transfer, but have completed general education requirements)

	Fall	Winter	Spring	Summer
Entering				KRSG 1T Summer Edge (optional)
3rd (junior)	LIT 1	LIT 60/61 or LIT 80/81	LIT 101	
	LIT 90	LIT 91A or LIT 91B*	LIT 179A, LIT 179B, or LIT 179C	
	Language Level 1	Language Level 2	Language Level 3	
4th (senior)	Upper-division LIT course (pre-1750 distribution requirement)	LIT 102	Upper-division LIT course (global distribution requirement)	
	Upper-division LIT course	Upper-division LIT course (pre-1750 and poetry distribution requirements)	LIT 190V or LIT 190W (senior seminar)	
	LIT 179A, LIT 179B, or LIT 179C	LIT 179A, LIT 179B, or LIT 179C		

*Not required for the major, but strongly recommended before applying for admission to the Creative Writing concentration.

LITERATURE MINOR

Students who minor in literature take courses that examine a variety of literary and visual texts and cultural artifacts from around the world, produced from pre-antiquity through the present. The literature minor requires a total of seven literature courses; literature minors do not have to satisfy certain major requirements such as second-language proficiency, distribution requirements, or a senior seminar.

Students must complete LIT 1 or its equivalent prior to declaring the minor. In order to declare the minor, students meet with a department advisor to complete and submit a Proposed Study Plan and Declaration of Major/Minor petition. All students considering a minor should consult with a department advisor as early as possible to make an academic plan.

Course Requirements

The minor in literature requires seven courses. Courses may be taken for a letter grade or Pass/No Pass.

Lower-Division Courses

Take the following course:

LIT 1	Literary Interpretation	5

This is a writing-intensive course.

Plus one of the following options:

- One course from the LIT 60 or LIT 61-series, or
- One course from the LIT 80 or LIT 81-series

LIT 60/LIT 61-series courses focus on categories, methodologies, and problems of literary study.

LIT 80/LIT 81-series courses focus on topical, thematic, and comparative studies of literary and filmic texts.

LIT 60/LIT 61 and LIT 80/LIT 81 courses are also recommended for non-majors.

Upper-Division Courses

Five upper-division courses are required.

Take the following course:

LIT 101	Theory and Interpretation	5

Upper-Division Literature Electives

Students take four 5-credit upper-division electives chosen from LIT 108-189, excluding LIT 179A or LIT 179B, which are only available to students who have been accepted to the creative writing concentration. Independent studies and

internships may count toward the electives with department approval. The literature minor does not require second-language proficiency or a senior seminar.

Course Substitution Policy

Students may substitute up to three upper-division courses. A maximum of two combined courses may come from another University of California campus and/or a UC Education Abroad Program. A maximum of one course may come from another UC Santa Cruz department. Courses taken at other four-year institutions will be handled on a case-by-case basis.

In order to petition for a course from another department to substitute for a literature elective, students should submit a current course syllabus to the literature undergraduate program coordinator by email (litdept@ucsc.edu).

ITALIAN STUDIES MINOR

Students interested in an interdisciplinary approach to Italian culture through the combined study of language, literature, history, and art history may pursue a minor in Italian studies. A detailed checklist for the minor is available on the Italian studies program web site.

Staff advisers for the Italian studies minor are available in the Literature Department office, located in Humanities 1, room 303. The Italian studies program is administered by the Literature Department. Declaring a minor in Italian studies is a three-step process:

1. Complete the Petition for Major/Minor Declaration and submit it to litdept@ucsc.edu. Be sure to indicate your expected graduation term (EGT) on the petition. Your EGT is visible in your Student Advising Summary or on your MyUCSC Student Portal.

2. Make an appointment with the Italian studies program director to discuss your plans and fill out an Italian Studies Minor Checklist.

3. Make an appointment with an Italian studies advisor in the Literature Department in order to review and complete your declaration form. To schedule an advising appointment, visit ucsc.campus.eab.com, send an email to litdept@ucsc.edu, or leave a message at 831-459-4778.

Course Requirements

Lower-Division Courses

Each student must complete the lower-division language sequence (ITAL 1–ITAL 6), or equivalent.

ITAL 1	First-Year Italian	5
ITAL 2	First-Year Italian	5
ITAL 3	First-Year Italian	5
ITAL 4	Second-Year Italian	5
ITAL 5	Second-Year Italian	5
ITAL 6	Second-Year Italian	5

Italian has an accelerated language track of ITAL 1A and ITAL 1B. These two courses taken together equate to ITAL 1-ITAL 3.

Upper-Division Courses

Students must complete five upper-division courses in Italian studies as follows.

One of the following courses:

ITAL 101	Italian Culture through Food	5
ITAL 106	Italian Culture Through Film	5

Plus

Students complete four courses as follows. Consult the course lists below for options.

- Two Italian literature courses (Each student should complete the lower-division language sequence (ITAL 1–ITAL 6), or equivalent prior to taking the Italian literature courses).
- One course in Italian history
- One course in Italian art history.

A course featuring the work of Dante is recommended. Three of the five upper-division courses must be completed at UC Santa Cruz; three must be taught substantially in Italian. A maximum of two courses may be transferred from EAP.

Students can consult Italian studies course offerings for each of the above categories.

Italian Literature Courses

Any course in the LIT 185 series or from the following list:

LIT 102	Translation Theory	5
LIT 114A	Orlando Furioso	5
LIT 114C	Dante's Divine Comedy	5
LIT 114E	One Way Ticket to Hell … and Back: Exploring Dante's Inferno	5
LIT 114F	Finding Dante: A Reader's Guide to Getting Out of Hell	5
LIT 121G	The Idea of Poetry	5
LIT 130D	The Global Middle Ages	5
LIT 141A	Early Mediterranean Cultures	5
LIT 155D	Italian Cinema and Literature	5
LIT 164G	Literature and the Holocaust	5
LIT 166C	Early Modern Italian Women Writers	5
LIT 190A	Topics in Pre- and Early Modern Studies	5

Italian History Courses

SOCY 117E	Migrant Europe	5

Italian History of Art and Visual Culture Courses

HAVC 154	Byzantine Visual Culture: Politics and Religion in the Empire of Constantinople, 330-1453 A. C	5

HAVC 155	Constructing Cleopatra: Power, Sexuality, and Femininity Across the Ages	5
HAVC 157B	Italian Renaissance: Art and Architecture	5
HAVC 157C	High Renaissance	5
HAVC 157D	Art of the Venetian Renaissance	5
HAVC 191N	Topics in Renaissance Art and Visual Culture	5

Courses Taught Substantially in Italian

LIT 185B	Letteratura e cultura italiana	5
LIT 185J	Poesia moderna	5
LIT 185L	La novella italiana	5
LIT 185P	Boccaccio: Decameron	5
LIT 185Q	Dante: Divina Commedia	5
LIT 185S	Petrarca	5
ITAL 100	Advanced Italian Composition and Conversation	5
ITAL 106	Italian Culture Through Film	5

Courses Featuring the Work of Dante

LIT 185Q	Dante: Divina Commedia	5
LIT 114C	Dante's Divine Comedy	5

Courses Featuring Italy in a European or Global Context

HAVC 152	Roman Eyes: Visual Culture and Power in the Ancient Roman World	5

LITERATURE M.A.

Introduction

The Master's Degree in Literature. A separate master of arts degree program is intended for students whose aim is to deepen and expand their literary/critical training and to prepare for entry into a Ph.D. program, usually at another institution.

The M.A. program requirements may not be completed in less than one year; the maximum time to obtain a degree is two years.

Requirements

Course Requirements

- LIT 200, Proseminar, to be taken in fall quarter of the first year;
- Seven additional courses leading to the definition of an area of concentration. Up to two of these may be taken in other departments. One may be an independent study course;
- LIT 291F, a two-credit advising course, each quarter;
- LIT 299A or LIT 299B, Thesis Research.

LIT 200	Proseminar	5
LIT 291F	Advising	2
LIT 299A	Thesis Research	5
LIT 299B	Thesis Research	10

M.A. Thesis Description

The thesis for a Master's Degree in Literature will be a substantial critical work (typically ranging from 35 to 50 pages, plus a bibliography), written in conjunction with LIT 299. The project must be developed in close consultation with the thesis advisor, who serves as chair of the thesis reading committee, and ultimately be approved by at least two other reading committee members, who are chosen by the student and the advisor.

The majority of the reading committee must be members of the UC Santa Cruz Academic Senate (ladder-rank and Security of Employment faculty). The chair must be a tenured member of the literature faculty. At least two of the three members of the committee should be literature faculty.

Once the student and advisor have chosen the reading committee members and secured their agreement to serve, the student must submit a Master's Thesis Reading Committee nomination form to the department office; this form should be submitted as early as possible and in any case no later than the second week of the quarter in which the degree is to be conferred.

M.A. Degree Application and Department Verification

An Application for the Master's Degree form must be submitted to the department at least one week prior to the Graduate Division deadline as stated on the academic calendar (normally by the end of the first week in which the degree is to be awarded).

The thesis is approved by all committee members up to six weeks, but no less than three weeks, prior to the last day of instruction (or commencement, if the student intends to participate in the ceremony). A copy of the title page, signed by all thesis committee members, must be submitted to the department for verification of completion. The department does not require a copy of the thesis.

The student must file the thesis with the Graduate Division by the last day of instruction of the quarter in which the degree is to be conferred.

NOTE: In spring quarter, the deadline for students wishing to participate in the commencement ceremony is approximately one week earlier. Guidelines for the style and filing requirements of the M.A. Thesis are detailed in the PDF "Dissertation Thesis Guidelines", available on the Graduate Division website.

Admissions and Financial Aid

The Literature Department does not provide financial support to students pursuing the M.A. degree. Admission to the M.A. program does not constitute admission to the Ph.D. program. Students may not automatically transfer from the M.A.

program into the Ph.D. program, but must reapply. Further information and application materials are available from the Division of Graduate Studies and on the department website.

[Optional Catchall]

Applying for Graduation

LITERATURE PH.D.

Introduction

The UC Santa Cruz doctoral program in literature offers an innovative multilingual and multidisciplinary approach to literary studies, involving the use of more than one language literature. The program is relatively small, and students work closely with faculty throughout their graduate careers. They are encouraged to take advantage of the rich array of intellectual and cultural events, research clusters, and lectures offered on campus.

The doctoral program combines critical and independent thought with global perspectives. Working across linguistic, national, and period boundaries, students blend critical approaches, literary traditions, and/or cultural archives in comparative and interdisciplinary projects.

A creative/critical writing concentration within the Ph.D. program is available, for which students apply during the admissions process. Creative/critical applicants submit additional creative writing samples of poetry, prose fiction, creative nonfiction or hybrid/cross genre. Students in the creative/critical concentration complete all the requirements for the literature Ph.D. with the addition of a creative/critical degree component in the form of coursework, original creative work with a critical introduction and, if desired, work in poetics, translation, form and/or critical writing focused on creative practices.

Students may apply for a designated emphasis on the literature doctoral diploma in programs and departments such as Critical Race and Ethnic Studies, Education, Feminist Studies, History of Consciousness, Latin American and Latino Studies, Philosophy, Politics, Sociology, and the History of Art and Visual Culture. Applications and requirements are available at the respective department offices.

Advancement to Candidacy

Course Requirements

- LIT 200, Proseminar, to be taken in fall quarter of the first year;
- LIT 201, Pedagogy of Teaching/Teaching Assistant Training, to be taken prior to or in conjunction with the first teaching assistant appointment;
- Twelve additional courses leading to the definition of an area of concentration. At least two of these must be in a second-language literature; at least one must focus on pre-modern literature and culture. A minimum of six courses must be regularly scheduled Literature seminars;
- LIT 291F, a two-credit advising course, each quarter.

LIT 200	Proseminar	5
LIT 201	The Pedagogy of Literature	2
LIT 291F	Advising	2

Second Language Requirements

The program requires significant literary work in two languages. All students are required to complete the Literature Department's intensive three-week Graduate Summer Language Program or its equivalent and a minimum of two graduate courses in a second-language literature in which 50 percent or more of the reading is done in the original language.

Teaching Requirements

Students must complete at least three quarters of supervised teaching experience.

Pre-Qualifying Requirements

Qualifying Examination

The qualifying examination must be taken by the first quarter of the fourth year. It consists of three components: 1. a portfolio with a field statement and comprehensive bibliography, a topic statement, a paper of publishable quality, and a dissertation sketch; 2. translation examination; and 3. oral examination.

Post-Qualifying Requirements

Students must submit a prospectus outlining and defining the dissertation project within a quarter following the qualifying examination, but no later than the end of the fourth year. The prospectus identifies the research problem, methodologies, and case studies, with chapter outlines, footnotes, and bibliography.

Non-Terminal Master's Degree

A master of arts (M.A.) degree is conferred upon request to doctor of philosophy (Ph.D.) candidates who have successfully completed the literature Ph.D. qualifying examination or who have completed the coursework required for the doctorate (teaching assistant training and supervised teaching experience exempted) and elect to write a master's thesis under the supervision of a faculty advisor.

[Optional Catchall]

Dissertation

Dissertation

The dissertation is a substantial piece of original research in the field of literature, akin to a monograph.

A dissertation submitted for the Creative/Critical Concentration may take alternative forms:

1. A book-length original creative project--novel, novella, collection of poems, collection of stories, creative nonfiction, or a hybrid/experimental form (including

but not limited to digital/new media, performance/performativity/screenplay, the lyric essay) with a critical chapter or chapters totaling at least 75 pages exploring the historical, methodological, and/or theoretical foundations of the creative work; or

2. A dissertation on theory, form, poetics or literary history; a translation of a creative work with a 30-50-page, substantive, critical introduction; a critical edition.

The dissertation committee is composed of three members, with the dissertation advisor acting as chair. The majority of the membership of a dissertation committee shall be members of the Santa Cruz Division of the Academic Senate.

Detailed instructions for the preparation of the dissertation are available on the Graduate Division website.

Dissertation Defense

Academic Progress

To maintain satisfactory academic progress and eligibility for fellowships and other benefits, students must:

- complete required coursework in the first two to three years;
- satisfy the department's second-language requirement;
- pass the qualifying examination (QE) during the third year or fall quarter of the fourth year;
- complete a dissertation prospectus and advance to candidacy by the end of the fourth year; and
- complete the dissertation by the end of the seventh year.

Applying for Graduation

For information on how to apply for graduation, visit the Graduate Division website.

Further Information

Additional detailed information for prospective graduate students, including procedures for application and admission to graduate studies, examinations, and requirements for the doctor of philosophy degree, is available from the Division of Graduate Studies and on the department website.

Optional Catchall

LITERATURE DESIGNATED EMPHASIS

Introduction

Graduate students may work toward a Doctor of Philosophy (Ph.D.) degree that notes a designated emphasis in literature on the graduation documents. Students wishing to pursue this option should consult with the chair of their respective Ph.D. program and are encouraged to apply in the first or second year of graduate study.

Requirements

Graduate students in other programs may obtain a designated emphasis in literature on the Ph.D. degree by completing the following requirements:

Committee Composition and Departmental Approvals

The student must have a faculty graduate advisor from Literature, who serves both on the qualifying examination committee and the dissertation reading committee.

Course Requirements

The student must take four graduate courses in literature. With the approval of the literature advisor, one of the four required graduate courses may be an independent study.

Writing, Research and/or Teaching Requirements

The student must prepare a significant piece of writing in the area of literature, such as a substantial seminar paper or a chapter of the doctoral dissertation. The advisor from Literature, in consultation with the student, determines whether a particular piece of writing meets this requirement.

Designated Emphasis Application

When the above requirements have been fulfilled, the formal steps to obtain the Designated Emphasis in Literature are:

- The student should complete a Designated Emphasis Application form, obtain the literature advisor's signature and submit the application with supporting documentation (copies of the Qualifying Examination and Dissertation Committee Nomination forms) to the Literature Department graduate program coordinator.
- The Literature Department will notify the student and the home department of approval for the designated emphasis.

Academic Progress

MIDDLE EASTERN AND NORTH AFRICAN STUDIES MENAS MINOR

The Middle Eastern and North African Studies (MENAS) minor, administered by the Humanities Division in partnership with the Center for the Middle East and North Africa (CMENA), supports the development of a robust knowledge of the Middle East and North Africa through a program that consists of a diverse set of courses across departments and divisions as well as the study of at least one regional language. Courses span the Humanities, Social Sciences, and Arts Divisions and draw on the varied and deep expertise of faculty in multiple academic departments that include the Departments of History, Politics, Anthropology,

Critical Race and Ethnic Studies, Feminist Studies, Literature, Languages and Applied Linguistics, the History of Art and Visual Culture, and Film and Digital Media. The objective of the MENAS minor is to promote substantive regional knowledge, understanding, and curiosity among students who are interested in positioning themselves as global citizens.

To complete the minor, students must take three quarters of language instruction in Arabic, Hebrew, or Persian, or complete the highest-level course of their chosen language (ARBC 6, HEBR 4, PERS 4). They also will take one specified lower-division introductory course, and five upper-division courses whose primary focus is the history, politics, artistic production, and/or cultures of the Middle East and/or North Africa.

Course Requirements

The minor consists of completing the language requirement and six additional courses from at least two different departments. Students can take up to two MENAS minor requirements pass/no pass. The remainder of the classes must be taken for a letter grade.

At least three quarters of language instruction

At least three quarters of language instruction from a single language or complete the highest level of your chosen language (ARBC 6, HEBR 4, PERS 4).

Three from the following:

Take three from the following **OR** complete the highest-level course, ARBC 6.

ARBC 1	First-Year Arabic	5
ARBC 2	First-Year Arabic	5
ARBC 3	First-Year Arabic	5
ARBC 4	Second-Year Arabic	5

Or three from the following:

Take three from the following **OR** complete the highest-level course, HEBR 4.

HEBR 1	First-Year Hebrew	5
HEBR 2	First-Year Hebrew	5
HEBR 3	First-Year Hebrew	5
HEBR 4	Second-Year Hebrew	5

Or three of the following:

Take three from the following **OR** complete the highest-level course, PERS 4.

Lower-Division Courses

Plus at least one lower-division survey course from the following list:

HIS 41	The Making of the Modern Middle East	5
HIS 50	When Pharaohs Reigned: The History of Ancient Egypt	5
HIS 51	Pyramids of Earth: Religion and Symbol in the Ancient World	5
HIS 58	From Pirates to Refugees: The History of the Modern Mediterranean	5
HIS 74A	Introduction to Middle Eastern and North African Jewish History: Ancient to Early Modern	5
HIS 74B	Introduction to Middle Eastern and North African Jewish History, 1500-2000	5
LIT 81D	The Prophet and the Qur'an	5

Upper-Division Courses

Plus at least five upper-division courses from the following list. Between the upper- and lower-division elective options, courses must be taken from at least two different departments.

The primary focus is the history, politics, artistic production, and/or cultures of the Middle East and/or North Africa.

ANTH 130T	Religion and Politics in the Muslim World	5
CRES 134	The Black "Middle East"	5
CRES 170	Intro to Arab American Communities	5
CRES 171	Arab Feminist Visions	5
CRES 172	Arab Uprising: Movements, Revolutions, and Praxis	5
CRES 173	Palestine: A History from Below	5
CRES 174	Palestine Through Ethnic Studies Lens	5
FILM 168	National Cinema and Culture	5
HAVC 153	Neither Venus Nor Virgin: Women's Lives Beyond Men's Constructs in Late Antiquity and Byzantium	5
HAVC 154	Byzantine Visual Culture: Politics and Religion in the Empire of Constantinople, 330-1453 A. C	5
HAVC 155	Constructing Cleopatra: Power, Sexuality, and Femininity Across the Ages	5
HAVC 190C	The Mediterranean from the Rise of Christianity to the Rise of Islam	5
HAVC 190N	Topics in Mediterranean Visual Culture	5
HIS 154	Post-Colonial North Africa	5
HIS 156A	Art, Culture, and Mass Media in the Arab Middle East	5
HIS 156B	Modern Arab Thought	5
HIS 156C	Living Egyptian History in the City of Cairo	5
HIS 157	The Ottoman Empire	5
HIS 159A	Cleopatra to Constantine: Greek and Roman Egypt	5
HIS 159B	Women and Gender in Ancient Egypt	5

HIS 159C	Temple and City: The Egyptian New Kingdom and the City of Thebes	5
HIS 159D	When Cities Were New: the Rise of Urbanism in the Ancient Near East and Mediterranean	5
HIS 170C	Mediterranean France: The History and Politics of Immigration	5
HIS 185C	Communism, Nationalism, and Zionism: Comparative Radical Jewish Politics	5
HIS 185M	Zionism: An Intellectual History	5
HIS 185O	The Holocaust and the Arab World	5
HIS 194L	Exile, Diaspora, and Displacement: Jewish Lives from North Africa to the Middle East	5
HIS 194S	Special Topics in Ancient Egyptian History	5
HIS 194V	Fascism and Anti-Fascism: The Global Spanish Civil War	5
HIS 194W	Social Movements in the Modern Middle East	5
LIT 117A	Old Iranian Literature	5
LIT 125H	Modern Arabic Novel	5
LIT 130B	Travel Writing and Intercultural Relations in the Middle Ages	5
LIT 130D	The Global Middle Ages	5
LIT 141A	Early Mediterranean Cultures	5
LIT 141D	Classical Arabic Literature and Islamic Civilization	5
LIT 141E	Post-Classical Arabic Literature and Culture	5
LIT 141G	Granada: The Moor's Last Sigh and the Muslim's Frontier: The City in the Mediterranean Imagination	6
LIT 159M	The Curse of the Mummy	5
LIT 168A	The Culture of Islamic Law	5
LIT 168B	Islamic Law and Society	5
POLI 140E	Middle East Politics	5
POLI 184	Shariah and Political Thinking: Law and Politics in Modern Islamic Thought	5
POLI 187	Decolonial Global Health: A View from the Middle East and Africa	5

Course Substitution Policy

Transfer Credits and Course Substitutions

Courses from the following categories may also be applied to the MENAS minor:

- Transfer Courses/Courses taken at another institution (three courses)
- Education Abroad Program (no limit). See Global Learning for available course offerings.
- Course Substitutions/Related courses not currently on the pre-approved MENAS course list (no limit)
- Independent and Field Studies (two courses)

Transfer Coursework

Students may petition up to three courses taken at another college or university for use toward their MENAS minor requirements. Courses must appear on your UC Santa Cruz Transfer Credit Summary Report before they will be approved for use toward your MENAS minor requirements.

Philosophy

220 Cowell College
(831) 459-2070
https://philosophy.ucsc.edu/

PROGRAMS OFFERED

Philosophy B.A. (p. 267)

Philosophy Minor (p. 270)

Philosophy Contiguous Bachelor's/Master's Pathway (p. 270)

Philosophy M.A. (p. 271)

Philosophy Ph.D. (p. 272)

Philosophy Designated Emphasis (p. 273)

Philosophy investigates fundamental questions about the most basic facets of human thought and life, e.g., concerning knowledge and belief (epistemology), the nature of reality (metaphysics), and morality and aesthetics (value theory). Such questions can be studied by looking at answers that contemporary philosophers propose, by investigating the principles that other disciplines use to legitimate claims, or by learning how, historically, philosophers approached these issues. In this respect, “philosophy” names not only a historically defined subject matter, but also inquiry into any of the fundamental determinants of rational thought. Thus, students of philosophy can pursue a broad range of topics of the greatest historical, intellectual, social, political, and personal interest.

The programs offered by the Philosophy Department are designed to familiarize students with the central concepts and key debates in the core areas of contemporary philosophical thought and with the works of the major figures in the history of philosophy. The department offers an undergraduate major and a minor. The philosophy major leads to a bachelor of arts (B.A.) degree in philosophy. The graduate program leads to the master of arts (M.A.) and doctor of philosophy (Ph.D.) degrees in philosophy.

The department also offers a combined B.A./M.A. pathway which makes it possible for certain well-qualified, highly motivated students to complete the requirements for both degrees in five years rather than the usual six.

Please see our planned course offerings for the current academic year on this page.

PHILOSOPHY B.A.

Information and Policies

Introduction

Philosophy investigates fundamental questions about the most basic facets of human thought and life, e.g., concerning knowledge and belief (epistemology), the nature of reality (metaphysics), and morality and aesthetics (value theory). Such questions can be studied by looking at answers that contemporary philosophers propose, by investigating the principles that other disciplines use to legitimate claims, or by learning how, historically, philosophers approached these issues. In this respect, "philosophy" names not only a historically defined subject matter, but also inquiry into any of the fundamental determinants of rational thought. Thus, students of philosophy can pursue a broad range of topics of the greatest historical, intellectual, social, political, and personal interest.

The department offers courses that relate these traditional philosophical questions to contemporary work in literature and the social and natural sciences. In addition, the department offers several courses that make a careful study of the classic texts in philosophy, ancient and modern. Moreover, the curriculum covers many of the dominant contemporary schools of philosophy in the Anglo-American and European traditions.

The study of philosophy enables students to expand their abilities in critical thinking and reasoning as well as to improve their skills in verbal and written communication. Students may major or minor in philosophy.

Philosophy prepares students for many careers as well as for most professional schools, including law, education, business, and non-profit management. Students who wish to go to graduate school in philosophy are encouraged to study logic at both the introductory and intermediate levels and any languages that are necessary for advanced scholarship in the different historical eras of philosophy.

Program Learning Outcomes

Students who complete the philosophy major should emerge with the following knowledge and skills:

- an ability to argue cogently for a philosophical point and to analyze and criticize the arguments of others;
- a familiarity with the central concepts and key debates in the core areas of contemporary philosophical thought, including ethics, metaphysics, and epistemology;
- a familiarity with the works of the major figures in the history of philosophy; and
- a familiarity with formal logic, including the ability to carry out proofs within symbolic formal systems.

Academic Advising for the Program

For undergraduate advising, please contact philadvi@ucsc.edu. For transfer students, please also consult the Transfer Information and Policy section and contact the undergraduate advisor with any questions. Please see our planned course offerings for year at this page.

Getting Started in the Major: Frosh

Transfer Information and Policy

Transfer Admission and Screening Policy

Students planning to apply in this major are not required to complete specific major preparation courses for consideration of admission to UC Santa Cruz. Although this is not required for admission, students are recommended to complete courses in the following areas:

- Introduction to Symbolic Logic
- Ancient Philosophy
- Modern Philosophy
- Ethical Theory
- Philosophy of Mind or Epistemology

Students may petition to substitute courses taken at other institutions, or take courses articulated on assist.org. Please note that logic classes offered at community colleges will not fulfill the department's logic requirement (i.e., PHIL 9). However, most students should be able to satisfy their second required lower-division introductory course before transferring in.

Transfer students wishing to major in philosophy are encouraged to consult with the Philosophy Department undergraduate advisor as soon as possible.

Getting Started in the Major: Transfer Students

Students can declare the major once they are enrolled in or have taken one philosophy course.

Major Qualification Policy and Declaration Process

Major Qualification

Students may declare the major once they have enrolled in at least one 5-credit lower-division philosophy course. Students of any year can declare the major. While specific courses are not required in order to declare, students will have ideally completed some or all of the lower-division requirements. There is no GPA requirement to declare the philosophy major. A student approaching the campus declaration deadline who has not enrolled in any philosophy courses will be allowed to declare the philosophy major if they enroll in a lower-division philosophy course in the next quarter.

Appeal Process

How to Declare a Major

Students may declare the major by submitting a Petition for Major/Minor Declaration to the department advisor. Students must complete all requirements for the major with a grade of P, C (2.0), or better.

Per campus policy, students must submit their major declaration no later than the third quarter of their sophomore year or, in the case of transfer students, no later than the second quarter of their junior year. Philosophy welcomes students who are pursuing more than one major or who are transferring from another major to declare after this time frame.

Letter Grade Policy

This program does not have a letter grade policy.

Optional Catchall

Course Substitution Policy

For majors, students are allowed to substitute two upper-division courses for their required philosophy courses. Lower-division courses completed elsewhere may also be considered. Substitution requests are to be made via petition to and are subject to approval by the undergraduate program director. Students must have received a B or higher to transfer a course for credit.

Double Majors and Major/Minor Combinations Policy

Study Abroad)

Honors

Graduation with Honors in Philosophy requires at least a 3.7 average in all philosophy courses taken at UC Santa Cruz. Graduation with Highest Honors in Philosophy requires at least a 3.9 average in all philosophy courses taken at UC Santa Cruz. Students with an average between 3.8 and 3.9 may be awarded Highest Honors by vote of the Philosophy Department.

Program Planning Notes

When a faculty member thinks that a student has done exceptional work that could be carried to a more advanced level, the student may be given the option of writing a senior essay (PHIL 195A). Normally, the senior essay is completed in one quarter; in unusual circumstances, it can be continued for a second quarter (PHIL 195B), but only if the writing requirements for PHIL 195A are completed successfully and on time. The senior essay, like individual studies more generally, does not count toward the 11 courses required for the major.

After undergraduates have taken the requisite lower-division courses, they have a wide range of upper-division courses from which to choose. Those who are considering advanced study are encouraged to consult regularly with any member of the philosophy faculty about the courses that would best prepare them for graduate work. Preparation for graduate work ought to begin before senior year. The Philosophy Department sponsors workshops for students contemplating graduate school in philosophy.

Optional Catchall

Requirements and Planners

Course Requirements

Eleven courses are required: two at the lower-division level, two in the history of philosophy sequence (PHIL 100A, PHIL 100B, PHIL 100C), six additional upper-division courses (including one advanced seminar), and an elective course which may be from any level. These 11 courses must meet the following distribution requirements:

Lower-Division Courses

The following course:

PHIL 9	Introductory Symbolic Logic	5

Plus

At least one other 5-credit course numbered PHIL 1-98, with the exception of PHIL 8.

Transfer students should check Assist.org for articulation agreements.

Upper-Division Courses

History of philosophy

Two of the following courses:

PHIL 100A	Ancient Greek Philosophy	5
PHIL 100B	The Rationalists	5
PHIL 100C	The Empiricists	5

All three are strongly recommended for students who anticipate graduate work in philosophy.

Plus

Six 5-credit courses numbered PHIL 100A or above, with at least one in value theory and two in metaphysics and/or epistemology.

Note that the two courses counted toward fulfilling the history of philosophy requirement cannot be counted among these six additional courses. PHIL 195A, PHIL 195B, and PHIL 199 also cannot be counted among these six courses.

Courses satisfying the value theory requirement:

PHIL 118	Stoic Ethics	5
PHIL 140	History of Ethics	5
PHIL 142	Advanced Ethics	5
PHIL 143	Applied Ethics: Ethics Bowl	5

PHIL 144	Topics in Social and Political Philosophy	5
PHIL 147	Topics in Feminist Philosophy	5
PHIL 148	The Holocaust and Philosophy	5
PHIL 152	Aesthetics	5
PHIL 153	Philosophy of Race	5

Courses satisfying the metaphysics and epistemology requirement:

PHIL 106	Kant	5
PHIL 113	The History of Analytic Philosophy	5
PHIL 114	Probability and Confirmation	5
PHIL 121	Epistemology	5
PHIL 122	Metaphysics	5
PHIL 124	Other Minds	5
PHIL 125	Philosophy of Science	5
PHIL 126	Philosophy of Social Sciences	5
PHIL 127	Philosophy of Biology	5
PHIL 133	Philosophy of Mind	5
PHIL 135	Philosophy of Psychology	5

Senior Seminar

One advanced seminar numbered:

PHIL 190	Senior Seminar	5

Elective

An 11th 5-credit course from any level (lower, upper, or graduate).

Electives

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in philosophy is met by completing any two from the sequence:

PHIL 100A	Ancient Greek Philosophy	5
PHIL 100B	The Rationalists	5
PHIL 100C	The Empiricists	5

Comprehensive Requirement

In the fourth year, students satisfy the comprehensive (exit) requirement by taking one course numbered 190. This advanced seminar meets the standards of the senior-year level of achievement in philosophy. Students who do superior work in an advanced seminar can be awarded a notation of Honors in the evaluation for that course.

PHIL 190	Senior Seminar	5

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Courses must be satisfied in the following sequence. Before being eligible to enroll in any course in the history sequence (PHIL 100A-PHIL 100B-PHIL 100C), a student must have completed two lower-division courses (one of these may be PHIL 8 or PHIL 9, but not both). Before being eligible to enroll in any philosophy course above PHIL 100C, students must have taken PHIL 9 and at least one of the required history of philosophy courses (i.e., either PHIL 100A, PHIL 100B, or PHIL 100C). In addition to the specific courses shown in these planners, a student must complete courses satisfying the general education requirements.

Four-Year Major Planner

	Fall	Winter	Spring	Summer
Entering				College 1A Summer Edge (optional)
1st (frosh)	PHIL 11 College 1	PHIL 9 WRIT 1/WRIT 1E (if needed)	PHIL 100C WRIT 2*	
2nd (soph)	PHIL 100A	PHIL 100B (elective)	PHIL 1XX (ME)	
3rd (junior)	PHIL 1XX (Value)	PHIL 1XX (elective)	PHIL 1XX (ME)	
4th (senior)	PHIL 1XX (elective)		PHIL 190	

PHIL 9 satisfies the MF general education requirement and PHIL 11 satisfies the TA general education requirement (Other lower-division courses may satisfy different GE

requirements). Students must complete all other GE requirements.

*WRIT 2 is a prerequisite to PHIL 100A, the DC course, and the PHIL 100A-C series. It should ideally be taken spring quarter of the first year. Under campus policy, WRIT 2 (the C requirement) must be completed by spring quarter of the second year.

Two-Year Transfer Major Planner

	Fall	Winter	Spring	Summer
Entering				KRSG 1T Summer Edge (optional)
1st (junior)	PHIL 11 or PHIL 22 (if needed)	PHIL 100B	PHIL 100C	
	PHIL 9		PHIL 1XX (ME)	
2nd (senior)	PHIL 100A (elective)	PHIL 1XX (elective)	PHIL 1XX	
	PHIL 1XX (Value)	PHIL 1XX (ME)	PHIL 190	

Before transferring, students should complete as many of their general education as possible and their lower-division introductory philosophy course.

PHILOSOPHY MINOR

Course Requirements

Students must have taken or currently be enrolled in at least one lower-division philosophy course in order to declare the minor. Students declare by contacting the undergraduate advisor, who will develop an individual academic plan and complete a Petition for Major/Minor Declaration form. Students should contact philadvi@ucsc.edu in order to declare.

A minor in philosophy consists of seven of the 11 courses required for the major, and will meet the following distribution requirements:

Lower-Division Courses

The following course:

PHIL 9	Introductory Symbolic Logic	5

Plus

At least one other 5-credit course numbered PHIL 1-98, with the exception of PHIL 8.

Transfer students should check Assist.org for articulation agreements.

Upper-Division Courses

History of Philosophy

One of following courses:

PHIL 100A	Ancient Greek Philosophy	5
PHIL 100B	The Rationalists	5
PHIL 100C	The Empiricists	5

Plus

Four additional 5-credit upper-division courses numbered 100A or above. This includes one in value theory and two in metaphysics and/or epistemology (see Philosophy B.A. course requirements for a list of courses that satisfy this requirement).

Note that the course counted toward fulfilling the history of philosophy requirement cannot be counted among these additional courses. PHIL 195A, PHIL 195B, and PHIL 199 also cannot be counted among these courses.

Course Substitution Policy

One upper-division course substitution may be considered, but lower-division courses may not be substituted for an upper-division requirement. Lower-division courses completed elsewhere may also be considered. Substitution requests are to be made via petition to and are subject to approval by the undergraduate program director. There is no senior exit requirement for the minor.

For the sequence in which courses must be taken, see Major Requirements.

Letter Grade Policy

This program does not have a letter grade policy.

PHILOSOPHY CONTIGUOUS BACHELOR'S/MASTER'S PATHWAY

The B.A./M.A. pathway is an option that allows students to complete the requirements for both degrees in five years, rather than the usual six.

Interested students with a GPA of at least 3.5 will be asked to indicate their intention to participate in the program no later than the seventh week of the spring quarter of their junior year (spring quarter advising week). Intentions to participate

should be directed to the undergraduate staff advisor. Subject to instructor consent, students may then enroll in two to three graduate philosophy seminars in their senior year.

Actual admission to this program requires that students apply to the M.A. program through the standard graduate admissions process as specified on UC Santa Cruz's Graduate Division's website. If a student is then admitted, up to three graduate philosophy seminars taken in their senior year will count as credit toward their graduate degree. Students matriculating through the B.A./M.A. pathway will be required to take the remaining courses required for the M.A., as well as to write and defend their M.A. capstone paper, in the fifth year. Those needing additional time may continue in the pathway in accordance with normative time expectations for the stand-alone master's program.

PHILOSOPHY M.A.

Introduction

The M.A. program is host to talented students from diverse academic backgrounds. The program is open not only to applicants who majored in philosophy as undergraduates, but also to applicants from other disciplines, who have a significant background in philosophy and who now want to study philosophy more intensively. The program is designed to be completed in one to two years or, in the case of students on the Contiguous Bachelor's/Master's pathway, one year.

Preparation for the Master's Degree

Students can apply to be admitted into the graduate program to pursue the M.A. in philosophy. Interested students should discuss the possibility with one or more faculty members and formally apply online to the graduate program during fall quarter. For up-to-date information about the application process, consult the department's website and contact the graduate advisor.

Relationship of the M.A. and Ph.D. Programs

Students in the M.A. and Ph.D. programs will be in the same classes and satisfy similar course distribution requirements. Enrollment in the M.A. program confers no advantage for admission to the Ph.D. program.

Applications and Admissions

Application materials are available online. Further information regarding the program may be found on the department website.

Requirements

Course Requirements

Requirements in the First Year

During their first year, all graduate students are expected to fulfill a set of breadth requirements. These requirements are designed to provide both a common experience on which students can build their individual projects and a shared framework within which they can exchange ideas. Every graduate student in philosophy is required to complete six courses in their first year.

This minimal core set of courses will consist of (i) three graduate seminars, designated by the department each year as mandatory for every first year student, and (ii) three electives (any three graduate seminars in philosophy). Of the three required seminars, one will be in metaphysics/epistemology, one in the history of philosophy, and one in moral philosophy.

No courses labeled PHIL 294 or higher will satisfy any of these minimum core requirements. This restriction is redundant for PHIL 299 (since that course is open only to students who have advanced to candidacy). The point of this restriction is to limit the use of independent studies, reading groups or student seminars for graduate seminar credit.

During their first year of study all students must pass a logic competency examination with a grade of B or better. This examination will cover material typically taught in a first course in formal logic.

To facilitate professionalization in the exchange and development of academic knowledge and skills, M.A. students are strongly encouraged—though not required—to enroll in PHIL 280 and PHIL 281 each year. However, M.A. students wishing to work as a teaching assistant (TA) at any point during their time in the program must enroll in PHIL 281 in both years.

PHIL 280	Graduate Colloquia Course	2
PHIL 281	The Pedagogy of Philosophy	2

PHIL 280, Graduate Colloquia Course, provides preparation for and requires attendance at all department-sponsored colloquia and works-in-progress presentations each quarter.

PHIL 281, The Pedagogy of Philosophy, provides training in university-level teaching in general and in the pedagogy of philosophy specifically. It meets during the fall quarter only.

For further details, see the department's web page or consult with the department's graduate advisor.

Requirements in the Second Year

M.A. students are expected to complete the common first-year requirements as described above and then three more graduate seminars in the second year, for a total of nine courses. After the first-year coursework requirements have been met, M.A. students may substitute up to two of the three remaining graduate seminars with graduate seminars offered in other programs and/or with independent studies in philosophy (PHIL 297).

Other Requirements

By the end of the second year of study and the completion of 45 credits, M.A. students will submit a master's capstone paper, which will normally be defended before a committee of two faculty.

[Optional Catchall]

Applying for Graduation

Students apply to graduate by contacting the department graduate advisor and completing the relevant forms from the Graduate Division.

PHILOSOPHY PH.D.

Introduction

The Ph.D. program provides students with closely monitored training in philosophy. The program is designed to be completed in six years or less. Graduate work in philosophy can lead to careers both inside and outside academia. Because most doctoral students will be preparing for a career that involves teaching philosophy, they are encouraged to be teaching assistants for at least three quarters.

The department has four areas of focus; Ethics and Technology, Social Epistemic Injustice, Disagreement Rationality, and Public Engagement (see the "About" page). The department's faculty also have an interest in the history of philosophy as an indispensable background to the main areas of contemporary concern in the discipline. Among the faculty's main contemporary interests are those topics commonly pursued in any high-ranking research and teaching program, and particularly. those comparable to departments of philosophy at other UC's: philosophy of science, metaphysics, philosophy of mind, epistemology, aesthetics, philosophy of language, philosophy of religion, ethics and moral psychology (see the "Research" page). The faculty's research and teaching in these areas is informed by leading historical figures, including especially Kate, Aristotle, Hume, Wittgenstein and--again, uniquely for such a small department--leading figures from the Middle Ages and late antiquity, including medieval Islamic figures.

Relationship of the M.A. and Ph.D. Programs

Students in the M.A. and Ph.D. programs will be in the same classes and satisfy similar course distribution requirements. Enrollment in the M.A. program confers no advantage for admission to the Ph.D. program.

Applications and Admissions

Application materials are available online. Further information regarding the program may be found on the department website.

Advancement to Candidacy

Course Requirements

Requirements in the First Year

During their first year, all graduate students are expected to fulfill a set of breadth requirements. These requirements are designed to provide both a common experience on which students can build their individual projects and a shared framework within which they can exchange ideas. Every graduate student in philosophy is required to complete six courses in their first year.

This minimal core set of courses will consist of (i) three graduate seminars, designated by the department each year as mandatory for every first year student, and (ii) three electives (any three graduate seminars in philosophy). Of the three required seminars, one will be in metaphysics/epistemology, one in the history of philosophy, and one in moral philosophy.

No courses labeled PHIL 294 or higher will satisfy any of these minimum core requirements. This restriction is redundant for PHIL 299 (since that course is open only to students who have advanced to candidacy). The point of this restriction is to limit the use of independent studies, reading groups or student seminars for graduate seminar credit.

During their first year of study all students must pass a logic competency examination with a grade of B or better. This examination will cover material typically taught in a first course in formal logic.

To facilitate the professionalization of students in the exchange and development of academic knowledge and skills, all first- and second-year doctoral students will be required to enroll in:

PHIL 280	Graduate Colloquia Course	2
PHIL 281	The Pedagogy of Philosophy	2

PHIL 280, Graduate Colloquia Course, provides preparation for and requires attendance at all department-sponsored colloquia and works-in-progress presentations each quarter.

PHIL 281, The Pedagogy of Philosophy, provides training in university-level teaching in general and in the pedagogy of philosophy specifically. It meets during the fall quarter only.

Requirements in the Second Year

Doctoral students are expected to complete the common first-year requirements as described above and then six more graduate seminars in the second year, for a total of 12 courses.

After the common first-year requirements have been met, doctoral students may substitute up to two of the six remaining graduate seminars with graduate seminars offered in other programs, and up to two other seminars with independent studies in philosophy (PHIL 297). PHIL 270 does not count toward these 12 required breadth courses in years 1 and 2, but is required for successful completion of the Ph.D.

Foreign Language Requirements

The foreign language requirement will be individually determined based on the relevance of such linguistic skills to the research interests of the student. Proficiency can be demonstrated either by passing a written examination administered by the department or by successfully completing a language course approved by the graduate director.

Teaching Requirement

Pre-Qualifying Requirements

Qualifying Examination

Qualifying Examination and Research Seminar

The qualifying examination, normally taken during the third year of enrollment, is centered on a qualifying essay that demonstrates the candidate's ability to do extended, dissertation-level research and analysis relevant to the proposed thesis topic and dissertation plan. The examination focuses on the student's research project and on the fields of scholarship it presupposes.

Near the end of the required coursework, doctoral students will develop a research project resulting in a substantial paper. The paper is required to enroll in the research seminar, PHIL 270, which must be completed during or before winter quarter of the third year. The seminar will allow students to make substantial progress on a qualifying essay and cultivate their ability to assess and provide critical feedback on another author’s philosophical work. PHIL 270 is only offered in winter quarter, and will normally be taken in the third year, though it may be taken earlier than the third year or taken a second time in the fourth year with the permission of the instructor. It is optional for M.A. students.

Post-Qualifying Requirements

[Optional Catchall]

Dissertation

Dissertation

Prospectus

Within one year of passing the qualifying examination (usually during the fourth year) doctoral students will submit and defend a dissertation prospectus, consisting of some written foundation and a plan for completion of the dissertation. The committee for the prospectus defense is normally the dissertation committee.

The prospectus will be submitted at least one month prior to the defense. It will normally consist of:

1. A detailed outline or table of contents of the entire dissertation
2. A bibliography indicating knowledge of the scope of the relevant literature
3. A paper that would be suitable as a chapter of the dissertation and that (a) clearly shows the potential for developing the rest of the dissertation, or (b) lays out the central problem which the dissertation will address.

Dissertation

The final requirement for the Ph.D. degree is a dissertation representing a contribution to philosophical research. Students submit their dissertation committee to the department for approval once they complete their qualifying exam. They may change their committee at a later time pending department approval. This committee is submitted to the Graduate Division for final approval.

Dissertation Defense

Academic Progress

Applying for Graduation

Students apply to graduate by contacting the department graduate advisor and completing the relevant paperwork from the Graduate Division.

[Optional Catchall]

PHILOSOPHY DESIGNATED EMPHASIS

To receive a designated emphasis in philosophy, graduate students from other departments must complete the following requirements in addition to degree requirements for the doctorate in their home department.

Contact the Philosophy Department graduate advisor for more information about the emphasis and to obtain an application form.

Committee Composition and Departmental Approvals

A Philosophy Department faculty member is to be consulted about the intention to pursue a philosophy designated emphasis. This advisor is required to serve on both the qualifying examination committee and the dissertation reading committee.

Course Requirements

Students must complete four graduate courses in philosophy selected in consultation with the philosophy faculty advisor. One of the four may be an independent study approved by the philosophy faculty advisor.

Writing, Research and/or Teaching Requirements

Students must submit a significant piece of writing that demonstrates competency in the field. The writing could take

the form of a seminar paper or dissertation chapter. The essay must meet the approval of the philosophy advisor.

Academic Progress

[Optional Catchall]

Writing Program

209 Humanities 1
(831) 459-2431
https://writing.ucsc.edu
https://writingplacement.sites.ucsc.edu/

The Writing Program offers lower-division general education composition courses, upper-division peer tutoring courses, and graduate-level pedagogy courses. The Writing Program also houses the Don Rothman Endowed Award in First-Year Writing, which honors outstanding first-year writers and recognizes the pedagogical inspirations of their teachers.

Students place into writing courses via Directed Self-Placement (DSP). Please visit the DSP website for details.

LOWER-DIVISION COURSE

The Writing Program's lower-division courses are designed to help students become confident writers, learners, and researchers who communicate effectively in a variety of writing situations and disciplinary fields. These courses teach students how to develop analytical, reflective, and flexible writing practices to meet the expectations of academic, professional, and civic audiences, and are attentive to recent developments in writing (disinformation, AI, etc.).

Specifically, the program offers courses that satisfy:

- Systemwide Entry-Level Writing Requirement (ELWR)
  - WRIT 1, Introduction to Composition (F, W, S)
  - WRIT 1E, Introduction to Composition for Multilingual Students (F, W, S)

Students from catalog years 2019-2020 may place into WRIT 1 and WRIT 1E based on AWPE scores.

- General Education Composition (C) Requirement
  - WRIT 2, Rhetoric and Inquiry (F, W, S)
  - WRIT 2H, Rhetoric and Inquiry Honors (W, S)

MULTILINGUAL CURRICULUM

The Writing Program also offers the Multilingual Curriculumfor students who are in the process of acquiring English. These courses are designed to strengthen students' use of English for purposeful, authentic, and culturally appropriate communication. These courses honor students' multiliteracies and prepare students for subsequent writing requirements.

Based on students' course selection via Directed Self-Placement, students who are acquiring English may place into the following courses, which are taken prior to the ELWR (WRIT 1 or WRIT 1E) and C Requirement (WRIT 2 or WRIT 2H):

- WRIT 25, Writing about Place (F)
- WRIT 26, Writing about Language (F, W)*

Students from catalog years 2019-2020 and before may place into WRIT 25 and WRIT 26 based on AWPE-MLS scores.

*Upon completion of WRIT 26, multilingual students are highly encouraged to take WRIT 1E, which carries the same outcomes as WRIT 1 but is taught by trained faculty with expertise in language acquisition.

UPPER-DIVISION WRITING COURSE

The Writing Program offers a course for undergraduates interested in serving as peer tutors for lower-division writing students. By exploring theory and research on writing pedagogies, tutors gain insight into composing processes, meeting the academic needs of diverse learners, and providing responsive assistance in one-to-one tutoring settings.

- WRIT 169: Theory and Practice of Tutoring Writing (5 credits, W, S)

GRADUATE-LEVEL WRITING COURSES

The Writing Program supports graduate education by offering pedagogical training for graduate students from all disciplines in the theory and practice of teaching writing, with an emphasis on course and assignment design that foregrounds disability studies and inclusive teaching. This course is designed for students who would like to enhance their own pedagogical development as teaching assistants in other departments.

- WRIT 203, Teaching Writing

Humanities Certificate Programs

Humanizing Technology Certificate (p. 274)

Visualizing Abolition Studies (VAST) Certificate (p. 275)

HUMANIZING TECHNOLOGY CERTIFICATE

The Humanizing Technology Certificate Program (HTCP) encourages students to explore the impacts of new and existing technologies in our everyday lives. At the same time, it helps students develop their critical thinking about social and cultural systems that inform these technologies, and provides them with tools for becoming socially responsible professionals. The HTCP offers students interested in

technology a pathway to fulfill General Education (GE) requirements with courses that have a direct relevance to their majors and career interests, and it gives students an opportunity to develop community in smaller learning environments.

To earn the certificate, students are required to complete three of eight designated courses below. These classes have no prerequisites, and can be taken in any order. Intended for first-year and second-year students but open to all, the HTCP enables students to fulfill GE requirements with a set of courses that focus on the intersection of technology and issues of race, power, ethics, language, and representation. The certificate introduces students to humanistic methods and approaches to studying technology and its ramifications, enabling them to contextualize the social, cultural, and historical contexts of new technologies. Courses are small and designed to foster discussion, collaboration, and community. Students are encouraged to develop their own viewpoints on the sources and impacts of technological systems, and to convey those viewpoints clearly and confidently. Above all, the courses help students learn how to grapple with difficult societal questions that lack clear “right” answers and become socially responsible agents of positive change in their professional and personal lives.

The Humanizing Technology Certificate is awarded on completion of three of the eight designated courses. The HTCP program will contact students upon completion of this requirement. Students are encouraged to contact HTCP advising at humadvising@ucsc.edu to discuss their plans. Students are encouraged to list the HTCP Certificate in their resumes, in addition to articulating the skills they’ve developed through program courses. The HTCP Certificate will not appear on students’ transcripts.

Students who successfully complete a minimum of three of the following courses will be awarded the Humanizing Technology Certificate. Students can choose any combination of the classes in order to qualify.

- HUMN 15, Ethics and Technology (Textual Analysis Gen Ed). This course explores ethical, social, and political issues raised by existing and emerging technologies.
- HUMN 25, Humans and Machines (Textual Analysis Gen Ed). This course explores the tension between humans and machines, between people and objects increasingly resembling them.
- HUMN 35, Language Technology (Cross-Cultural Analysis Gen Ed). This course provides a comparative, historical framing of the development of communication technologies and practices, considering a variety of cultures and societies across human history.
- HUMN 45, Race and Technology (Ethnicity and Race Gen Ed). This course examines how the construction of race connects with constructs in science and technology.
- HUMN 55, Technologies of Representation (Interpreting Arts and Media Gen Ed). Focusing on technologies of representation like photographs, selfies, and surveillance data, this course explores how viewers and makers derive meaning from images and how power operates in their creation and circulation.
- LIT 81E, Social Media and Society, (Perspectives: Technology and Society Gen Ed). Introduction to social media's evolving impact on society. How are social media changing communication, politics, identity, privacy, and what we believe? Materials include critical texts and real-world case studies, as well as films and short fiction.
- LIT 126H, Artificial Intelligence and Human Imagination (Cross-Cultural Analysis Gen Ed). This course uses a humanistic framework to study the promises and perils of artificial intelligence technosystems (AI). It studies cultural depictions of AI, co-creates cultural artifacts using AI, and analyzes the "anatomy" of specific AIs.
- LIT 160P, Misinformation, Disinformation, and Fake News (Perspectives: Human Behavior Gen Ed). Our world is saturated with information and much of it is inaccurate. This class teaches how to identify bad information and how to keep it from spreading. It explores the role and responsibility of journalism in the world and why it matters. It investigates where information originates and the motivations of those producing, spreading, and sharing it, and pushes students to consider their media diet and how it affects their life and understanding of the world.

Per the university's Committee on Educational Policy's Policy on Undergraduate Academic Certificate Programs, "course credits should not count toward any other major or minor." Students who are pursuing a Humanizing Technology Certificate should contact the Humanizing Technology Certificate advisor to discuss their plans; the courses for the certificate may need to be adjusted.

VISUALIZING ABOLITION STUDIES (VAST) CERTIFICATE PROGRAM

Visualizing Abolition Studies

The Visualizing Abolition Studies Certificate Program (VAST) provides students with access to a curriculum in critical studies of incarceration that builds through developing skills in analyzing art and visual culture. Based on a recognition that visual materials co-constitute our world and are often a primary means through which we come to access it, VAST will prepare students to examine not only the existing criminal legal system but also the means through which it has been studied in the past. As such, it offers students an arena in which to develop their critical thinking about the social and cultural systems that structure our lives.

Open to all students, the VAST Certificate Program encourages exploration of the many ways in which forms of visibility, representation, aesthetic production, and popular culture intersect with the carceral. The course of study is multidisciplinary and includes the potential for both creative and analytical coursework. Opportunities for practical learning, especially in collaboration with the Institute of the Arts and Sciences (IAS) and other area museums, are stressed. Above all, VAST courses encourage students to hone a sense of their own political commitments and capacities by supporting their views with a strong research foundation.

Students are encouraged to list the VAST Certificate on their resumés. The VAST Certificate will not appear on students' transcripts but may be verified with the IAS.

For more information, visit: https://ias.ucsc.edu/visualizing-abolition-studies/ or contact vast@ucsc.edu.

Certificate Level Learning Outcomes

As a result of completing the VAST certificate program, students will be able to:

- **Think** beyond the entrenched social dynamics that center on punishment.
- **Analyze** the role played by visual media in constructing past and present social systems.
- **Create** and/or **interpret** visual art in order to challenge carceral practices and fashion new modes of relationality.
- **Develop** critical skills and workplace experience required to enter multiple post-graduate professions such as (but scarcely limited to): the arts, teaching, legal work, the non-profit sector, and social work.

Academic Advising for the Program

Undergraduate advising for the VAST Certificate Program is supported by the Humanities Division. The humanities divisional advisor offers specific information about navigating through the program and curriculum and assists students with academic planning, requirements, and extra-curricular opportunities related to the program. Please contact the advisor at vast@ucsc.edu.

Students are not required to declare their intent to complete the certificate program in advance. Once their third VAST course is completed and grades have posted, they will receive a PDF certificate via email from the VAST advisor. If they haven't heard from the VAST advisor, please reach out to them to confirm the certificate's completion.

Transfer Information and Policy

Students transferring to UC Santa Cruz are strongly encouraged to pursue the VAST Certificate. Transfer students may consult with the VAST advisor about transferring credits to count towards the completion of the certificate program; requests will be evaluated on a course-by-course basis.

Faculty

The faculty of the VAST program can be found here.

Course Requirements

The Visualizing Abolition Studies Certificate is awarded on completion of 15 credits in VAST courses.

Take the following course:

FMST 71	Introduction to Visualizing Abolition Studies	5

Plus 10 credits of electives:

10 credits from the following courses (students may earn 10 credits toward the VAST Certificate by taking the full two-quarter sequence of FILM 171S: Making an Exoneree):

ART 108	Art, Design, and Social Practice	5
ART 175	Taking Art to the Streets	5
CRES 115	Frantz Fanon: Resistance, Revolution, and Decolonization	5
CRES 132	Black Speculations	5
CRES 190D	Black Geographies and the Imperative of Abolition	5
FILM 171S	Special Topics in Film and Digital Media Production	5
FMST 176	Law, Prisons, and Popular Culture	5
KRSG 60C	Narratives of Incarceration and Abolition	3
PRTR 132	Writing the Future: Science Fiction	5
PSYC 147A	Psychology and Law	5
PSYC 147B	Psychology and Law	5
VAST 188J	Curation and Justice	5
VAST 199	Independent Study	5

Some courses may have prerequisites.

Per the university's Committee on Educational Policy on Undergraduate Academic Certificate Programs, "course credits should not count toward any other major or minor." Students who are pursuing a VAST certificate should contact the VAST advisor to discuss their plans; the courses for the certificate may need to be adjusted.

PHYSICAL AND BIOLOGICAL

SCIENCES DIVISION

Physical Sciences Building, 5th Floor
(831) 459-2931
https://science.ucsc.edu

The Division of Physical & Biological Sciences at the University of California, Santa Cruz invites you to join a vibrant community of curious minds and change-makers. Our academic programs span a wide range of disciplines designed to inspire and empower students. The intellectual rigor of these programs ensures that our graduates are well prepared for further studies in graduate and professional schools, as well as careers in research and development, healthcare and medicine, environmental and conservation careers, technology and engineering, education and outreach, public policy and consulting, industry and entrepreneurship, and specialized fields or emerging careers in AI, bioinformatics, or sustainability.

Our programs are deeply interdisciplinary, offering students unique opportunities to learn in and beyond the classroom through independent research, collaborative experiments, and hands-on fieldwork. Whether you're studying the intricacies of cells, exploring distant galaxies, investigating the forces of plate tectonics, developing innovative chemical compounds, or uncovering patterns in complex data, you'll gain the skills and experiences that prepare you to explore and discover the world and also to define and improve it.

We are committed to fostering a welcoming and inclusive environment where every student's perspective is valued. The diversity of personal experiences, cultures, and perspectives drives the innovation and creativity needed to meet the most pressing challenges at the cutting edge of scientific research and education. We aim to provide our students with degree-defining experiences and empower them to become impactful members of their community.

Our division encompasses the Departments of Astronomy & Astrophysics; Chemistry & Biochemistry; Earth & Planetary Sciences; Ecology & Evolutionary Biology; Mathematics; Microbiology & Environmental Toxicology; Molecular, Cell, & Developmental Biology; Ocean Sciences; Physics; as well as interdisciplinary programs in Coastal Science & Policy, Environmental Science, Global & Community Health, Materials Science & Engineering, Science Communication, and Science Education. We also host world-renowned research centers, including UCSC’s Natural Reserve System, the Santa Cruz Institute for Particle Physics, and the Institute of Marine Sciences, and have close relationships with UCSC's Genomics Institute, the University of California Observatories, and Lick Observatory.

To explore our program and learn more about how we can support you on your academic journey, please visit our website.

Astronomy and Astrophysics

Astronomy Department Office
269 Interdisciplinary Sciences Building
(831) 459-3081
http://www.astro.ucsc.edu

PROGRAMS OFFERED

Astronomy and Astrophysics Ph.D. (p. 279)

Astrophysics Minor (p. 278)

OTHER PROGRAMS OF INTEREST

Physics (Astrophysics) B.S. (p. 477)

Astronomy and astrophysics has the universe as its domain. Galaxies, stars, planets, and an ever-increasing variety of phenomena observed from ground- and space-based observatories are among the objects of study. Areas of special interest at UCSC include cosmology, exoplanets, stars, and galaxies, high-energy astrophysics, active galaxies, supernovae and nucleosynthesis, black holes, interstellar medium, intergalactic medium, and orbital dynamics. Research areas include observations across a broad range of wavelengths, with a focus on the visible and infrared, the creation of new instruments and telescope technology including adaptive optics, and theory and simulation, using state-of-the-art computing resources. Astronomers use concepts from and contribute to the development of many other scientific disciplines, including optics, mechanics, relativity, atomic and nuclear physics, applied mathematics, chemistry, geology, and meteorology. The interdisciplinary nature of astronomy, including its historical and philosophical elements, makes its study valuable to those planning careers in a variety of fields.

The Department of Astronomy and Astrophysics offers an undergraduate curriculum focused on a diverse set of general education classes, intended for the broad undergraduate community. The department also offers an astrophysics minor as well as additional upper-division classes focusing on computational methods and in astrophysics.

The graduate program is intended for those with a deep interest in the subject. Students are trained in the latest techniques in computation, data analysis, and instrumentation, which have wide utility in academia and industry. The interests of the faculty embrace a wide range of theoretical, observational, and instrumentation aspects of astronomy. Current research and course offerings include exoplanet detection and atmospheric spectroscopy, stellar spectroscopy, time-domain astrophysics, the interstellar medium, galactic structure and evolution, cosmology, the origin of the elements, optical and infrared astronomy, high-energy astrophysics, and advanced astronomical instrumentation including adaptive optics.

Graduate students have access to state-of-the-art instrument development and data reduction technology and an on-campus supercomputer dedicated to astrophysical computation. Graduate students may conduct supervised research using selected telescopic facilities of the Lick Observatory on Mount Hamilton, 55 miles from Santa Cruz. The 10-meter

Keck Telescope in Hawaii, the world's largest, is administered from the UCSC campus and is used for frontier research by UC astronomers.

UNDERGRADUATE PROGRAM

Courses for non-majors

Instruction in astronomy for undergraduates at UC Santa Cruz is designed to meet the needs of several groups of students.

ASTR 1, ASTR 2, ASTR 3, ASTR 4, ASTR 5, ASTR 6, ASTR 7, and ASTR 8 provide a general survey of the universe as now understood from historical and modern observations, and are offered for those not specializing in a scientific discipline. ASTR 1 is a non-mathematical introduction to the universe. ASTR 1 and ASTR 6 on exploring our solar system in the space age, satisfy the scientific inquiry (SI) general education (GE) requirement. ASTR 2 through ASTR 5 and ASTR 7 provide an introduction, with the use of basic mathematics, to a diverse array of modern astronomy, covering planets, stars, the formation of the universe, and black holes, and satisfy the mathematical and formal reasons (MF) general education requirement. ASTR 8 explores the universe with astronomical data and satisfies the statistical reasoning (SR) GE.

Courses for majors in physics (astrophysics) and those with suitable background in calculus and physics.

ASTR 21 is an introductory class, with a higher math level than ASTR 1-8, with a focus on material for first-year astrophysics majors. ASTR 111, 112, 113, 117, 118 cover order-of-magnitude astrophysics (111), stars (112), cosmology (113), high-energy astrophysics (117), and planetary systems (118) at a upper-division level. The advanced undergraduate lab (ASTR 136) complements these other classes. These 100-level courses are predominantly taken by students in physics, Earth sciences, chemistry, computer science, and engineering.

ASTROPHYSICS MINOR

For undergraduate students having a particular interest in the subject, a minor in astronomy and astrophysics is offered. Most students who minor in astronomy and astrophysics are majors in another science, though majors in other fields are also possible.

Course Requirements

The following is required for the astrophysics minor. Some courses may be satisfied via exam credit. Courses may be taken for a letter grade or Pass/No Pass.

Lower-Division Courses

Calculus:

Choose one of the following options:

	Either these courses	
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
	or these courses	
MATH 20A	Honors Calculus	5
MATH 20B	Honors Calculus	5

Advanced Calculus:

MATH 23A	Vector Calculus	5

Physics:

Choose one of the following options:

	Either these courses	
PHYS 5A	Introduction to Physics I	5
PHYS 5B	Introduction to Physics II	5
PHYS 5M	Introduction to Physics II Laboratory	1
PHYS 5C	Introduction to Physics III	5
PHYS 5N	Introduction to Physics Laboratory III	1
PHYS 5D	Introduction to Physics IV	5
	or these courses	
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics I Laboratory	1
PHYS 6B	Introductory Physics II	5
PHYS 6M	Introductory Physics II Laboratory	1
PHYS 6C	Introductory Physics III	5
PHYS 6N	Introductory Physics III Laboratory	1
PHYS 5D	Introduction to Physics IV	5

PHYS 15A can substitute for PHYS 5A, and PHYS 15C for PHYS 5C.

Upper-Division Courses

Modern Physics:

PHYS 102	Modern Physics	5

Four of the upper-division astronomy electives chosen from the following:

ASTR 111	Order-of-Magnitude Astrophysics	5
ASTR 112	Physics of Stars	5
ASTR 113	Introduction to Cosmology	5
ASTR 117	High Energy Astrophysics	5
ASTR 118	Physics of Planetary Systems	5
ASTR 119	Introduction to Scientific Computing	5
PHYS 129	Particle Physics and Astrophysics	5
PHYS 133	Intermediate Laboratory	5
ASTR 136	Advanced Astronomy Laboratory	5
PHYS 171	General Relativity, Black Holes, and Cosmology	5
EART 160	Planetary Science	5

EART 162	Planetary Interiors	5
EART 163	Planetary Surfaces	5
EART 164	Planetary Atmospheres	5
AM 107	Introduction to Fluid Dynamics	5

ASTRONOMY AND ASTROPHYSICS, PH.D.

Introduction

The Astronomy and astrophysics graduate program is intended for those with a deep interest in the subject. Students are trained in the latest techniques in computation, data analysis, and instrumentation, which have wide utility in academia and in industry. The interests of the faculty encompass a wide range of theoretical, observational, and instrumentation aspects of astronomy. Current research and course offerings include cosmology, galaxies, stars, transient astronomy, exoplanets, astrobiology, and instrumentation/adaptive optics.

Graduate students have access to state-of-the-art instrument labs and an on-campus supercomputer dedicated to astrophysical computation. Graduate students may conduct supervised research at Lick Observatory on Mount Hamilton, 55 miles from Santa Cruz, and the Keck Telescope in Hawaii.

Advancement to Candidacy

Course Requirements

Preparation for Graduate Work in Astrophysics

The UC Santa Cruz graduate program in astronomy and astrophysics is predominantly designed for Ph.D. students seeking a professional career in research and teaching, but with flexibility for students to prepare for careers outside of academia. In view of the thorough preparation in mathematics and physics required for graduate study, most entering astronomy graduate students major in physics or astrophysics as undergraduates.

The suggested minimum requirements for admission to graduate standing at UC Santa Cruz include the following undergraduate courses:

Basic physics.

Mechanics, wave motion, sound, light, electricity and magnetism, thermodynamics, atomic physics, and quantum mechanics.

PHYS 5A	Introduction to Physics I	5
PHYS 5B	Introduction to Physics II	5
PHYS 5C	Introduction to Physics III	5
PHYS 5D	Introduction to Physics IV	5

Basic mathematics.

Calculus

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 23A	Vector Calculus	5
MATH 23B	Vector Calculus	5

or equivalent.

And Statistics

STAT 5	Statistics	5

Intermediate-level physics.

PHYS 105	Mechanics	5
PHYS 110A	Electricity, Magnetism, and Optics	5
PHYS 110B	Electricity, Magnetism, and Optics	5
PHYS 116A	Mathematical Methods in Physics	5
PHYS 116D	Mathematical Methods in Physics	5
PHYS 116C	Mathematical Methods in Physics	5
PHYS 129	Particle Physics and Astrophysics	5
PHYS 139A	Quantum Mechanics I	5
PHYS 139B	Quantum Mechanics II	5

Intermediate-level mathematics.

MATH 21	Linear Algebra	5
MATH 103A	Complex Analysis	5
MATH 106	Systems of Ordinary Differential Equations	5
MATH 107	Partial Differential Equations	5

Graduate Program Requirements

The graduate curriculum includes six required core courses, which are listed below. Students must pass all six required courses by maintaining a grade of B or higher in five of the required courses and receiving a grade of S (satisfactory) in ASTR 205. ASTR 205 should be taken Satisfactory/Unsatisfactory. All other core classes should be taken ABC/No Pass. Students will take five of these classes in their first year and one class (either ASTR 220A or ASTR 233) in their second year.

1.1 Core Curriculum (6 courses)

ASTR 202	Astrophysics I	5
ASTR 204	Astrophysics II	5
ASTR 205	Introduction to Astronomical Research and Teaching	5
ASTR 220A	Stars and Planets I	5
ASTR 233	Galaxies and Cosmology I	5
ASTR 257	Observational Astronomy	5

1.2 Elective Courses (choose 2 over first 2 years)

Students must pass two elective classes from the following list of six courses. These classes are graded Satisfactory/Unsatisfactory. Subject to instructor availability, the Astronomy and Astrophysics Department expects to offer

each of these classes every two years. Students should complete this requirement by the end of their second year.

ASTR 222	Stars and Planets II	5
ASTR 230	Diffuse Matter in Space	5
ASTR 234	Statistical Techniques in Astronomy	5
ASTR 240A	Galaxies and Cosmology II	5
ASTR 260	Instrumentation for Astronomy	5
ASTR 289	Adaptive Optics and Its Application	5

1.3 Additional Electives (3 courses)

Students must pass three additional elective classes. There are three ways to fulfill this requirement, which are described below. Students have the option of taking these classes ABC/No Pass or Satisfactory/Unsatisfactory, subject to the requirements of the individual courses. Students should complete this requirement by the end of their second year.

1) Students may take additional classes from the list in Section 1.2.

2) Students may take ASTR 215, Research Practicum for Astrophysics, which is a project-based class that introduces students to topics substantially outside of their primary research area.

3) Students may take courses in other departments that are relevant to an astronomy and astrophysics Ph.D., most often in physics, Earth and planetary sciences, applied mathematics, and statistics. This coursework must cover topics that are not covered in the astronomy and astrophysics graduate curriculum or its assumed pre-requisites. The courses must count toward the Ph.D. requirements of the offering departments. The graduate program director approves these courses on a case-by-case basis.

Additional Research Requirements

1) Students must meet at least quarterly (and ideally weekly) with an assigned adviser.

2) By the end of their second academic year, students must (a) complete a research project advised by a UC Santa Cruz faculty member, either in astronomy and astrophysics, or approved by the department, (b) give a department talk on this work, and (c) submit a lead-author paper on this work to a refereed journal or equivalent.

3) Pursue independent research, under the mentorship of their adviser, leading to a doctoral dissertation.

Foreign Language Requirements

Teaching Requirements

1) Serve as a teaching assistant two times, and at least once during the first seven quarters.

2) Write a teaching statement, similar to the type that would be expected of someone applying for a university faculty job. The teaching statement will be evaluated by a member of the astronomy and astrophysics faculty. This requirement may be completed at any time during the Ph.D.

Pre-Qualifying Requirements

Qualifying Examination

By the end of the third year, students must complete a qualifying examination that presents and defends a proposed thesis topic.

Post-Qualifying Requirements

Degree Timeline

The department has established six years as the normative time to degree. Normative time is the elapsed calendar time, in years, that, under normal circumstances and excluding department-approved leaves, will be needed to complete all requirements for the Ph.D.

Exceptions for extension beyond six years will be granted only for exceptional extenuating circumstances and will be decided upon by the department chair in consultation with the faculty.

Dissertation

Dissertation

After passing the board review based on the requirements and the qualifying examination, students pursue independent research leading to the doctoral dissertation.

Dissertation Defense

Upon completion of the Ph.D. dissertation, students must pass an oral dissertation defense. A completed draft of the thesis must be submitted to the dissertation committee at least two weeks before the date of the defense, and the defense itself must occur at least two weeks before the campus deadline for thesis submissions in that quarter. Exceptions to this policy will be granted only under exceptional circumstances and must be approved by the department chair, graduate program director, and the student's thesis committee.

Academic Progress

Applying for Graduation

[Optional Catchall]

Chemistry and Biochemistry

230 Physical Sciences Building
(831) 459-4125
https://science.ucsc.edu/department/chemistry/

PROGRAMS OFFERED

Chemistry B.A. (p. 282)

Chemistry B.S. (p. 289)

Chemistry B.S. with Biochemistry Concentration (p. 297)

Biochemistry and Molecular Biology B.S. (p. 300)

Chemistry Minor (p. 307)

Chemistry M.S. (p. 309)

Chemistry Ph.D. (p. 310)

Chemistry is central to modern science. Ultimately, most phenomena in biology, medicine, materials, engineering, geology, and the environmental sciences can be described in terms of the chemical and physical behavior of atoms and molecules. Because of the wide appeal and utility of chemistry, UC Santa Cruz offers comprehensive lower-division courses in introductory and organic chemistry, differing in emphasis and style, to meet diverse needs. Students should also note the numerous upper-division course offerings and select those most suitable to their academic interests. The curriculum in chemistry exposes the student to the principal areas of modern chemistry, including organic, inorganic, physical, materials, analytical, and biochemistry. The curriculum is designed to meet the needs of students who plan to graduate with a bachelor of arts (B.A.) or a bachelor of science (B.S.) degree, as well as those who wish to pursue an advanced degree. UCSC Chemistry B.A. or B.S. graduates are well prepared to pursue a career in chemistry or a related field. The B.S. degree can be completed with a concentration in biochemistry.

Research in chemistry at UCSC is closely interwoven with graduate and undergraduate education. The chemistry and biochemistry research program is highly active at the graduate level, and faculty also encourage undergraduates to become involved in research. Research can lead to academic credit in Senior Thesis (CHEM 195A, CHEM 195B, CHEM 195C) or Senior Research (CHEM 199 or CHEM 199F). The department offers a course-based undergraduate research experience in biochemistry (CHEM 160J, CHEM 160K, CHEM 160L) and chemical biology (CHEM 161J, CHEM 161K, CHEM 161L). There are also opportunities for interdisciplinary research combining chemistry with a wide range of sciences, for example, biology, physics, geology, ocean sciences, microbiology, and environmental toxicology. At UCSC, it is not uncommon for students to become co-authors of original work published in research journals.

Chemistry and biochemistry faculty, research and administrative staff, and approximately 100 graduate students and 15-20 postdoctoral fellows are housed in the Physical Sciences Building near the Science and Engineering Library. The department maintains and constantly expands cutting-edge facilities (such as the Chemical Screening Center, Macromolecular Structure Function Core Facility, Cryo-Electron Microscopy, Mass Spectrometry, NMR Facility, and X-Ray Facility) that enable scientists to carry out their research

The Science and Engineering Library has an excellent collection of current journals and reference works, as well as access to earlier volumes of all the major journals. Many of these are subscribed to online. Additional source material can be readily and rapidly obtained on interlibrary loan.

UNDERGRADUATE PROGRAM

A degree in chemistry or biochemistry and molecular biology opens the door to a wide variety of academic careers. Some UC Santa Cruz graduates are working as industry researchers in electronic materials, biotechnology, medicinal chemistry, pharmacy, or laser technology. Others have entered government service as research chemists in the Food and Drug Administration, the Environmental Protection Agency, DOD, DOE, or law enforcement crime laboratories. Fields such as patent law, commercial development, and scientific writing are open to graduates. Many chemistry majors go on to university graduate programs across the nation to prepare for careers in academia, government, or industry. The degrees in the Department of Chemistry and Biochemistry at UC Santa Cruz also provide a strong disciplinary background in preparation for a career in the important and much-needed area of science teaching in high school. A major in chemistry is also an excellent beginning for one of the many opportunities in the health sciences and can serve as a preparative degree for medical, dental, and pharmacy school.

The UCSC Department of Chemistry and Biochemistry offers both Chemistry B.S. (with or without biochemistry concentration) and B.A. degree programs. For either degree program, the courses stress the fundamentals of chemistry and allow students to pursue independent research. The B.S. degree provides complete coursework in all subdisciplines of chemistry and can meet the requirements for accreditation by the American Chemical Society. The B.A. degree has fewer specific course requirements and is suited for students who desire more flexibility to explore other academic disciplines. Either degree is suitable for graduate study, getting an industry job following graduation, or preparation for a career or further study in health sciences.

A minor in chemistry is also offered for those who wish to have a strong complementary program in chemistry while majoring in another area of study.

A B.S. in Biochemistry and Molecular Biology (BMB) is excellent preparation for medical, dental, and graduate school, as well as careers in biotechnology; pharmaceutical design, development, and sales; food and drug design; and environmental research and protection. The BMB B.S. is interdisciplinary and involves coursework in the Department of Molecular, Cell, and Developmental Biology.

GRADUATE PROGRAM

The Department of Chemistry and Biochemistry offers three graduate degrees: the Doctor of Philosophy (Ph.D.), a thesis Master of Science (M.S.), and a coursework M.S. The Ph.D. and thesis M.S. programs are designed to help students develop into independent scholars while pursuing the excitement of scientific research in a personal, supportive environment. Both the Ph.D. and the research M.S. programs prepare students for careers in academia, industry, government laboratories, and other settings requiring an

advanced education in chemistry and related disciplines. The coursework M.S. does not require research and is suited to future teachers and others wishing to update or broaden their chemical expertise. Approximately 100 graduate students are currently enrolled in the graduate program.

The Department of Chemistry and Biochemistry invites well-known researchers from outside UC Santa Cruz to share and discuss their current research. Visiting speakers from other universities and government or industrial research labs expose students to advances at the frontiers of chemical research, offering the opportunity for personal contact with leading scientists. All Ph.D. and thesis M.S students are required to enroll in the CHEM 291, Research Seminar until they have advanced to candidacy.

Teaching assistantships provide both financial support and the opportunity to put into practice the required pedagogical training offered in CHEM 296 (presentation techniques, discussion strategies, laboratory teaching skills, laboratory safety procedures, and time management). Doctoral students may also be supported as graduate-student researchers.

CHEMISTRY B.A.

Information and Policies

The requirements for the bachelor of arts (B.A.) in chemistry have been kept to a minimum so that students may tailor their program to their own purposes For example, taking fewer prescribed courses for the major enables students to pursue a double major, to pursue more independent research, to complete major requirements late in their college career, to take more physical and biological science courses outside of chemistry to enter an interdisciplinary area such as health sciences or education, or to take more courses in other arts and sciences disciplines). While more flexible, the degree is still suitable for students who intend to pursue graduate studies or careers in chemistry.

Academic Advising for the Program

The chemistry and biochemistry advisors provide counsel to undergraduate majors. Students are encouraged to seek out advising and assistance in planning their academic careers to ensure completion of their major in a timely manner. For advising assistance, please contact chemistry and biochemistry advising at chemistryadvising@ucsc.edu or visit the department's advising webpage. All students interested in the chemistry B.A. should read this catalog to learn more details about the major.

Program Learning Outcomes

Learning outcomes summarize the most important knowledge, skills, abilities, and attitudes that students are expected to develop over the course of their studies.

Students graduating with a B.A. in chemistry should be able to:

- demonstrate mastery of a broad set of chemical knowledge concerning the fundamentals in the basic areas of the discipline (organic, inorganic, and physical chemistry).
- solve area-specific problems by identifying the essential parts of a problem, formulating a strategy for solving the problem, applying appropriate techniques to arrive at a solution, testing the correctness of the solution, and interpreting their results.
- use modern library search tools (such as SciFinder, PubMed, or Web of Science) to locate and retrieve scientific information about a topic, chemical, chemical technique, or an issue relating to chemistry.
- know and follow the proper procedures and regulations for safe handling and use of chemicals.
- understand the objective of their chemical experiments, properly carry out the experiments, and appropriately record and analyze the results.
- use computers in data acquisition and processing, and use available software as a tool in data analysis.
- use standard laboratory equipment, modern instrumentation, and classical techniques to carry out experiments.
- communicate the concepts and results of their laboratory experiments through effective writing and/or oral communication using the discipline standards for reporting and citation.
- collaborate effectively as part of a team to solve problems, debate different points of view, and interact productively with a diverse group of team members.

Getting Started in the Major: Frosh

This major is highly course intensive and sequential; students who intend to pursue this major must begin taking classes for the major in their first quarter at UC Santa Cruz.

Prospective chemistry majors should have a solid foundation in high school mathematics; familiarity with algebra, logarithms, trigonometry, and analytic geometry is particularly required. Incoming students in the chemistry major should complete the Math Placement process as early as possible, so that the placement is posted before enrollment begins. For more information, please review the Math Placement website.

Students taking chemistry at the University of California, Santa Cruz, have a number of options for satisfying their general chemistry requirements:

1. Begin with CHEM 3A, CHEM 3B, CHEM 3C with associated labs, CHEM 3BL and CHEM 3CL.
2. Students with an exceptionally strong background in high school chemistry may begin with the advanced general chemistry sequence (if offered): CHEM 4A and CHEM 4B with associated labs CHEM 4AL and CHEM 4BL. Enrollment in the CHEM 4 series requires

qualification; see the "Qualifying for the Advanced General Chemistry series" section below.

3. Students with transfer exam credit will take the next course in the general chemistry sequence.

Any of the above pathways fully satisfies the general chemistry prerequisites of any major declaration or required/elective classes for programs in the Physical and Biological Sciences (PBSci) Division.

Qualifying for the Advanced General Chemistry series

Note: CHEM 4 is not offered in the 2025-26 academic year.

CHEM 4 is an accelerated two-quarter series intended for students who enter UC Santa Cruz with excellent preparation in high school chemistry. Students in this series will learn fundamental concepts in chemistry at a faster pace than our traditional general chemistry series (CHEM 3), with emphasis on quantum theory, molecular structure, and chemical driving forces. Students with an exceptionally strong background in high school chemistry are especially encouraged to begin with CHEM 4A (Advanced General Chemistry: Molecular Structure and Reactivity) instead of CHEM 3A.

All students who want to enroll in the accelerated series must complete an online learning module and assessment administered by the Chemistry and Biochemistry Department, regardless of high school AP scores. Once the online learning module and assessment is started (by completing the initial knowledge check), students will have six weeks to complete the online learning module and assessment and, once the module and assessment are completed, students may request enrollment in CHEM 4A. Students who complete the online learning module and assessment and submit their proof of completion by the established deadline are eligible to remain enrolled in CHEM 4A. Students can access the full CHEM 4A qualification instructions and the online learning module by joining a canvas class.

If you have questions about this process, please contact chemistry advising at chemistryadvising@ucsc.edu.

Transfer Information and Policy

General information about transferring to UC Santa Cruz can be found on the transfer preparation advising website. Students planning to transfer to UC Santa Cruz from a California community college should reference assist.org to determine which courses are equivalent to required and recommended pre-transfer courses.

Transfer Admission Screening Policy

The following courses or their equivalents are required prior to transfer/entry to UCSC. Courses must be completed with a grade of C or better with a cumulative GPA of 2.50 in these courses. Completion of these courses also satisfies all major qualification requirements. For students with exam credit for any of the courses, a grade of A will be used in the GPA calculation.

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3C	General Chemistry	3
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5
	AND	
MATH 22	Introduction to Calculus of Several Variables	5

Plus one of the following options:

	Either these courses	
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
	or these courses	
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

Recommended pre-transfer courses

Completion of the following courses is highly recommended before the transfer to ensure timely graduation. Students who only complete the minimum required transfer coursework for the major prior to transfer will likely need more than two years to complete the chemistry B.A.:

CHEM 8A	Organic Chemistry	5
CHEM 8B	Organic Chemistry	5
CHEM 8L	Organic Chemistry Laboratory	2
CHEM 8M	Organic Chemistry Laboratory	2
PHYS 6A	Introductory Physics I	5
PHYS 6B	Introductory Physics II	5
PHYS 6L	Introductory Physics I Laboratory	1
PHYS 6M	Introductory Physics II Laboratory	1

Getting Started in the Major: Transfer Students

Transfer students are strongly encouraged to meet with the chemistry academic advisor in their first quarter. For assistance with advising, please email chemistryadvising@ucsc.edu.

Transfer students must already be qualified at time of entry to UCSC to be accepted into the chemistry major. Any student who fails to meet these requirements may file an appeal for admission to the major, but admission is not guaranteed.

Students who transfer as juniors can declare their major any time after coming to UC Santa Cruz but are required to be declared in a major by the declaration deadline in their second term at UC Santa Cruz.

Transfer students who are proposed in a different major (other than chemistry) require permission from the department to change into the major. Admission to the major is not guaranteed.

Major Qualification Policy and Declaration Process

Major Qualification

Students must complete each of the following qualification courses, or their equivalents, by their campus-established declaration deadline with a grade of C or better and with a cumulative grade point average (GPA) of 2.50 or greater:

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3C	General Chemistry	3
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5

Plus one of the following options:

	Either these courses	
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
	or these courses	
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

And one of the following options:

	Either this course	
MATH 22	Introduction to Calculus of Several Variables	5
	OR	
MATH 23A	Vector Calculus	5
	OR	
AM 30	Multivariate Calculus for Engineers	5

Determining qualification for the major

When pursuing major qualification, students should keep the following details in mind:

- All courses must be taken for a letter grade. See the Letter Grade Policy below.
- A grad of A will be used in the GPA calculations for students with exam credit for any of the above courses.
- UC Santa Cruz native students with two or more grades of NP, C-, D+, D, D-, or F in courses required to qualify for the major are not eligible to declare.

Transfer students should also consult the Transfer Information and Policy section above.

How to Declare a Major

Students may declare a major as early as they would like if they have decided which major to pursue and have satisfied prerequisites or qualification requirements for the major.

Per the UC Santa Cruz major declaration policy, students who enter UCSC as frosh are required to be formally declared in a major by the campus deadline in their 6th quarter and before enrolling in their third year (or equivalent). Upper-division junior transfer students are required to be declared in a major by the deadline in their second term at UCSC.

Students should petition to declare a chemistry major once they have met all qualification criteria and have an official, signed, department-approved academic plan on file.

The Petition for Major/Minor declaration form can be accessed by going to MyUCSC and navigating to the Student Homepage and selecting the Undergraduate Student eForms tile > Petition for Major/Minor.

Students petitioning when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh, second quarter for junior transfer students), will either be approved, denied, or provided with conditions (e.g., completion of final qualification courses with certain grades), but will not be declared until all requirements have been met and satisfactory grades have been posted.

Each major/minor advising office has a process for declaring. For assistance with declaring the chemistry major, please contact chemistry and biochemistry advising at chemistryadvising@ucsc.edu.

Appeal Process

Students may appeal to the major either prior to or after submitting a petition to declare and being denied (in the latter case, appeals must be submitted within 15 days from the date the denial notification was sent). Within 15 days of receipt of the appeal being submitted, the department will notify the student and their affiliated college of the decision.

To appeal to declare a chemistry major, complete the Chemistry Major Appeal form via DocuSign.

To complete the major appeal form, you will need:

- An official Academic Plan (signed by the chemistry major advisor)
- Unofficial transcripts
- An appeal letter

Additional instructions can be found in the form.

Note: The information you share in your appeal or with your advisors will be kept confidential and shared only with campus officials as required to serve you in an advising capacity or process your appeal. However, in limited circumstances, including those related to potential harm to yourself or others, sexual assault, and abuse, we may be required by law to report incidents you disclose to other need-

to-know offices on campus such as the Title IX Office and/or University of California Police Department. If you are in need of support for any issues, please see the list of confidential and/or support resources.

Letter Grade Policy

All courses used to satisfy degree requirements of the major must be taken for a letter grade and earn a grade of C or higher.

Course Substitution Policy

At least half of the upper-division courses (CHEM 100–CHEM 199) required for any chemistry major must be taken through the chemistry program at UCSC, not as transfer credits from another department or institution. Students are advised to contact the Chemistry and Biochemistry Department undergraduate advising office before enrolling in any chemistry or biochemistry upper-division courses at other institutions to verify articulation.

Independent Study Policy

Students may take up to 5 credits of individual studies coursework per quarter.

There are three different independent studies options in Chemistry and Biochemistry Department: CHEM 199 and CHEM 195. CHEM 199 Independent Research is for any student working on an independent research project under the guidance of UC Santa Cruz faculty. Independent research can be taken for 5 credits (CHEM 199) or 2 credits (CHEM 199F). CHEM 195 Thesis Research is for students performing independent research under the guidance of UC Santa Cruz faculty AND who will complete a final thesis. CHEM 186L is an additional option for any student working on an independent research project under the guidance of a UC Santa Cruz faculty. CHEM 186L can be used to satisfy the Senior Exit Lab and DC requirements, can not be taken concurrently with CHEM 199 or CHEM 195, and can only be taken once.

Throughout their undergraduate career at UC Santa Cruz, students may take up to 15 credits total of CHEM 199 (either CHEM 199 or CHEM 199F) and CHEM 186L. For example, a student could take three quarters of CHEM 199, up to seven quarters of CHEM 199F, or some combination of CHEM 199, CHEM 199F,and CHEM 186L (so long as the total is not more than 15 credits).

Throughout their undergraduate career at UC Santa Cruz, students may take up to 15 credits total of CHEM 195. CHEM 195 credits can be taken in addition to up to 15 credits of CHEM 199/CHEM 199F/CHEM 186L. Note that there are three different CHEM 195 courses (CHEM 195A, CHEM 195B, and CHEM 195C) that should be taken in order. The expectation for CHEM 195 is that satisfactory completion of the course is contingent on the submission of a final thesis that meets the faculty sponsor's approval. If there is doubt that a thesis could be completed, CHEM 199 Independent Research is a more appropriate course.

Double Majors and Major/Minor Combinations Policy

A student cannot double major/minor in chemistry and any other major/minor offered by the departments of chemistry and biochemistry.

To declare a double major, a student must obtain an academic plan showing that they are able to complete both degrees within the maximum number of quarters of enrollment available at UC Santa Cruz. Therefore, the steps for a student to pursue chemistry as a second major are as follows:

1. The student must have an up-to-date and accurate major academic plan for their initial major.
2. The student must make an appointment with the chemistry major advisor and send the link to their initial major academic plan to chemistryadvising@ucsc.edu.
3. The chemistry major advisor will review the major academic plan and will add the chemistry major courses to the academic plan, as necessary. In doing so, the advisor will determine if it is a viable double major considering double unit counting, enrollment limitations, and time-to-degree guidelines.
4. The chemistry major advisor will discuss the double major plan with the student during their scheduled appointment. If the plan is viable, it will be approved and signed by both the student and the chemistry major advisor.
5. Once the student has an approved and viable double major plan and qualifies for the major, the student must petition to declare chemistry as a second major using the Petition for Major/Minor form in MyUCSC.

Honors

Department honors in the majors are awarded to graduating students whose academic performance demonstrates excellence at a GPA of 3.5 or above in required major coursework. Department highest honors are awarded to those students whose performance demonstrates the highest level of excellence and results in a GPA of 3.8 or above in required major coursework.

Materials Fee

Chemistry students should be aware of the materials fee required for some courses. The fee is billed to the student's account for specific laboratory materials purchased by the Chemistry and Biochemistry Department through the university. Students may incur additional expenses for individual supplies.

Program for Students of the Health Sciences

Students intending to enter medical, dental, or another health science professional school can satisfy entrance requirements with a major program in chemistry supplemented with further courses, especially in biology, as specified by the admissions requirements of the school where they intend to apply.

Students are strongly encouraged to review the Pre-Health section of the Career Success website to review preparation recommendations, prerequisite and other information about professional health education programs (medical school, dental school, etc.), and more important information to assist in preparation for a career in health sciences.

Students are urged to contact Career Success for assistance with the application process.

Requirements and Planners

Course Requirements

The following is required to complete the Chemistry B.A. Some courses may be satisfied via exam credit.

Lower-Division Courses

General Chemistry:

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3C	General Chemistry	3
CHEM 3BL	General Chemistry Lab	2
CHEM 3CL	General Chemistry Lab	2
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4AL	Advanced General Chemistry Lab	2
CHEM 4BL	Advanced General Chemistry Lab	2

Calculus:

Choose one of the following options:

	Either these courses	
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
	or these courses	
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

A student may combine the MATH 11 series with the MATH 19 series to complete this portion of the major requirement(s) (for example, a student can take and complete MATH 19A and then take and complete MATH 11B), but must follow the Mathematics Department's Calculus Series Transition Policy.

Multivariable Calculus:

	Either this course	
MATH 22	Introduction to Calculus of Several Variables	5
	or these courses	
MATH 23A	Vector Calculus	5
MATH 23B	Vector Calculus	5
	or this course	
AM 30	Multivariate Calculus for Engineers	5

Physics:

Choose one of the following options:

	Either these courses	
PHYS 5A	Introduction to Physics I	5
PHYS 5B	Introduction to Physics II	5
PHYS 5C	Introduction to Physics III	5
PHYS 5M	Introduction to Physics II Laboratory	1
PHYS 5N	Introduction to Physics Laboratory III	1
	or these courses	
PHYS 6A	Introductory Physics I	5
PHYS 6B	Introductory Physics II	5
PHYS 6C	Introductory Physics III	5
PHYS 6L	Introductory Physics I Laboratory	1
PHYS 6M	Introductory Physics II Laboratory	1
PHYS 6N	Introductory Physics III Laboratory	1

A student may combine the PHYS 5 series with the PHYS 6 series to complete this portion of the major requirement(s), but must follow the Physics Transition policies.

Organic Chemistry:

CHEM 8A	Organic Chemistry	5
CHEM 8B	Organic Chemistry	5
CHEM 8L	Organic Chemistry Laboratory	2
CHEM 8M	Organic Chemistry Laboratory	2

By permission and invitation of the instructor, students may substitute CHEM 8M with CHEM 8N, Honors Organic Chemistry Lab. This course is designed to introduce the exceptional student to many of the techniques associated with organic chemistry while taking part in an active organic chemistry research experience.

Upper-Division Courses

Intermediate Organic Chemistry:

CHEM 110	Intermediate Organic Chemistry with Emphasis on Synthesis and Analytical Methods	5
CHEM 110L	Intermediate Organic Chemistry Laboratory	2

By permission and invitation of the instructor, students may substitute CHEM 110L with CHEM 110N, Honors Organic Chemistry Lab. This course is designed to introduce the exceptional student to many of the techniques associated with

organic chemistry while taking part in an active organic chemistry research experience.

Inorganic Chemistry:

CHEM 151A	Chemistry of Metals	5
CHEM 151L	Inorganic Chemistry Laboratory	2

Satisfies part of the Disciplinary Communication (DC) and Comprehensive requirements.

Physical Chemistry:

CHEM 163A	Quantum Mechanics and Basic Spectroscopy	5
CHEM 163B	Chemical Thermodynamics	5
CHEM 164	Physical Chemistry Laboratory	5

Students may substitute CHEM 163A and CHEM 163B with BIOC 163A and BIOC 163B, respectively. A student may combine the CHEM 163 series with the BIOC 163 series to complete this portion of the major requirement(s). For example, a student can take and complete CHEM 163A and then take and complete BIOC 163B.

One of the following laboratory courses:

CHEM 146A	Advanced Laboratory in Organic Chemistry	3
CHEM 146B	Advanced Laboratory in Inorganic Chemistry	3
CHEM 146C	Advanced Laboratory in Physical Chemistry	5
CHEM 160L	Biochemistry Research Laboratory	5
CHEM 161L	Chemical Biology Research Laboratory	5
CHEM 186L	Research Communication and Practice	5

Note: CHEM 160L requires completion of CHEM 160J and CHEM 160K as prerequisites, and CHEM 161L requires completion of CHEM 161J and CHEM 161K as prerequisites.

Students currently conducting senior thesis research are strongly encouraged to choose an advanced laboratory in the CHEM 146 series that is outside their research area.

Electives

At least two from the following:

BIOC 100A	Biochemistry and Molecular Biology	5
CHEM 103	Biochemistry	5
CHEM 124	Bioanalytical Chemistry	4
CHEM 143	Organic Chemical Structure and Reactions	5
CHEM 144	Catalysis In Organic Synthesis Using Metals and Metalloids Based Reagents	5
CHEM 151B	Chemistry of the Main Group Elements	5
CHEM 156C	Materials Chemistry	5
CHEM 163C	Statistical Thermodynamics and Kinetics	5
CHEM 169	Chemistry and Biology of Drug Design and Discovery	5
CHEM 171	Chemical Biology	5
METX 101	Sources and Fates of Pollutants	5
METX 102	Cell and Molecular Toxicology	5
OCEA 120	Aquatic Chemistry: Principles and Applications	5
OCEA 121	Aqueous Geochemistry	5
PHYS 156	Applications of Quantum Materials	5
PHYS 180	Biophysics	5

Students cannot receive elective credit toward the major for both BIOC 100A and CHEM 103.

Students may also satisfy the elective requirement by completing a chemistry graduate course with the permission of the instructor and department. Please consult with chemistry and biochemistry major advising prior to enrolling.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) Requirement. The DC Requirement for the bachelor of arts degree in chemistry is satisfied by completing the following. This also satisfies the comprehensive requirement:

CHEM 151L	Inorganic Chemistry Laboratory	2

Plus one of the following courses:

CHEM 124	Bioanalytical Chemistry	4
CHEM 146A	Advanced Laboratory in Organic Chemistry	3
CHEM 146B	Advanced Laboratory in Inorganic Chemistry	3
CHEM 146C	Advanced Laboratory in Physical Chemistry	5
CHEM 160L	Biochemistry Research Laboratory	5
CHEM 161L	Chemical Biology Research Laboratory	5
CHEM 186L	Research Communication and Practice	5

Note: CHEM 160L requires completion of CHEM 160J and CHEM 160K as prerequisites, and CHEM 161L requires completion of CHEM 161J and CHEM 161K as prerequisites.

Comprehensive Requirement

The comprehensive requirement is a part of all UCSC degrees. For the chemistry B.A., this requirement can be satisfied by receiving a passing grade in the upper-division labs listed below. These courses provide modern, individualized training in the discipline thus serving as relevant capstone experiences.This also satisfies the Disciplinary Communication (DC) requirement.

CHEM 151L	Inorganic Chemistry Laboratory	2

Plus one of the following courses:

CHEM 124	Bioanalytical Chemistry	4
CHEM 146A	Advanced Laboratory in Organic Chemistry	3
CHEM 146B	Advanced Laboratory in Inorganic Chemistry	3
CHEM 146C	Advanced Laboratory in Physical Chemistry	5
CHEM 160L	Biochemistry Research Laboratory	5
CHEM 161L	Chemical Biology Research Laboratory	5
CHEM 186L	Research Communication and Practice	5

Note: CHEM 160L requires completion of CHEM 160J and CHEM 160K as prerequisites, and CHEM 161L requires CHEM 161J and CHEM 161K as prerequisites.

Planners

The sample academic plans below are for the chemistry B.A. major. They serve informational purposes and do not reflect all university, general education, and credit requirements. See the Undergraduate Graduation Requirements section of the catalog for more information.

This is the ideal academic plan for those pursuing a chemistry B.A. major. If needed, the plan can be arranged differently. Please meet with an academic advisor in the Chemistry and Biochemistry Department to review your individualized official academic plan.

	Fall	Winter	Spring	Summer
Entering				College 1A Summer Edge (optional)
1st (frosh)	MATH 11A or MATH 19A CHEM 3A or CHEM 4A	MATH 11B or MATH 19B CHEM 3B and CHEM 4AL	CHEM 3C and CHEM 3CL (not required if CHEM 4 series completed) CHEM 3BL or CHEM 4B and CHEM 4BL	
2nd (soph)	CHEM 8A CHEM 8L PHYS 6A PHYS 6L WRIT 2**	CHEM 8B CHEM 8M MATH 22	CHEM 110 CHEM 110L PHYS 6B PHYS 6M	
3rd (junior)	CHEM 163A PHYS 6C PHYS 6N	CHEM 163B CHEM 151A CHEM 151L	CHEM elective	
4th (senior)	CHEM elective or CHEM 146A*	CHEM 164	CHEM elective or CHEM 146B/CHEM 146C*	

	College Core	WRIT 1/WRIT 1E (if needed)	

* CHEM 146A is offered in fall quarter; CHEM 146B and CHEM 146C are offered in spring quarter. Only ONE advanced lab (CHEM 146A, CHEM 146B, or CHEM 146C) is required for degree completion. Alternatively, students can take the CHEM 160 or CHEM 161 series: CHEM 160J/CHEM 161J, CHEM 160K/CHEM 161K, and CHEM 160L/CHEM 161L, which are offered in the fall, winter, and spring, respectively.

** WRIT 2 should be taken in or before spring quarter of the second year. Questions about WRIT coursework or any other non-Chemistry major requirements should be directed to college advising.

Two of the required general education requirements will be fulfilled by the major requirements listed in the above planner (MF SI). In addition to the specific courses shown in these planners, a student will also need to complete courses satisfying the following general education requirements: Cross-Cultural Analysis, Ethnicity Race, Interpreting Arts Media, Statistical Reasoning, Textual Analysis Interpretation, Perspectives, and Practice.

Sample Transfer Two-Year Planner

This is a sample academic plan for students who have transferred in with both the required and highly recommended pre-transfer courses.

Note: Students who did not complete both the required and highly recommended courses prior to transfer will need to follow a different academic plan and may require additional time to degree.

Please meet with an advisor from the Chemistry and Biochemistry Department to create and review your individualized official academic plan.

	Fall	Winter	Spring	Summer
Entering				KRSG 1T Summer Edge (optional)
1st (junior)	CHEM 163A PHYS 6C PHYS 6N	CHEM 163B CHEM 151A CHEM 151L	CHEM 110 CHEM 110L	
2nd (senior)	CHEM elective 1 CHEM 146A*	CHEM 164	CHEM elective 2 CHEM 146B or CHEM 146C*	

* CHEM 146A is offered in fall quarter; CHEM 146B and CHEM 146C are offered in spring quarter. Only ONE advanced lab (CHEM 146A, 146B, or 146C) is required for degree completion. Alternatively, students can take the CHEM 160 series: CHEM 160J/CHEM 161J, CHEM 160K/CHEM 161K, and CHEM 160L/CHEM 161L, which are offered in the fall, winter, and spring, respectively.

CHEMISTRY B.S.

Information and Policies

Introduction

The bachelor of science major program is designed for students who intend to pursue a professional career in chemistry. It is rigorous and broadly covers all chemistry subdisciplines.

Academic Advising for the Program

The Chemistry and Biochemistry Department advisors provide counsel to undergraduate students pursuing departmental majors. Students are encouraged to seek out advising and assistance in planning their academic careers to ensure completion of their major in a timely manner. For advising assistance, please contact Chemistry and Biochemistry Department advisors at chemistryadvising@ucsc.edu or visit the chemistry advising webpage. All students interested in the chemistry B.S. should read this catalog to learn more details about the major.

Program Learning Outcomes

Learning outcomes summarize the most important knowledge, skills, abilities, and attitudes that students are expected to develop throughout their studies.

Students graduating with a B.S. in chemistry should be able to:

- demonstrate mastery of a broad set of chemical knowledge concerning the fundamentals in the basic areas of the discipline (organic, inorganic, analytical, physical, and biochemistry).
- solve area-specific problems by identifying the essential parts of a problem, formulating a strategy for solving the problem, applying appropriate techniques to arrive at a solution, testing the correctness of the solution, and interpreting their results.
- use modern library search tools (such as SciFinder, PubMed, or Web of Science) to locate and retrieve scientific information about a topic, chemical, chemical technique, or an issue relating to chemistry.
- know and follow the proper procedures and regulations for safe handling and use of chemicals.
- understand the objective of their chemical experiments, properly carry out the experiments, and appropriately record and analyze the results.

- use computers in data acquisition and processing, and use available software as a tool in data analysis.
- use standard laboratory equipment, modern instrumentation, and classical techniques to carry out experiments.
- communicate the concepts and results of their laboratory experiments through effective writing and/or oral communication using the discipline standards for reporting and citation.
- collaborate effectively as part of a team to solve problems, debate different points of view, and interact productively with a diverse group of team members.

Getting Started in the Major: Frosh

This major is highly course intensive and sequential; students who intend to pursue this major must begin taking classes for the major in their first quarter at UC Santa Cruz.

Prospective chemistry majors should have a solid foundation in high school mathematics; familiarity with algebra, logarithms, trigonometry, and analytic geometry is particularly required. Incoming students in the chemistry major should complete the Math Placement process as early as possible, so that the placement is posted before enrollment begins. For more information, please review the Math Placement website.

Students taking chemistry at the University of California, Santa Cruz, have a number of options for satisfying their general chemistry requirements:

1. Begin with CHEM 3A, CHEM 3B, CHEM 3C with associated labs, CHEM 3BL and CHEM 3CL.
2. Students with an exceptionally strong background in high school chemistry may begin the advanced general chemistry sequence (if offered): with CHEM 4A and CHEM 4B with associated labs, CHEM 4AL and CHEM 4BL Enrollment in the CHEM 4 series requires qualification – see the "Qualifying for the Advanced General Chemistry series" admission policy section below).
3. Students with transfer or exam credit will take the next course in the general chemistry sequence.

Any of the above pathways fully satisfies the general chemistry prerequisites of any major declaration or required/elective classes for programs in the Physical and Biological Sciences (PBSci Division).

Qualifying for the Advanced General Chemistry series

Note: *CHEM 4 is not offered in the 2025-26 academic year.*

CHEM 4 is an accelerated two-quarter series intended for students who enter UC Santa Cruz with excellent preparation in high school chemistry. Students in this series will learn fundamental concepts in chemistry at a faster pace than our traditional general chemistry series (CHEM 3), with emphasis on quantum theory, molecular structure, and chemical driving forces. Students with an exceptionally strong background in high school chemistry are especially encouraged to begin with CHEM 4A (Advanced General Chemistry: Molecular Structure and Reactivity) instead of CHEM 3A.

All students who want to enroll in the accelerated series must complete an online learning module and assessment administered by the Chemistry and Biochemistry Department. Once the online learning module and assessment is started (by completing the initial knowledge check), students will have six weeks to complete the online learning module and assessment and, once the module and assessment are completed students may request enrollment in CHEM 4A.. Students who complete the online learning module and assessment and submit their proof of completion by the established deadline are eligible to remain enrolled in CHEM 4A. Students can access the full CHEM 4A qualification instructions and the online learning module by joining a canvas class.

If you have questions about this process, please contact a Chemistry and Biochemistry Department advisor at chemistryadvising@ucsc.edu.

Transfer Information and Policy

General information about transferring to UC Santa Cruz can be found on the Transfer Preparation Advising website. Students planning to transfer to UC Santa Cruz from a California community college should reference assist.org to determine which courses are equivalent to required and recommended pre-transfer courses.

Transfer Admission Screening Policy

The following courses or their equivalents are required prior to transfer /entry to UCSC. Courses must be completed with a grade of C or better with a cumulative GPA of 2.50 in these courses. Completion of these courses also satisfies all major qualification requirements. For students with exam credit for any of the courses, a grade of A will be used in the GPA calculation.

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3C	General Chemistry	3
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5
	AND	
MATH 22	Introduction to Calculus of Several Variables	5

Plus one of the following options:

	Either these courses	
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
	or these courses	

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

Students must complete the above courses or their equivalents, with a grade of C or better, and have a cumulative GPA in these courses of 2.5 or greater.

For courses required to qualify for the major that have been satisfied with advanced placement (AP) credit based on an AP examination score (See Admissions AP Chart), students may substitute a grade of A for each course when calculating their GPA.

Note for winter transfer students: CHEM 8A/CHEM 8L are additional pre-transfer requirements for students planning to enter UCSC in the winter. CHEM 8A/CHEM 8L are still recommended for fall transfer admits, as listed below.

Recommended pre-transfer courses

Completion of the following courses is highly recommended before the transfer to ensure timely graduation. Students who only complete the minimum required transfer coursework for the major prior to transfer will likely need more than two years to complete the chemistry B.S.

CHEM 8A	Organic Chemistry	5
CHEM 8B	Organic Chemistry	5
CHEM 8L	Organic Chemistry Laboratory	2
CHEM 8M	Organic Chemistry Laboratory	2
PHYS 6A	Introductory Physics I	5
PHYS 6B	Introductory Physics II	5
PHYS 6L	Introductory Physics I Laboratory	1
PHYS 6M	Introductory Physics II Laboratory	1

If transferring into CHEM BS with BIOC concentration add these as pre-transfer courses:

BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5

Getting Started in the Major: Transfer Students

Transfer students are strongly encouraged to meet with a Chemistry and Biochemistry Department advisor in their first quarter. For assistance with advising, please email chemistryadvising@ucsc.edu.

Transfer students must already be qualified at time of entry to UCSC to be accepted into the chemistry major. Any student who fails to meet these requirements may file an appeal for admission to the major, but admission is not guaranteed.

Students who transfer at the junior-year level can declare their major any time after coming to UC Santa Cruz, but are required to be declared in a major by the declaration deadline in their second term at UCSC.

Transfer students who are proposed in a different major (other than chemistry) require permission from the department to change into the major. Admission to the major is not guaranteed.

Major Qualification Policy and Declaration Process

Major Qualification

Students must complete each of the following qualification courses, or their equivalents, by their campus-established declaration deadline with a grade of C or better and with a cumulative grade point average (GPA) of 2.50 or greater:

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3C	General Chemistry	3
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5

Plus one of the following options:

	Either these courses	
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
	or these courses	
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

And one of the following options:

	Either this course	
MATH 22	Introduction to Calculus of Several Variables	5
	or this course	
MATH 23A	Vector Calculus	5
	or this course	
AM 30	Multivariate Calculus for Engineers	5

Determining qualification for the major

When pursuing major qualification, students should keep the following details in mind:

- All courses must be taken for a letter grade. See the Letter Grade Policy below.
- A grade of A will be used in the GPA calculation for each student with exam credit for any of the above courses.
- UC Santa Cruz native students with two or more grades of NP, C-, D+, D, D-, or F in courses required to qualify for the major are not eligible to declare.

Transfer students should also consult the Transfer Information and Policy section above.

How to Declare a Major

Students may declare a major as early as they would like if they have decided which major to pursue and have satisfied prerequisites or qualification requirements for the major.

Per the UC Santa Cruz major declaration policy, students who enter UCSC as frosh are required to be formally declared in a major by the campus deadline in their 6th quarter and before enrolling in their third year (or equivalent). Upper-division junior transfer students are required to be declared in a major by the deadline in their second term at UC Santa Cruz.

Students should petition to declare a chemistry major once they have met all qualification criteria and have an official, signed, department-approved academic plan on file.

The Petition for Major/Minor declaration form can be accessed by going to MyUCSC and navigating to the Student Homepage and selecting the Undergraduate Student eForms tile > Petition for Major/Minor.

Students petitioning when the campus declaration deadline is imminent (i.e., in their 6th quarter, for students admitted as frosh, second quarter for junior transfer students), will either be approved, denied, or provided with conditions (e.g., completion of final qualification courses with certain grades), but will not be declared until all requirements have been met and satisfactory grades have been posted.

Each major/minor advising office has a process for declaring. For assistance with declaring the chemistry major, please contact chemistry and biochemistry advising at chemistryadvising@ucsc.edu.

Appeal Process

Students may appeal to the major either prior to or after submitting a petition to declare and being denied (in the latter case, appeals must be submitted within 15 days from the date the denial notification was sent). Within 15 days of receipt of the appeal being submitted, the department will notify the student and their affiliated college of the decision.

To appeal to declare a chemistry major, complete the Chemistry Major Appeal form via DocuSign.

To complete the major appeal form, you will need:

- An official Academic Plan (signed by the Chemistry major advisor)
- Unofficial Transcripts
- An Appeal Letter

Additional instructions can be found in the form.

Note: The information you share in your appeal or with your advisors will be kept confidential and shared only with campus officials as required to serve you in an advising capacity or process your appeal. However, in limited circumstances, including those related to potential harm to yourself or others, sexual assault, and abuse, we may be required by law to report incidents you disclose to other need-to-know offices on campus such as the Title IX Office and/or University of California Police Department. If you are in need of support for any issues, please see the list of confidential and/or support resources.

Letter Grade Policy

All courses used to satisfy degree requirements in any of the Chemistry and Biochemistry Department's majors must be taken for a letter grade. Additionally, letter grades of C or higher must be attained in all courses to meet major and minor requirements for graduation.

Course Substitution Policy

At least half of the upper-division courses (CHEM 100–CHEM 199) required for any chemistry major must be taken through the Chemistry and Biochemistry Department at UC Santa Cruz, not as transfer credits from another department or institution. Students should contact the Chemistry and Biochemistry Department advising office before enrolling in any upper-division chemistry course at other institutions to verify articulation.

Independent Study Policy

Students may take up to 5 credits of individual studies coursework per quarter.

There are three different independent studies options in the Chemistry and Biochemistry Department: CHEM 199 and CHEM 195. CHEM 199 Independent Research is for any student working on an independent research project under the guidance of UC Santa Cruz faculty. Independent research can be taken for 5 credits (CHEM 199) or 2 credits (CHEM 199F). CHEM 195 Thesis Research is for students performing independent research under the guidance of UC Santa Cruz faculty **AND** who will complete a final thesis. CHEM 186L is an additional option for any student working on an independent research project under the guidance of a UC Santa Cruz faculty. CHEM 186L can be used to satisfy the Senior Exit Lab and DC requirements, cannot be taken concurrently with CHEM 199 or CHEM 195, and can only be taken once.

Throughout their undergraduate career at UC Santa Cruz, students may take up to 15 credits total of CHEM 199 (either 199 or 199F) and CHEM 186L. For example, a student could take three quarters of CHEM 199, up to seven quarters of CHEM 199F, or some combination of CHEM 199, CHEM 199F and CHEM 186L (so long as the total is not more than 15 credits).

Throughout their undergraduate career at UC Santa Cruz, students may take up to 15 credits total of CHEM 195. CHEM 195 credits can be taken in addition to up to 15 credits of CHEM 199/CHEM 199F/CHEM 186L. Note that there are three different CHEM 195 courses (CHEM 195A, CHEM 195B, and CHEM 195C) that should be taken in order. The expectation for CHEM 195 is that satisfactory completion of the course is contingent on the submission of a final thesis that meets the faculty sponsor's approval. If there is doubt that

a thesis could be completed, CHEM 199 Independent Research is a more appropriate course.

Double Majors and Major/Minor Combinations Policy

A student cannot double major/minor in chemistry and any other major/minor offered by the Chemistry and Biochemistry Department.

To declare a double major program, a student must obtain an academic plan showing that they are able to complete both degrees within the maximum number of quarters of enrollment available at UC Santa Cruz. Therefore, the steps for a student to pursue chemistry as a second major are as follows:

1. The student must have an up-to-date and accurate major academic plan for their initial major.
2. The student must make an appointment with the chemistry major advisor and send the link to their initial major academic plan to chemistryadvising@ucsc.edu.
3. The chemistry major advisor will review the major academic plan and will add the chemistry major courses to the academic plan, as necessary, and if it is viable to do so per double unit counting, enrollment limitations, and time-to-degree guidelines.
4. The chemistry major advisor will discuss the double major plan with the student during their scheduled appointment. If the plan is viable, it will be approved and signed by both the student and the chemistry major advisor.
5. Once the student has an approved and viable double major plan and qualifies for the major, the student must petition to declare chemistry as a second major using the Petition for Major/Minor form in MyUCSC.

Honors

Department honors in the majors are awarded to graduating students whose academic performance demonstrates excellence at a GPA of 3.5 or above in required major coursework. Department highest honors are awarded to those students whose performance demonstrates the highest level of excellence and results in a GPA of 3.8 or above in required major coursework.

Materials Fee

Chemistry students should be aware of the materials fee required for some courses. The fee is billed to the student's account for specific laboratory materials purchased by the Chemistry and Biochemistry Department through the university. Students may incur additional expenses for individual supplies.

Program for Students of the Health Sciences

Students intending to enter medical, dental, or another health science professional school can satisfy entrance requirements with a major program in chemistry supplemented with further courses, especially in biology, as specified by the admissions requirements of the school where they intend to apply. Students are strongly encouraged to review the Pre-Health section of the Career Success website to review preparation recommendations, prerequisite and other information about professional health education programs (medical school, dental school, etc.), and more important information to assist in preparation for a career in health sciences.

Students are urged to contact Career Success for assistance with the application process.

American Chemical Society Certification

The American Chemical Society (ACS) recognizes certain undergraduate programs, including those of UC Santa Cruz, to be of such quality that they allow some graduates to become ACS members immediately upon graduation. Graduates must be individually certified to the ACS by the Chemistry and Biochemistry Department chair if they have satisfactorily completed an approved program of study. ACS certification standards are rigorous; a graduate who has met them carries a distinction that is well-recognized in the profession.

Broadly speaking, ACS certification requirements are satisfied by completing CHEM 122 as an elective and graduating with a chemistry B.S. (biochemistry concentration excluded). More information is available from the Chemistry and Biochemistry Department advisors.

[Optional Catchall]

General B.S. Degree

Course Requirements

The bachelor of science (B.S.) major program is designed for students who intend to pursue a professional career in chemistry. It is rigorous and broadly based. The course requirements for the B.S. major are as follows; please refer to each course description for a detailed listing of prerequisites. Some courses may be satisfied via exam credit.

Lower-Division Courses

General Chemistry:

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3C	General Chemistry	3
CHEM 3BL	General Chemistry Lab	2
CHEM 3CL	General Chemistry Lab	2
	or these courses	
CHEM 4BL	Advanced General Chemistry Lab	2
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5

CHEM 4AL	Advanced General Chemistry Lab	2

Calculus:

Choose one of the following options:

	Either these courses	
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
	or these courses	
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

A student may combine the MATH 11 series with the MATH 19 series to complete this portion of the major requirement(s), (for example, a student can take and complete MATH 19A and then take and complete MATH 11B) but must follow the Mathematics Department's Calculus Series Transition Policy.

Multivariable Calculus:

Choose one of the following options:

	Either this course	
MATH 22	Introduction to Calculus of Several Variables	5
	or these courses	
MATH 23A	Vector Calculus	5
MATH 23B	Vector Calculus	5
	or this course	
AM 30	Multivariate Calculus for Engineers	5

Advanced Mathematics:

Choose one of the following courses:

AM 10	Linear Algebra for Engineers	5
MATH 21	Linear Algebra	5
MATH 24	Ordinary Differential Equations	5

Physics:

Choose one of the following options:

	Either these courses	
PHYS 5A	Introduction to Physics I	5
PHYS 5B	Introduction to Physics II	5
PHYS 5C	Introduction to Physics III	5
PHYS 5M	Introduction to Physics II Laboratory	1
PHYS 5N	Introduction to Physics Laboratory III	1
	or these courses	
PHYS 6A	Introductory Physics I	5
PHYS 6B	Introductory Physics II	5
PHYS 6C	Introductory Physics III	5
PHYS 6L	Introductory Physics I Laboratory	1
PHYS 6M	Introductory Physics II Laboratory	1
PHYS 6N	Introductory Physics III Laboratory	1

A student may combine the PHYS 5 series with the PHYS 6 series to complete this portion of the major requirement(s), while following the Physics Transition policies.

Organic Chemistry:

CHEM 8A	Organic Chemistry	5
CHEM 8B	Organic Chemistry	5
CHEM 8L	Organic Chemistry Laboratory	2
CHEM 8M	Organic Chemistry Laboratory	2

By permission and invitation of the instructor, students may substitute CHEM 8M with CHEM 8N, Honors Organic Chemistry Lab. This course is designed to introduce the exceptional student to many of the techniques associated with organic chemistry while taking part in an active organic chemistry research experience.

Upper-Division Courses

Intermediate Organic Chemistry:

CHEM 110	Intermediate Organic Chemistry with Emphasis on Synthesis and Analytical Methods	5
CHEM 110L	Intermediate Organic Chemistry Laboratory	2

By permission and invitation of the instructor, students may substitute CHEM 110L with CHEM 110N, Honors Organic Chemistry Lab. This course is designed to introduce the exceptional student to many of the techniques associated with organic chemistry while taking part in an active organic chemistry research experience.

Inorganic Chemistry:

CHEM 151A	Chemistry of Metals	5
CHEM 151L	Inorganic Chemistry Laboratory	2

Satisfies part of the Disciplinary Communication (DC) and Comprehensive requirements.

Biochemistry:

CHEM 103	Biochemistry	5

Students who plan to do advanced work in biochemistry and molecular biology should take the biochemistry and molecular biology (BIOC) 100ABC series. Completing the series will fulfill the requirement of CHEM 103 (Biochemistry) plus fulfill one elective. Students who have finished CHEM 103 can, with instructor permission, enroll in BIOC 100C without taking BIOC 100A and BIOC 100B.

Physical Chemistry:

CHEM 163A	Quantum Mechanics and Basic Spectroscopy	5
CHEM 163B	Chemical Thermodynamics	5

CHEM 163C	Statistical Thermodynamics and Kinetics	5
CHEM 164	Physical Chemistry Laboratory	5

One of the following laboratory courses:

CHEM 146A	Advanced Laboratory in Organic Chemistry	3
CHEM 146B	Advanced Laboratory in Inorganic Chemistry	3
CHEM 146C	Advanced Laboratory in Physical Chemistry	5
CHEM 160L	Biochemistry Research Laboratory	5
CHEM 161L	Chemical Biology Research Laboratory	5
CHEM 186L	Research Communication and Practice	5

Note: CHEM 160L requires completion of CHEM 160J and CHEM 160K as prerequisites, and CHEM 161L requires CHEM 161J and CHEM 161K as prerequisites.

Students currently conducting senior thesis research are strongly encouraged to choose an advanced laboratory in the CHEM 146 series that is outside their research area.

Electives

At least two from the following list:

BIOC 100C	Biochemistry and Molecular Biology	5
CHEM 122	Principles of Instrumental Analysis	5
CHEM 124	Bioanalytical Chemistry	4
CHEM 143	Organic Chemical Structure and Reactions	5
CHEM 144	Catalysis In Organic Synthesis Using Metals and Metalloids Based Reagents	5
CHEM 151B	Chemistry of the Main Group Elements	5
CHEM 156C	Materials Chemistry	5
CHEM 169	Chemistry and Biology of Drug Design and Discovery	5
CHEM 171	Chemical Biology	5
METX 101	Sources and Fates of Pollutants	5
METX 102	Cell and Molecular Toxicology	5
OCEA 120	Aquatic Chemistry: Principles and Applications	5
OCEA 121	Aqueous Geochemistry	5
PHYS 156	Applications of Quantum Materials	5
PHYS 180	Biophysics	5

To receive certification from the American Chemical Society, students must complete CHEM 122.

Students may also satisfy the elective requirement by completing a chemistry graduate course with permission from the instructor and department. Please consult with chemistry biochemistry major advising before enrolling.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) Requirement. The DC Requirement for the bachelor of science (B.S.) degree in chemistry is satisfied by completing:

CHEM 151L	Inorganic Chemistry Laboratory	2

Plus one of the following courses:

CHEM 124	Bioanalytical Chemistry	4
CHEM 146A	Advanced Laboratory in Organic Chemistry	3
CHEM 146B	Advanced Laboratory in Inorganic Chemistry	3
CHEM 146C	Advanced Laboratory in Physical Chemistry	5
CHEM 160L	Biochemistry Research Laboratory	5
CHEM 161L	Chemical Biology Research Laboratory	5
CHEM 186L	Research Communication and Practice	5

Comprehensive Requirement

The comprehensive requirement is a part of all UCSC degrees. For the chemistry B.S., this requirement can be satisfied by receiving a passing grade in the upper-division labs listed below. These courses provide modern, individualized training in the discipline thus serving as relevant capstone experiences.

CHEM 151L	Inorganic Chemistry Laboratory	2

Plus one of the following courses:

CHEM 124	Bioanalytical Chemistry	4
CHEM 146A	Advanced Laboratory in Organic Chemistry	3
CHEM 146B	Advanced Laboratory in Inorganic Chemistry	3
CHEM 146C	Advanced Laboratory in Physical Chemistry	5
CHEM 160L	Biochemistry Research Laboratory	5
CHEM 161L	Chemical Biology Research Laboratory	5
CHEM 186L	Research Communication and Practice	5

Note: CHEM 160L requires completion of CHEM 160J and CHEM 160K as prerequisites, and CHEM 161L requires CHEM 161J and CHEM 161K as prerequisites.

Planners

The sample academic plans below are for chemistry major informational purposes and do not reflect all university, general education, and credit requirements. See the

Undergraduate Graduation Requirements section of the catalog for more information.

This is the ideal academic plan for those pursuing a chemistry B.S. major. If needed, this plan can be arranged differently. Please meet with an academic advisor in the Chemistry and Biochemistry Department to review your individualized official academic plan.

Sample Four-Year Planner

	Fall	Winter	Spring	Summer
Entering				College 1A Summer Edge (optional)
1st (frosh)	MATH 11A or MATH 19A	MATH 11B or MATH 19B	CHEM 3C & CHEM 3CL (not required if CHEM 4 series completed)	
	CHEM 3A orCHEM 4A & CHEM 4AL	CHEM 3B & CHEM 3BL orCHEM 4B & CHEM 4BL	MATH 21	
	College Core	WRIT 1 or WRIT 1E (if needed)		
2nd (soph)	CHEM 8A & CHEM 8L	CHEM 8B & CHEM 8M	CHEM 110 & CHEM 110L	
	PHYS 6A & PHYS 6L	MATH 22	PHYS 6B & PHYS 6M	
	WRIT 2**			
3rd (junior)	CHEM 163A	CHEM 163B	CHEM 163C	
	PHYS 6C & PHYS 6N	CHEM 151A & CHEM 151L	CHEM 103	
4th(senior)	CHEM 146A*	CHEM 164	CHEM elective 2	
	CHEM elective 1		CHEM 146B* or CHEM 146C*	

* CHEM 146A is offered in fall quarter; CHEM 146B and CHEM 146C are offered in spring quarter. Only ONE advanced lab (CHEM 146A, 146B, or 146C) is required for degree completion. Alternatively, students can take the CHEM 160 or CHEM 161 series: CHEM 160J or CHEM 161J, CHEM 160K CHEM 161K, and CHEM 160L or CHEM 161L, which are offered in the fall, winter, and spring, respectively.

** WRIT 2 should be taken in or before spring quarter of the second year. Questions about WRIT coursework or any other non-chemistry major requirements should be directed to college advising.

Two of the required general education requirements will be fulfilled by the major requirements listed in the above planner (MF and SI). In addition to the specific courses shown in these planners, a student will also need to complete courses satisfying the following general education requirements: Cross-Cultural Analysis, Ethnicity & Race, Interpreting Arts & Media, Statistical Reasoning, Textual Analysis & Interpretation, Perspectives, and Practice. College advisors assist students with questions relating to general education requirements.

Sample Transfer Two-Year Planner

This is a sample academic plan for students who have transferred in with both the required and highly recommended pre-transfer courses.

Note: Students who did not complete both the required and highly recommended courses prior to transfer will need to follow a different academic plan and may require additional time to degree.

Please meet with an advisor in the Chemistry and Biochemistry Department to create and review your individualized official academic plan

	Fall	Winte	Spring	Summer

		r		
Entering				KRSG 1T Summer Edge (optional)
1st (junior)	CHEM 163A	CHEM 163B	CHEM 163C	
	PHYS 6C & PHYS 6N	CHEM 151A & CHEM 151L	CHEM 110 & CHEM 110L	
2nd (senior)	CHEM 146A*	CHEM 164	CHEM elective 2	
	CHEM elective 1	MATH 21	CHEM 103	
			CHEM 146B* or CHEM 146C*	

* CHEM 146A is offered in fall quarter; CHEM 146B and CHEM 146C are offered in spring quarter. Only **ONE** advanced lab (CHEM 146A, CHEM 146B, or CHEM 146C) is required for degree completion. Alternatively, students can take the CHEM 160 or 161 series: CHEM 160J or CHEM 161J, CHEM 160K CHEM 161K, and CHEM 160L or CHEM 161L, which are offered in the fall, winter, and spring, respectively.

Biochemistry Concentration

The biochemistry concentration is designed for students who intend to pursue a career in biochemistry or in a related field such as biotechnology, and it provides an exceptionally rigorous chemistry emphasis.

Course Requirements

The course requirements for the B.S. major with the biochemistry concentration are as follows; please refer to each course description for a detailed listing of prerequisites. Some courses may be satisfied via exam credit.

Lower-Division Courses

General Chemistry:

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3C	General Chemistry	3
CHEM 3BL	General Chemistry Lab	2
CHEM 3CL	General Chemistry Lab	2
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4AL	Advanced General Chemistry Lab	2
CHEM 4BL	Advanced General Chemistry Lab	2

Calculus:

Choose one of the following options:

	Either these courses	
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
	or these courses	
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

A student may combine the MATH 11 series with the MATH 19 series to complete this portion of the major requirement(s). For example, a student can take and complete MATH 19A and then take and complete MATH 11B, but they must follow the Mathematics Department's Calculus Series Transition Policy.

Multivariable Calculus:

	Either this course	
MATH 22	Introduction to Calculus of Several Variables	5
	or these courses	
MATH 23A	Vector Calculus	5
MATH 23B	Vector Calculus	5
	or this course	
AM 30	Multivariate Calculus for Engineers	5

Advanced Mathematics:

Choose one of the following courses:

AM 10	Linear Algebra for Engineers	5
MATH 21	Linear Algebra	5
MATH 24	Ordinary Differential Equations	5

Introductory Biology:

BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5

Physics:

Choose one of the following options:

	Either these courses	
PHYS 5A	Introduction to Physics I	5
PHYS 5B	Introduction to Physics II	5
PHYS 5C	Introduction to Physics III	5
PHYS 5M	Introduction to Physics II Laboratory	1
PHYS 5N	Introduction to Physics Laboratory III	1
	or these courses	
PHYS 6A	Introductory Physics I	5
PHYS 6B	Introductory Physics II	5
PHYS 6C	Introductory Physics III	5
PHYS 6L	Introductory Physics I Laboratory	1
PHYS 6M	Introductory Physics II Laboratory	1
PHYS 6N	Introductory Physics III Laboratory	1

A student may combine the PHYS 5 series with the PHYS 6 series to complete this portion of the major requirement(s) but must follow the Physics Transition policies.

Organic Chemistry:

CHEM 8A	Organic Chemistry	5
CHEM 8B	Organic Chemistry	5
CHEM 8L	Organic Chemistry Laboratory	2
CHEM 8M	Organic Chemistry Laboratory	2

By permission and invitation of the instructor, students may substitute CHEM 8M with CHEM 8N, Honors Organic Chemistry Lab. This course is designed to introduce the exceptional student to many of the techniques associated with organic chemistry while taking part in an active organic chemistry research experience.

Upper-Division Courses

Intermediate Organic Chemistry:

CHEM 110	Intermediate Organic Chemistry with Emphasis on Synthesis and Analytical Methods	5
CHEM 110L	Intermediate Organic Chemistry Laboratory	2

By permission and invitation of the instructor, students may substitute CHEM 110L with CHEM 110N, Honors Organic Chemistry Lab. This course is designed to introduce the exceptional student to many of the techniques associated with organic chemistry while taking part in an active organic chemistry research experience.

Inorganic Chemistry:

CHEM 151A	Chemistry of Metals	5
CHEM 151L	Inorganic Chemistry Laboratory	2

Satisfies part of the Disciplinary Communication (DC) and Comprehensive requirements.

Biochemistry:

BIOC 100A	Biochemistry and Molecular Biology	5
BIOC 100B	Biochemistry and Molecular Biology	5
BIOC 100C	Biochemistry and Molecular Biology	5
	AND	
	One of these courses	
BIOC 110L	Advanced Biochemistry Laboratory	5
CHEM 160L	Biochemistry Research Laboratory	5
CHEM 161L	Chemical Biology Research Laboratory	5
CHEM 186L	Research Communication and Practice	5

Satisfies part of the the Disciplinary Communication (DC) and Comprehensive requirements.

Note: CHEM 160L requires completion of CHEM 160J and CHEM 160K as prerequisites, and CHEM 161L requires completion of CHEM 161J and CHEM 161K as prerequisites.

Physical Chemistry:

CHEM 163A	Quantum Mechanics and Basic Spectroscopy	5
CHEM 163B	Chemical Thermodynamics	5
CHEM 163C	Statistical Thermodynamics and Kinetics	5

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) Requirement. The DC Requirement in chemistry with a biochemistry concentration is satisfied by completing the following. This also satisfies the Comprehensive Requirement.

CHEM 151L	Inorganic Chemistry Laboratory	2
	AND	
	One of these courses	
BIOC 110L	Advanced Biochemistry Laboratory	5
CHEM 124	Bioanalytical Chemistry	4
CHEM 146A	Advanced Laboratory in Organic Chemistry	3
CHEM 146B	Advanced Laboratory in Inorganic Chemistry	3
CHEM 146C	Advanced Laboratory in Physical Chemistry	5
CHEM 160L	Biochemistry Research Laboratory	5

CHEM 161L	Chemical Biology Research Laboratory	5
CHEM 186L	Research Communication and Practice	5

Comprehensive Requirement

The comprehensive requirement is a part of all UC Santa Cruz degrees. For the chemistry B.S with a biochemistry concentration, this requirement can be satisfied by receiving a passing grade in the upper-division labs listed below. These courses provide modern, individualized training in the discipline thus serving as relevant capstone experiences. This also satisfies the Disciplinary Communication (DC) requirement.

CHEM 151L	Inorganic Chemistry Laboratory AND One of these courses	2
BIOC 110L	Advanced Biochemistry Laboratory	5
CHEM 124	Bioanalytical Chemistry	4
CHEM 146A	Advanced Laboratory in Organic Chemistry	3
CHEM 146B	Advanced Laboratory in Inorganic Chemistry	3
CHEM 146C	Advanced Laboratory in Physical Chemistry	5
CHEM 160L	Biochemistry Research Laboratory	5
CHEM 161L	Chemical Biology Research Laboratory	5
CHEM 186L	Research Communication and Practice	5

Note: CHEM 160L requires completion of CHEM 160J and CHEM 160K as prerequisites, and CHEM 161L requires completion of CHEM 161J and CHEM 161K as prerequisites.

Planners

This is the most general academic plan for this major. If needed, the plan can be rearranged.

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See the Undergraduate Graduation Requirements section of the catalog for more information.

Please meet with an academic advisor in the Chemistry and Biochemistry Department to review your specific official academic plan.

	Fall	Winter	Spring	Summer
Entering				College 1A Summer Edge (optional))
1st (frosh)	MATH 11A or MATH 19A CHEM 3A orCHEM 4A & CHEM 4AL College 1	MATH 11B or MATH 19B CHEM 3B & CHEM 3BL orCHEM 4B & CHEM 4BL WRIT 1 or WRIT 1E (if needed) **	BIOL 20A CHEM 3C & CHEM 3CL (not required if CHEM 4 series completed)	
2nd (soph)	CHEM 8A & CHEM 8L BIOE 20B WRIT 2**	CHEM 8B & CHEM 8M MATH 22	CHEM 110 & CHEM 110L MATH 21	
3rd (junior)	BIOC 100A PHYS 6A & PHYS 6L	BIOC 100B PHYS 6B & PHYS 6M	BIOC 100C PHYS 6C & PHYS 6N	
4th (senior)*	CHEM 163A	CHEM 163B CHEM 151A & CHEM 151L	CHEM 163C BIOC 110L*	

Alternatively to BIOC 110L, students can take the CHEM 160 or CHEM 161 series: CHEM 160J or CHEM 161J, CHEM 160K or CHEM 161K, and CHEM 160L or CHEM 161L, which are offered in the fall, winter, and spring, respectively.

**WRIT 2 should be taken in or before spring quarter of the second year. Questions about WRIT coursework or any other non-chemistry major requirements should be directed to college advising.

Two of the required general education requirements will be fulfilled by the major requirements listed in the above planner (MF and SI). In addition to the specific courses shown in these planners, a student will also need to complete courses satisfying the following general education requirements: Cross-Cultural Analysis, Ethnicity and Race, Interpreting Arts and Media, Statistical Reasoning, Textual Analysis and Interpretation, Perspectives, and Practice. College advisors assist students with questions relating to general education requirements.

Sample Transfer Two-Year Planner

This is a sample academic plan for students who have transferred in with both the required and highly recommended pre-transfer courses.

Note: Students who did not complete the required and most of the recommended chemistry transfer courses prior to transfer will need to follow a different academic plan and may require additional time to degree.

Please meet with an advisor from the Chemistry and Biochemistry Department to create and review your individualized official academic plan.

	Fall	Winter	Spring	Summer
Entering				KRSG 1T Summer Edge (optional)
1st (junior)	BIOC 100A	BIOC 100B	BIOC 100C CHEM 110 & CHEM 110L	
2nd (senior)	CHEM 163A	CHEM 163B CHEM 151A & CHEM 151L	CHEM 163C BIOC 110L*	

*Alternatively to BIOC 110L, students can take the CHEM 160 or CHEM 161 series: CHEM 160J or CHEM 161J, CHEM 160K or CHEM 161K, and CHEM 160L or CHEM 161L, which are offered in the fall, winter, and spring, respectively.

BIOCHEMISTRY AND MOLECULAR BIOLOGY B.S.

Information and Policies

Introduction

Research at the macromolecular, molecular, and atomic levels is revolutionizing our understanding of the fundamental processes of life. Students interested in joining this search are best prepared by undertaking coursework in biology, chemistry, physics, mathematics, and computer science. The undergraduate major in biochemistry and molecular biology (BMB) is jointly administered by the Chemistry and Biochemistry and Molecular, Cell, and Developmental (MCD) Biology Departments. Program faculty are actively engaged in research on biological systems.

Students who declare the BMB major earn a bachelor of science (B.S.) degree. The BMB major constitutes an integrated curriculum of basic instruction in biology, chemistry, mathematics, and physics, followed by the opportunity to pursue advanced study in specialized areas of interest. In modern, well-equipped laboratories, distinguished faculty are engaged in frontline research at UCSC. The Chemistry and Biochemistry Department and the Molecular, Cell, and Developmental Biology Department each host a very active seminar series in which internationally-recognized scientists present their current research findings. Advanced BMB undergraduates are encouraged to attend.

The BMB program features close faculty-student interaction, stimulating learning environments, and opportunities for independent research and study. Students majoring in BMB are encouraged to become involved in research under the guidance of a faculty sponsor. Many students participating in this aspect of the program have made important contributions to the scientific literature.

The BMB major has a broad scope and is interdisciplinary in nature. All prospective majors should see the BMB academic advisor for additional information.

Academic Advising for the Program

The chemistry and biochemistry advisors provide counsel to undergraduate majors. Students are encouraged to seek out advising and assistance in planning their academic careers to ensure completion of their major in a timely manner. For advising assistance, please contact chemistry and biochemistry advising at chemistryadvising@ucsc.edu or visit the BMB Advising webpage. All students interested in the Biochemistry Molecular Biology (BMB) B.S. major should read this catalog to learn more details about the major.

Program Learning Outcomes

Learning outcomes summarize the most important knowledge, skills, abilities, and attitudes that students are expected to develop over the course of their studies.

Students graduating with a B.S. in biochemistry and molecular biology should be able to:

- demonstrate mastery of a broad set of chemical and biological knowledge concerning the fundamentals in the basic areas of the discipline (organic, inorganic, analytical, physical, biochemistry, and molecular biology).
- solve area-specific problems by identifying the essential parts of a problem, formulating a strategy for solving the problem, applying appropriate techniques to arrive at a solution, testing the correctness of the solution, and interpreting their results.
- use modern cloud search tools (such as SciFinder, PubMed, Google Scholar, or Web of Science) to locate and retrieve scientific information about topics relating to chemistry and biology.
- know and follow the proper procedures and regulations for safe handling and use of chemicals, biohazardous materials, and common laboratory instruments.
- understand the objective of their chemical and biological experiments, properly carry out the experiments, and appropriately record and analyze the results.
- use computers in data acquisition and processing, and use available software as a tool in data analysis; use standard laboratory equipment, modern instrumentation, and classical techniques to carry out experiments.
- communicate the concepts and results of their laboratory experiments through effective writing and/or oral communication using the discipline standards for reporting and citation.
- collaborate effectively as part of a team to solve problems, debate different points of view, and interact productively with a diverse group of team members.

Getting Started in the Major: Frosh

This major is highly course intensive and sequential; students who intend to pursue this major must begin taking classes for the major in their first quarter at UC Santa Cruz.

Prospective biochemistry and molecular biology majors should have a solid foundation in high school mathematics; familiarity with algebra, logarithms, trigonometry, and analytic geometry is particularly required. Incoming students in the biochemistry and molecular biology major should complete the ALEKS Math Placement process as early as possible. ALEKS results must be officially posted to students' records as a prerequisite to first quarter enrollment. For more information, please review the Math Placement website.

Students taking chemistry at the University of California, Santa Cruz, have a number of options for satisfying their general chemistry requirements:

1. Begin with CHEM 3A, CHEM 3B, CHEM 3C with associated labs, CHEM 3BL and CHEM 3CL.
2. Students with an exceptionally strong background in high school chemistry may begin with the advanced general chemistry sequence (if offered): CHEM 4A and CHEM 4B with associated labs, CHEM 4AL and CHEM 4BL. Enrollment in the CHEM 4 series requires qualification – see the "Qualifying for the Advanced General Chemistry series" admission policy section below).
3. Students with transfer or exam credit will take the next course in the general chemistry sequence.

Any of the above pathways fully satisfies the general chemistry prerequisites of any major declaration or required/elective classes for programs in the Physical and Biological Sciences (PBSci) Division.

Qualifying for the Accelerated General Chemistry series (CHEM 4)
Note: CHEM 4 not offered in Academic Year 2025-26

CHEM 4 is an accelerated two-quarter series intended for students who enter UC Santa Cruz with excellent preparation in high school chemistry. Students in this series will learn fundamental concepts in chemistry at a **faster pace** than our traditional general chemistry series, CHEM 3, with an emphasis on quantum theory, molecular structure, and chemical driving forces. Both courses cover the same material; however, the CHEM 4 series completes the content in two quarters rather than three. Students with an exceptionally strong background in high school chemistry are especially encouraged to begin with CHEM 4A (Advanced General Chemistry: Molecular Structure and Reactivity) instead of CHEM 3A.

All students who want to enroll in the accelerated series must complete an online learning module and assessment administered by the Chemistry and Biochemistry Department. Once the online learning module and assessment are started (by completing the initial knowledge check), students will have six weeks to complete the online learning module and assessment and, once the module & assessment are completed students may request enrollment in CHEM 4A.. Students who complete the online learning module and assessment and submit their proof of completion by the established deadline are eligible to remain enrolled in CHEM 4A. Students can access the full CHEM 4A qualification instructions and the online learning module by joining this Canvas Class.

If you have questions about this process, please contact chemistry advising at chemistryadvising@ucsc.edu.

Transfer Information and Policy

General information about transferring to UC Santa Cruz can be found on the Transfer Preparation Advising website. Students planning to transfer to UC Santa Cruz as a

biochemistry and molecular biology major from a California community college should reference assist.org to determine which courses are equivalent to required and recommended pre-transfer courses.

Transfer Admission Screening Policy

The following courses or their equivalents are required prior to transfer, by the end of the spring term for students planning to enter in the fall. Courses must be completed with a grade of C or better with a cumulative GPA of 2.50 in these courses. Completion of these courses also satisfies all major qualification requirements. For students with exam credit for any of the courses, a grade of A will be used in the GPA calculation.

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3C	General Chemistry	3
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5

And these courses:

BIOL 20A	Cell and Molecular Biology	5
CHEM 8A	Organic Chemistry	5
CHEM 8B	Organic Chemistry	5

Plus one of the following options:

MATH 11A	Calculus with Applications	5
MATH 19A	Calculus for Science, Engineering, and Mathematics	5

Recommended Major Preparation for Junior Transfer Students

Completion of the following courses is highly recommended before the transfer to ensure timely graduation. Students who only complete minimum required transfer coursework for the major prior to transfer are more likely to take longer to complete the Biochemistry and Molecular Biology B.S.

BIOE 20B	Development and Physiology	5
CHEM 8L	Organic Chemistry Laboratory	2
CHEM 8M	Organic Chemistry Laboratory	2
PHYS 6A	Introductory Physics I	5
PHYS 6B	Introductory Physics II	5
PHYS 6C	Introductory Physics III	5
PHYS 6L	Introductory Physics I Laboratory	1
PHYS 6M	Introductory Physics II Laboratory	1
PHYS 6N	Introductory Physics III Laboratory	1
STAT 5	Statistics	5

As well as one of the following:

MATH 11B	Calculus with Applications	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

Getting Started in the Major: Transfer Students

Transfer students are strongly encouraged to meet with the biochemistry and molecular biology academic advisor in their first quarter. For assistance with advising, email chemistryadvising@ucsc.edu.

Any student who fails to meet these requirements may file an appeal for admission to the major, but admission is not guaranteed.

Students who transfer as juniors can declare their major any time after coming to UC Santa Cruz but are required to be declared in a major by the declaration deadline in their second term at UC Santa Cruz.

Transfer students who are proposed in a different major (other than biochemistry and molecular biology) require permission from the department to change into the major. Admission to the major is not guaranteed.

Major Qualification Policy and Declaration Process

Major Qualification

Students must complete each of the following qualification courses, or their equivalents, by their campus-established declaration deadline with a grade of C (2.0) or better and with a cumulative grade point average (GPA) of 2.50 or greater:

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3C	General Chemistry	3
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5

Plus these courses

BIOL 20A	Cell and Molecular Biology	5
CHEM 8A	Organic Chemistry	5
CHEM 8B	Organic Chemistry	5

Plus one of the following options:

MATH 11A	Calculus with Applications	5
MATH 19A	Calculus for Science, Engineering, and Mathematics	5

How to Declare a Major

Students may declare a major as early as they would like if they have decided which major to pursue and have satisfied prerequisites or qualification requirements for the major.

Per the UC Santa Cruz major declaration policy, students who enter UCSC as frosh are required to be formally declared in a major by the campus deadline in their sixth quarter and before enrolling in their third year (or equivalent). Upper-division junior transfer students are required to be declared in a major by the deadline in their second term at UCSC.

Students should petition to declare a biochemistry major once they have met all qualification criteria and have an official, signed, department-approved academic plan on file.

The Petition for Major/Minor declaration form can be accessed by going to MyUCSC and navigating to the Student Homepage and selecting the Undergraduate Student eForms tile > Petition for Major/Minor.

Students petitioning when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh, second quarter for junior transfer students), will either be approved, denied, or provided with conditions (e.g., completion of final qualification courses with certain grades), but will not be declared until all requirements have been met and satisfactory grades have been posted.

Each major/minor advising office has a process for declaring. For assistance with declaring the chemistry major, please contact chemistry and biochemistry advising at chemistryadvising@ucsc.edu.

Appeal Process

Students may appeal to the major either prior to or after submitting a petition to declare and being denied (in the latter case, appeals must be submitted within 15 days from the date the denial notification was sent). Within 15 days of receipt of the appeal being submitted, the department will notify the student and their affiliated college of the decision.

To submit an appeal, please complete the applicable appeal form, available on the Chemistry Biochemistry Advising website.

Note: The information you share in your appeal or with your advisors will be kept confidential and shared only with campus officials as required to serve you in an advising capacity or process your appeal. However, in limited circumstances, including those related to potential harm to yourself or others, sexual assault, and abuse, we may be required by law to report incidents you disclose to other need-to-know offices on campus such as the Title IX Office and/or University of California Police Department. If you are in need of support for any issues, please see the list of confidential and/or support resources.

Letter Grade Policy

All courses used to satisfy degree requirements in any of the chemistry and biochemistry majors must be taken for a letter grade. Additionally, letter grades of C or higher must be attained in all courses to meet major and minor requirements for graduation.

Course Substitution Policy

At least half of the upper-division courses (numbered 100–199) required for any biochemistry and molecular biology major must be taken through the chemistry or biology programs at UC Santa Cruz, not as transfer credits from another department or institution. Students are advised to contact the Chemistry and Biochemistry Department undergraduate advising office before enrolling in any chemistry or biochemistry upper-division courses at other institutions to verify articulation.

Independent Study Policy

BMB students who are considering independent research or wish to complete a thesis should contact chemistryadvising@ucsc.edu. Students who are participating in undergraduate research should consider taking BIOL 186L or CHEM 186L as their senior exit lab. BIOL 186L is hosted and controlled by the MCD Biology Department, while CHEM 186L is hosted and controlled by the Department of Chemistry Biochemistry.

Double Majors and Major/Minor Combinations Policy

A student cannot double major/minor in BMB and any other major/minor offered by the departments of Chemistry Biochemistry, Ecology and Evolutionary Biology, Microbiology and Environmental Toxicology, MCD Biology, or Global Community Health.

Pursuing a double major that includes a chemistry major is a highly individual decision and should be based on a student's educational and career goals. Because the biochemistry and molecular biology major itself is course-intensive and rigorous, it should be noted that completing a double major involving biochemistry and molecular biology is difficult and often not viable.

To declare a double major, a student must obtain an academic plan showing that they are able to complete both degrees within the maximum number of quarters of enrollment available at UC Santa Cruz. Therefore, the steps for a student to pursue chemistry as a second major are as follows:

1. Student must have an up-to-date and accurate major academic plan for their initial major.
2. Student must make an appointment with the biochemistry and molecular biology major advisor and send the link to their signed academic plan to chemistryadvising@ucsc.edu.
3. The biochemistry and molecular biology major advisor will review the major academic plan and will add the biochemistry and molecular biology major courses to the academic plan, as necessary. In doing so, the advisor will determine if it is a viable double major

considering double-credit counting, enrollment limitations, and time-to-degree guidelines.

4. The biochemistry and molecular biology major advisor will discuss the double major plan with the student during their scheduled appointment. If the plan is viable, it will be approved and signed by both the student and the biochemistry and molecular biology major advisor.

5. Once the student has an approved and viable double major plan and qualifies for the major, the student must petition to declare biochemistry and molecular biology as a second major using the Petition for Major/Minor form in MyUCSC.

Honors

Department honors in the majors are awarded to graduating students whose academic performance demonstrates excellence at a GPA of 3.5 - 3.79 in required major coursework. Department highest honors are awarded to those students whose performance demonstrates the highest level of excellence and results in a GPA of 3.8 or above in required major coursework.

Materials Fee

Biochemistry and molecular biology students should be aware of the materials fee required for some laboratory courses. The fee is billed to the student's account for specific laboratory materials purchased through the university. Students may incur additional expenses purchasing individual supplies.

Program Planning Notes

Students who do not begin the lower-division qualification course requirements during their first year, and who do not complete the organic chemistry requirements by the end of their second year, will have difficulty completing the program within four years. Chemistry and biochemistry advising works closely with students interested in pursuing the major to ensure that they begin the program immediately and follow the appropriate steps toward completion.

It is strongly recommended that students avail themselves of the opportunities to obtain firsthand research experience through either independent study, a course-based undergraduate research experience, or by working in a faculty research lab.

Program for Students of the Health Sciences

Students intending to enter medical, dental, or another health science professional school can satisfy entrance requirements with a major program in biochemistry and molecular biology supplemented with further courses, especially in biology, as specified by the admissions requirements of the school where they intend to apply. Students are strongly encouraged to review the Pre-Health section of the Career Success website to review preparation recommendations, prerequisites and other information about professional health education programs (medical school, dental school, etc.), and more important information to assist in preparation for a career in health sciences.

Students are urged to contact Career Success for assistance with the application process.

Requirements and Planners

Course Requirements

The following is required to complete the Biochemistry and Molecular Biology B.S. Some courses may be satisfied via exam credit.

Lower-Division Courses

General Chemistry

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3C	General Chemistry	3
CHEM 3BL	General Chemistry Lab	2
CHEM 3CL	General Chemistry Lab	2
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4AL	Advanced General Chemistry Lab	2
CHEM 4BL	Advanced General Chemistry Lab	2

Calculus

	Either these courses	
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
	or these courses	
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

Statistics

	Either this course	
STAT 5	Statistics	5
	or these courses	
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2

Intro Biology

BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
	AND	

	One of these courses	
BIOL 20L	Experimental Biology Laboratory	2
BIOL 102J	Toxic RNA Lab I	5
BIOL 107J	Synthetic Gene Regulation Lab I	5
CHEM 160J	Biochemistry Research Laboratory	5
CHEM 161J	Chemical Biology Research Laboratory	5

Organic Chemistry

CHEM 8A	Organic Chemistry	5
CHEM 8B	Organic Chemistry	5
CHEM 8L	Organic Chemistry Laboratory	2
CHEM 8M	Organic Chemistry Laboratory	2

Physics

	Either these courses	
PHYS 5A	Introduction to Physics I	5
PHYS 5B	Introduction to Physics II	5
PHYS 5C	Introduction to Physics III	5
PHYS 5L	Introduction to Physics I Laboratory	1
PHYS 5M	Introduction to Physics II Laboratory	1
	or these courses	
PHYS 6A	Introductory Physics I	5
PHYS 6B	Introductory Physics II	5
PHYS 6C	Introductory Physics III	5
PHYS 6L	Introductory Physics I Laboratory	1
PHYS 6M	Introductory Physics II Laboratory	1
PHYS 6N	Introductory Physics III Laboratory	1

A student may combine the PHYS 5 series with the PHYS 6 series to complete this portion of the major requirement(s), while following the Physics Transition policies.

Upper-Division Courses

Biochemistry and Molecular Biology

BIOC 100A	Biochemistry and Molecular Biology	5
BIOC 100B	Biochemistry and Molecular Biology	5
BIOC 100C	Biochemistry and Molecular Biology	5

and one of these courses:

BIOL 101L	Molecular Biology Laboratory	2
BIOL 102L	Toxic RNA Lab II	5
BIOL 107L	Synthetic Gene Regulation Lab II	5
BIOL 122K	Phage Biology Lab I	5
CHEM 160K	Biochemistry Research Laboratory	5
CHEM 161K	Chemical Biology Research Laboratory	5

Genetics

BIOL 105	Genetics	5

Eukaryotic Molecular Biology

BIOL 115	Eukaryotic Molecular Biology	5

Physical Chemistry

BIOC 163A	Quantum Mechanics, Spectroscopy and Molecular Structure for Biochemistry and Molecular Biology	5
BIOC 163B	Biochemical Thermodynamics and Statistical Mechanics for Biochemistry and Molecular Biology	5

Students may substitute CHEM 163A and CHEM 163B for this requirement. While not required for the major, MATH 22 is a prerequisite for CHEM 163A and CHEM 163B. MATH 22 is only taught in winter (and possibly summer) at UC Santa Cruz.

Elective

Complete one course from the following list:

BIOL 110	Cell Biology	5
BIOL 118	Principles of Human Genetics	5
BME 110	Computational Biology Tools	5
BME 128	Protein Engineering	5
BME 130	Genomes	5
BME 132	Evolutionary Genomics	5
BME 160	Research Programming in the Life Sciences	6
CHEM 110	Intermediate Organic Chemistry with Emphasis on Synthesis and Analytical Methods	5
CHEM 169	Chemistry and Biology of Drug Design and Discovery	5
CHEM 171	Chemical Biology	5
STAT 131	Introduction to Probability Theory	5

Senior Exit Lab

One of the following laboratory courses (also satisfies the Disciplinary Communication (DC) and Senior Comprehensive Requirement for graduation):

BIOC 110L	Advanced Biochemistry Laboratory	5
BIOL 100L	Biochemistry Laboratory	5
BIOL 103L	Toxic RNA Lab III	5
BIOL 105L	Eukaryotic Genetics Laboratory	5
BIOL 106L	Eukaryotic Genetic Engineering	5
BIOL 108L	Synthetic Gene Regulation Lab III	5

BIOL 109L	Yeast Molecular Genetics Laboratory	5
BIOL 115L	Eukaryotic Molecular Biology Laboratory	5
BIOL 121L	Environmental Phage Biology Laboratory	5
BIOL 122L	Phage Biology Lab II	5
BIOL 186L	Undergraduate Research in MCD Biology	5
CHEM 160L	Biochemistry Research Laboratory	5
CHEM 161L	Chemical Biology Research Laboratory	5
CHEM 186L	Research Communication and Practice	5

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in biochemistry and molecular biology is satisfied by completing one of the Senior Exit Lab options listed in the previous section.

The DC requirement must be satisfied at UC Santa Cruz and may not be transferred from another institution.

Comprehensive Requirement

Students must satisfy the senior comprehensive requirement by receiving a passing letter grade in any of the Senior Exit Lab options listed in the previous section. In addition, students are encouraged to gain research experience by working in a faculty research lab.

Planners

The sample academic plans below are for BMB major informational purposes and do not reflect all university, general education, and credit requirements. See the Undergraduate Graduation Requirements section of the catalog for more information.

This is the ideal academic plan for those pursuing the biochemistry and molecular biology B.S. major. Note that some course offering schedules change over time. Please see an academic advisor in the Chemistry and Biochemistry Department to create/verify your individualized official academic plan.

Sample Four-Year Planner

	Fall	Winter	Spring	Summer
Entering				College 1A Summer Edge (optional)
1st (frosh)	MATH 11A or MATH 19A CHEM 3A orCHEM 4A and CHEM 4AL College 1	MATH 11B or MATH 19B CHEM 3B & CHEM 3BL orCHEM 4B & CHEM 4BL WRIT 1/WRIT 1E (if needed)	BIOL 20A CHEM 3C & CHEM 3CL (not required if CHEM 4 series completed)	
2nd (soph)	BIOE 20B CHEM 8A & CHEM 8L WRIT 2 (in or before 5th quarter)	PHYS 6A & PHYS 6L CHEM 8B & CHEM 8M	PHYS 6B and PHYS 6M BIOL 20L*	
3rd (junior)	BIOC 100A PHYS 6C & PHYS 6N	BIOC 100B BIOL 105 MATH 22 (optional)	BIOC 100C BIOL 101L**	
4th (senior)	BIOL 110 STAT 5 orSTAT 7 and STAT 7L Senior	BIOC 163A*** BIOL 115Senior Exit Lab****	BIOC 163B*** Senior Exit Lab****	

	Exit Lab** **		

*Either CHEM 160J, or CHEM 161J may be substituted for BIOL 20L. These courses are taught in fall and require an application for enrollment.

**Either CHEM 160K, or CHEM 161K may be substituted for BIOL 101L. These courses are only taught in winter and require the completion of CHEM 160J, and CHEM 161J, respectively, and application for enrollment.

***CHEM 163A and CHEM 163B may be substituted for BIOC 163A and BIOC 163B. **Note**: the CHEM 163 series is taught fall and winter, respectively, while the BIOC 163 series is taught winter and spring, respectively. MATH 22 (taught only in winter and summer) is a prerequisite for CHEM 163A and CHEM 163B but is not a prerequisite for BIOC 163A and CHEM 163B.

****Senior Exit Lab should be completed as early as possible. Students should discuss options with their BMB advisor when academic planning 3rd- and 4th-year enrollments.**

Four of the required general education requirements will be fulfilled by the major requirements listed in the above planner (MF, SI, SR, and DC). In addition to the specific courses shown in these planners, students will also need to complete courses satisfying the following general education requirements: Cross-Cultural Analysis, Ethnicity and Race, Interpreting Arts and Media, Textual Analysis, Perspectives, and Practice.

Sample Transfer Two-Year Planner

This is a sample academic plan for junior transfer students who completed all of the required and some of the highly recommended pre-transfer courses.

Note: Students who did not complete both the required and highly recommended courses prior to transfer will need to follow a different academic plan and may require additional time to degree. The following sample academic plan assumes completion of only the minimum transfer requirements. Please see an academic advisor in the Chemistry and Biochemistry Department to create and review your specific official academic plan.

Sample Transfer Two-Year Planner

	Fall	Winter	Spring	Summer
Entering				KRSG 1T Summer Edge (optional)
1st (junior)	BIOC 100A PHYS 6A & PHYS 6L	BIOC 100B BIOL 105 PHYS 6B & PHYS 6M	BIOC 100C BIOL 101L PHYS 6C and PHYS 6N	
2nd (senior)	BIOL 110 STAT 5	BIOC 163A BIOL 115	BIOC 163B Senior Exit Lab	

UC Transfer Pathway courses:

- General biology with lab (full introductory sequence) BIOL 20A, BIOE 20B, BIOL 20L
- General chemistry with lab (one-year sequence) CHEM 4A & CHEM 4AL, CHEM 4B and CHEM 4BL (or CHEM 3A/CHEM 3B/CHEM 3C, and CHEM 3BL/CHEM 3CL)
- Calculus for STEM majors MATH 11A or MATH 19A and MATH 11B or MATH 19B; MATH 22 (optional)
- Organic chemistry with lab (one-year sequence) CHEM 8A and CHEM 8L, CHEM 8B and CHEM 8M

Courses are subject to being offered in different terms. Please check departmental websites for updates on course offerings.

CHEMISTRY MINOR

For assistance please contact chemistry advising at chemistryadvising@ucsc.edu or visit our department website.

HOW TO DECLARE THE CHEMISTRY MINOR

Students electing a chemistry minor may not use the online petition to declare. The steps to pursue a chemistry minor are as follows:

1. Create a major academic plan and have it signed by the UC Santa Cruz major advisor.
2. Make an appointment with the chemistry minor advisor and send the link for the signed major academic plan to chemistryadvising@ucsc.edu.
3. The chemistry minor advisor will review the major academic plan and will add the chemistry minor courses to the academic plan, if it is viable to do so per

double credit counting, enrollment limitations, and time-to-degree guidelines.

4. The chemistry minor advisor will discuss the chemistry minor plan with the student during their scheduled appointment.

5. Once approved as a viable major/minor plan by both the major/department advisor and the Chemistry minor advisor, the Chemistry minor advisor will sign the academic planning form and they will process the minor declaration.

Note: Students need to declare a major before they can declare a minor. Students should prioritize major coursework over minor coursework when necessary.

General information on double majors and minors may be found here.

Course Requirements

All courses used to satisfy degree requirements in the chemistry minor must be taken for a letter grade.

Lower-Division Courses

Chemistry

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3C	General Chemistry	3
CHEM 3BL	General Chemistry Lab	2
CHEM 3CL	General Chemistry Lab	2
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4AL	Advanced General Chemistry Lab	2
CHEM 4BL	Advanced General Chemistry Lab	2

and these courses:

CHEM 8A	Organic Chemistry	5
CHEM 8B	Organic Chemistry	5
CHEM 8L	Organic Chemistry Laboratory	2
CHEM 8M	Organic Chemistry Laboratory	2

Calculus

One of the following options

	Either these courses	
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
	or these courses	
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

A student may combine the MATH 11 series with the MATH 19 series to complete this portion of the major requirement(s), (for example, a student can take and complete MATH 19A and then take and complete MATH 11B) but must follow the Mathematics Department's Calculus Series Transition Policy.

Plus one of the following options

	Either this course	
MATH 22	Introduction to Calculus of Several Variables	5
	or these courses	
MATH 23A	Vector Calculus	5
MATH 23B	Vector Calculus	5
	OR	
AM 30	Multivariate Calculus for Engineers	5

Physics

PHYS 5A	Introduction to Physics I	5
PHYS 5B	Introduction to Physics II	5
PHYS 5C	Introduction to Physics III	5
PHYS 5M	Introduction to Physics II Laboratory	1
	OR	
PHYS 6A	Introductory Physics I	5
PHYS 6B	Introductory Physics II	5
PHYS 6C	Introductory Physics III	5
PHYS 6L	Introductory Physics I Laboratory	1
PHYS 6M	Introductory Physics II Laboratory	1
PHYS 6N	Introductory Physics III Laboratory	1

A student may combine the PHYS 5 series with the PHYS 6 series to complete this portion of the major requirement(s), while following the Physics Transition policies.

Upper-Division Courses

This course

CHEM 163A	Quantum Mechanics and Basic Spectroscopy	5

Students may substitute BIOC 163A for CHEM 163A.

Plus two of the following courses

CHEM 103	Biochemistry	5

CHEM 110	Intermediate Organic Chemistry with Emphasis on Synthesis and Analytical Methods	5
CHEM 151A	Chemistry of Metals	5

Electives

Plus two chemistry upper-division electives from the following:

BIOC 100A	Biochemistry and Molecular Biology	5
BIOC 100B	Biochemistry and Molecular Biology	5
BIOC 163B	Biochemical Thermodynamics and Statistical Mechanics for Biochemistry and Molecular Biology	5
CHEM 143	Organic Chemical Structure and Reactions	5
CHEM 144	Catalysis In Organic Synthesis Using Metals and Metalloids Based Reagents	5
CHEM 151B	Chemistry of the Main Group Elements	5
CHEM 156C	Materials Chemistry	5
CHEM 163B	Chemical Thermodynamics	5
CHEM 163C	Statistical Thermodynamics and Kinetics	5
CHEM 169	Chemistry and Biology of Drug Design and Discovery	5
CHEM 171	Chemical Biology	5
METX 101	Sources and Fates of Pollutants	5
METX 102	Cell and Molecular Toxicology	5
OCEA 120	Aquatic Chemistry: Principles and Applications	5
OCEA 121	Aqueous Geochemistry	5
PHYS 180	Biophysics	5

Students cannot receive elective credit toward the minor for 1) both BIOC 100A and CHEM 103; 2) both BIOC 163B and CHEM 163B.

Students may also satisfy the elective requirements by completing a chemistry graduate course with the permission of the instructor and department. To do so, please consult with the department undergraduate adviser prior to enrolling.

CHEMISTRY M.S.

Introduction

Note: Applications for the Plan I (thesis) master's degree are not being accepted at this time.

The Department of Chemistry and Biochemistry offers a **Plan II (capstone)** master's degree in which a student may earn the M.S. degree after approximately one year of coursework and a capstone seminar. This program serves the needs of such diverse groups as teachers on sabbaticals, technicians from industry and re-entry students. The Plan II (capstone) M.S. does not require research and is suited to future teachers and others wishing to update or broaden their chemical expertise. The degree can be finished in one year if the student is well prepared to take a full course load. No financial aid is available for this program, although student loans may be available based from the FAFSA (Free Application for Federal Student Aid) program.

Prerequisites: A bachelor of arts (B.A.) or bachelor of science (B.S.) degree in chemistry or biochemistry. Applicants with a bachelor's degree in another discipline must have taken all or most of the courses required for a B.A. or B.S. in chemistry or biochemistry at UC Santa Cruz.

Requirements

Course Requirements

Nine courses are required. Of these, at least seven must be lecture courses offered by chemistry and biochemistry. The remaining two courses may be lecture courses, seminars, or independent study.

Of the seven chemistry and biochemistry lecture courses, at least four must be graduate level (200), but up to three may be advanced undergraduate level (100), excluding CHEM 109-CHEM 110.

The seven lecture courses must include representatives from at least three of the chemistry subdisciplines: biochemistry, inorganic, organic, analytical, and physical. In consultation with the graduate director, it may be determined that a student needs additional preparation to take graduate classes in one of the above subdisciplines. In these cases, the following courses if used for preparation for graduate coursework would not count toward the seven-course total: (CHEM 103, CHEM 143, CHEM 151A, CHEM 163A, CHEM 163B, and CHEM 163C).

For a further description of the courses available, please visit the Graduate Student Handbook.

Capstone Requirement

The candidate is required to present a passing literature seminar on a topic of their choosing, demonstrating the ability to read and critically analyze research data, to organize data into a coherent presentation, and to communicate the information in a clear and logical manner.

Applying for Graduation

M.S. students must complete the Application for the Master's Degree form by the appropriate quarter's deadline listed in the current academic calendar.

The form can be found on the Graduate Division website or can be provided by the Department of Chemistry and Biochemistry. The form should be turned in to the graduate adviser and program coordinator for review and submission to the Graduate Division.

CHEMISTRY PH.D.

Introduction

The Department of Chemistry and Biochemistry offers admitted graduate students access to world-class research while in the pursuit of their Ph.D.s. While the department offers Ph.D.s in two separate tracks, it is important to note that both tracks confer a Ph.D. in chemistry.

CHEM Track:

The Ph.D. in the Department of Chemistry and Biochemistry (CHEM), typically involves internal faculty/labs. Within this Ph.D. program, students have the flexibility to design a course of study focused on personal research interests, and at the same time are expected to maintain the high intellectual standards associated with the doctoral degree. Research options include biochemistry, physical chemistry, biophysical chemistry, inorganic chemistry, bioinorganic chemistry, materials chemistry, physical-organic chemistry, and bioorganic chemistry. Some research groups are interdisciplinary and are involved in two or more of these areas. After successful completion of all of the Ph.D. requirements, students in this track will be awarded a Ph.D. degree in chemistry from the Department of Chemistry and Biochemistry.

CB3 Track:

The Department of Chemistry and Biochemistry also participates in the graduate Program in Biomedical Science and Engineering (PBSE) through its administration of the Chemical Biology, Biochemistry and Biophysics (CB3) training track. Sixty-one faculty members, who come primarily from the Departments of Molecular, Cell, and Developmental Biology; Biomolecular Engineering; Chemistry and Biochemistry; and Microbiology and Environmental Toxicology offer an unusual breadth of expertise and exceptional opportunities in interdisciplinary graduate research training. When students apply to the PBSE they indicate interest in one of four training tracks:

- Biomolecular Engineering and Bioinformatics (BMEB)
- Chemical Biology, Biochemistry, and Biophysics (CB3)
- Microbiology and Environmental Toxicology (METX)
- Molecular, Cell, and Developmental Biology (MCD)

The Ph.D. track in chemical biology, biochemistry and biophysics (CB3) provides students with the opportunity to carry out cutting-edge research at the interface between biology and chemistry. The training program emphasizes analysis of molecular structure and mechanism as well as chemical biology and the use of organic chemistry to address biological questions. Interdisciplinary research is encouraged and supported by a diverse group of faculty.

Students in both tracks will be required to complete their coursework and other milestones to advance to candidacy, after which, they will write and defend their dissertations. After successful completion of all of the Ph.D. requirements, students in both tracks will be awarded a Ph.D. degree in chemistry from the Department of Chemistry and Biochemistry.

Progression and Milestones

Course Requirements

Both CHEM and CB3 tracks prepare students with an in-depth understanding of their area of specialization through a core curriculum that prepares them for advanced study and research. Students are also exposed to areas outside of their specialization with elective courses. Below are the course requirements specific to each track. All students are required to take CHEM 292 and CHEM 296 in their first year. Additionally, all Ph.D. students are required to enroll in CHEM 291 (weekly research seminars) until they advance to candidacy.

CHEM Track

Students in the CHEM track are expected to complete **15 credits of core courses (three courses) and 10 credits (two courses) of electives.** Electives may be either at the graduate level (200 series) or at the advanced undergraduate level (100 series). Twenty of the 25 credits (four 5-credit courses) must be chemistry and biochemistry courses. The remaining 5 credits may be in chemistry and biochemistry or in a related discipline such as molecular, cell, and developmental (MCD) biology; microbiology and environmental toxicology; physics; math; biomolecular engineering; electrical engineering; etc. Eligible electives do not include CHEM 163A/CHEM 163B/CHEM 163C, CHEM 109, CHEM 110, CHEM 110L, CHEM 143 or CHEM 151A, but can include CHEM 124, 151B, and CHEM 169. Completing these 25 lecture course credits is a requirement that must be met before advancing to candidacy. In consultation with their research advisor, students may take more than the required five courses at any time depending on their interests or research.

Please refer to the Graduate Student Handbook for the current core and elective curriculum by area of specialization.

CB3 Track

Students in the CB3 track complete the courses listed below, as well as at least three additional graduate-level lecture courses by the end of the third year. A list of approved elective courses is available on the PBSE-CB3 website

CHEM 200A	Advanced Biochemistry: Biophysical Methods	5
CHEM 200B	Advanced Biochemistry: Macromolecular Structure and	5

	Function	
CHEM 271	Chemical Biology	5
BIOL 289	Practice of Science	5

Teaching Requirement

The focus on high quality undergraduate education is one of the most outstanding features of the UC Santa Cruz campus. Teaching is a job that is taken very seriously and many graduate students and faculty come to UCSC because they want to be in an atmosphere where both teaching and research are important.

Students in the CB3 track are required to serve as a teaching assistant for a minimum of two quarters.

Students in the CHEM track are required to serve as a teaching assistant for a minimum of three quarters.

Committee Requirements

Broadly speaking, all graduate students will interact with three different committees in the pursuit of the degree as listed below.

Dissertation Advising Committee (DAC) - a committee which meets with the student annually to review the student's progress and to advise on thesis research by providing outside viewpoints. The student's research advisor is on the committee as well as a committee chair who must be a tenured faculty member from the Department of Chemistry and Biochemistry, as well as a third faculty member from the department. The committee members help decide when sufficient work has been completed for submission of a thesis. In certain cases, students in the CB3 track may nominate a fourth member to join the committee.

Qualifying Exam Committee - committee that assesses a student's qualifying exam in the second (CHEM track) or third year (CB3 track). Students in both tracks nominate a four-person Qualifying Exam committee.

Members 1 - 3 are track dependent:

- Students in the CB3 track nominate three CB3 faculty members (not to include the research advisor)
- Students in the CHEM track nominate the members of their DAC (chair of DAC and QE committee will **not** be the research advisor)

The fourth committee member of both tracks is an "outside" member, selected in consultation with the student and the research advisor. This member must be a tenured faculty member in an external department at Santa Cruz, a tenured faculty member at a different university, or a scientist at a different institution with a research record comparable to a faculty member with tenure. The nomination of the committee is due to the graduate student advisor no later than 35 days before the scheduled Qualifying Exam and is subject to the approval by the Graduate Division.

Dissertation Reading Committee (DRC) - committee that is responsible for reading, providing critical feedback on, and ultimately approving the written dissertation. The DRC is chaired by the research advisor, and is typically joined by two other faculty members from the Department of Chemistry and Biochemistry. The composition of the DAC and the DRC may be the same, with the important distinction of which faculty member is chair of which committee as stipulated above. In certain cases, students in the CB3 track may nominate a fourth member to join the committee.

First-Year Requirements

Laboratory Rotations

Students in the CHEM track do two, nine-week rotations during fall and winter quarters in the laboratory of two Chemistry and Biochemistry faculty members. Performance in each rotation is graded as satisfactory/unsatisfactory. At the end of each rotation period, students are required to present their project as a short talk to the department.

Students in the CB3 track students do three, seven-week rotations during fall and winter quarters in the laboratory of three PBSE-affiliated faculty members. Performance in each rotation is graded as satisfactory/unsatisfactory. At the end of each rotation period, students are required to present on their project either with a short talk or poster presentation.

Laboratory Placement

Graduate students in both tracks are required to choose their research advisor and join a lab in the spring quarter (by May 1) of their first year. A research advisor is necessary to make progress toward completing dissertation research.

Commitee Formation

Students in the CHEM track need to nominate names for their Dissertation Advising Committee (DAC). All committee names must be nominated by the end of the first spring quarter.

Students in the CB3 track nominate names in the second year.

Second-Year Requirements

Students in the CHEM track are required to pass a 25-minute literature seminar in their fourth or fifth quarter. Students present a second-year seminar on a topic of current interest in published research. The oral presentation is accompanied by a detailed three-page written document that describes the contents of the presentation, and is delivered to the student's DAC.

Students in the CB3 track are required to pass their Ph.D. oral qualifying examination before their Qualifying Exam Committee by the end of the student's sixth quarter. The members of the Qualifying Exam Committee are nominated by the student, subject to approval. Students must demonstrate an expertise in their area of research and include a six-page

NIH-style research strategy and specific aims page on their planned dissertation research. Upon passing that examination, the Dissertation Reading Committee (DRC) is formed. The committee comprises the research advisor plus two other members of the Chemistry and Biochemistry faculty. An outside member from the broader community of PBSE faculty can be requested as an additional member of the DRC. The Dissertation Advising Committee is formalized at the same time, and both committees' memberships will be the same, with differing chairs.

Third-Year Requirements

Students in the CHEM track are required to pass their Ph.D. oral qualifying examination (QE) by the end of their seventh quarter (typically the fall of the third year). The oral QE is given before the Qualifying Exam Committee. The Ph.D. candidate presents (a) a summary of current research results and future directions, and (b) an original research proposal on a chemistry or biochemistry topic. This proposal may either be partially related or unrelated to the candidate's current thesis research. This proposal must be approved by the student's DAC prior to the oral examination. In addition, a detailed six-page research strategy and specific aims page on their written research proposal will be submitted for evaluation to the QE committee. **Upon successful completion of the QE and satisfaction of course requirements, the students advance to candidacy.**

By the end of their ninth quarter (typically the spring of the third year), students in the CB3 track must: (a) present an hour-long public seminar that is based on their dissertation research; and (b) answer questions posed by their DAC. **Upon successful completion of the seminar and satisfaction of course requirements, the students advance to candidacy.**

Advancement to Candidacy

Students in both tracks will have advanced to candidacy when they have completed all progression requirements and other milestones other than defending a dissertation. Both tracks include similar milestones (each detailed in the above ections and distinguished by track):

- Course requirements
- Teaching requirements
- 1st-year requirements
- 2nd-year requirements
- 3rd-year requirements

Note: Students in both tracks are required to be enrolled in at least one quarter between advancing to candidacy and applying to graduate.

Academic Progress Meetings

Students in both tracks will have their academic progress reviewed annually by the graduate program administration each spring term. Progress summaries will be sent to each student and their principal investigator (PI) by the following fall. The summaries will include details of expected requirements for the following year.

Concurrently, students who have advanced to candidacy must meet with their DAC at least once a year, typically during the fall quarter, to report research progress and present an updated prospectus and get advice and guidance for the coming year.

The fourth-year review gives the student an opportunity to focus and plan their research and to begin shaping the final product—the research dissertation. With this goal in mind, the student presents their research progress to the DAC, obtains feedback, and receives guidance on future directions.

Progress discussions and reviews with the DAC are held in the fall quarter of the fifth year and the sixth year, if necessary, until the dissertation is submitted. These meetings' format is the same as described above for the fourth-year review.

Normative Time to Degree

In alignment with Graduate Division guidelines, the department has established six years of normative time to degree. Ph.D. students from both tracks are expected to complete research and write the dissertation within nine quarters after advancing to candidacy following a successful Ph.D. oral QE. Financial support is not available after 18 quarters in the graduate program.

Dissertation and Graduation

Dissertation

As the final requirement for the Ph.D., students from both tracks will write and defend the dissertation, which must be accepted under the rules of the Academic Senate. When the DRC agrees that the research is ready to be submitted, the student writes the dissertation according to the guidelines prescribed by the University Library and the Graduate Division.

Students must submit the doctoral thesis to the DRC for tentative approval at least one month before presenting a defense seminar.

The dissertation, completed in the format specified by the Graduate Council and approved by the DRC, **must be submitted to the Graduate Division no later than the last day of the term in which the degree is to be awarded.**

Dissertation Defense

In addition to the research and writing, the dissertation must be defended. The defense takes the form of a public seminar, where the student presents the principal results of their research to their DRC, as well as any members of the public in attendance. Following the presentation, the committee and other attendees will ask questions of the work. The dissertation defense should be scheduled at least one week prior to submitting the dissertation to the Graduate Division for final processing and graduation (**per the above section, this means the dissertation defense should be scheduled no later than one week before the end of the term in which the degree is to be awarded**).

The DRC makes the final departmental decision regarding the awarding of the Ph.D. degree. The decision is subject to the approval of the graduate dean.

Applying for Graduation

Students close to completing their degree must file an application for the Ph.D. degree by the end of the second week of the quarter in which they wish to graduate (see the Academic and Administrative Calendar for deadline). The application is the student's official notification to the graduate dean of their intent to graduate. This form is available on the Graduate Division's **website.**

COASTAL SCIENCE AND POLICY M.S.

Introduction

Students in the University of California, Santa Cruz's Coastal Science and Policy Program (CSP) are early career leaders in sustainability from across the globe. The program gives students hands-on training, strengthens their networks, and helps them redeploy where they are needed most. Students in this program develop a range of skills, interdisciplinary knowledge, and pragmatic approaches to become more effective leaders at developing practical solutions to coastal sustainability challenges, from watersheds to the open ocean. Small cohorts of students hailing from California, additional U.S. states and other nations experience in-depth interaction with faculty members, professionals and practitioners. The curriculum and composition of student cohorts aim to advance justice, equity, diversity and inclusion in coastal sustainability.

The two-year Master of Science program is tailored for rising leaders to expand their networks and develop interdisciplinary solutions to challenges facing coastal communities and ecosystems. Key program features:

Year 1: Students take interdisciplinary courses and seminars in natural and social sciences, economics, policy analysis, coastal governance, leadership, innovation, and methods for designing scalable solutions to complex problems.

Year 2: Students engage with partner organizations to design and pursue individual capstone projects that build capacity and develop solutions for real problems. Projects may be based globally.

The program focuses on practical training to provide integrated, scalable solutions to social and ecological challenges under five interconnected themes that leverage UCSC's existing leadership in coastal sustainability:

- Coastal Resilience and Climate Change
- Conserving Biodiversity and Sustaining Ecosystem Processes
- Fisheries and Aquaculture
- Coastal Policy
- Justice, Equity, Diversity and Inclusion
- Innovation for Coastal Solutions

Preparation for Graduate Work in Coastal Science and Policy

Students admitted to the Master of Science (M.S.) in Coastal Science and Policy Program will have completed a bachelor's degree at a four-year university in a field relevant to coastal sustainability. Relevant fields are diverse and include the natural sciences (e.g., biology, earth sciences, chemistry, oceanography), social sciences (e.g., economics or business, human ecology, political science, sociology), interdisciplinary programs (e.g., environmental studies and sciences) and engineering. Regardless of undergraduate major and/or minors, specific additional requirements prior to admission include at least one course in writing and one course in statistics; as well as coursework in at least two of the

following three areas: biological sciences, physical sciences, and the social sciences (including policy and economics). Students are not expected to have identified a faculty adviser prior to joining the program. Students from underrepresented and diverse racial, ethnic, cultural, socioeconomic, and disciplinary backgrounds are encouraged to apply. We anticipate that competitive applicants to the program will have additional experience from either post-baccalaureate professional jobs or a combination of coursework, internships, professional jobs and research, in relevant fields.

Requirements

Course Requirements

The Master's of Science in Coastal Science and Policy is a Plan II (capstone project) degree.

Core Courses

The M.S. program will include a core set of three foundational and seven developmental courses.

Foundational Courses

CSP 200	Natural Sciences for Coastal Sustainability	5
CSP 210	Social Sciences for Coastal Sustainability	5
CSP 220	Economics for Coastal Sustainability	5

Developmental Courses

These courses cut across multiple disciplines and will be taught by core faculty, partner practitioner-scientists, and specialist trainers.

CSP 230	Integrated Problem-Based Discussion	
CSP 231A	CSP Year 1 Capstone Planning & Design Fall	2
CSP 231B	CSP Year 1 Capstone Planning & Design Winter	2
ENVS 240	Public Policy and Conservation	5
ENVS 250	Coastal Governance	5
CSP 244	Adaptation and Planning	5
BIOE 262	Facilitating Change in Coastal Science Policy	5

Methods and Elective Courses

M.S. students are also required to take one 5-credit methods course and one 5-credit elective course in their first year. The methods and elective courses can be drawn from courses currently offered across the UCSC campus. The methods course should provide training in quantitative or qualitative research design, tools, and analysis; and help prepare the student for methods used in their capstone project. Electives help broaden the student's disciplinary knowledge. For example, incoming students with an undergraduate degree in the natural sciences (e.g., ecology) may be encouraged to take a graduate-level elective course in the social sciences (e.g., politics, economics).

The methods requirement can be met by taking CSP 241/CSP 241L (cross-listed with BIOE 286/BIOE 286L), another course from the list of approved methods courses found here, or by approval of the program director. The selection of the methods and elective courses will be made in consultation with the student's faculty adviser and program, with final approval from the program director.

CSP 281A	Hacking for Oceans—Lean Design Methods	5
CSP 282	Quantitative Methods for Coastal Climate Resilience	5
BIOE 286	Experimental Design and Data Analysis	5
BIOE 286L	Experimental Design and Data Analysis Lab	2
CSP 297	Independent Study in Coastal Science and Policy	5
CSP 293	Special Topics in Coastal Science and Policy	5
CSP 271	Fisheries Ecology	2
CSP 292	Special Topics in Coastal Science and Policy	2

CSP 271 and CSP 292 are 2-credit courses and, thus, do not satisfy the required 15 credits of method and elective courses.

CSP 271 is taught in spring quarter in odd calendar years.

Other Requirements

Summer Training

During the summer after their first year, M.S. students either begin work on their capstone, engage in a short-term summer placement, or participate in training to build specific skills relevant to their capstone and career. If a student pursues a short-term summer placement, this will consist of working with a non-academic partner to gain practical experience in a field relevant to the student's capstone and career interest and give them firsthand immersion in the processes involved in domestic or international coastal sustainability projects. Placement projects will be required to include: 1) a real concern of the institutional partner, 2) research and/or solutions development and implementation, and 3) strong interdisciplinary elements. A faculty adviser will oversee the summer work. The intent is that, in collaboration with institutional partners and CSP advisers, the summer experience strengthens students' skills to conduct their capstone project or otherwise advances the student's career trajectory.

Capstone Project

In the second year, students implement a capstone project. To earn credit for implementing their capstone, students enroll and fulfill the requirements for CSP 290, Coastal Science and Policy Capstone Project (10 credits/quarter). The project is typically developed during Year 1 of the program in collaboration with a practitioner partner and a CSP faculty adviser or advisers, and with oversight from the program. The project should: a) address a real concern of the non-academic partner; and b) include research, solutions development, and implementation, and be strongly interdisciplinary in nature. A

program team consisting of the student's CSP faculty adviser and practitioner partner mentor will advise on the capstone project, with programmatic guidance from CSP staff. Mid-year (winter, Year 2), students will provide a mid-term written report. In the final quarter (spring, Year 2), students will provide a final written report to the program and give an oral presentation of the capstone project to CSP students, faculty, institutional partners and the public. The final presentations will be required to address the importance and impact of the project on the field, social science and natural science elements of the selected project, project outcomes and relevant next steps.

CSP 290A	Coastal Science and Policy Capstone Project	10
CSP 290B	Coastal Science and Policy Capstone Project	10
CSP 290C	Coastal Science and Policy Capstone Project	10

Capstone Project Seminar

Each quarter of the second year, students will enroll in CSP 291, Coastal Science and Policy Capstone Seminar (2 credits/quarter). This seminar is offered in an interactive workshop format, in which students share and get feedback on dimensions of their capstone projects. Topics by quarter include, but are not limited to:

- **Fall**–project progress and challenges; midterm capstone report preparation (due winter term).
- **Winter**–sharpen capstone's theory of change, refine outcomes and project communications.
- **Spring**–prepare capstone deliverables, final written report, and oral presentation; rehearse public-facing presentation.

Additional topics across all terms may include career and networking skill-building and support, as well as exposure to real-world collaborative initiatives on coastal sustainability issues.

CSP 291	Coastal Science and Policy Capstone Seminar	2

Planners

	Fall	Winter	Spring
1st Year	CSP 200	CSP 242/ ENVS 240	CSP 244
	CSP 210	CSP 243/ENVS 250	Methods or Elective Course
	CSP 220	CSP 231B	Elective Course
	CSP 230	Methods or Elective Course	
	CSP 231A	CSP 245/ BIOE 262	
2nd Year	CSP 290A (10 credits)	CSP 290B (10 credits)	CSP 290C (10 credits)
	CSP 291 (2 credits)	CSP 291 (2 credits)	CSP 291 (2 credits)

[Optional Catchall]

Applying for Graduation

COASTAL SCIENCE AND POLICY PH.D. DESIGNATED EMPHASIS

Introduction

Students in this program will develop a range of skills, interdisciplinary knowledge, and pragmatic approaches to become more effective leaders at developing practical solutions to coastal sustainability challenges, from watersheds to the open ocean. Thematic foci of the program include coastal resilience and climate change, conservation of biodiversity; fisheries and aquaculture; justice, equity, diversity and inclusion; and innovation for coastal solutions. The training also aims to help advance justice, equity, diversity and inclusion in coastal sustainability. A CSP designated emphasis (DE) will serve Ph.D. students who desire to strengthen their ability to directly connect their science to actionable solutions in collaboration with practitioner organizations.

Students obtaining a DE in Coastal Science and Policy, will develop a range of skills, interdisciplinary knowledge, and trans-disciplinary approaches pertinent to creating real-world solutions to current and emerging concerns for coastal sustainability.

Preparation for Designated Emphasis in Coastal Science and Policy

To receive a designated emphasis in Coastal Science and Policy, graduate students must complete the following requirements in addition to the degree requirements for the doctorate in their home department:

Requirements

Ph.D. students apply for the CSP DE (sample application here) ideally during their first year and complete a minimum of three CSP courses (15 credits) prior to proceeding to Ph.D. candidacy. The DE is available only to UC Santa Cruz-enrolled Ph.D. students; master's students are not eligible.

Committee Composition and Departmental

Approvals

The student must have a DE adviser from the CSP core or affiliated faculty. The DE adviser commits to serving on the Ph.D. qualifying exam committee (typically as the outside member), and the dissertation reading committee.

The Ph.D. student's primary faculty adviser, graduate program coordinator/adviser in the student's UCSC home department, and the CSP program must approve participation in the CSP DE. Only applications from registered students in good standing will be approved for the CSP DE.

The student must meet with their DE faculty adviser to develop a coherent plan for meeting the requirements for the CSP DE, preferably before the end of the student's first year. This plan must be approved by the CSP program director.

Course Requirements

Students are required to complete at least three CSP courses including two required courses (CSP 244 and CSP 245 [BIOE 262]).

Courses taken to fulfill Ph.D. degree requirements within the home department will not count toward the designated emphasis program's required coursework.

CSP 244	Adaptation and Planning	5
BIOE 262	Facilitating Change in Coastal Science Policy	5

Additional Courses

Students work with their CSP adviser to review their academic background and select at least one and up to six additional CSP courses (minimum of five additional credits) to assure overall interdisciplinary competence in: social sciences for sustainability, economics for sustainability, natural sciences for sustainability, statistics, coastal governance, and policy analysis. Select courses from the list below:

CSP 200	Natural Sciences for Coastal Sustainability	5
CSP 210	Social Sciences for Coastal Sustainability	5
CSP 220	Economics for Coastal Sustainability	5
BIOE 286	Experimental Design and Data Analysis	5
BIOE 286L	Experimental Design and Data Analysis Lab	2
ENVS 240	Public Policy and Conservation	5
ENVS 250	Coastal Governance	5
CSP 281A	Hacking for Oceans—Lean Design Methods	5
CSP 282	Quantitative Methods for Coastal Climate Resilience	5
CSP 293	Special Topics in Coastal Science and Policy	5
CSP 297	Independent Study in Coastal Science and Policy	5

CSP offers two additional 2-credit courses that are open to students from any discipline including CSP DEs. CSP 271, Fisheries Ecology (taught in spring quarter in odd years), and when available CSP 292, Special Topics in Coastal Science and Policy. While we encourage students to take these courses, they cannot be taken to fulfill the required DE course requirements.

Writing, Research and/or Teaching Requirements

Ph.D. students must work closely with a non-academic practitioner partner (e.g., from a government, business, or non-profit entity) on one interdisciplinary and solution-oriented dissertation chapter on a coastal sustainability issue. In-depth interaction with the practitioner is necessary in the conceptual formation and execution of the work to be reported in the chapter (i.e., the student cannot solely receive and analyze data from the collaborating practitioner).

The CSP program, via core courses, workshops, and mentoring by CSP faculty, provides substantial guidance on how to collaborate with partners in a manner that fits well with the dissertation research process. This requirement ensures that the student's work will bring their knowledge to action, addresses real-world challenges and implements new, cutting-edge solutions.

Environmental Studies B.A. (p. 739)

Chemistry B.S. (p. 289)

Ecology and Evolutionary Biology B.S. (p. 360)

Science Education B.S. (p. 490)

The Earth and Planetary Sciences Department teaches and conducts research in a wide array of topics. We seek to answer questions such as:

- How did the Earth form? How has it evolved since then? What makes up the interior of the Earth? How were Earth's ocean and atmosphere generated, and how have they changed through time?
- What is the history of life on Earth? What are the causes and effects of past mass extinctions?
- How do mountain ranges form? What causes earthquakes? What causes island chains to form? What controls the evolution of glaciers? How do we prevent coastal erosion? How well can we predict tsunamis?
- What has Earth's climate been like in the past? How will climate change in the future? What changes are likely in Earth's atmospheric properties?
- What controls the supply and quality of our freshwater resources?
- How are other planets in our solar system different from Earth? How did they evolve to their present state? How have the impacts of asteroids on Earth and other planets affected their evolution?

A variety of methods and tools are used to help us address these questions. Geologists examine rocks and geologic formations in order to understand the processes that control their formation and evolution. Geochemists and mineralogists examine the chemical and mineral composition of rocks, sediments, and fossils using a variety of sophisticated analytical instruments. Geophysicists use seismometers to not only record earthquakes, but also to learn about the deeper parts of the Earth, which are studied in tandem using high-pressure experiments. Environmental scientists collect samples of the atmosphere, rivers, lakes, and the oceans, sometimes requiring the use of aircraft and ships. Spacecraft have visited and explored all of the planets in our solar system. Space-based satellites have provided a massive amount of data about Earth over the past few decades. Scientists from all disciplines use computer models to help them understand these complex systems.

The Department of Earth and Planetary Sciences offers a number of degrees that teach undergraduate and graduate students the knowledge and skills necessary to address these and many other questions.

Graduates of our department continue on to a variety of careers, such as:

- Business and industry
- Geological and environmental consulting
- Governmental agencies at the federal, state, and local level
- Non-profit organizations
- Research at universities, governmental research institutions, or other scientific agencies
- Graduate/professional school in areas such as science, engineering, teaching, law, public health, business

For more information about the people in the department, their areas of interest, departmental facilities, contact emails and phone numbers, and how to apply to join our department as an undergraduate or graduate student, please see our website.

UNDERGRADUATE PROGRAM

Along with the general Earth sciences major, we offer degrees with concentrations in geology, geophysics, ocean sciences, and planetary sciences. We also offer a combined major with anthropology, and a minor in Earth sciences is also available. We offer courses across a wide range of topics, allowing students to tailor the curriculum to their interests. Courses are comprised of not only classroom lectures, but frequently field trips, laboratories, and computer exercises are involved. Many related courses are offered by other departments such as Ocean Sciences, Microbiology and Environmental Toxicology, Environmental Studies, Biological Sciences, Chemistry and Biochemistry, and Astronomy and Astrophysics. The university capstone requirement is often fulfilled by attending the departmental field camp, or by completing a senior research thesis, but other choices are also possible.

Classes suitable for non majors: EART 1, EART 2, EART 3, EART 5, EART 7, EART 8, EART 10, EART 11, EART 12, EART 20, EART 30, EART 32, EART 66.

GRADUATE PROGRAM

The graduate program in the Earth and Planetary Sciences Department is designed to prepare students for research, industry, consulting, teaching, and numerous other career paths, including business and law. The aim is to develop habits of critical analysis and thorough documentation; skills in quantitative field, computational, and/or laboratory research; and proficiency in one or more fields of research. The fundamental requirements for admission to the program are substantial evidence of superior scholarship, dedication and determination to do quality work, and aptitude for original research. Preparation in the basic sciences equivalent to the requirements for the Earth sciences bachelor's degree at UC Santa Cruz is expected and, for non-undergraduate Earth sciences majors, achieving breadth of knowledge across the Earth and planetary sciences is expected. Excellent scholars from other disciplines, including chemistry, physics, engineering, biology, environmental sciences, or astronomy are both eligible and encouraged to apply. Gaps in knowledge can be made up through coursework.

UC Santa Cruz awards both the Master of Science (M.S.) and the Doctor of Philosophy (Ph.D.) degrees. The M.S. degree may be the terminal degree for some seeking careers in industry, government, and teaching at the secondary level. It may also be an initial step toward the Ph.D. degree, in which

the student gains knowledge and confidence in carrying out and completing a more complex scientific project.

EARTH SCIENCES B.S.

Information and Policies

Introduction

The bachelor of science (B.S.) program is designed for students who intend to pursue professional careers in Earth and planetary sciences, engineering, policy, law, teaching, or business or who otherwise desire the broad, quantitative training available at the University of California, Santa Cruz. In addition to providing comprehensive preparation in the basic physical sciences, and particular breadth and depth in Earth and planetary sciences, the curriculum is structured to prepare students for the competitive graduate school and career marketplace.

The core of the major includes calculus, physics, chemistry, and a group of comprehensive Earth and planetary sciences courses. For the general B.S., students then select at least six additional courses from a diverse list of upper-division electives, with at least two that involve significant laboratory or field data acquisition and analysis. These electives, often in combination with additional upper-division courses from this and related departments, provide the student with expertise in one or more subdisciplines within Earth sciences.

Elective distributions can be designed to emphasize earthquake and faulting studies, Earth surface processes, Earth system sciences, geologic hazards, geology, crustal and deep-Earth geophysics, marine geophysics, and water resources. Four formal concentrations, all with specific course requirements and leading to an Earth and planetary sciences B.S., are available: geology, geophysics, ocean sciences, and planetary sciences. A senior comprehensive experience (senior thesis, geologic field camp, or intensive capstone course) is required of all majors.

Program Learning Outcomes

Students graduating with a B.S. in Earth and planetary sciences (all concentrations) should be able to:

1. understand the processes governing the properties and evolution of Earth's interior and surface;
2. identify rocks and minerals, and describe their connection to geologic processes;
3. utilize algebraic mathematical tools to quantitatively address questions in the geosciences; and
4. write in a clear, organized, and logical fashion using disciplinary standards for reporting and citation.

Academic Advising for the Program

Academic advising is available at the Department of Earth and Planetary Sciences (EPS) undergraduate advising office located in the Earth and Marine Sciences Building, and via email at epsadvising@ucsc.edu. The EPS undergraduate web pages contain information on all aspects of major advising including: academic planning, upper- and lower-division course descriptions, enrichment opportunities in the major like study abroad and undergraduate research, and how to make an appointment with an adviser. Each student should become familiar with the information posted on the website; for further assistance, contact the EPS undergraduate adviser at epsadvising@ucsc.edu. Transfer students should consult Getting Started in the Major: Transfer Students for more detailed information about academic advising.

Getting Started in the Major: Frosh

This major is not highly sequential or course intensive. Although it is advisable to begin taking courses toward the major in the first year, it is not required. Students begin with general chemistry and mathematics, and an introductory course in physical geology.

Math placement is required for one or more of the foundational courses for this major. For more information, please review the Math Placement website.

Courses completed at a community college or four year university and/or advanced placement (AP) course equivalencies may be used to fulfill prerequisites.

Every proposed Earth science student will receive emails about advising and first quarter enrollment during the summer. Students with further questions about what to enroll in should email the Earth and Planetary Sciences undergraduate adviser at epsadvising@ucsc.edu.

Transfer Information and Policy

Transfer Admission Screening Policy

The following Transfer Screening policy takes effect in fall 2024 and will be mandatory for all transfer students entering UC Santa Cruz fall 2026 and later. Transfer students entering UCSC prior to fall 2026 are encouraged to complete these requirements, but are not required to meet them.

The Earth and Planetary Sciences Department welcomes applications from transfer students who are prepared to enter as Earth sciences majors. Students should reference assist.org to determine course equivalencies.

Transfer students planning on attending UC Santa Cruz to pursue an Earth sciences major should contact the undergraduate adviser for transfer preparation information and reference assist.org to determine which courses are equivalent to these required courses. Having this coursework completed prior to transferring allows students greater flexibility in scheduling and completing their major.

Take one of the following courses:

To be considered for admission as a proposed Earth Sciences B.S. major, transfer students must complete one of the following courses with a grade of C or better or their equivalents prior to transfer, by the end of the spring term for students planning to enter in the fall.

MATH 11A	Calculus with Applications	5

MATH 19A	Calculus for Science, Engineering, and Mathematics	5

Recommended Courses

In addition, the following courses are recommended prior to transfer to ensure timely graduation:

CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3BL	General Chemistry Lab	2
CHEM 3C	General Chemistry	3
CHEM 3CL	General Chemistry Lab	2
MATH 11B	Calculus with Applications	5
PHYS 5A	Introduction to Physics I	5
PHYS 5B	Introduction to Physics II	5
PHYS 5M	Introduction to Physics II Laboratory	1
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics I Laboratory	1
PHYS 6B	Introductory Physics II	5
PHYS 6M	Introductory Physics II Laboratory	1

Note: The CHEM requirement may also be satisfied with prior completion of CHEM 1A, CHEM 1C, and CHEM 1N or equivalent.

Previous to July 1, 2023, the General Chemistry series, offered by the Department of Chemistry and Biochemistry, was listed in the General Catalog as CHEM 1A, CHEM 1B and CHEM 1C, with associated laboratories CHEM 1M and CHEM 1N. As of academic year 2023-24, this series was replaced with two distinct series: CHEM 3A, CHEM 3B and CHEM 3C, with labs CHEM 3BL and CHEM 3CL; or CHEM 4A and CHEM 4B with labs CHEM 4AL and CHEM 4BL. Descriptions of these two series are given here.

Plus one of the following options:

	Either these courses	
EART 5	California Geology	5
EART 5L	California Geology Laboratory	1
	or these courses	
EART 10	How the Earth Works	5
EART 10L	Geologic Principles Laboratory	1
	or these courses	
EART 20	Environmental Geology	5
EART 20L	Environmental Geology Laboratory	1

Getting Started in the Major: Transfer Students

Once you have submitted your intent to register at UC Santa Cruz, here is a step-by-step guide to transferring your coursework and enrolling:

1. **Confirm you are a proposed Earth sciences major.** If you are not sure of your status, log on to your MyUCSC portal to view your proposed major. If your major is proposed Earth sciences you are all set. If the proposed major listed is not Earth sciences, you will need to meet with the adviser for Earth sciences.
2. **Once your courses have been articulated, you will receive an email from our office.** This email will include suggestions for summer or fall enrollment, and invite you to make an appointment to talk with the EPS major adviser.
3. **Make an appointment to talk to an adviser.** Your confirmation email will include instructions for scheduling an advising appointment. Appointments are available either over Zoom or in person.
4. **Participate in Transfer Orientation and Welcome Week.** Transfer Orientation provides instructions on how to transfer your coursework to UC Santa Cruz, the advising and support available, and how to enroll. Our online transfer orientation provides all the critical information you need to transition to UCSC and begin your major coursework.
   The department also hosts a transfer student welcome in the fall that provides new transfer students an opportunity to meet other transfer students, familiarize themselves with the campus and the available resources. Welcome Week includes presentations on the Earth sciences majors, including an overview of the field courses offered and an introduction on how to get involved in undergraduate research.
5. **Declaring the Earth Sciences major.** In order to declare the Earth sciences major transfer students must complete EART 5/EART 5L, or EART 10/EART 10L or EART 20/EART 20L or an approved equivalent course (with a C or better) and have a signed and approved academic plan on file by the campus declaration deadline.

Major Qualification Policy and Declaration Process

Petition to declare your major as soon as you have met qualification requirements and/or reach your declaration deadline quarter, whichever comes first.

Major Qualification

To qualify for the Earth sciences B.S. (including all concentrations within the major), a student must complete (with a minimum grade of C) one of the following introductory courses and associated lab in physical geology:

	Either these courses	
EART 5	California Geology	5
EART 5L	California Geology Laboratory	1
	or these courses	
EART 10	How the Earth Works	5
EART 10L	Geologic Principles Laboratory	1
	or these courses	
EART 20	Environmental Geology	5
EART 20L	Environmental Geology Laboratory	1

Transfer students may take an approved substitution for one of the above course combinations and should consult assist.org for equivalencies. Transfer students should also review the Transfer and Information Policy section for information about major qualifications.

Appeal Process

If a student completes major qualification courses but does not meet the major qualification criteria, and appeals, the department may accept or reject the appeal or place conditions on the student that will be resolved within at most one more enrolled quarter.

Students who are informed that they are not eligible to declare the major may appeal by submitting a letter to the Earth and Planetary Sciences advisor within 15 days from the date the notification was sent. Within 15 days of receipt of the appeal, the department will notify the student and their affiliated college of the decision.

How to Declare a Major

Petition to declare your major as soon as you have met qualification requirements and/or reach your declaration deadline quarter, whichever comes first.

Students who wish to declare the Earth science major start the process by scheduling an appointment with the department staff adviser to create an academic plan. Once academic planning has been completed students submit the online major declaration petition to begin the major declaration process.

Letter Grade Policy

All courses used to satisfy requirements for the Earth sciences B.S. must be taken for a letter grade with the exception of EART 195, EART 198, EART 199 and OCEA 199. These courses may be taken pass/no pass.

Course Substitution Policy

Relevant courses taken at UC Santa Cruz or other institutions may be substituted for degree requirements by approved petition. Please see the undergraduate adviser for the substitution petition form and more information about this process.

Double Majors and Major/Minor Combinations Policy

Students interested in pursuing multiple majors within the Earth and environmental sciences may NOT declare the following combination of majors:

- Earth Sciences B.S. and Earth Sciences Minor
- Any combination of the following: Earth Sciences B.S., Environmental Sciences B.S., Earth Sciences/Anthropology Combined Major B.A.

Should a student choose to double major, they must qualify for and complete the disciplinary communication and comprehensive requirements for each of the majors.

Honors

Honors in the major (all concentrations) and in the combined major with anthropology are determined by a review of grades (typically 3.50 or above) at the time a student applies for graduation. A faculty committee makes the decision based on the quality of all coursework, but especially in the courses required for the major. Extra coursework or independent study as well as more intensive or rigorous coursework and the quality of a capstone project may also be taken into consideration. Honors in the combined major with environmental studies are evaluated by the Environmental Studies Department. Highest honors may also be awarded in exceptional cases when a student's overall grade point average (GPA) is above 3.75 and performance in the senior capstone requirement is equally outstanding. The department reserves the right to withhold honors and highest honors based on other criteria, such as an incident of academic dishonesty.

Honors on the senior thesis are determined independently of major honors, and must be approved by two faculty readers.

[Optional Catchall]

General Earth Sciences Major

Course Requirements

Lower-Division Courses

Some courses may be satisfied via exam credit.

Choose one of the following options:

	Either these courses	
EART 5	California Geology	5
EART 5L	California Geology Laboratory	1
	or these courses	
EART 10	How the Earth Works	5
EART 10L	Geologic Principles Laboratory	1
	or these courses	
EART 20	Environmental Geology	5
EART 20L	Environmental Geology Laboratory	1

Plus one of the following options:

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3BL	General Chemistry Lab	2
CHEM 3C	General Chemistry	3
CHEM 3CL	General Chemistry Lab	2
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4AL	Advanced General Chemistry Lab	2
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5

CHEM 4BL	Advanced General Chemistry Lab	2

Note: This requirement may also be satisfied with prior completion of CHEM 1A, CHEM 1B, CHEM 1C, CHEM 1M, and CHEM 1N or equivalent.

Previous to July 1, 2023, the General Chemistry series, offered by the Department of Chemistry and Biochemistry, was listed in the General Catalog as CHEM 1A, CHEM 1B and CHEM 1C, with associated laboratories CHEM 1M and CHEM 1N. As of academic year 2023-24, this series was replaced with two distinct series: CHEM 3A, CHEM 3B and CHEM 3C, with labs CHEM 3BL and CHEM 3CL; or CHEM 4A and CHEM 4B with labs CHEM 4AL and CHEM 4BL. Descriptions of these two series are given here.

Plus one of the following options:

	Either these courses	
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
	or these courses	
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

Plus one of the following courses:

MATH 22	Introduction to Calculus of Several Variables	5
MATH 23A	Vector Calculus	5
EART 111	Mathematics in the Earth Sciences	5
EART 125	Statistics and Data Analysis in the Geosciences	5
EART 119A	Introduction to Scientific Programming	5

Students that have completed a prior course in programming or statistics may petition for equivalency.

Plus all of the following courses:

PHYS 6A	Introductory Physics I	5
PHYS 6B	Introductory Physics II	5
PHYS 6L	Introductory Physics I Laboratory	1
PHYS 6M	Introductory Physics II Laboratory	1

Upper-Division Courses

All of the following courses:

EART 110A	Evolution of the Earth	7
EART 110B	Earth as a Chemical System	5
EART 110M	Earth as a Chemical System Laboratory	2
EART 110C	The Dynamic Earth	5
EART 110N	The Dynamic Earth Laboratory	2

Two field/laboratory/data analysis courses

Lecture/lab combinations count as one course. If a lecture has a lab offered (required or optional), the lab must be passed to count for this requirement. The following courses satisfy this requirement:

EART 109	Elements of Field Geology	5
EART 109L	Field Geology Laboratory	2
EART 116	Hydrology	5
EART 119A	Introduction to Scientific Programming	5
EART 120	Sedimentology and Stratigraphy	5
EART 120L	Sedimentology and Stratigraphy Laboratory	2
EART 125	Statistics and Data Analysis in the Geosciences	5
EART 130	Igneous and Metamorphic Petrology	5
EART 130L	Igneous and Metamorphic Petrology Laboratory	2
EART 140	Geomorphology	5
EART 140L	Geomorphology Laboratory	2
EART 142	Engineering Geology for Environmental Scientists	5
EART 146	Groundwater	5
EART 148	Glaciology	5
EART 150	Structural Geology	5
EART 150L	Structural Geology Laboratory	2
EART 189A	Geographic Information Systems with Applications in Earth Sciences	5
EART 189B	Summer Field Study	5
EART 191C	Practical Geophysics	5
EART 191D	Practical Geochemistry	5

Courses used to satisfy the senior comprehensive requirement cannot be used to satisfy this requirement.

Electives

Students take four upper-division Earth sciences or ocean sciences courses of 5 or more credits, chosen from EART 100-199 (excluding EART 196B and EART 198) or OCEA 100-199. No more than one quarter of EART 199 or OCEA 199 may be used as an elective. Lecture/lab combinations count as one course. If a lecture has a lab offered (required or optional), the lab must be passed to count for this requirement.

ENVS 115A and ENVS 115L are open to Earth science students with permission of the instructor, and taken together are approved as one elective.

Students are encouraged to take more than the minimum number of elective courses and may craft an elective distribution from many areas of specific research and career interests.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) general education requirement. Students in the Earth Sciences B.S. major must complete a minimum of two (2) courses from the list of courses that in combination satisfies the DC general education requirement. Courses taken to satisfy the DC requirement may also satisfy upper-division elective or senior comprehensive requirements. Consult one of the Earth and planetary sciences advisors for the most up-to-date list of scheduled classes. Currently the list (subject to change) consists of:

EART 100	Vertebrate Paleontology	5
EART 101	Invertebrate Paleobiology	5
EART 102	Marine Geology	5
EART 104	Geologic Hazards	5
EART 109	Elements of Field Geology	5
EART 120	Sedimentology and Stratigraphy	5
EART 140	Geomorphology	5
EART 146	Groundwater	5
EART 148	Glaciology	5
EART 150	Structural Geology	5
EART 160	Planetary Science	5
EART 189B	Summer Field Study	5
EART 191	Earth Sciences Capstone Seminar	5
EART 191C	Practical Geophysics	5
EART 191D	Practical Geochemistry	5
EART 195	Senior Thesis	5

Comprehensive Requirement

All students must satisfy the senior comprehensive requirement. The intent of this requirement is to synthesize knowledge and skills from a student's undergraduate career. Therefore, prior to completing an activity to satisfy the senior comprehensive requirement, students should have already completed EART 110A, one of EART 110B or EART 110C, and three other upper-division courses that fulfill major requirements. Students should consult an advisor if they have any questions about the timing of their proposed comprehensive requirement activity. Enrollment in the senior comprehensive is by petition or application.

Note: Courses used to satisfy the senior comprehensive requirement cannot be used to satisfy the upper-division elective requirement or the field/laboratory/data analysis requirement.

To satisfy the comprehensive requirement, each student in these majors must complete one of the following options:

Satisfactory completion of Summer Field

EART 189A	Geographic Information Systems with Applications in Earth Sciences	5
EART 189B	Summer Field Study	5

Satisfactory completion of a senior thesis

A senior thesis must include a significant element of independent research or original work and can only be undertaken after an agreement is obtained from a faculty member to supervise it. It is recommended that students allocate three quarters for the thesis process.

Students may take EART 199, Independent Study, as part of performing the research for their senior thesis. It is required that each student enroll in and pass EART 195: Senior Thesis, in the academic quarter during which they complete their thesis.

EART 195	Senior Thesis	5

Satisfactory completion of one of the following capstone course offerings:

EART 191	Earth Sciences Capstone Seminar	5
EART 191B	Planetary Capstone	5
EART 191C	Practical Geophysics	5
EART 191D	Practical Geochemistry	5

Capstone course offerings vary year to year. If you are interested in completing a capstone course please contact the Earth sciences adviser.

Other Options

Other options such as external field research experiences or internships may be suitable by permission of the faculty adviser.

Please meet with an adviser if you have an idea to propose.

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Students planning a professional career in the Earth and planetary sciences should take more than the minimum number of courses required for the major if possible. Four-year students have ample flexibility to take additional electives if they begin with the required courses in their second year. Junior transfers also have flexibility if they have taken most of their preparatory courses in calculus, chemistry, and physics before entry. Further advice can be obtained from the undergraduate adviser and from faculty members.

Sample Four-Year Planner

Year	Fall	Winter	Spring
1st (frosh)	CHEM 3A	MATH 11A or MATH 19A	MATH 11B or MATH 19B
		CHEM 3B CHEM 3BL	CHEM 3C CHEM 3CL
		**EART 10 EART 10L	
2nd (soph)	EART 110A*	EART 110B EART	PHYS 6B PHYS 6M

		110M*	
	MATH 23A or EART 111	PHYS 6A PHYS 6L	
3rd (junior)	EART elective	EART elective	EART 110C EART 110N
			EART elective
4th (senior)	EART elective	EART elective	EART 189A* or senior thesis
	(sr thesis only) EART 199†	(sr thesis only) EART 199†	(EART 195)†
	EART elective		

In addition to the specific courses shown in these planners, a student must complete courses satisfying the CC, ER, IM, SR, and TA general education requirements.

*Students who wish to complete their capstone with EART 189A and EART 189B should be aware that the following courses are prerequisites: EART 109 and EART 109L, EART 110A, and EART 110B and EART 110M. Students must also complete EART 189B in summer to fulfill the summer field capstone.

** EART 5, 10, 20 and corresponding labs are interchangeable.

†Students expecting to write a senior thesis for their comprehensive requirement are required to contact the department at least three quarters before graduation to identify the intended project and faculty adviser. Senior theses usually require at least two or three quarters for completion.

Sample Transfer (Two-Year) Planner

This planner assumes that students have completed all general education courses and all lower-division requirements, other than PHYS 6A and PHYS 6L, PHYS 6B and PHYS 6M, and advanced math/programming/statistics.

Year	Fall	Winter	Spring
1st (junior)	EART 111	PHYS 6A PHYS 6L	PHYS 6B PHYS 6M
	EART 110A*	EART 110B EART 110M*	EART 110C EART 110N
2nd (senior)	EART elective	EART elective	EART elective
	EART elective	EART elective	EART elective
	(Sr thesis only) EART 199†	(Sr thesis only) EART 199†	EART 189A* or senior thesis (EART 195)†

*Students who wish to complete their capstone with EART 189A and EART 189B should be aware that the following courses are prerequisites: EART 109 and EART 109L, EART 110A, and EART 110B and EART 110M. Students must also complete EART 189B in summer to fulfill the summer field capstone.

†Students expecting to write a senior thesis for their comprehensive requirement are required to contact the department at least three quarters before graduation to identify the intended project and faculty adviser. Senior theses usually require at least two or three quarters for completion.

Geology Concentration

Course Requirements

Lower-Division Courses

Some courses may be satisfied via exam credit.

Choose one of the following options:

	Either these courses	
EART 5	California Geology	5
EART 5L	California Geology Laboratory	1
	or these courses	
EART 10	How the Earth Works	5
EART 10L	Geologic Principles Laboratory	1
	or these courses	
EART 20	Environmental Geology	5
EART 20L	Environmental Geology Laboratory	1

Plus one of the following options:

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3BL	General Chemistry Lab	2
CHEM 3C	General Chemistry	3
CHEM 3CL	General Chemistry Lab	2
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4AL	Advanced General Chemistry Lab	2

CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4BL	Advanced General Chemistry Lab	2

Note: This requirement may also be satisfied with prior completion of CHEM 1A, CHEM 1B, CHEM 1C, CHEM 1M, and CHEM 1N or equivalent.

Previous to July 1, 2023, the General Chemistry series, offered by the Department of Chemistry and Biochemistry, was listed in the General Catalog as CHEM 1A, CHEM 1B and CHEM 1C, with associated laboratories CHEM 1M and CHEM 1N. As of academic year 2023-24, this series was replaced with two distinct series: CHEM 3A, CHEM 3B and CHEM 3C, with labs CHEM 3BL and CHEM 3CL; or CHEM 4A and CHEM 4B with labs CHEM 4AL and CHEM 4BL. Descriptions of these two series are given here.

Plus one of the following options:

	Either these courses	
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
	or these courses	
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

Plus all of the following courses:

PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics I Laboratory	1
PHYS 6B	Introductory Physics II	5
PHYS 6M	Introductory Physics II Laboratory	1

Upper-Division Courses

All of the following courses:

EART 109	Elements of Field Geology	5
EART 109L	Field Geology Laboratory	2
EART 110A	Evolution of the Earth	7
EART 110B	Earth as a Chemical System	5
EART 110M	Earth as a Chemical System Laboratory	2
EART 110C	The Dynamic Earth	5
EART 110N	The Dynamic Earth Laboratory	2
EART 120	Sedimentology and Stratigraphy	5
EART 120L	Sedimentology and Stratigraphy Laboratory	2
EART 150	Structural Geology	5
EART 150L	Structural Geology Laboratory	2

Geology Elective: One of the following:

Where the lab course follows a lecture course the pair of courses counts as a single course.

EART 100	Vertebrate Paleontology	5
EART 100L	Vertebrate Paleontology Laboratory	2
EART 101	Invertebrate Paleobiology	5
EART 101L	Invertebrate Paleobiology Laboratory	1
EART 140	Geomorphology	5
EART 140L	Geomorphology Laboratory	2
EART 142	Engineering Geology for Environmental Scientists	5
EART 146	Groundwater	5

Electives

Students take two upper-division Earth sciences or ocean sciences courses of 5 or more credits, chosen from EART 100-199 (excluding EART 196B and EART 198) or OCEA 100-199. No more than one quarter of EART 199 or OCEA 199 may be used as an elective. Lecture/lab combinations count as one course. If a lecture has a lab offered (required or optional), the lab must be passed to count for this requirement.

ENVS 115A and ENVS 115L are open to Earth science students with permission of the instructor, and taken together are approved as one elective.

Students are encouraged to take more than the minimum number of elective courses and may craft an elective distribution from many areas of specific research and career interests.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) general education requirement. Students in the Earth Sciences B.S. major must complete a minimum of two (2) courses from the list of courses that in combination satisfies the DC general education requirement. Courses taken to satisfy the DC requirement may also satisfy upper-division elective or senior comprehensive requirements. Consult one of the Earth and planetary sciences advisers for the most up-to-date list of scheduled classes. Currently the list (subject to change) consists of:

EART 100	Vertebrate Paleontology	5
EART 101	Invertebrate Paleobiology	5
EART 102	Marine Geology	5
EART 104	Geologic Hazards	5
EART 109	Elements of Field Geology	5
EART 120	Sedimentology and Stratigraphy	5
EART 140	Geomorphology	5
EART 146	Groundwater	5
EART 148	Glaciology	5
EART 150	Structural Geology	5
EART 160	Planetary Science	5
EART 189B	Summer Field Study	5
EART 191	Earth Sciences Capstone Seminar	5

EART 191C	Practical Geophysics	5
EART 191D	Practical Geochemistry	5
EART 195	Senior Thesis	5

Comprehensive Requirement

All students must satisfy the senior comprehensive requirement.

The intent of this requirement is to synthesize knowledge and skills from a student's undergraduate career and to provide the instructional hours in the field needed to prepare students for the California professional geologist licensing requirements. Therefore, prior to completing an activity to satisfy the senior comprehensive requirement, students should have already completed EART 110A, one of EART 110B or EART 110C, and three other upper-division courses that fulfill major requirements. Students should consult an advisor if they have any questions about the timing of their proposed comprehensive requirement activity. Enrollment in the senior comprehensive is by petition or application.

Note: Courses used to satisfy the senior comprehensive requirement **cannot** also be used to fulfill the upper-division elective requirement.

To do so, each student in the geology concentration must complete:

Satisfactory completion of Summer Field

EART 189A	Geographic Information Systems with Applications in Earth Sciences	5
EART 189B	Summer Field Study	5

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Students planning a professional career in the Earth and planetary sciences should take more than the minimum number of courses required for the major if possible. Four-year students have ample flexibility to take additional electives if they begin with the required courses in their second year. Junior transfers also have flexibility if they have taken most of their preparatory courses in calculus, chemistry, and physics before entry. Further advice can be obtained from the undergraduate adviser and from faculty members.

Sample Four-Year Planner

Year	Fall	Winter	Spring
1st (frosh)	CHEM 3A	CHEM 3B CHEM 3BL	CHEM 3C CHEM 3CL
	EART 5 EART 5L	MATH 11A or MATH 19A	MATH 11B or MATH 19B
2nd (soph)	EART 110A	EART 110B EART 110M	EART 109 EART 109L
		PHYS 6A PHYS 6L	PHYS 6B PHYS 6M
3rd (junior)	Upper-division elective	Geology elective	EART 110C EART 110N
			EART 120 EART 120L
4th (senior)	EART 150 EART 150L	Upper-division elective	EART 189A*

EART 5, 10, 20 and corresponding labs are interchangeable.

* Students must also complete EART 189B in summer to fulfill the summer field capstone.

Sample Two-Year Planner

This planner assumes that students have completed all lower-division requirements other than PHYS 6A and PHYS 6L, PHYS 6B and PHYS 6M.

Year	Fall	Winter	Spring
1st (junior)	Geology elective	PHYS 6A PHYS 6L	PHYS 6B PHYS 6M
	EART 110A	EART 110B EART 110M	EART 109 EART 109L
2nd (senior)	EART 150 EART 150L	Upper-division elective	EART 120 EART 120L
		Upper-division elective	EART 110C EART

	110N	
	EART 189A*	

*Students must also complete EART 189B in summer to fulfill the summer field capstone.

Planetary Sciences Concentration

The planetary sciences concentration is designed to provide students with a quantitative background appropriate for career pathways in the interdisciplinary study of planets and their satellites. The upper-division elective courses can be tailored for students interested in planetary interiors, atmospheres, and/or surfaces.

Course Requirements

Lower-Division Courses

Some courses may be satisfied via exam credit.

Choose one of the following options:

	Either these courses	
EART 5	California Geology	5
EART 5L	California Geology Laboratory	1
	or these courses	
EART 10	How the Earth Works	5
EART 10L	Geologic Principles Laboratory	1
	or these courses	
EART 20	Environmental Geology	5
EART 20L	Environmental Geology Laboratory	1

Plus one of the following options:

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3BL	General Chemistry Lab	2
CHEM 3C	General Chemistry	3
CHEM 3CL	General Chemistry Lab	2
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4AL	Advanced General Chemistry Lab	2
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4BL	Advanced General Chemistry Lab	2

Note: This requirement may also be satisfied with prior completion of CHEM 1A, CHEM 1B, CHEM 1C, CHEM 1M, and CHEM 1N or equivalent.

Previous to July 1, 2023, the General Chemistry series, offered by the Department of Chemistry and Biochemistry, was listed in the General Catalog as CHEM 1A, CHEM 1B and CHEM 1C, with associated laboratories CHEM 1M and CHEM 1N. As of academic year 2023-24, this series was replaced with two distinct series: CHEM 3A, CHEM 3B and CHEM 3C, with labs CHEM 3BL and CHEM 3CL; or CHEM 4A and CHEM 4B with labs CHEM 4AL and CHEM 4BL. Descriptions of these two series are given here.

Plus one of the following options:

	Either these courses	
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
	or these courses	
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5

Plus one of the following courses:

MATH 22	Introduction to Calculus of Several Variables	5
MATH 23A	Vector Calculus	5
EART 111	Mathematics in the Earth Sciences	5

Plus all of the following courses:

PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics I Laboratory	1
PHYS 6B	Introductory Physics II	5
PHYS 6M	Introductory Physics II Laboratory	1

Upper-Division Courses

All of the following courses:

EART 110A	Evolution of the Earth	7
EART 110B	Earth as a Chemical System	5
EART 110M	Earth as a Chemical System Laboratory	2
EART 110C	The Dynamic Earth	5
EART 110N	The Dynamic Earth Laboratory	2
EART 119A	Introduction to Scientific Programming	5
EART 160	Planetary Science	5

Plus one of the following:

One elective from the following planetary science courses:

EART 162	Planetary Interiors	5
EART 163	Planetary Surfaces	5
EART 164	Planetary Atmospheres	5
EART 165	History and Geochemistry of the Solar System	5

Electives

Students take three upper-division Earth sciences or ocean sciences courses of 5 or more credits, chosen from EART 100-199 (excluding EART 196B and EART 198) or OCEA 100-199. No more than one quarter of EART 199 or OCEA

199 may be used as an elective. Lecture/lab combinations count as one course. If a lecture has a lab offered (required or optional), the lab must be passed to count for this requirement.

ENVS 115A and ENVS 115L are open to Earth science students with permission of the instructor, and taken together are approved as one elective.

Students are encouraged to take more than the minimum number of elective courses and may craft an elective distribution from many areas of specific research and career interests.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) general education requirement. Students in the Earth Sciences B.S. major must complete a minimum of two (2) courses from the list of courses that in combination satisfies the DC general education requirement. Courses taken to satisfy the DC requirement may also satisfy upper-division elective or senior comprehensive requirements. Consult one of the Earth and planetary sciences advisers for the most up-to-date list of scheduled classes. Currently the list (subject to change) consists of:

EART 100	Vertebrate Paleontology	5
EART 101	Invertebrate Paleobiology	5
EART 102	Marine Geology	5
EART 104	Geologic Hazards	5
EART 109	Elements of Field Geology	5
EART 120	Sedimentology and Stratigraphy	5
EART 140	Geomorphology	5
EART 146	Groundwater	5
EART 148	Glaciology	5
EART 150	Structural Geology	5
EART 160	Planetary Science	5
EART 189B	Summer Field Study	5
EART 191	Earth Sciences Capstone Seminar	5
EART 191C	Practical Geophysics	5
EART 191D	Practical Geochemistry	5
EART 195	Senior Thesis	5

Comprehensive Requirement

All students must satisfy the senior comprehensive requirement. The intent of this requirement is to synthesize knowledge and skills from a student's undergraduate career. Therefore, prior to completing an activity to satisfy the senior comprehensive requirement, students should have already completed EART 110A, one of EART 110B or EART 110C, and three other upper-division courses that fulfill major requirements. Students should consult an adviser if they have any questions about the timing of their proposed comprehensive requirement activity. Enrollment in the senior comprehensive is by petition or application.

Note: Courses used to satisfy the senior comprehensive requirement **cannot** also be used to fulfill the upper-division elective requirement.

To satisfy the comprehensive requirement, each student in these majors must complete one of the following options:

Satisfactory Completion of Summer Field

EART 189A	Geographic Information Systems with Applications in Earth Sciences	5
EART 189B	Summer Field Study	5

Satisfactory Completion of a Senior Thesis

A senior thesis must include a significant element of independent research or original work and can only be undertaken after an agreement is obtained from a faculty member to supervise it. It is recommended that students allocate three quarters for the thesis process.

Students may take EART 199: Independent Study, as part of performing the research for their senior thesis. It is required that each student enroll in and pass EART 195: Senior Thesis, in the academic quarter during which they complete their thesis.

Satisfactory Completion of One of the Following Capstone Course Offerings:

EART 191	Earth Sciences Capstone Seminar	5
EART 191B	Planetary Capstone	5
EART 191C	Practical Geophysics	5
EART 191D	Practical Geochemistry	5

Capstone course offerings vary year to year. If you are interested in completing a capstone course please contact the Earth sciences adviser.

Other options

Other options such as external field research experiences or internships may be suitable by permission of the faculty adviser.

Please meet with an advisor if you have an idea to propose.

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Sample Four-Year Planner

Year	Fall	Winter	Spring	Summer (optional)
Entering				College 1A Summer Edge (optional

)

		EART 162	EART elective

EART 5, 10, 20 and corresponding labs are interchangeable.

*Students who wish to complete their capstone with EART 189A and EART 189B should be aware that the following courses are prerequisites: EART 109 and EART 109L, EART 110A, and EART 110B and EART 110M. Students must also complete EART 189B in summer to fulfill the summer field capstone.

** WRIT 2 should be taken in or before spring quarter of the second year.

† Students expecting to write a senior thesis for their comprehensive requirement are required to contact the department at least three quarters before graduation to identify the intended project and faculty adviser. Senior theses usually require two or three quarters for completion.

Sample Two-Year Planner

This planner assumes that students have completed all lower-division requirements other than PHYS 6A and PHYS 6L, PHYS 6B and PHYS 6M, and advanced math.

Year	Fall	Winter	Spring	Summer (optional)
Entering				KRSG 1T Summer Edge (optional)
1st (junior)	EART 160	PHYS 6A PHYS 6L	PHYS 6B PHYS 6M	
	EART 110A*	EART 110B EART 110M*	EART 110C EART 110N	
2nd (senior)	EART 111	EART 162	EART elective	
	EART 119A	EART elective	EART elective	
	(Sr thesis only) EART 199†	(Sr thesis only) EART 199†	EART 189A* or sr thesis (EART 195)†	

*Students who wish to complete their capstone with EART 189A and EART 189B should be aware that the following courses are prerequisites: EART 109 and EART 109L, EART

110A, and EART 110B and EART 110M. Students must also complete EART 189B in summer to fulfill the summer field capstone.

†Students expecting to write a senior thesis for their comprehensive requirement are required to contact the department at least three quarters before graduation to identify the intended project and faculty adviser. Senior theses usually require at least two or three quarters for completion.

Ocean Sciences Concentration

The ocean sciences concentration is intended to provide quantitative preparation for career pathways that include oceanography and biogeochemistry. An additional biology course is required for this concentration along with other distributions of upper-division requirements and electives.

Course Requirements

Lower-Division Courses

Some courses may be satisfied via exam credit.

Choose one of the following options:

	Either these courses	
EART 5	California Geology	5
EART 5L	California Geology Laboratory	1
	or these courses	
EART 10	How the Earth Works	5
EART 10L	Geologic Principles Laboratory	1
	or these courses	
EART 20	Environmental Geology	5
EART 20L	Environmental Geology Laboratory	1

Plus one of the following options:

Where the lab course follows a lecture course the pair of courses counts as a single course.

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3BL	General Chemistry Lab	2
CHEM 3C	General Chemistry	3
CHEM 3CL	General Chemistry Lab	2
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4AL	Advanced General Chemistry Lab	2
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4BL	Advanced General Chemistry Lab	2

Note: This requirement may also be satisfied with prior completion of CHEM 1A, CHEM 1B, CHEM 1C, CHEM 1M, and CHEM 1N or equivalent.

Previous to July 1, 2023, the General Chemistry series, offered by the Department of Chemistry and Biochemistry, was listed in the General Catalog as CHEM 1A, CHEM 1B and CHEM 1C, with associated laboratories CHEM 1M and CHEM 1N. As of academic year 2023-24, this series was replaced with two distinct series: CHEM 3A, CHEM 3B and CHEM 3C, with labs CHEM 3BL and CHEM 3CL; or CHEM 4A and CHEM 4B with labs CHEM 4AL and CHEM 4BL. Descriptions of these two series are given here.

Plus one of the following options:

	Either these courses	
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
	or these courses	
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

Plus one of the following courses:

MATH 22	Introduction to Calculus of Several Variables	5
MATH 23A	Vector Calculus	5
EART 111	Mathematics in the Earth Sciences	5

Plus all of the following courses:

Where the lab course follows a lecture course the pair of courses counts as a single course.

BIOE 20C	Ecology and Evolution	5
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics I Laboratory	1
PHYS 6B	Introductory Physics II	5
PHYS 6M	Introductory Physics II Laboratory	1

Upper-Division Courses

All of the following courses:

EART 110A	Evolution of the Earth	7
EART 110B	Earth as a Chemical System	5
EART 110M	Earth as a Chemical System Laboratory	2
EART 110C	The Dynamic Earth	5
EART 110N	The Dynamic Earth Laboratory	2

Plus one of the following courses:

OCEA 101	The Marine Environment	5
OCEA 102	Oceans and Climate: Past, Present, and Future	5

Electives

Students take four upper-division Earth sciences or ocean sciences courses of 5 or more credits, chosen from EART 100-199 (excluding EART 196B and EART 198) or OCEA 100-199. No more than one quarter of EART 199 or OCEA

199 may be used as an elective. Lecture/lab combinations count as one course. If a lecture has a lab offered (required or optional), the lab must be passed to count for this requirement.

ENVS 115A and ENVS 115L are open to Earth science students with permission of the instructor, and taken together are approved as one elective.

Students are encouraged to take more than the minimum number of elective courses and may craft an elective distribution from many areas of specific research and career interests.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) general education requirement. Students in the Earth Sciences B.S. major must complete a minimum of two (2) courses from the list of courses that in combination satisfies the DC general education requirement. Courses taken to satisfy the DC requirement may also satisfy upper-division elective or senior comprehensive requirements. Consult one of the Earth and planetary sciences advisers for the most up-to-date list of scheduled classes. Currently the list (subject to change) consists of:

EART 100	Vertebrate Paleontology	5
EART 101	Invertebrate Paleobiology	5
EART 102	Marine Geology	5
EART 104	Geologic Hazards	5
EART 109	Elements of Field Geology	5
EART 120	Sedimentology and Stratigraphy	5
EART 140	Geomorphology	5
EART 146	Groundwater	5
EART 148	Glaciology	5
EART 150	Structural Geology	5
EART 160	Planetary Science	5
EART 189B	Summer Field Study	5
EART 191	Earth Sciences Capstone Seminar	5
EART 191C	Practical Geophysics	5
EART 191D	Practical Geochemistry	5
EART 195	Senior Thesis	5

Comprehensive Requirement

All students must satisfy the senior comprehensive requirement. The intent of this requirement is to synthesize knowledge and skills from a student's undergraduate career. Therefore, prior to completing an activity to satisfy the senior comprehensive requirement, students should have already completed EART 110A, one of EART 110B or EART 110C, and three other upper-division courses that fulfill major requirements. Students should consult an adviser if they have any questions about the timing of their proposed comprehensive requirement activity. Enrollment in the senior comprehensive is by petition or application.

Note: Courses used to satisfy the senior comprehensive requirement **cannot** also be used to fulfill the upper-division elective requirement.

To satisfy the comprehensive requirement, each student in these majors must complete one of the following options:

Satisfactory completion of Summer Field

EART 189A	Geographic Information Systems with Applications in Earth Sciences	5
EART 189B	Summer Field Study	5

Satisfactory completion of a senior thesis

A senior thesis must include a significant element of independent research or original work and can only be undertaken after an agreement is obtained from a faculty member to supervise it. It is recommended that students allocate three quarters for the thesis process.

Students may take EART 199: Independent Study, as part of performing the research for their senior thesis. It is required that each student enroll in and pass EART 195: Senior Thesis, in the academic quarter during which they complete their thesis.

Satisfactory completion of one of the following capstone course offerings:

EART 191	Earth Sciences Capstone Seminar	5
EART 191B	Planetary Capstone	5
EART 191C	Practical Geophysics	5
EART 191D	Practical Geochemistry	5

Capstone course offerings vary year to year. If you are interested in completing a capstone course please contact the Earth sciences adviser.

Other options

Other options such as external field research experiences or internships may be suitable by permission of the faculty adviser.

Please meet with an adviser if you have an idea to propose.

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Sample Four-Year Planner

Year	Fall	Winter	Spring	Summer (optional)
Entering				College 1A Summer Edge (optional)

1st (frosh)	CHEM 3A	CHEM 3B & CHEM 3 BL	CHEM 3C & CHEM 3CL
		MATH 11A or MATH 19A	MATH 11B or MATH 19B
		EART 10 & EART 10L	
		WRIT 1/WRIT 1E (if needed)	
2nd (soph)	EART 110A*	EART 110B & EART 110M*	EART 110C & EART 110N
	BIOE 20C	PHYS 6A & PHYS 6L	PHYS 6B & PHYS 6M
	WRIT 2**		
3rd (junior)	EART elective	OCEA 101	EART elective

4th (senior)	(Sr thesis only) EART 199†	EART elective	
		(Sr thesis only) EART 199†	Senior thesis (EART 195)† or EART 189A*

EART 5, EART 10, and EART 20 and corresponding labs are interchangeable.

*Students who wish to complete their capstone with EART 189A and EART 189B should be aware that the following courses are prerequisites: EART 109 and EART 109L, EART 110A, and EART 110B and EART 110M. Students must also complete EART 189B in summer to fulfill the summer field capstone.

** WRIT 2 should be taken in or before spring quarter of the second year.

† Students expecting to write a senior thesis for their comprehensive requirement are required to contact the department at least three quarters before graduation to identify the intended project and faculty adviser. Senior theses usually require two or three quarters for completion.

Sample Two-Year Planner

This planner assumes that students have completed all lower-division requirements other PHYS 6A and PHYS 6L, PHYS 6B and PHYS 6M, and advanced math.

Year	Fall	Winter	Spring	Summer (optional)
Entering				KRSG 1T Summer Edge (optional)
1st (junior)	EART 111	PHYS 6A & PHYS 6L	PHYS 6B & PHYS 6M	
	EART 110A*	EART 110B & EART 110M*	EART 110C & EART 110N	
2nd (senior)	EART elective	EART elective	EART elective	
	EART elective	OCEA 101	EART 189A* or senior thesis (EART	

195)†

(Sr thesis only) EART 199†	(Sr thesis only) EART 199†

*Students who wish to complete their capstone with EART 189A and EART 189B should be aware that the following courses are prerequisites: EART 109 and EART 109L, EART 110A, and EART 110B and EART 110M. Students must also complete EART 189B in summer to fulfill the summer field capstone.

†Students expecting to write a senior thesis for their comprehensive requirement are required to contact the department at least three quarters before graduation to identify the intended project and faculty adviser. Senior theses usually require at least two or three quarters for completion.

Geophysics Concentration

The geophysics concentration provides quantitative, rigorous instruction in the geophysical sciences. Solid Earth geophysics is an internationally recognized field that includes seismology, geodesy, geodynamics and applied methods to image the Earth's interior. All of these subdisciplines have in common a strong mathematical, physical, and computational underpinning, and students wishing to pursue these subjects need training in mathematics, physics, and computer science as well as geosciences. This program will guide students through these fundamentals and then train them to apply the tools to problems in geophysics. Graduates will be prepared to pursue careers in natural hazard research and mitigation, the energy industry, or environmental consultancy.

Course Requirements

Lower-Division Courses

Some courses may be satisfied via exam credit.

Choose one of the following options:

	Either these courses	
EART 5	California Geology	5
EART 5L	California Geology Laboratory	1
	or these courses	
EART 10	How the Earth Works	5
EART 10L	Geologic Principles Laboratory	1
	or these courses	
EART 20	Environmental Geology	5
EART 20L	Environmental Geology Laboratory	1

Plus one of the following options:

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3BL	General Chemistry Lab	2
CHEM 3C	General Chemistry	3
CHEM 3CL	General Chemistry Lab	2
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4AL	Advanced General Chemistry Lab	2
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4BL	Advanced General Chemistry Lab	2

Note: This requirement may also be satisfied with prior completion of CHEM 1A, CHEM 1B, CHEM 1C, CHEM 1M, and CHEM 1N or equivalent.

Previous to July 1, 2023, the General Chemistry series, offered by the Department of Chemistry and Biochemistry, was listed in the General Catalog as CHEM 1A, CHEM 1B and CHEM 1C, with associated laboratories CHEM 1M and CHEM 1N. As of academic year 2023-24, this series was replaced with two distinct series: CHEM 3A, CHEM 3B and CHEM 3C, with labs CHEM 3BL and CHEM 3CL; or CHEM 4A and CHEM 4B with labs CHEM 4AL and CHEM 4BL. Descriptions of these two series are given here.

Plus one of the following options:

	Either these courses	
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
	or these courses	
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5

MATH 19A and MATH 19B are strongly preferred.

Plus one of the following courses:

MATH 21	Linear Algebra	5
AM 10	Linear Algebra for Engineers	5

Plus one of the following courses:

MATH 22	Introduction to Calculus of Several Variables	5
MATH 23A	Vector Calculus	5
EART 111	Mathematics in the Earth Sciences	5

All of the following courses:

PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics I Laboratory	1
PHYS 6B	Introductory Physics II	5
PHYS 6M	Introductory Physics II Laboratory	1

Upper-Division Courses

All of the following courses:

EART 110A	Evolution of the Earth	7
EART 110B	Earth as a Chemical System	5
EART 110M	Earth as a Chemical System Laboratory	2
EART 110C	The Dynamic Earth	5
EART 110N	The Dynamic Earth Laboratory	2

Plus one of these courses:

EART 112	Geophysical Data Science	5
EART 119A	Introduction to Scientific Programming	5

Plus one of these courses:

EART 118	Seismotectonics	5
EART 126	Geomechanics	5
EART 162	Planetary Interiors	5

Electives

Students take four upper-division Earth sciences or ocean sciences courses of 5 or more credits, chosen from EART 100-199 (excluding EART 196B and EART 198) or OCEA 100-199. No more than one quarter of EART 199 or OCEA 199 may be used as an elective. Lecture/lab combinations count as one course. If a lecture has a lab offered (required or optional), the lab must be passed to count for this requirement.

ENVS 115A and ENVS 115L are open to Earth science students with permission of the instructor, and taken together are approved as one elective. Relevant courses in physics or mathematics may be substituted by petition.

Students are encouraged to take more than the minimum number of elective courses and may craft an elective distribution from many areas of specific research and career interests.

Choosing from the following list is recommended, but not mandatory:

EART 104	Geologic Hazards	5
EART 109	Elements of Field Geology	5
EART 109L	Field Geology Laboratory	2
EART 112	Geophysical Data Science	5
EART 116	Hydrology	5
EART 118	Seismotectonics	5
EART 119A	Introduction to Scientific Programming	5
EART 125	Statistics and Data Analysis in the Geosciences	5
EART 126	Geomechanics	5
EART 140	Geomorphology	5
EART 140L	Geomorphology Laboratory	2
EART 142	Engineering Geology for Environmental Scientists	5
EART 146	Groundwater	5
EART 148	Glaciology	5
EART 150	Structural Geology	5
EART 150L	Structural Geology Laboratory	2
EART 152	Tectonics	5
EART 160	Planetary Science	5
EART 162	Planetary Interiors	5
EART 163	Planetary Surfaces	5
EART 164	Planetary Atmospheres	5
EART 165	History and Geochemistry of the Solar System	5
EART 172	Geophysical Fluid Dynamics	5
EART 270	Global Seismology	5
EART 273	Earthquake Physics	5
EART 278A	Advanced Seismology	5

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) general education requirement. Students in the Earth Sciences B.S. major must complete a minimum of two (2) courses from the list of courses that in combination satisfies the DC general education requirement. Courses taken to satisfy the DC requirement may also satisfy upper-division elective or senior comprehensive requirements. Consult one of the Earth and planetary sciences advisers for the most up-to-date list of scheduled classes. Currently the list (subject to change) consists of:

EART 100	Vertebrate Paleontology	5
EART 101	Invertebrate Paleobiology	5
EART 102	Marine Geology	5
EART 104	Geologic Hazards	5
EART 109	Elements of Field Geology	5
EART 120	Sedimentology and Stratigraphy	5
EART 140	Geomorphology	5
EART 146	Groundwater	5
EART 148	Glaciology	5
EART 150	Structural Geology	5
EART 160	Planetary Science	5
EART 189B	Summer Field Study	5
EART 191	Earth Sciences Capstone Seminar	5
EART 191C	Practical Geophysics	5
EART 191D	Practical Geochemistry	5
EART 195	Senior Thesis	5

Comprehensive Requirement

All students must satisfy the senior comprehensive requirement.

The intent of this requirement is to synthesize knowledge and skills from a student's undergraduate career. Therefore, prior to completing an activity to satisfy the senior comprehensive requirement, students should have already completed EART 110A, one of EART 110B or EART 110C, and three other upper-division courses that fulfill major requirements. Students should consult an adviser if they have any questions about the timing of their proposed comprehensive requirement activity. Enrollment in the senior comprehensive is by petition or application.

Note: Courses used to satisfy the senior comprehensive requirement **cannot** also be used to fulfill the upper-division elective requirement.

To do so, each student in the geophysics concentration must complete one of the following capstone options:

Satisfactory completion of a senior thesis

A senior thesis must include a significant element of independent research or original work and can only be undertaken after an agreement is obtained from a faculty member to supervise it. It is recommended that students allocate three quarters for the thesis process.

Students may take EART 199: Independent Study, as part of performing the research for their senior thesis. It is required that each student enroll in and pass EART 195: Senior Thesis, in the academic quarter during which they complete their thesis.

Satisfactory completion of one of the following capstone course offerings:

EART 191C	Practical Geophysics	5

Capstone course offerings vary year to year. If you are interested in completing a capstone course please contact the Earth sciences adviser.

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Sample Four-Year Planner

Year	Fall	Winter	Spring	Summer (optional)
Entering				College 1A Summer Edge (optional)
1st (frosh)	CHEM 3A College 1	CHEM 3B CHEM 3BL MATH 19A EART 10 EART 10L WRIT 1/WRIT 1E (if needed)	CHEM 3C CHEM 3CL MATH 19B	
2nd (soph)	EART 110A MATH 23A or EART 111 WRIT 2*	EART 110B EART 110M PHYS 6A PHYS 6L AM 10 or MATH 21	EART 110C EART 110N PHYS 6B PHYS 6M

Senior theses usually require at least two or three quarters for completion.

ENVIRONMENTAL SCIENCES B.S.

Information and Policies

Introduction

The University of California, Santa Cruz environmental sciences (ESCI) major is an interdepartmental, undergraduate-only program. The purpose of the ESCI major is to educate students interested in environmental science problems and issues, with a focus on issues within the physical sciences (as opposed to focusing on biological sciences). The major specializes primarily on the following areas:

- Hydrosphere: water resources, water quality, aquatic chemistry, physical oceanography, chemical oceanography, glaciology
- Pollution and transport: environmental toxicology, environmental transport/fluid mechanics, environmental monitoring
- Global scale environment: climate, climate dynamics, global cycles of water, carbon and nutrients, remote sensing of the environment
- Atmosphere: meteorology, air quality, atmospheric chemistry

The core faculty of the major are primarily from two departments, Earth and Planetary Sciences and Ocean Sciences. Faculty from other departments such as Microbiology and Environmental Toxicology and Environmental Studies may also be involved.

In addition to providing comprehensive preparation in the basic physical sciences, and particular breadth and depth in environmental sciences, the curriculum is structured to prepare students for the competitive graduate school and career marketplace. The core of the major includes calculus, physics, chemistry, and core foundational upper-division environmental sciences courses.

Graduates of the ESCI major are expected to continue on to a variety of careers, such as:

- Business and industry
- Environmental consulting
- Governmental agencies at the federal, state, and local level
- Non-profit organizations
- Research at universities, governmental research institutions, or other scientific agencies
- Graduate/professional school in areas such as science, engineering, teaching, law, public health, business

For more information about the affiliated faculty and staff for the major, including areas of interest and facilities, contact e-mails and phone numbers, and how to declare this major, please see our website.

Program Learning Outcomes

The ESCI major has three broad program learning outcomes, each with three specific learning outcomes:

PLO 1: Disciplinary Knowledge Goals

- Reservoirs: Understand and describe the properties of the various environmental "reservoirs", which represent different, interacting physical regimes. For example, a global model might have the atmosphere, oceans, plants and soils as four primary interacting reservoirs.
- Processes: Understand and describe the processes governing the properties and evolution of Earth's physical environment, i.e., the properties and evolution of reservoirs and their interactions.
- Application: Apply the knowledge of reservoirs and processes to explain, analyze and predict phenomena within the environmental sciences.

PLO 2: Quantitative Reasoning Goals

- Calculation: Utilize mathematical tools (e.g. algebra, calculus) to address questions in the environmental sciences.
- Visualization: Interpret and produce visual representations of data in the environmental sciences (e.g. graphs and charts) that conform to disciplinary standards.
- Analysis: Use quantitative analysis as the basis for drawing insights and conclusions, while expressing the appropriate assumptions and qualifications.

PLO 3: Written Communication Goals

- Mechanics: Write sentences with correct grammar, punctuation, and spelling.
- Conventions: Accurately utilize the formatting, stylistic, citation and bibliographic conventions of environmental sciences in the written document.
- Organization: Construct paragraphs, sections and an overall document that flows logically and persuasively argues a thesis.

Academic Advising for the Program

Academic advising is available at the Department of Earth and Planetary Sciences (EPS) undergraduate advising office located in the Earth and Marine Sciences Building, and via email at epsadvising@ucsc.edu. The Environmental Sciences undergraduate web pages contain information on all aspects of major advising including: academic planning, upper and lower-division course descriptions, enrichment opportunities in the major like study abroad and undergraduate research, and how to make an appointment with an adviser. Each student should become familiar with the information posted on the website; for further assistance, contact the EPS undergraduate adviser. Transfer students should consult Getting Started in the Major: Transfer Students for more detailed information about academic advising.

Getting Started in the Major: Frosh

This major is not highly sequential or course intensive. Although it is advisable to begin taking courses toward the major in the first year, it is not required. Students begin with general chemistry and mathematics, and an introductory course in physical geology.

Math placement is required for one or more of the foundational courses for this major. For more information, please review the Math Placement website.

Courses completed at a community college or four-year university and/or advanced placement (AP) course equivalencies may be used to fulfill prerequisites.

Every proposed environmental science student will receive emails about advising and first quarter enrollment during the summer. Students with further questions about what to enroll in should email the Environmental Sciences undergraduate adviser.

Transfer Information and Policy

Transfer Admission Screening Policy

The environmental sciences program welcomes applications from prospective transfer students. Students should reference assist.org to determine course equivalencies.

To be considered for admission as a proposed ESCI B.S. major, transfer students must complete the following courses or their equivalents prior to transfer, by the end of the spring term for students planning to enter in the fall.

A minimum GPA of 2.00 must be obtained in the courses listed above.

One of these options

Either these courses

CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3BL	General Chemistry Lab	2
CHEM 3C	General Chemistry	3
CHEM 3CL	General Chemistry Lab	2
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4AL	Advanced General Chemistry Lab	2
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4BL	Advanced General Chemistry Lab	2

Note: This requirement may also be satisfied with prior completion of CHEM 1A, CHEM 1C, and CHEM 1N or equivalent.

Previous to July 1, 2023, the General Chemistry series, offered by the Department of Chemistry and Biochemistry, was listed in the General Catalog as CHEM 1A, CHEM 1B and CHEM 1C, with associated laboratories CHEM 1M and CHEM 1N. As of academic year 2023-24, this series was replaced with two distinct series: CHEM 3A, CHEM 3B and CHEM 3C, with labs CHEM 3BL and CHEM 3CL; or CHEM 4A and CHEM 4B with labs CHEM 4AL and CHEM 4BL. Descriptions of these two series are given here.

Plus these courses

MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics I Laboratory	1

Recommended Courses

In addition, the following courses are recommended prior to transfer to ensure timely graduation:

PHYS 6B	Introductory Physics II	5
PHYS 6M	Introductory Physics II Laboratory	1

Getting Started in the Major: Transfer Students

Once you have submitted your intent to register at UC Santa Cruz, here is a step-by-step guide to transferring your coursework and getting enrolled:

1. **Confirm you are a proposed environmental sciences major.**
   If you are not sure of your status, log on to your MyUCSC portal to view your proposed major. If your major is proposed environmental sciences you are all set. If the proposed major listed is not environmental sciences, you will need to meet with the adviser for environmental sciences.
2. **Once your courses have been articulated, you will receive an email from the EPS advising office.**
   This email will include suggestions for summer or fall enrollment, and invite you to make an appointment to talk with the EPS major adviser.
3. **Make an appointment to talk to an adviser.**
   Your confirmation email will include instructions for scheduling an advising appointment. Appointments are available over Zoom or in person.
4. **Participate in Transfer Orientation and Welcome Week.**
   Transfer Orientation provides instructions on how to transfer your coursework to UC Santa Cruz, the advising and support available, and how to enroll. Our online transfer orientation provides all the critical information you need to transition to UC Santa Cruz and begin your major coursework. The department also hosts a transfer student welcome in the fall that provides new transfer students an opportunity to meet other transfer students, familiarize themselves with the campus and the available resources. Welcome Week includes presentations on the environmental sciences major, including an overview of the courses offered and an introduction on how to get involved in undergraduate research.
5. **Declaring the environmental sciences major.**
   In order to declare the environmental sciences major, transfer students entering at the junior level must complete the CHEM 3 series (CHEM 3A, CHEM 3B, CHEM 3BL, CHEM 3C and CHEM 3CL), or the CHEM 4 series (CHEM 4A, CHEM 4AL, CHEM 4B and CHEM 4BL), plus MATH 11A, MATH 11B, and PHYS 6A and PHYS 6L or an approved equivalent course (with a C or better) by the end of their first quarter at UC Santa Cruz and meet with the Environmental Sciences adviser by the declaration deadline.

Major Qualification Policy and Declaration Process

Petition to declare your major as soon as you have met qualification requirements and/or reach your declaration deadline quarter, whichever comes first.

Major Qualification

Transfer students should consult the Transfer and Information Policy section for information about major qualification.

Students are expected to complete the academic planning and online petition by the campus declaration deadline.

Students who satisfy the major qualification requirements and who petition to declare the major by the campus major declaration deadline (i.e., before enrolling in their third year or the equivalent) will be admitted to the major.

To qualify for the environmental sciences major, a student must have an academic planning form signed and approved by an adviser. All major qualification courses must be taken for a letter grade and passed with a grade of C or higher. Some courses may be satisfied via exam credit.

Complete one of the following options:

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3BL	General Chemistry Lab	2
CHEM 3C	General Chemistry	3
CHEM 3CL	General Chemistry Lab	2
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4AL	Advanced General Chemistry Lab	2
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4BL	Advanced General Chemistry Lab	2

Note: This requirement may also be satisfied with prior completion of CHEM 1A, CHEM 1C, and CHEM 1N or equivalent.

Previous to July 1, 2023, the General Chemistry series, offered by the Department of Chemistry and Biochemistry, was listed in the General Catalog as CHEM 1A, CHEM 1B and CHEM 1C, with associated laboratories CHEM 1M and CHEM 1N. As of academic year 2023-24, this series was replaced with two distinct series: CHEM 3A, CHEM 3B and CHEM 3C, with labs CHEM 3BL and CHEM 3CL; or CHEM 4A and CHEM 4B with labs CHEM 4AL and CHEM 4BL. Descriptions of these two series are given here.

Plus the following courses:

MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics I Laboratory	1

Appeal Process

Students who do not satisfy the major qualification requirements by the campus major declaration deadline and are notified that they are not eligible to declare the major may submit a major declaration appeal. Students must submit their major declaration appeal within 15 days from the date the notification was sent. Within 15 days of receipt of the appeal, the department will notify the student and their affiliated college of the decision. Appeals will be considered on a case-by-case basis and decisions are final. Students may not appeal more than one time.

How to Declare a Major

Students who qualify start the declaration process by creating an academic plan and then scheduling an appointment with the department staff adviser. You must consult with the department's undergraduate staff adviser to have your academic plan reviewed and approved prior to being able to declare the environmental sciences major. Students should petition to declare the major as soon as they have met qualification requirements and/or reached their declaration deadline quarter, whichever comes first.

Letter Grade Policy

All courses used to satisfy requirements for the environmental sciences major must be taken for a letter grade, with the exception of the following courses, which may be taken pass/no pass: ESCI 195, EART 198 and EART 199 and OCEA 199.

[Optional Catchall]

Course Substitution Policy

Relevant courses taken at UC Santa Cruz or other institutions may be substituted for degree requirements by approved petition. Please see the undergraduate adviser for the substitution petition form and more information about this process.

Double Majors and Major/Minor Combinations Policy

Students interested in pursuing multiple majors within the Earth and environmental sciences may NOT declare the following combination of majors:

- Environmental Sciences B.S. and Earth Sciences Minor
- Any combination of the following: Earth Sciences B.S., Environmental Sciences B.S., Earth Sciences/Anthropology Combined Major B.A.

Should a student choose to double major, they must qualify for and complete the disciplinary communication and comprehensive requirements for each of the majors.

Study Abroad

Honors

Honors in the major are determined by a review of grades (typically 3.50 or above) at the time a student applies for graduation. A faculty committee makes the decision based on the quality of all coursework, but especially in the courses required for the major. Extra coursework or independent study as well as more intensive or rigorous coursework and the quality of a capstone project may also be taken into consideration. Highest honors may also be awarded in exceptional cases when a student's overall grade point average (GPA) is above 3.75 and performance in the senior capstone requirement is equally outstanding. The program reserves the right to withhold honors and highest honors based on other criteria, such as an incident of academic dishonesty.

Honors in the senior thesis are determined independently of major honors, and must be approved by two faculty readers.

[Optional Catchall]

Requirements and Planners

Course Requirements

Complete the following requirements. Some courses may be satisfied via exam credit.

Lower-Division Courses

One of the following options:

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3BL	General Chemistry Lab	2
CHEM 3C	General Chemistry	3
CHEM 3CL	General Chemistry Lab	2
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4AL	Advanced General Chemistry Lab	2
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4BL	Advanced General Chemistry Lab	2

Note: This requirement may also be satisfied with prior completion of CHEM 1A, CHEM 1C, and CHEM 1N or equivalent.

Previous to July 1, 2023, the General Chemistry series, offered by the Department of Chemistry and Biochemistry, was listed in the General Catalog as CHEM 1A, CHEM 1B and CHEM 1C, with associated laboratories CHEM 1M and CHEM 1N. As of academic year 2023-24, this series was replaced with two distinct series: CHEM 3A, CHEM 3B and CHEM 3C, with labs CHEM 3BL and CHEM 3CL; or CHEM 4A and CHEM 4B with labs CHEM 4AL and CHEM 4BL. Descriptions of these two series are given here.

Plus one of the following options:

	Either these courses	
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
	or these courses	
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

Plus one of the following options:

	Either these courses	
EART 5	California Geology	5
EART 5L	California Geology Laboratory	1
	or these courses	
EART 10	How the Earth Works	5
EART 10L	Geologic Principles Laboratory	1
	or these courses	
EART 20	Environmental Geology	5
EART 20L	Environmental Geology Laboratory	1

Plus all of the following courses:

ENVS 25	Environmental Politics, Economics and Justice	5
ESCI 30	Biological Principles of Environmental Sciences	5
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics I Laboratory	1
PHYS 6B	Introductory Physics II	5
PHYS 6M	Introductory Physics II Laboratory	1

* ESCI 30 students who were formerly proposed or declared majors in biology, biochemistry, bioengineering, or other related majors may have other options to fulfill this requirement. Please inquire with the adviser.

Upper-Division Courses

All of the following courses:

ESCI 100A	Fundamentals of Environmental Sciences	5
ESCI 100B	Fundamentals of Environmental Processes	5
ESCI 160	Data Analysis in the Environmental Sciences	5

At least five elective courses.

Students take five upper-division Earth sciences, ocean sciences, and/or environmental sciences courses of 5 credits or more, chosen from EART 100-199 (excluding EART 196B and 198), OCEA 100-199, and/or ESCI (100-189). No more than one quarter of EART 199 or OCEA 199 may be used as an elective. Lecture/lab combinations count as one course. If a lecture has a lab offered (required or optional), the lab must be passed to count for this requirement.

ENVS 115A and 115L, taken together, are approved as one elective. METX 150 and ECE 180J are also allowed as electives. Up to two courses from other departments may be considered for upper-division elective credit by permission of a faculty advisor. Please consult with an advisor for more details.

Students are encouraged to take more than the minimum number of elective courses and may craft an elective distribution from many areas of specific research and career interests.

Electives

Disciplinary Communication (DC) Requirement

Students fulfill the disciplinary communication (DC) requirement through successful completion of either (1) one of the environmental sciences senior capstone seminars (ESCI 191) or (2) a senior thesis based on original research performed by the student (completion of ESCI 195: Senior Thesis is required).

ESCI 191	Capstone Seminar	5

	OR	
ESCI 195	Senior Thesis	5

Comprehensive Requirement

All students must satisfy the senior comprehensive requirement. The intent of this requirement is to synthesize knowledge and skills from a student's undergraduate career. Students should consult an adviser if they have any questions about the timing of their proposed comprehensive requirement activity.

Other capstones will not be considered unless they also satisfy the DC requirement.

Courses that are used to satisfy the capstone may not also count toward fulfilling the upper-division elective requirement.

Satisfactory completion of one of the following capstone course offerings:

Senior Thesis

ESCI 195	Senior Thesis	5

ESCI 195 requires original research performed by the student. Approval from a faculty sponsor is required prior to embarking on a senior thesis. Completion of the senior thesis is necessary to pass ESCI 195.

ESCI 195 also satisfies the DC requirement.

Capstone Seminar

ESCI 191	Capstone Seminar	5

Enrollment in ESCI 191 is limited to environmental science majors with senior standing.

ESCI 191 also satisfies the DC requirement.

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Students planning a professional career in environmental sciences should take more than the minimum number of courses required for the major, if possible. Four-year students have ample flexibility to take additional electives if they begin with the required courses in their second year. Junior transfers also have flexibility if they have taken most of their lower-division preparatory courses before entry. Further advice can be obtained from the undergraduate adviser and from faculty members.

Sample Four-Year Planner

Note: CHEM 3A is offered in fall and winter. CHEM 3B is offered in winter and spring, and CHEM 3BL is offered every quarter. CHEM 3C is offered every quarter, but CHEM 3CL is offered in fall and spring only. CHEM 4A and CHEM 4AL are offered in fall, and CHEM 4B and CHEM 4BL are offered in winter. MATH 11A and MATH 11B are offered every quarter. PHYS 6A and PHYS 6L are offered every quarter, but PHYS 6B and PHYS 6M are not offered in fall.

Year	Fall	Winter	Spring	**Summer** (optional)
Entering				College 1A Summer Edge (optional)
1st (frosh)	College 1	MATH 11A	MATH 11B	
	CHEM 3A	CHEM 3B CHEM 3BL *EART 10 EART 10L WRIT 1/WRIT 1E (if needed)	CHEM 3C CHEM 3CL	
2nd (soph)	ESCI 30 PHYS 6A PHYS 6L WRIT 2**	ESCI 100A PHYS 6B PHYS 6M	ESCI 100B Upper-division elective	
3rd (junior)	ESCI 160	ENVS 25 Upper-divisi	Upper-division elective	

		on elective	
4th (senior)	Upper-division elective	Upper-division elective	ESCI 191 or ESCI 195***

* EART 5, EART 10, EART 20 and corresponding labs are interchangeable.

** WRIT 2 should be taken in or before spring quarter of the second year.

***Students expecting to write a senior thesis (ESCI 195) for their comprehensive requirement should contact the department at least three quarters before graduation to identify the intended project and faculty adviser. Senior theses usually require at least three quarters for completion.

In addition to the specific courses shown in these planners, a student must complete courses satisfying the CC, ER, IM, SR, TA, PE, and PR general education requirements.

Sample Transfer (Two-Year) Planner

This planner assumes that students have completed all lower-division requirements other than ESCI 30, ENVS 25, and EART 20 and EART 20L.

Year	Fall	Winter	Spring	**Summer** (optional)
Entering				KRSG 1T Summer Edge (optional)
3rd (junior)	ESCI 30 ESCI 160	ENVS 25 ESCI 100A	ESCI 100B EART 20 EART 20L	
4th (senior)	Upper-division	Upper-division	ESCI 191 or ESCI 195*	
	Upper-division elective	Upper-division elective	Upper-division elective	

*Students expecting to write a senior thesis (ESCI 195) for their comprehensive requirement should contact the department at least three quarters before graduation to identify the intended project and faculty adviser. Senior theses usually require at least three quarters for completion.

EARTH SCIENCES/ANTHROPOLOGY COMBINED MAJOR B.A.

Information and Policies

Introduction

The Earth sciences/anthropology combined major is intended for students with interests in Earth sciences and the laboratory-based aspect of anthropology. These include anthropology students interested in archaeology or paleoanthropology who desire more intensive training in natural sciences and Earth sciences students interested in paleobiology or archaeology. The combined major provides a rigorous training in both anthropology and Earth sciences and will permit students to enter graduate programs in Earth sciences, archaeology, or paleoanthropology. The combined major has a significantly different set of cognate science and required lower- and upper-division courses than the standard major; therefore, students are advised to plan carefully and to contact academic advisers in the Earth and Planetary Sciences and Anthropology departments early if they have questions.

Program Learning Outcomes

Students graduating with a B.A. in Earth sciences/anthropology should be able to:

1. understand the processes governing the properties and evolution of Earth's interior and surface;
2. identify rocks and minerals, and describe their connection to geologic processes;
3. utilize algebraic mathematical tools to quantitatively address questions in the geosciences; and
4. write in a clear, organized, and logical fashion using disciplinary standards for reporting and citation.

Academic Advising for the Program

A student who wants to become an Earth sciences/anthropology combined major should contact the Earth and Planetary Sciences Department undergraduate staff

adviser at epsadvising@ucsc.edu, as soon as possible. Students will submit a declaration of major petition, and are required to meet with the undergraduate adviser to plan their program in detail. Transfer students should consult the Transfer Information and Policy section for more detailed information about academic advising.

Getting Started in the Major: Frosh

This major is not highly sequential or course intensive. Although it is advisable to begin taking courses toward the major in the first year, it is not required. Students begin with introductory anthropology, general chemistry and mathematics, and an introductory course in physical geology.

Math placement is required for one or more of the foundational courses for this major. For more information, please review the Math Placement website.

Courses completed at a community college or four-year university and/or advanced placement (AP) course equivalencies may be used to fulfill prerequisites.

Every proposed Earth sciences/anthropology combined major student will receive emails about advising and first quarter enrollment during the summer. Students with further questions about what to enroll in should email the Earth and Planetary Sciences undergraduate adviser at epsadvising@ucsc.edu.

Transfer Information and Policy

Transfer Admission Screening Policy

The Earth and Planetary Sciences Department welcomes applications from prospective transfer students who are prepared for the major. Students should reference assist.org to determine course equivalencies.

No major preparation courses are required prior to transfer; however, the following courses or their equivalents are recommended to ensure timely graduation:

One of the following options:

	Either these courses	
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
	or these courses	
MATH 19A	Calculus for Science, Engineering, and Mathematics	5

All of the following courses:

ANTH 1	Introduction to Biological Anthropology	5
ANTH 2	Introduction to Cultural Anthropology	5
ANTH 3	Introduction to Archaeology	5

Plus one of the following options:

EART 5	California Geology	5
EART 5L	California Geology Laboratory	1
	OR	
EART 10	How the Earth Works	5
EART 10L	Geologic Principles Laboratory	1
	OR	
EART 20	Environmental Geology	5
EART 20L	Environmental Geology Laboratory	1

Five lower-division science courses (plus laboratories) chosen from the following:

Where the lab course follows a lecture course the pair of courses counts as a single course.

BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOE 20C	Ecology and Evolution	5
CHEM 3B	General Chemistry	3
CHEM 3BL	General Chemistry Lab	2
CHEM 3C	General Chemistry	3
CHEM 3CL	General Chemistry Lab	2
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4AL	Advanced General Chemistry Lab	2
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4BL	Advanced General Chemistry Lab	2
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics I Laboratory	1
PHYS 6B	Introductory Physics II	5
PHYS 6M	Introductory Physics II Laboratory	1

Getting Started in the Major: Transfer Students

Once you have submitted your intent to register at UC Santa Cruz, here is a step-by-step guide to getting started:

1. Confirm you are a proposed Earth sciences/anthropology major.

If you are not sure of your status, log on to your MyUCSC portal to view your proposed major. If your major is proposed Earth sciences/anthropology you are all set. If the proposed major listed is not Earth sciences/anthropology, you will need to meet with the adviser for Earth sciences.

2. Once your courses have been articulated, you will receive an email from our office.
This email will include information on how your coursework articulated, suggestions for summer or fall enrollment, and invite you to make an appointment to talk with your major adviser.

3. Make an appointment to talk to an advisor.
Your confirmation email will include instructions for scheduling an advising appointment. Appointments are available over Zoom or in person.

4. Participate in Transfer Orientation and Welcome Week.
Transfer orientation provides instructions on how to transfer your coursework to UC Santa Cruz, the advising and support available, and how to enroll. Our online transfer orientation provides all the critical information you need to transition to UC Santa Cruz and begin your major coursework.

The department also hosts a transfer student welcome in the fall that provides new transfer students an opportunity to meet other transfer students, familiarize themselves with the campus and the available resources. Welcome Week includes presentations on the Earth sciences majors, including an overview of the field courses offered and an introduction on how to get involved in undergraduate research.

5. Declaring the Earth Sciences/Anthropology combined major.

In order to declare the Earth sciences/anthropology combined major, transfer students must complete EART 5/EART 5L, or EART 10/EART 10L, or EART 20/EART 20L or an approved equivalent course (with a C or better) and meet with the Earth and Planetary Sciences Department adviser by the declaration deadline.

Major Qualification Policy and Declaration Process

Petition to declare your major as soon as you have met qualification requirements and/or reach your declaration deadline quarter, whichever comes first.

Major Qualification

To qualify for the combined Earth sciences and anthropology major, a student must complete (with a minimum grade of C) one of the following introductory courses in physical geology and the associated lab:

	Either these courses	
EART 5	California Geology	5
EART 5L	California Geology Laboratory	1
	or these courses	
EART 10	How the Earth Works	5
EART 10L	Geologic Principles Laboratory	1
	or these courses	
EART 20	Environmental Geology	5
EART 20L	Environmental Geology Laboratory	1

Transfer students may take an approved substitution for one of the above courses and should consult assist.org for equivalencies and the Transfer and Information Policy section for information about major qualifications.

Appeal Process

If a student completes major qualification courses but does not meet the major qualification criteria and files an appeal, the department may accept or reject the appeal or place conditions on the student that will be resolved within at most one more enrolled quarter.

Students who are informed that they are not eligible to declare the major may appeal by submitting a letter to the Earth and Planetary Sciences advisor within 15 days from the date the notification was sent. Within 15 days of receipt of the appeal, the department will notify the student and their affiliated college of the decision.

How to Declare a Major

Students who wish to declare the Earth sciences/anthropology combined major start the process by scheduling an appointment with the department staff adviser to create an academic plan. Once academic planning has been completed, students submit the online major declaration petition to begin the major declaration process. Students should petition to declare the major as soon as they have met qualification requirements and/or reached their declaration deadline quarter, whichever comes first.

Letter Grade Policy

This program does not have a letter grade policy. Students must adhere to the campus letter grade policy.

[Optional Catchall]

Course Substitution Policy

Relevant courses taken at UC Santa Cruz or other institutions may be substituted for degree requirements by approved petition. Please see the undergraduate adviser for the substitution petition form and more information about this process.

Double Majors and Major/Minor Combinations Policy

Students interested in pursuing multiple majors within the Earth and environmental sciences may **NOT** declare the following combination of majors:

- Earth Sciences/Anthropology Combined Major B.A. and Earth Sciences Minor
- Any combination of the following: Earth Sciences B.S., Environmental Sciences B.S., Earth Sciences/Anthropology Combined Major B.A.

Should a student choose to double major, they must qualify for and complete the disciplinary communication and comprehensive requirements for each of the majors.

Study Abroad

Honors

Honors in the major (all concentrations) and in the combined major with anthropology are determined by a review of grades (typically 3.50 or above) at the time a student applies for graduation. A faculty committee makes the decision based on the quality of all coursework, but especially in the courses required for the major. Extra coursework or independent study as well as more intensive or rigorous coursework and the quality of a capstone project may also be taken into consideration. Highest honors may also be awarded in

exceptional cases when a student's overall grade point average (GPA) is above 3.75 and performance in the senior capstone requirement is equally outstanding. The department reserves the right to withhold honors and highest honors based on other criteria, such as an incident of academic dishonesty.

Honors on the senior thesis are determined independently of major honors, and must be approved by two faculty readers.

Keys to Success in the Major

[Optional Catchall]

Requirements and Planners

Course Requirements

Complete the following requirements. Some courses may be satisfied via exam credit.

Lower-Division Courses

All of the following courses:

ANTH 1	Introduction to Biological Anthropology	5
ANTH 2	Introduction to Cultural Anthropology	5
ANTH 3	Introduction to Archaeology	5

Plus one of the following options:

	Either these courses	
EART 5	California Geology	5
EART 5L	California Geology Laboratory	1
	or these courses	
EART 10	How the Earth Works	5
EART 10L	Geologic Principles Laboratory	1
	or these courses	
EART 20	Environmental Geology	5
EART 20L	Environmental Geology Laboratory	1

Plus one of the following options:

MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
	OR	
MATH 19A	Calculus for Science, Engineering, and Mathematics	5

Plus five lower-division science courses

Students choose five courses from the following list. Where the lab course follows a lecture course, the lab must be taken. The pair of courses counts as a single course.

CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5
BIOE 20B	Development and Physiology	5
BIOE 20C	Ecology and Evolution	5
CHEM 3B	General Chemistry	3
CHEM 3BL	General Chemistry Lab	2
CHEM 3C	General Chemistry	3
CHEM 3CL	General Chemistry Lab	2
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4AL	Advanced General Chemistry Lab	2
BIOL 20A	Cell and Molecular Biology	5
CHEM 4BL	Advanced General Chemistry Lab	2
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics I Laboratory	1
PHYS 6B	Introductory Physics II	5
PHYS 6M	Introductory Physics II Laboratory	1

Upper-Division Courses

Take the following course:

EART 110A	Evolution of the Earth	7

Electives

Students complete seven electives, three in Earth sdciences and four in anthropology, as follows:

Earth Sciences Electives

Three upper-division Earth sciences courses of 5 or more credits, chosen from EART 100-199 (excluding EART 196B and EART 198). No more than one quarter of EART 199 may be used as an elective. Lecture/lab combinations count as one course. If a lecture has a lab offered (required or optional), the lab must be passed to count for this requirement.

Anthropology Electives

Four 5-credit or more upper-division archeology, biological, medical, or environmental anthropology courses. Students should consult the Anthropology Department's course list, and reference courses listed under the Archeology heading or the Biological/Medical/Environmental Anthropology courses heading.

Disciplinary Communication (DC) Requirement

In order to satisfy the DC requirement, students must fulfill one of the two options:

Take two courses from this list:

EART 100	Vertebrate Paleontology	5
EART 101	Invertebrate Paleobiology	5
EART 102	Marine Geology	5
EART 104	Geologic Hazards	5
EART 109	Elements of Field Geology	5
EART 120	Sedimentology and Stratigraphy	5
EART 140	Geomorphology	5
EART 146	Groundwater	5
EART 148	Glaciology	5
EART 150	Structural Geology	5
EART 160	Planetary Science	5
EART 189B	Summer Field Study	5

EART 191	Earth Sciences Capstone Seminar	5
EART 195	Senior Thesis	5
EART 191C	Practical Geophysics	5
EART 191D	Practical Geochemistry	5

EART 189B formerly EART 188B

Or one course from this list:

Students may complete one Anthropology 194 or 196 series senior seminar in physical anthropology or archaeology, listed below.

Courses may simultaneously satisfy both the DC requirement and the upper-division Earth sciences or anthropology elective requirement.

ANTH 194C	Feminist Anthropology	5
ANTH 194H	Paleoanthropology	5
ANTH 194L	Archaeology of the African Diaspora	5
ANTH 194U	Environmental Anthropology: Nature, Culture, Politics	5
ANTH 194V	Who Owns the Past? Ethical and Political Dimensions of Contemporary Archaeology	5
ANTH 194Y	Archaeologies of Space and Landscape	5
ANTH 196L	Archaeology of the American Southwest	5
ANTH 196T	Archaeology of Technology	5
ANTH 196U	Historical Anthropology	5
ANTH 196W	Anthropology of Weather and Exposure	5

Comprehensive Requirement

All students must satisfy the senior comprehensive requirement. The intent of this requirement is to synthesize knowledge and skills from a student's undergraduate career. Therefore, prior to completing an activity to satisfy the senior comprehensive requirement, students should have already completed EART 110A, and three other upper-division courses that fulfill major requirements. Students should consult an adviser if they have any questions about the timing of their proposed comprehensive requirement activity.

Note: Courses used to satisfy the senior comprehensive requirement **cannot** also be used to fulfill the upper-division elective requirement.

To satisfy the comprehensive requirement, each student in this major must complete one of the following options:

Option 1: Satisfactory completion of an Anthropology 194 or 196 series senior seminar in physical anthropology or archaeology, listed in the DC section above.

Option 2: Satisfactory completion of EART 189A and EART 189B*, Geographic Information Systems with Applications in Earth Sciences and Summer Field Internship.

Option 3: Satisfactory completion of EART 191 or EART 191D, Earth Sciences Capstone Seminar or Practical Geochemistry.

Option 4: Satisfactory completion of a senior thesis (EART 195) with faculty readers from both departments, which must include a significant element of independent research or original work and can only be undertaken after agreement is obtained from faculty members to supervise it (at least three quarters in advance of completion).

Option 5: Satisfactory completion of a 5-credit internship (EART 198) under the guidance of an on-site supervisor, with coordination and prior approval of the Earth and Planetary Science Department's internship director. The project must include a comprehensive final written report.

* EART 189A and EART 189B have as prerequisites EART 109 and EART 109L, EART 110A, and EART 110B and EART 110M.

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Sample Four-Year Planner

Year	Fall	Winter	Spring	Summer (optional)
Entering				College 1A Summer Edge (optional)
1st (frosh)	ANTH 1 College 1	ANTH 2 WRIT 1/WRIT 1E (if needed)	ANTH 3 EART 20 EART 20L*	
2nd (soph)	MATH 11A or MATH 19A ANTH elective	MATH 11B or MATH 19B CHEM, PHYS or BIO	CHEM, PHYS or BIO CHEM, PHYS	

			or BIO
	WRIT 2**		
3rd (junior)	EART 110A	EART elective	ANTH elective
	CHEM, PHYS or BIO	CHEM, PHYS or BIO	EART elective
4th (senior)	ANTH elective	EART elective	ANTH elective
	Sr comp	Sr comp	Sr comp

* EART 5, EART 10, EART 20 and corresponding labs are interchangeable.

** WRIT 2 should be taken in or before spring quarter of the second year.

In addition to the specific courses shown in these planners, a student must complete courses satisfying the CC, ER, IM, SR, and TA general education requirements.

Sample Two-Year Planner

This planner assumes that students have completed all lower-division requirements except ANTH 1 and EART 5 and EART 5L, or EART 10 and EART 10L, or EART 20 and EART 20L.

Year	Fall	Winter	Spring	Summer (optional)
Entering				KRSG 1T
				Summer Edge (optional)
1st (junior)	ANTH 1	EART elective	EART elective	
	EART 5 EART 5L	ANTH elective	ANTH elective	
2nd (senior)	ANTH elective	ANTH elective	ANTH 194+ or ANTH 196+ or EART 189A*or EART 191 or sr thesis (EART 195)†	
	EART 110A*	EART elective		
	(Sr thesis only) EART 199†	(Sr thesis only) EART 199†		

*Students who wish to complete their capstone with EART 189A and EART 189B should be aware that the following courses are prerequisites: EART 109 EART 109L, EART 110A, and EART 110B EART 110M. Students must also complete EART 189B in summer to fulfill the summer field capstone.

+Satisfactory completion of ANTH 194 or ANTH 196 series (any senior seminar in physical anthropology or archaeology) fulfills the capstone. Enrollment in ANTH 194 and ANTH 196 series courses is restricted to seniors.

†Students expecting to write a senior thesis for their comprehensive requirement are required to contact the department at least three quarters before graduation to identify the intended project and faculty adviser. Senior theses usually require at least two or three quarters for completion.

EARTH SCIENCES MINOR

Course Requirements

Students can earn a minor in Earth sciences by taking the following courses:

Lower-Division Courses

Choose one of the following options:

	Either these courses	
EART 5	California Geology	5
EART 5L	California Geology Laboratory	1
	or these courses	
EART 10	How the Earth Works	5
EART 10L	Geologic Principles Laboratory	1
	or these courses	

EART 20	Environmental Geology	5
EART 20L	Environmental Geology Laboratory	1

Upper-Division Courses

Students take five upper-division Earth sciences or ocean sciences courses of 5 credits or more, chosen from EART 100-199 (excluding EART 196B and EART 198) or OCEA 100-199. No more than one quarter of EART 199 or OCEA 199 may be used as an elective. Lecture/lab combinations count as one course. If a lecture has a lab offered (required or optional), the lab must be passed to count for this requirement.

ENVS 115A and ENVS 115L are open to Earth science students with permission of the instructor, and taken together are approved as one elective.

Students are encouraged to take more than the minimum number of elective courses and may craft an elective distribution from many areas of specific research and career interests.

Letter Grade Policy

All courses used to satisfy requirements for the Earth sciences minor must be taken for a letter grade with the exception of EART 195, EART 198, EART 199 and OCEA 199. These courses may be taken pass/no pass.

EARTH AND PLANETARY SCIENCES CONTIGUOUS BACHELORS MASTERS PATHWAY

Information and Policies

Introduction

The Earth and Planetary Sciences contiguous five-year Bachelor's/Master's program allows motivated students to complete a B.S. in Earth sciences or environmental sciences, and then an M.S. in Earth sciences in five years with appropriate planning. The program is designed for students who have demonstrated aptitude for fundamental course work in the classroom, as well as the capacity, interest, and motivation to conduct independent research through collaborations with a faculty mentor.

Eligibility Requirements

Students enrolled in the Earth sciences B.S. or environmental sciences B.S. programs who will complete their undergraduate degree within normative time (four years for students who enter the B.S. program as frosh, three years for sophomore transfer students, or two years for junior transfer students) are eligible for the contiguous Bachelor's/Master's program. Interested students from other majors may petition the department for admission to the pathway, provided that they have been participating in research with faculty in Earth and Planetary Sciences and have a coursework foundation that will enable success in the graduate curriculum. A GPA in the major of 3.0 or higher is required, as well as demonstrated research progress and a strong endorsement from a sponsoring faculty adviser. Students must complete their undergraduate degree requirements by the end of the summer quarter prior to enrolling in the M.S. program in the fall.

Application Process

Interested students should attend an information session during their junior year and complete an associated survey to declare their interest in the Bachelor's/Master's program. During the fall quarter of their senior year, students must formally apply to the master's program during the normal admissions cycle and through the standard graduate application process. The application deadline is typically in early January.

Course Requirements

Program Requirements

Students in the Bachelor's/Master's program must take a minimum of 35 credits total of graduate and upper-division undergraduate courses, of which no more than 15 credits may be upper-division undergraduate courses. Of the required graduate-level courses, a minimum of 20 credits must be courses other than supervised research (EART 297 - Independent Study) except by special exception of the Graduate Council. All Bachelor's/Master's program students will take the required graduate core series of EART 203 - Introductory Teaching Seminar, EART 204 - Earth And Planetary Sciences Foundations, and EART 206 - Great Papers in the Earth Sciences.

In addition, students in the program must choose at least one "subject" course focusing on specific Earth and planetary sciences content, and one "analytical" course focusing on a quantitative method. The classes that fulfill these requirements are listed in the EPS Graduate Student Handbook and in the course lists below. Other classes may be allowed with special approval from the faculty graduate representative.

Analytical and subject classes may be taken in the senior year; the credits will count toward 180 undergraduate credits and the course can count toward the B.S. degree upper-division elective requirement, but the analytical or subject content will fulfill the M.S. program requirement. However, class credits cannot be double counted in both B.S. and M.S. degrees, so students are still required to complete 35 credits (no more than 15 of which may be upper-division undergraduate) during their M.S. career. In addition, EART 195 cannot count toward the M.S. degree and students cannot earn credit for a graduate course when they have previously taken the cross-listed undergraduate version. In order to fulfill the capstone requirement for the M.S. degree, students must also complete a master's thesis (Plan I).

The M.S. thesis is a scholarly contribution consisting of results of an original research project by a student. Students are strongly encouraged to prepare their results for publication in peer-reviewed literature and to present their work publicly

at conferences. Students in the Contiguous Bachelors Masters Pathway are expected to complete the M.S. degree in one year, by the end of summer quarter.

Subject Courses

EART 207	Tectonics	5
EART 208	Methods in Paleoclimatology	5
EART 220	Ground Water Modeling	5
EART 254	The Climate System	5
EART 258	Deep Time Paleoclimates	5
EART 262	Planetary Interiors	5
EART 263	Planetary Surfaces	5
EART 264	Planetary Atmospheres	5
EART 270	Global Seismology	5
EART 272	Geophysical Fluid Dynamics	5
EART 273	Earthquake Physics	5
EART 274	Crustal Deformation	5
AM 275	Magnetohydrodynamics	5
OCEA 213	Biogeochemical Cycles	5

EART 208 currently not offered.

Analytical Courses

EART 225	Statistics and Data Analysis in the Geosciences	5
EART 229	Isotopic Methods in Environmental Science	5
EART 265	Order of Magnitude Estimation	5
EART 266	Geologic Signal Processing and Inverse Theory	5
AM 100	Mathematical Methods for Engineers	5
AM 147	Computational Methods and Applications	5
AM 211	Foundations of Applied Mathematics	5
AM 215	Stochastic Modeling in Biology	5
ASTR 260	Instrumentation for Astronomy	5
CHEM 122	Principles of Instrumental Analysis	5
BIOE 286	Experimental Design and Data Analysis	5
BIOE 286L	Experimental Design and Data Analysis Lab	2
ENVS 215A	Geographic Information Systems and Environmental Applications	5
ENVS 215L	Exercises in Geographic Information Systems	2
MATH 106	Systems of Ordinary Differential Equations	5
MATH 107	Partial Differential Equations	5
OCEA 215	Predicting the Atmosphere, Ocean, and Climate	5
OCEA 260	Introductory Data Analysis in the Ocean and Earth Sciences	5
PHYS 116A	Mathematical Methods in Physics	5
PHYS 116C	Mathematical Methods in Physics	5
PHYS 116D	Mathematical Methods in Physics	5
PHYS 160	Practical Electronics	5
PHYS 242	Computational Physics	5
STAT 132	Classical and Bayesian Inference	5
STAT 206	Applied Bayesian Statistics	5
STAT 226	Spatial Statistics	5

Planners

Below are 5- and 3-year planners for students in the Bachelor's/Master's program who enter UC Santa Cruz as frosh and as junior transfer students.

Five-Year Planner for Students Entering the Earth Sciences B.S. as Frosh

Year	Fall	Winter	Spring
1st (frosh)	EART 5 EART 5L	MATH 11A or MATH 19A	MATH 11B or MATH 19B
	CHEM 3A	CHEM 3B CHEM 3BL	CHEM 3C CHEM 3CL
2nd (soph)	EART 110A*	EART 110B EART 110M*	PHYS 6B PHYS 6M
	PHYS 6A PHYS 6L	Advanced math/coding	EART 110C EART 110N
3rd (junior)	EART elective	EART elective	EART elective
			EART elective
4th (senior)	EART 199†	EART 199†	EART 195† and/or
	EART elective	EART elective	EART 189A*
5th (master's)	EART 203	EART 206	
	EART 204	Subject or Analytical Class††	Subject or Analytical Class††

	EART 297	EART 297	EART 297

*Students who wish to complete their capstone with EART 189A and EART 189B should be aware that the following courses are prerequisites: EART 109 and EART 109L, EART 110A, and EART 110B and EART 110M. Students must also complete EART 189B in summer to fulfill the summer field capstone. In addition to the specific courses shown in these planners, a student must complete courses satisfying the CC, ER, IM, SR, and TA general education requirements.

†Students expecting to write a senior thesis for their comprehensive requirement are required to contact the department at least three quarters before graduation to identify the intended project and faculty adviser. Senior theses usually require at least two or three quarters for completion.

†† In consultation with their research adviser and faculty graduate representative, the student will select at least one "subject" course focusing on specific Earth and planetary sciences content and one "analytical" course that builds quantitative analytical skills (from a list in the EPS Graduate Handbook) and also included above.

Three-Year Planner for Students Entering the Earth Sciences B.S. as Junior Transfers

This planner assumes that students have completed all lower-division requirements, other than PHYS 6A and PHYS 6L, PHYS 6B and PHYS 6M, and advanced math/coding.

Year	Fall	Winter	Spring
1st (junior)	Advanced math/coding	PHYS 6A PHYS 6L	PHYS 6B PHYS 6M
	EART 110A*	EART 110B EART 110M*	EART 110C EART 110N
		EART elective	EART elective
2nd (senior)	EART elective		EART elective
	EART elective	EART elective	EART 189A* and/or
	EART 199†	EART 199†	EART 195†
3rd (master's)		EART 206	
	EART 203	Subject or Analytical Class††	Subject or Analytical Class††
	EART 204	EART 297	EART 297

*Students who wish to complete their capstone with EART 189A and EART 189B should be aware that the following courses are prerequisites: EART 109 and EART 109L, EART 110A, and EART 110B and EART 110M. Students must also complete EART 189B in summer to fulfill the summer field capstone.

†Students expecting to write a senior thesis for their comprehensive requirement are required to contact the department at least three quarters before graduation to identify the intended project and faculty adviser. Senior theses usually require at least two or three quarters for completion.

†† In consultation with their research advisor and faculty graduate representative, the student will select at least one "subject" course focusing on specific Earth and planetary sciences content and one "analytical" course that builds quantitative analytical skills (from a list in the EPS Graduate Handbook) and also included above.

EARTH AND PLANETARY SCIENCES M.S.

Introduction

The graduate program in the Earth and Planetary Sciences Department is designed to prepare students for research, industry, consulting, teaching, and numerous other career paths, including business and law. The aim is to develop habits of critical analysis and thorough documentation; skills in quantitative field, computational, and/or laboratory research; and proficiency in one or more fields of research. The fundamental requirements for admission to the program are substantial evidence of superior scholarship, dedication and determination to do quality work, and aptitude for original research. Preparation in the basic sciences equivalent to the requirements for the Earth sciences bachelor's degree at UC Santa Cruz is expected and, for non-undergraduate Earth sciences majors, achieving breadth of knowledge across the Earth and planetary sciences is expected. Excellent scholars from other disciplines, including chemistry, physics, engineering, biology, or astronomy are both eligible and encouraged to apply. Gaps in knowledge can be made up through coursework.

UC Santa Cruz awards both the Master of Science (M.S.) and the Doctor of Philosophy (Ph.D.) degrees. The M.S. degree may be the terminal degree for someone seeking careers in industry, government, or teaching at the secondary level. It may also be an initial step toward the Ph.D. degree, in which the student gains knowledge and confidence in carrying out and completing a more complex scientific project. Details regarding admission to graduate standing, financial aid, examinations, and the requirements for the Master of Science and Doctor of Philosophy degrees are available from the Earth and Planetary Sciences Department graduate studies webpage. Additional details can be found at the UC Santa Cruz Division of Graduate Studies.

Requirements

Course Requirements

Plan I - Thesis M.S. Track

Prior to the first quarter of study, each first-year thesis track student must meet with their faculty advisor to determine a customized study plan designed to improve breadth and enable research goals. Immediately afterwards, a meeting is scheduled with the faculty graduate representative to finalize and approve this initial discussion with a written course plan. Yearly academic review meetings with the primary advisor will then reassess the student's progress in completing these courses and independent research.

In their first year, all Plan I thesis-track graduate students register for:

EART 203	Introductory Teaching Seminar	1
EART 204	Earth and Planetary Sciences Foundations	5
EART 206	Great Papers in the Earth Sciences	5

Subject Courses

EART 207	Tectonics	5
EART 208	Methods in Paleoclimatology	5
EART 220	Ground Water Modeling	5
EART 254	The Climate System	5
EART 258	Deep Time Paleoclimates	5
EART 262	Planetary Interiors	5
EART 263	Planetary Surfaces	5
EART 264	Planetary Atmospheres	5
EART 270	Global Seismology	5
EART 272	Geophysical Fluid Dynamics	5
EART 273	Earthquake Physics	5
EART 274	Crustal Deformation	5
AM 275	Magnetohydrodynamics	5
OCEA 213	Biogeochemical Cycles	5

EART 208 currently not offered.

Analytical Courses

EART 225	Statistics and Data Analysis in the Geosciences	5
EART 229	Isotopic Methods in Environmental Science	5
EART 265	Order of Magnitude Estimation	5
EART 266	Geologic Signal Processing and Inverse Theory	5
AM 100	Mathematical Methods for Engineers	5
AM 147	Computational Methods and Applications	5
AM 211	Foundations of Applied Mathematics	5
AM 215	Stochastic Modeling in Biology	5
ASTR 260	Instrumentation for Astronomy	5
CHEM 122	Principles of Instrumental Analysis	5
BIOE 286	Experimental Design and Data Analysis	5
BIOE 286L	Experimental Design and Data Analysis Lab	2
ENVS 215A	Geographic Information Systems and Environmental Applications	5
ENVS 215L	Exercises in Geographic Information Systems	2
MATH 106	Systems of Ordinary Differential Equations	5
MATH 107	Partial Differential Equations	5
OCEA 215	Predicting the Atmosphere, Ocean, and Climate	5
OCEA 260	Introductory Data Analysis in the Ocean and Earth Sciences	5
PHYS 116A	Mathematical Methods in Physics	5
PHYS 116C	Mathematical Methods in Physics	5
PHYS 116D	Mathematical Methods in Physics	5
PHYS 160	Practical Electronics	5
PHYS 242	Computational Physics	5
STAT 132	Classical and Bayesian Inference	5
STAT 206	Applied Bayesian Statistics	5
STAT 226	Spatial Statistics	5

In subsequent years, all students participate in:

EART 293	Graduate Research Seminar	1

Plan II - Coursework M.S. Track

The Plan II Coursework M.S. track is a professional program designed to allow students to increase their breadth, quantitative depth, or emphasis on a particular specialty; to provide the student with a stronger background toward competition for jobs or an enhancement of skills for current employment (e.g., K–14 teaching); and to allow students from other disciplines (e.g., biology, physics, chemistry, mathematics, environmental studies) to acquire advanced training in Earth and planetary sciences. Prior to the first quarter of study, students meet with their faculty advisor to develop a study plan of at least nine 5-credit courses, and a statement of objectives. Of these courses, only one can be from the EART 280-EART 290 series, and at least 20 credits must come from graduate courses numbered EART 200-EART 279. One of the nine courses can be an independent study involving a focused research project. It is expected that the course plan will comprise a minimum of 45 quarter credits at the graduate-level and quantitative, upper-division, undergraduate-level elective courses. The course plan must be approved by the graduate representative. Students in the Plan II Coursework M.S. track are expected to complete the degree in one year, by the end of summer quarter.

Plan II Coursework M.S. students are required to fulfill one of the following capstone options: a substantial review/research manuscript or a comprehensive oral examination based on their coursework.

Pre-Qualifying Requirements

Admission to the Plan II Coursework M.S. track requires explicit documented sponsorship by an EPS faculty member.

Foreign Language Requirements

There is no foreign-language requirement other than demonstrated proficiency in English. Applicants from countries where English is not the primary language must take either the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) test.

Teaching Experience

It is recommended that all thesis-track graduate students attain some teaching experience while at UC Santa Cruz.

Other Requirements

Applying for Graduation

EARTH AND PLANETARY SCIENCES PH.D.

Introduction

The graduate program in the Earth and Planetary Sciences Department is designed to prepare students for research, industry, consulting, teaching, and numerous other career paths, including business and law. The aim is to develop habits of critical analysis and thorough documentation; skills in quantitative field, computational, and/or laboratory research; and proficiency in one or more fields of research. The fundamental requirements for admission to the program are substantial evidence of superior scholarship, dedication and determination to do quality work, and aptitude for original research. Preparation in the basic sciences equivalent to the requirements for the Earth sciences bachelor's degree at UC Santa Cruz is expected and, for non-undergraduate Earth sciences majors, achieving breadth of knowledge across the Earth and planetary sciences is expected. Excellent scholars from other disciplines, including chemistry, physics, engineering, biology, environmental sciences, or astronomy are both eligible and encouraged to apply. Gaps in knowledge can be made up through coursework.

UC Santa Cruz awards both the Master of Science (M.S.) and the Doctor of Philosophy (Ph.D.) degrees. The M.S. degree may be the terminal degree for someone seeking careers in industry, government, or teaching at the secondary level. It may also be an initial step toward the Ph.D. degree, in which the student gains knowledge and confidence in carrying out and completing a more complex scientific project. Details regarding admission to graduate standing, financial aid, examinations, and the requirements for the Master of Science and Doctor of Philosophy degrees are available from the Earth and Planetary Sciences Department graduate studies webpage. Additional details can be found at the UC Santa Cruz Division of Graduate Studies.

Advancement to Candidacy

Course Requirements

In their first year, all Ph.D. students register for:

EART 203	Introductory Teaching Seminar	1
EART 204	Earth and Planetary Sciences Foundations	5
EART 206	Great Papers in the Earth Sciences	5

Subject Courses

EART 207	Tectonics	5
EART 208	Methods in Paleoclimatology	5
EART 220	Ground Water Modeling	5
EART 254	The Climate System	5
EART 258	Deep Time Paleoclimates	5
EART 262	Planetary Interiors	5
EART 263	Planetary Surfaces	5
EART 264	Planetary Atmospheres	5
EART 270	Global Seismology	5
EART 272	Geophysical Fluid Dynamics	5
EART 273	Earthquake Physics	5
EART 274	Crustal Deformation	5
AM 275	Magnetohydrodynamics	5
OCEA 213	Biogeochemical Cycles	5

Analytical Courses

EART 225	Statistics and Data Analysis in the Geosciences	5
EART 229	Isotopic Methods in Environmental Science	5
EART 265	Order of Magnitude Estimation	5
EART 266	Geologic Signal Processing and Inverse Theory	5
AM 100	Mathematical Methods for Engineers	5

PHYS 116C	Mathematical Methods in Physics	5
PHYS 116D	Mathematical Methods in Physics	5
PHYS 160	Practical Electronics	5
PHYS 242	Computational Physics	5
STAT 132	Classical and Bayesian Inference	5
STAT 206	Applied Bayesian Statistics	5
STAT 226	Spatial Statistics	5

In subsequent years, all Ph.D. students participate in:

EART 293	Graduate Research Seminar	1

Foreign Language Requirements

There is no foreign-language requirement other than demonstrated proficiency in English. Applicants from countries where English is not the primary language must take either the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) test.

Teaching Experience

It is recommended that all thesis-track graduate students attain some teaching experience while at UC Santa Cruz.

Pre-Qualifying Requirements

Qualifying Examination

To qualify for candidacy in the Ph.D. program, each student must pass an oral examination in their area of specialization by the end of their third year of graduate study (second year if entering with a master's degree in the same field). The examination is based on a written research proposal presenting one or more specific questions to be researched by the student in the course of completing their Ph.D. thesis. Students are expected to have in-depth knowledge of fields relevant to the proposal, including familiarity with the professional literature. For additional details, please review the EPS Graduate Handbook.

Post-Qualifying Requirements

[Optional Catchall]

Dissertation

Dissertation

The Ph.D. dissertation is a scholarly contribution to knowledge that embodies the results of original and creative effort by the student. Students are urged to prepare their dissertations for publication in peer-reviewed professional journals.

The dissertation, completed in the format specified by the Graduate Council and approved by the dissertation committee, must be submitted to the Graduate Division no later than the last day of the term in which the degree is to be awarded. As stated in the Graduate Division's Graduate Handbook, a Ph.D. student must complete their degree within three calendar years from Advancing to Candidacy, in order to remain in good academic standing. All full-time Ph.D. students are expected to complete their degree objectives within six calendar years from the date of first enrollment in the program.

Dissertation Defense

A public oral defense of the dissertation is required prior to completion of the Ph.D. degree.

Academic Progress

Prior to the first quarter of study, each first-year Ph.D. student must meet with their faculty advisor to determine a customized study plan designed to improve breadth and enable research goals. Immediately afterwards, a meeting is scheduled with the faculty graduate representative to finalize and approve this initial discussion with a written course plan. Yearly academic review meetings will then reassess the student's progress in completing these courses and independent research, initially with the primary advisor but eventually with a reading committee.

Environmental Studies/Biology Combined Major B.A. (p. 763)

UNDERGRADUATE PROGRAM

The Department of Ecology and Evolutionary Biology (EEB) is devoted to the study of ecological and evolutionary processes across marine, terrestrial, and freshwater environments. Our approach is to blend an emphasis on key ideas and concepts with a focus on organismal biology and natural history. Recent advances in both analytical and genetic methods have given us a far richer understanding of the complexities of ecological and evolutionary processes in the natural world, allowing us to tackle ever more sophisticated questions. Biologists at UC Santa Cruz have played and will continue to play an important part in these advances, and the campus programs offer unique educational opportunities in biology that feature small class sizes, field studies, and extensive faculty-student interactions.

Class offerings and student research opportunities leverage the varied natural environments in the Monterey Bay region, throughout the western US, and in more distant locations such as Africa, Europe, Mexico, Tahiti, Australia, and East Asia. This emphasis on field and laboratory studies is the hallmark of our undergraduate majors. Within this context they address not only basic ecological and evolutionary processes, but also the application of this knowledge to advance environmental, conservation and sustainability science.

An outstanding group of faculty, each with a vigorous, internationally recognized research program, is available to teach courses in their specialties as well as core courses for the major. Areas of research strength within the department include plant biology, animal behavior, physiology, evolution, ecology, and marine biology. UC Santa Cruz is unique in the UC system in providing exceptional opportunities for undergraduate research, allowing students to interact one-on-one with faculty and other researchers in a laboratory or field setting.

Students may plan a program that leads to one of several bachelor of arts (B.A.) and bachelor of science (B.S.) degrees. These different majors overlap considerably in content and differ mainly in providing students with flexibility to take a few more courses that focus on the major subject. Students may choose from the following major options:

Biology B.A. (p. 353)

Ecology and Evolution B.S. (p. 360)

Marine Biology B.S. (p. 369)

Plant Sciences B.S. (p. 377)

Environmental Studies/Biology combined major B.A. (p. 763) (administered by the Environmental Studies Department).

EEB offers a variety of independent research opportunities for students. Advanced undergraduates, with the guidance of faculty mentors, have access to extensive departmental laboratories, including state-of-the-art genetics, physiology, and marine science facilities, for independent research.

Fieldwork draws on a remarkable variety of terrestrial, marine, and freshwater ecosystems, all in close proximity to campus. Terrestrial studies are supported by the UC Santa Cruz reserve on campus, an arboretum, greenhouse facility, and vehicles to transport students to field sites off campus. Freshwater studies have access to a number of coastal tributaries and laboratory facilities at the Coastal Biology Building. Marine studies are supported on the Coastal Science Campus with running seawater facilities, a boating program, and an AAUS accredited SCUBA diving program for underwater classes and research. Año Nuevo Island, north of Santa Cruz, is the site of extensive behavioral studies of marine mammals. The Norris Center, located in the Environmental Studies Department on the main campus, provides a natural history hub for the entire campus and offers opportunities for students to learn about natural history and museum techniques. In addition to coursework, there is an array of opportunities for directed independent study that enables majors to enhance their upper-division programs to reflect and strengthen their own interests and goals in the sciences.

Descriptions of faculty research interests and nearby coastal and marine environments, institutions, and facilities are available through the Ecology and Evolutionary Biology (EEB) Department website.

GRADUATE PROGRAM

The ecology and evolutionary biology (EEB) graduate program at UC Santa Cruz reflects the remarkable local and global diversity of species and environments studied by the EEB faculty and students. The vision of the EEB graduate program is to provide a nurturing, creative, and intellectual environment conducive to the development of world-class scientists. The EEB graduate program encourages close working relations between students and faculty in an informal atmosphere advantageous to rapid learning and professional growth. Interdisciplinary collaborations with oceanographers, geologists, mathematicians, environmental and conservation biologists, toxicologists, and others enable students to explore the conceptual connections between related fields as they acquire mastery in their areas of specialization.

The graduate program in EEB at UC Santa Cruz is one of the premier EEB programs in the country. UCSC graduate students in EEB regularly win prestigious research fellowships and awards for their presentations at international meetings in addition to publishing their work in the best journals of their fields. Students take advantage of local field sites and state-of-the-art departmental laboratories, more than two-thirds of the EEB faculty also participate in field studies throughout the world, especially in Africa, Latin America, Antarctica, the Arctic, and around the Pacific Rim. Research in EEB comprises four core areas: ecology, evolutionary biology, physiology, and behavior.

BIOLOGY B.A.

Information and Policies

Introduction

The general biology bachelor of arts major permits flexibility, but demands careful attention to a student's own interests and plans. Each student should select courses on the basis of up-to-date information in consultation with an Ecology and Evolutionary Biology (EEB) Department advisor or faculty advisor whose interests reflect the student's interests. A hallmark of the major is the many field courses that introduce students to a diversity of ecosystems and the skills to conduct field research. See the Ecology and Evolutionary Biology undergraduate webpage for more information on these courses.

Program Learning Outcomes

The undergraduate curriculum offered by the Department of Ecology and Evolutionary Biology (EEB) is designed to ensure that all students declared in any EEB-sponsored major will achieve the following seven program learning outcomes.

1. Students will demonstrate broad-based knowledge of the fundamentals of ecology, behavior, evolution, and physiology and the relationships among these disciplines.
2. Students will demonstrate skills in the observation and experimental study of organisms, using both field-based and laboratory-based approaches.
3. Students will demonstrate skills in identifying, accessing, comprehending, and synthesizing scientific information, including interpretation of the primary scientific literature. This includes understanding key questions and hypotheses, interpreting results and conclusions, and evaluating quality through critique.
4. Students will demonstrate the ability to conceive and execute independent scientific research, including developing their own questions and hypotheses, designing an appropriate theoretical or empirical/experimental approach, executing that approach, and analyzing and interpreting data.
5. Students will demonstrate an ability to understand and apply fundamental quantitative skills, including models and statistical analyses, so as to properly interpret published research and apply such skills in their own research.
6. Students will demonstrate the ability to communicate scientific work, such as a scientific paper, proposal, essay, or notebook, in written, oral or poster format.
7. Students will exhibit strong teamwork and problem-solving skills. They will demonstrate the ability to make arguments from evidence and work together to find optimal solutions.

Academic Advising for the Program

Academic advising is available at the Department of Ecology and Evolutionary Biology (EEB) undergraduate advising office located in the Coastal Biology Building on the University of California, Santa Cruz Coastal Science Campus, and via email at eebadvising@ucsc.edu. The undergraduate webpages contain advice and information pertinent to students' most frequently voiced questions. Each student should review the information posted on the website; for further assistance, contact an EEB undergraduate advisor at eebadvising@ucsc.edu. Transfer students should also review the Transfer Information and Policy Section.

Getting Started in the Major: Frosh

Prerequisites

An online mathematics placement is required to enroll in a mathematics course or CHEM 3A or CHEM 4A. Students are expected to take this examination prior to orientation, or at least well before the enrollment appointment for their first planned quarter at UCSC. Students are encouraged to work in the learning modules, and assess/reassess (three total assessments allowed) until they place into MATH 16A (recommended) or MATH 11A or MATH 19A. For more information, see the mathematics placement website.

The introductory biology sequence is prerequisite to virtually all upper-division biology courses. BIOL 20A (offered by the Molecular, Cell, and Developmental Biology Department) has a prerequisite of CHEM 3A or CHEM 4A. Therefore, it is essential for students to start chemistry as soon as possible. Students who have not taken CHEM 3A or CHEM 4A may begin the introductory sequence with BIOE 20C. The entire introductory biology sequence should be taken in the first and second year, concurrently with or following the general chemistry sequence, with all completed by the sixth quarter campus declaration deadline. We also strongly recommend completing the lower-division physics requirements early in your academic career.

Transfer Information and Policy

Transfer Admission Screening Policy

The following courses or their equivalents are required prior to transfer, by the end of the spring term for students planning to enter in the fall. Some courses may be satisfied via exam credit.

BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOE 20C	Ecology and Evolution	5
	AND	
	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
	or this course	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5

A letter grade of C or above must be earned in all major screening courses.

Getting Started in the Major: Transfer Students

Transfer students who satisfy the major screening requirements may declare the major at any time after matriculation only after their official transcripts have been posted to their MyUCSC student portal by the UC Santa Cruz Office of Admissions.

Beginning in late June and early July (for fall transfer students), EEB Advising will review admitted students' reported transfer course work and determine how it applies to their major's requirements.
EEB Advising will contact admitted students via email. The email will include information on how students' transfer coursework fulfills major requirements. We will suggest courses for students' fall enrollment, and invite you to make an appointment to talk with EEB Undergraduate Advising or direct questions to eebadvising@ucsc.edu. Transfer students may also expect to receive regular email messages from EEB Advising in June, July, and August with additional information about the major.

Major Qualification Policy and Declaration Process

Major Qualification

All courses must be taken for a letter grade. The following qualification courses, or their equivalents, must be completed with a grade of C (2.0) or better. Some courses may be satisfied via exam credit.

All of the following courses:

BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOE 20C	Ecology and Evolution	5

And one of the following options:

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
	or this course	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5

Note: This requirement may also be satisfied with prior completion of CHEM 1A, CHEM 1B, CHEM 1C, CHEM 1M, and CHEM 1N or equivalent. See an EEB undergraduate advisor for additional information.

How to Declare a Major

Students may log into MyUCSC and submit the Petition for Major/Minor via MyUCSC as soon as they have completed the EEB major qualification requirements and/or reached their declaration deadline quarter, whichever comes first. Information on major declaration can be found here.

Additional questions may be directed to eebadvising@ucsc.edu.

Appeal Process

Students who are not eligible to declare the major may appeal this decision by submitting an appeal letter to EEB undergraduate advising. The department will declare the student's major, deny the student admission to the major, or set conditions for admission (provided the conditions may be met within no more than one quarter of enrollment). Within 15 business days of receipt of the appeal, the department will notify the student and college of the decision. For more information about the appeal process, see the appeal process website.

Letter Grade Policy

All courses used to satisfy any major requirement must be taken for a letter grade, except for approved courses which are ONLY offered as Pass/No Pass (P/NP).

[Optional Catchall]

Course Substitution Policy

To discuss the process for a course substitution, contact an EEB undergraduate advisor.

At least half of the upper-division courses (numbered BIOE 100 – BIOE 179) required for each major must be taken in EEB at UC Santa Cruz and not as transfer credits from another department or institution.

Transfer students are advised to contact an EEB undergraduate advisor before enrolling in any upper-division courses at other institutions. For more information on transferring courses to UC Santa Cruz, please consult the Transfer Coursework website. Additional information for transfer students is provided above in the “Transfer Students” section.

Only one upper-division course requirement may be met with a research-based independent study or graduate-level UC Santa Cruz biology course.

Double Majors and Major/Minor Combinations Policy

Students cannot double major/minor in Biology B.A., Ecology and Evolution B.S., Marine Biology B.S., or Plant Sciences B.S. and any other major/minor offered by the EEB Department, nor by the Departments of Chemistry and Biochemistry; Microbiology and Environmental Toxicology; or MCD Biology, including the Global and Community Health B.S. major.

Should a student choose to double major, they must qualify for and complete the disciplinary communication and comprehensive requirements for each of the majors.

Study Abroad

The UC Education Abroad Program (UCEAP) offers qualified students unique opportunities to broaden their educational horizons. The EEB Department encourages interested students to participate. It is possible to satisfy major requirements

abroad and graduate on time; consult with an EEB undergraduate advisor early in the planning process.

Many programs are in English-speaking countries or use English for advanced courses. Many programs offer small classes, extensive laboratories, and/or field research experience.

There are excellent programs in Costa Rica, Australia, New Zealand, the United Kingdom, Denmark, and Germany, among others. The Costa Rica Tropical Biology Program is of note to students interested in tropical biology and ecology. Held spring and fall quarters at the Monteverde research station, this program gives students experience with hands-on field research and offers a homestay program. The University of Queensland (Australia) offers an intensive, full-semester marine science program, which includes stays at research stations on the Great Barrier Reef and in sheltered mangrove and seagrass habitats near Brisbane.

Students interested in study abroad need to get an early start on their introductory requirements, including chemistry, mathematics, and biology and must declare their major prior to going abroad. Visit the UCEAP office as soon as possible to begin planning and seek advice and approval for your UCEAP plan from an EEB undergraduate advisor prior to participation in UCEAP.

Honors

Honors in the biological sciences majors are awarded to graduating students whose academic performance in all major-required lower and upper-division course options taken at UCSC demonstrates excellence at a grade point average (GPA) of 3.5 to 3.79.

Highest honors are awarded to those students whose performance in all major-required lower and upper-division course options taken at UCSC demonstrates the highest level of excellence and results in a GPA of 3.8 or above.

[Optional Catchall]

Requirements and Planners

Course Requirements

Complete the following requirements. Some courses may be satisfied via exam credit.

Lower-Division Courses

Introductory Biology:

BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOE 20C	Ecology and Evolution	5

General Chemistry:

Choose one of the following options:

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3BL	General Chemistry Lab	2
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4AL	Advanced General Chemistry Lab	2

Students may choose to complete the Chemistry 3 or 4 series.

Note: This requirement may also be satisfied with prior completion of CHEM 1A, CHEM 1B, CHEM 1C, and CHEM 1N or equivalent. See an EEB undergraduate advisor for additional information.

Statistics:

Choose one of the following options:

STAT 5	Statistics	5
	or these courses	
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2

Physics:

Choose one of the following options. Enrollment in PHYS 6A requires concurrent enrollment in the PHYS 6L laboratory as well as either MATH 11A, MATH 16A or MATH 19A (or their equivalents) as a prerequisite.

PHYS 1A	Physics for Everyone	5
PHYS 1B	Physics for Everyone	5
PHYS 6A	Introductory Physics I	5

Upper-Division Courses

A total of **eight (8)** upper-division biology courses, including electives, as follows:

Lecture/Lab Combination Notes:

Lecture and lab combinations generally count as one course. For 5-credit lectures with required, concurrent 2-credit labs, successful completion of both the lab and lecture is required and counts as one course. For 5-credit lectures with optional labs, only the lecture must be successfully completed to count as one course (except for DC requirements). Successful completion of the optional lab will count as overall unit credit and may count toward the comprehensive requirement. 5-credit lectures with 5-credit labs count as two courses. 7-credit labs count as one course.

Three core courses:

	Either this course	
BIOE 106	Principles of Genetics for EEB	5
	or this course	
BIOL 105	Genetics	5
	AND	
BIOE 107	Ecology	5
BIOE 109	Evolution	5

Note: BIOE 106, Principles of Genetics for EEB, is the recommended genetics course for students pursuing an EEB-sponsored major (Biology B.A., Ecology and Evolution B.S., Marine Biology B.S., and Plant Sciences B.S.).

One of the following anatomy or physiology courses:

BIOE 131	Animal Physiology	5
BIOE 131L	Animal Physiology Laboratory	2
BIOE 133	Exercise Physiology	5
BIOE 133L	Exercise Physiology Laboratory	2
BIOE 134	Comparative Vertebrate Anatomy	5
BIOE 134L	Comparative Vertebrate Anatomy Laboratory	2
BIOE 135	Plant Physiology	5
BIOE 135L	Plant Physiology Laboratory	2
BIOE 136	Environmental Physiology	5
METX 135	Functional Anatomy	5
METX 135L	Functional Anatomy Lab	3

Note: Lecture/lab combinations count as a single course. See note under "Upper-Division Courses" for more details.

BIOE 131 BIOE 131L: Laboratory optional (concurrent enrollment not required).

Electives

Four additional **BIOE courses numbered 100 - 179 of 5 or more credits**, or the following courses:

BIOL 100	Biochemistry	5
BIOL 101	Molecular Biology	5
METX 100	Introduction to Microbiology	5
METX 100L	Microbiology Laboratory	5
METX 115	Environmental Health Science	5
METX 133	Medical Microbiology	5
METX 150	Applied and Environmental Microbiology	5

Note: Lecture/lab combinations count as a single course. See note under "Upper-Division Courses" for more details.

Some of these electives may have prerequisites that do not satisfy major or minor requirements.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. The DC requirement in the biology bachelor of arts degree is satisfied by completing **two** of the following Ecology and Evolutionary Biology courses:

Note: Lecture and 2-credit lab combinations count as a single course.

BIOE 108	Marine Ecology	5
BIOE 114	Herpetology	5
BIOE 114L	Field Methods in Herpetological Research	2
BIOE 117	Systematic Botany of Flowering Plants	5
BIOE 120	Marine Botany	5
BIOE 120L	Marine Botany Laboratory	2
BIOE 122	Invertebrate Zoology	5
BIOE 122L	Invertebrate Zoology Laboratory	2
BIOE 125	Ecosystems of California	5
BIOE 126	Biology of Large Marine Vertebrates	5
BIOE 127	Ichthyology	5
BIOE 127L	Ichthyology Laboratory	2
BIOE 128L	Large Marine Vertebrates Field Course	7
BIOE 129	Biology of Marine Mammals	5
BIOE 129L	Biology of Marine Mammals Laboratory	2
BIOE 137	Molecular Ecology	5
BIOE 141L	Behavioral Ecology Field Course	7
BIOE 145	Plant Ecology	5
BIOE 145L	Field Methods in Plant Ecology	5
BIOE 150L	Ecological Field Methods Laboratory	5
BIOE 151B	Ecology and Conservation in Practice Supercourse: Ecological Field Methods Laboratory	5
BIOE 153C	Disciplinary Communication for Biologists	5
BIOE 157B	Ichthyology Field Class in Southern Africa	7
BIOE 158L	Field Methods in Marine Ecology	5
BIOE 159A	Marine Ecology Field Quarter: Marine Ecology with Laboratory	5
BIOE 161L	Kelp Forest Ecology Laboratory	5
BIOE 171	Disciplinary Communication for Biologists	5
BIOE 172	Population Genetics	5
BIOE 174	Evolutionary Medicine	5

Note: Lecture and 2-credit lab combinations count as a single course. BIOE 117 and BIOE 137 require concurrent enrollment in 2-credit labs, BIOE 117L and BIOE 137L, but these are not part of the DC requirement.

NRS/XBIO 188/XENV 188, California Ecology and Conservation course, taken spring 2023 or later, will satisfy 1/2 DC credit. For more information about this course contact an EEB undergraduate advisor or email eebadvising@ucsc.edu.

Comprehensive Requirement

All majors in the biological sciences require completion of a comprehensive requirement. This requirement can be satisfied in one of the following ways:

- receiving a passing grade in an independent research course, or field/laboratory course listed below.
- completing a senior thesis.

Comprehensive courses offered by Ecology and Evolutionary Biology

Note: Lab courses may have associated prerequisite or corequisite lecture courses.

BIOE 112L	Ornithology Field Studies	2
BIOE 114L	Field Methods in Herpetological Research	2
BIOE 117L	Systematic Botany of Flowering Plants Laboratory	2
BIOE 120L	Marine Botany Laboratory	2
BIOE 122L	Invertebrate Zoology Laboratory	2
BIOE 124L	Mammalogy Laboratory	2
BIOE 127L	Ichthyology Laboratory	2
BIOE 128L	Large Marine Vertebrates Field Course	7
BIOE 129L	Biology of Marine Mammals Laboratory	2
BIOE 131L	Animal Physiology Laboratory	2
BIOE 133L	Exercise Physiology Laboratory	2
BIOE 134L	Comparative Vertebrate Anatomy Laboratory	2
BIOE 135L	Plant Physiology Laboratory	2
BIOE 137L	Molecular Ecology Laboratory	2
BIOE 141L	Behavioral Ecology Field Course	7
BIOE 142L	Animal Behavior in the Wild (A Virtual Field Course)	5
BIOE 145L	Field Methods in Plant Ecology	5
BIOE 150L	Ecological Field Methods Laboratory	5
BIOE 151A	Ecology and Conservation in Practice Supercourse: Ecological Field Methods	5
BIOE 151B	Ecology and Conservation in Practice Supercourse: Ecological Field Methods Laboratory	5
BIOE 151C	Ecology and Conservation in Practice Supercourse: Functions and Processes of Terrestrial Ecosystems	5
BIOE 151D	Ecology and Conservation in Practice Supercourse: Conservation in Practice	5
BIOE 153A	Introduction to Arctic Ecology	5
BIOE 153B	Arctic Ecology	5
BIOE 153C	Disciplinary Communication for Biologists	5
BIOE 155L	Freshwater Ecology Laboratory	5
BIOE 158L	Field Methods in Marine Ecology	5
BIOE 159A	Marine Ecology Field Quarter: Marine Ecology with Laboratory	5
BIOE 159B	Marine Ecology Field Quarter: Ichthyology with Laboratory	5
BIOE 159C	Marine Ecology Field Quarter: Methods in Field Ecology	5
BIOE 159D	Marine Ecology Field Quarter: Methods in Field Ecology Laboratory	5
BIOE 159E	Marine Ecology Field Quarter: Behavioral Ecology	5
BIOE 159F	Marine Ecology Field Quarter: Global Change Ecology	5
BIOE 161L	Kelp Forest Ecology Laboratory	5
BIOE 163L	Ecology of Reefs, Mangroves, and Seagrasses Laboratory	2
BIOE 183W	Undergraduate Research in EEB--Writing	2

Comprehensive courses offered in METX

METX 100L	Microbiology Laboratory	5
METX 135L	Functional Anatomy Lab	3
CRSN 152	IDEASS Laboratory Practicum	3

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

In addition to the specific courses shown in these planners, a student must complete courses satisfying the C, CC, ER, IM, MF, PE, PR, and TA campus general education requirements.

Sample Frosh Planner

Year	Fall	Winter	Spring	Summer
Enter				Colleg

ing				e 1A Summer Edge (optional)
1st (frosh)	BIOE 20C	CHEM 3A	CHEM 3B CHEM 3BL	
	College 1	WRIT 1/WRIT 1E (if needed)	STAT 5 or STAT 7 STAT 7L	
2nd (soph)	BIOL 20A	BIOE 20B	BIOL 105	
	WRIT 2*	PHYS 1A or PHYS 1B or PHYS 6A		
3rd (junior)	BIOE 109	BIOE 107	Anatomy/Physiology	
	Biology elective			
4th (senior)	Biology elective	Biology elective	Biology elective	

Two of the upper-division course options must satisfy DC requirements.

One of the upper-division course options must satisfy the Senior Comprehensive Requirement.

*WRIT 2 should be taken in or before spring quarter of the second year.

Additional Frosh sample planners may be found on the EEB website.

Sample Transfer Planner

	Fall	**Winter**	**Spring**	**Summer**
Entering				KRSG 1T Summer Edge (optional)
3rd (junior)	BIOL 105	BIOE 107	Anatomy/Physiology	
		BIOE 109	STAT 5 or STAT 7 STAT 7L	
	WRIT 2*			
4th (senior)	Biology elective	Biology elective	Biology elective	
	Biology elective	PHYS 1A or PHYS 1B or PHYS 6A		

Two of the upper-division course options must satisfy DC requirements.

One of the upper-division course options must satisfy the Senior Comprehensive Requirement.

*If WRIT 2 is not completed prior to transfer, it should be taken in the first enrolled quarter at UCSC.

Additional Transfer student sample planners may be found on the EEB website.

ECOLOGY AND EVOLUTION B.S.

Information and Policies

Introduction

The ecology and evolution major focuses on general topics that are not specific to taxonomic group or habitat. As such it provides students with interdisciplinary skills necessary for understanding and solving complex problems in ecology, evolution, behavior, and physiology. All of these disciplines address questions on larger spatial and temporal scales that can be applied to important environmental problems, including genetic and ecological aspects of conservation biology and biodiversity.

Students majoring in ecology and evolution will receive a B.S. degree based on an integrated series of courses providing breadth in fundamental areas of biology and allied sciences that enhance understanding of evolutionary and ecological processes. A hallmark of this curriculum is a suite of field courses providing students unique opportunities to learn and conduct research in a host of ecological systems. Students are encouraged to take field courses in their areas of specialization. Other opportunities include participation in research projects with faculty sponsors and the intensive UC Education Abroad Programs (UCEAP) in Costa Rica (tropical biology) and Australia (marine sciences).

Program Learning Outcomes

The undergraduate curriculum offered by EEB is designed to ensure that all students declared in any EEB-sponsored major will achieve the following seven program learning outcomes:

1. Students will demonstrate broad-based knowledge of the fundamentals of ecology, behavior, evolution and physiology and the relationships among these disciplines.
2. Students will demonstrate skills in the observation and experimental study of organisms, using both field-based and laboratory-based approaches.
3. Students will demonstrate skills in identifying, accessing, comprehending and synthesizing scientific information, including interpretation of the primary scientific literature. This includes understanding key questions and hypotheses, interpreting results and conclusions, and evaluating quality through critique.
4. Students will demonstrate the ability to conceive and execute independent scientific research, including developing their own questions and hypotheses, designing an appropriate theoretical or empirical/experimental approach, executing that approach, and analyzing and interpreting data.
5. Students will demonstrate an ability to understand and apply fundamental quantitative skills, including models and statistical analyses, so as to properly interpret published research and apply such skills in their own research.
6. Students will demonstrate the ability to communicate scientific work, such as a scientific paper, proposal, essay, or notebook, in written, oral or poster format.
7. Students will exhibit strong teamwork and problem solving skills. They will demonstrate the ability to make arguments from evidence and work together to find optimal solutions.

Academic Advising for the Program

Academic advising is available at the Department of Ecology and Evolutionary Biology (EEB) undergraduate advising office located in the Coastal Biology Building on the UC Santa Cruz Coastal Science Campus, and via email at eebadvising@ucsc.edu. The undergraduate webpages contain advice and information pertinent to students' most frequently voiced questions. Each student should review the information posted on the website; for further assistance, contact an EEB undergraduate advisor at eebadvising@ucsc.edu. Transfer students should also review the Transfer Information and Policy Section.

Getting Started in the Major: Frosh

Prerequisites

An online mathematics placement is required to enroll in a mathematics course or CHEM 3A or CHEM 4A. Students are expected to take this examination prior to orientation, or at least well before the enrollment appointment for their first planned quarter at UCSC. Students are encouraged to work in the learning modules, and assess/reassess (three total assessments allowed) until they place into MATH 16A (recommended) or MATH 11A or MATH 19A. For more information see the mathematics placement website.

The introductory biology sequence is prerequisite to virtually all upper-division biology courses. BIOL 20A (offered by the Molecular, Cell, and Developmental Biology Department) has a prerequisite of CHEM 3A or CHEM 4A. Therefore, it is essential for students to start chemistry as soon as possible. Students who have not taken CHEM 3A or CHEM 4A may begin the introductory sequence with BIOE 20C. The entire introductory biology sequence should be taken the first and second year, concurrently with or following the general chemistry sequence, with all completed by the sixth quarter campus declaration deadline. We also strongly recommend completing the lower-division physics requirements early in your academic career.

Transfer Information and Policy

Transfer Admission Screening Policy

The following courses or their equivalents are required prior to transfer, by the end of the spring term for students planning

to enter in the fall. Some courses may be satisfied via exam credit.

BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOE 20C	Ecology and Evolution	5
	AND	
	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
	or this course	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5

Plus, one of the following mathematics courses:

MATH 11A	Calculus with Applications	5
MATH 16A	Mathematics for Life Sciences	5
MATH 19A	Calculus for Science, Engineering, and Mathematics	5

A letter grade C or above must be earned in all major screening courses.

In addition, the following courses are recommended prior to transfer to ensure timely graduation.

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3BL	General Chemistry Lab	2
CHEM 3C	General Chemistry	3
CHEM 3CL	General Chemistry Lab	2
	or these courses	
CHEM 4AL	Advanced General Chemistry Lab	2
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4BL	Advanced General Chemistry Lab	2

Plus one of the following mathematics courses:

MATH 11B	Calculus with Applications	5
MATH 16B	Mathematics for Life Sciences	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

Choose one of the following options:

	Either these courses	
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics I Laboratory	1
PHYS 6B	Introductory Physics II	5
	or these courses	
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics I Laboratory	1
PHYS 6C	Introductory Physics III	5

Plus one of the following statistics options:

STAT 5	Statistics	5
	or these courses	
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2

Getting Started in the Major: Transfer Students

Transfer students who satisfy the major screening requirements may declare the major at any time after matriculation only after their official transcripts have been posted to their MyUCSC student portal by the UC Santa Cruz Office of Admissions.

Beginning in late June and early July (for fall transfer students), EEB advising will review admitted students' reported transfer course work and determine how it applies to their major's requirements.

EEB advising will contact admitted students via email. The email will include information on how students' transfer coursework fulfills major requirements. We will suggest courses for students' fall enrollment and invite you to make an appointment to talk with EEB Undergraduate Advising or direct questions to eebadvising@ucsc.edu. Transfer students may also expect to receive regular email messages from EEB advising in June, July, and August with additional information about the major.

Major Qualification Policy and Declaration Process

Major Qualification

All courses must be taken for a letter grade. The following qualification courses, or their equivalents, must be completed with a grade of C (2.0) or better. Some courses may be satisfied via exam credit.

All of the following courses:

BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOE 20C	Ecology and Evolution	5

And one of the following options:

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
	or this course	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5

Note: This requirement may also be satisfied with prior completion of CHEM 1A, CHEM 1B, CHEM 1C, CHEM

1M, and CHEM 1N or equivalent. See an EEB undergraduate advisor for additional information.

And one of the following courses:

MATH 11A	Calculus with Applications	5
MATH 16A	Mathematics for Life Sciences	5
MATH 19A	Calculus for Science, Engineering, and Mathematics	5

Note: MATH 16A/MATH 16B is the recommended mathematics series for the following EEB majors, Ecology and Evolutionary Biology B.S., Marine Biology B.S., and Plant Sciences B.S.

How to Declare a Major

Students may log into MyUCSC and submit the Petition for Major/Minor via MyUCSC as soon as they have completed the EEB major qualification requirements and/or reached their declaration deadline quarter, whichever comes first. Information on major declaration can be found here.

Additional questions may be directed to eebadvising@ucsc.edu.

Appeal Process

Students who are not eligible to declare the major may appeal this decision by submitting an appeal letter to EEB undergraduate advising. The department will declare the student's major, deny the student admission to the major, or set conditions for admission (provided the conditions may be met within no more than one quarter of enrollment). Within 15 business days of receipt of the appeal, the department will notify the student and college of the decision. For more information about the appeal process, see the appeal process website.

Letter Grade Policy

All courses used to satisfy any major requirement must be taken for a letter grade, except for approved courses which are ONLY offered as Pass/No Pass (P/NP).

[Optional Catchall]

Course Substitution Policy

To discuss the process for a course substitution, contact an EEB undergraduate advisor.

At least half of the upper-division courses (numbered BIOE 100 – BIOE 179) required for each major must be taken in EEB at UC Santa Cruz and not as transfer credits from another department or institution.

Transfer students are advised to contact an EEB undergraduate advisor before enrolling in any upper-division courses at other institutions. For more information on transferring courses to UC Santa Cruz, please consult the Transfer Coursework website. Additional information for transfer students is provided above in the “Transfer Students” section.

Only one upper-division course requirement may be met with a research-based independent study or graduate-level UC Santa Cruz biology course.

Double Majors and Major/Minor Combinations Policy

Students cannot double major/minor in Biology B.A., Ecology and Evolution B.S., Marine Biology B.S., or Plant Sciences B.S. and any other major/minor offered by the EEB Department, nor by the Departments of Chemistry and Biochemistry; Microbiology and Environmental Toxicology; or MCD Biology, including the Global and Community Health B.S. major.

Should a student choose to double major, they must qualify for and complete the disciplinary communication and comprehensive requirements for each of the majors.

Study Abroad

The UC Education Abroad Program (UCEAP) offers qualified students unique opportunities to broaden their educational horizons. The EEB Department encourages interested students to participate. It is possible to satisfy major requirements abroad and graduate on time; consult with an EEB undergraduate advisor early in the planning process.

Many programs are in English-speaking countries or use English for advanced courses. Many programs offer small classes, extensive laboratories, and/or field research experience.

There are excellent programs in Costa Rica, Australia, New Zealand, the United Kingdom, Denmark, and Germany, among others. The Costa Rica Tropical Biology Program is of note to students interested in tropical biology and ecology. Held spring and fall quarters at the Monteverde research station, this program gives students experience with hands-on field research and offers a homestay program. The University of Queensland (Australia) offers an intensive, full-semester marine science program, which includes stays at research stations on the Great Barrier Reef and in sheltered mangrove and seagrass habitats near Brisbane.

Students interested in study abroad need to get an early start on their introductory requirements, including chemistry, mathematics, and biology and must declare their major prior to going abroad. Visit the UCEAP office as soon as possible to begin planning and seek advice and approval for your UCEAP plan from an EEB undergraduate advisor prior to participation in UCEAP.

Honors

Honors in the biological sciences majors are awarded to graduating students whose academic performance in all major-required lower- and upper-division course options taken at UCSC demonstrates excellence at a grade point average (GPA) of 3.5 to 3.79.

Highest honors are awarded to those students whose performance in all major-required lower- and upper-division

course options taken at UCSC demonstrates the highest level of excellence and results in a GPA of 3.8 or above.

[Optional Catchall]

Requirements and Planners

Course Requirements

Complete the following requirements. Some courses may be satisfied via exam credit.

Lower-Division Courses

Introductory Biology:

BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOE 20C	Ecology and Evolution	5

General Chemistry:

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3BL	General Chemistry Lab	2
CHEM 3C	General Chemistry	3
CHEM 3CL	General Chemistry Lab	2
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4AL	Advanced General Chemistry Lab	2
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4BL	Advanced General Chemistry Lab	2

Student may complete either the Chemistry 3 or 4 series.

Note: This requirement may also be satisfied with prior completion of CHEM 1A, CHEM 1B, CHEM 1C, and CHEM 1N or equivalent. See an EEB undergraduate advisor for additional information.

Mathematics:

Choose one of the following options:

	Either these courses	
MATH 16A	Mathematics for Life Sciences	5
MATH 16B	Mathematics for Life Sciences	5
	or these courses	
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
	or these courses	
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

Note: MATH 16A/MATH 16B is the recommended mathematics series for the following EEB majors, Ecology & Evolutionary Biology B.S., Marine Biology B.S., and Plant Sciences B.S.

Biostatistics:

STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2

Physics:

	Either these courses	
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics I Laboratory	1
PHYS 6B	Introductory Physics II	5
	or these courses	
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics I Laboratory	1
PHYS 6C	Introductory Physics III	5

Upper-Division Courses

A total of **eleven (11)** upper-division courses, including relevant electives; two must include laboratory or fieldwork; two must apply to the Disciplinary Communication requirement. Courses appearing in more than one category can fulfill only one requirement.

Lecture/Lab Combination Notes:

Lecture and lab combinations generally count as one course. For 5-credit lectures with required, concurrent 2-credit labs, successful completion of both the lab and lecture is required and counts as one course (except for DC requirements). For 5-credit lectures with optional labs, only the lecture must be successfully completed to count as one course. Successful completion of the optional lab will count as overall unit credit and may count toward the comprehensive requirement. 5-credit lectures with 5-credit labs count as two courses. 7-credit labs count as one course.

Three core courses:

	Either this course	
BIOE 106	Principles of Genetics for EEB	5
	or this course	
BIOL 105	Genetics	5
	AND	
BIOE 107	Ecology	5
BIOE 109	Evolution	5

Note: BIOE 106, Principles of Genetics for EEB, is the recommended genetics course for students pursuing an EEB-

sponsored major (Biology B.A., Ecology and Evolution B.S., Marine Biology B.S., and Plant Sciences B.S.).

One of the following physiology courses:

Note: Lecture/lab combinations count as a single course. See note under "Upper-Division Courses" for more details.

BIOE 131	Animal Physiology	5
BIOE 131L	Animal Physiology Laboratory	2
BIOE 133	Exercise Physiology	5
BIOE 133L	Exercise Physiology Laboratory	2
BIOE 134	Comparative Vertebrate Anatomy	5
BIOE 134L	Comparative Vertebrate Anatomy Laboratory	2
BIOE 135	Plant Physiology	5
BIOE 135L	Plant Physiology Laboratory	2
BIOE 136	Environmental Physiology	5

BIOE 131/BIOE 131L: Laboratory optional to satisfy the requirement (concurrent enrollment not required).

One of the following organism courses:

Note: Lecture/lab combinations count as a single course. See note under "Upper-Division Courses" for more details.

BIOE 112	Ornithology	5
BIOE 112L	Ornithology Field Studies	2
BIOE 114	Herpetology	5
BIOE 114L	Field Methods in Herpetological Research	2
BIOE 117	Systematic Botany of Flowering Plants	5
BIOE 117L	Systematic Botany of Flowering Plants Laboratory	2
BIOE 120	Marine Botany	5
BIOE 120L	Marine Botany Laboratory	2
BIOE 122	Invertebrate Zoology	5
BIOE 122L	Invertebrate Zoology Laboratory	2
BIOE 124	Mammalogy	5
BIOE 124L	Mammalogy Laboratory	2
BIOE 127	Ichthyology	5
BIOE 127L	Ichthyology Laboratory	2
BIOE 129	Biology of Marine Mammals	5
BIOE 129L	Biology of Marine Mammals Laboratory	2
METX 100	Introduction to Microbiology	5
METX 100L	Microbiology Laboratory	5

BIOE 129/BIOE 129L: Both lecture and lab are required to satisfy the Organism requirement.

Electives

Three topical electives chosen from the following:

Note: Lecture/lab combinations count as a single course. See note under "Upper-Division Courses" for more details.

BIOE 108	Marine Ecology	5
BIOE 112	Ornithology	5
BIOE 112L	Ornithology Field Studies	2
BIOE 114	Herpetology	5
BIOE 114L	Field Methods in Herpetological Research	2
BIOE 117	Systematic Botany of Flowering Plants	5
BIOE 117L	Systematic Botany of Flowering Plants Laboratory	2
BIOE 118	Plants and Society: the Biology of Food, Shelter, and Medicine	5
BIOE 120	Marine Botany	5
BIOE 120L	Marine Botany Laboratory	2
BIOE 121	Plants, Earth, Climate	5
BIOE 122	Invertebrate Zoology	5
BIOE 122L	Invertebrate Zoology Laboratory	2
BIOE 124	Mammalogy	5
BIOE 124L	Mammalogy Laboratory	2
BIOE 125	Ecosystems of California	5
BIOE 126	Biology of Large Marine Vertebrates	5
BIOE 127	Ichthyology	5
BIOE 127L	Ichthyology Laboratory	2
BIOE 128L	Large Marine Vertebrates Field Course	7
BIOE 129	Biology of Marine Mammals	5
BIOE 129L	Biology of Marine Mammals Laboratory	2
BIOE 131	Animal Physiology	5
BIOE 131L	Animal Physiology Laboratory	2
BIOE 133	Exercise Physiology	5
BIOE 133L	Exercise Physiology Laboratory	2
BIOE 134	Comparative Vertebrate Anatomy	5
BIOE 134L	Comparative Vertebrate Anatomy Laboratory	2
BIOE 135	Plant Physiology	5
BIOE 135L	Plant Physiology Laboratory	2
BIOE 136	Environmental Physiology	5
BIOE 137	Molecular Ecology	5
BIOE 137L	Molecular Ecology Laboratory	2
BIOE 138	Modeling Evolution and Ecology	5

BIOE 139	Mathematical Modeling and Data Science in Ecology and Evolution	5
BIOE 140	Behavioral Ecology	5
BIOE 141L	Behavioral Ecology Field Course	7
BIOE 142L	Animal Behavior in the Wild (A Virtual Field Course)	5
BIOE 145	Plant Ecology	5
BIOE 145L	Field Methods in Plant Ecology	5
BIOE 146	Acoustic Ecology	5
BIOE 147	Community Ecology	5
BIOE 149	Disease Ecology	5
BIOE 150	Ecological Field Methods	5
BIOE 150L	Ecological Field Methods Laboratory	5
BIOE 151A	Ecology and Conservation in Practice Supercourse: Ecological Field Methods	5
BIOE 151B	Ecology and Conservation in Practice Supercourse: Ecological Field Methods Laboratory	5
BIOE 151C	Ecology and Conservation in Practice Supercourse: Functions and Processes of Terrestrial Ecosystems	5
BIOE 151D	Ecology and Conservation in Practice Supercourse: Conservation in Practice	5
BIOE 153A	Introduction to Arctic Ecology	5
BIOE 153B	Arctic Ecology	5
BIOE 153C	Disciplinary Communication for Biologists	5
BIOE 155	Freshwater Ecology	5
BIOE 155L	Freshwater Ecology Laboratory	5
BIOE 158L	Field Methods in Marine Ecology	5
BIOE 159A	Marine Ecology Field Quarter: Marine Ecology with Laboratory	5
BIOE 159B	Marine Ecology Field Quarter: Ichthyology with Laboratory	5
BIOE 159C	Marine Ecology Field Quarter: Methods in Field Ecology	5
BIOE 159D	Marine Ecology Field Quarter: Methods in Field Ecology Laboratory	5
BIOE 159E	Marine Ecology Field Quarter: Behavioral Ecology	5
BIOE 159F	Marine Ecology Field Quarter: Global Change Ecology	5
BIOE 161	Kelp Forest Ecology	5
BIOE 161L	Kelp Forest Ecology Laboratory	5
BIOE 163	Ecology of Reefs, Mangroves, and Seagrasses	5
BIOE 163L	Ecology of Reefs, Mangroves, and Seagrasses Laboratory	2
BIOE 165	Marine Conservation Biology	5
BIOE 172	Population Genetics	5
BIOE 173	Contemporary Genetics	5
BIOE 174	Evolutionary Medicine	5
BIOL 100	Biochemistry	5
BIOL 101	Molecular Biology	5
OCEA 118	Marine Microbial Ecology	5
METX 100L	Microbiology Laboratory	5

BIOE 129/BIOE 129L, and BIOE 131/BIOE 131L: Laboratory optional (concurrent enrollment not required.

Please note that BIOE 129 can satisfy a topical elective without BIOE 129L, but to count as an Organism requirement or for one of two required DC courses, both the lecture and lab must be successfully completed.

Three general electives chosen from the following:

Note: Lecture/lab combinations count as a single course. See note under "Upper-Division Courses" for more details.

Biological Sciences-EEB

Any upper-division BIOE course numbered BIOE 100 - BIOE 179 of 5 or more credits.

Biological Sciences-MCDB

BIOL 100	Biochemistry	5
BIOL 101	Molecular Biology	5

Earth Sciences

EART 100	Vertebrate Paleontology	5
EART 100L	Vertebrate Paleontology Laboratory	2
EART 101	Invertebrate Paleobiology	5
EART 101L	Invertebrate Paleobiology Laboratory	1
EART 102	Marine Geology	5
EART 105	Coasts and Beaches	5

Economics

ECON 166A	Game Theory and Applications I	5
ECON 166B	Game Theory and Applications II	5

Environmental Studies (enrollment by permission of instructor)

ENVS 104A	Introduction to Environmental Field Methods	2
ENVS 104L	Field Methods Laboratory	5
ENVS 107A	Natural History Field Quarter	5
ENVS 107B	Natural History Field Quarter	5
ENVS 107C	Natural History Field Quarter	5
ENVS 108	General Entomology	5

ENVS 115A	Geographic Information Systems and Environmental Applications	5
ENVS 115L	Exercises in Geographic Information Systems	2
ENVS 120	Conservation Biology	5
ENVS 122	Tropical Ecology and Conservation	5
ENVS 123	Animal Ecology and Conservation	5
ENVS 130A	Agroecology and Sustainable Agriculture	5
ENVS 130L	Agroecology and Sustainable Agriculture Laboratory	2
ENVS 130B	Justice and Sustainability in Agriculture	5
ENVS 131	Insect Ecology	5
ENVS 160	Restoration Ecology	5
ENVS 161A	Soils as Living Systems	5
ENVS 162	Plant Physiological Ecology	5
ENVS 163	Plant Disease Ecology	5
ENVS 167	Freshwater and Wetland Ecology	5
ENVS 168	Biogeochemistry and the Global Environment	5

Microbiology and Environmental Toxicology

METX 100	Introduction to Microbiology	5
METX 100L	Microbiology Laboratory	5
METX 115	Environmental Health Science	5
METX 133	Medical Microbiology	5
METX 150	Applied and Environmental Microbiology	5

Ocean Sciences

OCEA 118	Marine Microbial Ecology	5
OCEA 122	Chemical Oceanography	5
OCEA 130	Biological Oceanography	5

Psychology

PSYC 123	Cognitive Neuroscience	5

Some of the electives may have prerequisites that do not satisfy major or minor requirements.

One of the following may also be used as an upper-division general elective:

Biological Sciences-EEB

Any 5 credits of undergraduate research from:

BIOE 183W	Undergraduate Research in EEB--Writing	2
BIOE 183L	Undergraduate Research in EEB	3
BIOE 193	Independent Research in EEB	5
BIOE 193F	Independent Research in EEB	2
BIOE 195	Senior Thesis	5

Environmental Studies

ENVS 183	Environmental Studies Internship	5

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. The DC requirement in ecology and evolution is satisfied by completing **two** of the following ecology and evolutionary biology courses:

NOTE: Lecture and 2-credit lab combinations count as a single course.

BIOE 108	Marine Ecology	5
BIOE 114	Herpetology	5
BIOE 114L	Field Methods in Herpetological Research	2
BIOE 117	Systematic Botany of Flowering Plants	5
BIOE 120	Marine Botany	5
BIOE 120L	Marine Botany Laboratory	2
BIOE 122	Invertebrate Zoology	5
BIOE 122L	Invertebrate Zoology Laboratory	2
BIOE 125	Ecosystems of California	5
BIOE 126	Biology of Large Marine Vertebrates	5
BIOE 127	Ichthyology	5
BIOE 127L	Ichthyology Laboratory	2
BIOE 128L	Large Marine Vertebrates Field Course	7
BIOE 129	Biology of Marine Mammals	5
BIOE 129L	Biology of Marine Mammals Laboratory	2
BIOE 137	Molecular Ecology	5
BIOE 141L	Behavioral Ecology Field Course	7
BIOE 145	Plant Ecology	5
BIOE 145L	Field Methods in Plant Ecology	5
BIOE 150L	Ecological Field Methods Laboratory	5
BIOE 151B	Ecology and Conservation in Practice Supercourse: Ecological Field Methods Laboratory	5
BIOE 153C	Disciplinary Communication for Biologists	5
BIOE 157B	Ichthyology Field Class in Southern Africa	7
BIOE 158L	Field Methods in Marine Ecology	5
BIOE 159A	Marine Ecology Field Quarter: Marine Ecology with Laboratory	5
BIOE 161L	Kelp Forest Ecology Laboratory	5
BIOE 171	Disciplinary Communication for Biologists	5
BIOE 172	Population Genetics	5
BIOE 174	Evolutionary Medicine	5

Note: Lecture and 2-credit lab combinations count as a single course. BIOE 117 and BIOE 137 require concurrent enrollment in 2-credit labs, BIOE 117L and BIOE 137L, but these are not part of the DC requirement.

To receive DC credit for BIOE 129, BIOE 129L must be successfully completed. BIOE 129 without the lab may satisfy electives, as noted above, however.

NRS/BIOL 188, California Ecology and Conservation course, taken spring 2023 or later, will satisfy 1/2 DC credit. For more information about this course contact an EEB undergraduate advisor or email eebadvising@ucsc.edu.

Comprehensive Requirement

All majors in the biological sciences require completion of a comprehensive requirement. This requirement can be satisfied in one of the following ways:

- receiving a passing grade in an independent research course, or field/laboratory course listed below.
- completing a senior thesis.

Comprehensive courses offered by Ecology and Evolutionary Biology

NOTE: Lab courses may have associated prerequisite or corequisite lecture courses.

BIOE 112L	Ornithology Field Studies	2
BIOE 114L	Field Methods in Herpetological Research	2
BIOE 117L	Systematic Botany of Flowering Plants Laboratory	2
BIOE 120L	Marine Botany Laboratory	2
BIOE 122L	Invertebrate Zoology Laboratory	2
BIOE 124L	Mammalogy Laboratory	2
BIOE 127L	Ichthyology Laboratory	2
BIOE 128L	Large Marine Vertebrates Field Course	7
BIOE 129L	Biology of Marine Mammals Laboratory	2
BIOE 131L	Animal Physiology Laboratory	2
BIOE 133L	Exercise Physiology Laboratory	2
BIOE 134L	Comparative Vertebrate Anatomy Laboratory	2
BIOE 135L	Plant Physiology Laboratory	2
BIOE 137L	Molecular Ecology Laboratory	2
BIOE 141L	Behavioral Ecology Field Course	7
BIOE 142L	Animal Behavior in the Wild (A Virtual Field Course)	5
BIOE 145L	Field Methods in Plant Ecology	5
BIOE 150L	Ecological Field Methods Laboratory	5
BIOE 151A	Ecology and Conservation in Practice Supercourse: Ecological Field Methods	5
BIOE 151B	Ecology and Conservation in Practice Supercourse: Ecological Field Methods Laboratory	5
BIOE 151C	Ecology and Conservation in Practice Supercourse: Functions and Processes of Terrestrial Ecosystems	5
BIOE 151D	Ecology and Conservation in Practice Supercourse: Conservation in Practice	5
BIOE 153A	Introduction to Arctic Ecology	5
BIOE 153B	Arctic Ecology	5
BIOE 153C	Disciplinary Communication for Biologists	5
BIOE 155L	Freshwater Ecology Laboratory	5
BIOE 158L	Field Methods in Marine Ecology	5
BIOE 159A	Marine Ecology Field Quarter: Marine Ecology with Laboratory	5
BIOE 159B	Marine Ecology Field Quarter: Ichthyology with Laboratory	5
BIOE 159C	Marine Ecology Field Quarter: Methods in Field Ecology	5
BIOE 159D	Marine Ecology Field Quarter: Methods in Field Ecology Laboratory	5
BIOE 159E	Marine Ecology Field Quarter: Behavioral Ecology	5
BIOE 159F	Marine Ecology Field Quarter: Global Change Ecology	5
BIOE 161L	Kelp Forest Ecology Laboratory	5
BIOE 163L	Ecology of Reefs, Mangroves, and Seagrasses Laboratory	2
BIOE 183W	Undergraduate Research in EEB--Writing	2

Comprehensive courses offered in other departments

METX 100L	Microbiology Laboratory	5
CRSN 152	IDEASS Laboratory Practicum	3

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

In addition to the specific courses shown in these planners, a student must complete courses satisfying the C, CC, ER, IM, PE, PR, and TA campus general education requirements.

Sample Frosh Planner

Year	Fall	Winter	Spring	Summer
Entering				College 1A Summer Edge (optional)
1st (frosh)	BIOE 20C College 1	**MATH 16A** or MATH 11A or MATH 19A CHEM 3A WRIT 1/WRIT 1E (if needed)	**MATH 16B** or MATH 11B or MATH 19B CHEM 3B CHEM 3BL	
2nd (soph)	BIOL 20A CHEM 3C CHEM 3CL WRIT 2*	BIOE 20B PHYS 6A PHYS 6L	STAT 7 STAT 7L PHYS 6B or PHYS 6C	
3rd (junior)	BIOL 105 BIOE 107	Physiology core ECEV topical elective	BIOE 109 Organismal core	
4th (senior)	ECEV topical elective	ECEV topical elective	EEB general elective	EEB general elective

Two of the upper-division course options must satisfy DC requirements.

One of the upper-division course options must satisfy the Senior Comprehensive Requirement.

* WRIT 2 should be taken in or before spring quarter of the second year.

Additional Frosh sample planners may be found on the EEB website.

Sample Transfer Planner

For students who transferred after completing the transfer screening courses **and**:

- **MATH 16B** or MATH 11B or MATH 19B
- CHEM 3C and CHEM 3CL
- PHYS 6A PHYS 6L, and PHYS 6B or PHYS 6C

	Fall	Winter	Spring	Summer
Entering				KRSG 1T Summer Edge (optional)
3rd (junior)	BIOL 105 ECEV topical elective STAT 7 STAT 7L	BIOE 107 ECEV topical elective	BIOE 109 EEB general elective	
4th (senior)	Organism course	ECEV topical elective	Physiology course	

EEB general elective	EEB general elective

Two of the upper-division electives must satisfy DC requirements.

One of the upper-division electives must satisfy the Senior Comprehensive Requirements.

Additional Frosh sample planners may be found on the EEB website.

MARINE BIOLOGY B.S.

Information and Policies

Introduction

The marine biology major is designed to introduce students to the great diversity of marine organisms and the biological and physical processes that affect these organisms, their populations, and their coastal and oceanic ecosystems. Curricular emphasis is on basic principles that help in understanding the processes that shape life in marine environments. The Department of Ecology and Evolutionary Biology (EEB) is located on the University of California, Santa Cruz, Coastal Science Campus (CSC). CSC is situated on Monterey Bay and its great diversity of coastal marine ecosystems, nature reserves, and state, federal, and private marine research institutions and management agencies. Both the National Marine Fisheries Service and the California Department of Fish and Game have laboratories located on the CSC, providing students with research and internship opportunities. Long Marine Laboratory on the CSC provides logistical support including diving and boating facilities, running seawater systems, and marine mammal facilities. Descriptions of nearby environments, institutions, and facilities are available through the EEB Department website. These resources, combined with computing and analytical facilities on main campus and the CSC, make for exceptional opportunities for the study of marine biology and its application to coastal conservation and management. Students can readily engage in basic and applied (e.g., fisheries management) research from estuaries to the deep sea, and plankton to whales.

Program Learning Outcomes

The undergraduate curriculum offered by the Department of Ecology and Evolutionary Biology (EEB) is designed to ensure that all students declared in any EEB-sponsored major will achieve the following seven program learning outcomes:

1. Students will demonstrate broad-based knowledge of the fundamentals of ecology, behavior, evolution and physiology and the relationships among these disciplines.
2. Students will demonstrate skills in the observation and experimental study of organisms, using both field-based and laboratory-based approaches.
3. Students will demonstrate skills in identifying, accessing, comprehending and synthesizing scientific information, including interpretation of the primary scientific literature. This includes understanding key questions and hypotheses, interpreting results and conclusions, and evaluating quality through critique.
4. Students will demonstrate the ability to conceive and execute independent scientific research, including developing their own questions and hypotheses, designing an appropriate theoretical or empirical/experimental approach, executing that approach, and analyzing and interpreting data.
5. Students will demonstrate an ability to understand and apply fundamental quantitative skills, including models and statistical analyses, so as to properly interpret published research and apply such skills in their own research.
6. Students will demonstrate the ability to communicate scientific work, such as a scientific paper, proposal, essay, or notebook, in written, oral or poster format.
7. Students will exhibit strong teamwork and problem solving skills. They will demonstrate the ability to make arguments from evidence and work together to find optimal solutions.

Academic Advising for the Program

Academic advising is available at the Department of Ecology and Evolutionary Biology (EEB) undergraduate advising office located in the Coastal Biology Building on the UC Santa Cruz Coastal Science Campus, and via email at eebadvising@ucsc.edu. The undergraduate webpages contain advice and information pertinent to students' most frequently voiced questions. Each student should review the information posted on the website. For further assistance, contact an EEB undergraduate advisor at eebadvising@ucsc.edu. Transfer students should also review the Transfer Information and Policy Section.

Getting Started in the Major: Frosh

Prerequisites

An online mathematics placement is required to enroll in a mathematics course or CHEM 3A or CHEM 4A. Students are expected to take this examination before orientation, or at least well before the enrollment appointment for their first planned quarter at UCSC. Students are encouraged to work in the learning modules, and assess/reassess (three total assessments allowed) until they place into MATH 16A (recommended) or MATH 11A or MATH 19A. For more information, see the mathematics placement website.

The introductory biology sequence is prerequisite to virtually all upper-division biology courses. BIOL 20A (offered by the Molecular, Cell, and Developmental Biology Department) has

a prerequisite of CHEM 3A or CHEM 4A. Therefore, it is essential for students to start chemistry as soon as possible. Students who have not taken CHEM 3A or CHEM 4A may begin the introductory sequence with BIOE 20C. The entire introductory biology sequence should be taken in the first and second year, concurrently with or following the general chemistry sequence, with all completed by the sixth quarter campus declaration deadline. We also strongly recommend completing the lower-division physics requirements early in your academic career.

Transfer Information and Policy

Transfer Admission Screening Policy

The following courses or their equivalents are required prior to transfer, by the end of the spring term for students planning to enter in the fall. A letter grade of C or above must be earned in all major screening courses.

BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOE 20C	Ecology and Evolution	5
	AND	
	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
	or this course	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5

Plus, one of the following mathematics courses:

MATH 11A	Calculus with Applications	5
MATH 16A	Mathematics for Life Sciences	5
MATH 19A	Calculus for Science, Engineering, and Mathematics	5

In addition, the following courses are recommended prior to transfer to ensure timely graduation.

	Either these courses	
CHEM 3BL	General Chemistry Lab	2
CHEM 3C	General Chemistry	3
CHEM 3CL	General Chemistry Lab	2
	or these courses	
CHEM 4AL	Advanced General Chemistry Lab	2
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4BL	Advanced General Chemistry Lab	2

Plus one of the following mathematics courses:

MATH 11B	Calculus with Applications	5
MATH 16B	Mathematics for Life Sciences	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

Choose one of the following options:

	Either these courses	
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics I Laboratory	1
PHYS 6B	Introductory Physics II	5
	or these courses	
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics I Laboratory	1
PHYS 6C	Introductory Physics III	5

Plus one of the following statistics options:

STAT 5	Statistics	5
	OR	
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2

Getting Started in the Major: Transfer Students

Transfer students who satisfy the major screening requirements may declare the major at any time after matriculation only after their official transcripts have been posted to their MyUCSC student portal by the UC Santa Cruz Office of Admissions.

Beginning in late June and early July (for fall transfer students), EEB advising will review admitted students' reported transfer course work and determine how it applies to their major's requirements.

EEB advising will contact admitted students via email. The email will include information on how students' transfer coursework fulfills major requirements. We will suggest courses for students' Fall enrollment, and invite you to make an appointment to talk with EEB undergraduate advising or direct questions to eebadvising@ucsc.edu. Transfer students may also expect to receive regular email messages from EEB advising in June, July, and August with additional information about the major.

Major Qualification Policy and Declaration Process

Major Qualification

All courses must be taken for a letter grade. The following qualification courses, or their equivalents, must be completed with a grade of C (2.0) or better. Some courses may be satisfied via exam credit.

All of the following courses:

BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOE 20C	Ecology and Evolution	5

And one of the following options:

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
	or this course	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5

Note: This requirement may also be satisfied with prior completion of CHEM 1A, CHEM 1B, CHEM 1C, CHEM 1M, and CHEM 1N or equivalent. See an EEB undergraduate advisor for additional information.

And one of the following mathematics courses:

MATH 11A	Calculus with Applications	5
MATH 16A	Mathematics for Life Sciences	5
MATH 19A	Calculus for Science, Engineering, and Mathematics	5

Note: MATH 16A/MATH 16B is the recommended mathematics series for the following EEB majors: Ecology and Evolutionary Biology B.S., Marine Biology B.S., and Plant Sciences B.S.

How to Declare a Major

Students may log into their MyUCSC and submit the Petition for Major/Minor via MyUCSC as soon as they have completed the EEB major qualification requirements and/or reached their declaration deadline quarter, whichever comes first. Information on major declaration can be found here.

Additional questions may be directed to eebadvising@ucsc.edu.

Appeal Process

Students who are not eligible to declare the major may appeal this decision by submitting an appeal letter to EEB undergraduate advising. The department will declare the student's major, deny the student admission to the major, or set conditions for admission (provided the conditions may be met within no more than one quarter of enrollment). Within 15 business days of receipt of the appeal, the department will notify the student and college of the decision. For more information about the appeal process, see the appeal process website.

Letter Grade Policy

All courses used to satisfy any major requirement must be taken for a letter grade, except for approved courses which are **ONLY** offered as Pass/No Pass (P/NP).

[Optional Catchall]

Course Substitution Policy

To discuss the process for a course substitution, contact an EEB undergraduate advisor.

At least half of the upper-division courses (numbered BIOE 100 – BIOE 179) required for each major must be taken in EEB at UC Santa Cruz and not as transfer credits from another department or institution.

Transfer students are advised to contact an EEB undergraduate advisor before enrolling in any upper-division courses at other institutions. For more information on transferring courses to UC Santa Cruz, please consult the Transfer Coursework website. Additional information for transfer students is provided above in the “Transfer Students” section.

Only one upper-division course requirement may be met with a research-based independent study or graduate-level UC Santa Cruz biology course.

Double Majors and Major/Minor Combinations Policy

Students cannot double major/minor in Biology B.A., Ecology and Evolution B.S., Marine Biology B.S., or Plant Sciences B.S. and any other major/minor offered by the EEB Department, nor by the Departments of Chemistry and Biochemistry; Microbiology and Environmental Toxicology; or MCD Biology, including the Global and Community Health B.S. major.

Should a student choose to double major, they must qualify for and complete the disciplinary communication and comprehensive requirements for each of the majors.

Study Abroad

The UC Education Abroad Program (UCEAP) offers qualified students unique opportunities to broaden their educational horizons. The EEB Department encourages interested students to participate. It is possible to satisfy major requirements abroad and graduate on time; consult with an EEB undergraduate advisor early in the planning process.

Many programs are in English-speaking countries or use English for advanced courses. Many programs offer small classes, extensive laboratories, and/or field research experience.

There are excellent programs in Costa Rica, Australia, New Zealand, the United Kingdom, Denmark, and Germany, among others. The Costa Rica Tropical Biology Program is of note to students interested in tropical biology and ecology. Held spring and fall quarters at the Monteverde research station, this program gives students experience with hands-on field research and offers a homestay program. The University of Queensland (Australia) offers an intensive, full-semester marine science program, which includes stays at research

stations on the Great Barrier Reef and in sheltered mangrove and seagrass habitats near Brisbane.

Students interested in study abroad need to get an early start on their introductory requirements, including chemistry, mathematics, and biology and must declare their major prior to going abroad. Visit the UCEAP office as soon as possible to begin planning and seek advice and approval for your UCEAP plan from an EEB undergraduate advisor prior to participation in UCEAP.

Honors

Honors in the biological sciences majors are awarded to graduating students whose academic performance in all major-required lower- and upper-division course options taken at UCSC demonstrates excellence at a grade point average (GPA) of 3.5 to 3.79.

Highest honors are awarded to those students whose performance in all major-required lower- and upper-division course options taken at UCSC demonstrates the highest level of excellence and results in a GPA of 3.8 or above.

[Optional Catchall]

Requirements and Planners

Course Requirements

Complete the following requirements. Some courses may be satisfied via exam credit.

Lower-Division Courses

Introductory Biology:

BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOE 20C	Ecology and Evolution	5

General Chemistry:

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3BL	General Chemistry Lab	2
CHEM 3C	General Chemistry	3
CHEM 3CL	General Chemistry Lab	2
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4AL	Advanced General Chemistry Lab	2
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4BL	Advanced General Chemistry Lab	2

Students may choose to complete the Chemistry 3 **or** 4 series.

Note: This requirement may also be satisfied with prior completion of CHEM 1A, CHEM 1B, CHEM 1C, and CHEM 1N or equivalent. See an EEB undergraduate advisor for additional information.

Mathematics:

Choose one of the following options:

	Either these courses	
MATH 16A	Mathematics for Life Sciences	5
MATH 16B	Mathematics for Life Sciences	5
	or these courses	
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
	or these courses	
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

Note: MATH 16A/MATH 16B is the recommended mathematics series for the following EEB majors, Ecology and Evolutionary Biology B.S., Marine Biology B.S., and Plant Sciences B.S.

Biostatistics:

STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2

Physics:

	Either these courses	
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics I Laboratory	1
PHYS 6B	Introductory Physics II	5
	or these courses	
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics I Laboratory	1
PHYS 6C	Introductory Physics III	5

Upper-Division Courses

A total of **eleven (11)** upper-division courses, including relevant electives; two must include laboratory or fieldwork; two must apply to the Disciplinary Communication requirement. Courses appearing in more than one category can fulfill only one requirement.

Lecture/Lab Combination Notes:

Lecture and lab combinations generally count as one course. For 5-credit lectures with required, concurrent 2-credit labs, successful completion of both the lab and lecture is required and counts as one course (except for DC requirements). For 5-credit lectures with optional labs, only the lecture must be

successfully completed to count as one course. Successful completion of the optional lab will count as overall unit credit and may count toward the comprehensive requirement. 5-credit lectures with 5-credit labs count as two courses. 7-credit labs count as one course.

Two core courses:

	Either this course	
BIOE 106	Principles of Genetics for EEB	5
	or this course	
BIOL 105	Genetics	5
	AND	
BIOE 109	Evolution	5

Note: BIOE 106, Principles of Genetics for EEB, is the recommended genetics course for students pursuing an EEB-sponsored major (Biology B.A., Ecology and Evolution B.S., Marine Biology B.S., and Plant Sciences B.S.).

One ecology course:

BIOE 107	Ecology	5
BIOE 108	Marine Ecology	5

One marine-environment course:

OCEA 101	The Marine Environment	5
OCEA 130	Biological Oceanography	5

One marine course:

Note: Lecture/lab combinations count as a single course. See note under "Upper-Division Courses" for more details.

BIOE 120	Marine Botany	5
BIOE 120L	Marine Botany Laboratory	2
BIOE 122	Invertebrate Zoology	5
BIOE 122L	Invertebrate Zoology Laboratory	2
BIOE 126	Biology of Large Marine Vertebrates	5
BIOE 127	Ichthyology	5
BIOE 127L	Ichthyology Laboratory	2
BIOE 129	Biology of Marine Mammals	5
BIOE 129L	Biology of Marine Mammals Laboratory	2

BIOE 129/BIOE 129L: Laboratory optional to satisfy the requirement (concurrent enrollment not required).

Electives

Three topical electives chosen from the following:

Note: Lecture/lab combinations count as a single course. See note under "Upper-Division Courses" for more details.

BIOE 108	Marine Ecology	5
BIOE 120	Marine Botany	5
BIOE 120L	Marine Botany Laboratory	2
BIOE 122	Invertebrate Zoology	5
BIOE 122L	Invertebrate Zoology Laboratory	2
BIOE 126	Biology of Large Marine Vertebrates	5
BIOE 127	Ichthyology	5
BIOE 127L	Ichthyology Laboratory	2
BIOE 128L	Large Marine Vertebrates Field Course	7
BIOE 129	Biology of Marine Mammals	5
BIOE 129L	Biology of Marine Mammals Laboratory	2
BIOE 136	Environmental Physiology	5
BIOE 155	Freshwater Ecology	5
BIOE 155L	Freshwater Ecology Laboratory	5
BIOE 158L	Field Methods in Marine Ecology	5
BIOE 159A	Marine Ecology Field Quarter: Marine Ecology with Laboratory	5
BIOE 159B	Marine Ecology Field Quarter: Ichthyology with Laboratory	5
BIOE 159C	Marine Ecology Field Quarter: Methods in Field Ecology	5
BIOE 159D	Marine Ecology Field Quarter: Methods in Field Ecology Laboratory	5
BIOE 159E	Marine Ecology Field Quarter: Behavioral Ecology	5
BIOE 159F	Marine Ecology Field Quarter: Global Change Ecology	5
BIOE 161	Kelp Forest Ecology	5
BIOE 161L	Kelp Forest Ecology Laboratory	5
BIOE 163	Ecology of Reefs, Mangroves, and Seagrasses	5
BIOE 163L	Ecology of Reefs, Mangroves, and Seagrasses Laboratory	2
BIOE 165	Marine Conservation Biology	5
EART 102	Marine Geology	5
EART 105	Coasts and Beaches	5
OCEA 118	Marine Microbial Ecology	5
OCEA 122	Chemical Oceanography	5
OCEA 130	Biological Oceanography	5

Three general electives chosen from the following:

Note: Lecture/lab combinations count as a single course. See note under "Upper-Division Courses" for more details.

Biological Sciences-EEB

Any upper-division BIOE course numbered BIOE 100 - BIOE 179 of 5 or more credits.

Biological Sciences-MCDB

BIOL 100	Biochemistry	5
BIOL 101	Molecular Biology	5

Earth and Planetary Sciences

EART 100	Vertebrate Paleontology	5
EART 100L	Vertebrate Paleontology Laboratory	2
EART 101	Invertebrate Paleobiology	5
EART 101L	Invertebrate Paleobiology Laboratory	1
EART 102	Marine Geology	5
EART 105	Coasts and Beaches	5

Economics

ECON 166A	Game Theory and Applications I	5
ECON 166B	Game Theory and Applications II	5

Environmental Studies (enrollment by permission of instructor)

ENVS 104A	Introduction to Environmental Field Methods	2
ENVS 104L	Field Methods Laboratory	5
ENVS 107A	Natural History Field Quarter	5
ENVS 107B	Natural History Field Quarter	5
ENVS 107C	Natural History Field Quarter	5
ENVS 108	General Entomology	5
ENVS 115A	Geographic Information Systems and Environmental Applications	5
ENVS 115L	Exercises in Geographic Information Systems	2
ENVS 120	Conservation Biology	5
ENVS 122	Tropical Ecology and Conservation	5
ENVS 123	Animal Ecology and Conservation	5
ENVS 130A	Agroecology and Sustainable Agriculture	5
ENVS 130L	Agroecology and Sustainable Agriculture Laboratory	2
ENVS 130B	Justice and Sustainability in Agriculture	5
ENVS 131	Insect Ecology	5
ENVS 160	Restoration Ecology	5
ENVS 161A	Soils as Living Systems	5
ENVS 162	Plant Physiological Ecology	5
ENVS 163	Plant Disease Ecology	5
ENVS 167	Freshwater and Wetland Ecology	5
ENVS 168	Biogeochemistry and the Global Environment	5

Microbiology and Environmental Toxicology

METX 100	Introduction to Microbiology	5
METX 100L	Microbiology Laboratory	5
METX 115	Environmental Health Science	5
METX 133	Medical Microbiology	5
METX 150	Applied and Environmental Microbiology	5

Ocean Sciences

OCEA 118	Marine Microbial Ecology	5
OCEA 122	Chemical Oceanography	5
OCEA 130	Biological Oceanography	5

Psychology

PSYC 123	Cognitive Neuroscience	5

Some of the electives may have prerequisites that do not satisfy major or minor requirements.

One of the following may also be used as an upper-division general elective:

Biological Sciences-EEB

Any 5 credits of undergraduate research

BIOE 183W	Undergraduate Research in EEB--Writing	2
BIOE 183L	Undergraduate Research in EEB	3
BIOE 193	Independent Research in EEB	5
BIOE 193F	Independent Research in EEB	2
BIOE 195	Senior Thesis	5

Environmental Studies

ENVS 183	Environmental Studies Internship	5

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) Requirement. The DC requirement in marine biology is satisfied by completing **two** of the following ecology and evolutionary biology courses:

Note: Lecture and 2-credit lab combinations count as a single course.

BIOE 108	Marine Ecology	5
BIOE 114	Herpetology	5
BIOE 114L	Field Methods in Herpetological Research	2
BIOE 117	Systematic Botany of Flowering Plants	5
BIOE 120	Marine Botany	5
BIOE 120L	Marine Botany Laboratory	2
BIOE 122	Invertebrate Zoology	5
BIOE 122L	Invertebrate Zoology Laboratory	2
BIOE 125	Ecosystems of California	5
BIOE 126	Biology of Large Marine Vertebrates	5
BIOE 127	Ichthyology	5
BIOE 127L	Ichthyology Laboratory	2
BIOE 128L	Large Marine Vertebrates Field Course	7
BIOE 129	Biology of Marine Mammals	5

BIOE 129L	Biology of Marine Mammals Laboratory	2
BIOE 137	Molecular Ecology	5
BIOE 141L	Behavioral Ecology Field Course	7
BIOE 145	Plant Ecology	5
BIOE 145L	Field Methods in Plant Ecology	5
BIOE 150L	Ecological Field Methods Laboratory	5
BIOE 151B	Ecology and Conservation in Practice Supercourse: Ecological Field Methods Laboratory	5
BIOE 153C	Disciplinary Communication for Biologists	5
BIOE 157B	Ichthyology Field Class in Southern Africa	7
BIOE 158L	Field Methods in Marine Ecology	5
BIOE 159A	Marine Ecology Field Quarter: Marine Ecology with Laboratory	5
BIOE 161L	Kelp Forest Ecology Laboratory	5
BIOE 171	Disciplinary Communication for Biologists	5
BIOE 172	Population Genetics	5
BIOE 174	Evolutionary Medicine	5

Note: Lecture and 2-credit lab combinations count as a single course. BIOE 117 and BIOE 137 require concurrent enrollment in 2-credit labs, BIOE 117L and BIOE 137L, but these are not part of the DC requirement.

To receive DC credit for BIOE 129, BIOE 129L must also be successfully completed. BIOE 129 without the lab can satisfy electives as noted above, however.

NRS/BIOL 188, California Ecology and Conservation course, taken spring 2023 or later, will satisfy 1/2 DC credit. For more information about this course contact an EEB undergraduate advisor or email eebadvising@ucsc.edu.

Comprehensive Requirement

All majors in the biological sciences require completion of a comprehensive requirement. This requirement can be satisfied in one of the following ways:

- receiving a passing grade in an independent research course, or field/laboratory course listed below.
- completing a senior thesis.

Comprehensive courses offered by Ecology and Evolutionary Biology

Note: Lab courses may have associated prerequisite or corequisite lecture courses.

BIOE 112L	Ornithology Field Studies	2
BIOE 114L	Field Methods in Herpetological Research	2
BIOE 117L	Systematic Botany of Flowering Plants Laboratory	2
BIOE 120L	Marine Botany Laboratory	2
BIOE 122L	Invertebrate Zoology Laboratory	2
BIOE 124L	Mammalogy Laboratory	2
BIOE 127L	Ichthyology Laboratory	2
BIOE 128L	Large Marine Vertebrates Field Course	7
BIOE 129L	Biology of Marine Mammals Laboratory	2
BIOE 131L	Animal Physiology Laboratory	2
BIOE 133L	Exercise Physiology Laboratory	2
BIOE 134L	Comparative Vertebrate Anatomy Laboratory	2
BIOE 135L	Plant Physiology Laboratory	2
BIOE 137L	Molecular Ecology Laboratory	2
BIOE 141L	Behavioral Ecology Field Course	7
BIOE 142L	Animal Behavior in the Wild (A Virtual Field Course)	5
BIOE 145L	Field Methods in Plant Ecology	5
BIOE 150L	Ecological Field Methods Laboratory	5
BIOE 151A	Ecology and Conservation in Practice Supercourse: Ecological Field Methods	5
BIOE 151B	Ecology and Conservation in Practice Supercourse: Ecological Field Methods Laboratory	5
BIOE 151C	Ecology and Conservation in Practice Supercourse: Functions and Processes of Terrestrial Ecosystems	5
BIOE 151D	Ecology and Conservation in Practice Supercourse: Conservation in Practice	5
BIOE 153A	Introduction to Arctic Ecology	5
BIOE 153B	Arctic Ecology	5
BIOE 153C	Disciplinary Communication for Biologists	5
BIOE 155L	Freshwater Ecology Laboratory	5
BIOE 158L	Field Methods in Marine Ecology	5
BIOE 159A	Marine Ecology Field Quarter: Marine Ecology with Laboratory	5
BIOE 159B	Marine Ecology Field Quarter: Ichthyology with Laboratory	5
BIOE 159C	Marine Ecology Field Quarter: Methods in Field Ecology	5

BIOE 159D	Marine Ecology Field Quarter: Methods in Field Ecology Laboratory	5
BIOE 159E	Marine Ecology Field Quarter: Behavioral Ecology	5
BIOE 159F	Marine Ecology Field Quarter: Global Change Ecology	5
BIOE 161L	Kelp Forest Ecology Laboratory	5
BIOE 163L	Ecology of Reefs, Mangroves, and Seagrasses Laboratory	2
BIOE 183W	Undergraduate Research in EEB--Writing	2

Comprehensive courses offered in other departments

METX 100L	Microbiology Laboratory	5
CRSN 152	IDEASS Laboratory Practicum	3

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

In addition to the specific courses shown in these planners, a student must complete courses satisfying the C, CC, ER, IM, PE, PR, and TA campus general education requirements.

Sample Frosh Planner

Year	Fall	Winter	Spring	Summer
Entering				College 1A Summer Edge (optional)
1st (frosh)	BIOE 20C College 1	**MATH 16A** or MATH 11A or MATH 19A CHEM 3A	**MATH 16B** or MATH 11B or MATH 19B CHEM 3B	CHEM 3BL WRIT 1/WRIT 1E (if needed)
2nd (soph)	BIOL 20A CHEM 3C CHEM 3CL WRIT 2*	BIOE 20B STAT 7 STAT 7L	BIOL 105 PHYS 6A PHYS 6L	
3rd (junior)	BIOE 109 PHYS 6B 6M	BIOE 107 or BIOE 108 Marine core	EEB general elective MABI topical elective	
4th (senior)	EEB general elective MABI topical elective	Marine environment core MABI topical elective	EEB general elective	

Two of the upper-division course options must satisfy DC requirements.

One of the upper-division course options must satisfy the Senior Comprehensive Requirement.

*WRIT 2 should be taken in or before spring quarter of the second year.

Additional Frosh sample planners may be found on the EEB website.

Sample Transfer Planner

For students who transferred after completing the transfer screening courses and:

- MATH 16B or MATH 11B or MATH 19B
- CHEM 3C and CHEM 3CL
- PHYS 6A PHYS 6L, and PHYS 6B or PHYS 6C

	Fall	Winter	Spring	Summer
Entering				KRSG 1T Summer Edge (optional)
3rd (junior)	BIOL 105	BIOE 107 or BIOE 108	BIOE 109	
	MABI topical elective STAT 7 STAT 7L	MABI topical elective	MABI topical elective	
4th (senior)	Marine core	Marine environment core	EEB general elective	
	EEB general elective	EEB general elective		

Two of the upper division course options must satisfy DC requirements.

One of the upper division course options must satisfy the Senior Comprehensive Requirement.

Additional Transfer sample planners may be found on the EEB website.

PLANT SCIENCES B.S.

Information and Policies

Introduction

The University of California, Santa Cruz, has a strong program in the plant sciences (sometimes called botany). Resources that support the plant sciences major include state-of-the-art greenhouse facilities, natural ecosystems on the campus from coastal wetlands to redwood forests, the collections of the UC Santa Cruz Arboretum, and the Center for Agroecology and Sustainable Food Systems (including the UC Santa Cruz Farm and Garden). A hallmark of the major is the many field courses that introduce students to a diversity of terrestrial and aquatic ecosystems and the skills to conduct field research. See the Ecology Evolutionary Biology undergraduate webpage for more information on these courses.

The plant sciences major is designed for students with an interest in plant biology and its associated curricular fields such as plant ecology and evolution, plant physiology, plant pathology, plant genetics, soils, and applied plant sciences. After completion of the core courses, students can proceed in one of several directions depending on their interests. For example, a more in-depth study of physiology and evolution courses can serve as preparation for work in biotechnology or plant breeding; further studies in plant ecology, tropical ecology, or restoration ecology can lead to careers in resource ecology and management or biodiversity exploration; upper-division training in agroecology can lead to careers in agriculture or food systems. There are many opportunities for internships both on the UC Santa Cruz campus and in the greater community.

Program Learning Outcomes

The undergraduate curriculum offered by the Department of Ecology and Evolutionary Biology (EEB) is designed to ensure that all students declared in any EEB-sponsored major will achieve the following seven program learning outcomes:

1. Students will demonstrate broad-based knowledge of the fundamentals of ecology, behavior, evolution and physiology and the relationships among these disciplines.
2. Students will demonstrate skills in the observation and experimental study of organisms, using both field-based and laboratory-based approaches.
3. Students will demonstrate skills in identifying, accessing, comprehending and synthesizing scientific information, including interpretation of the primary scientific literature. This includes understanding key questions and hypotheses, interpreting results and conclusions, and evaluating quality through critique.
4. Students will demonstrate the ability to conceive and execute independent scientific research, including developing their own questions and hypotheses, designing an appropriate theoretical or empirical/experimental approach, executing that approach, and analyzing and interpreting data.

5. Students will demonstrate an ability to understand and apply fundamental quantitative skills, including models and statistical analyses, so as to properly interpret published research and apply such skills in their own research.
6. Students will demonstrate the ability to communicate scientific work, such as a scientific paper, proposal, essay, or notebook, in written, oral or poster format.
7. Students will exhibit strong teamwork and problem solving skills. They will demonstrate the ability to make arguments from evidence and work together to find optimal solutions.

Academic Advising for the Program

Academic advising is available at the Department of Ecology and Evolutionary Biology (EEB) undergraduate advising office located in the Coastal Biology Building on the UC Santa Cruz Coastal Science Campus, and via email at eebadvising@ucsc.edu. The undergraduate webpages contain advice and information pertinent to students' most frequently voiced questions. Each student should review the information posted on the website; for further assistance, contact an EEB undergraduate advisor at eebadvising@ucsc.edu. Transfer students should also review the Transfer Information and Policy Section.

Getting Started in the Major: Frosh

Prerequisites

An online mathematics placement is required to enroll in a mathematics course or CHEM 3A or CHEM 4A. Students are expected to take this examination prior to orientation, or at least well before the enrollment appointment for their first planned quarter at UCSC. Students are encouraged to work in the learning modules, and assess/reassess (three total assessments allowed) until they place into MATH 16A (recommended) or MATH 11A or MATH 19A. For more information see the mathematics placement website.

The introductory biology sequence is prerequisite to virtually all upper-division biology courses. BIOL 20A (offered by the Molecular, Cell, and Developmental Biology Department) has a prerequisite of CHEM 3A or CHEM 4A. Therefore, it is essential for students to start chemistry as soon as possible. Students who have not taken CHEM 3A or CHEM 4A may begin the introductory sequence with BIOE 20C. The entire introductory biology sequence should be taken the first and second year, concurrently with or following the general chemistry sequence, with all completed by the sixth quarter campus declaration deadline. We also strongly recommend completing the lower-division physics requirements early in your academic career.

Transfer Information and Policy

Transfer Admission Screening Policy

The following courses or their equivalents are required prior to transfer, by the end of the spring term for students planning to enter in the fall. Some courses may be satisfied via exam credit.

BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOE 20C	Ecology and Evolution	5
	AND	
	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
	or this course	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5

Plus, one of the following mathematics courses:

MATH 11A	Calculus with Applications	5
MATH 16A	Mathematics for Life Sciences	5
MATH 19A	Calculus for Science, Engineering, and Mathematics	5

A letter grade of C or above must be earned in all major screening courses.

In addition, the following courses are recommended prior to transfer to ensure timely graduation.

Either these courses

CHEM 3BL	General Chemistry Lab	2
CHEM 3C	General Chemistry	3
CHEM 3CL	General Chemistry Lab	2

Or these courses

CHEM 4AL	Advanced General Chemistry Lab	2
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4BL	Advanced General Chemistry Lab	2

Plus one of the following mathematics courses:

MATH 11B	Calculus with Applications	5
MATH 16B	Mathematics for Life Sciences	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

Choose one of the following options:

	Either these courses	
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics I Laboratory	1
PHYS 6B	Introductory Physics II	5
	or these courses	
PHYS 6A	Introductory Physics I	5

PHYS 6L	Introductory Physics I Laboratory	1
PHYS 6C	Introductory Physics III	5

Plus the following statistics options:

STAT 5	Statistics	5
	OR	
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2

Getting Started in the Major: Transfer Students

Transfer students who satisfy the major screening requirements may declare the major at any time after matriculation only after their official transcripts have been posted to their MyUCSC student portal by the UC Santa Cruz Office of Admissions.

Beginning in late June and early July (for fall transfer students), EEB advising will review admitted students' reported transfer course work and determine how it applies to their major's requirements.
EEB advising will contact admitted students via email. The email will include information on how students' transfer coursework fulfills major requirements. We will suggest courses for students' fall enrollment, and invite you to make an appointment to talk with EEB undergraduate advising or direct questions to eebadvising@ucsc.edu. Transfer students may also expect to receive regular email messages from EEB advising in June, July, and August with additional information about the major.

Major Qualification Policy and Declaration Process

Major Qualification

All courses must be taken for a letter grade. The following qualification courses, or their equivalents, must be completed with a grade of C (2.0) or better. Some courses may be satisfied via exam credit.

All of the following courses:

BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOE 20C	Ecology and Evolution	5

And one of the following options:

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
	or this course	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5

Note: This requirement may also be satisfied with prior completion of CHEM 1A, CHEM 1B, CHEM 1C, CHEM 1M, and CHEM 1N or equivalent. See an EEB undergraduate advisor for additional information.

And one of the following mathematics courses:

MATH 11A	Calculus with Applications	5
MATH 16A	Mathematics for Life Sciences	5
MATH 19A	Calculus for Science, Engineering, and Mathematics	5

Note: MATH 16A/MATH 16B is the recommended mathematics series for the following EEB majors, Ecology and Evolutionary Biology B.S., Marine Biology B.S., and Plant Sciences B.S.

How to Declare a Major

Students may log into MyUCSC and submit the Petition for Major/Minor via MyUCSC as soon as they have completed the EEB major qualification requirements and/or reached their declaration deadline quarter, whichever comes first. Information on major declaration can be found here.

Additional questions may be directed to eebadvising@ucsc.edu.

Appeal Process

Students who are not eligible to declare the major may appeal this decision by submitting an appeal letter to EEB undergraduate advising. The department will declare the student's major, deny the student admission to the major, or set conditions for admission (provided the conditions may be met within no more than one quarter of enrollment). Within 15 business days of receipt of the appeal, the department will notify the student and college of the decision. For more information about the appeal process, see the appeal process website.

Letter Grade Policy

All courses used to satisfy any major requirement must be taken for a letter grade except for approved courses which are ONLY offered as Pass/No Pass (P/NP).

[Optional Catchall]

Course Substitution Policy

To discuss the process for a course substitution, contact an EEB undergraduate advisor.

At least half of the upper-division courses (numbered BIOE 100 – BIOE 179) required for each major must be taken in EEB at UC Santa Cruz and not as transfer credits from another department or institution.

Transfer students are advised to contact an EEB undergraduate advisor before enrolling in any upper-division courses at other institutions. For more information on transferring courses to UC Santa Cruz, please consult the Transfer Coursework website. Additional information for transfer students is provided above in the "Transfer Students" section.

Only one upper-division course requirement may be met with a research-based independent study or graduate-level UC Santa Cruz biology course.

Double Majors and Major/Minor Combinations Policy

Students cannot double major/minor in Biology B.A., Ecology and Evolution B.S., Marine Biology B.S., or Plant Sciences B.S. and any other major/minor offered by the EEB Department, nor by the Departments of Chemistry and Biochemistry; Microbiology and Environmental Toxicology; or MCD Biology, including the Global and Community Health B.S. major.

Should a student choose to double major, they must qualify for and complete the disciplinary communication and comprehensive requirements for each of the majors.

Study Abroad

The UC Education Abroad Program (UCEAP) offers qualified students unique opportunities to broaden their educational horizons. The EEB Department encourages interested students to participate. It is possible to satisfy major requirements abroad and graduate on time; consult with an EEB undergraduate advisor early in the planning process.

Many programs are in English-speaking countries or use English for advanced courses. Many programs offer small classes, extensive laboratories, and/or field research experience.

There are excellent programs in Costa Rica, Australia, New Zealand, the United Kingdom, Denmark, and Germany, among others. The Costa Rica Tropical Biology Program is of note to students interested in tropical biology and ecology. Held spring and fall quarters at the Monteverde research station, this program gives students experience with hands-on field research and offers a homestay program. The University of Queensland (Australia) offers an intensive, full-semester marine science program, which includes stays at research stations on the Great Barrier Reef and in sheltered mangrove and seagrass habitats near Brisbane.

Students interested in study abroad need to get an early start on their introductory requirements, including chemistry, mathematics, and biology and must declare their major prior to going abroad. Visit the UCEAP office as soon as possible to begin planning and seek advice and approval for your UCEAP plan from an EEB undergraduate advisor prior to participation in UCEAP.

Honors

Honors in the biological sciences majors are awarded to graduating students whose academic performance in all major-required lower and upper division course options taken at UCSC demonstrates excellence at a grade point average (GPA) of 3.5 to 3.79.

Highest honors are awarded to those students whose performance in all major-required lower and upper division course options taken at UCSC demonstrates the highest level of excellence and results in a GPA of 3.8 or above.

[Optional Catchall]

Requirements and Planners

Course Requirements

Complete the following requirements. Some courses may be satisfied via exam credit.

Lower-Division Courses

Introductory Biology:

BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOE 20C	Ecology and Evolution	5

General Chemistry:

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3BL	General Chemistry Lab	2
CHEM 3C	General Chemistry	3
CHEM 3CL	General Chemistry Lab	2
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4AL	Advanced General Chemistry Lab	2
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4BL	Advanced General Chemistry Lab	2

Students may choose to complete the Chemistry 3 **or** 4 series.

Note: This requirement may also be satisfied with prior completion of CHEM 1A, CHEM 1B, CHEM 1C, and CHEM 1N or equivalent. See an EEB undergraduate advisor for additional information.

Mathematics:

Choose one of the following options:

	Either these courses	
MATH 16A	Mathematics for Life Sciences	5
MATH 16B	Mathematics for Life Sciences	5
	or these courses	

MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
	or these courses	
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

Note: MATH 16A/MATH 16B is the recommended mathematics series for the following EEB majors, Ecology and Evolutionary Biology B.S., Marine Biology B.S., and Plant Sciences B.S.

Biostatistics:

STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2

Physics:

	Either these courses	
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics I Laboratory	1
PHYS 6B	Introductory Physics II	5
	or these courses	
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics I Laboratory	1
PHYS 6C	Introductory Physics III	5

Upper-Division Courses

A total of **eleven (11)** upper-division courses, including relevant electives; two must include laboratory or fieldwork; two must apply to the Disciplinary Communication requirement. Courses appearing in more than one category can fulfill only one requirement.

Lecture/Lab Combination Notes:

Lecture and lab combinations generally count as one course. For 5-credit lectures with required, concurrent 2-credit labs, successful completion of both the lab and lecture is required and counts as one course (except for DC requirements). For 5-credit lectures with optional labs, only the lecture must be successfully completed to count as one course. Successful completion of the optional lab will count as overall unit credit and may count toward the comprehensive requirement. 5-credit lectures with 5-credit labs count as two courses. 7-credit labs count as one course.

Two core courses:

	Either this course	
BIOE 106	Principles of Genetics for EEB	5
	or this course	
BIOL 105	Genetics	5
	AND	
BIOE 109	Evolution	5

Note: BIOE 106, Principles of Genetics for EEB, is the recommended genetics course for students pursuing an EEB-sponsored major (Biology B.A., Ecology and Evolution B.S., Marine Biology B.S., and Plant Sciences B.S.).

One Ecology Course:

BIOE 107	Ecology	5
BIOE 145	Plant Ecology	5

One plant physiology course from the following:

Note: Lecture/lab combinations count as a single course. See note under "Upper-Division Courses" for more details.

BIOE 135	Plant Physiology	5
BIOE 135L	Plant Physiology Laboratory	2
ENVS 162	Plant Physiological Ecology	5

One botany course from the following:

Note: Lecture/lab combinations count as a single course. See note under "Upper-Division Courses" for more details.

BIOE 117	Systematic Botany of Flowering Plants	5
BIOE 117L	Systematic Botany of Flowering Plants Laboratory	2
BIOE 120	Marine Botany	5
BIOE 120L	Marine Botany Laboratory	2

Electives

Three topical electives chosen from the following:

Note: Lecture/lab combinations count as a single course. See note under "Upper-Division Courses" for more details.

Biological Sciences-EEB

BIOE 117	Systematic Botany of Flowering Plants	5
BIOE 117L	Systematic Botany of Flowering Plants Laboratory	2
BIOE 118	Plants and Society: the Biology of Food, Shelter, and Medicine	5
BIOE 120	Marine Botany	5
BIOE 120L	Marine Botany Laboratory	2
BIOE 121	Plants, Earth, Climate	5
BIOE 125	Ecosystems of California	5
BIOE 135	Plant Physiology	5
BIOE 135L	Plant Physiology Laboratory	2
BIOE 137	Molecular Ecology	5
BIOE 137L	Molecular Ecology Laboratory	2
BIOE 138	Modeling Evolution and Ecology	5
BIOE 139	Mathematical Modeling and Data Science in Ecology and Evolution	5

BIOE 145	Plant Ecology	5
BIOE 145L	Field Methods in Plant Ecology	5
BIOE 149	Disease Ecology	5
BIOE 151A	Ecology and Conservation in Practice Supercourse: Ecological Field Methods	5
BIOE 151B	Ecology and Conservation in Practice Supercourse: Ecological Field Methods Laboratory	5
BIOE 151C	Ecology and Conservation in Practice Supercourse: Functions and Processes of Terrestrial Ecosystems	5
BIOE 151D	Ecology and Conservation in Practice Supercourse: Conservation in Practice	5
BIOE 153A	Introduction to Arctic Ecology	5
BIOE 153B	Arctic Ecology	5
BIOE 153C	Disciplinary Communication for Biologists	5
BIOE 161	Kelp Forest Ecology	5
BIOE 161L	Kelp Forest Ecology Laboratory	5

Biological Sciences-MCDB

BIOL 100	Biochemistry	5
BIOL 101	Molecular Biology	5

Environmental Studies (enrollment by permission of instructor)

ENVS 104A	Introduction to Environmental Field Methods	2
ENVS 104L	Field Methods Laboratory	5
ENVS 130A	Agroecology and Sustainable Agriculture	5
ENVS 130L	Agroecology and Sustainable Agriculture Laboratory	2
ENVS 130B	Justice and Sustainability in Agriculture	5
ENVS 131	Insect Ecology	5
ENVS 160	Restoration Ecology	5
ENVS 161A	Soils as Living Systems	5
ENVS 162	Plant Physiological Ecology	5
ENVS 163	Plant Disease Ecology	5

Science Communication

SCIC 160	Introduction to Science Writing	5

Three general electives chosen from the following:

Note: Lecture/lab combinations count as a single course. See note under "Upper-Division Courses" for more details.

Biological Sciences-EEB

Any upper-division BIOE course numbered BIOE 100 - BIOE 179 of 5 or more credits.

Biological Sciences-MCDB

BIOL 100	Biochemistry	5
BIOL 101	Molecular Biology	5

Earth and Planetary Sciences

EART 100	Vertebrate Paleontology	5
EART 100L	Vertebrate Paleontology Laboratory	2
EART 101	Invertebrate Paleobiology	5
EART 101L	Invertebrate Paleobiology Laboratory	1
EART 102	Marine Geology	5
EART 105	Coasts and Beaches	5

Economics

ECON 166A	Game Theory and Applications I	5
ECON 166B	Game Theory and Applications II	5

Environmental Studies (enrollment by permission of instructor)

ENVS 104A	Introduction to Environmental Field Methods	2
ENVS 104L	Field Methods Laboratory	5
ENVS 107A	Natural History Field Quarter	5
ENVS 107B	Natural History Field Quarter	5
ENVS 107C	Natural History Field Quarter	5
ENVS 108	General Entomology	5
ENVS 115A	Geographic Information Systems and Environmental Applications	5
ENVS 115L	Exercises in Geographic Information Systems	2
ENVS 120	Conservation Biology	5
ENVS 122	Tropical Ecology and Conservation	5
ENVS 123	Animal Ecology and Conservation	5
ENVS 130A	Agroecology and Sustainable Agriculture	5
ENVS 130L	Agroecology and Sustainable Agriculture Laboratory	2
ENVS 130B	Justice and Sustainability in Agriculture	5
ENVS 131	Insect Ecology	5
ENVS 160	Restoration Ecology	5
ENVS 161A	Soils as Living Systems	5
ENVS 162	Plant Physiological Ecology	5
ENVS 163	Plant Disease Ecology	5
ENVS 167	Freshwater and Wetland Ecology	5
ENVS 168	Biogeochemistry and the Global Environment	5

Microbiology and Environmental Toxicology

METX 100	Introduction to Microbiology	5
METX 100L	Microbiology Laboratory	5
METX 115	Environmental Health Science	5
METX 133	Medical Microbiology	5
METX 150	Applied and Environmental Microbiology	5

Ocean Sciences

OCEA 118	Marine Microbial Ecology	5
OCEA 122	Chemical Oceanography	5
OCEA 130	Biological Oceanography	5

Psychology

PSYC 123	Cognitive Neuroscience	5

One of the following may also be used as an upper-division general elective:

Biological Sciences-EEB

Any 5 credits of undergraduate research

BIOE 183W	Undergraduate Research in EEB--Writing	2
BIOE 183L	Undergraduate Research in EEB	3
BIOE 193	Independent Research in EEB	5
BIOE 193F	Independent Research in EEB	2
BIOE 195	Senior Thesis	5

Environmental Studies

ENVS 183	Environmental Studies Internship	5

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. The DC requirement in plant sciences is satisfied by completing **two** of the following ecology and evolutionary biology courses:

Note: Lecture and 2-credit lab combinations count as a single course.

BIOE 108	Marine Ecology	5
BIOE 114	Herpetology	5
BIOE 114L	Field Methods in Herpetological Research	2
BIOE 117	Systematic Botany of Flowering Plants	5
BIOE 120	Marine Botany	5
BIOE 120L	Marine Botany Laboratory	2
BIOE 122	Invertebrate Zoology	5
BIOE 122L	Invertebrate Zoology Laboratory	2
BIOE 125	Ecosystems of California	5
BIOE 126	Biology of Large Marine Vertebrates	5
BIOE 127	Ichthyology	5
BIOE 127L	Ichthyology Laboratory	2
BIOE 128L	Large Marine Vertebrates Field Course	7
BIOE 129	Biology of Marine Mammals	5
BIOE 129L	Biology of Marine Mammals Laboratory	2
BIOE 137	Molecular Ecology	5
BIOE 141L	Behavioral Ecology Field Course	7
BIOE 145	Plant Ecology	5
BIOE 145L	Field Methods in Plant Ecology	5
BIOE 150L	Ecological Field Methods Laboratory	5
BIOE 151B	Ecology and Conservation in Practice Supercourse: Ecological Field Methods Laboratory	5
BIOE 153C	Disciplinary Communication for Biologists	5
BIOE 157B	Ichthyology Field Class in Southern Africa	7
BIOE 158L	Field Methods in Marine Ecology	5
BIOE 159A	Marine Ecology Field Quarter: Marine Ecology with Laboratory	5
BIOE 161L	Kelp Forest Ecology Laboratory	5
BIOE 171	Disciplinary Communication for Biologists	5
BIOE 172	Population Genetics	5
BIOE 174	Evolutionary Medicine	5

Note: Lecture and 2-credit lab combinations count as a single course. BIOE 117 and BIOE 137 require concurrent enrollment in 2-credit labs, BIOE 117L and BIOE 137L, but these are not part of the DC requirement.

To receive DC credit for BIOE 129, BIOE 129L must be successfully completed. BIOE 129 without the lab can satisfy electives as noted above, however.

NRS/BIOL 188, California Ecology and Conservation course, taken spring 2023 or later, will satisfy 1/2 DC credit. For more information about this course contact an EEB undergraduate advisor or email eebadvising@ucsc.edu.

Comprehensive Requirement

All majors in the biological sciences require completion of a comprehensive requirement. This requirement can be satisfied in one of the following ways:

- receiving a passing grade in an independent research course, or field/laboratory course listed below.
- completing a senior thesis.

Comprehensive courses offered by Ecology and Evolutionary Biology

Note: Lab courses may have associated prerequisite or corequisite lecture courses.

BIOE 112L	Ornithology Field Studies	2
BIOE 114L	Field Methods in Herpetological Research	2
BIOE 117L	Systematic Botany of Flowering Plants Laboratory	2
BIOE 120L	Marine Botany Laboratory	2
BIOE 122L	Invertebrate Zoology Laboratory	2
BIOE 124L	Mammalogy Laboratory	2
BIOE 127L	Ichthyology Laboratory	2

BIOE 128L	Large Marine Vertebrates Field Course	7
BIOE 129L	Biology of Marine Mammals Laboratory	2
BIOE 131L	Animal Physiology Laboratory	2
BIOE 133L	Exercise Physiology Laboratory	2
BIOE 134L	Comparative Vertebrate Anatomy Laboratory	2
BIOE 135L	Plant Physiology Laboratory	2
BIOE 137L	Molecular Ecology Laboratory	2
BIOE 141L	Behavioral Ecology Field Course	7
BIOE 142L	Animal Behavior in the Wild (A Virtual Field Course)	5
BIOE 145L	Field Methods in Plant Ecology	5
BIOE 150L	Ecological Field Methods Laboratory	5
BIOE 151A	Ecology and Conservation in Practice Supercourse: Ecological Field Methods	5
BIOE 151B	Ecology and Conservation in Practice Supercourse: Ecological Field Methods Laboratory	5
BIOE 151C	Ecology and Conservation in Practice Supercourse: Functions and Processes of Terrestrial Ecosystems	5
BIOE 151D	Ecology and Conservation in Practice Supercourse: Conservation in Practice	5
BIOE 153A	Introduction to Arctic Ecology	5
BIOE 153B	Arctic Ecology	5
BIOE 153C	Disciplinary Communication for Biologists	5
BIOE 155L	Freshwater Ecology Laboratory	5
BIOE 158L	Field Methods in Marine Ecology	5
BIOE 159A	Marine Ecology Field Quarter: Marine Ecology with Laboratory	5
BIOE 159B	Marine Ecology Field Quarter: Ichthyology with Laboratory	5
BIOE 159C	Marine Ecology Field Quarter: Methods in Field Ecology	5
BIOE 159D	Marine Ecology Field Quarter: Methods in Field Ecology Laboratory	5
BIOE 159E	Marine Ecology Field Quarter: Behavioral Ecology	5
BIOE 159F	Marine Ecology Field Quarter: Global Change Ecology	5
BIOE 161L	Kelp Forest Ecology Laboratory	5
BIOE 163L	Ecology of Reefs, Mangroves, and Seagrasses Laboratory	2
BIOE 183W	Undergraduate Research in EEB--Writing	2

Comprehensive courses offered in other departments

METX 100L	Microbiology Laboratory	5
CRSN 152	IDEASS Laboratory Practicum	3

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

In addition to the specific courses shown in these planners, a student must complete courses satisfying the C, CC, ER, IM, PE, PR, and TA campus general education requirements.

Sample Frosh Planner

Year	Fall	Winter	Spring	Summer
Entering				College 1A Summer Edge (optional)
1st (frosh)	BIOE 20C College 1	MATH 16A or MATH 11A or MATH 19A CHEM 3A WRIT 1/WRIT 1E (if needed)	MATH 16B or MATH 11B or MATH 19B CHEM 3B CHEM 3BL	
2nd (soph)	BIOL 20A CHEM	BIOE 20B STAT	BIOL 105 PHYS	

	3C CHEM 3CL WRIT 2*	7 STAT 7L	6A PHYS 6L
3rd (junior)	BIOE 109 PHYS 6B or PHYS 6C	BIOE 107 PLNT topical elective	EEB general elective Botany lab
4th (senior)	EEB general elective Plant physiology	PLNT topical elective PLNT topical elective	EEB general elective

Two of the upper division course options must satisfy DC requirements.

One of the upper division course options must satisfy the Senior Comprehensive Requirement.

* WRIT 2 should be taken in or before spring quarter of the second year.

Additional Frosh sample planners may be found on the EEB website.

Sample Transfer Planner

For students who transferred after completing the transfer screening courses **and**:

- MATH 16B or MATH 11B or MATH 19B
- CHEM 3C and 3CL
- PHYS 6A PHYS 6L, and PHYS 6B or PHYS 6C

	Fall	**Winter**	**Spring**	**Summer**
Entering				KRSG 1T Summer Edge (optional)
3rd (junior)	BIOL 105 PLNT topical elective STAT 7 STAT 7L	BIOE 107 PLNT topical elective	BIOE 109 PLNT topical elective	
4th (senior)	EEB general elective Plant physiology	Botany lab EEB general elective	EEB general elective	

Two of the upper-division courses must satisfy DC requirements.

One of the upper-division courses must satisfy the Senior Comprehensive Requirement.

Additional sample Transfer student sample planners may be found on the EEB website.

ECOLOGY AND EVOLUTIONARY BIOLOGY BACHELOR'S/MASTER'S CONTIGUOUS PATHWAY

The Ecology and Evolutionary Biology (EEB) Department offers a contiguous bachelor’s/master's path program, which can be completed with an appropriate bachelor’s degree at UC Santa Cruz in five years. The program provides highly motivated undergraduate majors the opportunity to earn separate bachelor’s (B.A.) and master’s (M.A.) degrees. This pathway provides an additional level of preparation and experience to help students pursue careers in industry or government, or to increase their competitiveness for doctoral programs.

The requirements for the bachelor’s/master's pathway program in EEB allow an undergraduate student to complete graduate-level research culminating in a thesis that is original

in content and substantial enough to be published in a scientific journal. Students in the master's program share some coursework requirements with Ph.D. students but are not required to take comprehensive or qualifying exams that are required for the doctoral degree. In addition to coursework, a thesis, formal defense, and department seminar are required for those pursuing the M.A.

Students applying to the EEB Contiguous Bachelor's/Masters Path must be UC Santa Cruz undergraduates who are in the process of developing or conducting an independent research project with an EEB ladder rank faculty as their advisor or co-advisor. The undergraduate thesis advisor is the person who recommends applicants to the contiguous B.A./M.A. program and agrees to continue serving as their master's advisor or co-advisor. Students applying to this program will either be completing an undergraduate degree in one of the majors administered by EEB (i.e., biology, ecology and evolutionary biology, marine biology, or plant science) or completing an undergraduate degree in a related field and have completed and done well in the EEB coursework relevant to their proposed research. The master's degree consists of 35 total credits, a minimum of 20 credits must be in the required EEB core graduate-level courses.

Applications to the contiguous B.A./M.A path are completed in a two-step process. In spring of the undergraduate's junior year, they will complete the EEB departmental application form as described in the checklist below. If approved for the additional-year Contiguous Bachelor's/Master's Path, students will go through the regular EEB master's program application process in fall of their senior year. Admission to the program is not guaranteed; significant progress on the thesis research project combined with an excellent academic track record will indicate the preparedness of the student to undertake this accelerated master's program.

Checklist for Bachelor's/Master's Students

1. Read the program information on the Contiguous Bachelor's/Master's Path website, including requirements and deadlines. **Note:** The M.A. is a Plan I Thesis Track master's.
2. To be able to take advantage of this program, by the middle of your **junior year** you will need to find an EEB ladder rank faculty advisor or co-advisor with whom you will design and complete your research project. If you choose to work with an adjunct or affiliated faculty, you must also have a ladder rank faculty as your co-advisor. At this point the research project may develop either into an undergraduate senior thesis project or a master's research project.
3. By spring of the **junior year**, submit your EEB departmental application for consideration to apply to the contiguous B.A./M.A. program. This must include:
    a. a letter from a ladder rank faculty in EEB who agrees to be your master's advisor or co-advisor;
    b. a brief description (maximum one page) of your planned research;
    c. a curricular plan that has been reviewed by your proposed EEB faculty advisor and any other proposed faculty co-advisors, Biology Advising (or the appropriate advising for your undergraduate major at UCSC) and the EEB Graduate Program coordinator to ensure you can complete all coursework required for both degrees in five years.
4. In the fall of your senior year, if your departmental application is approved and you and your advisor still believe the research project could develop into a master's thesis, apply for admission through the UCSC Graduate Division portal to the M.A. Program (due date Dec. 10).
    a. Your statement of purpose must include a proposed research plan for your master's thesis.
    b. You must include a letter of recommendation from a ladder rank EEB faculty advisor or co-advisor stating that they approve this plan and agree to serve as your advisor or co-advisor for your master's research and thesis.
5. By the end of senior year, complete all requirements for your bachelor's degree from UCSC and submit an undergraduate thesis, which includes a section on your proposed research extension (for the master's thesis), following the same guidelines as the existing Two-Year Master's Program. This thesis must be read and approved by your EEB ladder rank faculty advisor. Recommendation: enroll in a graduate-level class at some time during your senior year and also attend EEB departmental seminars (BIOE 294). Entry-level graduate classes include BIOE 203, BIOE 215, BIOE 238, BIOE 239, and BIOE 245.
6. During the master's year, complete the graduate course and seminar requirements while working on your master's thesis - total of seven classes.
    a. You will enroll in BIOE 200A, BIOE 200B in fall quarter, BIOE 200C and BIOE 200D in winter quarter, and attend EEB departmental seminars (BIOE 294) every quarter. One graduate-level statistics class is required (such as BIOE 286/BIOE 286L) and two elective EEB graduate classes. A student may take BIOE 203 and BIOE 215 during their senior undergraduate year as long as these courses are not used to meet course and credit requirements for their undergraduate degree. Establish a master's thesis committee consisting of your research advisor (chair) plus two other ladder rank faculty.
7. Master's Thesis/Master's Thesis Defense
    a. At the beginning of your senior undergraduate year, develop a timeline with your advisor that includes deadlines for all components of the thesis; a complete draft should be submitted to your advisor by early April at the latest. There is

usually an extensive revision process prior to giving the thesis to the other committee members.

b. By Friday of week 10 of winter quarter schedule your defense and public seminar with yourmaster's thesis committee members through the departmental graduate coordinator.

c. One month (30 days) before the thesis defense date (at the latest), email the thesis to all thesis committee members.

d. During your defense, you will present your work to be reviewed by your committee. They may also ask general knowledge questions to test your mastery of the subject area. Corrections and/or additions to your thesis may be suggested.

e. Next, a formal, public research seminar will be presented by the student. This seminar should be scheduled with the EEB Graduate Program coordinator for the regular time slot when possible, and may not be scheduled for less than a week after the closed defense meeting. It is important to leave enough time before the public seminar for the student to make changes to the thesis manuscript that are requested by the committee. The M.A. Thesis Reading Committee chair signs the title sheet only after the research has been presented in a public seminar.

f. Submit the final version of your master's thesis and complete your final appointment with the Graduate Division. To participate in the graduation ceremony, students must submit all documentation to the Graduate Division by the deadline as stated in the Academic and Administrative Calendar. This usually occurs during week nine of spring quarter.

If a student completes their UCSC bachelor's degree and is admitted to the Contiguous Bachelor's/Master's Path, but does not successfully complete all requirements expected for this program, then they would revert to the existing EEB Master's Program requirements. They must remain in good standing in the program and follow all existing guidelines of the EEB Master's Program. The baseline assumption is that students admitted to the Contiguous Bachelor's/Master's Path will be self-funded throughout their enrollment in the master's program.

ECOLOGY AND EVOLUTIONARY BIOLOGY M.A.

Introduction

All curricular requirements are aimed at preparing students for timely and successful completion of a master thesis. The master of arts (M.A.) curriculum in Ecology and Evolutionary Biology (EEB) includes two stages: 1) required coursework, 2) the research, writing, and defense of the master thesis.

Requirements

The purpose of the master's program in EEB is to allow a student to complete graduate-level research that is usually more directed and shorter-term than that done by doctoral students. Students in the master's program share some coursework requirements with Ph.D. students but do not take the comprehensive or qualifying exams. A thesis, formal defense, and public seminar are required.

Course Requirements

M.A. students must take BIOE 200A, BIOE 200B, BIOE 200C, BIOE 200D, a statistics course and two elective graduate-level classes within their first two years. BIOE 281, BIOE 294, and BIOE 297 (Independent Study) must be taken every quarter the student is in residence. All students must be enrolled in at least 15 credits per quarter, unless on approved part-time status. No more than 15 credits from upper-division undergraduate courses may be used as part the student's coursework.

Core Courses

BIOE 200A	Scientific Skills	5
BIOE 200B	Advanced Organismal Biology	5
BIOE 200C	Evolutionary Ecology	5
BIOE 200D	Foundations in Ecology & Evolutionary Biology	5
BIOE 286	Experimental Design and Data Analysis	5
BIOE 286L	Experimental Design and Data Analysis Lab	2

BIOE 200A and BIOE 200B are offered each fall quarter, BIOE 200C and BIOE 200D are offered each winter quarter. At least one class on statistics must be completed. Graduate-level (200-level) statistic courses in UCSC departments outside of EEB may meet this requirement upon approval by the EEB Graduate Advisory Committee.

Elective Courses

BIOE 203	Introductory Seminar in Ecology and Evolutionary Biology	3
BIOE 215	Advanced Seminar in Ecology and Evolutionary Biology	3
BIOE 208	Marine Ecology	5
BIOE 245	Plant Ecology	5
BIOE 245L	Field Methods in Plant Ecology Laboratory	5
BIOE 247	Community Ecology	5
BIOE 238	Modeling Evolution and Ecology	5

BIOE 239	Mathematical Modeling and Data Science in Ecology and Evolution	5
BIOE 258L	Experimental Marine Ecology	5
BIOE 262	Facilitating Change in Coastal Science Policy	5
BIOE 271	Disciplinary Communication for Biologists	5
BIOE 272	Population Genetics	5
BIOE 286	Experimental Design and Data Analysis	5
BIOE 286L	Experimental Design and Data Analysis Lab	2

Note that BIOE 203 and BIOE 215 seminar topics are variable and will be announced each quarter.

The following courses must be taken every quarter the student is in residence.

BIOE 281	Graduate Seminar
BIOE 294	Ecology, Evolutionary Biology Seminar
BIOE 297	Independent Study

All students must be enrolled in at least 15 credits per quarter, unless on approved part-time or leave of absence status.

Other Requirements

EEB requires that each student must, in consultation with their supervisor, assemble a thesis committee no later than spring quarter of their first year. The student's supervisor will serve as the chair of the committee. The thesis committee has the responsibility for ensuring the standards and goals of the department and university and will evaluate the student research in two phases. In the fall of the second year, each master's student will schedule their thesis proposal meeting at which time the merit of the proposed research is evaluated. Once the proposal has been accepted, the student has approximately one year to complete the work and format their master thesis manuscript. In order to graduate, the thesis is defended in a closed oral examination, presented in a departmental seminar and submitted as a formal dissertation to the Graduate Division. The master's dissertation is typically one chapter that comprises original research which is substantial enough to be published in a scientific journal. The target time for the master's program is two years.

Deadlines at each stage must be confirmed with the graduate program coordinator.

Academic Progress

Normative time to degree for the M.A. program is two years. Academic progress is formally reviewed in the spring quarter of each academic year by means of an annual report.

Optional Catchall

Applying for Graduation

Information on applying for graduation may be found on the EEB Graduate Program website. Deadlines should always be confirmed with the graduate program coordinator.

ECOLOGY AND EVOLUTIONARY BIOLOGY PH.D.

Introduction

All curricular requirements are aimed at preparing students for timely and successful completion of a doctoral dissertation. The Ph.D. curriculum in Ecology and Evolutionary Biology (EEB) includes six stages: 1) required coursework, 2) the comprehensive examination, 3) the qualifying examination, 4) two quarters of teaching experience, 5) submission of at least one paper for publication, 6) the research, writing, and defense of the dissertation.

Advancement to Candidacy

Course Requirements

Core Courses

Ph.D. students must take BIOE 200A and BIOE 200B in the fall of the first year, and BIOE 200C and BIOE 200D in the winter of the first year. All course requirements should be completed by the end of the third year and before the student's proposal defense (QE defense). There are three electives beyond the core courses including at least one course in statistics.

BIOE 200A	Scientific Skills	5
BIOE 200B	Advanced Organismal Biology	5
BIOE 200C	Evolutionary Ecology	5
BIOE 200D	Foundations in Ecology & Evolutionary Biology	5

Statistics requirement

BIOE 286	Experimental Design and Data Analysis	5
BIOE 286L	Experimental Design and Data Analysis Lab	2

Graduate-level (200-level) statistic courses in other UCSC departments may fulfill this requirement upon approval by EEB GAC.

Elective Graduate Course List (2 required)

BIOE 203	Introductory Seminar in Ecology and Evolutionary Biology	3
BIOE 215	Advanced Seminar in Ecology and Evolutionary Biology	3
BIOE 208	Marine Ecology	5
BIOE 245	Plant Ecology	5

BIOE 245L	Field Methods in Plant Ecology Laboratory	5
BIOE 247	Community Ecology	5
BIOE 239	Mathematical Modeling and Data Science in Ecology and Evolution	5
BIOE 238	Modeling Evolution and Ecology	5
BIOE 258L	Experimental Marine Ecology	5
BIOE 262	Facilitating Change in Coastal Science Policy	5
BIOE 271	Disciplinary Communication for Biologists	5
BIOE 272	Population Genetics	5

Two elective BIOE-graduate-level courses are required. Note that BIOE 203 and BIOE 215 seminar topics are variable and will be announced each quarter.

The following courses must be taken every quarter the student is in residence.

All students must be enrolled in at least 15 credits per quarter, unless on approved part-time status.

BIOE 281	Graduate Seminar
	AND
BIOE 294	Ecology, Evolutionary Biology Seminar
	AND
	Either this course
BIOE 297	Independent Study
	or this course
BIOE 299	Thesis Research

BIOE 297 or BIOE 299 is required, not both. BIOE 297 is taken until the student advances to candidacy. BIOE 299, Thesis Research, is taken after the student advances to candidacy.

Foreign Language Requirements

Teaching Requirement

Each Ph.D. student is expected to complete at least two academic quarters as a teaching assistant during their graduate career.

Pre-Qualifying Requirements

The comprehensive examination is completed in the spring quarter of the first year. This is a written examination, the goal of which is to examine the student's breadth and depth of knowledge of evolution, ecology, organismal biology (including physiology and behavior), and general biology. The student should demonstrate a level of knowledge of basic biology ranging from an introductory level in fields most removed from the student's focus area to a more substantial and advanced level in fields closer to the student's focus area.

Qualifying Examination

The qualifying examination, also known as the proposal defense, is completed no later than the third year of the Ph.D. program. The goal of this two-part examination is to establish the student's proposed dissertation project. Students submit a dissertation research proposal to their qualifying exam committee and defend it in an oral examination. The proposal should be submitted no less than 10 business days before the oral defense. The proposal defense must be completed by the spring quarter of the third year and be followed by a departmental seminar on the student's research proposal. Students advance to candidacy after having completed all required coursework, the comprehensive examination, and the qualifying examination.

[Optional Catchall]

Dissertation

Dissertation

Within EEB, a dissertation usually contains three or four chapters that comprise original research, each of which is substantial enough to be published in a scientific journal, plus a short introduction and a conclusion/synthesis. The conclusion synthesizes the results of the dissertation as a whole, reflects on how novel insights come from the whole body of work, and may point the reader toward future research directions.

At least one chapter of the dissertation must be submitted to a refereed journal for publication as a final program requirement before receipt of the Ph.D.

Dissertation Defense

The dissertation is defended in a three-hour closed oral examination and then presented in a departmental seminar.

Academic Progress

Normative time to degree is six years, though it is possible to complete the program in less time. Academic progress is formally reviewed in the spring quarter of each academic year in the form of an annual report. Once a student has advanced to candidacy, they are expected to hold an annual committee meeting which is documented in the annual report. The last committee meeting occurs within one year of the final defense and is the penultimate committee meeting.

Applying for Graduation

Information for applying for graduation may be found on the EEB Graduate Program website. Deadlines should always be confirmed with the Graduate Program coordinator.

[Optional Catchall]

ECOLOGY AND EVOLUTIONARY BIOLOGY DESIGNATED EMPHASIS

Introduction

Students in related graduate programs at UC Santa Cruz may elect to complete the Ecology and Evolutionary Biology Designated Emphasis plan. You must obtain approval from

your home department and be in good standing to apply for this program. An EEB faculty member will serve as your DE faculty advisor meaning that they will serve on your qualifying exam committee, your dissertation reading committee, and review your coursework plan, which requires 20 credits of EEB graduate coursework.

Requirements

To receive a designated emphasis in ecology and evolutionary biology (EEB), graduate students must complete the following requirements in addition to the degree requirements for the doctorate in their home department:

Committee Composition and Departmental Approvals

1. Identify a designated faculty advisor from among the faculty of the EEB department, who commits to serve on the qualifying examination committee and on the Ph.D. dissertation reading committee.

2. Once a designated faculty advisor has been identified, file intent to complete the designated emphasis in EEB with the EEB department graduate program coordinator.

Course Requirements

Students are required to complete at least 20 credits of EEB coursework. Courses taken to fulfill program requirements within the home department will not count toward the designated emphasis program's required coursework.

Take the following EEB core courses (required for all EEB graduate students):

BIOE 200A	Scientific Skills	5
BIOE 200B	Advanced Organismal Biology	5
BIOE 200C	Evolutionary Ecology	5

Enroll in the following course and attend all EEB Department seminars for one quarter:

BIOE 294	Ecology, Evolutionary Biology Seminar	

Enroll in the following course corresponding to their EEB faculty advisor and attend their laboratory group seminars for one quarter:

BIOE 281	Graduate Seminar	

Take at least two other EEB graduate courses for a minimum total of 20 credits.

BIOE 200D	Foundations in Ecology & Evolutionary Biology	5
BIOE 203	Introductory Seminar in Ecology and Evolutionary Biology	3
BIOE 215	Advanced Seminar in Ecology and Evolutionary Biology	3
BIOE 208	Marine Ecology	5
BIOE 245	Plant Ecology	5
BIOE 245L	Field Methods in Plant Ecology Laboratory	5
BIOE 247	Community Ecology	5
BIOE 239	Mathematical Modeling and Data Science in Ecology and Evolution	5
BIOE 238	Modeling Evolution and Ecology	5
BIOE 258L	Experimental Marine Ecology	5
BIOE 262	Facilitating Change in Coastal Science Policy	5
BIOE 271	Disciplinary Communication for Biologists	5
BIOE 272	Population Genetics	5
BIOE 286	Experimental Design and Data Analysis	5
BIOE 286L	Experimental Design and Data Analysis Lab	2

Writing, Research and/or Teaching Requirements

Academic Progress

Before applying to graduate, the student must request verification of completion of the designated emphasis program from both their home department and the EEB Graduate Program coordinator. The decision to award a student the designated emphasis will be made by the department chair, the faculty graduate director, or an appropriately constituted faculty committee drawn from the degree-granting program, according to departmental procedure.

[Optional Catchall]

Materials Science & Engineering

212 Interdisciplinary Sciences Building
(831) 459-1217
https://materials.ucsc.edu/

The Materials Science & Engineering (MSE) Graduate Program at UC Santa Cruz brings together experts in materials synthesis, materials characterization, and theoretical modeling of materials to form research teams that can respond to research opportunities that require a comprehensive approach.

MSE aims to accelerate the acquisition of fundamental knowledge and workforce training required to develop new materials used in sustainable technologies. These technologies include energy efficient electronics, efficient light harvesting energy sources, and energy storage devices among others. Materials science and engineering not only provides insights into some of the fundamental properties of complex systems in nature, but also significantly impacts the lives of people by providing avenues for the development of electronic, optical, magnetoelectronic, bioelectronic, and other state-of-the-art devices with new properties.

Graduate Programs:

Materials Science and Engineering M.S. (p. 391)

Materials Science and Engineering Ph.D. (p. 392)

MATERIALS SCIENCE AND ENGINEERING M.S.

Introduction

The Materials Science and Engineering (MSE) program welcomes students interested in a Master of Science (M.S.) degree. M.S. students develop laboratory, computational, and analytical theory skills which are of value in many fields, including semiconductor materials and device processing, computer simulation and visualization, cryogenics, x-ray scattering, electronic, magnetic, and photonic measurements, and bioelectronics among others. Each M.S. student is assigned a faculty adviser who helps to design a coursework plan suited to the student's interests. The MSE program is interdisciplinary by nature and program faculty are formal members of academic departments in the Physical Biological Sciences (PBSci) Division and the Baskin School of Engineering (BSOE). A list of MSE faculty may be found here.

MSE graduate students and faculty use several UC Santa Cruz research facilities, including laboratory facilities located on campus in the BSOE, the Department of Chemistry and Biochemistry, and the interdisciplinary Westside Research Park research building. Proximity to the Stanford Synchrotron Radiation Laboratory, the Stanford Nanofabrication Facility, and Lawrence Berkeley National Laboratory provides additional local research opportunities. UC Santa Cruz faculty and graduate students also participate in research programs at Los Alamos National Laboratory, National High Magnetic Field Laboratory, and Oak Ridge National Laboratory. Collaborations with industrial partners, such as IBM, Advanced Materials, and other companies are also available for some projects.

Application materials and brochures describing the MSE M.S. program in more detail may be obtained by visiting the MSE program website or by contacting the Division of Graduate Studies.

Students pursuing the Ph.D. degree can apply for a master's degree upon successful completion of the requirements for a master's degree.

Requirements

Course Requirements

M.S. Plan I: Thesis Students

M.S. Plan I students must complete 45 credits of graduate or upper-division undergraduate course work, of which at least 30 credits must be graduate level credits. Students must complete at least one course from three of the five areas of Materials Science and Engineering: (1) Quantum and Thermodynamic Foundations of Materials, (2) Condensed Matter and Structure, (3) Materials Characterization Techniques, (4) Functional Materials , and (5) Materials Synthesis and Processing. Students must also take MSE 200, Introduction to Materials Science and Engineering, at least once and MSE 280, Colloquium in Materials Science and Engineering, at least five times.

Students must enroll in MSE 200 the first time it is offered during their residency. At least one enrollment in MSE 280 must be taken for a letter grade. A letter grade in this course entails giving one of the colloquia**.** The course of study needs to be approved each quarter by the research adviser (who will supervise the research project) and the MSE graduate adviser.

The thesis research project, along with the Area 3, 4, and 5 courses, will provide significant practical professional development for students because the techniques used are widely used in industry. The expected time to degree is six quarters (two years).

The M.S. Plan I degree is open to students enrolled in the Ph.D. program.

M.S. Plan I: Thesis Requirement

Students enrolled in M.S. Plan I will be awarded a master's degree upon completing the above requirements and submitting an approved thesis. Each M.S. student is assigned a faculty adviser who helps design a research plan suited to the student's interests. The thesis may be in any of the research fields in the program, thereby developing laboratory, computational, and/or analytical theory skills that are of value in many areas of materials science and engineering.

M.S. Plan II: Comprehensive Exam Students

M.S. Plan II students must complete 45 credits of graduate or upper-division undergraduate course work, of which at least 30 credits must be graduate level credits. Students must complete at least one course from three of the five areas of Materials Science and Engineering: (1) Quantum and Thermodynamic Foundations of Materials, (2) Condensed Matter and Structure, (3) Materials Characterization Techniques, (4) Functional Materials , and (5) Materials Synthesis and Processing. Students must also take MSE 200, Introduction to Materials Science and Engineering, at least once, and MSE 280, Colloquium in Materials Science and Engineering, at least five times.

Students must enroll in MSE 200 the first time it is offered during their residency. At least one enrollment in MSE 280 must be taken for a letter grade. Students can take Directed Studies a maximum of six times. The course of study needs to be approved each quarter by the MSE graduate adviser. Students will take a written comprehensive examination to complete the degree. The examination emphasizes the fundamental knowledge of the study area rather than the specifics covered in individual courses.

The degree will be awarded when all these requirements are met. Expected time to degree is six quarters (two years).

The M.S. Plan II degree is only open to students enrolling in the terminal M.S. degree and is not open to students that have enrolled in the Ph.D. program. M.S. Plan II students who would like to transfer to the doctoral program will have to have satisfied all the coursework requirements for the master's program, passed the oral qualifier exam, and obtained the MSE Graduate Committee's approval.

MSE Fundamentals Courses

Area 5 Courses: Materials Synthesis and Processing

ECE 207	Nanomaterials and Nanometer-Scale Devices	5
ECE 225	Semiconductor Processing and Bandgap Engineering	5
ECE 228	Engineering of Thin Film Deposition	5

Applying for Graduation

Students must apply for graduation to receive their M.S. degree. The form can be found on the graduate division forms page and should be submitted to the Graduate Division.

MATERIALS SCIENCE AND ENGINEERING PH.D.

Introduction

The Materials Science and Engineering (MSE) program welcomes students interested in a Ph.D. degree. Doctoral candidates perform experimental, theoretical, and computational research in any of the areas covered by the program, including quantum materials (two-dimensional and topological materials, among others), energy materials (batteries and photovoltaics), quantum sensors, photonics, magnetic materials (including spintronics), bioelectronics, and neuromorphic electronic materials. They develop laboratory, computational, and analytical theory skills which are of value in many fields, including semiconductor materials and device processing, computer simulation and visualization, cryogenics, x-ray scattering, electronic, magnetic, and photonic measurements, and bioelectronics among others.

Each Ph.D. student is assigned a faculty adviser who helps to design a coursework plan suited to the student's interests. The MSE program is interdisciplinary by nature and program faculty are formal members of academic departments in the Physical Biological Sciences (PBSci) Division and the Baskin School of Engineering (BSOE). A list of MSE faculty may be found here.

MSE graduate students and faculty use several UC Santa Cruz research facilities, including laboratory facilities located on campus in the BSOE, the Department of Chemistry and Biochemistry, and the interdisciplinary Westside Research Park research building. Proximity to the Stanford Synchrotron Radiation Laboratory, the Stanford Nanofabrication Facility, and Lawrence Berkeley National Laboratory provides

additional local research opportunities. UC Santa Cruz faculty and graduate students also participate in research programs at Los Alamos National Laboratory, the National High Magnetic Field Laboratory , and Oak Ridge National Laboratory. Collaborations with industrial partners, such as IBM, Advanced Materials, and other companies may also be available for some projects.

The UC Santa Cruz MSE program is committed to providing an excellent education to a diverse population of graduate students and we encourage candidates from all backgrounds to apply. We employ a holistic process to assess candidates' knowledge and passion for materials science and engineering, as well as the perseverance and tenacity required to complete the doctoral program. Of particular importance is the alignment between the research interests of the candidate and those of the program's affiliated faculty. While taking into consideration a candidate's undergraduate grade point average (GPA), letters of recommendation, student statements, and general Graduate Record Examinations (GRE) scores, we do not disqualify applicants based on any single factor. The program recognizes the documented limitations of the GRE as an equitable predictor of success in graduate studies and research.

Students pursuing the Ph.D. degree can apply for a master's degree upon successful completion of the requirements for a master's degree.

Application materials and brochures describing the MSE Ph.D. program in more detail may be obtained by visiting the MSE program website or by contacting the Division of Graduate Studies.

Advancement to Candidacy

The following sections define the requirements to advance to candidacy for the Ph.D. degree.

Course Requirements

Prospective Ph.D. students must complete a minimum of 45 credits of graduate or upper-division undergraduate coursework, of which at least 30 credits must be graduate level credits, covering all five areas of study in (1) Materials Science and Engineering: Quantum and Thermodynamic Foundations of Materials, (2) Condensed Matter and Structure, (3) Materials Characterization Techniques, (4) Functional Materials , and (5) Materials Synthesis and Processing. Students must earn at least a B- in these courses to remain in good standing in the program. Students must also take one course in area (6) Professional Development.

Students are required to take either PHYS 215 or CHEM 263, and PHYS 219 or CHEM 262 from area (1). Taking PHYS 262 is strongly encouraged.

Students must enroll in MSE 200 the first time it is offered during their residency.

Students must enroll in MSE 280 during all quarters of residency and must obtain a letter grade in the course once during each academic year of residency except for the first one. A letter grade in this course entails giving one of the colloquia. Students must also take two quarters of MSE 290 during their first year; the two different rotations may be done with the same or a different group. The course of study needs to be approved each quarter by the research adviser (when determined) and the MSE graduate adviser. Students may take additional courses to prepare for and conduct their Ph.D. research as needed.

One or more of these first-year courses can be waived if students have taken equivalent graduate-level courses at their undergraduate institution. However, this requires that the course covers the material in the first-year courses syllabi and that the students obtained a satisfactory grade (a B or higher, or the equivalent).

MSE Fundamentals Courses

MSE 200	Introduction to Materials Science and Engineering	2
MSE 280	Colloquium in Materials Science and Engineering	2
MSE 290	Research Rotation	5

Areas of Study Courses

Area 1 Courses: Quantum and Thermodynamic Foundations of Materials

CHEM 262	Statistical Mechanics	5
CHEM 263	Quantum Mechanics	5
PHYS 215	Introduction to Non-Relativistic Quantum Mechanics	5
PHYS 219	Statistical Physics	5
PHYS 262	Phase Transformations in Materials	5

Area 2 Courses: Condensed Matter and Structure

CHEM 268	Solid State and Materials Chemistry	5
ECE 102	Properties of Materials	5
ECE 102L	Properties of Materials Laboratory	2
ECE 227	Fundamentals of Semiconductor Physics	5
PHYS 156	Applications of Quantum Materials	5
PHYS 157	Frontier of Quantum Materials	5
PHYS 231	Introduction to Condensed Matter Physics	5
PHYS 232	Condensed Matter Physics	5

Area 3 Courses: Materials Characterization Techniques

CHEM 256D	X-ray Crystallography	5
CHEM 261	Foundations of Spectroscopy	5
CHEM 264	Computational Materials	5

ECE 203	Nanocharacterization of Materials	5
PHYS 291B	X-rays and Magnetism	2

Area 4 Courses: Functional Materials

ECE 201	Introduction to Nanotechnology	5
ECE 204	Bioelectronics	5
ECE 205	Fundamentals of Nanoelectronics	5
ECE 223	Advanced Solid-State Devices	5
ECE 230	Optical Fiber Communication	5
ECE 232	Integrated Biophotonics	5
PHYS 234	Soft Condensed Matter Physics	5
PHYS 240	Polymer Physics	5
PHYS 261	Fundamentals of Mesoscopic Systems	5

Area 5 Courses: Materials Synthesis and Processing

ECE 207	Nanomaterials and Nanometer-Scale Devices	5
ECE 225	Semiconductor Processing and Bandgap Engineering	5
ECE 228	Engineering of Thin Film Deposition	5

Area 6 Courses: Professional Development

BME 201	Scientific Writing	3
CHEM 230	Grant Writing in Biomedical Research	5

Qualifying Examination

After identifying an appropriate research project with their faculty advisor, students form an Oral Qualifying Examination Committee.

The Oral Qualifying Examination focuses on the dissertation problem. It includes considerable depth in the student's area of specialization, as required for a successful completion of the dissertation. The examination begins with the student's presentation of the dissertation topic and is followed with questions and suggestions by the doctoral committee. During the exam, the candidate will have to display competency in the fundamental knowledge required to complete the project.

Dissertation

A doctoral dissertation will be an original and substantial contribution to knowledge in the student's major field. The dissertation must demonstrate the student's ability to carry out a program of independent advanced research and to report the results in accordance with standards observed in recognized scientific journals. When the doctoral committee determines that a suitable draft of the dissertation has been presented, a dissertation examination and defense for the student is scheduled.

Dissertation Defense

The public dissertation defense is required for the Ph.D. degree and will consist of a public seminar followed by questions from the committee. Students should work with their committee to confirm a defense date and time. The MSE Program staff can assist with providing a room for the defense and with publicizing the event. Students should have a final or nearly final draft of their dissertation and provide it to their committee prior to the defense. It is suggested that the draft be provided at least one month prior to the defense, but this is at the committee's discretion. The graduate advisor and/or the Graduate Committee can provide guidance as to the procedures for selection of committee membership, the format of the examination, and required reporting.

Academic Progress

Annual evaluation ordinarily is the joint responsibility of the graduate coordinator and the faculty advisor and/or the chair of the student's doctoral committee. An evaluation should include a brief review of the student's work to date, with particular attention to the period since the last report, describing the student's progress toward the degree, pointing out any areas in which improvement is recommended or required, and establishing academic objectives for the following period.

The results of annual reviews are committed to writing and signed by the supervisor. Before a doctoral student has advanced to candidacy, the second signer may be the graduate coordinator; after advancement, a second dissertation committee member must also sign. The annual evaluations are distributed to the student and kept in the student's file. They form the basis for decisions about continued financial support, academic probation and/or dismissal, extensions of financial aid beyond the expected graduation time, and other matters.

The expected graduation time to degree for the program is five years.

Applying for Graduation

Students should apply for the Ph.D. at the beginning of the term in which they will complete all degree requirements. The application form can be found on the graduate division forms page and should be submitted to the Graduate Division.

UNDERGRADUATE PROGRAM

Mathematics is both a fundamental discipline and an essential tool for students of biology, chemistry, computer engineering, computer science, Earth sciences, economics, electrical engineering, information systems management, physics, and psychology. Researchers in all these areas are constantly developing new ways of applying mathematics to their fields. A strong mathematics background is vital to the advanced study of many disciplines, including the physical and biological sciences, engineering, and the social sciences.

The UC Santa Cruz mathematics program offers a wide variety of undergraduate courses:

- Students interested in studying mathematics are strongly encouraged to take algebra, geometry, and trigonometry before entering the university. Students needing mathematics courses for their intended major are strongly encouraged to consider their options, and take the necessary steps for assessment and placement as early as possible. Progress in some majors could be delayed if the calculus series is not begun upon arrival at UCSC. Students concerned about their ability to place into courses above MATH 3 should consider taking MATH 2 or its equivalent prior to entering UCSC.
- Lower-division courses with numbers in the range MATH 11A through MATH 24 (calculus, mathematical modeling, linear algebra, vector calculus, and differential equations) prepare students for further study in mathematics, the physical and biological sciences, engineering, or quantitative areas of the social sciences. Science and engineering majors take some or all of these courses as part of their undergraduate studies. More specifics about this can be found at our website.
- Upper-division courses, with numbers in the range MATH 100-MATH 199, are intended for majors in mathematics and closely related disciplines. Some of these courses provide students with a solid foundation in key areas of mathematics such as algebra, analysis, geometry, and number theory, whereas others introduce students to more specialized areas of mathematics. Calculus, linear algebra, vector calculus, and proof and problem solving are prerequisite to most of these advanced courses.

All students should review the catalog's requirements for their major or intended major, and possibly consult with the department sponsoring their major (or expected major) before deciding which math courses to take. More information on which courses are intended for the various types of students may be found here at the Mathematics Department website.

Enrollment Requirements

Students who plan to take a mathematics course at UC Santa Cruz must first demonstrate sufficient preparation by one of the following :

- completing mathematics placement (see below)
- the College Entrance Examination Board's Advanced Placement (AP) calculus examination
- the International Baccalaureate (IB) Mathematics Examination
- passing the appropriate prerequisite course.

Through placement, some students may be required to start their UCSC mathematics classes with MATH 2 (followed by MATH 3) or MATH 3 before progressing to one of the calculus series. Students who have passed MATH 2 may enroll in MATH 3. Students who have passed MATH 3 may enroll in course MATH 11A or MATH 16A or MATH 19A. Students who have passed a precalculus course at a college or university may enroll in course MATH 11A or MATH 16A or MATH 19A, but they must first verify the course's eligibility (on Assist.org) and completion (with the mathematics adviser).

UC Santa Cruz Mathematics Placement

Mathematics placement assesses student readiness for their first UC Santa Cruz mathematics class. Students whose areas of study require precalculus or calculus courses are strongly advised to complete placement, as well as any required courses, early in their academic careers. Students intending to take one or more mathematics courses at UCSC should begin placement as early as possible to fully benefit from the process.

Students completing placement by assessment through ALEKS PPL should familiarize themselves with the instructions and guidelines, course eligibility cut-offs, and score posting schedule.

Advanced Placement (AP) Calculus Examinations

Students placing by their scores on the College Board's Advanced Placement Calculus Exam should refer to this table for AP course equivalencies.

International Baccalaureate (IB)

Examination in Mathematics

Students placing by their scores on the International Baccalaureate Exam should refer to this table for IB course equivalencies.

GRADUATE PROGRAM

The Mathematics Department offers the Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees. Students admitted to the Ph.D. program may receive a master's degree en route to the Ph.D.; students admitted to the M.A. program may apply to the department to transfer to the Ph.D. program upon passing the required preliminary examinations at the Ph.D. level.

In order to be prepared for our graduate programs, it is recommended to have a B.A. or B.S. in mathematics. Having taken more than the bare minimum of required upper-division classes in the mathematics major will be most helpful.

The Mathematics Department at UC Santa Cruz is small but dynamic, with an ongoing commitment to both research and teaching. The department has leading programs in several actively developing areas of mathematics, and our work interacts strongly with science, technology, and other fields.

Current areas of research in Algebra: Number Theory Topology, and Vertex Operators include:

- Vertex operator algebras, conformal field theory, modular forms, Hopf algebras, category theory, infinite-dimensional Lie algebras, mathematical physics.
- Representations of Lie and p-adic groups, applications to number theory, Bessel functions, Rankin-Selberg integrals, Gelfand-Graev models.
- Finite groups, their representations and representation rings. Conjectures of Alperin, Broué and Dade. Mackey functors, biset functors, Burnside rings, fusion systems, blocks of group algebras. ring theory, module theory, category theory, homological algebra.
- Algebraic topology, cobordism cohomology theories, elliptic genera and modular forms, string topology of loop spaces, topological quantum field theories.
- Triangulated categories, tensor triangular geometry, stable homotopy theory, and higher category theory.
- Galois and incidence geometry.
- Arithmetic algebraic geometry of moduli spaces and locally symmetric varieties.

Current areas of research in Analysis, Geometry and Dynamics include:

- Symplectic and contact geometry and topology, Floer homology, periodic orbits and dynamics of Hamiltonian systems and Reeb flows.
- Dynamical systems, celestial mechanics, geometric mechanics, bifurcation theory, control theory.
- Geometric integration schemes, numerical methods on manifolds.
- Differential geometry, nonlinear analysis, Ginzburg-Landau problem.
- General relativity, Einstein's equations, positive mass conjecture, Teichmuller theory.
- Geometric Analysis: geometric flows, harmonic maps, minimal surfaces, surfaces of constant mean curvature, min-max theory.
- Functional analysis, spectral theory, and Banach algebras; Toeplitz and Hankel operators, matrices, and determinants; Wiener-Hopf factorization and Riemann-Hilbert problems; applications to random matrix theory and statistical physics.
- Inverse problems in PDEs and integral geometry, X-ray/Radon transforms, non-abelian X-ray transforms, with applications to imaging sciences.
- Spectral Zeta Functions and applications in Quantum Field Theory and Number Theory.

Further information about the research pursued by our faculty can be explored via the links above. Also, see individual faculty websites for more information.

Admission to the Graduate Program

Submit your application through the Graduate Division. The deadline is usually during the first half of January. Admission is decided by a faculty committee, and is based on a combination of factors including: GRE scores (in particular the GRE Math Subject Score), letters of recommendation, GPA, and classes taken.

Financial Support

The Mathematics Department is strongly committed to the financial support of graduate students who are making good progress toward either the master's or the Ph.D. degree. For the purpose of financial support, a student’s progress is measured against the degree requirements and timetables.

A teaching assistantship (TA) is the most common form of financial support for graduate students in good academic standing. TA appointments are usually made at 50 percent time (an assigned workload of approximately 220 hours for the quarter). Teaching assistants are under the supervision of the faculty member responsible for the course.

All students are strongly urged to complete a Free Application for Financial Student Aid (FAFSA) in order to determine their eligibility for need-based awards. This is done each year by the start of fall quarter. No need-based fellowship can be awarded to a student who does not have a current FAFSA on file.

Students are encouraged to apply for support from the Financial Aid Office as well as from the Mathematics Department. Students facing special financial hardship are urged to make this known to the department in a timely manner. The Mathematics Department will do everything in its power to ensure that all students in good standing are granted sufficient financial aid to continue their study of mathematics.

Relationship of Master's and Doctoral Programs

Students in the master's and doctoral program take the same classes in the core sequences and the same preliminary examinations. Ph.D. and master's students have the same passing requirements in the core classes. However, the preliminary examination requirements for Ph.D. and master's students are different, and are outlined within the requirements section of each program.

MATHEMATICS B.A.

Information and Policies

Introduction

The mathematics bachelor of arts (B.A.) program provides an excellent liberal arts background from which to pursue a variety of career opportunities. UC Santa Cruz graduates with a B.A. in mathematics hold teaching posts at all levels, as well as positions in law, government, civil service, insurance, software development, business, banking, actuarial science, forensics, and other professions where skills in logic, numerical analysis, and computing are required. In particular, students are trained in the art of problem-solving--- an essential skill in all professions.

This major emphasizes the importance of a well-rounded, in-depth mathematical education, and includes advanced coursework in algebra, analysis, and geometry. Students often pursue a career with a focus on research and theory. The major requires nine courses, one of which must be a senior thesis or senior seminar. A minor in pure mathematics is also offered.

Academic Advising for the Program

The undergraduate advisor may be contacted via email at mathadvising@ucsc.edu. The advisor provides information about requirements, prerequisites, policies and procedures, learning support, scholarships, and special opportunities for undergraduate research. In addition, the advisor assists with the drafting of academic plans, as well as certifying degrees and minors. Students are urged to stay informed and involved with their major, as well as to seek advice should problems arise.

The Mathematics Department website is a critical resource for students. Here you will find a link to the undergraduate program; the materials at that link constitute the undergraduate handbook. Students should visit this first to seek answers to their questions, because it hosts a wealth of information. Each student in the major is encouraged to regularly review the materials posted to stay current with requirements, course curriculum, and departmental policy. Transfer students should consult the Transfer Information and Policy section.

Program Learning Outcomes

Learning outcomes summarize the most important knowledge, skills, abilities and attitudes that students are expected to develop over the course of their studies. The program learning outcomes clearly communicate the faculty's expectations to students, provide a framework for faculty evaluation of the curriculum based on empirical data, and help improve and measure the impact of implemented changes.

Mathematics Undergraduate Student Learning Objectives

The mathematics program promotes mathematical skills and knowledge for their intrinsic beauty, effectiveness in developing proficiency in analytical reasoning, and utility in modeling and solving real world problems. To responsibly live within and participate in the transformation of a rapidly changing, complex, and interdependent society, toward a sustainable and socially just society, students must develop and unceasingly exercise their analytical abilities. Students who have learned to logically question assertions, recognize patterns, and can distinguish the essential from the irrelevant aspects of problems can think deeply and precisely. Students equipped with these skills will be in a position to help solve the "big" problems of our time such as climate change.

Students majoring in mathematics attain proficiency in:

Critical thinking. The ability to identify, reflect upon, evaluate, integrate, and apply different types of information and knowledge to form independent judgments including analytical and logical thinking and the habit of drawing conclusions based on quantitative information.

Problem solving. The ability to assess and interpret complex situations, choose among several potentially appropriate mathematical methods of solution, persist in the face of difficulty, and present full and cogent solutions that include appropriate justification for their reasoning.

Effective communication. The ability to communicate and interact effectively with different audiences, collaborate intellectually and creatively in diverse contexts, and appreciate ambiguity and nuance, while emphasizing the importance of clarity and precision in communication and reasoning.

Students acquire and enhance these abilities in mathematical contexts, but the acquired habits of rigorous thought and creative problem solving are invaluable in all aspects of life. These skills are acquired through experience in the context of studying specific mathematical topics and exploring problems chosen to challenge students' abilities, spurring them on to acquire new techniques and to abandon familiar but restrictive habits of thought. The overarching objectives can be realized in terms of more focused, appraisable objectives specific to mathematics described on the Mathematics Department website.

Curriculum Matrix

All of the key objectives are addressed to some extent in all courses. For example, the ability to formulate precise mathematical statements and to reason logically are essential skills that are progressively developed throughout the curriculum. However, some skills are more heavily emphasized and utilized in some courses than in others. Some courses are specifically intended to help students move to a new level of proficiency with a particular portfolio of skills, while others are accessible only to students who have already reached a given level; the latter courses make heavy use of particular skills, and thus enhance and reinforce the student's mastery of them, but the skills themselves are not the primary focus of such courses. Some connections between the key objectives, main subject-specific areas, and courses are indicated in the tables of lower- and upper-division mathematics courses at the Mathematics Department's website.

Getting Started in the Major: Frosh

This major is highly course intensive; students who intend to pursue this major must begin taking classes for the major in their first quarter at UC Santa Cruz. Math placement is required for one or more of the foundational courses for this major. For more information, please review the Math Placement website.

It should be emphasized that the nature of mathematics changes dramatically between lower-division and upper-division courses. Students often find that the material becomes far more abstract and theoretical. In addition, the role of computation in assignments diminishes and a greater weight is placed on deductive reasoning and the integral role of mathematical proofs. The Mathematics Department recommends that students interested in a mathematics major enroll in MATH 100 as early as prerequisites allow in order to decide whether they are interested in upper-division mathematics courses.

Transfer Information and Policy

Transfer Admissions Screening Policy

The following courses or their equivalents are required prior to transfer, by the end of the spring term for students planning to enter in the fall.

Students planning to transfer to UC Santa Cruz from a California community college should reference the assist website to determine which courses are equivalent to these required courses.

Prospective students are encouraged to prioritize recommended major preparation, and may additionally complete courses that articulate to UC Santa Cruz general education requirements as time allows.

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 21	Linear Algebra	5
MATH 23A	Vector Calculus	5

Getting Started in the Major: Transfer Students

While enrolled in or after finishing the final required qualification courses, a student should follow the directions to apply to declare the major on the Mathematics Department Major Declaration webpage.

To obtain equivalency for MATH 23A, transfer students may have taken a course that could also be equivalent to MATH 23B, and in rare circumstances it is possible that this equivalency has not yet been formally recognized and is, therefore, not listed in assist.org. Students who have equivalency for MATH 23A but not MATH 23B should contact the undergraduate advisor to determine if this applies to their situation.

Major Qualification Policy and Declaration Process

While enrolled in or after finishing the final required qualification courses a student should follow the directions to apply on the Mathematics Department Major Declaration webpage.

Major Qualification

Admission to the mathematics major is contingent on students successfully passing the following introductory courses or their equivalents (see below). Some courses may be satisfied via exam credit. **Transfer Students:** in addition to satisfying the Transfer Admission Screening Requirements listed above, you must complete MATH 100 during your first quarter in order to declare the major.

Choose one of the following courses:

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 20A	Honors Calculus	5

Plus one of the following courses:

MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 20B	Honors Calculus	5

Plus one of the following courses:

MATH 21	Linear Algebra	5
AM 10	Linear Algebra for Engineers	5

MATH 21 is preferred

Plus all of the following courses:

MATH 23A	Vector Calculus	5
MATH 100	Introduction to Proof and Problem Solving	5

Appeal Process

If a student completes major qualification courses but does not meet the major qualification criteria, and appeals, the

department may accept or reject the appeal or place conditions on the student that will be resolved within at most one more enrolled quarter. To submit an appeal see the department website for Appealing the Major. The Mathematics Department will reply to appeals within 15 days of submission.

How to Declare a Major

Students should submit a petition to declare as soon as they complete the major qualification requirements or reach their declaration deadline quarter (whichever comes first).

Students petitioning when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh), will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification courses.

The Petition for Major/Minor declaration form can be accessed by going to MyUCSC and navigating to the Student Homepage and selecting the Undergraduate Student eForms tile > Petition for Major/Minor.

Letter Grade Policy

There are no restrictions on grading options for Mathematics Department courses. Please see the UCSC-wide policies on grading options.

Course Substitution Policy

The Mathematics Department's undergraduate vice chair approves requests for course substitutions. See the department website for details on requesting an exception to policy or course substitution.

Education Abroad Program (EAP)

Studying abroad is encouraged and most practical in fall quarter. It is possible to take classes abroad that will satisfy math major requirements. Intention of using an abroad course as a math requirement must be approved prior to taking the course. Students may submit a syllabus for the course abroad with an exception to policy request through the Mathematics Department homepage.

Double Majors and Major/Minor Combinations Policy

Honors

Honors in the Mathematics Department are awarded to graduating students whose academic performance in the major demonstrates excellence at a GPA of 3.5 or above. Highest honors are determined by a cumulative review of student performance in mathematics courses. They are awarded to students who excel in challenging courses and in their capstone projects.

Requirements and Planners

This major is intended for students who desire a comprehensive understanding of mathematics. Some courses may be satisfied via exam credit.

Course Requirements

Lower-Division Courses

Choose one of the following courses:

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 20A	Honors Calculus	5

Plus one of the following courses:

MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 20B	Honors Calculus	5

Plus one of the following courses:

MATH 21	Linear Algebra	5
AM 10	Linear Algebra for Engineers	5

MATH 21 is preferred.

Plus one of the following options:

	Either these courses	
MATH 23A	Vector Calculus	5
MATH 23B	Vector Calculus	5
	or these courses	
AM 30	Multivariate Calculus for Engineers	5
AM 100	Mathematical Methods for Engineers	5

MATH 23A and MATH 23B are preferred.

Plus one of the following courses:

MATH 24	Ordinary Differential Equations	5
AM 20	Ordinary Differential Equations for Engineers	5

MATH 24 is preferred.

Upper-Division Courses

The following course:

MATH 100	Introduction to Proof and Problem Solving	5

Plus one of the following courses:

MATH 103A	Complex Analysis	5
MATH 105A	Real Analysis	5

Plus one of the following courses:

MATH 110	Introduction to Number Theory	5
MATH 111A	Algebra	5
MATH 111T	Algebra	5
MATH 117	Advanced Linear Algebra	5

Plus one of the following courses:

MATH 121A	Differential Geometry	5
MATH 124	Introduction to Topology	5
MATH 125	Applied Topology	5
MATH 128A	Classical Geometry: Euclidean and Non-Euclidean	5
MATH 129	Algebraic Geometry	5

Plus one of the following courses:

MATH 194	Senior Seminar	5
MATH 195	Senior Thesis	5

Electives

The remaining three courses are chosen from MATH courses numbered 101-190 or the approved list from other departments. Courses must be 5 credits or more, and only two of the three courses can be from the approved list of courses from other departments. Lecture and lab combinations count as a single course. For courses with a required concurrently enrolled lab, only successful completion of the lecture is required for the major. Successful completion of the lab may count toward total degree credits.

Approved Elective Courses from Other Departments:

AM 107	Introduction to Fluid Dynamics	5
AM 114	Introduction to Dynamical Systems	5
AM 147	Computational Methods and Applications	5
BME 118	Mathematics of the Mind	5
STAT 108	Linear Regression	5
STAT 131	Introduction to Probability Theory	5
STAT 132	Classical and Bayesian Inference	5

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in mathematics is satisfied by

MATH 100	Introduction to Proof and Problem Solving	5

Plus one of the following courses:

MATH 194	Senior Seminar	5
MATH 195	Senior Thesis	5

Comprehensive Requirement

The comprehensive exit requirement in mathematics is satisfied by one of the following courses:

MATH 194	Senior Seminar	5
MATH 195	Senior Thesis	5

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Mathematics B.A.: Sample Freshmen Academic Plan Starting in MATH 19A or MATH 20A

	Fall	Winter	Spring
1st (frosh)	MATH 19A or MATH 20A	MATH 19B or MATH 20B	MATH 23A
2nd (soph)	MATH 21 MATH 23B	MATH 100	MATH 103A
3rd (junior)	MATH 24	MATH 110	MATH 128A
4th (senior)	Elective	Elective	MATH 194 or MATH 195 Elective

This course plan satisfies the MF general education requirement. Students must satisfy all other general education requirements.

Mathematics B.A.: Sample Freshmen Academic Plan Starting in MATH 3

	Fall	Winter	Spring
1st (frosh)	MATH 3	MATH 19A	MATH 19B
2nd (soph)	MATH 21 MATH 23A	MATH 23B MATH 100	MATH 103A
3rd (junior)	MATH 24	MATH 110	MATH 128A

4th (senior)	Elective	Elective	MATH 194 or MATH 195 Elective

This course plan satisfies the MF general education requirement. Students must satisfy all other general education requirements.

Mathematics B.A.: Sample Freshmen Academic Plan Starting in MATH 2

	Fall	Winter	Spring
1st (frosh)	MATH 2	MATH 3	MATH 19A
2nd (soph)	MATH 19B	MATH 21	MATH 23B
		MATH 23A	MATH 100
3rd (junior)	MATH 24	MATH 103A	MATH 128A
	MATH 110		
4th (senior)	Elective	Elective	MATH 194 or MATH 195
			Elective

This course plan satisfies the MF general education requirement. Students must satisfy all other general education requirements.

Mathematics B.A.: Sample Transfer Academic Plan

For students who have completed MATH 19A, MATH 19B, MATH 21, and MATH 23A equivalents.

	Fall	Winter	Spring
1st (junior)	MATH 23B	MATH 110	MATH 103A
	MATH 100		MATH 128A
2nd (senior)	MATH 24	Elective	MATH 194 or MATH 195
		Elective	Elective

MATHEMATICS B.S.

Information and Policies

Introduction

The Mathematics Bachelor of Science degree (B.S.) is designed for students who value the theoretical study of mathematics-- not only for application, but also for its own sake. Theoretical mathematicians focus on the big how and why questions of mathematics, and attempt to find new formulae and methods while utilizing insights from a tradition of thousands of years. The Mathematics B.S. is recommended for those students who seek an education that involves not only foundational computational skills but also rigorous explanations of how mathematics works. A well-rounded education in mathematics requires an introduction to proof class, and a balance of advanced coursework in algebra, analysis, and geometry. Majors who seek graduate study at top institutions often go beyond the required courses to enroll in graduate courses as well.

Program Learning Outcomes

Learning outcomes summarize the most important knowledge, skills, abilities and attitudes that students are expected to develop over the course of their studies. The program learning outcomes clearly communicate the faculty's expectations to students, provide a framework for faculty evaluation of the curriculum based on empirical data, and help improve and measure the impact of implemented changes.

Mathematics Undergraduate Student Learning Objectives

The mathematics program promotes mathematical skills and knowledge for their intrinsic beauty, effectiveness in developing proficiency in analytical reasoning, and utility in modeling and solving real-world problems. To responsibly live within and participate in the transformation of a rapidly changing, complex, and interdependent society, toward a sustainable and socially just society, students must develop and unceasingly exercise their analytical abilities. Students who have learned to logically question assertions, recognize patterns, and can distinguish the essential from the irrelevant aspects of problems can think deeply and precisely. Students equipped with these skills will be in a position to help solve the "big" problems of our time such as climate change.

Students majoring in mathematics attain proficiency in:

Critical thinking. The ability to identify, reflect upon, evaluate, integrate, and apply different types of information and knowledge to form independent judgments including analytical and logical thinking and the habit of drawing conclusions based on quantitative information.

Problem solving. The ability to assess and interpret complex situations, choose among several potentially appropriate mathematical methods of solution, persist in the face of

difficulty, and present full and cogent solutions that include appropriate justification for their reasoning.

Effective communication. The ability to communicate and interact effectively with different audiences, collaborate intellectually and creatively in diverse contexts, and appreciate ambiguity and nuance, while emphasizing the importance of clarity and precision in communication and reasoning.

Students acquire and enhance these abilities in mathematical contexts, but the acquired habits of rigorous thought and creative problem solving are invaluable in all aspects of life. These skills are acquired through experience in the context of studying specific mathematical topics and exploring problems chosen to challenge students' abilities, spurring them on to acquire new techniques and to abandon familiar but restrictive habits of thought. The overarching objectives can be realized in terms of more focused, appraisable objectives specific to mathematics described on the Mathematics Department website.

Curriculum Matrix

All of the key objectives are addressed to some extent in all courses. For example, the ability to formulate precise mathematical statements and to reason logically are essential skills that are progressively developed throughout the curriculum. However, some skills are more heavily emphasized and utilized in some courses than in others. Some courses are specifically intended to help students move to a new level of proficiency with a particular portfolio of skills, while others are accessible only to students who have already reached a given level; the latter courses make heavy use of particular skills, and thus enhance and reinforce the student's mastery of them, but the skills themselves are not the primary focus of such courses. Some connections between the key objectives, main subject-specific areas, and courses are indicated in the tables of lower- and upper-division mathematics courses at the Mathematics Department's website.

Academic Advising for the Program

The undergraduate adviser may be contacted via email at mathadvising@ucsc.edu. The adviser provides information about requirements, prerequisites, policies and procedures, learning support, scholarships, and special opportunities for undergraduate research. In addition, the adviser assists with the drafting of study plans, as well as certifying degrees and minors. Students are urged to stay informed and involved with their major, as well as to seek advice should problems arise.

The Mathematics Department website is a critical resource for students. Here you will find a link to the undergraduate program; the materials at that link constitute the undergraduate handbook. Students should visit this first to seek answers to their questions, because it hosts a wealth of information. Each student in the major is encouraged to regularly review the materials posted to stay current with requirements, course curriculum, and departmental policy. Transfer students should consult the Transfer Information and Policy section.

Getting Started in the Major: Frosh

This major is highly course intensive; students who intend to pursue this major must begin taking classes for the major in their first quarter at the University of California, Santa Cruz. Math placement is required for one or more of the foundational courses for this major. For more information, please review the Math Placement website.

It should be emphasized that the nature of mathematics changes dramatically between lower-division and upper-division courses. Students often find that the material becomes far more abstract and theoretical. In addition, the role of computation in assignments diminishes and a greater weight is placed on deductive reasoning and the integral role of mathematical proofs. The Mathematics Department recommends that students interested in a mathematics major enroll in MATH 100 as early as prerequisites allow in order to decide whether they are interested in upper-division mathematics courses.

Transfer Information and Policy

Transfer Admission Screening Policy

The following courses or their equivalents are required prior to transfer, by the end of the spring term for students planning to enter in the fall.

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 21	Linear Algebra	5
MATH 23A	Vector Calculus	5

Students planning to transfer to UC Santa Cruz from a California community college should reference the assist website to determine which courses are equivalent to these required courses.

Recommended Course for Transfer Students

In addition, the following course is recommended prior to transfer to ensure timely graduation.

MATH 24	Ordinary Differential Equations	5

Getting Started in the Major: Transfer Students

While enrolled in or after finishing the final required qualification courses, a student should follow the directions to apply to declare the major on the Mathematics Department Major Declaration webpage.

To obtain equivalency for MATH 23A, transfer students may have taken a course that could also be equivalent to MATH 23B, and in rare circumstances it is possible that this equivalency has not yet been formally recognized and is, therefore, not listed in assist.org. Students who have

equivalency for MATH 23A but not MATH 23B should contact the undergraduate advisor to determine if this applies to their situation.

Major Qualification Policy and Declaration Process

While enrolled in or after finishing the final required qualification courses a student should follow the directions to apply on the Mathematics Department Major Declaration webpage.

Major Qualification

Admission to the Mathematics B.S. major is contingent on students successfully passing the following introductory courses or their equivalents: (see below). Some courses may be satisfied via exam credit. **Transfer Students:** in addition to satisfying the Transfer Admission Screening Requirements listed above, you must complete MATH 100 during your first quarter in order to declare the major.

Choose one of the following courses:

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 20A	Honors Calculus	5

Plus one of the following courses:

MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 20B	Honors Calculus	5

Plus one of the following courses:

MATH 21	Linear Algebra	5
AM 10	Linear Algebra for Engineers	5

MATH 21 is preferred

Plus all of the following courses:

MATH 23A	Vector Calculus	5
MATH 100	Introduction to Proof and Problem Solving	5

Appeal Process

If a student completes major qualification courses but does not meet the major qualification criteria, and appeals, the department may accept or reject the appeal or place conditions on the student that will be resolved within at most one more enrolled quarter. To submit an appeal see the department website for Appealing the Major. The Mathematics Department will reply to appeals within 15 days of submission.

How to Declare a Major

Students should submit a petition to declare as soon as they complete the major qualification requirements or reach their declaration deadline quarter (whichever comes first).

Students petitioning when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh), will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification courses.

The Petition for Major/Minor declaration form can be accessed by going to MyUCSC and navigating to the Student Homepage and selecting the Undergraduate Student eForms tile > Petition for Major/Minor.

Letter Grade Policy

There are no restrictions on grading options for Mathematics Department courses. Please see UC Santa Cruz policies on grading options.

Course Substitution Policy

The Mathematics Department undergraduate vice chair approves requests for course substitutions. See the department website for details on requesting an exception to policy or course substitution.

Double Majors and Major/Minor Combinations Policy

Honors

Honors in the Mathematics Department are awarded to graduating students whose academic performance in the major demonstrates excellence at a GPA of 3.5 or above. Highest Honors are determined by a cumulative review of student performance in mathematics courses. They are awarded to students who excel in challenging courses and in their capstone projects.

Education Abroad Program (EAP)

Studying abroad is encouraged and most practical in fall quarter. It is possible to take classes abroad that will satisfy math major requirements. Intention of using an abroad course as a math requirement must be approved prior to taking the course. Students may submit a syllabus for the course abroad with an exception to policy request through the Mathematics Department homepage.

Requirements and Planners

The Mathematics B.S. major is intended for students who desire a comprehensive understanding of mathematics, including those considering graduate studies in the physical sciences. Some courses may be satisfied via exam credit.

Course Requirements

Lower-Division Courses

Choose one of the following courses:

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 20A	Honors Calculus	5

Plus one of the following courses:

MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 20B	Honors Calculus	5

Plus one of the following courses:

MATH 21	Linear Algebra	5
AM 10	Linear Algebra for Engineers	5

MATH 21 is preferred

Plus one of the following options:

	Either these courses	
MATH 23A	Vector Calculus	5
MATH 23B	Vector Calculus	5
	or these courses	
AM 30	Multivariate Calculus for Engineers	5
AM 100	Mathematical Methods for Engineers	5

MATH 23A and MATH 23B are preferred.

Plus one of the following courses:

MATH 24	Ordinary Differential Equations	5
AM 20	Ordinary Differential Equations for Engineers	5

Math 24 is preferred.

Upper-Division Courses

All of the following courses:

MATH 100	Introduction to Proof and Problem Solving	5
MATH 103A	Complex Analysis	5
MATH 105A	Real Analysis	5
MATH 117	Advanced Linear Algebra	5

Plus one of the following courses:

2nd (sr)	MATH 24	MATH 105A	MATH 194 or MATH 195	
	MATH 111A	Elective	MATH 117	

MATHEMATICS EDUCATION B.A.

Information and Policies

Introduction

The Mathematics Education Bachelor's of Arts (B.A.) is specially designed for prepare students for a career in K-12 mathematics education. It shares a rigorous approach to advanced mathematics, but requires coursework that is particularly relevant to the K-12 classroom: number theory, classical geometry, and the history of mathematics. In addition, the math education major requires experience in supervised teaching. Many math education majors also participate in CalTeach, to enhance their experience and directly connect with local schools.

In California, students seeking a single-subject credential for secondary teaching in mathematics are required to take the CSET (formerly The National Teachers Examination), a series of examinations that must be passed in order to enter a teaching-credential program. Students who are interested in teaching in high schools can obtain a waiver of the CSET Examinations by completing the mathematics education major, plus three additional specified courses. The Mathematics Department undergraduate advisor, the Mathematics Department's website, and the Education Department advising office have more information about the additional required course.

Academic Advising for the Program

The undergraduate advisor may be contacted via email at mathadvising@ucsc.edu. The advisor provides information

about requirements, prerequisites, policies and procedures, learning support, scholarships, and special opportunities for undergraduate research. In addition, the advisor assists with the drafting of study plans, as well as certifying degrees and minors. Students are urged to stay informed and involved with their major, as well as to seek advice should problems arise.

The Mathematics Department website is a critical resource for students. Here you will find a link to the undergraduate program; the materials at that link constitute the undergraduate handbook. Students should visit this first to seek answers to their questions, because it hosts a wealth of information. Each student in the major is encouraged to regularly review the materials posted to stay current with requirements, course curriculum, and departmental policy. Transfer students should consult the Transfer Information and Policy section.

Program Learning Outcomes

Mathematics Undergraduate Student Learning Objectives

The mathematics program promotes mathematical skills and knowledge for their intrinsic beauty, effectiveness in developing proficiency in analytical reasoning, and utility in modeling and solving real-world problems. To responsibly live within and participate in the transformation of a rapidly changing, complex, and interdependent society, toward a sustainable and socially just society, students must develop and unceasingly exercise their analytical abilities. Students who have learned to logically question assertions, recognize patterns, and can distinguish the essential from the irrelevant aspects of problems can think deeply and precisely. Students equipped with these skills will be in a position to help solve the "big" problems of our time such as climate change.

Students majoring in mathematics attain proficiency in:

Critical thinking. The ability to identify, reflect upon, evaluate, integrate, and apply different types of information and knowledge to form independent judgments including analytical and logical thinking and the habit of drawing conclusions based on quantitative information.

Problem solving. The ability to assess and interpret complex situations, choose among several potentially appropriate mathematical methods of solution, persist in the face of difficulty, and present full and cogent solutions that include appropriate justification for their reasoning.

Effective communication. The ability to communicate and interact effectively with different audiences, collaborate intellectually and creatively in diverse contexts, and appreciate ambiguity and nuance, while emphasizing the importance of clarity and precision in communication and reasoning.

Students acquire and enhance these abilities in mathematical contexts, but the acquired habits of rigorous thought and creative problem solving are invaluable in all aspects of life. These skills are acquired through experience in the context of studying specific mathematical topics and exploring problems chosen to challenge students' abilities, spurring them on to acquire new techniques and to abandon familiar but restrictive habits of thought. The overarching objectives can be realized in terms of more focused, appraisable objectives specific to mathematics described on the Mathematics Department website.

Curriculum Matrix

All of the key objectives are addressed to some extent in all courses. For example, the ability to formulate precise mathematical statements and to reason logically are essential skills that are progressively developed throughout the curriculum. However, some skills are more heavily emphasized and utilized in some courses than in others. Some courses are specifically intended to help students move to a new level of proficiency with a particular portfolio of skills, while others are accessible only to students who have already reached a given level; the latter courses make heavy use of particular skills, and thus enhance and reinforce the student's mastery of them, but the skills themselves are not the primary focus of such courses. Some connections between the key objectives, main subject-specific areas, and courses are indicated in the tables of lower- and upper-division mathematics courses at the Mathematics Department's website.

Getting Started in the Major: Frosh

This major is highly course intensive; students who intend to pursue this major must begin taking classes for the major in their first quarter at the University of California, Santa Cruz. Math placement is required for one or more of the foundational courses for this major. For more information, please review the Math Placement website.

It should be emphasized that the nature of mathematics changes dramatically between lower-division and upper-division courses. Students often find that the material becomes far more abstract and theoretical. In addition, the role of computation in assignments diminishes and a greater weight is placed on deductive reasoning and the integral role of mathematical proofs. The Mathematics Department recommends that students interested in a mathematics major enroll in MATH 100 as early as prerequisites allow in order to decide whether they are interested in upper-division mathematics courses.

Transfer Information and Policy

Transfer Admission Screening Policy

The following courses or their equivalents are required prior to transfer, by the end of the spring term for students planning to enter in the fall.

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 21	Linear Algebra	5
MATH 23A	Vector Calculus	5

Recommended Course for Transfer Students

In addition, the following course is recommended prior to transfer to help ensure timely graduation and allow for an additional upper-division elective course or other enrichment course to be taken in its stead. However, its omission will not impede admission or a clear pathway to 2-year graduation.

STAT 5	Statistics	5

Getting Started in the Major: Transfer Students

While enrolled in or after finishing the final required qualification courses, a student should follow the directions to apply to declare the major on the Mathematics Department Major Declaration webpage.

To obtain equivalency for MATH 23A, transfer students may have taken a course that could also be equivalent to MATH 23B, and in rare circumstances it is possible that this equivalency has not yet been formally recognized and is, therefore, not listed in assist.org. Students who have equivalency for MATH 23A but not MATH 23B should contact the undergraduate advisor to determine if this applies to their situation.

Major Qualification Policy and Declaration Process

Major Qualification

Admission to the mathematics education major is contingent on students successfully passing the following introductory courses or their equivalents (see below). Some courses may be satisfied via exam credit. **Transfer Students: I**n addition to satisfying the Transfer Admission Screening Requirements listed above, you must complete MATH 100 during your first quarter in order to declare the major.

Choose one of the following courses:

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 20A	Honors Calculus	5

Plus one of the following courses:

MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 20B	Honors Calculus	5

Plus one of the following courses:

MATH 21	Linear Algebra	5
AM 10	Linear Algebra for Engineers	5

MATH 21 is preferred

Plus all of the following courses:

MATH 23A	Vector Calculus	5
MATH 100	Introduction to Proof and Problem Solving	5

Appeal Process

If a student completes major qualification courses but does not meet the major qualification criteria, and appeals, the department may accept or reject the appeal or place conditions on the student that will be resolved within at most one more enrolled quarter. To submit an appeal see the department website for Appealing the Major. The Mathematics Department will reply to appeals within 15 days of submission.

How to Declare a Major

Students should submit a petition to declare as soon as they complete the major qualification requirements or reach their declaration deadline quarter (whichever comes first).

Students petitioning when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh), will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification courses.

The Petition for Major/Minor declaration form can be accessed by going to MyUCSC and navigating to the Student Homepage and selecting the Undergraduate Student eForms tile > Petition for Major/Minor.

Letter Grade Policy

There are no restrictions on grading options for Mathematics Department courses. Please see UC Santa Cruz policies on grading options.

Course Substitution Policy

The Mathematics Department's undergraduate vice chair approves requests for course substitutions. See the department website for details on requesting an exception to policy or course substitution.

Double Major and Major/Minor Combinations Policy

Honors

Honors in the Mathematics Department are awarded to graduating students whose academic performance in the major demonstrates excellence at a GPA of 3.5 or above. Highest Honors are determined by a cumulative review of student performance in mathematics courses. They are awarded to students who excel in challenging courses and in their capstone projects.

Education Abroad Program (EAP)

Studying abroad is encouraged and most practical in fall quarter. It is possible to take classes abroad that will satisfy math major requirements. Intention of using an abroad course as a math requirement must be approved prior to taking the course. Students may submit a syllabus for the course abroad with an exception to policy request through the Mathematics Department homepage.

Requirements and Planners

The Mathematics Education B.A. is intended to introduce students to the mathematics necessary for a career teaching kindergarten through high school (K-12) mathematics. Some courses may be satisfied via exam credit.

Course Requirements

Lower-Division Courses

One of the following courses:

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 20A	Honors Calculus	5

Plus one of the following courses:

MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 20B	Honors Calculus	5

Plus one of the following courses:

MATH 21	Linear Algebra	5
AM 10	Linear Algebra for Engineers	5

MATH 21 is preferred.

Plus one of the following options:

	Either these courses	
MATH 23A	Vector Calculus	5
MATH 23B	Vector Calculus	5
	or these courses	
AM 30	Multivariate Calculus for Engineers	5
AM 100	Mathematical Methods for Engineers	5

MATH 23A and MATH 23B are preferred.

Plus one of the following courses:

EDUC 50A	CAL Teach 1: Science and Mathematics	2
EDUC 50B	CAL Teach 1: Mathematics	2

Plus the following course:

STAT 5	Statistics	5

Upper-Division Courses

All of the following courses:

MATH 100	Introduction to Proof and Problem Solving	5
MATH 110	Introduction to Number Theory	5
MATH 128A	Classical Geometry: Euclidean and Non-Euclidean	5
MATH 181	History of Mathematics	5
STAT 131	Introduction to Probability Theory	5

Plus one of the following courses:

MATH 103A	Complex Analysis	5
MATH 105A	Real Analysis	5

Plus one of the following courses:

MATH 111A	Algebra	5
MATH 111T	Algebra	5

Plus one the following courses:

EDUC 100A	Cal Teach 2: Science and Mathematics	2
EDUC 100B	Cal Teach 2: Mathematics	2

Plus one of the following courses:

MATH 194	Senior Seminar	5
MATH 195	Senior Thesis	5

Electives

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in the Mathematics Education B.A. is satisfied by:

MATH 100	Introduction to Proof and Problem Solving	5

Plus one of the following courses:

MATH 194	Senior Seminar	5
MATH 195	Senior Thesis	5

Comprehensive Requirement

The comprehensive exit requirement in mathematics is satisfied by one of the following courses:

MATH 194	Senior Seminar	5
MATH 195	Senior Thesis	5

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Mathematics Education B.A.: Sample Freshmen Academic Plan Starting in MATH 19A or MATH 20A

	Fall	Winter	Spring	Summer
Entering				College 1A Summer Edge (optional)
1st (frosh)	MATH 19A or	MATH 19B or	STAT 5	

	MATH 20A	MATH 20B	
	College 1	WRIT 1/WRIT 1E (if needed)	MATH 23A
2nd (soph)	MATH 21	MATH 100	MATH 128A
	MATH 23B		
	WRIT 2*

MATHEMATICS THEORY AND COMPUTATION B.S.

Information and Policies

Introduction

The Mathematics Theory and Computation B.S. provides an excellent scientific background from which to pursue a variety of career opportunities. UC Santa Cruz graduates with degrees in mathematics hold teaching posts at all levels, as well as positions in law, government, civil service, insurance, software development, business, banking, actuarial science, forensics, and other professions where skills in logic, numerical analysis, and computing are required. In particular, students of mathematics are trained in the art of problem-solving, an essential skill in all professions.

Academic Advising for the Program

The undergraduate adviser may be contacted via email at mathadvising@ucsc.edu. The adviser provides information about requirements, prerequisites, policies and procedures, learning support, scholarships, and special opportunities for undergraduate research. In addition, the adviser assists with the drafting of study plans, as well as certifying degrees and minors. Students are urged to stay informed and involved with their major, as well as to seek advice should problems arise.

The Mathematics Department website is a critical resource for students. Here you will find a link to the undergraduate program; the materials at that link constitute the undergraduate handbook. Students should visit this first to seek answers to their questions, because it hosts a wealth of information. Each student in the major is encouraged to regularly review the materials posted to stay current with requirements, course curriculum, and departmental policy. Transfer students should consult the Transfer Information and Policy section.

Program Learning Outcomes

Learning outcomes summarize the most important knowledge, skills, abilities, and attitudes that students are expected to develop over the course of their studies. The program learning outcomes clearly communicate the faculty's expectations to students, provide a framework for faculty evaluation of the curriculum based on empirical data, and help improve and measure the impact of implemented changes.

Mathematics Undergraduate Student Learning Objectives

The mathematics program promotes mathematical skills and knowledge for their intrinsic beauty, effectiveness in developing proficiency in analytical reasoning, and utility in

modeling and solving real-world problems. To responsibly live within and participate in the transformation of a rapidly changing, complex, and interdependent society, toward a sustainable and socially just society, students must develop and unceasingly exercise their analytical abilities. Students who have learned to logically question assertions, recognize patterns, and can distinguish the essential from the irrelevant aspects of problems can think deeply and precisely. Students equipped with these skills will be in a position to help solve the "big" problems of our time such as climate change.

Students majoring in mathematics attain proficiency in:

Critical thinking. The ability to identify, reflect upon, evaluate, integrate, and apply different types of information and knowledge to form independent judgments including analytical and logical thinking and the habit of drawing conclusions based on quantitative information.

Problem solving. The ability to assess and interpret complex situations, choose among several potentially appropriate mathematical methods of solution, persist in the face of difficulty, and present full and cogent solutions that include appropriate justification for their reasoning.

Effective communication. The ability to communicate and interact effectively with different audiences, collaborate intellectually and creatively in diverse contexts, and appreciate ambiguity and nuance, while emphasizing the importance of clarity and precision in communication and reasoning.

Students acquire and enhance these abilities in mathematical contexts, but the acquired habits of rigorous thought and creative problem solving are invaluable in all aspects of life. These skills are acquired through experience in the context of studying specific mathematical topics and exploring problems chosen to challenge students' abilities, spurring them on to acquire new techniques and to abandon familiar but restrictive habits of thought. The overarching objectives can be realized in terms of more focused, appraisable objectives specific to mathematics described on the Mathematics Department website.

Getting Started in the Major: Frosh

This major is highly course intensive; students who intend to pursue this major must begin taking classes for the major in their first quarter at the University of California, Santa Cruz. Math placement is required for one or more of the foundational courses for this major. For more information, please review the Math Placement website.

It should be emphasized that the nature of mathematics changes dramatically between lower-division and upper-division courses. Transfer Information and Policy

Transfer Admission Screening Policy

The following courses or their equivalents are required prior to transfer, by the end of the spring term for students planning to enter in the fall.

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 21	Linear Algebra	5
MATH 23A	Vector Calculus	5

Recommended Course for Transfer Students

In addition, the following course is recommended prior to transfer to ensure timely graduation.

MATH 24	Ordinary Differential Equations	5

Getting Started at UCSC as a Transfer Student

While enrolled in or after finishing the final required qualification courses, a student should follow the directions to apply to declare the major on the Mathematics Department Major Declaration webpage.

To obtain equivalency for MATH 23A, transfer students may have taken a course that could also be equivalent to MATH 23B, and in rare circumstances it is possible that this equivalency has not yet been formally recognized and is, therefore, not listed in assist.org. Students who have equivalency for MATH 23A but not MATH 23B should contact the undergraduate advisor to determine if this applies to their situation.

Major Qualification Policy and Declaration Process

While enrolled in or after finishing the final required qualification courses a student should follow the directions to apply on the Mathematics Department Major Declaration webpage.

Major Qualification

Admission to the Mathematics Theory and Computation B.S. major is contingent on students successfully passing the following introductory courses or their equivalents. Some courses may be satisfied via exam credit. **Transfer Students: I**n addition to satisfying the Transfer Admission Screening Requirements listed above, you must complete MATH 100 during your first quarter in order to declare the major.

Choose one of the following courses:

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 20A	Honors Calculus	5

Plus one of the following courses:

MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 20B	Honors Calculus	5

Plus one of the following courses:

MATH 21	Linear Algebra	5
AM 10	Linear Algebra for Engineers	5

MATH 21 is preferred

Plus all of the following courses:

MATH 23A	Vector Calculus	5
MATH 100	Introduction to Proof and Problem Solving	5

Appeal Process

If a student completes major qualification courses but does not meet the major qualification criteria, and appeals, the department may accept or reject the appeal or place conditions on the student that will be resolved within at most one more enrolled quarter. To submit an appeal see the department website for Appealing the Major. The Mathematics Department will reply to appeals within 15 days of submission.

How to Declare a Major

Students should submit a petition to declare as soon as they complete the major qualification requirements or reach their declaration deadline quarter (whichever comes first).

Students petitioning when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh), will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification courses.

The Petition for Major/Minor declaration form can be accessed by going to MyUCSC and navigating to the Student Homepage and selecting the Undergraduate Student eForms tile > Petition for Major/Minor.

Letter Grade Policy

There are no restrictions on grading options for Mathematics Department courses. Please see UC Santa Cruz policies on grading options.

Course Substitution Policy

The Mathematics Department undergraduate vice chair approves requests for course substitutions. See the department website for details on requesting an exception to policy or course substitution.

Double Majors and Major/Minor Combinations Policy

Students who are declared in the Computer Science B.S. and wish to double major in Mathematics Theory and Computation B.S. may petition to use computer science and engineering courses toward the upper-division coding requirement and the three required upper-division electives for the mathematics theory and computation B.S. major.

Education Abroad Program (EAP)

Studying abroad is encouraged and most practical in fall quarter. It is possible to take classes abroad that will satisfy math major requirements. Intention of using an abroad course as a math requirement must be approved prior to taking the course. Students may submit a syllabus for the course abroad with an exception to policy request through the Mathematics Department homepage.

Honors

Honors in the Mathematics Department are awarded to graduating students whose academic performance in the major demonstrates excellence at a GPA of 3.5 or above. Highest Honors are determined by a cumulative review of student performance in mathematics courses. They are awarded to students who excel in challenging courses and in their capstone projects.

Requirements and Planners

Course Requirements

The Mathematics Theory and Computation B.S. is intended to prepare students for technical careers in industry or government while providing a solid mathematical background. Some courses may be satisfied via exam credit.

Lower-Division Courses

Choose one of the following courses:

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 20A	Honors Calculus	5

Plus one of the following courses:

MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 20B	Honors Calculus	5

Plus one of the following courses:

AM 10	Linear Algebra for Engineers	5
MATH 21	Linear Algebra	5

MATH 21 is preferred.

Plus one of the following options:

	Either these courses	
MATH 23A	Vector Calculus	5
MATH 23B	Vector Calculus	5
	or these courses	

AM 30	Multivariate Calculus for Engineers	5
AM 100	Mathematical Methods for Engineers	5

MATH 23A and MATH 23B are preferred.

Plus one of the following courses:

AM 20	Ordinary Differential Equations for Engineers	5
MATH 24	Ordinary Differential Equations	5

Math 24 is preferred.

Upper-Division Courses

The following course:

MATH 100	Introduction to Proof and Problem Solving	5

Coding Requirement

Plus one of the following courses or equivalent:

MATH 152	Programming for Mathematics	5
ASTR 119	Introduction to Scientific Computing	5
EART 112	Geophysical Data Science	5
EART 119A	Introduction to Scientific Programming	5
PHYS 115	Computational Physics	5

MATH152 is preferred. ASTR 119, EART 112, EART 119A and PHYS 115 are intended for double major students.

Students who have taken a lower-division coding course can request a substitution for the coding requirement.

Analysis Theory Requirement

Plus one of the following courses:

MATH 103A	Complex Analysis	5
MATH 105A	Real Analysis	5

Algebra Theory Requirement

Plus one of the following courses:

MATH 110	Introduction to Number Theory	5
MATH 111A	Algebra	5
MATH 111T	Algebra	5
MATH 117	Advanced Linear Algebra	5

Analysis Computation Requirement

Plus one of the following courses:

MATH 145	Introductory Chaos Theory	5
MATH 148	Numerical Analysis	5
AM 114	Introduction to Dynamical Systems	5
AM 147	Computational Methods and Applications	5

Algebra Computation Requirement

Plus one of the following courses:

MATH 115	Graph Theory	5
MATH 116	Combinatorics	5
MATH 134	Cryptography	5
MATH 140	Industrial Mathematics	5
MATH 160	Mathematical Logic I	5
MATH 162	Introduction to Computably Enumerable Functions and Sets and their Degrees	5

Electives

Three elective courses are required. If a student takes more than one course from the Analysis or Algebra Computation requirement lists, the extra course(s) can be counted toward the elective requirements. Other elective options are listed below. Courses from departments other than Mathematics, Statistics or Applied Math will have significant prerequisites and are intended for double major students.

Students who are declared in the Computer Science B.S. and wish to double major in the Mathematics Theory and Computation B.S. may petition to use CSE courses toward the upper-division coding requirement and the three required upper-division electives for the Mathematics Theory and Computation B.S. major.

MATH 106	Systems of Ordinary Differential Equations	5
MATH 107	Partial Differential Equations	5
MATH 118	Advanced Number Theory	5
MATH 120	Coding Theory	5
MATH 124	Introduction to Topology	5
MATH 125	Applied Topology	5
STAT 108	Linear Regression	5
STAT 131	Introduction to Probability Theory	5
STAT 132	Classical and Bayesian Inference	5
AM 107	Introduction to Fluid Dynamics	5
AM 115	Stochastic Modeling in Biology	5
AM 129	Foundations of Scientific Computing for Scientists and Engineers	5
AM 148	GPU Programming for Scientific Computations	5
ASTR 111	Order-of-Magnitude Astrophysics	5
BME 118	Mathematics of the Mind	5
EART 124	Modeling Earth's Climate	5
EART 125	Statistics and Data Analysis in the Geosciences	5
EART 162	Planetary Interiors	5
EART 172	Geophysical Fluid Dynamics	5

ECE 103	Signals and Systems	5
ECE 130	Introduction to Optoelectronics and Photonics	5
ECE 135	Electromagnetic Fields and Waves	5
ECE 141	Feedback Control Systems	5
ECE 151	Communications Systems	5
ECE 153	Digital Signal Processing	5
ECON 104	Is There Truth in Numbers: The Role of Statistics in Economics	5
ECON 113	Introduction to Econometrics	5
ECON 114	Advanced Quantitative Methods	6
ECON 124	Machine Learning for Economists	5
ECON 166A	Game Theory and Applications I	5
ECON 166B	Game Theory and Applications II	5
PHYS 116C	Mathematical Methods in Physics	5
PHYS 139A	Quantum Mechanics I	5
PHYS 139B	Quantum Mechanics II	5
PHYS 171	General Relativity, Black Holes, and Cosmology	5

Comprehensive Requirement

The comprehensive exit requirement in mathematics is satisfied by one of the following courses:

MATH 194	Senior Seminar	5
MATH 195	Senior Thesis	5

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in the mathematics B.S. is satisfied by:

MATH 100	Introduction to Proof and Problem Solving	5

Plus one of the following courses:

MATH 194	Senior Seminar	5
MATH 195	Senior Thesis	5

MATHEMATICS MINOR

Course Requirements

The minor is intended for students who are interested in mathematics and want a strong mathematical foundation for studying in areas that rely heavily on analytical skills. Students are required to complete at least 10 courses as follows. Courses may be taken for a letter grade or Pass/No Pass. Some courses may be satisfied via exam credit.

Lower-Division Courses

Choose one of the following courses:

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 20A	Honors Calculus	5

Plus one of the following courses:

MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 20B	Honors Calculus	5

Plus one of the following courses:

MATH 21	Linear Algebra	5
AM 10	Linear Algebra for Engineers	5

Math 21 is preferred.

Plus all of the following courses:

MATH 23A	Vector Calculus	5
MATH 23B	Vector Calculus	5

Upper-Division Courses

Take the following course:

MATH 100	Introduction to Proof and Problem Solving	5

Plus four upper-division electives:

The remaining four courses are chosen from MATH, AM, or STAT courses numbered 101-190. Courses must be 5 credits or more, and only one of the four courses can be from AM or STAT. Lecture and lab combinations count as a single course. For courses with a required concurrently enrolled lab, only successful completion of the lecture is required for the major. Successful completion of the lab may count toward total degree credits.

Courses from other departments must be reviewed and approved by the undergraduate vice chair. Under exceptional circumstances, MATH 100 may be substituted by another upper-division mathematics course. The undergraduate vice chair will review requests on an individual basis.

No senior seminar or thesis is required.

MATHEMATICS CONTIGUOUS BACHELORS/MASTERS PATHWAY

The 4+1 pathway into the mathematics master's program is an option that allows undergraduates at UC Santa Cruz to:

- Take two required graduate courses during their undergraduate degree in preparation to finish the master's degree in just one additional year.
- Apply to the mathematics master's program through a streamlined application process.

Undergraduate students currently enrolled in the mathematics B.S. have the opportunity, any time after the start of their junior year until Dec. 1 of their senior year, to apply to be admitted to the 4+1 contiguous pathway leading to the mathematics master's degree. Qualified undergraduates from other undergraduate majors may also apply to the pathway and their applications will be considered on a case-by-case basis.

The requirements for admission into the 4+1 pathway are:

1. a GPA in the major of 3.5 or more;
2. to have taken MATH 105B or MATH 111B; and
3. to have taken, to be currently enrolled, or have the plan to enroll by fall of the senior year in one of the required graduate courses.

Interested students should set up a meeting with the mathematics undergraduate advisor to discuss their curriculum plan and complete the application forms. The deadline for application to the pathway is Dec.1 of their senior year, although students are encouraged to apply earlier.

Students in the pathway who apply through the streamlined application process to the master's program are not guaranteed admission. The Mathematics Department expects to admit students who have passed two of the required graduate courses and have maintained a GPA in the major of 3.5 or more. Once accepted into the master's program, students from the pathway will follow the same requirements as any other students in the two-year track with expected graduation in the fifth year.

MATHEMATICS M.A.

Introduction

The objectives of the mathematics M.A. program give students advanced fundamental knowledge in the areas of algebra, analysis, and geometry in order to prepare them for admission in top Ph.D. programs, for work in industry, or for a teaching career at community colleges. Students will

possess the ability to solve problems and communicate solutions and concepts clearly and in rigorous mathematical language.

Master's students are expected to complete their degree within two years. Students admitted to the M.A. program may apply to the Mathematics Department to transfer to the Ph.D. program upon passing the required preliminary examinations at the Ph.D. level.

Requirements

Course Requirements

The following course:

MATH 288A	Pedagogy of Mathematics	2

Students are required to complete four of the following courses from the three core sequences:

MATH 200	Algebra I	5
MATH 201	Algebra II	5
MATH 202	Algebra III	5
MATH 204	Analysis I	5
MATH 205	Analysis II	5
MATH 206	Analysis III	5
MATH 208	Manifolds I	5
MATH 209	Manifolds II	5
MATH 210	Manifolds III	5

Students are also required to complete five additional courses in mathematics

Courses in a related subject may be substituted by approval from the graduate vice chair. Sample courses include:

MATH 203	Algebra IV	5
MATH 207	Complex Analysis	5
MATH 211	Algebraic Topology	5
MATH 212	Differential Geometry	5
MATH 213A	Partial Differential Equations I	5
MATH 213B	Partial Differential Equations II	5
MATH 214	Theory of Finite Groups	5
MATH 215	Operator Theory	5
MATH 216	Advanced Analysis	5
MATH 217	Advanced Elliptic Partial Differential Equations	5
MATH 218	Advanced Parabolic and Hyperbolic Partial Differential Equations	5
MATH 219	Nonlinear Functional Analysis	5
MATH 220A	Representation Theory I	5
MATH 220B	Representation Theory II	5
MATH 222A	Algebraic Number Theory	5
MATH 222B	Algebraic Number Theory	5
MATH 223A	Algebraic Geometry I	5
MATH 223B	Algebraic Geometry II	5
MATH 225A	Lie Algebras	5
MATH 225B	Infinite Dimensional Lie Algebras	5
MATH 226A	Infinite Dimensional Lie Algebras and Quantum Field Theory I	5
MATH 226B	Infinite Dimensional Lie Algebras and Quantum Field Theory II	5
MATH 227	Lie Groups	5
MATH 228	Lie Incidence Geometries	5
MATH 229	Kac-Moody Algebras	5
MATH 232	Morse Theory	5
MATH 233	Random Matrix Theory	5
MATH 234	Riemann Surfaces	5
MATH 235	Dynamical Systems Theory	5
MATH 238	Elliptic Functions and Modular Forms	5
MATH 239	Homological Algebra	5
MATH 240A	Representations of Finite Groups I	5
MATH 240B	Representations of Finite Groups II	5
MATH 246	Representations of Algebras	5
MATH 248	Symplectic Geometry	5
MATH 249A	Mechanics I	5
MATH 249B	Mechanics II	5
MATH 249C	Mechanics III	5
MATH 252	Fluid Mechanics	5
MATH 254	Geometric Analysis	5
MATH 256	Algebraic Curves	5
MATH 260	Combinatorics	5
MATH 280	Topics in Analysis	5
MATH 281	Topics in Algebra	5
MATH 282	Topics in Geometry	5
MATH 283	Topics in Combinatorial Theory	5
MATH 284	Topics in Dynamics	5
MATH 285	Topics in Partial Differential Equations	5
MATH 286	Topics in Number Theory	5
MATH 287	Topics in Topology	5

Other Requirements

Additional requirements for the M.A. degree are dependent on the student’s chosen track: the thesis track (Plan I) or the comprehensive examination track (Plan II).

Thesis Track (Plan I)

Students are required to complete a master’s thesis. A master’s thesis does not have to consist of original research results. At the minimum, it should show mastery of a specific subject area that goes beyond the knowledge taught in the core sequences in algebra, analysis, or geometry. This track is recommended for students that want to transfer into a top Ph.D. program.

The student, in consultation with their faculty advisor, is responsible for selecting a master’s thesis reading committee. The majority of the membership of a thesis reading committee

shall be members of the Santa Cruz Division of the Academic Senate. The Graduate Division must approve the committee.

The Nominations for Master's Thesis Reading Committee Form must be completed and submitted by the end of the second week of the quarter in which the degree will be granted. The form can be found on the Graduate Division website or can be provided by the Mathematics Department. The form should be turned in to the graduate adviser and program coordinator for review and submission to the Graduate Division.

More information about thesis submission can be found at the Graduate Division website.

Comprehensive Examination Track (Plan II)

Students are required to obtain a second-level pass on one of three written preliminary examinations: algebra, analysis, or geometry. A second-level pass signifies that the student has a very good understanding of the basic concepts, but not necessarily enough to conduct independent research.

Timeline to Degree

A master's student should complete the thesis track or comprehensive examination track by the end of spring quarter of their second year. A student who may be experiencing academic difficulty will first develop an academic support plan with the department before being recommended for academic notice or disqualified from the program in alignment with the following timeline:

- If one of the degree tracks is not met after the spring preliminary exam offering of a student's second year, an academic support plan will be developed with the graduate vice chair. Students pursuing the preliminary exam track should retake the exam the following fall, and students pursuing the thesis track should complete their thesis over the summer.
- If one of the degree tracks is not met after the fall preliminary exam offering of a student's third year, the student will be recommended for academic notice, and their academic support plan reassessed to follow through the spring of the third year, at the end of which the student should retake the spring preliminary exam or complete their thesis in spring.
- If one of the degree tracks is not met after the spring preliminary exam offering of the student's third year, the student may be disqualified from the program or can appeal to the department to continue on the masters route.

[Optional Catchall]

Applying for Graduation

M.A. students must complete the Application for the Master's Degree form by the appropriate quarter's deadline listed in the current academic calendar.

The application can be found on the Graduate Division website or can be provided by the Mathematics Department. The application should be turned in to the graduate adviser and program coordinator for review and submission to the Graduate Division.

MATHEMATICS PH.D.

Introduction

The objectives of the mathematics Ph.D. program are to prepare students for a career in academia, industry, or teaching. At the end of their studies, students will possess the ability to solve problems and communicate solutions in rigorous mathematical language, to communicate mathematical concepts effectively, and to conduct independent research.

Entering graduate students are advised initially by an assigned faculty mentor. Within the first two years, and typically after passing the preliminary examinations, the student selects a Ph.D. advisor in the area of the student's research interest.

Each graduate student is expected to consult with their advisor to formulate a plan of study and research. The student's advisor ultimately will be the student's thesis advisor.

Ph.D. students are expected to obtain their Ph.D. degree within six years. Students admitted to the Ph.D. program may receive a master's degree en route to the Ph.D.

Advancement to Candidacy

Course Requirements

A three-course sequence in each of the three fields of algebra, analysis, and geometry-topology (manifolds) will be offered each year. Preliminary examinations will be given for each core sequence at the beginning and end of each academic year.

First-level passage of a preliminary examination satisfies the core sequence requirement for that field. Ph.D. students are required to complete the full core sequence in the field associated with the preliminary examination in which they do not achieve a first-level pass. The core sequences are as follows:

MATH 200	Algebra I	5
MATH 201	Algebra II	5
MATH 202	Algebra III	5
MATH 204	Analysis I	5
MATH 205	Analysis II	5
MATH 206	Analysis III	5
MATH 208	Manifolds I	5
MATH 209	Manifolds II	5
MATH 210	Manifolds III	5

The following course:

MATH 288A	Pedagogy of Mathematics	2

Students are also required to complete six additional courses in mathematics.

No more than three courses may be independent study or thesis research courses. Sample courses include:

MATH 203	Algebra IV	5
MATH 207	Complex Analysis	5
MATH 211	Algebraic Topology	5
MATH 212	Differential Geometry	5
MATH 213A	Partial Differential Equations I	5
MATH 213B	Partial Differential Equations II	5
MATH 214	Theory of Finite Groups	5
MATH 215	Operator Theory	5
MATH 216	Advanced Analysis	5
MATH 217	Advanced Elliptic Partial Differential Equations	5
MATH 218	Advanced Parabolic and Hyperbolic Partial Differential Equations	5
MATH 219	Nonlinear Functional Analysis	5
MATH 220A	Representation Theory I	5
MATH 220B	Representation Theory II	5
MATH 222A	Algebraic Number Theory	5
MATH 222B	Algebraic Number Theory	5
MATH 223A	Algebraic Geometry I	5
MATH 223B	Algebraic Geometry II	5
MATH 225A	Lie Algebras	5
MATH 225B	Infinite Dimensional Lie Algebras	5
MATH 226A	Infinite Dimensional Lie Algebras and Quantum Field Theory I	5
MATH 226B	Infinite Dimensional Lie Algebras and Quantum Field Theory II	5
MATH 227	Lie Groups	5
MATH 228	Lie Incidence Geometries	5
MATH 229	Kac-Moody Algebras	5
MATH 232	Morse Theory	5
MATH 233	Random Matrix Theory	5
MATH 234	Riemann Surfaces	5
MATH 235	Dynamical Systems Theory	5
MATH 238	Elliptic Functions and Modular Forms	5
MATH 239	Homological Algebra	5
MATH 240A	Representations of Finite Groups I	5
MATH 240B	Representations of Finite Groups II	5
MATH 246	Representations of Algebras	5
MATH 248	Symplectic Geometry	5
MATH 249A	Mechanics I	5
MATH 249B	Mechanics II	5
MATH 249C	Mechanics III	5
MATH 252	Fluid Mechanics	5
MATH 254	Geometric Analysis	5
MATH 256	Algebraic Curves	5
MATH 260	Combinatorics	5
MATH 280	Topics in Analysis	5
MATH 281	Topics in Algebra	5
MATH 282	Topics in Geometry	5
MATH 283	Topics in Combinatorial Theory	5
MATH 284	Topics in Dynamics	5
MATH 285	Topics in Partial Differential Equations	5
MATH 286	Topics in Number Theory	5
MATH 287	Topics in Topology	5

Foreign Language Requirements

Beginning with the cohort entering fall 2022, there is no longer a foreign language requirement for the Ph.D. in Mathematics. Although there is no longer a foreign language requirement, some students may need to read papers in unfamiliar languages to carry out their research. When this is the case, students are strongly encouraged to reach out to faculty for guidance.

Teaching Requirement

Ph.D. students must complete a minimum of three quarters as a teaching assistant (TA). All TAs are required to participate in the department's teaching assistant training program.

TA appointments are usually made at 50 percent time (an assigned workload of approximately 220 hours per quarter). TAs are under the supervision of the faculty member responsible for the course. TAs are covered by a collective bargaining agreement between the University of California and the United Auto Workers (UAW).

Instructors and their TA(s) will meet at the beginning of the quarter to complete the Notification of TA Duties form in order to identify the agreed upon tasks. The performance of these tasks will form the basis of the end-of-quarter performance evaluation and will use the following criteria: quality of work; accuracy and attention to detail; interaction with students, peers, and instructor; knowledge of subject; and dependability. The specific allocation of TA duties is subject to change, depending on enrollments and the number of teaching assistantships in the department allocation. The general duties vary, depending on the course assigned and level of the course.

Pre-Qualifying Requirements

Preliminary Examinations

Preliminary examinations are given for each core sequence in the fields of algebra, analysis, and geometry-topology at the beginning and end of each academic year. The exams will be

designed and graded by recent instructors of each core sequence.

A first-level pass signifies that the student has the knowledge to start research with a thesis advisor in this particular area. A second-level pass signifies that the student has an understanding of the basic concepts, but not necessarily enough to conduct research.

Ph.D. students must obtain a first-level pass on at least one of the three written preliminary examinations and a second-level pass on at least one other. Students must complete the full three-course sequence in the field associated with the preliminary examination in which they did not achieve a first-level pass. Students may take the preliminary examinations as often as they wish.

Ph.D. students must complete the preliminary examinations and core sequence requirements by the end of spring quarter of their second year to maintain satisfactory progress. A student who may be experiencing academic difficulty will first develop an academic support plan with the department before being recommended for academic notice or disqualified from the program in alignment with the following timeline:

- If the preliminary exam requirements are not met after the spring preliminary exam offering of a student's second year, an academic support plan will be developed with the graduate vice chair and the preliminary exams in fall of the third year must be taken.
- If the requirements are not met after the fall preliminary exam offering of a student's third year, the student will be recommended for academic notice, and their academic support plan reassessed to follow through the spring of the third year.
- If the requirements are not met after the spring preliminary exam offering of the student's third year, the student may be disqualified from the program, and may transfer to a terminal master's program or appeal to the department to continue on the Ph.D. route.

Topics for the preliminary examinations include:

- Algebra
    - Linear algebra
    - Group theory
    - Ring and module theory
    - Field theory
    - Galois theory
- Analysis
    - Basic analysis
    - General topology
    - Metric spaces
    - Measure and integration
    - Complex analysis
    - Functional analysis
- Geometry-topology (manifolds)
    - Manifold and tangent bundle
    - Differential forms and integration on manifolds
    - Fundamental group and covering space
    - (Co)homology
    - Differential geometry

Qualifying Examination

Oral Qualifying Examination

By the beginning of the third year, a student should have a faculty advisor whose research aligns with their research interests. Students will work with their faculty advisor to develop a research plan which is proposed during their qualifying exam.

All graduate students in the Ph.D. program are required to take an oral examination, called the oral qualifying examination, for advancement to candidacy for the Ph.D. degree. Students will demonstrate that they have a sufficient understanding of their Ph.D. thesis problem by presenting their research plan.

Qualifying Examination Committee Composition

The examining committee consists of the student’s faculty advisor, at least two other faculty members from the Mathematics Department, and at least one outside tenured faculty member from either another discipline at UCSC or another academic institution (involved in research and graduate education of the same or different discipline). The student, in consultation with the student’s faculty advisor, selects the committee. The chair of the committee must be someone other than the student’s faculty advisor.

The Graduate Division must approve the committee. The Committee Nomination of Ph.D. Qualifying Examination Form must be completed and submitted at least one month prior to the requested exam date. The form can be found on the Graduate Division website or can be provided by the Mathematics Department. The form should be turned in to the graduate advisor and program coordinator for review and submission to the Graduate Division.

The committee decides on the topics for the examination, which should be broad enough to encompass a substantial body of knowledge in the area of the student's interest. The written list of topics to be included in the examination, along with a short bibliography, is prepared by the student. A copy is given to each committee member and a copy is put into the student's permanent records.

Following the Qualifying Examination

The Report on Qualifying Examination Form must be filled out by the qualifying examination committee immediately following the examination. The form can be found on the Graduate Division website, or can be provided by the Mathematics Department. The form should be turned in to the graduate advisor and program coordinator for review and submission to the Graduate Division. The student may request to see a copy of the report.

The oral exam must be completed by the spring quarter of a student's third year to maintain satisfactory progress. An oral qualifying exam may be taken at most twice. When retaking the exam, the membership of the examining committee typically remains the same.

A student who may be experiencing academic difficulty will first develop an academic support plan with the department before being recommended for academic notice or disqualified from the program in alignment with the following timeline:

- If the oral exam is not taken by the end of spring quarter of the third year, or upon an exam that is taken and failed, a student will develop an academic support plan with the graduate vice chair and their faculty advisor to follow through the fall of the fourth year.
- If the oral exam is not completed before the end of fall of the fourth year, the student will be recommended for academic notice, and their academic support plan reassessed to follow through the spring of the fourth year.
- If the oral exam is not completed by the end of spring of the fourth year, or upon a second exam that is taken and failed, a student may be disqualified from the program and may transfer to a terminal master's program or appeal to the department to continue on the Ph.D. route.

Post-Qualifying Requirements

Dissertation Reading Committee Composition

A Ph.D. student, in consultation with their faculty advisor, is responsible for selecting a dissertation reading committee. The committee consists of the student's advisor and at least two other members of the mathematics faculty. In special circumstances, a committee member may be chosen from another department and/or from another institution. The student's advisor is the chair of the committee.

The Graduate Division must approve the committee. The Nominations for Dissertation Reading Committee Form must be completed and submitted prior to advancement to candidacy. The form can be found on the Graduate Division website or can be provided by the Mathematics Department. The form should be turned in to the graduate advisor and program coordinator for review and submission to the Graduate Division.

A new form must be submitted for approval if changes to the dissertation reading committee must be made.

Advancement to Candidacy

Students must complete the following in order to advance to candidacy:

1. Complete the preliminary examinations and core sequences in accordance with the requirements outlined above;
2. Pass the qualifying examination;
3. Have a dissertation reading committee approved by the Mathematics Department and the Graduate Division;
4. Have no incomplete grades (I) on their record.

An advancement to candidacy fee will be billed to the student's account. The student will be officially advanced the following term after all of these requirements are met.

[Optional Catchall]

Dissertation

Dissertation

Each graduate student in the Ph.D. program is required to write a Ph.D. dissertation or thesis on a research topic in mathematics. The Ph.D. dissertation should contain original research results that are publishable in a peer-reviewed journal. All members of the student's dissertation committee must read and approve the dissertation.

More information about dissertation submission can be found at the Graduate Division website.

Dissertation Defense

After the dissertation has been approved, the student has an option of making a public oral presentation of the mathematical results contained in the dissertation—the "thesis defense." A recommendation by the dissertation committee will be made to the Mathematics Department and to the Graduate Council on the granting of the Ph.D. degree.

Academic Progress

Ph.D. students are expected to adhere to the below degree timetable:

1. Preliminary examinations and course sequence requirements

Completed by the end of the student's second year

2. Oral qualifying examination (and advancement to candidacy)

Completed no later than student's fourth year

3. Dissertation defense

Completed no later than the end of the sixth year

Annual meetings with the graduate vice chair and the graduate advisor and program coordinator are conducted with each student on a one-on-one basis. These meetings serve to notify the student of their current progress within the program and outline expectations for the continuation of normative progress toward the Ph.D. degree.

If the dissertation is not completed by the end of the sixth year, the student can either transfer to a terminal master's program or appeal to the department to extend their Ph.D. program.

Applying for Graduation

Ph.D. students must complete the Application for the Doctor of Philosophy degree form by the appropriate quarter's deadline listed in the current Academic and Administrative Calendar.

The form can be found on the Graduate Division website or can be provided by the Mathematics Department. The form should be turned in to the graduate advisor and program coordinator for review and submission to the Graduate Division.

Microbiology and Environmental Toxicology Ph.D. (p. 431)

Microbiology and Environmental Toxicology Designated Emphasis (p. 433)

OTHER PROGRAMS OF INTEREST

Microbiology and Environmental Toxicology Track within the Program in Biomedical Sciences and Engineering (PBSE)

The Graduate Program in Biomedical Sciences and Engineering (PBSE) reflects the interdisciplinary and collaborative nature of biomedical research at University of California, Santa Cruz. PBSE predoctoral fellows have the opportunity to study biology at the molecular, cellular, and systems levels, and can take advantage of advanced laboratory facilities, computational tools, and a highly collaborative research environment. First-year students select research rotations from more than 60 faculty members, who come primarily from the Departments of Microbiology and Environmental Toxicology (METX), Molecular, Cell, and Developmental Biology, Biomolecular Engineering, and Chemistry and Biochemistry. Students interested in this program apply directly to the METX track in the PBSE program.

UNDERGRADUATE PROGRAM

The METX Department offers a bachelor's degree in Microbiology (p. 423). The B.S. major in microbiology is designed for students interested in careers in biomedical, environmental, and basic science fields in both industry and academia. Students must take introductory biology and chemistry, microbiology lecture and lab, biochemistry, computational tools, and additional courses directly relevant to microbiology. As a unique feature of this program, students also take a microbiology course focusing on evaluating relevant scientific articles.

Some undergraduate students work in conjunction with METX faculty on independent research projects. These projects can allow students access to extensive laboratory facilities, experience and mentorship. Students can leverage this experience toward their individual goals as academics and researchers.

GRADUATE PROGRAM

Graduate training in the Department of Microbiology and Environmental Toxicology prepares students to solve important problems in the field of environmental health and microbiology by providing stimulating coursework, extensive scientific presentation training, and for the research-oriented Ph.D. and M.S. degrees, in-depth research that culminates in a Ph.D dissertation or M.S. thesis. This program educates students to understand the interplay between microbes, chemical toxins, and health. Graduate training prepares students to work effectively in a complex world, and become leaders in their field. Career paths include: academia, teaching, industry, and government to name a few.

MICROBIOLOGY B.S.

Information and Policies

Introduction

The B.S. major in microbiology is designed for students interested in careers in biomedical, environmental, and basic science fields in both industry and academia. Students are required to take introductory biology and chemistry, microbiology lecture and lab, biochemistry, computational tools, and additional courses directly relevant to microbiology. As a unique feature of this program, students also take a microbiology course with a focus on evaluating relevant scientific articles.

Academic Advising for the Program

Students are encouraged to seek out advising and assistance in planning their academic career to ensure completion of their major in a timely manner. For advising assistance, please contact the microbiology major advisor at microadvising@ucsc.edu.

All students interested in the Microbiology B.S. degree should read this catalog to learn more details about the major.

Program Learning Outcomes

Students who successfully complete the microbiology major will be able to:

1. Demonstrate conceptual understanding of the following areas: biology of microbial cells: cell structure, function, and metabolic pathways; microbial ecology: microbial communities and the impact of microbes on humans and the environment; microbial evolution: genomics and genetics, including mobile genetic elements.
2. Apply the basic principles of chemistry and quantitative reasoning to solve problems in microbiology.
3. Generate hypotheses, design experiments, and evaluate data.
4. Display proficiency in microbiology laboratory skills.
5. Use effective oral and written language skills to communicate scientific data and ideas, including with other disciplines.
6. Analyze, interpret, and evaluate a range of scientific literature in microbiology.
7. Display proficiency in fundamental bioinformatic skills needed to investigate gene function and understand the general methods utilized in the field of microbial genomics.

Getting Started in the Major: Frosh

Students pursuing the microbiology major begin with General Chemistry. Both the CHEM 3A/CHEM 3B/CHEM 3C series (with associated labs CHEM 3BL/CHEM 3CL) and the advanced CHEM 4A/CHEM 4B series (with associated labs CHEM 4AL/CHEM 4BL) fully satisfy the general chemistry prerequisites of any major declaration or required/elective classes for programs in the Physical and Biological Sciences (PBSci) Division. Students should also begin in Math 11A , Math 16A, or MATH 19A as soon as they can upon completion of the Mathematics Placement assessment.

Students are required to complete a Mathematics Placement assessment in ALEKS PPL to enroll in their first math course at UC Santa Cruz. Microbiology majors are expected and encouraged to work in the learning modules in ALEKS PPL to be able to enroll in MATH 16A; in order to enroll in MATH 16A, you need to have an ALEKS PPL result of 70 or above, which translates to a math placement score of 300 in your student record at UC Santa Cruz.

If you've successfully completed a transferable college-level pre-calculus or calculus course, or have a sufficiently high Advanced Placement (AP) or International Baccalaureate (IB) Calculus test score, you can satisfy your Math Placement requirement simply by submitting your grade or score to UCSC. See the General Catalog for AP and IBH score equivalencies.

Transfer Information and Policy

General information about transferring to UC Santa Cruz can be found on the Transfer Preparation Advising website. Students planning to transfer to UC Santa Cruz from a California community college should reference assist.org to determine which courses are equivalent to required and recommended pre-transfer courses.

Transfer Admission Screening Policy

METX encourages applications from transfer students in the biological sciences. The department has a major qualification policy that limits program access to students who have successfully completed a subset of foundational coursework.

For more information on qualifying for the major as a transfer applicant, see the Getting Started as a Transfer Student webpage.

The following courses or their equivalents are required prior to transfer/entry to UCSC. Completion of these courses with a grade of C or higher satisfies the qualification for this major.

The following courses

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3C	General Chemistry	3
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5

And these courses

CHEM 8A	Organic Chemistry	5

BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOL 20L	Experimental Biology Laboratory	2

BIOL 20L is waived for students who have completed BIOL 20A and BIOE 20B from California community colleges.

Plus

One of the following calculus or equivalent courses

MATH 11A	Calculus with Applications	5
MATH 19A	Calculus for Science, Engineering, and Mathematics	5

Prior to transfer

In addition, the following courses are recommended prior to transfer to ensure timely graduation. Students who only complete the minimum required transfer coursework for the major will likely need more than two years to complete the microbiology B.S.

Prospective students are encouraged to prioritize required and recommended major preparation and may additionally complete courses that articulate to UC Santa Cruz general education requirements as time allows.

One of the following courses

MATH 11B	Calculus with Applications	5
	OR	
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

Plus one of the following options

	Either this course	
STAT 5	Statistics	5
	or these courses	
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2

Plus the following courses

CHEM 8B	Organic Chemistry	5
CHEM 8L	Organic Chemistry Laboratory	2

Recommended Courses for Transfer Students

Getting Started in the Major: Transfer Students

Transfer students must already be qualified at time of entry to UCSC to be accepted into the microbiology major. Any student who fails to meet these requirements may file an appeal for admission to the major, but admission is not guaranteed.

Transfer students should complete the required courses in microbiology (METX 100) and biochemistry (BIOL 100) by the end of their first year at UC Santa Cruz as they are prerequisites for other required courses.

Transfer students are strongly encouraged to meet with the microbiology major advisor in their first quarter. For assistance with advising, please contact microadvising@ucsc.edu.

Transfer students entering at the junior level who have satisfied the screening requirements can declare their major any time after coming to UCSC but are required to be declared in a major by the declaration deadline in their second term at UCSC. Any student who fails to meet these requirements may file an appeal for admission to the major, but admission is not guaranteed.

Transfer students who are proposed in a different major (other than microbiology) and have advanced standing when they come to UCSC require permission from the department to change into the major. Admission to the major is not guaranteed.

Major Qualification Policy and Declaration Process

Major Qualification

Students must complete the following qualification courses, or their equivalents, each with a grade of C or better.

Courses from the following

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3C	General Chemistry	3
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5

Plus these courses

CHEM 8A	Organic Chemistry	5
BIOL 20A	Cell and Molecular Biology	5
BIOL 20L	Experimental Biology Laboratory	2
BIOE 20B	Development and Physiology	5

Plus one of the following

MATH 11A	Calculus with Applications	5
MATH 16A	Mathematics for Life Sciences	5
MATH 19A	Calculus for Science, Engineering, and Mathematics	5

How to Declare a Major

Students may declare a major as early as they would like if they have decided which major to pursue and have satisfied prerequisites or qualification requirements for the major. Petition to declare your major as soon as you have met qualification requirements and/or reach your declaration deadline quarter, whichever comes first.

Per the UC Santa Cruz major declaration policy, students who enter UCSC as frosh are required to be formally declared in a major by the campus deadline in their sixth quarter and before enrolling in their third year (or equivalent). Upper-division junior transfer students are required to be declared in a major by the deadline in their second term at UCSC.

Students should petition to declare a microbiology major once they have completed all qualification courses and met the GPA requirements and have an official, signed, department-approved academic plan on file.

The Petition for Major/Minor declaration form can be accessed by going to MyUCSC and navigating to the Student Homepage and selecting the Undergraduate Student eForms tile > Petition for Major/Minor.

Students petitioning when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh, second quarter for junior transfer students), will either be approved, denied, or provided with conditions (e.g., completion of final qualification courses with certain grades), but will not be declared until all requirements have been met and satisfactory grades have been posted.

Each major/minor advising office has a process for declaring. For assistance with declaring the microbiology major, please contact microbiology major advisor at microadvising@ucsc.edu.

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting an appeal form to the microbiology advisor at microadvising@ucsc.edu. The department will reply to appeals within 15 days of a completed appeal submission to the managing department faculty. To appeal for the Microbiology B.S., complete the Microbiology Major Appeal Form via DocuSign.

Note: The information you share in your appeal or with your advisors will be kept confidential and shared only with campus officials as required to serve you in an advising capacity or process your appeal. However, in limited circumstances, including those related to potential harm to yourself or others, sexual assault, and abuse, we may be required by law to report incidents you disclose to other need-to-know offices on campus such as the Title IX Office and/or University of California Police Department. If you are in need of support for any issues, please see the list of confidential and/or support resources.

Letter Grade Policy

All courses that are taken to satisfy any major requirement must be taken for a letter grade. Additionally, letter grades of C or higher must be attained to meet major and minor requirements for graduation.

Course Substitution Policy

At least half of the upper-division courses required for the major must be taken at UC Santa Cruz, not as transfer credits from another institution. Students are advised to contact the microbiology advisor before enrolling in any upper-division courses at other institutions to verify articulation. In particular, students must receive permission from the department to satisfy the BIOL 100 or METX 100 requirements with courses taken at other institutions.

Double Majors and Major/Minor Combinations Policy

Students interested in pursuing multiple majors within the biological sciences may **NOT** declare any combination of the following majors: microbiology B.S.; global and community health B.A. or B.S.; biology B.S.; biology B.A.; molecular, cell, and developmental biology B.S.; neuroscience B.S.; biochemistry and molecular biology B.S.; ecology and evolutionary biology B.S; marine biology B.S.; plant sciences B.S.

Pursuing a double major that includes the microbiology major is a highly individual decision and should be based on a student's educational and career goals. Because the microbiology major itself is rigorous, it should be noted that completing a double major involving microbiology is difficult (though possible).

To declare a double major program, a student must obtain an academic plan showing that they are able to complete both degrees within the maximum number of quarters of enrollment available at UC Santa Cruz. Therefore, the steps for a student to pursue microbiology as a second major are as follows:

1. Student must have an up-to-date and accurate major academic plan for their initial major.
2. Student must make an appointment with the microbiology major advisor and send the link to their initial major academic plan to microadvising@ucsc.edu.
3. The microbiology major advisor will review your major academic plan and will add the microbiology major courses the initial major academic plan, as necessary and if it is viable to do so per double unit counting, enrollment limitations, and time-to-degree guidelines.
4. The microbiology major advisor will discuss the double major plan with the student during their scheduled appointment. If the plan is viable, it will be approved and signed by both the student and the second major advisor.

5. Once the student has an approved and viable double major plan and qualifies for the major, the student must petition to declare chemistry as a second major using the Petition for Major/Minor form in MyUCSC.

Study Abroad

The UC Education Abroad Program (EAP) offers qualified students unique opportunities to broaden their educational horizons. The METX Department encourages interested students to participate. Many programs are in English-speaking countries or use English for advanced courses. Many programs offer small classes, extensive laboratories, and/or field research experience.

Students interested in studying abroad need to get an early start on their basic science requirements, including chemistry, mathematics, and introductory biology. Students interested in studying abroad should visit the UCEAP office as soon as possible to begin planning. They should also seek advice about their UCEAP plan for major courses at UC Santa Cruz from Chemistry Advising and/or a faculty advisor and receive their approval.

Honors Policy

Honors in the majors are awarded to graduating students whose academic performance in major-required coursework demonstrates excellence at a grade point average (GPA) of 3.5 or above. Highest honors are awarded to those students whose performance in major-required coursework demonstrates the highest level of excellence and results in a GPA of 3.8 or above.

Medical and Professional School Admission

Medical and professional school admissions requirements vary; students should verify that their coursework will satisfy the admissions requirements of the programs to which they plan to apply.

Students are strongly encouraged to review the Pre-Health section of the Career Success website to review preparation recommendations, prerequisite and other information about professional health education programs (medical school, dental school, etc.), and more important information to assist in preparation for a career in health sciences.

Students are urged to contact Career Success for assistance with the application process.

Requirements and Planners

Course Requirements

Complete the following courses or their equivalents. Some courses may be satisfied via exam credit.

Lower-Division Courses

One of the following

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3BL	General Chemistry Lab	2
CHEM 3C	General Chemistry	3
CHEM 3CL	General Chemistry Lab	2
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4AL	Advanced General Chemistry Lab	2
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4BL	Advanced General Chemistry Lab	2

And these courses

CHEM 8A	Organic Chemistry	5
CHEM 8L	Organic Chemistry Laboratory	2
CHEM 8B	Organic Chemistry	5
BIOL 20A	Cell and Molecular Biology	5
BIOL 20L	Experimental Biology Laboratory	2
BIOE 20B	Development and Physiology	5
BIOE 20C	Ecology and Evolution	5
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics I Laboratory	1
PHYS 6B	Introductory Physics II	5
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2

Note: Students may take STAT 5 in place of STAT 7/STAT 7L, although STAT 7/STAT 7L is strongly encouraged.

Plus one of the following options

	Either these courses	
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
	or these courses	
MATH 16A	Mathematics for Life Sciences	5
MATH 16B	Mathematics for Life Sciences	5
	or these courses	
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

Upper-Division Courses

The following courses

BIOL 100	Biochemistry	5
BIOL 101L	Molecular Biology Laboratory	2
METX 100	Introduction to Microbiology	5
METX 100L	Microbiology Laboratory	5
METX 140	Molecular Biology and Microbial Genetics	5
METX 150	Applied and Environmental Microbiology	5
BME 110	Computational Biology Tools	5

Electives

Students must complete two electives totaling 9 credits from the following options:

METX 115	Environmental Health Science	5
METX 133	Medical Microbiology	5
METX 135	Functional Anatomy	5
METX 135L	Functional Anatomy Lab	3
METX 141	Advanced Bacteriology Laboratory	5
BME 105	Genetics in the Genomics Era	5
BME 122H	Extreme Environmental Virology	5
BME 128	Protein Engineering	5
BME 132	Evolutionary Genomics	5
BME 160	Research Programming in the Life Sciences	6
BME 163	Applied Visualization and Analysis of Scientific Data	5
BIOE 149	Disease Ecology	5
CHEM 171	Chemical Biology	5
OCEA 130	Biological Oceanography	5
ENVS 163	Plant Disease Ecology	5

Note: Lecture/lab combinations count as one course.

Disciplinary Communication DC Requirement

The DC requirement for the microbiology B.S. is satisfied by completing the following course:

METX 100L	Microbiology Laboratory	5

Comprehensive Requirement

The comprehensive requirement is satisfied by completing the following course:

METX 100L	Microbiology Laboratory	5

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.
This is a sample academic plan for those pursuing a microbiology B.S. major. If needed, this plan can be arranged differently. Please meet with the microbiology advisor to review your individualized official academic plan.

Students who are required to complete MATH 2 and/or MATH 3 before beginning the major-required MATH series are invited (and highly encouraged) to work with their academic advisor, early and often, to find their best pathway through the degree requirements of their chosen program.

Sample Four-Year Planner

	Fall	Winter	Spring	Summer
Entering				College 1A Summer Edge (optional)
1st (frosh)	CHEM 3A MATH 16A College 1	CHEM 3B CHEM 3BL MATH 16B WRIT 1	CHEM 3C CHEM 3CL BIOL 20A	
2nd (soph)	BIOE 20B CHEM 8A CHEM 8L WRIT 2	BIOL 20L CHEM 8B METX 100	BIOE 20C PHYS 6A PHYS 6L	
3rd (junior)	STAT 7 STAT 7L METX 100L	BME 110 BIOL 100	PHYS 6B BIOL 101L METX 140	
4th(senior)	METX 150	Upper-division elective	Upper-division elective	

Sample Transfer Two-Year Planner

Note: The sample planner below is configured for transfer student entering UC Santa Cruz with all the required and recommended transfer coursework. Failure to complete both the required and highly recommended courses before transfer may require additional time to degree.

Please meet with the microbiology major advisor to review your specific official academic plan (microadvising@ucsc.edu).

	Fall	Winter	Spring	Summer
Entering				KRSG 1T Summer Edge (optional)
3rd (junior)	MET X 100 MET X 100L	BIOL 100 PHYS 6B	BIOL 101L METX 140 BME 110	
4th (senior)	MET X 150	Upper-division elective	Upper-division elective	

MICROBIOLOGY AND ENVIRONMENTAL TOXICOLOGY CONTIGUOUS

BACHELORS/MASTERS PATHWAY

METX offers a fifth-year Plan I (thesis) M.S. degree pathway, earned contiguously with an appropriate Bachelor of Science (B.S.) degree at the UC Santa Cruz. The fifth-year M.S. pathway provides highly motivated undergraduate majors the opportunity to earn separate B.S. and M.S. degrees in five years. The pathway provides the additional level of preparation and experience that students need to pursue careers in industry, government, or to increase their competitiveness for top Ph.D. programs.

To be accepted into the pathway, students will need to prepare an application packet and academic plan in consultation with their M.S. Plan I faculty adviser, and undergraduate adviser, providing evidence of solid academic performance in general and in their undergraduate major. The application should be submitted to the METX department by Aug 1 (prior to the beginning of their senior year), and should include:

- A one-page personal statement describing:
  - a) the student's motivation and academic preparation for entering the path
  - b) the student's goals for the fifth-year path, including the area of concentration
  - c) the name of a faculty member willing to serve as their thesis advisor
  - d) future professional goals.
- Copy of unofficial transcripts establishing the GPA requirements in the undergraduate major and overall. Applicants should possess a GPA in courses of their undergraduate major (biology, chemistry, etc.) of 3.2 or above, and an overall GPA of 3.0 or above.
- A letter of recommendation from a sponsoring METX faculty member attesting to the student's aptitude for a M.S. degree in METX.
- A coursework plan that will enable them to complete both the requirements for the B.S. in their undergraduate department and M.S. in METX in five years, demonstrating sufficient coursework capacity to complete at least two METX graduate courses in their final undergraduate year.

If accepted into the fifth-year B.S./M.S. pathway, students will apply to the M.S. program during their senior undergraduate year. The criteria and deadlines for admission to the METX M.S. program will be the same as for all METX M.S. program applicants.

MICROBIOLOGY AND ENVIRONMENTAL TOXICOLOGY M.S.

Introduction

The Microbiology and Environmental Toxicology Department offers a Master of Science (M.S.) degree in Microbiology and Environmental Toxicology (METX). The METX M.S. degree can be attained through Plan I (thesis) or Plan II (capstone).

Plan I: A master's research thesis, viewed as acceptable by the student's thesis reading committee, is required of each candidate. The completed thesis must be filed with the Graduate Division by the end of instruction in the term in which the candidate expects the degree to be awarded. Students will also complete a minimum of 40 credits of instruction.

Plan II: Students complete a capstone requirement, which is an individual written project. A comprehensive project in the major subject, as approved by the METX graduate advising committee, is required of each candidate. Students will also complete a minimum of 40 credits of instruction.

The METX M.S. degree combines core courses and electives to provide interdisciplinary training in microbiology, toxicology, and environmental health sciences. Graduates from the program are exceptionally prepared to take research or management positions in organizations concerned with microbial and environmental health-related sciences. Graduates may also pursue fields in education or enter doctoral programs in biological and environmental health sciences or related fields.

Students pursuing Plan I typically graduate in two years; Plan II typically concludes in one year.

Requirements

Plan I (thesis) M.S. Degree

Prospective students who are interested in research careers, or gaining research experience prior to entering a doctoral program, should consider the Plan I (thesis) M.S. degree.

Course Requirements

To receive a METX Plan I (thesis) M.S. degree, students must successfully complete the courses listed below. Additional coursework may be recommended or required by the student's faculty advisor or the graduate advising committee.

One required core course

METX 200	Interdisciplinary Approaches in Environmental Toxicology	5

Two courses from the following list:

METX 201	Sources and Fates of Pollutants	5
METX 202	Cell and Molecular Toxicology	5
METX 206A	Advanced Microbiology	5
METX 210	Molecular and Cellular Basis of Bacterial Pathogenesis	5
METX 238	Pathogenesis: Molecular Mechanisms of Disease	5
METX 250	Environmental Microbiology	5

Any additional courses as recommended by your Graduate Advising Committee

Each quarter, Plan I students must also enroll in the following courses:

The METX Department Seminar

METX 292	Introductory Graduate Seminar	

Research Units (select from below as appropriate)

Each quarter, students will consult with their faculty advisor and/or the METX Graduate Advising Committee to determine which research course to enroll in. Students only take one of these each quarter.

METX 299A	Thesis Research	5
METX 299B	Thesis Research	10
METX 299C	Thesis Research	15
METX 299Z	Thesis Research	2

Topical Seminar (lab meeting) associated with their primary investigator (select from below as appropriate

METX 281A	Seminar in Global Health	2
METX 281C	Topics in Environmental Microbiology	2
METX 281J	Mechanisms of Virulence and Resistance to Infectious Disease	2
METX 281M	Topics in Molecular Toxicology	2
METX 281O	Topics in Bacterial Pathogenesis	2
METX 281P	Origins and Applications of Human Gut Microbial Symbiosis	2
METX 281R	Topics in Genome-Environment Interactions	2
METX 281S	Cellular and Organismal Responses to Toxicants	2
METX 281V	Topics in Bacterial Pathogenesis and Innate Immunity	2
METX 281Y	Biofilms: Processes and Regulation	2

Other Requirements

Literature Review

Students are required to write a literature review summarizing the current state of the field of the proposed dissertation research. The review should be written with feedback from the student's faculty advisor and is due to the student's advisor and the program graduate advisor by the first day of fall quarter of the second year.

Department Seminars

Plan I students are required to give a 15- 20-minute departmental seminar in the first academic year and a 50-minute departmental seminar on thesis work during the spring of the second year.

Master's Comprehensive Examination

The master's comprehensive exam is a presentation and defense of the student's master's research proposal, including relevant background knowledge. This examination is taken in the fall quarter of the second year and is given by the student's Thesis Reading Committee (aka the thesis committee).

Thesis

Students are required to submit their thesis for fulfillment of the degree requirements. The thesis should be submitted to the student's thesis committee one month before the due date.

Plan II (capstone) M.S. Degree

The Plan II (capstone) M.S. degree may be of interest to students interested in interdisciplinary graduate training in microbiology and environmental health-related fields, but with career goals other than research, such as government service, non-profit NGOs, and private sector biotech and environmental health companies.

Coursework Requirements

Three required courses:

METX 200	Interdisciplinary Approaches in Environmental Toxicology	5
METX 245A	Scientific Communication in Microbiology and Environmental Toxicology A	5
METX 245B	Scientific Communication in Microbiology and Environmental Toxicology B	5

Two courses from the following list:

METX 201	Sources and Fates of Pollutants	5
METX 202	Cell and Molecular Toxicology	5
METX 206A	Advanced Microbiology	5
METX 210	Molecular and Cellular Basis of Bacterial Pathogenesis	5
METX 238	Pathogenesis: Molecular Mechanisms of Disease	5
METX 250	Environmental Microbiology	5

At least three additional courses

Plan II students must take at least three additional graduate-level METX courses or approved graduate-level courses from another department. Students should consult with the Graduate Advising Committee regarding the selection of these additional electives.

Department Seminar

Students are expected to enroll in and attend the METX department seminar every quarter.

METX 292	Introductory Graduate Seminar

Other Requirements

Capstone Writing Project:

Plan II M.S. students must complete a capstone writing project to be completed under the guidance/mentorship of a faculty member in the department. As an example, capstone projects may include a scientific research proposal or a substantial review article.

MICROBIOLOGY AND ENVIRONMENTAL TOXICOLOGY PH.D.

Introduction

The Department of Microbiology and Environmental Toxicology (METX) focuses on the human and environmental health impacts of chemicals and pathogens. A unifying disciplinary theme of research in METX is that both environmental chemicals and pathogens represent physiological effects that, in many cases, elicit specific molecular and inflammatory responses that increase the risk of adverse health outcomes in exposed individuals. The METX Ph.D. program provides in-depth training in the human and environmental health impacts of chemicals and pathogens. We accomplish this goal through comprehensive coursework, extensive scientific communication training, and in-depth research culminating in a Ph.D. dissertation. Our training prepares students to become leaders in various fields, following career paths in academia, teaching, industry, and government.

Students typically graduate with a Ph.D. in four to six years.

Advancement to Candidacy

The student advances to candidacy after completing all coursework, completing the literature review (due beginning of fall quarter, second year), passing the Ph.D. qualifying examination (spring quarter, second year), and presenting a 50-minute departmental seminar (spring quarter, third year).

Course Requirements

Three required courses

METX 200	Interdisciplinary Approaches in Environmental Toxicology	5
METX 200B	Graduate Research Project Development	5
BIOL 289	Practice of Science	5

Students must take all three.

One science writing course

METX 245A	Scientific Communication in Microbiology and Environmental Toxicology A	5
METX 205	Scientific Grant Writing	5

Students may select either course from this list.

One field specific core course

METX 202	Cell and Molecular Toxicology	5
METX 206A	Advanced Microbiology	5

Students may select either course from this list.

At least one graduate-level elective

Students may select any graduate-level METX course from this list, or an approved course from another department.

METX 201	Sources and Fates of Pollutants	5
METX 210	Molecular and Cellular Basis of Bacterial Pathogenesis	5
METX 238	Pathogenesis: Molecular Mechanisms of Disease	5
METX 250	Environmental Microbiology	5

Students may elect to take both METX 202 and METX 206A to satisfy this requirement (i.e., one class counts as “field-specific," and the other counts as the “elective”). Students should contact the Graduate Advisory Committee (GAC) for approval on classes not listed here. The course must be a graduate level, 5-credit course.

Any additional courses recommended by their graduate advising committee.

Students will consult with their advising committee to determine if additional coursework is necessary for their success in the program.

Each quarter, all students (before and after advancement) must enroll in the following courses

The following classes may be taken as Satisfactory/Unsatisfactory (S/US) grading unless otherwise instructed by your graduate advisor.

METX Department Seminar

METX 292	Introductory Graduate Seminar	

Research Units

Each quarter, students will consult with their advising committee or faculty advisor to determine which research course to enroll in.

METX 297A	Independent Study	5
METX 297B	Independent Study	10
METX 297C	Independent Study	15
METX 299A	Thesis Research	5
METX 299B	Thesis Research	10
METX 299C	Thesis Research	15
METX 299Z	Thesis Research	2

Topical seminar associated with their thesis lab

Note: First-year students in the PBSE rotation program do not enroll in one of these until they have joined a permanent thesis lab.

METX 281A	Seminar in Global Health	2
METX 281C	Topics in Environmental Microbiology	2
METX 281J	Mechanisms of Virulence and Resistance to Infectious Disease	2
METX 281M	Topics in Molecular Toxicology	2
METX 281O	Topics in Bacterial Pathogenesis	2
METX 281P	Origins and Applications of Human Gut Microbial Symbiosis	2
METX 281R	Topics in Genome-Environment Interactions	2
METX 281S	Cellular and Organismal Responses to Toxicants	2
METX 281V	Topics in Bacterial Pathogenesis and Innate Immunity	2
METX 281Y	Biofilms: Processes and Regulation	2

Foreign Language Requirements

Thesis Laboratory

Students may be admitted to the METX Ph.D. program as a “direct admit” or via the Ph.D. Program in Biomedical Sciences and Engineering (PBSE). Direct admits have an agreed upon thesis mentor at the time of admission and begin working in that lab immediately upon matriculation.

Students admitted via the PBSE graduate program are required to complete three rotations prior to identifying a thesis mentor/lab. At the end of each rotation, students must present on their rotation project either with a short talk or poster presentation. Rotations occur during fall and winter quarters. At the end of the third rotation, students identify an advisor to sponsor their thesis research, and typically begin in their thesis lab at the beginning of spring quarter. Students who are unable to secure a thesis laboratory after three rotations must contact the METX GAC to seek assistance in scheduling a possible fourth rotation, though this option is not guaranteed.

Regardless of rotation status, all students must secure an advisor to sponsor their thesis research by the end of their first academic year in order to remain in good standing.

Literature Review

Students are required to write a literature review summarizing the current state of the field of the proposed dissertation research. The review should be written with feedback from the student's faculty advisor and is due to the student's advisor and the program graduate advisor by the first day of fall quarter of the second year.

Qualifying Examination

Students will complete a Ph.D. qualifying examination (QE) comprised of both oral and written components. The QE must be completed by May 15 of the student's second year.

Department Seminar

Students must present a public seminar to the department each academic year. Most years, this seminar is a short talk (typically ~15 - 20 minutes). In the third year (prior to advancing to candidacy), students are required to give a full 50-minute seminar.

For first-year students in the PBSE rotation program, the required rotation talks satisfy this requirement. All other students, including first-year students not completing PBSE rotations (direct-admission to a lab) should give a talk during the regular METX departmental seminar series.

Teaching Requirement

Ph.D. students are required to work as a teaching assistant (TA) for at least one quarter. Fulfilling this requirement may happen pre or post candidacy.

Dissertation

Dissertation Reading Committee

All students must meet with an advisory committee at least once per year. Students meet with the METX Graduate Advisory Committee until they form their Dissertation Reading Committee (aka thesis committee) in Year 3.

Dissertation Reading Committee (DRC)

After advancing to candidacy, students must meet at least annually with their DRC in order to remain in good standing. Annual meetings must occur before the end of winter quarter each year. Students may be required to meet with their DRC more frequently to get additional feedback on their thesis research, or if dictated by their DRC or the Graduate Advisory Committee. The DRC remains standing until the student has completed all requirements for the doctoral degree.

Dissertation Submission and Defense

The student must submit their doctoral dissertation to their Dissertation Reading Committee (aka thesis committee) for tentative approval at least one month before presenting a formal, public doctoral research seminar and defending their thesis. Ph.D. students are expected to have at least one primary research article submitted prior to graduation.

Academic Progress

[Optional Catchall]

MICROBIOLOGY AND ENVIRONMENTAL TOXICOLOGY DESIGNATED EMPHASIS

Introduction

Plan 1 master's degree (M.A./M.S.) (research master's degree) and doctoral students from departments at UC Santa Cruz may complete a Designated Emphasis (DE) in Microbiology and Environmental Toxicology (METX) by completing two graduate courses in METX (from an approved list) and one quarter of METX 292, the weekly departmental seminar. In addition, students may have a Microbiology and Environmental Toxicology faculty member on their qualifying examination committee, and must have a Microbiology and Environmental Toxicology faculty member on their thesis reading committee, complete a significant scholarly written component on a microbiology and/or environmental health/toxicology related topic, and complete the requirements for a master's degree or Ph.D. in their own department.

Requirements

Doctoral and research (Plan 1) master's students completing the following requirements, in addition to the degree requirements of their home department, will receive the Designated Emphasis in Microbiology and Environmental Toxicology:

Committee Composition and Departmental Approvals

The student must have a designated graduate advisor from the faculty of the Department of Microbiology and Environmental Toxicology, who must serve on the Ph.D. dissertation/master's thesis reading committee.

Course Requirements

At least two METX courses from the following list for a minimum of 10 credits:

METX 200	Interdisciplinary Approaches in Environmental Toxicology	5
METX 201	Sources and Fates of Pollutants	5
METX 202	Cell and Molecular Toxicology	5
METX 206A	Advanced Microbiology	5
METX 210	Molecular and Cellular Basis of Bacterial Pathogenesis	5
METX 238	Pathogenesis: Molecular Mechanisms of Disease	5
METX 250	Environmental Microbiology	5

Students will enroll in at least one quarter of:

METX 292	Introductory Graduate Seminar

Writing, Research, and/or Teaching Requirements

Additional Requirements and Application Information

In addition, students must:

1. Attend METX department seminars (enroll in METX 292, 0 credits) for at least one quarter. Optionally, the student can schedule a presentation on their research for the departmental seminar series.

2. Include a significant scholarly written component (e.g., a dissertation chapter or a paper to be submitted for publication) on an appropriate topic in microbiology, environmental toxicology, and/or environmental health. The content, length, and topic requires approval by the METX faculty committee member.

Application Process:

Students who wish to pursue the Designated Emphasis in METX will submit an application form to the METX Department; email your request to metx-gradadvising@ucsc.edu. The application will include:

- Identification of a METX faculty advisor and their signature of approval, along with signature from the student's primary faculty advisor
- List of the courses that the student will take and when
- Copies of unofficial transcripts

Students should submit their application to the METX Department at: metx-gradadvising@ucsc.edu.

Completion of the DE in METX:

Upon completion of the DE in METX, students will submit a completion form. The form is to be submitted to the METX graduate program coordinator: metx-gradadvising@ucsc.edu.

Global and Community Health B.S. (p. 441)

Science Education B.S. (p. 490)

This is an extraordinary time to be involved in biomedical research. New technologies are rapidly changing our understanding of the molecular and cellular basis of life, with dramatic implications for how we treat human disease. Members of the Department of Molecular, Cell and Developmental Biology, along with affiliated faculty in the departments of Biomolecular Engineering, Chemistry and Biochemistry, Microbiology and Environmental Toxicology, and Physics, are participating in an extraordinary revolution in biomedical science. A broad spectrum of cutting-edge research tools are being employed to tackle problems in key areas that include: the structural and functional role of RNA in regulation of gene expression; chromatin biology and epigenetic control of genes; the cell biology of the cytoskeleton and the cell cycle; decisions controlling embryogenesis and organ development; and developmental neurobiology. The insights generated by this basic research enable new strategies for treatments of aging disorders, birth defects, neurological diseases, cancer, and other human ailments. The department offers a spectrum of courses that reflect the exciting new developments and directions in these fields and trains students to participate in these exciting fields.

UNDERGRADUATE PROGRAM

Advanced undergraduates, with the guidance of faculty mentors, have access to extensive departmental laboratory facilities for independent research. Many students take advantage of the numerous opportunities with local physicians, health-care providers, and biotech companies to gain experience in a real-world setting. This array of opportunities for directed independent study enables biological science majors to enhance their upper-division programs to reflect and strengthen their own interests and goals.

GRADUATE PROGRAM

The program in Molecular, Cell and Developmental (MCD) Biology (BIOL courses) leads to either the doctor of philosophy (Ph.D.) or the master of science (M.S.) and is designed to prepare students for careers in research, teaching, and biotechnology. Current research in MCD Biology focuses on such topics as the structure and function of RNA, gene expression, chromatin structure, epigenetics, cell signaling, cell division, development, nerve cell function, and stem cell biology.

BIOLOGY B.S.

Information and Policies

Introduction

Biology has entered into an exciting new era in which phenomena that once seemed insoluble mysteries—such as embryonic development, the functions of the brain, and the dynamics of ecosystems—are now yielding their secrets as the technology to study them becomes more and more sophisticated. From molecular biology, with its potential to revolutionize medicine and agriculture, to ecology, with its lessons for the sustainable management of the environment, biologists are fully engaged in meeting the challenges of the future, helping to improve the quality of human life, and to preserve habitats and biodiversity. Thus, it is no surprise that biology is at the heart of many of today's most pressing intellectual and social concerns. The Biology B.S. degree program gives students a rigorous education in modern biology, while allowing a student the opportunity to select from a wide array of upper-division elective courses offered by the departments of Molecular, Cell and Developmental Biology and Ecology and Evolutionary Biology. With proper advance planning, a student with virtually any degree can prepare a competitive application for medical school or health care professional school. Check the Health Careers webpage for more information on how you can academically prepare for a career in health care. Additional information is available at the UCSC Career Center.

Program Learning Outcomes

Students who successfully complete the Biology major will be able to:

- Demonstrate knowledge of how biochemistry, genetics, and molecular biology are used to elucidate both the function of cells and their organization into tissues.
- Recognize that biology has a basis in chemistry, physics, and mathematics.
- Describe how scientific method is used to explain natural phenomena.
- Use effective oral and written language skills to communicate scientific data and ideas.
- Understand safe laboratory practices and perform basic molecular biology techniques.
- Generate hypotheses, evaluate data, and design experiments to investigate a scientific problem.
- Present broad knowledge in biochemistry, genetics, evolutionary biology, cell biology, developmental biology, physiology, and ecology.

Academic Advising for the Program

Students should take full advantage of academic advising and should keep in frequent contact with the advisors to stay informed about late announcements of courses, changes in scheduling, and opportunities for special study. Transfer students should also consult the Transfer Information and Policy Section. For additional advice and information:

MCD Advising
389 Thimann Labs
mcdadvising@ucsc.edu

Getting Started in the Major: Frosh

Prerequisites

Due to the demanding nature of the major, students must begin their science coursework as early as possible. MATH 11A or MATH 16A or MATH 19A; CHEM 3A, CHEM 3B, CHEM 3C, and CHEM 8A; and BIOL 20A, BIOE 20B, and BIOL 20L must be completed before the major declaration deadline for students to qualify for admission to MCD biology-sponsored majors. For an overview of prerequisites and getting started in the major, please visit our biology B.S. site.

An online mathematics placement examination is required to enroll in a math course. Biological science majors are expected to take this examination and are encouraged to work in the learning modules until they place into calculus. For more information see the mathematics placement website.

Transfer Information and Policy

Transfer Admission Screening Policy

MCD Biology encourages applications from transfer students in the biological sciences. The department has a major qualification policy that limits access to the program to students who have successfully completed a subset of foundational coursework. Transfer students are held to similar criteria when being assessed for admission to UCSC as an MCD-sponsored major. See qualifying for the major as a transfer applicant for more information.

To be considered for admission as a biology B.S. major, transfer students must complete the following courses or their equivalents prior to transfer, by the end of the spring term for students planning to enter in the fall.

To be considered for admission as a proposed biology B.S. major during the winter term, transfer students must also complete a course equivalent to CHEM 8B prior to transfer.

One of these groups

	Either these courses	
CHEM 3A	General Chemistry	5

CHEM 3B	General Chemistry	3
CHEM 3C	General Chemistry	3
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5

Plus all of these courses

CHEM 8A	Organic Chemistry	5
BIOL 20A	Cell and Molecular Biology	5
BIOL 20L	Experimental Biology Laboratory	2
BIOE 20B	Development and Physiology	5

Plus, one of the following calculus courses:

MATH 11A	Calculus with Applications	5
MATH 16A	Mathematics for Life Sciences	5
MATH 19A	Calculus for Science, Engineering, and Mathematics	5

BIOL 20L is not required for students who have completed BIOL 20A and BIOE 20B at California community colleges.

In addition, the following courses are recommended prior to transfer to ensure timely graduation.

One of the following courses

MATH 11B	Calculus with Applications	5
MATH 16B	Mathematics for Life Sciences	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

Plus one of the following options

	Either this course	
STAT 5	Statistics	5
	or these courses	
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2

Plus both of the following courses

CHEM 8B	Organic Chemistry	5
CHEM 8L	Organic Chemistry Laboratory	2

Getting Started in the Major: Transfer Students

Transfer students who have met the major qualification requirements are encouraged to declare the major during their first quarter at UC Santa Cruz. Transfer students should complete the required courses in genetics (BIOL 105), biochemistry (BIOL 100), and molecular biology (BIOL 101 and BIOL 101L) by the end of their first year at UCSC since they are prerequisites for the majority of other required courses.

Major Qualification Policy and Declaration Process

Major Qualification

The Department of Molecular, Cell and Developmental Biology has a qualification policy that applies to the biology B.S., molecular, cell and developmental biology B.S., and neuroscience B.S. majors.

To qualify for any of these majors, students must pass (with a grade of C or better) the following courses or their equivalents:

One of the following courses

MATH 11A	Calculus with Applications	5
MATH 16A	Mathematics for Life Sciences	5
MATH 19A	Calculus for Science, Engineering, and Mathematics	5

Plus one of these groups

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3C	General Chemistry	3
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5

Note: This requirement may also be satisfied with prior completion of CHEM 1A, CHEM 1B, and CHEM 1C or equivalent.

Previous to July 1, 2023, the General Chemistry series, offered by the Department of Chemistry and Biochemistry, was listed in the General Catalog as Chemistry 1A, 1B and 1C, with associated laboratories Chemistry 1M and 1N. As of academic year 2023-24, this series was replaced with two distinct series: Chemistry 3A, 3B and 3C, with labs Chemistry 3BL and 3CL; or Chemistry 4A and 4B with labs Chemistry 4AL and BL. Descriptions of these two series are provided here.

And all of these courses

CHEM 8A	Organic Chemistry	5
BIOL 20A	Cell and Molecular Biology	5
BIOL 20L	Experimental Biology Laboratory	2
BIOE 20B	Development and Physiology	5

Appeal Process

Students who are not eligible to declare the major may submit an appeal to the Molecular, Cell and Developmental Biology faculty adviser. The department will notify the student and

their college of the decision within 15 days of the quarterly appeal deadline. See our appeal process for more information.

How to Declare a Major

Students should submit a petition to declare by completing the online declaration petition as soon as they complete the major qualification courses or reach their declaration deadline quarter, whichever comes first.

A student's petition will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification courses.

The Petition for Major/Minor declaration form can be accessed by going to MyUCSC and navigating to the Student Homepage and selecting the Undergraduate Student eForms tile > Petition for Major/Minor.

Letter Grade Policy

All courses that are taken to satisfy any major requirement must be taken for a letter grade.

[Optional Catchall]

Course Substitution Policy

At least half of the upper-division courses required for the major must be taken at UC Santa Cruz, not as transfer credits from another institution. If a student plans to transfer to UCSC from another institution, the student is advised to contact MCD Advising at UCSC before enrolling in upper-division courses at the student's institution or any institution other than UCSC. This advising will help students understand the limitation of transferring upper-division courses from other institutions to UCSC. For more information on transferring courses to UCSC, please consult the undergraduate website.

Once matriculated, a student must receive permission from the department to satisfy the BIOL 20A, BIOL 100, BIOL 105, BIOL 101 or BIOL 110 requirements with courses taken at other institutions. Students who wish to receive credit toward the major for these or other courses taken either at UCSC or at another institution should contact MCD Advising.

Double Majors and Major/Minor Combinations Policy

Students cannot double major/minor in:

1. Biology B.S. and any other major/minor offered by the departments of Chemistry and Biochemistry, Ecology and Evolutionary Biology, Microbiology and Environmental Toxicology or MCD Biology, including the Global and Community Health B.S. major.

Should a student choose to double major, they must qualify for and complete the disciplinary communication and comprehensive requirements for each of the majors.

Study Abroad

The UC Education Abroad Program (EAP) offers qualified students unique opportunities to broaden their educational horizons. The MCD Biology Department encourages interested students to participate. Many programs are in English-speaking countries or use English for advanced courses. Many programs offer small classes, extensive laboratories, and/or field research experience.

Students interested in study abroad need to get an early start on their basic science requirements, including chemistry, mathematics, and introductory biology and must declare their major prior to applying to go abroad. Students interested in studying abroad should visit the EAP office as soon as possible to begin planning. They should also seek advice about their EAP plan for major courses at UC Santa Cruz from MCD Advising and receive their approval.

Honors

Honors in the majors are awarded to graduating students whose academic performance demonstrates excellence at a grade point average (GPA) of 3.5 or above. Highest honors are awarded to those students whose performance demonstrates the highest level of excellence and results in a GPA of 3.8 or above.

Medical and Professional School Admission

Medical and professional school admissions requirements vary; students should verify that their coursework will satisfy the admissions requirements of the programs to which they plan to apply.

[Optional Catchall]

Requirements and Planners

Course Requirements

Lower-Division Courses

All of the following courses

BIOL 20A	Cell and Molecular Biology	5
BIOL 20L	Experimental Biology Laboratory	2
BIOE 20B	Development and Physiology	5
BIOE 20C	Ecology and Evolution	5

Plus one of these groups

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3BL	General Chemistry Lab	2
CHEM 3C	General Chemistry	3
CHEM 3CL	General Chemistry Lab	2
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4AL	Advanced General Chemistry Lab	2

CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4BL	Advanced General Chemistry Lab	2

Note: This requirement may also be satisfied with prior completion of CHEM 1A, CHEM 1B, CHEM 1C, and CHEM 1N or equivalent.

Previous to July 1, 2023, the General Chemistry series, offered by the Department of Chemistry and Biochemistry, was listed in the General Catalog as Chemistry 1A, 1B and 1C, with associated laboratories Chemistry 1M and 1N. As of academic year 2023-24, this series was replaced with two distinct series: Chemistry 3A, 3B and 3C, with labs Chemistry 3BL and 3CL; or Chemistry 4A and 4B with labs Chemistry 4AL and BL. Descriptions of these two series are provided here.

Plus all of these courses

CHEM 8A	Organic Chemistry	5
CHEM 8L	Organic Chemistry Laboratory	2
CHEM 8B	Organic Chemistry	5

Plus one of the following options:

	Either these courses	
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
	or these courses	
MATH 16A	Mathematics for Life Sciences	5
MATH 16B	Mathematics for Life Sciences	5
	or these courses	
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

Students may transition between the MATH 11 and MATH 19 series per the Calculus Series Transition Policy.

Plus one of the following options:

	Either this course	
STAT 5	Statistics	5
	or these courses	
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2

Plus all of the following courses:

PHYS 6A	Introductory Physics I	5
PHYS 6B	Introductory Physics II	5
PHYS 6C	Introductory Physics III	5
	AND	
	One of these courses	
PHYS 6L	Introductory Physics I Laboratory	1
	OR	
PHYS 6M	Introductory Physics II Laboratory	1
	OR	
PHYS 6N	Introductory Physics III Laboratory	1

Upper-Division Courses

All of the following courses:

BIOL 100	Biochemistry	5
BIOL 101	Molecular Biology	5
BIOL 105	Genetics	5
BIOE 107	Ecology	5
BIOE 109	Evolution	5

Laboratory requirement:

Students must complete two upper-division courses that include regular laboratory or fieldwork:

Choose one of the following courses:

BIOL 101L	Molecular Biology Laboratory	2
BIOL 102L	Toxic RNA Lab II	5
BIOL 107L	Synthetic Gene Regulation Lab II	5
BIOL 122K	Phage Biology Lab I	5
CHEM 160K	Biochemistry Research Laboratory	5
CHEM 161K	Chemical Biology Research Laboratory	5

Plus one additional laboratory or field course

Students choose one upper-division BIOE or BIOL course identified with an "L" (i.e. BIOL 103L, BIOE 128L, etc) or BIOL 104B, CHEM 160L or CHEM 161L.

If the additional laboratory course is BIOL 103L, BIOL 104B, BIOL 105L, BIOL 106L, BIOL 108L, BIOL 109L, BIOL 115L, BIOL 120L, BIOL 121L, BIOL 122L, BIOL 186L, CHEM 160L or CHEM 161L, it will also satisfy the disciplinary communication requirement.

Electives

Three additional upper-division electives

Students must complete three additional upper-division electives (5-7 credits each) chosen from the list below. Some of the following courses fulfill the disciplinary communication (DC) requirement.

Note: Lecture/lab combinations count as one course. Students must pass both the lecture and associated lab if the lab follows the lecture in the list below.

BIOL 110	Cell Biology	5
BIOL 111A	Immunology I	5
BIOL 111B	Immunology II	5
BIOL 112	Principles of Virology	5

BIOL 114	Cancer Cell Biology	5
BIOL 115	Eukaryotic Molecular Biology	5
BIOL 118	Principles of Human Genetics	5
BIOL 120	Developmental Biology	5
BIOL 125	Introduction to Neuroscience	5
BIOL 130	Human Physiology	5
BIOE 108	Marine Ecology	5
BIOE 112	Ornithology	5
BIOE 112L	Ornithology Field Studies	2
BIOE 114	Herpetology	5
BIOE 114L	Field Methods in Herpetological Research	2
BIOE 117	Systematic Botany of Flowering Plants	5
BIOE 117L	Systematic Botany of Flowering Plants Laboratory	2
BIOE 120	Marine Botany	5
BIOE 120L	Marine Botany Laboratory	2
BIOE 122	Invertebrate Zoology	5
BIOE 122L	Invertebrate Zoology Laboratory	2
BIOE 124	Mammalogy	5
BIOE 124L	Mammalogy Laboratory	2
BIOE 125	Ecosystems of California	5
BIOE 126	Biology of Large Marine Vertebrates	5
BIOE 127	Ichthyology	5
BIOE 127L	Ichthyology Laboratory	2
BIOE 129	Biology of Marine Mammals	5
BIOE 131	Animal Physiology	5
BIOE 133	Exercise Physiology	5
BIOE 133L	Exercise Physiology Laboratory	2
BIOE 134	Comparative Vertebrate Anatomy	5
BIOE 134L	Comparative Vertebrate Anatomy Laboratory	2
BIOE 135	Plant Physiology	5
BIOE 135L	Plant Physiology Laboratory	2
BIOE 137	Molecular Ecology	5
BIOE 137L	Molecular Ecology Laboratory	2
BIOE 139	Mathematical Modeling and Data Science in Ecology and Evolution	5
BIOE 140	Behavioral Ecology	5
BIOE 141L	Behavioral Ecology Field Course	7
BIOE 142L	Animal Behavior in the Wild (A Virtual Field Course)	5
BIOE 145	Plant Ecology	5
BIOE 147	Community Ecology	5
BIOE 149	Disease Ecology	5
BIOE 155	Freshwater Ecology	5
BIOE 157A	Evolution Field Class in Southern Africa	5
BIOE 157B	Ichthyology Field Class in Southern Africa	7
BIOE 161	Kelp Forest Ecology	5
BIOE 163	Ecology of Reefs, Mangroves, and Seagrasses	5
BIOE 163L	Ecology of Reefs, Mangroves, and Seagrasses Laboratory	2
BIOE 165	Marine Conservation Biology	5
BIOE 172	Population Genetics	5
BIOE 173	Contemporary Genetics	5
BIOE 174	Evolutionary Medicine	5
BIOE 175	Conservation Genomics	5
METX 100	Introduction to Microbiology	5
METX 133	Medical Microbiology	5
METX 135	Functional Anatomy	5
METX 135L	Functional Anatomy Lab	3
METX 140	Molecular Biology and Microbial Genetics	5
METX 150	Applied and Environmental Microbiology	5

Disciplinary Communication (DC) Requirement

The DC requirement in the biology B.S. degree can be satisfied either by completing two BIOE courses or by completing one 5-credit BIOL lab.

For the BIOE option, choose two Ecology and Evolutionary Biology courses from this group:

Note: Lecture/lab combinations count as one course.

BIOE 108	Marine Ecology	5
BIOE 114	Herpetology	5
BIOE 114L	Field Methods in Herpetological Research	2
BIOE 117	Systematic Botany of Flowering Plants	5
BIOE 120	Marine Botany	5
BIOE 120L	Marine Botany Laboratory	2
BIOE 122	Invertebrate Zoology	5
BIOE 122L	Invertebrate Zoology Laboratory	2
BIOE 127	Ichthyology	5
BIOE 127L	Ichthyology Laboratory	2
BIOE 128L	Large Marine Vertebrates Field Course	7
BIOE 129	Biology of Marine Mammals	5
BIOE 129L	Biology of Marine Mammals Laboratory	2
BIOE 137	Molecular Ecology	5
BIOE 141L	Behavioral Ecology Field Course	7
BIOE 145	Plant Ecology	5
BIOE 145L	Field Methods in Plant Ecology	5
BIOE 150L	Ecological Field Methods Laboratory	5
BIOE 151B	Ecology and Conservation in Practice Supercourse: Ecological Field Methods Laboratory	5
BIOE 153C	Disciplinary Communication for Biologists	5

BIOE 158L	Field Methods in Marine Ecology	5
BIOE 159A	Marine Ecology Field Quarter: Marine Ecology with Laboratory	5
BIOE 161L	Kelp Forest Ecology Laboratory	5
BIOE 171	Disciplinary Communication for Biologists	5
BIOE 172	Population Genetics	5
BIOE 174	Evolutionary Medicine	5

For 2-credit BIOE lab courses listed above that are taken concurrently with 5-credit lectures, both courses must be passed to receive one half of the DC requirement. BIOE 117 and BIOE 137 require concurrent enrollment in 2-credit labs, BIOE 117L and BIOE 137L, but these are not part of the DC requirement.

For the BIOL option, choose one course from this group:

BIOL 103L	Toxic RNA Lab III	5
BIOL 104B	Human Genetic Variation Laboratory II	5
BIOL 105L	Eukaryotic Genetics Laboratory	5
BIOL 106L	Eukaryotic Genetic Engineering	5
BIOL 108L	Synthetic Gene Regulation Lab III	5
BIOL 109L	Yeast Molecular Genetics Laboratory	5
BIOL 115L	Eukaryotic Molecular Biology Laboratory	5
BIOL 120L	Development Laboratory	5
BIOL 121L	Environmental Phage Biology Laboratory	5
BIOL 122L	Phage Biology Lab II	5
BIOL 129L	Neurobiology Lab	5
BIOL 186L	Undergraduate Research in MCD Biology	5
CHEM 160L	Biochemistry Research Laboratory	5
CHEM 161L	Chemical Biology Research Laboratory	5
METX 100L	Microbiology Laboratory	5

Comprehensive Requirement

All majors have a comprehensive requirement. For the Biology B.S., this requirement is satisfied via the completion of the above laboratory or field course requirement.

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Sample Biology B.S. First-Year Student Four-Year Planner

Additional first-year student sample planners

	Fall	Winter	Spring	Summer
Entering				
1st (frosh)	CHEM 3A	CHEM 3B CHEM 3BL	CHEM 3C CHEM 3CL	
	MATH 11A or MATH 19A	MATH 11B or MATH 19B	BIOL 20A	
2nd (soph)	BIOE 20B	BIOL 105	BIOL 100	
	BIOL 20L	CHEM 8B	STAT 5 or STAT 7/STAT 7L	
	CHEM 8A CHEM 8L			
3rd (junior)	BIOL 101 BIOL 101L		BIOE 107	
	BIOE 20C	PHYS 6A CHEM 6L	PHYS 6B	
4th (senior)	BIOE 109	Biology Elective #1 of 3	Biology Elective #3 of 3	
	PHYS 6C	Biology Electiv	DC Lab (unless satisfied	

		e #2 of 3	via 2 of the electives)	

* WRIT 2 should be taken in or before spring quarter of the second year.

The following general education requirements will be fulfilled by the major requirements listed in the above planner: MF, SI, and SR. In addition to the GE requirements satisfied by the above courses, a student will also need to complete courses satisfying the CC, ER, IM, TA, PE, and PR general education requirements.

Sample Biology B.S. Transfer Two-Year Planner

Additional transfer student sample planners

	Fall	**Winter**	**Spring**	**Summer**
Entering				
3rd (junior)	BIOL 105	BIOL 100	BIOL 101 BIOL 101L	
	BIOE 107	PHYS 6A PHYS 6L	PHYS 6B	
4th(senior)	PHYS 6C	BIOE 109	Biology Elective #2 of 3	
		Biology Elective #1 of 3	Biology Elective #3 of 3	
		STAT 5 or STAT 7/STAT 7L	DC Lab (unless satisfied via 2 of the electives)	

This planner assumes that a student has completed all UC Transfer Pathway courses:

- General biology with lab (full introductory sequence) BIOL 20A, BIOE 20B, BIOL 20L, BIOE 20C
- General chemistry with lab (one-year sequence) CHEM 3A, CHEM 3B CHEM 3BL, and CHEM 3C and CHEM 3CL
- Calculus for STEM majors (one-year sequence) MATH 11A and MATH 11B
- Organic chemistry (full sequence with lab) CHEM 8A CHEM 8L and CHEM 8B

GLOBAL AND COMMUNITY HEALTH B.S.

Information and Policies

Introduction

The goal of the Global and Community Health (GCH) B.S. major is to serve the needs of students who aspire to a wide range of careers in the science of medicine and direct patient care. Students in the GCH B.S. major will learn about the biological bases of health and disease and how biology interacts with social, political, economic, and environmental factors to create patterns of disease in communities and societies. GCH B.S. students choose between two concentrations in this major. The biomedical concentration prepares students whose primary focus is on the biology of disease. The public and community health concentration interweaves the biological and social determinants of health.

Students in both concentrations take a course in the foundations in global and community health along with introductory courses in biology, general chemistry, organic chemistry, calculus and statistics. In the upper division, all students take courses in biochemistry, epidemiology and environmental health. Students in the biomedical concentration also take advanced courses in genetics, molecular and cell biology, human physiology, and five quarters of Spanish, culminating in a course in medical Spanish. Students in the public and community health concentration take an introductory physiology course, an advanced course in community health, and elective courses in the biological and social contexts of health. Students in both concentrations also take courses in global and community health communication and complete a capstone course in which they participate in interdisciplinary teams to analyze a contemporary problem in global and community health.

Medical and professional school admissions requirements vary; students should verify that their coursework will satisfy the admissions requirements of the programs to which they plan to apply. Check our Health Careers webpage for more information on how you can academically prepare for a career in health care and/or public health. Additional information is available at the UCSC Career Center.

Academic Advising for the Program

Students should take full advantage of academic advising and should keep in frequent contact with the advisers to stay informed about late announcements of courses, changes in scheduling, and opportunities for special study. Transfer students should also consult the Transfer Information and Policy Section. For additional advice and information:

GCH B.S. Advising
Social Sciences 1, Suite #117
gchBSadvising@ucsc.edu

Program Learning Outcomes

Students who successfully complete the global and community health B.S. major will be able to:

- describe the biological and environmental contexts of health;
- describe the social, economic, and cultural contexts of global and community health;
- describe the institutional and policy contexts of global and community health;
- apply methods and skills for biological and population analyses to problems in global and community health; and,
- demonstrate an interdisciplinary understanding of global and community health in practice.

Getting Started in the Major: Frosh

Prerequisites

This major is highly course-intensive and/or sequential; students who intend to pursue this major must begin taking classes for the major in their first quarter at UC Santa Cruz. Students should take Foundations for Global and Community Health (GCH 1) as soon as possible. Due to the demanding nature of the major, students must begin their science coursework as early as possible. MATH 11A, MATH 16A, or MATH 19A; CHEM 3A, CHEM 3B and CHEM 3C or CHEM 4A and CHEM 4B; CHEM 8A; and, BIOL 20A, BIOE 20B, and BIOL 20L must be completed before the sixth quarter in order for students to qualify for admission to the global and community health B.S. major. For an overview of prerequisites and getting started in the major, please visit our GCH B.S. advising site.

An online mathematics placement assessment in ALEKS PPL is required to enroll in a math course. Global and community health majors are expected and encouraged to work in the learning modules in ALEKS PPL to be able to enroll in MATH 11A, MATH 16A, or MATH 19A. For more information see the mathematics placement website.

Students intending to major in the global and community health B.S., biomedical concentration should take the Spanish placement assessment, offered by the Department of Languages and Applied Linguistics, to determine the level at which they should begin the Spanish sequence.

Transfer Information and Policy

Transfer and Admission Screening Policy

The global and community health program encourages applications from transfer students. The global and community health B.S. major has a major qualification policy that limits access to the program to students who have successfully completed a subset of foundational coursework. See qualifying for the major as a transfer applicant for more information.

To be considered for admission as a proposed global and community health B.S. major, transfer students must complete the following courses or their equivalents prior to transfer, by the end of the spring term for students planning to enter in the fall with grades of C or higher in each course.

BIOE 20B	Development and Physiology	5
BIOL 20A	Cell and Molecular Biology	5
BIOL 20L	Experimental Biology Laboratory	2
CHEM 8A	Organic Chemistry	5

Plus, one of the following series of chemistry courses:

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3C	General Chemistry	3
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5

Plus, one of the following mathematics courses:

MATH 11A	Calculus with Applications	5
MATH 16A	Mathematics for Life Sciences	5
MATH 19A	Calculus for Science, Engineering, and Mathematics	5

BIOL 20L is not required for students who have completed BIOL 20A and BIOE 20B from California community colleges.

In addition, the following courses are recommended prior to transfer to ensure timely graduation.

One of the following courses

MATH 11B	Calculus with Applications	5
MATH 16B	Mathematics for Life Sciences	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

Plus the following courses

CHEM 8B	Organic Chemistry	5
CHEM 8L	Organic Chemistry Laboratory	2
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2

Please see our site on preparing to transfer as an GCH BS major for more complete information.

Prospective students are encouraged to prioritize required and recommended major preparation, and may additionally complete courses that articulate to UC Santa Cruz general education requirements as time allows.

Students who are proposed in a different major and have advanced standing when they enter UCSC require permission from the department to change into the major. Admission to the major is not guaranteed.

If, prior to enrolling at UCSC, a student takes a course articulated to STAT 5, they may petition to have the STAT7/STAT 7L requirement waived. However, once matriculated at UCSC, GCH students should take STAT7/STAT 7L.

Getting Started in the Major: Transfer Students

Transfer students who have met the major qualification requirements are encouraged to declare the major during their first quarter at UC Santa Cruz. Transfer students should complete the required course, Foundations of Global and Community Health (GCH 1) as soon as possible. In addition, students in the biomedical concentration should complete biochemistry (BIOL 100), genetics (BIOL 105), and molecular biology (BIOL 101) by the end of their first year at UCSC since they are prerequisites for the majority of other required courses. Transfer students in the biomedical concentration should also take the Spanish placement assessment upon arrival. We encourage transfer students to complete the required Spanish courses (including SPAN 5M) before the fall of their second year.

Major Qualification Policy and Declaration Process

Major Qualification

To qualify for the global and community health B.S. major, students must pass the following courses or their equivalents with a grade of C+ or better in each course. Some courses may be satisfied via exam credit.

All of the following courses:

BIOE 20B	Development and Physiology	5
BIOL 20A	Cell and Molecular Biology	5
BIOL 20L	Experimental Biology Laboratory	2
CHEM 8A	Organic Chemistry	5

Plus one of the following series of chemistry courses:

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3C	General Chemistry	3
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5

Plus one of the following courses:

MATH 11A	Calculus with Applications	5
MATH 16A	Mathematics for Life Sciences	5
MATH 19A	Calculus for Science, Engineering, and Mathematics	5

Appeal Process

Students who are not eligible to declare the major may submit an appeal to the global and community health B.S. faculty advisor. The department will notify the student and their college of the outcome of the appeal within 15 working days of the quarterly appeal deadline.

See our appeal process for more information.

How to Declare a Major

Students should submit a petition to declare by completing the online declaration petition as soon as they complete the major qualification courses or reach their declaration deadline quarter, whichever comes first.

Students petitioning when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh), will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification courses.

Each major/minor advising office has a process for declaring. To initiate the process to declare, please complete the online declaration petition located on the GCH website. For assistance, please contact GCH BS advising at gchBSadvising@ucsc.edu.

Letter Grade Policy

All courses that are taken to satisfy any major requirement must be taken for a letter grade.

[Optional Catchall]

Course Substitution Policy

At least half of the upper-division courses required for the major must be taken at UC Santa Cruz, not as transfer credits from another institution. If a student plans to transfer to UCSC from another institution, the student is advised to contact GCH B.S. Advising at UCSC before enrolling in upper-division courses at the student's institution or any institution other than UCSC. This advising will help students understand the limitation of transferring upper-division courses from other institutions to UCSC. For more information on transferring courses to UCSC, please consult the undergraduate website.

Once matriculated, a student must receive prior permission from the department to satisfy the BIOL 20A, BIOL 100, BIOL 105, BIOL 101, or BIOL 110 requirements with courses taken at other institutions. Students who wish to receive credit toward the major for these or other courses taken either at UCSC or at another institution should contact GCH B.S. advising.

Double Majors and Major/Minor Combinations Policy

Students cannot double major/minor in the Global and Community Health B.S. and either the Global and Community Health B.A. or any other major/minor offered by the departments of Chemistry and Biochemistry, Ecology and Evolutionary Biology, Microbiology and Environmental Toxicology or MCD Biology.

Should a student choose to double major, they must qualify for and complete the Disciplinary Communication and comprehensive requirements for each of the majors.

Study Abroad

The UC Education Abroad Program (EAP) offers qualified students unique opportunities to broaden their educational horizons. We encourage interested students to participate. Many programs are in English-speaking countries or use English for advanced courses. Many programs offer small classes, extensive laboratories, and/or field research experience.

Students interested in study abroad need to get an early start on their basic science requirements, including chemistry, mathematics, and introductory biology and must declare their major prior to applying to go abroad. Students interested in studying abroad should visit the EAP office as soon as possible to begin planning. They should also seek advice about their EAP plan for major courses at UC Santa Cruz from GCH B.S. Advising and receive their approval.

Honors

Honors in the majors are awarded to graduating students whose academic performance demonstrates excellence at a grade point average (GPA) of 3.5 or above. Highest honors are awarded to those students whose performance demonstrates the highest level of excellence and results in a GPA of 3.8 or above.

Medical and Professional School Admission

Medical and professional school admissions requirements vary; students should verify that their coursework will satisfy the admissions requirements of the programs to which they plan to apply.

[Optional Catchall]

Biomedical Concentration

Course Requirements

Students complete the Biomedical Concentration by satisfying the following requirements. Some courses may be satisfied via exam credit.

Lower-Division Courses

All of the following courses:

BIOE 20B	Development and Physiology	5
BIOL 20A	Cell and Molecular Biology	5
BIOL 20L	Experimental Biology Laboratory	2
CHEM 8A	Organic Chemistry	5
CHEM 8L	Organic Chemistry Laboratory	2
CHEM 8B	Organic Chemistry	5
CHEM 8M	Organic Chemistry Laboratory	2
GCH 1	Foundations for Global and Community Health	5
PHYS 6A	Introductory Physics I	5
PHYS 6B	Introductory Physics II	5
PHYS 6C	Introductory Physics III	5
PHYS 6L	Introductory Physics I Laboratory	1
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2

BIOL 20L is not required for students who have completed BIOL 20A and BIOE 20B at California community colleges.

Note: CHEM 109 is also recommended for pre-med students.

Plus one of the following series of courses:

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3BL	General Chemistry Lab	2
CHEM 3C	General Chemistry	3
CHEM 3CL	General Chemistry Lab	2
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4AL	Advanced General Chemistry Lab	2
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4BL	Advanced General Chemistry Lab	2

Plus one of the following options:

	Either these courses	
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
	or these courses	
MATH 16A	Mathematics for Life Sciences	5
MATH 16B	Mathematics for Life Sciences	5
	or these courses	
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

Students may transition between the MATH 11 and 19 series per the Calculus Series Transition Policy.

Language Requirement

SPAN 1-SPAN 4 or the equivalent and one quarter of Spanish for health-care workers (SPAN 5M).

SPAN 1	First-Year Spanish	5
SPAN 2	First-Year Spanish	5
SPAN 3	First-Year Spanish	5
SPAN 4	Second-Year Spanish	5
SPAN 5M	Medical Spanish	5

Upper-Division Courses

All of the following courses:

BIOL 100	Biochemistry	5
BIOL 101	Molecular Biology	5
BIOL 105	Genetics	5
BIOL 110	Cell Biology	5
BIOL 113	Principles of Epidemiology	5
BIOL 130	Human Physiology	5
BIOL 130L	Human Physiology Laboratory	2
GCH 190	Global and Community Health Task Force	5
GCH 195	Global and Community Health Communication	2
METX 115	Environmental Health Science	5

Internship Requirement:

Students must participate in a community health-care service activity approved by the health sciences internship coordinator. Credit may be earned over multiple quarters. This requirement satisfies the Comprehensive Requirement.

BIOL 189	Health Sciences Internship	3

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. The DC requirement in global and community health B.S. degree is satisfied by completing the following courses:

GCH 190	Global and Community Health Task Force	5
GCH 195	Global and Community Health Communication	2

Comprehensive Requirement

All majors have a comprehensive requirement. For the global and community health B.S., this requirement can be satisfied by receiving a passing grade in the Health Sciences Internship, BIOL 189.

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Sample Global and Community health B.S., Biomedical Concentration, First-Year Student Four-Year Planner

Additional first-year student sample planners.

	Fall	Winter	Spring	Summer
Entering				College 1A

			Summer Edge (optional)
1st (frosh)	CHEM 3A	CHEM 3B CHEM 3BL	CHEM 3C CHEM 3CL
	MATH 11A	MATH 11B	BIOL 20A
		WRIT 1/WRIT 1E (if needed)	
2nd (soph)	BIOE 20B	BIOL 20L	BIOL 100
	GCH 1	CHEM 8B CHEM 8M	STAT 7 STAT 7L
	CHEM 8A CHEM 8L		METX 115
	WRIT 2*		
3rd (junior)	BIOL 105	BIOL 101	BIOL 110
	SPAN 1	PHYS 6B	SPAN 3
	PHYS 6A PHYS 6L	SPAN 2	BIOL 113
4th (senior)	BIOL 130 BIOL 130L	GCH 195	BIOL 189
	SPAN 4	SPAN 5M	GCH 190
	PHYS 6C		

* WRIT 2 should be taken in or before spring quarter of the second year.

The following general education requirements will be fulfilled by the major requirements listed in the above planner: MF, SI, SR, CC and PR general education requirements. In addition to the GE requirements satisfied by the above courses, a student will also need to complete courses satisfying the ER, IM, TA and PE general education requirements.

Sample Global and Community Health B.S., Biomedical Concentration, Transfer Two-Year Planner

Additional transfer student sample planners.

	Fall	**Winter**	**Spring**	**Summer**
Entering				College 1A Summer Edge (optional)
3rd (junior)	BIOL 105	BIOL 100	BIOL 101	
	GCH 1	PHYS 6B	METX 115	
	PHYS 6A PHYS 6L	SPAN 1STAT 7 STAT 7L	SPAN 2PHYS 6C	
4th (senior)	BIOL 110	BIOL 130 BIOL 130L	SPAN 5M	
		SPAN 4	BIOL 189	
	SPAN 3	GCH 190	GCH 195BIOL 113	

This planner assumes that a student has completed all UC Transfer Pathway courses:

- General biology with lab: BIOL 20A, BIOE 20B, BIOL 20L.
- General chemistry with lab (one-year sequence) CHEM 3A, CHEM 3B CHEM 3BL and CHEM 3C CHEM 3CL.
- Calculus for STEM majors (one-year sequence) MATH 11A and MATH 11B.

- Organic chemistry (full sequence with lab) CHEM 8A CHEM 8L and CHEM 8B CHEM 8M.

Initial Spanish course placement is based on the Spanish placement exam. Students who lack prior experience with the Spanish language should consider taking Spanish courses prior to transferring to UCSC.

Public and Community Health Concentration

Course Requirements

Lower-Division Courses

Core Courses

BIOE 20B	Development and Physiology	5
BIOL 20A	Cell and Molecular Biology	5
BIOL 20L	Experimental Biology Laboratory	2

CHEM 8M	Organic Chemistry Laboratory	2
GCH 1	Foundations for Global and Community Health	5
METX 41	Physiology of Disease	5
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2

Plus one of the following options:

	Either these courses	
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
	or these courses	
MATH 16A	Mathematics for Life Sciences	5
MATH 16B	Mathematics for Life Sciences	5
	or these courses	
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

BIOL 20L is not required for students who have completed BIOL 20A and BIOE 20B at California community colleges.

Note: CHEM 109 is also recommended for pre-med students.

Plus one of the following series of courses:

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3BL	General Chemistry Lab	2
CHEM 3C	General Chemistry	3
CHEM 3CL	General Chemistry Lab	2
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4AL	Advanced General Chemistry Lab	2
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4BL	Advanced General Chemistry Lab	2

Lower-Division Breadth Requirement (Choose One)

ANTH 2	Introduction to Cultural Anthropology	5
BIOL 80A	Female Physiology and Gynecology	5
BIOL 80J	Biology of Emerging and Pandemic Diseases	5
BIOL 88	Studies in Medicine: Its Art, History, Science, and Philosophy	5
CLNI 30	(H)ACER Undergraduate Community Internship	2
CMMU 10	Introduction to Community Activism	5
CSE 80A	Universal Access: Disability, Technology, and Society	5
ENVS 25	Environmental Politics, Economics and Justice	5
ENVS 80F	Introduction to Agroecology and Sustainable Food Systems	5
FMST 10	Feminisms of/and the Global South	5
FMST 30	Feminism and Science	5
FMST 31	Disability Studies	5
FMST 41	Trans Gender Bodies	5
HIS 81	Science in the Colonial World	5
LALS 55	AIDS Across the Americas	5
LALS 57	Drugs, Addiction, and Recovery in the Americas	5
LIT 80K	Topics in Medical Humanities	5
POLI 17	U.S. and the World Economy	5
POLI 20	American Politics	5
POLI 61	Politics of Social Policy	5
PSYC 1	Introduction to Psychology	5
SOCY 1	Introduction to Sociology	5
SOCY 10	Issues and Problems in American Society	5
SOCY 15	World Society	5
SPAN 3	First-Year Spanish	5
SPAN 4	Second-Year Spanish	5
SPAN 5M	Medical Spanish	5

Upper-Division Courses

All of the following courses:

BIOL 100	Biochemistry	5
BIOL 113	Principles of Epidemiology	5
GCH 190	Global and Community Health Task Force	5
GCH 195	Global and Community Health Communication	2
METX 115	Environmental Health Science	5

One of the following courses:

CMMU 165	Community Analysis for Global Health	5
METX 108	Introduction to Research Methods in Global and Community Health	5

Internship Requirement:

BIOL 189	Health Sciences Internship	3

STEM Elective (Choose One):

BIOE 118	Plants and Society: the Biology of Food, Shelter, and Medicine	5
BIOL 101	Molecular Biology	5
BIOL 105	Genetics	5
BIOL 117	Global Health and Neglected Diseases	5
CHEM 169	Chemistry and Biology of Drug Design and Discovery	5
CHEM 171	Chemical Biology	5
METX 100	Introduction to Microbiology	5
METX 102	Cell and Molecular Toxicology	5
METX 133	Medical Microbiology	5
METX 135	Functional Anatomy	5
METX 135L	Functional Anatomy Lab	3

Non-STEM Electives (Choose two):

ANTH 110E	Anthropology of Global Environmental Change	5
ANTH 110F	Evolution of Human Diet	5
ANTH 110M	Cultures of Mental Health	5
ANTH 110T	Motherhood in American Culture	5
ANTH 110Y	Feeding California	5
ANTH 111	Human Ecology	5
ANTH 112	Life Cycles	5
ANTH 129	Beyond Borders: Other Globalizations and Histories of Interconnection	5
ANTH 134	Medical Anthropology: An Introduction	5
ANTH 136	The Biology of Everyday Life	5
ANTH 144	Anthropology of Poverty and Welfare	5
ANTH 146	Anthropology and the Environment	5
ANTH 148	Gender and Global Development	5
ANTH 160	Reproductive and Population Politics	5
ANTH 161	The Anthropology of Food	5
ANTH 161S	Anthropology of Food, Abroad	6
ANTH 162	Anthropology of Displaced Persons	5
BIOL 188	A Life in Medicine	3
CMMU 156	Politics of Food and Health	5

CMMU 161	Gender Health and Justice	5
CMMU 162	Community Gardens and Social Change	5
CMMU 163	Health Care Inequalities	5
CMMU 164	Health Justice in Conflict	5
DANM 136	Mapmaking for Environmental Activism	5
FMST 124	Technology, Science, and Race Across the Americas	5
FMST 125	Race, Sex, and Technology	5
GCH 123	Migration as a Social Determinant of Health	5
GCH 186	Global Health Politics	5
HIS 101D	World History of Science	5
HIS 101F	Global Environmental History	5
HIS 139C	Queer Pasts: A Radical Telling of LGBTQ History in the United States	5
HIS 151	Keywords in the History of Science and Medicine	5
HIS 151A	Medicine and the Body in the Colonial World	5
HIS 151B	Drugs in World History	5
HIS 177A	Slaves, Soldiers, and Scientists: History of the Tropics	5
LALS 175	Migration, Gender, and Health	5
LALS 194X	Extractivism and Socio-Environmental Conflicts in the Americas	5
LGST 108	Gender, Sexuality, and Law	5
LGST 137	International Environmental Law and Policy	5
LGST 173	Disability, Law, & Politics	5
POLI 102	Doing Political Research	5
POLI 120B	Society and Democracy in American Political Development	5
POLI 120C	State and Capitalism in American Political Development	5
POLI 121	Racism & Justice in America	5
POLI 160B	International Law	5
POLI 166	Politics of Migration	5
POLI 175	Human Rights	5
POLI 182	The Power to Punish	5
POLI 187	Decolonial Global Health: A View from the Middle East and Africa	5

POLI 189	Pandemics, Politics, and Global and Community Health	5
POLI 190S	Policies and Practices of Health Systems Strengthening	5
SOCY 121	Sociology of Health and Medicine	5
SOCY 121G	Genomics and Society	5
SOCY 127P	Sociology of Drugs, Botanicals and Pharmaceuticals	5
SOCY 128C	Social History of Democracy, Anarchism, and Indigenism	5
SOCY 128I	Race and Law	5
SOCY 128J	The World Jury on Trial	5
SOCY 128M	International Law and Global Justice	5
SOCY 132	Sociology of Science and Technology	5
SOCY 135	Healing Justice	5
SOCY 153	Sociology of Emotions	5
SOCY 159	Pregnancy and Birth	5
SOCY 161	Postpartum	5

Students may petition for substitution of elective courses.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. The DC requirement in the global and community health B.S. degree is satisfied by completing the following courses:

GCH 190	Global and Community Health Task Force	5
GCH 195	Global and Community Health Communication	2

Comprehensive Requirement

All majors have a comprehensive requirement. For the global and community health B.S., this requirement can be satisfied by receiving a passing grade in the Health Sciences Internship, BIOL 189.

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Sample Global and Community Health B.S., Public and Community Health Concentration, First-Year Student, Four-Year Planner

Additional first-year student sample planners.

	Fall	Winter	Spring	Summer
Entering				College 1A Summer Edge (optional)
1st (frosh)	CHEM 3A	CHEM 3B CHEM 3BL	CHEM 3C CHEM 3CL	
	MATH 11A	MATH 11B	BIOL 20A	
	College 1	WRIT 1/WRIT 1E (if needed)

	STAT 7 STAT 7L		GCH 195	
4th (senior)		Non-STEM Elective 2	BIOL 189	
	GCH 190			

* WRIT 2 should be taken in or before spring quarter of the second year.

The following general education requirements will be fulfilled by the major requirements listed in the above planner: MF, SI, SR, CC and PR general education requirements. In addition to the GE requirements satisfied by the above courses, a student will also need to complete courses satisfying the ER, IM, TA and PE general education requirements.

Sample Global and Community Health B.S., Public and Community Health Concentration, Transfer Two-Year Planner

Additional transfer student sample planners.

	Fall	Winter	Spring	Summer
Entering				KRSG 1T Summer Edge (optional)
3rd (junior)	BIOL 100	METX 41	METX 115	
	GCH 1	STAT 7 STAT 7L	NON-STEM Elective 2	
		NON-STEM Elective 1	BIOL 113	
4th (senior)				
	STEM Elective	CMMU 165/GCH 165	BIOL 189	
	GCH 190	GCH 195		

This planner assumes that a student has completed all UC Transfer Pathway courses:

- General biology with lab: BIOL 20A, BIOE 20B, BIOL 20L
- General chemistry with lab (one-year sequence) CHEM 3A, CHEM 3B CHEM 3BL and CHEM 3C CHEM 3CL
- Calculus for STEM majors (one-year sequence) MATH 11A and MATH 11B
- Organic chemistry (full sequence with lab) CHEM 8A CHEM 8L and CHEM 8B CHEM 8M

MOLECULAR, CELL, AND DEVELOPMENTAL BIOLOGY B.S.

Information and Policies

Introduction

The molecular, cell and developmental (MCD) biology major is designed to prepare students for rigorous graduate programs in biomedical research, medical and other healthcare professional programs, for careers in the biotechnology industry. This major is more structured than the general biology major and requires that students pay careful attention to the prerequisites required for upper-division biology courses. With proper advance planning, a student with virtually any degree can prepare a competitive application for medical school or healthcare professional school. Check our Health Careers webpage for more information on how you can academically prepare for a career in healthcare. Additional information is available at the UC Santa Cruz Career Center.

Program Learning Outcomes

Students who successfully complete the MCD major will be able to:

- demonstrate knowledge of how biochemistry, genetics, and molecular biology are used to elucidate both the function of cells and their organization into tissues;
- recognize that biology has a basis in chemistry, physics, and mathematics;
- describe how scientific method is used to explain natural phenomena;
- use effective oral and written language skills to communicate scientific data and ideas;
- understand safe laboratory practices and perform basic molecular biology techniques;
- generate hypotheses, evaluate data, and design experiments to investigate a scientific problem; and
- present advanced knowledge in the specialized fields of molecular and cell biology.

Academic Advising for the Program

Students should take full advantage of academic advising and should keep in frequent contact with the advisers to stay informed about late announcements of courses, changes in scheduling, and opportunities for special study. Transfer students should also consult the Transfer Information and Policy Section. For additional advice and information:

MCD Advising
389 Thimann Labs
mcdadvising@ucsc.edu

Getting Started in the Major: Frosh

Prerequisites

Due to the demanding nature of the major, students must begin their science coursework as early as possible. MATH 11A or MATH 16A or MATH 19A; CHEM 3A, CHEM 3B, CHEM 3C, and CHEM 8A; and BIOL 20A, BIOE 20B, and BIOL 20L must be completed before the sixth quarter in order for students to qualify for admission to MCD biology-sponsored majors, including the biology B.S., human biology B.S., molecular, cell and developmental biology B.S., and neuroscience B.S. majors. For an overview of prerequisites and getting started in the major, please visit our MCD Biology B.S. website.

An online mathematics placement examination is required to enroll in a math course. Biological science majors are expected to take this examination and are encouraged to work in the learning modules until they place into calculus. For more information see the mathematics placement website.

Transfer Information and Policy

Transfer Admission Screening Policy

MCD Biology encourages applications from transfer students in the biological sciences. The department has a major qualification policy that limits access to the program to students who have successfully completed a subset of foundational coursework. Transfer students are held to similar criteria when being assessed for admission to UC Santa Cruz as an MCD-sponsored major. See qualifying for the major as a transfer applicant for more information.

To be considered for admission as a proposed molecular, cell and developmental biology B.S. major, transfer students must complete the following courses or their equivalents prior to transfer, by the end of the spring term for students planning to enter in the fall.

To be considered for admission as a proposed molecular, cell and developmental biology B.S. major during the winter term, transfer students must also complete a course equivalent to CHEM 8B prior to transfer.

One of these options

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3C	General Chemistry	3
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5

Plus these courses

CHEM 8A	Organic Chemistry	5
BIOL 20A	Cell and Molecular Biology	5
BIOL 20L	Experimental Biology Laboratory	2
BIOE 20B	Development and Physiology	5

Plus, one of the following calculus courses:

MATH 11A	Calculus with Applications	5
MATH 16A	Mathematics for Life Sciences	5
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 11A	Calculus with Applications	5

BIOL 20L is not required for students who have completed BIOL 20A and BIOE 20B at California community colleges.

In addition, the following courses are recommended prior to transfer to ensure timely graduation.

One of the following courses

MATH 11B	Calculus with Applications	5
MATH 16B	Mathematics for Life Sciences	5

Plus one of the following options

	Either this course	
STAT 5	Statistics	5
	or these courses	
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2

Plus both of the following courses

CHEM 8B	Organic Chemistry	5
CHEM 8L	Organic Chemistry Laboratory	2

Getting Started in the Major: Transfer Students

Transfer students who have met the major qualification requirements are encouraged to declare the major during their first quarter at UC Santa Cruz. Transfer students should complete the required courses in genetics (BIOL 105), biochemistry (BIOL 100), and molecular biology (BIOL 101 and BIOL 101L) by the end of their first year at UCSC since they are prerequisites for the majority of other required courses.

Major Qualification Policy and Declaration Process

Major Qualification

The Department of Molecular, Cell and Developmental Biology has a qualification policy that applies to the biology B.S., molecular, cell and developmental biology B.S., and neuroscience B.S. majors.

To qualify for any of these majors, students must pass (with a grade of C or better) the following courses or their equivalents:

One of the following courses

MATH 11A	Calculus with Applications	5
MATH 16A	Mathematics for Life Sciences	5
MATH 19A	Calculus for Science, Engineering, and Mathematics	5

Plus one of the following options

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3C	General Chemistry	3
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5

Note: This requirement may also be satisfied with prior completion of CHEM 1A, CHEM 1B, and CHEM 1C or equivalent.

Previous to July 1, 2023, the General Chemistry series, offered by the Department of Chemistry and Biochemistry, was listed in the General Catalog as Chemistry 1A, 1B and 1C, with associated laboratories Chemistry 1M and 1N. As of academic year 2023-24, this series was replaced with two distinct series: Chemistry 3A, 3B and 3C, with labs Chemistry 3BL and 3CL; or Chemistry 4A and 4B with labs Chemistry 4AL and BL. Descriptions of these two series are provided here.

Plus these courses

CHEM 8A	Organic Chemistry	5
BIOL 20A	Cell and Molecular Biology	5
BIOL 20L	Experimental Biology Laboratory	2
BIOE 20B	Development and Physiology	5

Appeal Process

Students who are not eligible to declare the major may submit an appeal to the Molecular, Cell and Developmental Biology faculty adviser. The department will notify the student and their college of the outcome of the appeal within 15 working days of the quarterly appeal deadline. See our appeal process for more information.

How to Declare a Major

Petition to declare your major as soon as you have met qualification requirements and/or reach your declaration deadline quarter, whichever comes first.

A student's petition to declare the major will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification courses.

The Petition for Major/Minor declaration form can be accessed by going to MyUCSC and navigating to the Student Homepage and selecting the Undergraduate Student eForms tile > Petition for Major/Minor.

Letter Grade Policy

All courses that are taken to satisfy any major requirement must be taken for a letter grade.

[Optional Catchall]

Course Substitution Policy

At least half of the upper-division courses required for the major must be taken at UC Santa Cruz, not as transfer credits from another institution. If a student plans to transfer to UCSC from another institution, the student is advised to contact MCD Advising at UCSC before enrolling in upper-division courses at the student's institution or any institution other than UCSC. This advising will help students understand the limitation of transferring upper-division courses from other institutions to UCSC. For more information on transferring courses to UCSC, please consult the undergraduate website.

Once matriculated, a student must receive permission from the department to satisfy the BIOL 20A, BIOL 100, BIOL 105, BIOL 101 or BIOL 110 requirements with courses taken at other institutions. Students who wish to receive credit toward the major for these or other courses taken either at UCSC or at another institution should contact MCD Advising.

Double Majors and Major/Minor Combinations Policy

Students cannot double major/minor in MCD Biology B.S. and any other major/minor offered by the departments of Chemistry and Biochemistry, Ecology and Evolutionary Biology, Microbiology and Environmental Toxicology or MCD Biology, including the Global and Community Health B.S. major

Should a student choose to double major, they must qualify for and complete the disciplinary communication and comprehensive requirements for each of the majors.

Study Abroad

The UC Education Abroad Program (EAP) offers qualified students unique opportunities to broaden their educational horizons. The MCD Biology Department encourages interested students to participate. Many programs are in English-speaking countries or use English for advanced courses. Many programs offer small classes, extensive laboratories, and/or field research experience.

Students interested in study abroad need to get an early start on their basic science requirements, including chemistry, mathematics, and introductory biology and must declare their major prior to applying to go abroad. Students interested in

studying abroad should visit the EAP office as soon as possible to begin planning. They should also seek advice about their EAP plan for major courses at UC Santa Cruz from MCD Advising and receive their approval.

Honors

Honors in the majors are awarded to graduating students whose academic performance demonstrates excellence at a grade point average (GPA) of 3.5 or above. Highest honors are awarded to those students whose performance demonstrates the highest level of excellence and results in a GPA of 3.8 or above.

Medical and Professional School Admission

Medical and professional school admissions requirements vary; students should verify that their coursework will satisfy the admissions requirements of the programs to which they plan to apply.

[Optional Catchall]

Requirements and Planners

Course Requirements

Complete the following requirements. Some courses may be satisfied via exam credit.

Lower-Division Courses

All of the following courses:

BIOL 20A	Cell and Molecular Biology	5
BIOL 20L	Experimental Biology Laboratory	2
BIOE 20B	Development and Physiology	5
BIOE 20C	Ecology and Evolution	5
CHEM 8A	Organic Chemistry	5
CHEM 8B	Organic Chemistry	5
CHEM 8L	Organic Chemistry Laboratory	2

Plus one of the following options:

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3BL	General Chemistry Lab	2
CHEM 3C	General Chemistry	3
CHEM 3CL	General Chemistry Lab	2
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4AL	Advanced General Chemistry Lab	2
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4BL	Advanced General Chemistry Lab	2

Note: This requirement may also be satisfied with prior completion of CHEM 1A, CHEM 1B, CHEM 1C, and CHEM 1N, or equivalent.

Previous to July 1, 2023, the General Chemistry series, offered by the Department of Chemistry and Biochemistry, was listed in the General Catalog as Chemistry 1A, 1B and 1C, with associated laboratories Chemistry 1M and 1N. As of academic year 2023-24, this series was replaced with two distinct series: Chemistry 3A, 3B and 3C, with labs Chemistry 3BL and 3CL; or Chemistry 4A and 4B with labs Chemistry 4AL and BL. Descriptions of these two series are provided here.

Plus one of the following options:

	Either these courses	
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
	or these courses	
MATH 16A	Mathematics for Life Sciences	5
MATH 16B	Mathematics for Life Sciences	5
	or these courses	
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

Students may transition between the MATH 11 and MATH 19 series per the Calculus Series Transition Policy.

Plus one of the following options

	Either this course	
STAT 5	Statistics	5
	or these courses	
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2

Plus all of the following courses:

PHYS 6A	Introductory Physics I	5
PHYS 6B	Introductory Physics II	5
PHYS 6C	Introductory Physics III	5
	AND	
	Either one of these courses	
PHYS 6L	Introductory Physics I Laboratory	1
	OR	
PHYS 6M	Introductory Physics II Laboratory	1
	OR	
PHYS 6N	Introductory Physics III Laboratory	1

Upper-Division Courses

All of the following courses:

BIOL 100	Biochemistry	5
BIOL 101	Molecular Biology	5
BIOL 105	Genetics	5
BIOL 110	Cell Biology	5
BIOL 120	Developmental Biology	5

Plus one of the following courses:

BIOL 104A	Human Genetic Variation Laboratory I	5
BIOL 104L	Introduction to Bioinformatics Lab	2
BME 110	Computational Biology Tools	5

Plus one of the following courses:

BIOL 101L	Molecular Biology Laboratory	2
BIOL 102L	Toxic RNA Lab II	5
BIOL 107L	Synthetic Gene Regulation Lab II	5
BIOL 122K	Phage Biology Lab I	5
CHEM 160K	Biochemistry Research Laboratory	5
CHEM 161K	Chemical Biology Research Laboratory	5

Electives

At least two elective courses from the following list, at least one of which must be a BIOL course.

BIOL 111A	Immunology I	5
BIOL 111B	Immunology II	5
BIOL 112	Principles of Virology	5
BIOL 114	Cancer Cell Biology	5
BIOL 115	Eukaryotic Molecular Biology	5
BIOL 117	Global Health and Neglected Diseases	5
BIOL 118	Principles of Human Genetics	5
BIOL 124	Optical Imaging for Biological Research	3
BIOL 125	Introduction to Neuroscience	5
BIOL 127	Mechanisms of Neurodegenerative Disease	5
BIOL 130	Human Physiology	5
BIOE 109	Evolution	5
BME 130	Genomes	5
BME 160	Research Programming in the Life Sciences	6
BME 178	Stem Cell Biology	5
PHYS 180	Biophysics	5

One of the following laboratory courses:

BIOL 100L	Biochemistry Laboratory	5
BIOL 105L	Eukaryotic Genetics Laboratory	5
BIOL 103L	Toxic RNA Lab III	5
BIOL 104B	Human Genetic Variation Laboratory II	5
BIOL 106L	Eukaryotic Genetic Engineering	5
BIOL 108L	Synthetic Gene Regulation Lab III	5
BIOL 109L	Yeast Molecular Genetics Laboratory	5
BIOL 115L	Eukaryotic Molecular Biology Laboratory	5
BIOL 120L	Development Laboratory	5
BIOL 121L	Environmental Phage Biology Laboratory	5
BIOL 122L	Phage Biology Lab II	5
BIOL 129L	Neurobiology Lab	5
BIOL 186L	Undergraduate Research in MCD Biology	5
CHEM 160L	Biochemistry Research Laboratory	5
CHEM 161L	Chemical Biology Research Laboratory	5

This course will satisfy the disciplinary communication (DC) and comprehensive requirement.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. The DC requirement in molecular, cell, and developmental biology is satisfied by completing one of the following courses:

BIOL 100L	Biochemistry Laboratory	5
BIOL 103L	Toxic RNA Lab III	5
BIOL 104B	Human Genetic Variation Laboratory II	5
BIOL 105L	Eukaryotic Genetics Laboratory	5
BIOL 106L	Eukaryotic Genetic Engineering	5
BIOL 108L	Synthetic Gene Regulation Lab III	5
BIOL 109L	Yeast Molecular Genetics Laboratory	5
BIOL 115L	Eukaryotic Molecular Biology Laboratory	5
BIOL 120L	Development Laboratory	5
BIOL 121L	Environmental Phage Biology Laboratory	5
BIOL 122L	Phage Biology Lab II	5
BIOL 129L	Neurobiology Lab	5
BIOL 186L	Undergraduate Research in MCD Biology	5
CHEM 160L	Biochemistry Research Laboratory	5
CHEM 161L	Chemical Biology Research Laboratory	5

Comprehensive Requirement

All majors have a comprehensive requirement. For the MCD Biology B.S., this requirement can be satisfied by receiving a passing grade in an independent research laboratory:

Choose one of the following courses:

BIOL 100L	Biochemistry Laboratory	5
BIOL 103L	Toxic RNA Lab III	5
BIOL 104B	Human Genetic Variation Laboratory II	5
BIOL 105L	Eukaryotic Genetics Laboratory	5
BIOL 106L	Eukaryotic Genetic Engineering	5
BIOL 108L	Synthetic Gene Regulation Lab III	5
BIOL 109L	Yeast Molecular Genetics Laboratory	5
BIOL 115L	Eukaryotic Molecular Biology Laboratory	5
BIOL 120L	Development Laboratory	5
BIOL 122L	Phage Biology Lab II	5
BIOL 121L	Environmental Phage Biology Laboratory	5
BIOL 129L	Neurobiology Lab	5
BIOL 186L	Undergraduate Research in MCD Biology	5
CHEM 160L	Biochemistry Research Laboratory	5
CHEM 161L	Chemical Biology Research Laboratory	5

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Sample First-Year Four-Year Planner

Additional first-year sample planners

	Fall	Winter	Spring	Summer
Entering				
1st (frosh)	CHEM 3A	CHEM 3B CHEM 3BL	CHEM 3C CHEM 3CL	
	MATH 11A or 19A	MATH 11B or 19B	BIOL 20A	
2nd (soph)	BIOE 20B	PHYS 6A PHYS 6L	BIOL 100	
	BIOL 20L	CHEM 8B	PHYS 6B	
	CHEM 8A CHEM 8L			
3rd (jr)	BIOL 101 BIOL 101L	BIOL 105	BIOL 110	
	PHYS 6C	BIOE 20C	STAT S 5 or STAT 7/STAT 7L	
4th (sr)	MCD Elective #1	BIOL 120	MCD Elective #2	
	BIOL 104L	UD LAB/DC		

* WRIT 2 should be taken in or before spring quarter of the second year.

The following general education requirements will be fulfilled by the major requirements listed in the above planner: MF, SI, and SR. In addition to the general education requirements satisfied by the above courses, a student will also need to complete courses satisfying the CC, ER, IM, TA, PE, and PR general education requirements.

Sample Transfer Two-Year Planner

Additional transfer student sample planners

	Fall	Winter	Spring	Summer
Entering				
3rd (jr)	BIOL 105	BIOL 100	BIOL 101 BIOL 101L	
	STAT 5 or STAT 7/STAT 7L	PHYS 6A PHYS 6L	PHYS 6B	
4th (sr)	BIOL 110	UD LAB/DC	MCD Elective #1	

PHYS 6C	BIOL 120	MCD Elective #2

This planner assumes that a student has completed all UC Transfer Pathway courses:

- General biology with lab (full introductory sequence) BIOL 20A, BIOE 20B, BIOL 20L, BIOE 20C
- General chemistry with lab (one-year sequence) CHEM 3A, CHEM 3B CHEM 3BL and CHEM 3C CHEM 3CL
- Calculus for STEM majors (one-year sequence) MATH 11A and MATH 11B
- Organic chemistry (full sequence with lab) CHEM 8A CHEM 8L and CHEM 8B

NEUROSCIENCE B.S.

Information and Policies

Introduction

Neuroscience, the study of the nervous system and behavior of animals, is a frontier area in biology, touching psychology on the one hand and computer science on the other. The neuroscience major provides students with rigorous preparation for graduate studies and research in the field of neuroscience. With proper advance planning, a student with virtually any degree can prepare a competitive application for medical school or health care professional school. Check our Health Careers webpage for more information on how you can academically prepare for a career in healthcare. Additional information is available at the UC Santa Cruz Career Center.

Program Learning Outcomes

Students who successfully complete the Neuroscience major will be able to:

- Demonstrate knowledge of how biochemistry, genetics, and molecular biology are used to elucidate both the function of cells and their organization into tissues.
- Recognize that biology has a basis in chemistry, physics, and mathematics.
- Describe how scientific method is used to explain natural phenomena.
- Use effective oral and written language skills to communicate scientific data and ideas.
- Understand safe laboratory practices and perform basic molecular biology techniques.
- Generate hypotheses, evaluate data, and design experiments to investigate a scientific problem.
- Present advanced knowledge in the specialized field of neuroscience.

Academic Advising for the Program

Students should take full advantage of academic advising and should keep in frequent contact with the advisers to stay informed about late announcements of courses, changes in scheduling, and opportunities for special study. Transfer students should also consult the Transfer Information and Policy Section. For additional advice and information:

MCD Advising
389 Thimann Labs
mcdadvising@ucsc.edu

Getting Started in the Major: Frosh

Prerequisites

Due to the demanding nature of the major, students must begin their science coursework as early as possible. MATH 11A or MATH 16A or MATH 19A; CHEM 3A, CHEM 3B, CHEM 3C, and CHEM 8A; and BIOL 20A, BIOE 20B, and BIOL 20L must be completed before the major declaration deadline in order for students to qualify for admission to MCD Biology-sponsored majors. For an overview of prerequisites and getting started in the major, please visit our neuroscience B.S. site.

An online mathematics placement examination is required to enroll in a math course. Biological science majors are expected to take this examination and are encouraged to work in the learning modules until they place into calculus. For more information see the mathematics placement website.

Transfer Information and Policy

Transfer Admission Screening Policy

MCD Biology encourages applications from transfer students in the biological sciences. The department has a major qualification policy that limits access to the program to students who have successfully completed a subset of foundational coursework. Transfer students are held to similar criteria when being assessed for admission to UC Santa Cruz as an MCD-sponsored major. See qualifying for the major as a transfer applicant for more information.

To be considered for admission as a proposed neuroscience B.S. major, transfer students must complete the following courses or their equivalents prior to transfer by the end of the spring term for students planning to enter in the fall.

To be considered for admission as a proposed neuroscience B.S. major during the winter term, transfer students must also complete a course equivalent to CHEM 8B prior to transfer.

One of these groups of courses

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3C	General Chemistry	3
	or these courses	

CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5

Plus all the following courses

CHEM 8A	Organic Chemistry	5
BIOL 20A	Cell and Molecular Biology	5
BIOL 20L	Experimental Biology Laboratory	2
BIOE 20B	Development and Physiology	5

Plus one of the following calculus courses:

MATH 11A	Calculus with Applications	5
MATH 16A	Mathematics for Life Sciences	5
MATH 19A	Calculus for Science, Engineering, and Mathematics	5

BIOL 20L is not required for students who have completed BIOL 20A and BIOE 20B at California community colleges.

In addition, the following courses are recommended prior to transfer to ensure timely graduation.

	Either these courses	
MATH 11B	Calculus with Applications	5
	OR	
MATH 16B	Mathematics for Life Sciences	5
	OR	
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
	AND	
PHYS 6A	Introductory Physics I	5
PHYS 6B	Introductory Physics II	5
PHYS 6C	Introductory Physics III	5
PHYS 6N	Introductory Physics III Laboratory	1
	AND	
STAT 5	Statistics	5
	or these courses	
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2
	AND	
CHEM 8B	Organic Chemistry	5
CHEM 8L	Organic Chemistry Laboratory	2

Getting Started in the Major: Transfer Students

Transfer students who have met the major qualification requirements are encouraged to declare the major immediately during their first quarter at UC Santa Cruz. Transfer students should complete the required courses in genetics (BIOL 105), biochemistry (BIOL 100), and molecular biology (BIOL 101 and BIOL 101L) by the end of their first year at UCSC since they are prerequisites for the majority of other required courses.

Major Qualification Policy and Declaration Process

Major Qualification

The Molecular Cell and Developmental Biology Department has a qualification policy that applies to the biology B.S., molecular, cell and developmental biology B.S., and neuroscience B.S. majors.

To qualify for any of these majors, students must pass (with a grade of C or better) the following courses or their equivalents:

One of the following courses:

MATH 11A	Calculus with Applications	5
MATH 16A	Mathematics for Life Sciences	5
MATH 19A	Calculus for Science, Engineering, and Mathematics	5

Plus one of the following options:

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3C	General Chemistry	3
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5

Note: This requirement may also be satisfied with prior completion of CHEM 1A, CHEM 1B, and CHEM 1C or equivalent.

Previous to July 1, 2023, the General Chemistry series, offered by the Department of Chemistry and Biochemistry, was listed in the General Catalog as Chemistry 1A, 1B and 1C, with associated laboratories Chemistry 1M and 1N. As of academic year 2023-24, this series was replaced with two distinct series: Chemistry 3A, 3B and 3C, with labs Chemistry 3BL and 3CL; or Chemistry 4A and 4B with labs Chemistry 4AL and BL. Descriptions of these two series are provided here.

Plus all of the following courses:

CHEM 8A	Organic Chemistry	5
BIOL 20A	Cell and Molecular Biology	5
BIOL 20L	Experimental Biology Laboratory	2
BIOE 20B	Development and Physiology	5

Appeal Process

Students who are not eligible to declare the major may submit an appeal to the MCD Biology faculty adviser. The department will notify the student and their college of the outcome of the appeal within 15 working days of the quarterly appeal deadline. See our appeal process for more information.

How to Declare a Major

Students should submit a petition to declare by completing the online declaration petition as soon as they complete the major qualification courses or reach their declaration deadline quarter, whichever comes first.

A student's petition will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification courses.

The Petition for Major/Minor declaration form can be accessed by going to MyUCSC and navigating to the Student Homepage and selecting the Undergraduate Student eForms tile > Petition for Major/Minor.

Letter Grade Policy

All courses that are taken to satisfy any major requirement must be taken for a letter grade.

[Optional Catchall]

Course Substitution Policy

At least half of the upper-division courses required for the major must be taken at UC Santa Cruz, not as transfer credits from another institution. If a student plans to transfer to UCSC from another institution, the student is advised to contact MCD Advising at UCSC before enrolling in upper-division courses at the student's institution or any institution other than UCSC. This advising will help students understand the limitation of transferring upper-division courses from other institutions to UCSC. For more information on transferring courses to UCSC, please consult the undergraduate website.

Once matriculated, a student must receive permission from the department to satisfy the BIOL 20A, BIOL 100, BIOL 105, BIOL 101 or BIOL 110 requirements with courses taken at other institutions. Students who wish to receive credit toward the major for these or other courses taken either at UCSC or at another institution should contact MCD Advising.

Double Majors and Major/Minor Combinations Policy

Students cannot double major/minor in Neuroscience B.S. and any other major/minor offered by the departments of Chemistry and Biochemistry, Ecology and Evolutionary Biology, Microbiology and Environmental Toxicology or MCD Biology, including the Global and Community Health B.S. major

Should a student choose to double major, they must qualify for and complete the disciplinary communication and comprehensive requirements for each of the majors.

Study Abroad

The UC Education Abroad Program (EAP) offers qualified students unique opportunities to broaden their educational horizons. The MCD Biology Department encourages interested students to participate. Many programs are in English-speaking countries or use English for advanced courses. Many programs offer small classes, extensive laboratories, and/or field research experience.

Students interested in study abroad need to get an early start on their basic science requirements, including chemistry, mathematics, and introductory biology and must declare their major prior to applying to go abroad. Students interested in studying abroad should visit the EAP office as soon as possible to begin planning. They should also seek advice about their EAP plan for major courses at UC Santa Cruz from MCD Advising.

Honors

Honors in the majors are awarded to graduating students whose academic performance demonstrates excellence at a grade point average (GPA) of 3.5 or above. Highest honors are awarded to those students whose performance demonstrates the highest level of excellence and results in a GPA of 3.8 or above.

Medical and Professional School Admission

Medical and professional school admissions requirements vary; students should verify that their coursework will satisfy the admissions requirements of the programs to which they plan to apply.

[Optional Catchall]

Requirements and Planners

Course Requirements

Complete the following requirements. Some courses may be satisfied via exam credit.

Lower-Division Courses

All of the following courses

BIOL 20A	Cell and Molecular Biology	5
BIOL 20L	Experimental Biology Laboratory	2
BIOE 20B	Development and Physiology	5

Plus one of the following options:

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3BL	General Chemistry Lab	2
CHEM 3C	General Chemistry	3
CHEM 3CL	General Chemistry Lab	2
	or these courses	

CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4AL	Advanced General Chemistry Lab	2
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4BL	Advanced General Chemistry Lab	2

Note: This requirement may also be satisfied with prior completion of CHEM 1A, CHEM 1B, CHEM 1C, and CHEM 1N or equivalent.

Previous to July 1, 2023, the General Chemistry series, offered by the Department of Chemistry and Biochemistry, was listed in the General Catalog as Chemistry 1A, 1B and 1C, with associated laboratories Chemistry 1M and 1N. As of academic year 2023-24, this series was replaced with two distinct series: Chemistry 3A, 3B and 3C, with labs Chemistry 3BL and 3CL; or Chemistry 4A and 4B with labs Chemistry 4AL and BL. Descriptions of these two series are provided here.

Plus all of the following courses

CHEM 8A	Organic Chemistry	5
CHEM 8L	Organic Chemistry Laboratory	2
CHEM 8B	Organic Chemistry	5

Plus one of the following options:

	Either these courses	
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
	or these courses	
MATH 16A	Mathematics for Life Sciences	5
MATH 16B	Mathematics for Life Sciences	5
	or these courses	
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

Students may transition between the MATH 11 and MATH 19 series per the Calculus Series Transition Policy.

Plus one of the following options:

	Either this course	
STAT 5	Statistics	5
	or these courses	
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2

Plus all of the following courses:

PHYS 6A	Introductory Physics I	5
PHYS 6B	Introductory Physics II	5
PHYS 6C	Introductory Physics III	5
PHYS 6N	Introductory Physics III Laboratory	1

Upper-Division Courses

All of the following courses:

BIOL 100	Biochemistry	5
BIOL 101	Molecular Biology	5
BIOL 105	Genetics	5
BIOL 125	Introduction to Neuroscience	5
BIOL 126	Neural Plasticity and Cognitive Neuroscience	5
BIOL 128	Developmental Neurobiology	5

Plus one of the following courses:

BIOL 101L	Molecular Biology Laboratory	2
BIOL 102L	Toxic RNA Lab II	5
BIOL 107L	Synthetic Gene Regulation Lab II	5
BIOL 122K	Phage Biology Lab I	5
CHEM 160K	Biochemistry Research Laboratory	5
CHEM 161K	Chemical Biology Research Laboratory	5

Plus one of the following courses:

BIOL 129A	Advanced Topics in System Neuroscience	5
BIOL 129B	Advanced Topics in Developmental Neurobiology	5
BIOL 129C	Advanced Topics in Nervous System Disorders	5

Plus the following laboratory course:

BIOL 129L	Neurobiology Lab	5

This course satisfies the disciplinary communication (DC) and comprehensive requirements.

Electives

One of the following electives:

NOTE: Lecture/lab combinations count as one course.

BIOE 131	Animal Physiology	5
BIOE 131L	Animal Physiology Laboratory	2
BIOL 110	Cell Biology	5
BIOL 114	Cancer Cell Biology	5
BIOL 115	Eukaryotic Molecular Biology	5
BIOL 118	Principles of Human Genetics	5
BME 110	Computational Biology Tools	5
BME 130	Genomes	5
BME 160	Research Programming in the Life Sciences	6
PHYS 180	Biophysics	5
PSYC 121	Perception	5

PSYC 123	Cognitive Neuroscience	5

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. The DC requirement in neuroscience is satisfied by completing the following course:

BIOL 129L	Neurobiology Lab	5

Comprehensive Requirement

All majors require a comprehensive requirement. For the neuroscience B.S., this requirement can be satisfied by receiving a passing grade in the following laboratory course.

BIOL 129L	Neurobiology Lab	5

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Sample First-Year Student Four-Year Planner

Additional first-year student sample planners

	Fall	Winter	Spring	Summer
Entering				
1st (frosh)	CHEM 3A	CHEM 3B CHEM 3BL	CHEM 3C CHEM 3CL	
	MATH 11A or MATH 19A	MATH 11B or MATH 19B	BIOL 20A	
2nd (soph)	BIOE 20B	CHEM 8B	BIOL 105	
	BIOL 20L	PHYS 6A	PHYS 6B	
	CHEM 8A CHEM 8L	WRIT 2/ME		
3rd (junior)	BIOL 100	BIOL 125	BIOL 101 BIOL 101L	
	PHYS 6C PHYS 6N	STAT 5 or STAT 7 STAT 7L	BIOL 126	
4th (senior)	Neuro Elective #1 of 1	BIOL 128	BIOL 129A, BIOL 129B or BIOL 129C	
		BIOL 129L		

* WRIT 2 should be taken in or before spring quarter of the second year.

The following general education requirements will be fulfilled by the major requirements listed in the above planner: MF, SI, and SR. In addition to the GE requirements satisfied by the above courses, a student will also need to complete courses satisfying the CC, ER, IM, TA, PE, and PR general education requirements.

Sample Transfer Two-Year Planner

Additional transfer student sample planners

	Fall	Winter	Spring	Summer
Entering				
3rd (junior)	BIOL 100	BIOL 105	BIOL 125	
	PHYS 6A	PHYS 6B	PHYS 6C PHYS 6N	

4th (senior)	BIOL 101 BIOL 101L	BIOL 126	BIOL 128
	Neuro Elective	BIOL 129L	BIOL 129A, BIOL 129B or BIOL 129C
	STATS 5 or STAT 7 STAT 7L		

This planner assumes that a student has completed all UC Transfer Pathway courses:

- General biology with lab (full introductory sequence) BIOL 20A, BIOE 20B, BIOL 20L, BIOE 20C
- General chemistry with lab (one-year sequence) CHEM 3A, CHEM 3B CHEM 3BL and CHEM 3C CHEM 3CL
- Calculus for STEM majors (one-year sequence) MATH 11A and MATH 11B
- Organic chemistry (full sequence with lab) CHEM 8A CHEM 8L and CHEM 8B

BIOLOGY MINOR

The biology minor is designed to incorporate elements of both the ecology and evolutionary biology discipline and the molecular, cell and developmental biology discipline.

Course Requirements

Complete the following requirements. Courses must be taken for a letter grade. Some courses may be satisfied via exam credit.

Lower-Division Courses

All of the following courses

BIOL 20A	Cell and Molecular Biology	5
BIOL 20L	Experimental Biology Laboratory	2
BIOE 20B	Development and Physiology	5
CHEM 8A	Organic Chemistry	5
CHEM 8B	Organic Chemistry	5

Plus the following courses:

CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3C	General Chemistry	3

Note: This requirement may also be satisfied with prior completion of CHEM 1A, CHEM 1B, and CHEM 1C or equivalent.

Previous to July 1, 2023, the General Chemistry series, offered by the Department of Chemistry and Biochemistry, was listed in the General Catalog as Chemistry 1A, 1B and 1C, with associated laboratories Chemistry 1M and 1N. As of academic year 2023-24, this series was replaced with two distinct series: Chemistry 3A, 3B and 3C, with labs Chemistry 3BL and 3CL; or Chemistry 4A and 4B with labs Chemistry 4AL and BL. Descriptions of these two series are provided here.

Upper-Division Courses

All of the following courses:

BIOL 100	Biochemistry	5
BIOL 105	Genetics	5
BIOE 107	Ecology	5
BIOE 109	Evolution	5

Upper-Division Elective

Students complete one upper-division elective of five credits or more chosen from BIOE 100-181 or BIOL 100-181.

MOLECULAR, CELL AND DEVELOPMENTAL BIOLOGY M.S.

Introduction

Students apply to the master's degree program through the same portal as for the Ph.D. degree program. While the M.S. is research intensive, master's students do not do research rotations; they must identify a research adviser prior to the training period. Students are required to participate in laboratory research meetings and departmental seminar series every quarter.

Requirements

Course Requirements

Complete the graduate core course:

BIOL 200A	Critical Analysis of Scientific Literature	5

BIOL 200A to be completed in the first year.

And the following courses:

BIOL 288	Pedagogy in STEM	2
BIOL 289	Practice of Science	5

Enroll in the following seminar series each quarter:

BIOL 291	Molecular, Cellular, and Developmental Biology Seminar	2
BIOL 292	MCD Seminar	

Approved Graduate Electives

(M.S. students must complete two electives)

Note: Lecture/lab combinations count as one course. For BME 163 and BME 263, only one of these courses will be counted toward fulfillment of the electives.

BIOL 200E	Experimental Design	3
BIOL 200F	Logic and Approaches to Scientific Discovery	5
BIOL 201	RNA Processing	5
BIOL 205	Epigenetics	5
BIOL 206	Introduction to Stem Cell Biology	5
BIOL 215	Applied Statistics for Molecular, Cell, and Developmental Biology	5
BIOL 217	Influence of Environment and Experience on Brain Development	5
BIOL 218	CRISPR/Cas Technologies	5
BIOL 220	STEM Outreach	2
BIOL 226	Advanced Molecular Neuroscience	5
BIOL 228	Developmental Neurobiology	5
BIOL 230	Grant Writing in the Biomedical Sciences	5
BIOL 247	Stem Cell Research: Scientific, Ethical, Social, and Legal Issues	2
BIOL 290	Career Planning	2
BME 110	Computational Biology Tools	5
BME 130	Genomes	5
BME 160	Research Programming in the Life Sciences	6
BME 163	Applied Visualization and Analysis of Scientific Data	5
BME 263	Applied Visualization and Analysis of Scientific Data	5
BME 205	Bioinformatics Models and Algorithms	5
BME 229	Protein and Cell Engineering	5
BME 230A	Introduction to Computational Genomics and Systems Biology	5
BME 230B	Advanced Computational Genomics and Systems Biology	5
BME 237	Applied RNA Bioinformatics	5
BME 272	Precision Medicine	5
BME 273	Stem Cell Epi/Genomics	3
BME 275	Entrepreneurship in Biotechnology	5
BME 278	Stem Cell Biology	5
CHEM 200A	Advanced Biochemistry: Biophysical Methods	5
CHEM 200B	Advanced Biochemistry: Macromolecular Structure and Function	5
CHEM 200C	Advanced Biochemistry: Enzyme Mechanisms and Kinetics	5
CHEM 230	Grant Writing in Biomedical Research	5
CHEM 271	Chemical Biology	5
ECE 236	Optics and Microscopy	5
ECE 237	Image Processing and Reconstruction	5
METX 202	Cell and Molecular Toxicology	5
METX 206A	Advanced Microbiology	5
METX 210	Molecular and Cellular Basis of Bacterial Pathogenesis	5
METX 238	Pathogenesis: Molecular Mechanisms of Disease PDP, Training in teaching offered by the Institute for Scientist and Engineer Educators (ISEE)	5
STAT 108	Linear Regression	5
STAT 205B	Intermediate Classical Inference	5
STAT 208	Linear Statistical Models	5
STAT 266A	Data Visualization and Statistical Programming in R	3

Students who have had no or very little statistics should audit or take STAT 7 (5 credits) and perhaps also STAT 7L (2 credits) to learn the basics, before taking one of the graduate level courses.

Students may only count one of the following courses toward their graduate electives: BIOL 220, BIOL 230, BIOL 247, BIOL 290, BME 275, CHEM 230, and PDP (Professional Development Program).

Students may count either ECE 236 or ECE 237, but not both, toward their advanced graduate electives.

Other Requirements

Write a master's thesis based on original research (a scholarly dissertation of the literature and progress on research project; a peer-reviewed publication is not required for graduation).

Present a thesis defense in a departmental seminar. The student will present their research project in a public venue such as a departmental seminar or one of the research clubs (RNA club, chromatin club, neuro club, etc.).

[Optional Catchall]

Applying for Graduation

MOLECULAR, CELL AND DEVELOPMENTAL BIOLOGY PH.D.

Introduction

The program in Molecular, Cell, and Developmental (MCD) biology (courses BIOL) leads to the doctor of philosophy (Ph.D.) and is designed to prepare students for careers in research, teaching, and biotechnology. Current research in MCD biology focuses on such topics as the structure and function of RNA, gene expression, chromatin structure, epigenetics, cell signaling, cell division, development, nerve cell function, and stem cell biology.

Advancement to Candidacy

Course Requirements

Ph.D. students complete the graduate core courses, BIOL 200A, BIOL 200E, and BIOL 200F, along with BIOL 288, and BIOL 289 (ethics) in the first year, and BIOL 215 and BIOL 230 in their second year. Students are required to participate in laboratory research meetings and departmental seminar series (BIOL 291/BIOL 292) every quarter. First-year rotating Ph.D. students complete three six-week laboratory rotations. Students choose their rotation laboratories in consultation with the Graduate Advisory Committee. The laboratory rotations give students a chance to learn about the diverse fields and methods of inquiry and to interact with members of the department. At the end of each rotation, students present a short talk or present a poster to the department on their rotation project. At the end of winter quarter, students consult with rotation faculty to identify a permanent thesis laboratory.

Ph.D. students must take two approved advanced graduate electives, in addition to the core courses.

Complete the graduate core courses:

BIOL 200A	Critical Analysis of Scientific Literature	5
BIOL 200E	Experimental Design	3
BIOL 200F	Logic and Approaches to Scientific Discovery	5

Plus the following courses:

BIOL 215	Applied Statistics for Molecular, Cell, and Developmental Biology	5
BIOL 288	Pedagogy in STEM	2
BIOL 289	Practice of Science	5
BIOL 230	Grant Writing in the Biomedical Sciences	5

Enroll in the following seminar series each quarter:

BIOL 291	Molecular, Cellular, and Developmental Biology Seminar	2
BIOL 292	MCD Seminar	

Approved Graduate Electives

(Ph.D. students complete two)

Note: Lecture and lab combinations count as a single course. For BME 163 and BME 263, only one of these courses will be counted toward fulfillment of the electives.

BIOL 201	RNA Processing	5
BIOL 205	Epigenetics	5
BIOL 206	Introduction to Stem Cell Biology	5
BIOL 217	Influence of Environment and Experience on Brain Development	5
BIOL 218	CRISPR/Cas Technologies	5
BIOL 220	STEM Outreach	2
BIOL 226	Advanced Molecular Neuroscience	5
BIOL 228	Developmental Neurobiology	5
BIOL 230	Grant Writing in the Biomedical Sciences	5
BIOL 247	Stem Cell Research: Scientific, Ethical, Social, and Legal Issues	2
BIOL 290	Career Planning	2
BME 110	Computational Biology Tools	5
BME 130	Genomes	5
BME 160	Research Programming in the Life Sciences	6
BME 163	Applied Visualization and Analysis of Scientific Data	5
BME 205	Bioinformatics Models and Algorithms	5
BME 229	Protein and Cell Engineering	5
BME 230A	Introduction to Computational Genomics and Systems Biology	5
BME 230B	Advanced Computational Genomics and Systems Biology	5
BME 237	Applied RNA Bioinformatics	5
BME 263	Applied Visualization and Analysis of Scientific Data	5
BME 272	Precision Medicine	5
BME 273	Stem Cell Epi/Genomics	3
BME 275	Entrepreneurship in Biotechnology	5
BME 278	Stem Cell Biology	5
CHEM 200A	Advanced Biochemistry: Biophysical Methods	5
CHEM 200B	Advanced Biochemistry: Macromolecular Structure and Function	5
CHEM 200C	Advanced Biochemistry: Enzyme Mechanisms and Kinetics	5
CHEM 230	Grant Writing in Biomedical Research	5
CHEM 271	Chemical Biology	5
ECE 236	Optics and Microscopy	5
ECE 237	Image Processing and Reconstruction	5
METX 202	Cell and Molecular Toxicology	5
METX 206A	Advanced Microbiology	5
METX 210	Molecular and Cellular Basis of Bacterial Pathogenesis	5

METX 238	Pathogenesis: Molecular Mechanisms of Disease PDP, Training in teaching offered by the Institute for Scientist and Engineer Educators (ISEE)	5
STAT 108	Linear Regression	5
STAT 205B	Intermediate Classical Inference	5
STAT 208	Linear Statistical Models	5
STAT 266A	Data Visualization and Statistical Programming in R	3

Students who have had no or very little statistics should audit or take STAT 7 (5 credits) and perhaps also STAT 7L (2 credits) to learn the basics, before taking one of the graduate level courses.

Students may only count one of the following courses toward their graduate electives: BIOL 220, BIOL 230, BIOL 247, BIOL 290, BME 275, CHEM 230, and PDP (Professional Development Program).

Students may count either ECE 236 or ECE 237, but not both, toward their advanced graduate electives.

BIOL 215, CHEM 230, and BIOL 230 may only count as electives to Ph.D. students who matriculated prior to fall 2020.

Foreign Language Requirements

Teaching Requirement

Complete two quarters of service as a teaching assistant.

Pre-Qualifying Requirements

Qualifying Examination

Complete an oral and written qualifying examination.

Second-year Ph.D. students are required to submit a written proposal on their thesis research. The oral component of the qualifying examination, taken in spring quarter of the second year, is an oral examination on the proposal. The examining committee is comprised of three internal reviewers and one external reviewer.

Post-Qualifying Requirements

Advancement to Candidacy

Advancement to candidacy occurs by the end of the third year (nine quarters). Students must give a full research seminar (~30 minute talk followed by questions) in an MCD seminar slot**.** This should be attended and evaluated by the Thesis Advisory Committee. A passing evaluation requires demonstration of a good understanding of their project and background knowledge, and a clear presentation of their questions or hypotheses, tests of those, and progress to date. A passing evaluation leads to advancement to candidacy.

Students have an additional three years (nine quarters) to complete their degree within normative time.

Optional Catchall

Dissertation

Dissertation

Meet yearly, starting in the second year of study, with the student's thesis committee.

Complete thesis research resulting in peer-reviewed publications and a dissertation on original and significant work.

Once the qualifying examination is passed and prior to their department seminar, a student, with their faculty adviser, selects a thesis committee to help guide the student’s thesis research. This committee monitors the student’s progress and ultimately approves the final draft of the student’s dissertation. The student must meet with the thesis committee at least once a year after passing the qualifying examination.

Dissertation Defense

Present the thesis defense in a departmental seminar.

Academic Progress

Applying for Graduation

[Optional Catchall]

Ocean Sciences

A312 Earth and Marine Sciences Building
(831) 459-4730
https://oceansci.ucsc.edu/

PROGRAMS OFFERED

Ocean Sciences M.S. Plan 1 and Plan 2 (p. 465)

Ocean Sciences Ph.D. (p. 467)

OTHER PROGRAMS OF INTEREST

Environmental Sciences B.S. (p. 335)

Ecology and Evolution B.S. (p. 360)

Marine Biology B.S. (p. 369)

Earth Sciences B.S. (p. 318)

The Ocean Sciences Department includes faculty, students, and staff involved in oceanography and other marine sciences and offers undergraduate and graduate courses in these disciplines. Through faculty sponsors, students have access to a wide variety of research facilities and equipment, including

on-campus analytical chemistry, geology, and molecular biology laboratories for marine research; computing and imaging facilities; an onshore marine laboratory two miles from campus (Long Marine Laboratory), with aquariums and holding tanks that are supplied with running sea water; and a unique field station on Año Nuevo Island Reserve (19 miles north of Santa Cruz), especially suited for studies on pinnipeds and marine birds. The department supports collaborative studies utilizing the innovative technologies of the nearby Monterey Bay Aquarium Research Institute (MBARI), the Naval Postgraduate School, Stanford University's Hopkins Marine Station, California State University (CSU) Moss Landing Marine Laboratory (MLML), and other facilities. Students may also work at other University of California facilities, including the Bodega Marine Laboratories and Scripps Institute of Oceanography.

In addition to research and instructional activities along the California coast, interests of the core faculty and their students include biological, chemical, geological, and physical oceanography; sediment, marine, organic, and trace metal biogeochemistry; marine plankton, phytoplankton ecology and physiology, paleoceanography, aquatic microbial ecology, ecological modeling, and remote sensing (satellite oceanography); numeric modeling of coastal and basin-scale dynamics; top predator ecology, and impacts of climate change and disturbance; and midwater ecology, climatology, among others.

Ocean Sciences Department affiliated faculty in other departments represent a deep resource of research interests and methodologies including those pertaining to coral reef and kelp forest ecology, plate tectonics and continental margins, marine mammal behavior and physiology, and natural products from marine organisms. Student research projects have included participation in major scientific expeditions to various marine environments ranging from Polar Regions to the tropics.

UNDERGRADUATE PROGRAM

While offering a range of undergraduate courses, the Ocean Sciences Department presently only confers graduate degrees (Master of Science—M.S. or Doctor of Philosophy—Ph.D.) However, the undergraduate major in environmental science is sponsored by the Ocean Sciences and Earth and Planetary Sciences Departments. The environmental sciences major includes required and elective courses in ocean sciences. In addition, the undergraduate major in marine biology, sponsored by the Biological Sciences departments, includes required and elective courses in ocean sciences, and includes an ocean sciences concentration in Earth sciences for undergraduates. Students interested in ocean sciences should major in a discipline such as environmental science, biology, marine biology, chemistry, Earth sciences, physics, mathematics, or applied mathematics and take ocean sciences-related electives. Students with a bachelor's degree in one of these disciplines or equivalent coursework may apply directly for admission to the graduate program through the Division of Graduate Studies.

GRADUATE PROGRAM

Our graduate education mission is to train the next generation of talented and diverse ocean scientists. Through core training in oceanography and focused advanced training in biology, chemistry, Earth sciences, physics, and data science we prepare students to tackle the pressing issues facing society today. Ocean sciences is a highly interdisciplinary field that requires diversity in thinking and experience. We welcome and provide support for students with diverse backgrounds such as URM, LGBTQIA+, and first-generation college students. From faculty training to peer mentoring and other programmatic elements we are dedicated to fostering the success of all students in our program.

The Ocean Sciences Department offers both master of science and doctorate degree programs. The graduate programs in ocean sciences are designed to prepare students for careers in research, teaching, and other environmentally related endeavors. The graduate programs encourage collaborative and interdisciplinary approaches, and are designed to support and promote diversity, equity and inclusion. There are professional development events and opportunities such as an annual career panel, several designated emphasis degrees that can be combined with the ocean sciences graduate degrees, and training in innovative and inclusive teaching. There is an advising structure that provides support from a main advisor, thesis committee members, an advisory committee, and peers. A student-run group, Communicating Oceanographic Research Effectively (CORE), offers community building activities.

The fundamental requirement for admission to the program is substantial evidence of superior scholarship and aptitude for original research. Preparation for admission to the graduate program in ocean sciences should comprise an undergraduate degree in the discipline of one of the program specialty areas (e.g., biology or marine biology, geology or Earth sciences, chemistry, or physical science) or an equivalent background. If a student does not have a degree in one of these areas, the student must demonstrate that they have taken the classes necessary to do their research.

The prerequisites for entering either the master's or the Ph.D. programs are a minimum of two quarters or two semesters in each of the following: a calculus series; chemistry, biology, and physics. In addition, one course in each of the following is required: earth sciences or geological principles; and statistics or biostatistics.

Details regarding admission, graduate standing, financial aid, examinations, and the requirements for the master of science and doctor of philosophy degrees are available from the Division of Graduate Studies.

OCEAN SCIENCES M.S.

Introduction

The Ocean Sciences Department offers a master of science (M.S.) degree in ocean sciences. The ocean sciences M.S. degree can be attained through plan I: thesis (coursework and

thesis, minimum 42 credits), or plan II: examination (coursework and comprehensive examination, minimum 40 credits). The degree combines core courses and electives to provide depth and breadth in the ocean sciences. Graduates from the program are exceptionally prepared to take research or management positions in organizations concerned with the marine environment, to become educators, or to enter doctoral programs in ocean sciences or related fields. The thesis M.S. degree is preparation for research careers.

Whereas the doctoral program has an oceanographic orientation, the ocean sciences master's program is broader and has traditionally attracted many students in marine biology and ecology. Students are encouraged to select a course of study that draws on the expertise of the core ocean sciences faculty and any of the affiliated faculty in other departments. Customized programs of study that combine related disciplines are supported in the master's program.

Requirements

Course Requirements

To introduce students to the breadth and depth of the field of ocean sciences, students will be required to complete the following:

Plan I: M.S. (thesis) requirements:

OCEA 200 (Physical Oceanography) and any two of the remaining three core courses. Students are expected to complete all three of these courses in the first year of the program. Students are also encouraged to take the fourth core course, in which case it can count as an elective.

The core ocean sciences courses are expected to be completed in the first year

OCEA 200	Physical Oceanography	5
OCEA 220	Chemical Oceanography	5
OCEA 230	Biological Oceanography	5
OCEA 280	Marine Geology	5

Two graduate-level or upper-division electives

A minimum of two graduate-level or upper-division elective courses to provide depth in the chosen area of emphasis, one of which must be a 5-credit graduate-level course in statistics/data analysis, such as OCEA 260 (Introductory Data Analysis in the Ocean and Earth Sciences) or OCEA 267 (Applied Environmental Time Series Analysis), chosen in consultation with the student’s adviser and the department’s graduate advising committee. A maximum of one course may be a graduate-level seminar (e.g. OCEA 290).

Minimum of three courses in independent studies

A minimum of three courses in independent studies under the direction of an adviser, is required. Each quarter a student should take 15 credits of classes. Students beyond their first year will usually take 10 or 15 credits of Independent Studies each quarter.

OCEA 297	Independent Study

The following course is taken prior to or concurrent with being a teaching assistant

Recommended for fall quarter of the first year; generally offered during the fall quarter each year.

OCEA 296	Teaching in Ocean Sciences	2

Attendance in the following course is required each quarter of enrollment.

OCEA 292	Seminar

Plan II: M.S. (examination) requirements:

Completion of the four core ocean sciences courses is required.

The four core ocean sciences courses are required to be completed.

OCEA 200	Physical Oceanography	5
OCEA 220	Chemical Oceanography	5
OCEA 230	Biological Oceanography	5
OCEA 280	Marine Geology	5

Four graduate-level or upper-division elective courses

A minimum of four graduate-level or upper-division elective courses is required to provide depth in the chosen area of emphasis or supporting disciplines, one of which must be a 5-credit graduate-level course in statistics/data analysis, such as OCEA 260 (Introductory Data Analysis in the Ocean and Earth Sciences) or OCEA 267 (Applied Environmental Time Series Analysis). These courses are selected in consultation with the student's adviser and the department’s graduate advising committee (Plan 1 and II). A maximum of one course may be a graduate-level seminar (OCEA 290), and at least two courses must be graduate or upper-division undergraduate lecture courses.

Attendance in the following course is required each quarter of enrollment.

OCEA 292	Seminar

Other Requirements for Plan I: M.S. (thesis)

Plan I M.S. students must complete one TAship during their course of study, an M.S. thesis, and must make a public presentation of their thesis before the deadline in which all degree requirements are to be completed within the term of receiving the degree. In addition, the M.S. thesis satisfying all format and content requirements must be submitted to the Graduate Division before the deadline in which all degree requirements are to be completed within the term of receiving the degree.

Other Requirements for Plan II: M.S. (examination)

Plan II M.S. students must take and pass a comprehensive exam that covers the material from the core courses.

Optional Catchall

Applying for Graduation

Once requirements for the degree have been met, including approval from their academic adviser and the Ocean Sciences

Department, M.S. students may apply for the degree by the deadline for the quarter in which they would like to receive their degree. Deadlines are published in the Academic and Administrative Calendar each year.

OCEAN SCIENCES PH.D.

Introduction

The program leading to a doctorate in ocean sciences is designed around a core training in oceanography for all students, supplemented and focused by advanced training in oceanography and in the traditional disciplines—biology, chemistry, Earth sciences, and physics—as chosen by the student and their advisers. The core training is provided through courses in ocean sciences; a subset of which is taken by all students in the first two years, and reinforced by attendance of department seminars throughout the program. Preparation also includes upper-division/graduate courses in ocean sciences and in the specialty discipline, graduate seminars, independent study research credits, giving research talks, and a minimum requirement of one quarter as a teaching assistant. There is no formal language requirement. Students admitted to the Ph.D. program may receive a master's degree en route to the Ph.D after meeting the requirements for the M.S. II and successful completion of the Departmental Exam.

A scheduling meeting in the first quarter of enrollment is used to map out the course program in the first year. The course program is determined by a faculty advisory committee in consultation with the student and courses are drawn from Ocean Sciences and other science departments (e.g., Biology, Chemistry and Biochemistry, Earth and Planetary Sciences, Physics). A departmental oral examination covering material from the core courses is taken at the end of the student's first year in the program, typically during finals week of spring quarter. The purpose of this examination is to ensure that the doctoral student candidate has acquired sufficient fundamental knowledge of oceanography to proceed toward the doctoral degree.

To advance to candidacy in the Ph.D. program, each student must pass a qualifying examination, requiring a ~15-page written research proposal (single spaced, including figures, excluding references) describing three original, achievable research projects that is defended orally in front of the student's qualifying examination committee. The proposal should be structured to contain the following sections: 1) statement of the problem or problems and its/their significance, 2) scientific background including a literature review, 3) hypotheses, 4) research plan (what has/will be done, and how), 5) preliminary and expected results as well as contingency plans, and 6) a timeline detailed with major milestones up to and including the quarter/year of expected completion. The exam must demonstrate good understanding of the proposed research and relevant literature in the field as well as feasibility of the proposed, original research project(s). The qualifying examination committee must be established following procedures and deadlines of the Graduate Division. The proposal should be submitted to the committee no fewer than 10 business days before the oral defense. This examination is recommended to be taken during the fall quarter of the third year and no later than the end of the spring quarter of the third year.

Sample Pathways

The pathways within the ocean sciences Ph.D. program are differentiated from related degrees in the traditional disciplines by their focus on global-scale problems and interactions, a focus on the ocean, and their inherently interdisciplinary approach. Interdisciplinary projects across and between pathways are encouraged, as are interactions with faculty in related departments.

Biological Oceanography

This area of study involves the interactions of organisms with their chemical and physical environments. It includes research on the physiology and ecology of organisms, but differs from marine biology in its focus on the oceanographic setting of the organism in relationship to, for example, biogeochemical cycling and the effects of ocean currents on distributions of organisms.

Chemical Oceanography

The measurement of chemical distributions in the sea to understand fundamental ocean processes is the focus of this area of study. Research includes development of analytical techniques, measurement of inorganic and organic species and isotopes in marine particles, seawater and sediments, and investigation of marine biogeochemical processes using analytical and modeling approaches.

Geological Oceanography

Paleoceanography, paleoclimatology, and sediment geochemistry are the focus in this pathway. Research areas include the history of global geochemical cycles and composition of the ocean on various timescales, the fate and diagenesis of materials in sediments and their contribution to the paleoceanographic record, understanding ocean and climate history by the use of records of stable isotopes and trace elements, and paleoclimate modeling.

Physical Oceanography

The physics and dynamics of the ocean and atmosphere are the main aspects of this program. Research includes observational, computational, theoretical, and experimental physical oceanography, geophysical fluid dynamics, ocean acoustics, dynamical meteorology, climate, and global change.

Advancement to Candidacy

Course Requirements

To introduce students to the breadth and depth of the field of ocean sciences, students will be required to complete the following.

The four core ocean sciences courses are expected to be completed in the first year of the program prior to taking the departmental oral examination:

OCEA 200	Physical Oceanography	5
OCEA 220	Chemical Oceanography	5
OCEA 230	Biological Oceanography	5
OCEA 280	Marine Geology	5

Three Graduate-Level or Upper-Division Elective courses:

A minimum of three graduate-level or upper-division elective courses is required to provide depth in the chosen area of emphasis or supporting disciplines, one of which must be a 5-credit graduate-level course in statistics/data analysis, such as OCEA 260 (Introductory Data Analysis in the Ocean and Earth Sciences) or OCEA 267 (Applied Environmental Time Series Analysis). These courses are selected in consultation with the student's adviser and the department's graduate advising committee. A maximum of one course may be a graduate-level seminar (OCEA 290), and at least two courses must be graduate or upper-division undergraduate lecture courses.

Attendance in the following course is required each quarter of enrollment:

OCEA 292	Seminar

Independent Studies or Thesis Research:

A minimum of three courses in independent studies (OCEA 297, before advancing to candidacy), or thesis research (OCEA 299, after advancing to candidacy) under the direction of an adviser. Students beyond their first year will usually take 10 or 15 credits of independent study or thesis research each quarter.

OCEA 297	Independent Study
OCEA 299	Thesis Research

The following course is taken prior to, or concurrent with, being a teaching assistant

Recommended for fall quarter of the first year; generally offered during the fall quarter each year.

OCEA 296	Teaching in Ocean Sciences	2

En-Route Master's Requirements

Ph.D. students may request an *en-route* (Plan II, non thesis) master's degree after successfully passing the Departmental Exam and completing equivalent course requirements for the Plan II M.S. degree. These requirements are identical to the Ph.D. requirements other then the required course credits (40 credits for the en-route M.S.).

Applying for the *En-Route* M.S.

The *en-route* M.S. can be requested at any time once the requirements are met, but would typically occur either after completion of course requirements, or prior to the Qualifying Examination. Once requirements for the degree have been met, including approval from their academic adviser and the Ocean Sciences Department, Ph.D. students may apply for the degree by the deadline for the quarter in which they would like to receive their degree. Deadlines are published in the Academic and Administrative Calendar each year.

Teaching Requirement

Teaching experience is satisfied by one quarter of teaching assistant experience in ocean sciences or related departments at any time in their Ph.D.

Pre-Qualifying Requirements

Ph.D. students must pass a department examination typically taken at the end of their first year. The purpose of this exam is to ensure that the Ph.D. student has acquired sufficient fundamental knowledge of oceanography before developing their thesis proposal and taking their qualifying examination.

After successful completion of the Departmental Exam, Ph.D. students meeting the requirements for the M.S. II track are allowed to petition for the en route M.S. II degree.

Qualifying Exam

To advance to candidacy in the Ph.D. program, each student must pass a qualifying examination, requiring a ~15-page written research proposal (single spaced, including figures, excluding references) describing three original, achievable research projects that is defended orally in front of the student's qualifying examination committee. The proposal should be structured to contain the following sections: 1) statement of the problem or problems and its/their significance, 2) scientific background including a literature review, 3) hypotheses, 4) research plan (what has/will be done, and how), 5) preliminary and expected results as well as contingency plans, and 6) a timeline detailed with major milestones up to and including the quarter/year of expected completion. The exam must demonstrate good understanding of the proposed research and relevant literature in the field as well as feasibility of the proposed, original research project(s). The qualifying examination committee must be established following procedures and deadlines of the Graduate Division. The proposal should be submitted to the committee no fewer than 10 business days before the oral defense. This examination is recommended to be taken during the fall quarter of the third year and no later than the end of the spring quarter of the third year.

Post-Qualifying Requirements

Dissertation

Dissertation

The Ph.D. dissertation, demonstrating original thought and research, must be written, presented in an open seminar, and defended to the student's dissertation reading committee. It is intended to help guide and evaluate the student's program, study, and progress. The Ph.D. dissertation, satisfying all format and content requirements, must be submitted to the Graduate Division before the deadline in which all degree requirements are to be completed within the term of receiving the degree.

Dissertation Defense

The Ph.D. dissertation defense is composed of two parts: one part is the open presentation of the dissertation; the second part is a meeting, following the presentation, with the dissertation reading committee to determine completion of degree requirements. The Ph.D. dissertation defense must be presented before the deadline in which all degree requirements are to be completed within the term of receiving the degree.

Academic Progress

Ph.D. students meet with their primary research advisor every fall to discuss mutual expectations using the Annual Student/Sponsor Yearly Discussion form. They also meet with a member of the Ocean Sciences Department's advisory committee once each fall and spring to check on progress on program requirements (Mandatory Advising Meetings). Finally, in addition, during spring quarter each year, beginning with the second year and continuing until degree completion, students must meet with their thesis committee members and provide a research-focused annual academic progress report to the department. In the year a student completes the qualifying exam with their committee, the exam can take the place of a committee meeting.

Applying for Graduation

Once requirements for degree have been met, including approval from their academic adviser and the Ocean Sciences Department, Ph.D. students may apply for the degree by the deadline for the quarter in which they would like to receive their degree. Deadlines are published in the Academic and Administrative Calendar each year.

Physics M.S. (p. 496)

Physics Ph.D. (p. 497)

OTHER PROGRAMS OF INTEREST

Astrophysics Minor (p. 278)

Astronomy and Astrophysics Ph.D. (p. 279)

Physics seeks to discover the fundamental regularities or "laws" that govern our universe and to apply these laws to explain the behavior of fundamental and complex systems. The same underlying principles describe the behavior of atoms, lasers, living cells, and galaxies. Physics is, therefore, at the base of all modern science and technology, and this fundamental nature can be appreciated even at an elementary level.

The Physics Department offers majors in physics and applied physics. The physics major has a concentration in quantum information science, and the applied physics major in computational physics. There is also an interdepartmental major in physics (astrophysics), a collaborative program offered jointly by the Physics Department and the Astronomy and Astrophysics Department. These programs prepare students for graduate work in physics and astrophysics, and for engineering and other technical positions in industry. With appropriate courses in other disciplines, these majors provide excellent preparation for advanced study in technical subjects such as biology, chemistry, engineering, geophysics, and the philosophy of science. The applied physics major is excellent preparation for positions in industry directly upon graduation.

Faculty work with students in both formal and informal settings. Students have the opportunity to do a senior thesis. If they do a senior thesis, they will work individually with a faculty member.

The main areas of physics research at UCSC are the study of fundamental particles and interactions (high-energy physics), the study of condensed matter physics, materials physics, astrophysics/cosmology, and biophysics.

Efforts in high-energy physics are aided by the presence of an organized research unit, the Santa Cruz Institute for Particle Physics (SCIPP). The SCIPP experimentalists play significant roles in experiments at some of the major accelerator laboratories in the world, including the SLAC National Accelerator Laboratory at Stanford University and the European Council for Nuclear Research (CERN) near Geneva, Switzerland. SCIPP experimentalists have also played an important role in creating the major satellite for gamma-ray astronomy (the Fermi Gamma-ray Space Telescope), are involved in the Dark Energy Survey, and conduct a thriving particle astrophysics program detecting TeV gamma rays as part of the UC VERITAS collaboration. SCIPP theorists are active in the phenomenology of high-energy particle interactions, including dark matter models, the theory of strong and electroweak interactions, electroweak symmetry breaking and Higgs bosons, theories of supersymmetry, superstrings, and gravity. SCIPP also maintains a vigorous program in particle astrophysics, including research in high-energy astrophysics, dark matter, formation of galaxies and large-scale structure in the universe, and theories of cosmology and the very early universe. SCIPP is also home to a research program in experimental

biophysics, exploiting instrumentation technologies developed in other areas of physics for the study of functional organization and development of neural systems in a variety of living organisms. In addition, there is closely related research in biomedical applications such as retinal prosthesis.

The presence of the strong astrophysics group in the Astronomy and Astrophysics Department at UCSC provides a healthy symbiosis in this area. UCSC is the headquarters for the University of California Observatories, which includes the Lick Observatory near San Jose and the Keck Observatory in Hawaii. These provide additional opportunities for collaboration between researchers in the Physics Department and the Astronomy and Astrophysics Department. The strong relationship between the two departments enables them to run the physics (astrophysics) major jointly.

Condensed matter and materials physics research at UCSC covers a range of topics including the behavior of exotic many-electron systems (for example, superconductors) and quantum materials (such as topological insulators and Weyl semimetals); magnetic phase transitions; magnetic and magnetoelectric surfaces, interfaces, and thin films; two-dimensional materials and heterostructures; complex systems (proteins, DNA, and polymers); biophysics; and the development of new electronic devices using novel materials. The experimental program includes optical, magnetometry, magnetotransport, X-ray, and specific heat measurement techniques, as well as thin film growth and characterization facilities at UCSC. X-ray and synchrotron radiation scattering and spectroscopy measurements are available at the Lawrence Berkeley National Laboratory Advanced Light Source and at the Stanford Synchrotron Radiation Light-source, while neutron scattering measurements are performed at the NIST Center for Neutron Research and the Oak Ridge Spallation Neutron Source. Undergraduate students are actively involved in several condensed matter physics laboratories during the academic year and summer months.

UNDERGRADUATE PROGRAM

Undergraduate Majors

The physics, physics (astrophysics), and applied physics major programs provide a comprehensive coverage of the field and the background necessary for graduate school or industrial careers. Students earn a bachelor of science (B.S.) degree. The physics (astrophysics) program is offered jointly by the Physics Department and the Astronomy and Astrophysics Department.

The UC Santa Cruz physics, physics (astrophysics), and applied physics programs begin with a four-quarter presentation of the introductory concepts of the subject, Introduction to Physics, PHYS 5A, PHYS 5B, PHYS 5C, and PHYS 5D. Note that the applied physics program also requires completion of a general chemistry course except for the computational physics concentration. In order for a student to finish the UCSC physics program in four years, it is important to start the Introduction to Physics sequence as early as possible. Students who complete a major sponsored by the Physics Department cannot complete a second major sponsored by the Physics Department or a physics minor.

This introductory sequence is followed by a course that provides an introduction to quantum physics and its applications, Modern Physics, PHYS 102. The programs continue with a two-quarter sequence in mathematical methods of physics, PHYS 116A and PHYS 116C, designed to provide the mathematics preparation necessary for most of the upper-division physics courses required for the majors. Included in the upper-division programs are two intensive laboratory courses designed to illustrate both historical experiments that were important in the development of physics, astrophysics, and applied physics, and modern experimental methods. Advanced and especially motivated students may enroll in some graduate courses with the approval of the instructor and department chair. Students interested in future careers in aerospace-related fields should consider the applied physics major, which gives them an opportunity to take relevant elective courses.

The optional senior thesis provides the opportunity for students to apply their skills to problems of interest to them, either theoretical or experimental, usually with technical advice from a faculty member. The senior thesis may be based on the student's original research or participation in a faculty member's research project or a review of some particular area of physics, under the supervision of a faculty member. The senior thesis is a distinctive part of the UCSC physics major program and entails a substantial investment of both student and faculty time. The learning experience involved in the thesis, as well as the thesis itself, has proven extremely valuable to students in enhancing employment opportunities upon graduation or in gaining admission to graduate school.

The Physics Department is also the administrative home of the science education major, which is a collaboration between several departments in the Physical and Biological Sciences Division and the Education Department. This major is designed for a career in teaching in California high schools by preparing students for the California Subject Examination for Teachers. (Students interested in a high school teaching career will have to fulfill additional requirements after the degree, such as earning a teaching credential.)

Courses for Non-Majors

The department offers the three-quarter sequence PHYS 6A, PHYS 6B and PHYS 6C that covers introductory physics at a level suitable for many majors. One-quarter overviews of physics, PHYS 1A and PHYS 1B, and a course on the physics underpinning music, PHYS 80U, are also offered by the department.

GRADUATE PROGRAM

The Physics Department offers graduate programs leading to the Master of Science (M.S.) and/or the Doctor of Philosophy (Ph.D.) degrees. Each student has a faculty advisor who helps to determine which courses are most appropriate, taking into account the student's background and interests. The student-faculty ratio is low so that M.S. and Ph.D. students can work

closely with faculty and pursue programs that fit their individual needs. Research is currently conducted in theoretical and experimental particle physics, theoretical and experimental condensed matter physics (including materials physics and biophysics), and in theoretical and experimental/observational high-energy astrophysics (including cosmology).

Students may obtain a master's degree through coursework (eight physics graduate courses) and submission of an approved thesis. The thesis requirement may be waived by passing four sections of the written Ph.D. qualifying examination. Master's candidates are encouraged to write a research thesis and may do so in any of the research fields in the program, thereby developing laboratory and computational skills in areas such as electronics design, computer simulation and visualization, cryogenics, X-ray scattering, complex novel materials and devices, or materials science. Each M.S. student is assigned a faculty advisor who helps to design a coursework plan suited to the interests of the student.

Physics students and faculty use a number of UCSC research facilities described at the beginning of this section and elsewhere in this catalog, including facilities of the Santa Cruz Institute for Particle Physics (SCIPP) and the University of California Observatories (headquartered at UCSC). There is strong interaction with other disciplines, especially astronomy and astrophysics, biology, chemistry, Earth sciences, electrical engineering, and mathematics. Proximity to the SLAC National Accelerator Laboratory and the Stanford Synchrotron Radiation Laboratory provides additional local research opportunities. UCSC faculty and graduate students also participate in research programs at CERN in Geneva, Los Alamos, Oak Ridge National Laboratory, NASA Ames, NREL, Lucent, Xerox, IBM, Bell Labs, and other national and international laboratories.

Application materials and brochures describing the physics M.S. and Ph.D. graduate programs in more detail may be obtained by visiting the Physics Department website or by contacting the Division of Graduate Studies.

PHYSICS B.S.

Information and Policies

Introduction

Program Learning Outcomes

Learning outcomes summarize the most important knowledge, skills, abilities, and attitudes that students are expected to develop over the course of their studies. The program learning outcomes communicate the faculty's expectations to students, provide a framework for faculty evaluation of the curriculum based on empirical data, and help improve and measure the impact of implemented changes. Students graduating with a B.S. in physics will demonstrate:

PLO 1. Ability to solve problems using concepts in classical and quantum mechanics, statistical mechanics and electromagnetism.

PLO 2. Proficiency in mathematics and the mathematical concepts needed for a proper understanding of physics.

PLO 3. Ability to take measurements in a physics laboratory and analyze the measurements to draw valid conclusions.

PLO 4. Ability to communicate scientific content effectively, both orally and in writing.

Academic Advising for the Program

The department undergraduate adviser (physicsadvising@ucsc.edu) works closely with students interested in pursuing the major to ensure that they begin the program immediately and follow the appropriate steps toward its completion.

Getting Started in the Major: Frosh

Before coming to the University of California, Santa Cruz:

High school students coming to UC Santa Cruz as frosh should emphasize their mathematics preparation with the expectation that they will take the first calculus course, MATH 19A, before their second quarter at UCSC. Students who come to UC Santa Cruz with credit for MATH 19A will be able to start the Physics 5 series or Physics 15 series in the first quarter. PHYS 5A is offered in the fall and winter quarters each year. Students with a score of 5 on the AP Physics C Mechanics and AP Physics C Electricity and Magnetism examinations are exempt from taking PHYS 5A and PHYS 5C respectively, and the associated lab courses.

After coming to UC Santa Cruz:

This major is highly course intensive and sequential; students who intend to pursue this major must begin taking classes for the major in their first quarter at UCSC.

Incoming students in the physics major should complete the Math Placement process as early as possible, so that the placement is posted before enrollment begins.For more information, please review the Math Placement website.

In their first term, students should enroll in the highest course in the following sequence that they are eligible for: MATH 2, MATH 3, MATH 19A, MATH 19B, MATH 23A, MATH 23B. Students should not take MATH 11A or MATH 11B or MATH 16A or MATH 16B. Graduating in four years is still possible for a student who places into MATH 2 or MATH 3; the department undergraduate adviser and the department's alternative paths webpage should be consulted.

Students who come to UC Santa Cruz with credit for MATH 19A, and have room in their schedule, should take PHYS 5A or PHYS 15A and PHYS 5L (unless they have a score of 5 on the AP Physics C Mechanics examination) in their first term. Those who come to UCSC with credit for MATH 19B and PHYS 5A and PHYS 5L, and have room in their schedule, may consider taking PHYS 5C or PHYS 15C and PHYS 5N (unless they have a score of 5 on the AP Physics C Electricity Magnetism examination) in their first term. The Physics Department tries to match incoming students who are interested with research opportunities, if they are available.

Students who for some reason do not start the courses for the major in their first term should consult the department undergraduate adviser and the alternative paths webpage. Students who do not begin the lower-division requirements during their first year will have difficulty completing the program within four years.

Transfer Information and Policy

Transfer Admission Screening Policy

The following courses or their equivalents are required prior to transfer, by the end of the spring term for students planning to enter in the fall:

PHYS 5A	Introduction to Physics I	5
PHYS 5B	Introduction to Physics II	5
PHYS 5C	Introduction to Physics III	5
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 23A	Vector Calculus	5

A minimum GPA of 2.7 must be obtained in the following courses

PHYS 5A	Introduction to Physics I	5
PHYS 5B	Introduction to Physics II	5
PHYS 5C	Introduction to Physics III	5

In addition, the following course is recommended prior to transfer to ensure timely graduation:

PHYS 5D	Introduction to Physics IV	5

Students entering UC Santa Cruz in the winter quarter must complete

PHYS 5D	Introduction to Physics IV	5
MATH 23B	Vector Calculus	5

in addition to the requirements for students entering in the fall quarter. (This is true for years when winter admission is open.)

Getting Started in the Major: Transfer Students

Transfer students admitted to UC Santa Cruz in the physics major who have satisfied the above screening requirements may declare the major immediately upon arrival at UC Santa Cruz. They should contact the undergraduate advisor to draw up an academic plan.

Incoming transfer students should enroll in the following courses in their first term:

- PHYS 5D, unless they have credit for the course, in which case PHYS 102;
- MATH 23B, unless they have credit for the course, in which case they may enroll in PHYS 116A or an elective or general education course;
- ASTR 119, unless they have knowledge of the Python programming language, in which case they may enroll in PHYS 133 after obtaining a permission code.

Students who have completed courses that should be equivalent to PHYS 5D or MATH 23B but are not formally articulated as such should contact the undergraduate adviser to have their courses evaluated.

Transfer students entering UC Santa Cruz in the winter quarter should meet with the undergraduate adviser upon arrival to draw up an academic plan.

Students who are proposed in a different major (other than applied physics or physics [astrophysics]) and have advanced standing when they come to UC Santa Cruz require permission from the department to change into the major.

Major Qualification Policy and Declaration Process

Major Qualification

To qualify to declare the physics major, students must achieve a cumulative grade point average (GPA) of 2.70 or greater in the following courses, or their equivalents:

PHYS 5A	Introduction to Physics I	5
PHYS 5B	Introduction to Physics II	5
PHYS 5C	Introduction to Physics III	5

PHYS 15A can be used instead of PHYS 5A, and PHYS 15C instead of PHYS 5C. All qualification courses must be completed prior to the major declaration deadline.

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the department chair by the later date of either 15 days from the date the notification was sent, or one week after the start of instruction during the quarter after the final relevant grade was received (generally in PHYS 5C or PHYS 5D). They also must arrange to meet with one of the faculty mentors listed for Declaring the Major. Within 15 days of receipt of the appeal, after consulting with the faculty mentor, the department chair will either finalize the denial of admission or specify further conditions for admission or approve admission to the major, and will notify the student and their college of the decision. For more information about the appeal process, see Appeal Process.

How to Declare a Major

Students should submit a petition to declare as soon as they complete the major qualification requirements or reach their declaration deadline quarter (whichever comes first).

Students petitioning when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh), will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification courses.

All students are required to review their academic plan with a faculty mentor prior to declaring the major. For instructions on petitioning to declare, go to Declaring Your Major.

Letter Grade Policy

All courses used to satisfy the physics major requirements must be taken for a letter grade.

[Optional Catchall]

Course Substitution Policy

Double Majors and Major/Minor Combinations Policy

Students who complete a major sponsored by the Physics Department cannot complete a second major sponsored by the Physics Department or a physics minor.

Students who complete the Physics B.S. and the astrophysics minor cannot use any courses that satisfy the requirements for the minor as electives for the major.

Study Abroad

Honors

The department awards "honors" (3.5 grade point average or better) and "highest honors" (3.8 grade point average or better) to top graduating students each year. The department also awards "honors" for outstanding work on the senior thesis, made upon the recommendation of the faculty thesis adviser.

Timely Graduation and Alternative Plans

- Students planning a senior thesis should find a faculty thesis adviser as early as possible, but no later than the beginning of the senior year for four-year students or the beginning of the second year for transfer students. For further information about the senior thesis, see Senior Thesis.
- Students who join a major program of the Physics Department with some of the required courses completed, or have room in their program for additional courses, should consult with the Physics Department undergraduate adviser.
- Students who fall behind the planners should consult the Physics Department undergraduate adviser and Alternatives.
- All the transfer major planners assume that the Intersegmental General Education Transfer Curriculum (IGETC) has been completed in community college, or has been partially completed and can be finished while at UC Santa Cruz (including summers).

[Optional Catchall]

General Major

Course Requirements

Lower-Division Courses

Choose one of the following courses:

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 20A	Honors Calculus	5

Plus one of the following courses:

MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 20B	Honors Calculus	5

Plus one of the following courses:

PHYS 5A	Introduction to Physics I	5
PHYS 15A	Honors Introduction to Physics I	5

Plus one of the following courses:

PHYS 5C	Introduction to Physics III	5
PHYS 15C	Honors Introduction to Physics - III	5

Plus all of the following courses:

PHYS 5M	Introduction to Physics II Laboratory	1
PHYS 5B	Introduction to Physics II	5
PHYS 5N	Introduction to Physics Laboratory III	1
PHYS 5D	Introduction to Physics IV	5

At present, there is no Honors version of PHYS 5B.

Plus all of the following courses:

MATH 23A	Vector Calculus	5
MATH 23B	Vector Calculus	5

Plus one of the following courses or equivalent:

ASTR 119	Introduction to Scientific Computing	5
CSE 20	Beginning Programming in Python	5
ASTR 19	Practical Programming for the Sciences	5

ASTR 119 is strongly recommended. A test-out option is available for CSE 20.

Upper-Division Courses

All of the following courses:

PHYS 102	Modern Physics	5
PHYS 116A	Mathematical Methods in Physics	5
PHYS 116C	Mathematical Methods in Physics	5
PHYS 105	Mechanics	5
PHYS 110A	Electricity, Magnetism, and Optics	5

PHYS 112	Thermodynamics and Statistical Mechanics	5
PHYS 133	Intermediate Laboratory	5
PHYS 134	Physics Advanced Laboratory	5
PHYS 139A	Quantum Mechanics I	5

Capacity in the lab courses PHYS 133 and PHYS 134 is limited, and they should be taken as early as possible.

Completing both MATH 21 and MATH 24 can substitute for PHYS 116A.

PHYS 116C is waived for students who are pursuing a dual major in physics and a mathematics B.A. or B.S., and take MATH 107 in fall 2017 or later.

And one of these two courses:

PHYS 110B	Electricity, Magnetism, and Optics	5
PHYS 139B	Quantum Mechanics II	5

Electives

Three additional 5-credit courses chosen from PHYS 100 - PHYS 180 or ASTR 111 - ASTR 118. In some cases, with the approval of the department, one of the elective requirements may be satisfied by an upper-division science or engineering course.

Students who wish to go to graduate school in physics after the Physics B.S. are recommended to complete both PHYS 110B and PHYS 139B instead of one of them.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy the upper-division disciplinary communication (DC) requirement. Students in the physics major satisfy the DC requirement by completing one of the following options:

	Either this course	
PHYS 182	Scientific Communication for Physicists	5
	or these courses	
PHYS 195A	Senior Thesis I	5
PHYS 195B	Senior Thesis II	5

Comprehensive Requirement

The comprehensive requirement is satisfied by completing the following course:

PHYS 134	Physics Advanced Laboratory	5

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Physics B.S.: Freshman Academic Plan (for students without credit for MATH 19A)

	Fall	Winter	Spring
1st (frosh)	MATH 19A (or MATH 20A)	MATH 19B (or MATH 20B)	MATH 23A
		(PHYS 5A or PHYS 15A) PHYS 5L	PHYS 5B PHYS 5M
2nd (soph)	(PHYS 5C or PHYS 15C) PHYS 5N	ASTR 119	PHYS 105
	PHYS 5D	PHYS 116A	PHYS 116C
	MATH 23B		PHYS 133
3rd (junior)	PHYS 102	PHYS 112	
	PHYS 110A	PHYS 110B	
4th (senior)	PHYS 139A	PHYS 182**	Elective
	Elective	PHYS 134	
		Elective	

Physics B.S.: Freshman Academic Plan (for students with credit for MATH 19A)

	Fall	Winter	Spring
1st (frosh)	MATH 19B (or MATH 20B)	MATH 23A	MATH 23B
	PHYS 5A or PHYS 15A	PHYS 5C or PHYS 15C	PHYS 5B
	PHYS 5L	PHYS 5N	PHYS 5M
2nd (soph)	PHYS 116A	ASTR 119	PHYS 105

	PHYS 5D	PHYS 116C	PHYS 133
3rd (junior)	PHYS 102	PHYS 112	
	PHYS 110A	PHYS 110B	
4th (senior)	PHYS 139A	PHYS 182**	Elective
	Elective	PHYS 134	
		Elective	

**Students writing a senior thesis should replace PHYS 182 with the two-quarter sequence PHYS 195A and PHYS 195B.

In addition to the specific courses shown in this planner, a student must complete courses satisfying the C, ER, CC, IM, TA, PR and PE general education requirements.

Students looking for an alternative pathway through the major should consult the physics adviser.

Physics B.S. Transfer Academic Plan One

	Fall	Winter	Spring
1st (junior)	MATH 23B	PHYS 116A	PHYS 116C
	PHYS 133	PHYS 134	PHYS 105
	PHYS 102		
2nd (senior)	PHYS 110A	PHYS 110B	Elective
	PHYS 139A	PHYS 112	PHYS 182*
	Elective	Elective	

*Students writing a senior thesis should replace PHYS 182 with the two-quarter sequence PHYS 195A and PHYS 195B.

This planner assumes that a student has completed PHYS 5D and general education requirements.

Physics B.S. Transfer Academic Plan Two

For students who have not completed the equivalent of PHYS 5D:

	Fall	Winter	Spring
1st Year	MATH 23B		PHYS 105
	PHYS 5D	PHYS 102	PHYS 133
	ASTR 119	PHYS 116A	PHYS 116C
2nd Year	PHYS 110A	PHYS 110B	PHYS 134
	PHYS 139A	PHYS 112	Elective
	Elective	Elective	PHYS 182*

*Students writing a senior thesis should replace PHYS 182 with the two-quarter sequence PHYS 195A and PHYS 195B.

Quantum Information Science Concentration

Course Requirements

Lower-Division Courses

Choose one of the following courses:

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 20A	Honors Calculus	5

Plus one of the following courses:

MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 20B	Honors Calculus	5

Plus one of the following courses:

PHYS 5A	Introduction to Physics I	5
PHYS 15A	Honors Introduction to Physics I	5

Plus one of the following courses:

PHYS 5C	Introduction to Physics III	5
PHYS 15C	Honors Introduction to Physics - III	5

Plus all of the following courses:

PHYS 5M	Introduction to Physics II Laboratory	1
PHYS 5B	Introduction to Physics II	5
PHYS 5N	Introduction to Physics Laboratory III	1
PHYS 5D	Introduction to Physics IV	5

At present, there is no Honors version of PHYS 5B.

Plus all of the following courses:

MATH 23A	Vector Calculus	5

MATH 23B	Vector Calculus	5

Plus one of the following courses:

CSE 20	Beginning Programming in Python	5
ASTR 19	Practical Programming for the Sciences	5
ASTR 119	Introduction to Scientific Computing	5

A test-out option is available for CSE 20. ASTR 119 is recommended.

Upper-Division Courses

All of the following courses

PHYS 102	Modern Physics	5
PHYS 133	Intermediate Laboratory	5
PHYS 116A	Mathematical Methods in Physics	5
PHYS 116C	Mathematical Methods in Physics	5
PHYS 105	Mechanics	5
PHYS 110A	Electricity, Magnetism, and Optics	5
PHYS 112	Thermodynamics and Statistical Mechanics	5
PHYS 150	Quantum Computing	5
PHYS 139A	Quantum Mechanics I	5
PHYS 139B	Quantum Mechanics II	5
PHYS 138	Quantum Information Science Laboratory	5

Completing both MATH 21 and MATH 24 can substitute for PHYS 116A.

PHYS 116C is waived for students who are pursuing a dual major in applied physics and a mathematics B.A. or B.S. and take MATH 107 in the year 2017 or later.

Plus one of the following courses:

PHYS 156	Applications of Quantum Materials	5
PHYS 157	Frontier of Quantum Materials	5

Electives

One additional 5-credit physics course that has not been used to satisfy any other requirement for the major, chosen from PHYS 100 - PHYS 180.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy the upper-division communication (DC) requirement. Students in the physics major satisfy the DC requirement by completing one of the following options:

Either this course:

PHYS 182	Scientific Communication for Physicists	5

Or these courses:

PHYS 195A	Senior Thesis I	5
PHYS 195B	Senior Thesis II	5

Students interested in doing a senior thesis should have found a faculty thesis advisor by the beginning of their senior year. They should contact physicsadvising@ucsc.edu or their faculty mentor if they need assistance.

Comprehensive Requirement

The comprehensive requirement is satisfied by completing the following course:

PHYS 138	Quantum Information Science Laboratory	5

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Quantum Information Science Concentration Freshman Academic Plan (for students without credit for MATH 19A)

	Fall	Winter	Spring
1st (frosh)	MATH 19A (or MATH 20A)	MATH 19B (or MATH 20B)	MATH 23A
		(PHYS 5A or PHYS 15A) PHYS 5L	PHYS 5B PHYS 5M
2nd (soph)	(PHYS 5C or PHYS 15C) PHYS 5N	ASTR 119	PHYS 105
	PHYS 5D	PHYS 116A	PHYS 116C
	MATH 23B		
3rd (junior)	PHYS 102	PHYS 112	PHYS 182**
	PHYS 110A	PHYS 133	
4th (senior)	PHYS 139A	PHYS 139B	PHYS 150

	PHYS 138	Elective	PHYS 156 or PHYS 157

Quantum Information Science Concentration Freshman Academic Plan (for students with credit for MATH 19A)

	Fall	Winter	Spring
1st (frosh)	MATH 19B (or MATH 20B)	MATH 23A	MATH 23B
	(PHYS 5A or PHYS 15A) PHYS 5L	(PHYS 5C or PHYS 15C) PHYS 5N	PHYS 5B PHYS 5M
2nd (soph)	PHYS 116A	ASTR 119	PHYS 105
	PHYS 5D	PHYS 116C	PHYS 133
3rd (junior)	PHYS 102	PHYS 112	PHYS 182**
	PHYS 110A		
4th (senior)	PHYS 139A	PHYS 139B	PHYS 150
	PHYS 138	Elective	PHYS 156 or PHYS 157

** Students writing a senior thesis should replace PHYS 182 with the two-quarter sequence PHYS 195A and PHYS 195B.

In addition to the specific courses shown in this planner, a student must complete courses satisfying the C, ER, CC, IM, TA, PR, and PR general education requirements.

Students looking for an alternative pathway through the major should consult the physics advisor.

Quantum Information Science Concentration Transfer Academic Plan

	Fall	Winter	Spring
1st (junior)	MATH 23B	ASTR 119	PHYS 105
	PHYS 102*	PHYS 116A	PHYS 116C
	PHYS 133		
2nd (senior)	PHYS 110A	PHYS 139B	PHYS 156 or PHYS 157
	PHYS 139A	PHYS 112	PHYS 150
	PHYS 138	PHYS 182**	Elective

* This planner assumes that a student has completed PHYS 5D and general education requirements. Students who have not completed PHYS 5D will take it in the fall, followed by PHYS 102 in the winter.

** Students writing a senior thesis should replace PHYS 182 with the two-quarter sequence PHYS 195A and PHYS 195B.

Students who wish to do a more demanding senior thesis or seek greater flexibility in choosing electives may consider delaying their graduation.

PHYSICS (ASTROPHYSICS) B.S.

Information and Policies

Introduction

Program Learning Outcomes

Program learning outcomes (PLO) summarize the most important knowledge, skills, abilities, and attitudes that students are expected to develop over the course of their studies. The program learning outcomes communicate the faculty's expectations to students, provide a framework for faculty evaluation of the curriculum based on empirical data, and help improve and measure the impact of implemented changes. Students graduating with a B.S. in Physics (Astrophysics) will demonstrate:

PLO 1. Ability to solve problems using concepts in classical and quantum mechanics, statistical mechanics and electromagnetism.

PLO 2. Proficiency in mathematics and the mathematical concepts needed for a proper understanding of physics and astrophysics.

PLO 3. Ability to take measurements in a physics laboratory and analyze the measurements to draw valid conclusions.

PLO 4. Ability to communicate scientific content effectively, both orally and in writing.

PLO 5. Ability to apply physics concepts to understand astrophysical phenomena, to plan and carry out the collection of astrophysical data through observations and/or from archival datasets, and to analyze it to draw valid conclusions.

Academic Advising for the Program

The department undergraduate adviser (physicsadvising@ucsc.edu) works closely with students interested in pursuing the major to ensure that they begin the program immediately and follow the appropriate steps toward its completion.

Getting Started in the Major: Frosh

Before coming to the University of California, Santa Cruz:

High school students coming to UC Santa Cruz as frosh should emphasize their mathematics preparation with the expectation that they will take the first calculus course, MATH 19A, before their second quarter at UCSC. Students who come to UC Santa Cruz with credit for MATH 19A will be able to start the Physics 5 series or Physics 15 series in the first quarter. PHYS 5A is offered in the fall and winter quarters each year. Students with a score of 5 on the AP Physics C Mechanics and AP Physics C Electricity and Magnetism examinations are exempt from taking PHYS 5A and PHYS 5C respectively, and the associated lab courses.

After coming to UC Santa Cruz:

This major is highly course intensive and sequential; students who intend to pursue this major must begin taking classes for the major in their first quarter at UCSC.

Incoming students in the physics major should complete the Math Placement process as early as possible, so that the placement is posted before enrollment begins.For more information, please review the Math Placement website.

In their first term, students should enroll in the highest course in the following sequence that they are eligible for: MATH 2, MATH 3, MATH 19A, MATH 19B, MATH 23A, MATH 23B. Students should not take MATH 11A or MATH 11B or MATH 16A or MATH 16B. Graduating in four years is still possible for a student who places into MATH 2 or MATH 3; the department undergraduate adviser and the department's alternatives webpage should be consulted.

Students who come to UC Santa Cruz with credit for MATH 19A, and have room in their schedule, should take PHYS 5A or Physics 15A and PHYS 5L (unless they have a score of 5 on the AP Physics C Mechanics examination) and PHYS 5L in their first term. Those who come to UCSC with credit for MATH 19B and PHYS 5A and PHYS 5L, and have room in their schedule, may consider taking PHYS 5C or Physics 15C and PHYS 5N (unless they have a score of 5 on the AP Physics C Electricity Magnetism examination) in their first term. The Physics Department tries to match incoming students who are interested with research opportunities, if they are available.

Students who for some reason do not start the courses for the major in their first term should consult the department undergraduate adviser and the alternatives webpage. Students who do not begin the lower-division requirements during their first year will have difficulty completing the program within four years.

Transfer Information and Policy

Transfer Admission Screening Policy

The following courses or their equivalents are required prior to transfer, by the end of the spring term for students planning to enter in the fall:

PHYS 5A	Introduction to Physics I	5
PHYS 5B	Introduction to Physics II	5
PHYS 5C	Introduction to Physics III	5
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 23A	Vector Calculus	5

A minimum GPA of 2.7 must be obtained in the following courses

PHYS 5A	Introduction to Physics I	5
PHYS 5B	Introduction to Physics II	5
PHYS 5C	Introduction to Physics III	5

In addition, the following course is recommended prior to transfer to ensure timely graduation:

PHYS 5D	Introduction to Physics IV	5

Students entering UC Santa Cruz in the winter quarter must complete

PHYS 5D	Introduction to Physics IV	5
MATH 23B	Vector Calculus	5

In addition to the requirements for students entering in the fall quarter. (This is true for years when winter admission is open.)

Getting Started in the Major: Transfer Students

Transfer students admitted to UC Santa Cruz in the physics (astrophysics) major who have satisfied the above screening requirements may declare the major immediately upon arrival at UC Santa Cruz. They should contact the undergraduate adviser to draw up an academic plan.

Incoming transfer students should enroll in the following courses in their first term:

- PHYS 5D, unless they have credit for the course, in which case PHYS 102;

- MATH 23B, unless they have credit for the course, in which case they may enroll in PHYS 116A or an elective or general education course;
- ASTR 119, unless they have knowledge of the Python programming language, in which case they may enroll in PHYS 133 after obtaining a permission code.

Students who have completed courses that should be equivalent to PHYS 5D or MATH 23B but is not formally articulated as such should contact the undergraduate adviser to have their courses evaluated.

Transfer students entering UC Santa Cruz in the winter quarter should meet with the undergraduate adviser upon arrival to draw up an academic plan.

Students who are proposed in a different major (other than physics or applied physics) and have advanced standing when they come to UC Santa Cruz require permission from the department to change into the major.

Major Qualification Policy and Declaration Process

Major Qualification

To qualify to declare the physics (astrophysics) major, students must achieve a cumulative grade point average (GPA) of 2.70 or greater in the following courses, or their equivalents:

PHYS 5A	Introduction to Physics I	5
PHYS 5B	Introduction to Physics II	5
PHYS 5C	Introduction to Physics III	5

PHYS 15A can be used instead of PHYS 5A, and PHYS 15C instead of PHYS 5C. All qualification courses must be completed prior to the major declaration deadline.

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the department chair by the later date of either 15 days from the date the notification was sent, or one week after the start of instruction during the quarter after the final relevant grade was received (generally in PHYS 5C or PHYS 5D). They also must arrange to meet with one of the faculty mentors listed for Declaring the Major. Within 15 days of receipt of the appeal, after consulting with the faculty mentor, the department chair will either finalize the denial of admission or specify further conditions for admission or approve admission to the major, and will notify the student and their college of the decision. For more information about the appeal process, see Appeal Process.

How to Declare a Major

Students should submit a petition to declare as soon as they complete the major qualification requirements or reach their declaration deadline quarter (whichever comes first).

Students petitioning when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh), will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification courses.

All students are required to review their academic plan with a faculty mentor prior to declaring the major. For instructions on petitioning to declare, go to Declaring Your Major.

Letter Grade Policy

All courses used to satisfy the physics (astrophysics) major requirements must be taken for a letter grade.

[Optional Catchall]

Double Majors and Major/Minor Combinations Policy

Students who complete a major sponsored by the Physics Department cannot complete a second major sponsored by the Physics Department or a physics minor.

Students cannot complete both the physics (astrophysics) major and the astrophysics minor.

Study Abroad

Honors

The department awards "honors" (3.5 grade point average or better) and "highest honors"(3.8 grade point average or better) to top graduating students each year. The department also awards "honors" for outstanding work on the senior thesis, made upon the recommendation of the faculty thesis adviser.

Timely Graduation and Alternative Plans

- Students planning a senior thesis should find a faculty thesis advisor as early as possible, but no later than the beginning of the senior year for four-year students or the beginning of the second year for transfer students. For further information about the senior thesis, see Senior Thesis.
- Students who join a major program of the Physics Department with some of the required courses completed, or have room in their program for additional courses, should consult with the Physics Department undergraduate adviser.
- Students who fall behind the planners should consult the Physics Department undergraduate adviser and Alternatives.
- All the transfer major planners assume that IGETC has been completed in community college, or has been partially completed and can be finished while at UC Santa Cruz (including summers).

[Optional Catchall]

Requirements and Planners

Course Requirements

Lower-Division Courses

Choose one of the following courses:

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 20A	Honors Calculus	5

Plus one of the following courses:

MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 20B	Honors Calculus	5

Plus one of the following courses:

PHYS 5A	Introduction to Physics I	5
PHYS 15A	Honors Introduction to Physics I	5

Plus one of the following courses:

PHYS 5C	Introduction to Physics III	5
PHYS 15C	Honors Introduction to Physics - III	5

Plus all of the following courses:

PHYS 5B	Introduction to Physics II	5
PHYS 5L	Introduction to Physics I Laboratory	1
PHYS 5M	Introduction to Physics II Laboratory	1
PHYS 5N	Introduction to Physics Laboratory III	1
PHYS 5D	Introduction to Physics IV	5

At present, there is no Honors version of PHYS 5B.

Plus all of the following courses:

MATH 23A	Vector Calculus	5
MATH 23B	Vector Calculus	5

Plus one of the following courses or equivalent:

ASTR 119	Introduction to Scientific Computing	5
CSE 20	Beginning Programming in Python	5
ASTR 19	Practical Programming for the Sciences	5

ASTR 119 is strongly recommended. A test-out option is available for CSE 20.

Plus one of the following options:

	Either this course	
ASTR 21	The Diverse Universe: Stars, Planets, and Galaxies	5
	or these courses	
ASTR 9A	Introduction to Research in Physics and Astrophysics	2
ASTR 9B	Introduction to Research in Physics and Astrophysics	3

Upper-Division Courses

All of the following courses:

PHYS 102	Modern Physics	5
PHYS 116A	Mathematical Methods in Physics	5
PHYS 116C	Mathematical Methods in Physics	5
PHYS 105	Mechanics	5
PHYS 110A	Electricity, Magnetism, and Optics	5
PHYS 110B	Electricity, Magnetism, and Optics	5
PHYS 112	Thermodynamics and Statistical Mechanics	5
PHYS 133	Intermediate Laboratory	5
PHYS 139A	Quantum Mechanics I	5

Completing both MATH 21 and MATH 24 can substitute for PHYS 116A.

PHYS 116C is waived for students who are pursuing a dual major in physics (astrophysics) and mathematics B.A. or B.S., and take MATH 107 in Fall 2017 or later.

Plus one of the following options:

	Either this course	
PHYS 135	Astrophysics Advanced Laboratory	5
	or these courses	
PHYS 135A	Astrophysics Advanced Laboratory	3
PHYS 135B	Astrophysics Advanced Laboratory	2
	or this course	
ASTR 136	Advanced Astronomy Laboratory	5
or any three of these courses		
ASTR 136A	Advanced Astronomy Lab: Astrometry	2
ASTR 136B	Advanced Astronomy Lab: Galaxy Rotation Curves and Dark Matter	2
ASTR 136C	Advanced Astronomy Lab: Stellar Photometry	2
ASTR 136D	Advanced Astronomy Lab: Wavefront Measurement	2
ASTR 136E	Advanced Astronomy Lab: Adaptive Optics	2
ASTR 136G	Advanced Astronomy Lab: Detectors	2
ASTR 136H	Advanced Astronomy Lab: Fourier Optics	2

Capacity in the lab courses is limited, and they should be taken as early as possible. PHYS 135A and PHYS 135B are not scheduled to be offered in the next few years.

Electives

Complete three courses chosen from the following:

ASTR 111	Order-of-Magnitude Astrophysics	5
ASTR 112	Physics of Stars	5
ASTR 113	Introduction to Cosmology	5
ASTR 117	High Energy Astrophysics	5
ASTR 118	Physics of Planetary Systems	5
PHYS 129	Particle Physics and Astrophysics	5
PHYS 137	Advanced Optics Laboratory	5
PHYS 171	General Relativity, Black Holes, and Cosmology	5
EART 160	Planetary Science	5
EART 162	Planetary Interiors	5
EART 163	Planetary Surfaces	5
EART 164	Planetary Atmospheres	5
AM 107	Introduction to Fluid Dynamics	5
PHYS 130	Multiwavelength Astronomical Techniques	5

Disciplinary Communication (DC) Requirement

Students of every major must satisfy the upper-division disciplinary communication (DC) requirement. Students in the physics (astrophysics) major satisfy the DC requirement by completing one of the following options:

	Either this course	
PHYS 182	Scientific Communication for Physicists	5
	or these courses	
PHYS 195A	Senior Thesis I	5
PHYS 195B	Senior Thesis II	5

Comprehensive Requirement

The comprehensive requirement is satisfied by completing one of the following options:

	Either this course	
PHYS 135	Astrophysics Advanced Laboratory	5
	or these courses	
PHYS 135A	Astrophysics Advanced Laboratory	3
PHYS 135B	Astrophysics Advanced Laboratory	2
	or this course	
ASTR 136	Advanced Astronomy Laboratory	5
or any three of these courses		
ASTR 136A	Advanced Astronomy Lab: Astrometry	2
ASTR 136B	Advanced Astronomy Lab: Galaxy Rotation Curves and Dark Matter	2
ASTR 136C	Advanced Astronomy Lab: Stellar Photometry	2
ASTR 136D	Advanced Astronomy Lab: Wavefront Measurement	2
ASTR 136E	Advanced Astronomy Lab: Adaptive Optics	2
ASTR 136G	Advanced Astronomy Lab: Detectors	2
ASTR 136H	Advanced Astronomy Lab: Fourier Optics	2

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Physics (Astrophysics) B.S.: Freshman Academic Plan (for students without credit for MATH 19A)

	Fall	Winter	Spring
1st (frosh)	MATH 19A or MATH 20A	MATH 19B or MATH 20B	MATH 23A
		PHYS 5A/PHYS 5L or PHYS 15A/PHYS 5L	PHYS 5B/PHYS 5M
		PHYS 5L	
2nd (soph)	PHYS 5C/PHYS 5N or PHYS 15C/PHYS 5N	ASTR 119	PHYS 105
	PHYS 5D	PHYS 116A	PHYS 116C
	MATH 23B	ASTR 21	
3rd (junior)	PHYS 110A	PHYS 110B	
	PHYS 102	PHYS 112	Elective
	PHYS 133		
4th (senior)	PHYS 135	PHYS 182**	

	PHYS 139A	Elective	Elective

Physics (Astrophysics) B.S.: Freshman Academic Plan (for students with credit for MATH 19A)

	Fall	Winter	Spring
1st (frosh)	MATH 19B or MATH 20B	MATH 23A	MATH 23B
	PHYS 5A/PHYS 5L or PHYS 15A/PHYS 5L	PHYS 5C/PHYS 5N or PHYS 15C/PHYS 5N	PHYS 5B/PHYS 5M
2nd (soph)	PHYS 116A	ASTR 119	PHYS 105
	PHYS 5D	PHYS 116C	PHYS 133
		ASTR 21	
3rd (junior)	PHYS 110A	PHYS 110B	
	PHYS 102	PHYS 112	Elective
4th (senior)	PHYS 135	PHYS 182**	
	PHYS 139A	Elective	Elective

**Students writing a senior thesis should replace PHYS 182 with the two-quarter sequence PHYS 195A and PHYS 195B.

In addition to the specific courses shown in this planner, a student must complete courses satisfying the C, ER, CC, IM, TA, PR and PE general education requirements.

Students looking for an alternative pathway through the major should consult the physics advisor.

Physics (Astrophysics) B.S.: Transfer Academic Plan One

	Fall	Winter	Spring
1st (junior)	MATH 23B	ASTR 21	PHYS 105
	PHYS 102	PHYS 116A	PHYS 116C
	PHYS 133	ASTR 119	Elective
2nd (senior)	PHYS 110A	PHYS 110B	PHYS 182*
	PHYS 139A	PHYS 112	Elective
	PHYS 135	Elective	

*Students writing a senior thesis should replace PHYS 182 with the two-quarter sequence PHYS 195A and PHYS 195B.

This planner assumes that a student has completed PHYS 5D and general education requirements.

Students who wish to do a more demanding senior thesis or seek greater flexibility in choosing electives or take additional courses to be better prepared for graduate school may consider delaying graduation.

Physics (Astrophysics) B.S.: Transfer Academic Plan Two

For students who have not completed the equivalent of PHYS 5D.

	Fall	Winter	Spring
1st Year	MATH 23B	PHYS 102	PHYS 105
	PHYS 5D	PHYS 116A	PHYS 116C
	ASTR 119	ASTR 21	Elective
2nd Year	PHYS 110A	PHYS 110B	ASTR 136 or PHYS 135
	PHYS 139A	PHYS 112	PHYS 182*
	PHYS 133	Elective	Elective

*Students writing a senior thesis should replace PHYS 182 with the two-quarter sequence PHYS 195A and PHYS 195B.

APPLIED PHYSICS B.S.

Information and Policies

Introduction

Program Learning Outcomes

Learning outcomes summarize the most important knowledge, skills, abilities, and attitudes that students are expected to develop over the course of their studies. The program learning outcomes communicate the faculty's expectations to students, provide a framework for faculty evaluation of the curriculum based on empirical data, and help improve and measure the impact of implemented changes. Students graduating with a B.S. in Applied Physics will demonstrate:

PLO 1. Ability to solve problems using concepts in classical and quantum mechanics, statistical mechanics and electromagnetism.

PLO 2. Proficiency in mathematics and the mathematical concepts needed for a proper understanding of physics.

PLO 3. Ability to take measurements in a physics laboratory and analyze the measurements to draw valid conclusions.

PLO 4. Ability to communicate scientific content effectively, both orally and in writing.

Academic Advising for the Program

The department undergraduate adviser (physicsadvising@ucsc.edu) works closely with students interested in pursuing the major to ensure that they begin the program immediately and follow the appropriate steps toward its completion.

Getting Started in the Major: Frosh

Before coming to the University of California, Santa Cruz:

High school students coming to UC Santa Cruz, as frosh should emphasize their mathematics preparation with the expectation that they will take the first calculus course, MATH 19A, before their second quarter at UCSC. Students who come to UCSC with credit for MATH 19A will be able to start the Physics 5 series or Physics 15 series in the first quarter. PHYS 5A is offered in the fall and winter quarters each year. Students with a score of 5 on the AP Physics C Mechanics and AP Physics C Electricity and Magnetism examinations are exempt from taking PHYS 5A and PHYS 5C respectively, and the associated lab courses.

After coming to UC Santa Cruz:

This major is highly course intensive and sequential; students who intend to pursue this major must begin taking classes for the major in their first quarter at UCSC.

Incoming students in the Physics major should complete the Math Placement process as early as possible, so that the placement is posted before enrollment begins. For more information, please review the Math Placement website.

In their first term, students should enroll in the highest course in the following sequence that they are eligible for: MATH 2, MATH 3, MATH 19A, MATH 19B, MATH 23A, MATH 23B. Students should not take MATH 11A or MATH 11B or MATH 16A or MATH 16B. Graduating in four years is still possible for a student who places into MATH 2 or MATH 3; the department undergraduate adviser and the department's Alternatives webpage should be consulted.

Students who come to UC Santa Cruz with credit for MATH 19A, and have room in their schedule, should take PHYS 5A or PHYS 15A and PHYS 5L (unless they have a score of 5 on the AP Physics C Mechanics examination) in their first term. Those who come to UCSC with credit for MATH 19B and PHYS 5A and PHYS 5L, and have room in their schedule, may consider taking PHYS 5C or PHYS 15C and PHYS 5N (unless they have a score of 5 on the AP Physics C Electricity Magnetism examination) in their first term. The Physics Department tries to match incoming students who are interested with research opportunities, if they are available.

Students who for some reason do not start the courses for the major in their first term should consult the department undergraduate adviser and the Alternatives webpage. Students who do not begin the lower-division requirements during their first year will have difficulty completing the program within four years.

Transfer Information and Policy

Transfer Admission Screening Policy

The following courses or their equivalents are required prior to transfer, by the end of the spring term for students planning to enter in the fall:

PHYS 5A	Introduction to Physics I	5
PHYS 5B	Introduction to Physics II	5
PHYS 5C	Introduction to Physics III	5
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 23A	Vector Calculus	5

A minimum GPA of 2.7 must be obtained in the following courses

PHYS 5A	Introduction to Physics I	5
PHYS 5B	Introduction to Physics II	5
PHYS 5C	Introduction to Physics III	5

In addition, the following course is recommended prior to transfer to ensure timely graduation:

PHYS 5D	Introduction to Physics IV	5

Students entering UC Santa Cruz in the winter quarter must complete

PHYS 5D	Introduction to Physics IV	5
MATH 23B	Vector Calculus	5

Getting Started in the Major: Transfer Students

Transfer students admitted to UC Santa Cruz in the applied physics major who have satisfied the above screening requirements may declare the major immediately upon arrival

at UC Santa Cruz. They should contact the undergraduate adviser to draw up an academic plan.

Incoming transfer students should enroll in the following courses in their first term:

- PHYS 5D, unless they have credit for the course, in which case PHYS 102;
- MATH 23B, unless they have credit for the course, in which case they may enroll in PHYS 116A or an elective or general education course;
- ASTR 119, unless they have knowledge of the Python programming language and basic statistics, in which case they may enroll in PHYS 133 after obtaining a permission code.

Students who have completed courses that should be equivalent to PHYS 5D or MATH 23B but is not formally articulated as such should contact the undergraduate adviser to have their courses evaluated.

Transfer students entering UC Santa Cruz in the winter quarter should meet with the undergraduate adviser upon arrival to draw up an academic plan.

Students who are proposed in a different major (other than physics or physics (astrophysics)) and have advanced standing when they come to UC Santa Cruz require permission from the department to change into the major.

Major Qualification Policy and Declaration Process

Major Qualification

To qualify to declare the Applied Physics major, students must achieve a cumulative grade point average (GPA) of 2.70 or greater in the following courses, or their equivalents:

PHYS 5A	Introduction to Physics I	5
PHYS 5B	Introduction to Physics II	5
PHYS 5C	Introduction to Physics III	5

PHYS 15A can be used instead of PHYS 5A, and PHYS 15C instead of PHYS 5C. All qualification courses must be completed prior to the major declaration deadline.

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the department chair by the later date of either 15 days from the date the notification was sent, or one week after the start of instruction during the quarter after the final relevant grade was received (generally in PHYS 5C or PHYS 5D). They also must arrange to meet with one of the faculty mentors listed for Declaring the Major. Within 15 days of receipt of the appeal, after consulting with the faculty mentor, the department chair will either finalize the denial of admission or specify further conditions for admission or approve admission to the major, and will notify the student and their college of the decision.

For more information about the appeal process, see Appeal Process.

How to Declare a Major

Students should submit a petition to declare as soon as they complete the major qualification requirements or reach their declaration deadline quarter (whichever comes first).

Students petitioning when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh), will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification courses.

All students are required to review their academic plan with a faculty mentor prior to declaring the major. For instructions on petitioning to declare, go to Declaring Your Major.

Letter Grade Policy

All courses used to satisfy any of the applied physics major requirements must be taken for a letter grade, except the lower-division chemistry requirement.

[Optional Catchall]

Course Substitution Policy

Double Majors and Major/Minor Combinations Policy

Students who complete a major sponsored by the Physics Department cannot complete a second major sponsored by the Physics Department or a physics minor.

Study Abroad

Honors

The department awards "honors" (3.5 grade point average or better) and "highest honors"(3.8 grade point average or better) to top graduating students each year. The department also awards "honors" for outstanding work on the senior thesis, made upon the recommendation of the faculty thesis adviser.

Timely Graduation and Alternative Plans

- Students planning a senior thesis should find a faculty thesis adviser as early as possible, but no later than the beginning of the senior year for four-year students or the beginning of the second year for transfer students. For further information about the senior thesis, see Senior Thesis.
- Students who join a major program of the Physics Department with some of the required courses completed, or have room in their program for additional courses, should consult with the Physics Department undergraduate adviser.

- Students who fall behind the planners should consult the Physics Department undergraduate adviser and Alternatives.
- All the transfer major planners assume that Intersegmental General Education Transfer Curriculum (IGETC) has been completed in community college, or has been partially completed and can be finished while at UC Santa Cruz (including summers).

[Optional Catchall]

Standard Applied Physics Major

Course Requirements

Lower-Division Courses

Choose one of the following courses:

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 20A	Honors Calculus	5

Plus one of the following courses:

MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 20B	Honors Calculus	5

Plus one of the following courses:

PHYS 5A	Introduction to Physics I	5
PHYS 15A	Honors Introduction to Physics I	5

Plus one of the following courses:

PHYS 5C	Introduction to Physics III	5
PHYS 15C	Honors Introduction to Physics - III	5

Plus all of the following courses:

PHYS 5B	Introduction to Physics II	5
PHYS 5M	Introduction to Physics II Laboratory	1
PHYS 5N	Introduction to Physics Laboratory III	1
PHYS 5D	Introduction to Physics IV	5

At present, there is no Honors version of PHYS 5B.

Plus all of the following courses:

MATH 23A	Vector Calculus	5
MATH 23B	Vector Calculus	5

Plus one of the following courses:

CHEM 3A	General Chemistry	5
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5

CHEM 4A has a corequisite lab course, CHEM 4AL. The lab is not required for the major, but counts toward overall credits for graduation.

CHEM 1A or CHEM 1B can substitute for CHEM 3A.

Plus one of the following courses or equivalent:

ASTR 119	Introduction to Scientific Computing	5
CSE 20	Beginning Programming in Python	5
ASTR 19	Practical Programming for the Sciences	5

A test-out option is available for CSE 20.

Upper-Division Courses

All of the following courses:

PHYS 102	Modern Physics	5
PHYS 116A	Mathematical Methods in Physics	5
PHYS 116C	Mathematical Methods in Physics	5
PHYS 105	Mechanics	5
PHYS 110A	Electricity, Magnetism, and Optics	5
PHYS 110B	Electricity, Magnetism, and Optics	5
PHYS 112	Thermodynamics and Statistical Mechanics	5
PHYS 133	Intermediate Laboratory	5
PHYS 134	Physics Advanced Laboratory	5

Students may take ECE 135/ECE 135L instead of PHYS 110A and PHYS 110B. This is not recommended for students who wish to pursue graduate studies in physics.

Capacity in the lab courses PHYS 133 and PHYS 134 is limited, and they should be taken as early as possible.

Completing both MATH 21 and MATH 24 can substitute for PHYS 116A.

PHYS 116C is waived for students who are pursuing a dual major in applied physics and a mathematics B.A. or B.S., and take MATH 107 in fall 2017 or later.

Electives

Complete three courses chosen from the following, at least one of which has to be a Physics Department course:

PHYS 115	Computational Physics	5
PHYS 120	Polymer Physics	5
PHYS 137	Advanced Optics Laboratory	5
PHYS 139A	Quantum Mechanics I	5
PHYS 139B	Quantum Mechanics II	5
PHYS 157	Frontier of Quantum Materials	5
PHYS 150	Quantum Computing	5
PHYS 152	Physics and Machine Learning	5
PHYS 156	Applications of Quantum Materials	5
PHYS 160	Practical Electronics	5
PHYS 180	Biophysics	5
AM 107	Introduction to Fluid Dynamics	5
CHEM 163B	Chemical Thermodynamics	5

EART 121	The Atmosphere	5
EART 172	Geophysical Fluid Dynamics	5
ECE 101	Introduction to Electronic Circuits	5
ECE 130	Introduction to Optoelectronics and Photonics	5
ECE 136	Engineering Electromagnetics	5
ECE 141	Feedback Control Systems	5

Or other courses with approval of the undergraduate faculty advisor.

Students interested in going to graduate school in physics should consider completing the Physics B.S. instead of the Applied Physics B.S. Students who wish to go to graduate school in physics after the Applied Physics B.S. are recommended to complete PHYS 110A and PHYS 110B instead of ECE 135 and ECE 135L, and complete PHY 139A and PHYS 139B.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy the upper-division disciplinary communication (DC) requirement. Students in the applied physics major satisfy the DC requirement by completing one of the following options:

	Either this course	
PHYS 182	Scientific Communication for Physicists	5
	or these courses	
PHYS 195A	Senior Thesis I	5
PHYS 195B	Senior Thesis II	5

Comprehensive Requirement

The comprehensive requirement is satisfied by completing the following course:

PHYS 134	Physics Advanced Laboratory	5

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements (p. 1438) for more information.

Applied Physics B.S.: Freshman Academic Plan (for students without credit for MATH 19A)

	Fall	Winter	Spring
1st (frosh)	MATH 19A or MATH 20A	MATH 19B or MATH 20B	MATH 23A
		CHEM 3A	PHYS 5B/PHYS 5M
		PHYS 5A/PHYS 5L or PHYS 15A/PHYS 5L	
2nd (soph)	PHYS 5C/PHYS 5N or PHYS 15C/PHYS 5N	ASTR 119	PHYS 105
	PHYS 5D	PHYS 116A	PHYS 116C
	MATH 23B		
3rd (junior)	PHYS 102	PHYS 110B	PHYS 134
	PHYS 110A	PHYS 112	Elective
	PHYS 133		
4th (senior)	Elective	PHYS 182**	Elective

Applied Physics B.S.: Freshman Academic Plan (for students with credit for MATH 19A)

	Fall	Winter	Spring
1st (frosh)	MATH 19B or MATH 20B	MATH 23A	MATH 23B
	PHYS 5APHYS 5L or PHYS 15A/PHYS 5L	CHEM 3A	PHYS 5B/PHYS 5M
		PHYS 5C/PHYS 5N or PHYS 15C/PHYS 5N	

2nd (soph)	PHYS 116A	ASTR 119	PHYS 105
	PHYS 5D	PHYS 116C	PHYS 133
3rd (junior)	PHYS 102	PHYS 110B	PHYS 134
	PHYS 110A	PHYS 112	Elective
4th (senior)	Elective	PHYS 182**	Elective

**Students writing a senior thesis should replace PHYS 182 with the two-quarter sequence PHYS 195A and PHYS 195B.

In addition to the specific courses shown in this planner, a student must complete courses satisfying the C, ER, CC, IM, TA, PR and PE general education requirements.

Students looking for an alternative pathway through the major should consult the physics adviser.

Applied Physics B.S.: Transfer Academic Plan One

	Fall	Winter	Spring
1st (junior)	MATH 23B	CHEM 3A	PHYS 105
	PHYS 102	PHYS 116A	PHYS 116C
	ASTR 119		PHYS 133
2nd (senior)	PHYS 110A	PHYS 110B	PHYS 134
	Elective	PHYS 112	Elective
		Elective	PHYS 182*

*Students writing a senior thesis should replace PHYS 182 with the two-quarter sequence PHYS 195A and PHYS 195B.

This planner assumes that a student has completed PHYS 5D and general education requirements.

Students who wish to do a more demanding senior thesis or seek greater flexibility in choosing electives may consider delaying graduation.

Applied Physics B.S.: Transfer Academic Plan Two

For students who have not completed the equivalent of PHYS 5D.

	Fall	Winter	Spring
1st Year	MATH 23B	PHYS 102	PHYS 105
	PHYS 5D	CHEM 3A	PHYS 133
	ASTR 119	PHYS 116A	PHYS 116C
2nd Year	PHYS 110A	PHYS 110B	Elective
	Elective	PHYS 112	PHYS 182*
		Elective	PHYS 134

*Students writing a senior thesis should replace PHYS 182 with the two-quarter sequence PHYS 195A and PHYS 195B.

Computational Physics Concentration

Course Requirements

Lower-Division Courses

Choose one of the following courses:

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 20A	Honors Calculus	5

Plus one of the following courses:

MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 20B	Honors Calculus	5

Plus one of the following courses:

PHYS 5A	Introduction to Physics I	5
PHYS 15A	Honors Introduction to Physics I	5

Plus one of the following courses:

PHYS 5C	Introduction to Physics III	5
PHYS 15C	Honors Introduction to Physics - III	5

Plus all of the following courses:

PHYS 5B	Introduction to Physics II	5
PHYS 5M	Introduction to Physics II Laboratory	1
PHYS 5N	Introduction to Physics Laboratory III	1
PHYS 5D	Introduction to Physics IV	5

At present, there is no Honors version of PHYS 5B.

Plus all of the following courses:

MATH 23A	Vector Calculus	5
MATH 23B	Vector Calculus	5

Plus both of the following courses:

CSE 20	Beginning Programming in Python	5
CSE 30	Programming Abstractions: Python	7

A test-out option is available for CSE 20.

Upper-Division Courses

All of the following courses:

PHYS 102	Modern Physics	5
PHYS 116A	Mathematical Methods in Physics	5
PHYS 116C	Mathematical Methods in Physics	5
PHYS 105	Mechanics	5
PHYS 110A	Electricity, Magnetism, and Optics	5
PHYS 112	Thermodynamics and Statistical Mechanics	5
STAT 131	Introduction to Probability Theory	5
PHYS 115	Computational Physics	5

Completing both MATH 21 and MATH 24 can substitute for PHYS 116A.

PHYS 116C is waived for students who are pursuing a dual major in applied physics and a mathematics B.A. or B.S., and take MATH 107 in fall 2017 or later.

Electives

Complete three courses chosen from the following, of which at least one must be PHYS 150 or PHYS 152.

PHYS 150	Quantum Computing	5
PHYS 152	Physics and Machine Learning	5
PHYS 110B	Electricity, Magnetism, and Optics	5
PHYS 139A	Quantum Mechanics I	5
AM 148	GPU Programming for Scientific Computations	5
BME 205	Bioinformatics Models and Algorithms	5
CHEM 264	Computational Materials	5
EART 124	Modeling Earth's Climate	5

At most one course can be taken from PHYS 110B and PHYS 139A.

BME 205 has several prerequisites which are not major requirements.

This concentration is not intended for students who wish to go to graduate school in physics. A student who wishes to do so should take PHYS 139A, PHYS 139B, PHYS 110B and PHYS 116B, as part of the major requirements or in addition to them.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy the upper-division disciplinary communication (DC) requirement. Students in the applied physics major satisfy the DC requirement by completing one of the following options:

	Either this course	
PHYS 182	Scientific Communication for Physicists	5
	or these courses	
PHYS 195A	Senior Thesis I	5
PHYS 195B	Senior Thesis II	5

Comprehensive Requirement

The comprehensive requirement is satisfied by completing the following course:

PHYS 115	Computational Physics	5

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements (p. 1438) for more information.

Computational Physics Concentration: Freshman Academic Plan (for students without credit for MATH 19A)

	Fall	Winter	Spring
1st (frosh)	MATH 19A or MATH 20A	MATH 19B or MATH 20B	MATH 23A
		PHYS 5A/PHYS 5L or PHYS 15A/PHYS 5L	PHYS 5B/PHYS 5M
2nd (soph)	PHYS 5C/PHYS 5N or PHYS 15C/PHYS 5N	CSE 20	PHYS 105
	PHYS 5D	PHYS 116A	PHYS 116C
			CSE 30
	MATH 23B		
3rd	PHYS 102	PHYS 112	STAT 131

(junior)	PHYS 110A		
4th (senior)	PHYS 115	PHYS 182**	Elective
	Elective	Elective	

Computational Physics Concentration: Freshman Academic Plan (for students with credit for MATH 19A)

	Fall	Winter	Spring
1st (frosh)	MATH 19B or MATH 20B	MATH 23A	MATH 23B
	PHYS 5A/PHYS 5L or PHYS 15A/PHYS 5L	PHYS 5C/PHYS 5N or PHYS 15C/PHYS 5N	PHYS 5B/PHYS 5M
2nd (soph)	PHYS 116A	PHYS 116C	PHYS 105
	PHYS 5D	CSE 20	CSE 30
3rd (junior)	PHYS 102	PHYS 112	STAT 131
	PHYS 110A		
4th (senior)	PHYS 115	PHYS 182**	Elective
	Elective	Elective	

**Students writing a senior thesis should replace PHYS 182 with the two-quarter sequence PHYS 195A and PHYS 195B.In addition to the specific courses shown in this planner, a student must complete courses satisfying the ER, CC, IM, TA, PR and PE general education requirements.

Students looking for an alternative pathway through the major should consult the physics adviser.

Computational Physics Concentration: Transfer Academic Plan One

	Fall	Winter	Spring
1st (junior)	MATH 23B	CSE 20	PHYS 105
	PHYS 102	PHYS 116A	PHYS 116C
			CSE 30
2nd (senior)	PHYS 110A	PHYS 182*	STAT 131
	PHYS 115	PHYS 112	Elective
		Elective	Elective

*Students writing a senior thesis should replace PHYS 182 with the two-quarter sequence PHYS 195A and PHYS 195B.

This planner assumes that a student has completed PHYS 5D and general education requirements.

Students who wish to do a more demanding senior thesis or seek greater flexibility in choosing electives may consider delaying graduation.

Computational Physics Concentration: Transfer Academic Plan Two

For students who have not completed the equivalent of PHYS 5D.

	Fall	Winter	Spring
1st Year	MATH 23B	PHYS 102	PHYS 105
	PHYS 5D	CSE 20	CSE 30
		PHYS 116A	PHYS 116C
2nd Year	PHYS 110A	PHYS 182*	Elective
	PHYS 115	PHYS 112	STAT 131
	Elective		Elective

*Students writing a senior thesis should replace PHYS 182 with the two-quarter sequence PHYS 195A and PHYS 195B.

PHYSICS MINOR

Course Requirements

To complete the physics minor students complete the following courses or their equivalents. Some courses may be satisfied via exam credit. Courses may be taken for a letter grade or Pass/No Pass.

Lower-Division Courses

Choose one of the following options:

	Either these courses	
PHYS 5A	Introduction to Physics I	5
PHYS 5L	Introduction to Physics I Laboratory	1
PHYS 5B	Introduction to Physics II	5
PHYS 5M	Introduction to Physics II Laboratory	1
PHYS 5C	Introduction to Physics III	5
PHYS 5N	Introduction to Physics Laboratory III	1
	or these courses	
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics I Laboratory	1
PHYS 6B	Introductory Physics II	5
PHYS 6M	Introductory Physics II Laboratory	1
PHYS 6C	Introductory Physics III	5
PHYS 6N	Introductory Physics III Laboratory	1

PHYS 15A can substitute for PHYS 5A, and PHYS 15C for PHYS 5C.

Plus the following course:

PHYS 5D	Introduction to Physics IV	5

Plus one of the following courses:

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 20A	Honors Calculus	5

Plus one of the following courses:

MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 20B	Honors Calculus	5

Plus all of the following courses:

MATH 23A	Vector Calculus	5
MATH 23B	Vector Calculus	5

Upper-Division Courses

All of the following courses:

PHYS 102	Modern Physics	5
PHYS 133	Intermediate Laboratory	5

Plus three elective courses

These can be any 5-credit physics upper-division courses chosen from PHYS 100 to PHYS 180, or courses from the following list:

AM 107	Introduction to Fluid Dynamics	5
AM 114	Introduction to Dynamical Systems	5
ASTR 111	Order-of-Magnitude Astrophysics	5
ASTR 112	Physics of Stars	5
ASTR 113	Introduction to Cosmology	5
ASTR 117	High Energy Astrophysics	5
ASTR 118	Physics of Planetary Systems	5
EART 121	The Atmosphere	5
EART 160	Planetary Science	5
EART 172	Geophysical Fluid Dynamics	5
ECE 101	Introduction to Electronic Circuits	5
ECE 102	Properties of Materials	5
ECE 103	Signals and Systems	5
ECE 130	Introduction to Optoelectronics and Photonics	5
ECE 136	Engineering Electromagnetics	5
ECE 141	Feedback Control Systems	5
ECE 171	Analog Electronics	5
ECE 172	Advanced Analog Circuits	5
ECE 178	Device Electronics	5
MATH 130	Celestial Mechanics	5

The elective courses cannot be offered by the department that sponsors the student's major. Other courses may be taken as electives with the approval of the Physics Department undergraduate faculty adviser.

Students who complete a major sponsored by the Physics Department cannot complete a second major sponsored by the Physics Department or the physics minor.

SCIENCE EDUCATION B.S.

Information and Policies

Introduction

Twenty-first century science educators must be able to help their students develop and apply a scientific perspective to a wide range of information. The science education major is designed to prepare future secondary science teachers in California with a broad background across the sciences—the physical sciences, life sciences, Earth sciences, and space sciences—with advanced specialization in two fields of science (chosen from physics, chemistry, biology, and Earth sciences). The major integrates education coursework and middle and high school classroom internships designed to develop skills and knowledge relevant to teaching K-12 students in the state of California. The major is mainly intended to prepare students for teacher certification programs and the California Subject Examinations for Teachers (CSET), so that they can teach science in California high schools.

Cal Teach is one home base for all students in this major, no matter the choices for specialization. Cal Teach (CaT) provides the required sequence of middle and high school-based internships and associated courses in partnership with schools throughout Santa Cruz County. Each internship placement depends on school schedules and the intern's schedule, interests, and academic preparation. The CaT seminar courses provide the framework for science education majors to develop classroom-management strategies, practice communicating scientific concepts for non-specialists (children), and design lessons to teach the science standards currently used in K-12 education. Departmental advising is provided by the Physics Department and the program faculty.

The program is designed to prepare outstanding candidates to enter teaching credential programs after completion. Students earn a Bachelor of Science (B.S.) degree. They do not earn a teaching credential. Most students elect to complete this after graduation. Details of how to prepare for admission to a teaching credential program are available on the Education Department's Careers in K-12 School Teaching page.

Program Learning Outcomes

Learning outcomes summarize the most important knowledge, skills, abilities, and attitudes that students are expected to develop over the course of their studies. The program learning outcomes communicate the faculty's expectations to students, provide a framework for faculty evaluation of the curriculum based on empirical data, and help improve and measure the impact of implemented changes:

- Students will demonstrate knowledge and an understanding of scientific connections across the broad spectrum of the sciences.
- Students will demonstrate advanced knowledge in two areas of specialization.
- Students will show that they have learned laboratory skills in multiple scientific fields, enabling them to take measurements in a laboratory and in the field and analyze the measurements to draw valid conclusions.
- Students will communicate scientific concepts effectively and accurately, both orally and in writing, for both college-level and secondary audiences
- Students will apply strategies to address a diversity of K-12 learners' needs.

Academic Advising for the Program

Academic advising for the major is provided by the Physics Department undergraduate adviser. Transfer students should also consult the Transfer Information and Policy section of this program statement. Students should contact calteach@ucsc.edu as early as possible to be set up to enroll in the Cal Teach internship courses, which are required for the major.

Getting Started in the Major: Frosh

This is a course-intensive program, and students who intend to pursue this major must begin taking classes for the major in their first year at UC Santa Cruz.

This major is designed for students interested in teaching science in California high schools. It may be suitable for students who start out in other science majors and are interested in high school teaching.

Because of the broad based nature of the major, with introductory courses in physics, chemistry and mathematics, there is considerable flexibility in what courses are taken in the first two years, as long as enough courses required for the major are completed. However, it is simplest to follow the appropriate major planner given here; students should consult with the physics undergraduate adviser if they want to do something different.

Math placement is required for one or more of the foundational courses for this major. For more information, please review the Math Placement website.

Students should complete at least two courses in the calculus sequence (MATH 11A and MATH 11B or MATH 19A and MATH 19B) in the first year; MATH 19A and MATH 19B are required for students who choose physics as one of their specializations.

Transfer Information and Policy

Transfer Admission Screening Policy

Note: This major is intended for students who are interested in teaching science in high schools in the state of California. For more information, please see the program statement for this major in the UC Santa Cruz General Catalog.

Six of the following courses or their equivalents are required prior to transfer, by the end of the spring term for students planning to enter in the fall.

BIOE 20B	Development and Physiology	5
BIOE 20C	Ecology and Evolution	5
BIOL 20A	Cell and Molecular Biology	5
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
PHYS 6A	Introductory Physics I	5
PHYS 6B	Introductory Physics II	5
PHYS 6C	Introductory Physics III	5
STAT 5	Statistics	5
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3C	General Chemistry	3
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5

Courses from either the CHEM 3 series or the CHEM 4 series, not both, can be used. Students can complete CHEM

1A, CHEM 1B and CHEM 1C as an alternative to CHEM 3A, CHEM 3B and CHEM 3C.

Getting Started in the Major: Transfer Students

Transfer students admitted to UC Santa Cruz in this major should contact the Physics Department undergraduate adviser as soon as possible to draw up an academic plan, specifying the two fields out of physics, chemistry, biology and earth sciences which they wish to specialize in. Because the program includes courses from several departments, and different students complete different courses prior to matriculation, an individual academic plan is essential for timely graduation. If any courses that are not articulated to UC Santa Cruz courses have been completed, they may be reviewed for equivalence if requested; course descriptions and other details may be needed for such a review.

Students should also contact CalTeach as soon as possible after coming to UC Santa Cruz to be set up to enroll in the CalTeach internship courses, which are required for the major.

Students may declare the major at any time after coming to UC Santa Cruz. Contact physics advising for details.

Students who are proposed in a different major and have advanced standing when they come to UC Santa Cruz require permission from the Science Education faculty program director to change into the major.

Major Qualification Policy and Declaration Process

Major Qualification

Students must complete at least six 5-credit courses from the lower-division course requirements before they can declare the major. (Lecture/lab combinations count as one course.)

In addition, students are strongly encouraged to complete EDUC 50C before deciding to declare this major.

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the program director through physicsadvising@ucsc.edu by the later date of either 15 days from the date the notification was sent, or one week after the start of instruction during the quarter after the final relevant grade was received. Within 15 days of receipt of the appeal, the program director will either finalize the denial of admission or specify further conditions for admission, and will notify the student and their college of the decision.

How to Declare a Major

Students should submit a petition to declare as soon as they complete the major qualification requirements or reach their declaration deadline quarter (whichever comes first).

Students petitioning when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh), will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification courses.

Students should meet with the Physics Department undergraduate adviser and prepare an academic plan when they declare the major. (Transfer students should have prepared an academic plan already; see the section Getting Started in the Major: Transfer Students.)

Letter Grade Policy

All courses used to satisfy any of the major requirements must be taken for a letter grade.

[Optional Catchall]

Course Substitution Policy

Double Majors and Major/Minor Combinations Policy

Study Abroad

Honors

Honors in the major are awarded to graduating students whose academic performance demonstrates excellence at a grade point average (GPA) of 3.5 or above in the courses used to satisfy major requirements. Highest honors are awarded to those students whose performance demonstrates the highest level of excellence and results in a GPA of 3.8 or above in the courses used to satisfy major requirements. The program faculty reserve the right to withhold honors and highest honors based on other criteria such as an incident of academic dishonesty.

[Optional Catchall]

Requirements and Planners

Course Requirements

Lower-Division Courses

Choose one of the following courses:

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 11A	Calculus with Applications	5

Plus one of the following courses:

MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 11B	Calculus with Applications	5

Plus the following course:

MATH 22	Introduction to Calculus of Several Variables	5

MATH 22 is waived for a student who chooses their electives from chemistry and biology or from Earth sciences and biology.

Plus one of the following options:

	Either these courses	
PHYS 5A	Introduction to Physics I	5
PHYS 5B	Introduction to Physics II	5
PHYS 5M	Introduction to Physics II Laboratory	1
PHYS 5C	Introduction to Physics III	5
PHYS 5N	Introduction to Physics Laboratory III	1
	or these courses	
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics I Laboratory	1
PHYS 6B	Introductory Physics II	5
PHYS 6M	Introductory Physics II Laboratory	1
PHYS 6C	Introductory Physics III	5
PHYS 6N	Introductory Physics III Laboratory	1

Plus one of the following options:

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3BL	General Chemistry Lab	2
CHEM 3C	General Chemistry	3
CHEM 3CL	General Chemistry Lab	2
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4AL	Advanced General Chemistry Lab	2
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4BL	Advanced General Chemistry Lab	2

Note: This requirement may also be satisfied with prior completion of CHEM 1A, CHEM 1B, CHEM 1C, CHEM 1M, and CHEM 1N or equivalent.

Previous to July 1, 2023, the General Chemistry series, offered by the Department of Chemistry and Biochemistry, was listed in the General Catalog as CHEM 1A, CHEM 1B, and CHEM 1C, with associated laboratories CHEM 1M and CHEM 1N. As of academic year 2023-24, this series was replaced with two distinct series: CHEM 3A, CHEM 3B, and CHEM 3C, with labs CHEM 3BL and CHEM 3CL; or CHEM 4A and CHEM 4B with labs CHEM 4AL and CHEM 4BL. Descriptions of these two series are given here.

Plus one of the following options:

	Either these courses	
EART 5	California Geology	5
EART 5L	California Geology Laboratory	1
	or these courses	
EART 10	How the Earth Works	5
EART 10L	Geologic Principles Laboratory	1
	or these courses	
EART 20	Environmental Geology	5
EART 20L	Environmental Geology Laboratory	1

Plus all of the following courses:

BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOE 20C	Ecology and Evolution	5

Plus one of the following courses:

ASTR 1	Introduction to the Cosmos	5
ASTR 2	Overview of the Universe	5
ASTR 5	Introductory Astronomy: The Formation and Evolution of the Universe	5
ASTR 10	From the Big Bang to Planet Earth	5

Plus one of the following options:

	Either this course	
STAT 5	Statistics	5
	or these courses	
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2
	or this course	
ASTR 119	Introduction to Scientific Computing	5

ASTR 119 should be taken by students who select physics as one of their fields of specialization (see the Electives section below), to enable them to take the required course PHYS 133.

Plus the following course:

EDUC 50C	CAL Teach 1: Science	2

Upper-Division Courses

The following course:

EART 110A	Evolution of the Earth	7

Plus one of the following courses:

EDUC 100A	Cal Teach 2: Science and Mathematics	2
EDUC 100C	Cal Teach 2: Science	2

Plus all of the following courses:

EDUC 185L	Introduction to Teaching: Cal Teach 3	3
EDUC 185C	Introduction to Teaching Science	5

Plus one of the following courses:

EDUC 177	Teaching Linguistically Diverse Students	5

EDUC 128	Immigrants and Education	5
EDUC 140	Language, Diversity, and Learning	5
EDUC 181	Race, Class, and Culture in Education	5

Electives

All the courses from any two of the following fields must be completed:

Field 1: Physics

PHYS 5D	Introduction to Physics IV	5
PHYS 102	Modern Physics	5
PHYS 133	Intermediate Laboratory	5

Field 2: Chemistry

CHEM 8A	Organic Chemistry	5
CHEM 8L	Organic Chemistry Laboratory	2
CHEM 8B	Organic Chemistry	5
CHEM 8M	Organic Chemistry Laboratory	2

Field 3: Biology

BIOL 105	Genetics	5
BIOE 107	Ecology	5
BIOE 109	Evolution	5

Field 4: Earth Sciences

EART 110B	Earth as a Chemical System	5
EART 110M	Earth as a Chemical System Laboratory	2
OCEA 90	Fundamentals of Climate	5

Disciplinary Communication (DC) Requirement

The disciplinary communication requirement for this major is fulfilled by completing:

Choose one of the following courses:

EDUC 100A	Cal Teach 2: Science and Mathematics	2
EDUC 100C	Cal Teach 2: Science	2

Plus the following course:

EDUC 185L	Introduction to Teaching: Cal Teach 3	3

Comprehensive Requirement

The senior capstone requirement for this major is fulfilled by completing:

EDUC 185C	Introduction to Teaching Science	5

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements (p. 1438) for more information.

Four-Year Planner

There are several alternatives to this planner. However, changes to an individual plan must take into account various prerequisites, both within the sequence of courses in a single discipline and between disciplines. Consult with an adviser before attempting an alternative path.

	Fall	Winter	Spring	Summer
Entering				
1st (frosh)	MATH 11A[#]	MATH 11B	BIOE 20C	
	CHEM 3A	CHEM 3B & CHEM 3BL	CHEM 3C & CHEM 3CL	
2nd (soph)	PHYS 6A & PHYS 6L[#]	PHYS 6B & PHYS 6M	PHYS 6C & PHYS 6N	
	EART 5 & EART 5L	BIOL 20A	BIOE 20B	
	EDUC 50C**	STAT 5	EDUC 100C	
3rd (junior)	ASTR course	MATH 22*	EDUC 185C	
	EART 110A	EDUC diversity course	Field A course	
	Field A course	Field A course		
4th (senior)	Field B course	Field B course	Field B course	
			EDUC 185L	

In addition to the specific courses shown in these planners, a student must complete courses satisfying the CC, IM and TA general education requirements.

#Students choosing physics as one of their fields of specialization must take MATH 19A and 19B instead of MATH 11A and MATH 11B, and the PHYS 5 series of courses instead of PHYS 6.

*MATH 22 is a prerequisite for CHEM 163A (recommended for chemistry + Earth sciences) and CHEM 163B (recommended for chemistry + physics). MATH 22 is required for this major only if a student chooses physics as one of their fields or chooses the combination chemistry + Earth sciences. Consult your adviser with questions.

**See advance enrollment requirements and process in the Lower-Division Courses section above.

Field A and B refer to the two subject areas a student chooses for specialization. Courses in each field are:

1. Physics: PHYS 5D (fall), PHYS 102 (winter), PHYS 133 (spring)
2. Earth sciences: OCEA 90 (fall), EART 110B & EART 110M (winter), Earth science upper-division elective (spring).
3. Biology: BIOL 105 (fall), BIOE 107 (winter), BIOE 109 (spring)
4. Chemistry (three options):
    a. CHEM 163A (fall), CHEM 8A & CHEM 8L (winter), CHEM 8B & CHEM 8M (spring) for chemistry with Earth sciences
    b. CHEM 8A & CHEM 8L (fall), CHEM 163B (winter), CHEM 8B & CHEM 8M (spring) for chemistry with physics
    c. CHEM 8A & CHEM 8L (fall), CHEM 8B & CHEM 8M (winter), CHEM 103 (spring) for chemistry with biology

Transfer Planner

	Fall	Winter	Spring	Summer
Entering				
1st (junior)	EART 5 & EART 5L	EDUC 50C**	EDUC 100C	
	ASTR course	MATH 22*	Field A course	
	Field A course	Field A course	EDUC 185C	
2nd (senior)	Breadth course 1	Breadth course 2	Breadth course 3	
	EART 110A	EDUC diversity course	EDUC 185L	
	Field B course	Field B course	Field B course	

*MATH 22 is a prerequisite for CHEM 163A (recommended for chemistry + Earth sciences) and CHEM 163B (recommended for chemistry + physics). A student who has completed the equivalent at their community college will not need to complete this course at UC Santa Cruz. MATH 22 is required for this major only if a student chooses physics as one of their fields or chooses the combination chemistry + Earth sciences. Consult your adviser with questions.

**See advance enrollment requirements and process in the Lower-Division Courses section above.

This planner assumes that the student has completed all general education requirements, and nine courses out of the 12 breadth requirements in physics, chemistry, biology and mathematics & statistics. The remaining three "breadth courses" can be taken in the three slots shown.

Elective courses for each field are described below the four-year planner. If courses in Field A cannot be taken in the junior year, they can be exchanged with the breadth courses shown in the senior year.

PHYSICS CONTIGUOUS BACHELOR'S/MASTER'S PATHWAY

Information and Policies

Introduction

The five-year combined Bachelor's/Master's degree physics program provides undergraduate students the opportunity to earn a Master of Science (M.S.) degree in five years. Students are able to start their graduate coursework in their junior year and can use up to two elective requirements between degrees. This program is designed for students who intend to go into industry upon graduation and is not well-suited for those who ultimately want to obtain a Ph.D. in physics. The Combined B.S./M.S. has a two-stage application, one at the departmental level (due second quarter of junior year) and then another at the graduate program level (due first quarter of senior year). Upon successful completion of their undergraduate requirements students are awarded their B.S. in Physics, and providing that they still meet the relevant criteria, may continue into the M.S. program. In order to be awarded the M.S. students finish any remaining M.S. coursework and then defend their M.S. thesis.

Requirements for taking graduate courses:

Students enrolling in PHYS 210, PHYS 212, or PHYS 215 must earn a B or better in the related undergraduate course as a prerequisite. For example, for a student to take PHYS 210 in their senior year they must acquire a grade of B or better in PHYS 105.

Graduate courses taken while registered as an undergraduate must be taken for a letter grade.

Departmental Admission Requirements:

- 3.3 GPA overall and within physics
- Two letters of recommendation (at least one from a physics faculty member)
- Departmental Application
- Statement of Purpose. This statement should explain your interest in the BS./M.S. program and your proposed research topic.
- Due by the end of the second quarter of junior year

Graduate Program Requirements:

- 3.0 GPA overall and within physics
- Successful completion of PHYS 139A, taken for a letter grade and completed with a B or better, even if not required for the undergraduate degree
- Three letters of recommendation (two from physics faculty, one from research adviser)
- Unofficial transcripts
- Statement of Purpose
- Due by the end of the first quarter of their senior year.

Letters of recommendation for departmental admission requirements can overlap with letters of recommendation for graduate program requirements.

Course Requirements

All of the following

PHYS 210	Classical Mechanics and Thermal Physics	5
PHYS 212	Electromagnetism I	5
PHYS 215	Introduction to Non-Relativistic Quantum Mechanics	5
PHYS 219	Statistical Physics	5
PHYS 297A	Independent Study	5
PHYS 297A	Independent Study	5

Students must take 10 credits of PHYS 297A as a graduate student. These should be taken in winter and spring of the "+1" year. Modifications to this schedule are allowed with permission of the program director.

Plus four graduate courses from M.S. electives

PHYS 214	Electromagnetism II	5
PHYS 216	Advanced Topics in Non-Relativistic Quantum Mechanics	5
PHYS 217	Quantum Field Theory I	5
PHYS 218	Quantum Field Theory II	5
PHYS 220	Theory of Many-Body Physics	5
PHYS 221A	Introduction to Particle Physics I	5
PHYS 221B	Introduction to Particle Physics II	5
PHYS 222	Quantum Field Theory III	5
PHYS 224	Particle Astrophysics and Cosmology	5
PHYS 226	General Relativity	5
PHYS 231	Introduction to Condensed Matter Physics	5
PHYS 232	Condensed Matter Physics	5
PHYS 233	Advanced Condensed Matter Physics	5
PHYS 234	Soft Condensed Matter Physics	5
PHYS 240	Polymer Physics	5
PHYS 242	Computational Physics	5
PHYS 251	Group Theory and Modern Physics	5
PHYS 290	Special Topics	5

With approval from the program director, students may take graduate courses from other departments.

PHYSICS M.S.

Introduction

The Physics Department welcomes students interested in the master's degree. Master's candidates can perform research in any of the areas covered by the department. They develop laboratory and computational skills which are of value in many fields. These include electronics design, computer simulation and visualization, cryogenics, X-ray scattering, complex novel materials and devices, materials science and biophysics. Each M.S. student is assigned a faculty adviser who helps to design a coursework plan suited to the interests of the student.

Physics students and faculty use a number of UC Santa Cruz research facilities described at the beginning of this section and elsewhere in this catalog, including facilities of the Santa Cruz Institute for Particle Physics(SCIPP) and the UC Observatories (headquartered at UC Santa Cruz). There is strong interaction with other disciplines, especially astronomy and astrophysics, biology, chemistry, Earth sciences,

electrical engineering, and mathematics. Proximity to the SLAC National Accelerator Laboratory and the Stanford Synchrotron Radiation Laboratory provides additional local research opportunities. UC Santa Cruz faculty and graduate students also participate in research programs at CERN in Geneva, Los Alamos, Oak Ridge National Laboratory, NASA Ames, NREL, Lucent, Xerox, IBM, Bell Labs, and other national and international laboratories.

The application procedure and requirements for the M.S. program is identical to those of the Ph.D. program.

Application materials and brochures describing the physics M.S. and Ph.D. graduate programs in more detail may be obtained by visiting the Physics Department website or by contacting the Division of Graduate Studies.

Students pursuing the Ph.D. degree can apply for a master's degree upon successful completion of the requirements for a master's degree.

Requirements

Course Requirements

The following courses are required for M.S. students:

PHYS 202	Introduction to Teaching in Physics	1
PHYS 210	Classical Mechanics and Thermal Physics	5
PHYS 212	Electromagnetism I	5
PHYS 215	Introduction to Non-Relativistic Quantum Mechanics	5
PHYS 219	Statistical Physics	5

Choose four of the following courses:

PHYS 214	Electromagnetism II	5
PHYS 216	Advanced Topics in Non-Relativistic Quantum Mechanics	5
PHYS 217	Quantum Field Theory I	5
PHYS 218	Quantum Field Theory II	5
PHYS 220	Theory of Many-Body Physics	5
PHYS 221A	Introduction to Particle Physics I	5
PHYS 221B	Introduction to Particle Physics II	5
PHYS 222	Quantum Field Theory III	5
PHYS 224	Particle Astrophysics and Cosmology	5
PHYS 226	General Relativity	5
PHYS 231	Introduction to Condensed Matter Physics	5
PHYS 232	Condensed Matter Physics	5
PHYS 233	Advanced Condensed Matter Physics	5
PHYS 234	Soft Condensed Matter Physics	5
PHYS 240	Polymer Physics	5
PHYS 242	Computational Physics	5
PHYS 251	Group Theory and Modern Physics	5
PHYS 290	Special Topics	5

M.S. Thesis Requirement

Students may obtain a master’s degree through coursework (nine physics graduate courses) and submission of an approved thesis. The thesis requirement may be waived by passing four sections of the written pre-qualifying examination. Master’s candidates are encouraged to write a research thesis and may do so in any of the research fields in the program, thereby developing laboratory and computational skills in areas such as electronics design, computer simulation and visualization, cryogenics, X-ray scattering, complex novel materials and devices, or materials science. Each M.S. student is assigned a faculty adviser who helps to design a coursework plan suited to the interests of the student.

Other Requirements

[Optional Catchall]

Applying for Graduation

Students must apply for graduation in order to receive their M.S. degree. The form can be found on the physics graduate student forms page and should be submitted to the Graduate Division.

PHYSICS PH.D.

Introduction

The Ph.D. program in physics at UC Santa Cruz is a leader in outstanding physics research programs. We provide intellectually rich, vibrant, and challenging courses to prepare students for careers in experimental and theoretical astrophysics, biophysics, condensed matter physics and materials science, cosmology, particle physics theory, and particle physics experiments. Aligning a student's research interests and those of the department are particularly important; each doctoral student is assigned a faculty advisor who helps design a research project suited to both.

Admission Process

We are committed to providing an excellent education to a diverse population of graduate students, and encourage candidates from all backgrounds to apply. While taking into consideration a candidate's undergraduate grade point average (GPA), letters of recommendation, student statements, and Graduate Record Examinations (GRE) scores (if provided), applicants are not disqualified based on any single factor. We employ a holistic process to assess candidates’ knowledge and passion for physics, as well as whether or not they have the

perseverance and tenacity required to complete the doctoral program. In particular, the department recognizes the documented limitations of the GRE as an equitable predictor of success in graduate studies and research.

More information on the admission process can be found on the Physics Department's admissions page.

Advancement to Candidacy

To Advance to Candidacy (ATC), students must:

- complete all course requirements;
- have no Incomplete (I) grades;
- pass all five sections of the Written Qualifying Exams;
- nominate an Oral Qualifying Exam Committee and pass the Oral Qualifying Exam;
- nominate a Dissertation Reading Committee;
- pay the ATC fee.

Course Requirements

The exact number of courses required to complete the degree will depend on a student's preparation for graduate study and on their progress toward the degree as evaluated by the department.

Core courses

In the first year of study, Ph.D. students are expected to take two core graduate-level courses per quarter from the following list of courses required for the Ph.D. degree:

PHYS 210	Classical Mechanics and Thermal Physics	5
PHYS 212	Electromagnetism I	5
PHYS 214	Electromagnetism II	5
PHYS 215	Introduction to Non-Relativistic Quantum Mechanics	5
PHYS 216	Advanced Topics in Non-Relativistic Quantum Mechanics	5
PHYS 219	Statistical Physics	5

Additional first-year courses

First-year students are also required to take the following two courses:

PHYS 205	Introduction to Research in Physics	2
PHYS 202	Introduction to Teaching in Physics	1

Additional course first and second years

First- and second-year students are required to take the following course every quarter:

PHYS 292	Seminar

Elective courses

An additional requirement are two graduate-level electives chosen in consultation with the student's faculty adviser. Students are allowed to take more than two electives.

The table below is for informational purposes only. A student's plan may vary depending on prior coursework, research opportunity, and individual circumstance.

Sample Planner

Year	Fall	Winter	Spring	Summer
1st	Written Quals			TA/GSI/Research

6th	PHYS 299B	PHYS 299B	PHYS 299B	Deadline to graduate in normative time
			Appy for Ph.D.	
			Defend Dissertation	

Foreign Language Requirements

Teaching Requirements

Written Qualifying Exams

All Ph.D. students must pass a qualifying examination consisting of five written tests in the areas of:

- mathematical methods
- classical mechanics
- quantum mechanics
- statistical mechanics
- electricity and magnetism

Once a student passes an examination in any one of the five areas they do not need to take an exam in that area again.

Students have a first opportunity to take these five tests at the beginning of their first year. If necessary, students have a second opportunity to pass the written tests at the beginning of the second year. Students with at most one or two failed tests have a third opportunity to pass their remaining tests at the beginning of the winter quarter of their second year.

Students who fail any of the remaining tests at this third and last attempt, and students who have not passed three or more of the five written tests after two attempts can either transfer to the terminal M.S. program, or appeal to the Graduate Committee to continue on the Ph.D. route. In the latter case, the Graduate Committee considers whether there is evidence of likely success in the Ph.D. program. The committee evaluates and reviews the student's progress toward candidacy, including performance in courses and progress in research, and may require possible remedial coursework or an oral examination, or may require that the student transfer to the terminal M.S. route.

Qualifying Examination

Undertaking and passing the Qualifying Exam is the next step.

1) Student submits the **Committee Nomination of Doctoral Qualifying Examination**

After identifying an appropriate research project with their faculty advisor, students form an Oral Qualifying Examination Committee:

- At least four examiners, one of whom is not a member of the student's department;
- The Committee Chair, a tenured ladder-rank UCSC faculty member (the Physics Department allows the student's faculty advisor);
- A ladder-rank UCSC faculty member (may be the advisor), typically but not necessarily from the Physics Department.
- A ladder-rank faculty member (may be the advisor), typically but not necessarily from the Physics Department.
- The outside member must be a tenured ladder-rank UCSC faculty member from a department other than Physics; a tenured faculty member of the same or similar discipline from another academic institution; OR a recognized expert in the student's research area from outside academic with significant research experience equivalent to a tenured faculty member.

In the event that the outside member is not from UCSC, they must have credentials equivalent to a tenured faculty member as judged by the Graduate Committee and the Graduate Dean. The outside member's CV must be submitted along with the QE exam committee nomination form.

Additional members may be added to the committee above the minimum requirements. Students should consult their advisors about the membership of their committee.

A ladder rank faculty (Academic Senate member) holds the title of Assistant Professor, Associate Professor, or Professor. Associate Professors and Professors have tenure.

2) At the Oral Qualifying Examination, the student presents their research progress, outlines a path to successful completion of their dissertation work, and answers questions both about their research program and about the research area generally.

3) Committee Chair submits the outcome of the exam on the Report on Qualifying Examinations to the Graduate Coordinator, preferably within one week of the exam;

4) Student submits the Nominations for Dissertation Reading Committee to the Graduate Coordinator

Advancement to Candidacy takes effect on the first day of the quarter following the receipt of the Qualifying Examination Report, the Dissertation Reading Committee Form, Language Requirement form (if applicable), and the Advancement to Candidacy fee in the Graduate Division. Additionally, the student must be registered for at least one quarter between advancing to candidacy and the awarding of the degree.

Graduate Handbook - Degree Requirements and Completion

Post-Qualifying Requirements

Additional Information

Full-Time Status

Full-time status is considered:

- at least 10 credits per quarter for graduate students not yet Advanced to Candidacy;
- at least 10 credits per quarter for graduate students who have Advanced to Candidacy;
- at least 10 or 12 credits per quarter for International student graduates depending on your visa. Please check with ISSS on course minimum requirements for your visa.

Registrar - Enrollment Information

ISSS - Maintaining a Full Time Course Load

Grade Requirements

All graduate students in graduate or undergraduate courses will be graded Satisfactory (S), Unsatisfactory (U), or Incomplete (I).

Graduate students also have the option of receiving a letter grade of A, B, C, D, or I in most courses. The grades of A or B shall be awarded for satisfactory work. Grades of C or D will not satisfy any course requirement for a graduate degree at UCSC.

Graduate Handbook - Degree Requirements and Completion

Dissertation

Dissertation

Ph.D. candidates prepare and submit a dissertation based on original research under the supervision of their research advisor. When the student and advisor agree that the thesis is nearing completion or is complete, the thesis is examined by the student's Dissertation Reading Committee.

Dissertation and Thesis Checklist

Dissertation and Thesis Guidelines

Dissertation Reading Committee

The Dissertation Reading Committee must have a minimum of three readers, and at least half of the committee must be members of the Santa Cruz Division of the Academic Senate (typically composed of the same members as the Oral Qualifying Examination Committee). A change in membership of the committee must be approved by the Graduate Dean.

Nominations for a Dissertation Reading Committee to read and pass upon the dissertation, subject to the approval of the Graduate Dean, should be submitted to the Graduate Division with the report of the oral qualifying examination.

Dissertation Defense

A public dissertation defense is required. Students should work with their committee to confirm a defense date and time. The Physics Department can assist with providing a room for the defense and with publicizing the event. Students should have a final or nearly final draft of their dissertation and provide it to their committee prior to the defense. We suggest at least one month prior, but this is at the committee’s discretion. The graduate advisor and/or the Graduate Committee can provide guidance as to the procedures for selection of committee membership, the format of the examination, and required reporting.

Academic Progress

Annual evaluation ordinarily is the joint responsibility of the graduate coordinator and the assigned faculty advisor or the chair of the student's doctoral committee. An evaluation should include a brief review of the student's work to date, with particular attention to the period since the last report, describing the student's progress toward the degree, pointing out any areas in which improvement is recommended or required, and establishing academic objectives for the following period.

The results of annual reviews are committed to writing and signed by the supervisor and another faculty member. This is to ensure evaluation and consent by more than one individual faculty member, who may also be a principal source of financial and other support. Before a doctoral student has advanced to candidacy, the second signer may be the graduate coordinator; after advancement, a second thesis committee member must also sign. The annual evaluations are distributed to the student and kept in the student's file in the department office. They form the basis for decisions about continued financial support, academic probation and/or dismissal, extensions of financial aid beyond normative time, and other matters.

Normative time to degree for the program is six years.

Applying for Graduation

Students apply for the Ph.D. and submit to the Graduate Coordinator at the beginning of the term they intend to graduate:

Application for the Ph.D. Degree

Additional Information

Ph.D. Residency Requirement

The minimum residence requirement for the Ph.D. degree is six terms, three of which must be spent in residence at the University of California, Santa Cruz campus. Residence is established by the satisfactory completion of one course per term.

See the Division of Graduate Studies for information on dissertation requirements and completion.

Exit Forms

Ph.D. graduates are asked to complete:

- National Science Foundation (NSF) Survey of Earned Doctorates
- UCSC Doctoral Placement Survey

PROGRAMS OFFERED

Science Communication M.S. (p. 501)

SCIENCE COMMUNICATION M.S.

Introduction

The Science Communication (SCIC) master's program is a graduate program comprised of one track: science writing. Students combine a background in scientific research with a desire to communicate science to the general public. The program focuses on the practice of conceiving, reporting, writing, and editing articles on scientific, medical, environmental, and technological subjects for newspapers and magazines, online news outlets, universities and federal agencies, and special publications directed at general readers. The program in science writing offers intensive training in news, features, multimedia storytelling, profiles and essays, and investigative reporting. Graduates receive a Master of Science (M.S.) in science writing. For more information about our graduation rates and other information, please visit our website.

Requirements

Course Requirements

The program accepts 10 students per year. Enrollment in science writing classes is strictly limited to students enrolled in the program. The program consists of one academic year of full-time study, beginning in fall quarter, followed by a full-time summer internship lasting a minimum of 10 weeks. Science Notes, the UCSC online science magazine, is produced annually by the graduate students. Please see the current issue and an archive of past issues on our website.

The program consists of a required sequence of six courses covering the main skills of professional journalism:

SCIC 201A	Reporting and Writing Science News	5
SCIC 201B	The Science Feature	5
SCIC 201C	Profile and Essay Writing	5
SCIC 201D	Policy and Investigative Reporting	5
SCIC 201E	Multimedia Science News	5
SCIC 202	Writing and Editing Workshop	5

Other Requirements

Admission to the Science Communication Graduate Program

Students who have an intimate acquaintance with the theory and practice of science, an aptitude for writing, and a strong desire to communicate science to the general public are ideal candidates for the program. All applicants must have a prior degree in science or engineering (B.S./B.A., M.S., or Ph.D.) to be eligible. Other admission requirements are: full-time research experience of at least six months duration; and at least three references from faculty or supervisors familiar with the applicant's research and communications skills. Applications and instructions can be found online through the UCSC Graduate Division website.

Further Information

Details about the Science Communication M.S. program may be obtained from the Science Communication Program office, our website, or by sending e-mail to scicom@ucsc.edu.

Professor Alexander Wolf, Dean

Baskin Engineering (BE) has a high-technology focus incorporating programs and curricula that educate students to meet the changing demands of society and a high-technology global marketplace. The school offers a stimulating academic

environment that provides a foundation for professional growth as well as a lifetime of learning. Baskin Engineering programs and courses prepare students for the human aspects, as well as the technical challenges, of careers in engineering, computer science, and bioinformatics. Baskin Engineering includes the Department of Applied Mathematics, the Department of Biomolecular Engineering, the Department of Computational Media, the Department of Computer Science and Engineering, the Department of Electrical and Computer Engineering, and the Department of Statistics.

GRADUATE STUDY

Baskin Engineering offers 16 graduate programs designed to prepare students for advanced study and research in major areas of biomolecular, computer, and electrical engineering, as well as statistics and applied mathematics:

- Applied Mathematics M.S. and Ph.D.
- Biomolecular Engineering and Bioinformatics M.S. and Ph.D.
- Computational Media M.S. and Ph.D.
- Computer Science and Engineering M.S. and Ph.D.
- Electrical and Computer Engineering M.S. and Ph.D.
- Games and Playable Media M.S.
- Human Computer Interaction M.S.
- Natural Language Processing M.S.
- Scientific Computing and Applied Mathematics M.S.
- Statistical Science M.S. and Ph.D.

These programs are described in subsequent sections. The aim of these programs is to develop professionals who can address the complex scientific and technological problems of today and tomorrow.

Graduate Student Affairs Office

The Baskin Engineering Graduate Student Affairs/Advising Office offers general advising for prospective and current students in Baskin Engineering graduate programs. The office handles general advising, financial support processing, and degree certifications. Graduate students obtain and submit all paperwork requiring departmental approval to the Graduate Student Affairs office. Students may obtain additional information and assistance on the Baskin Engineering Graduate Student Affairs website.

UNDERGRADUATE STUDY

Undergraduate Majors

Baskin Engineering offers eight undergraduate Bachelor of Science (B.S.), three Bachelor of Arts (B.A.) and three contiguous B.S./M.S. degree programs in the following majors:

- Applied Mathematics B.S.
- Biomolecular Engineering and Bioinformatics B.S. or contiguous B.S/M.S.*
- Biotechnology B.A.
- Computer Engineering B.S. or contiguous B.S./Computer Science and Engineering M.S.
- Computer Science B.A. and B.S. or contiguous B.S./Computer Science and Engineering M.S.
- Computer Science: Computer Game Design B.S.
- Electrical Engineering B.S. or contiguous B.S./Electrical and Computer Engineering M.S.
- Network and Digital Technology B.A.
- Robotics Engineering B.S. or contiguous B.S./Electrical and Computer Engineering M.S.
- Scientific Computing and Applied Mathematics contiguous B.S./M.S.
- Statistical Science contiguous B.S./M.S.
- Technology and Information Management B.S.

*The contiguous B.S./M.S. is only available from the bioinformatics concentration in the B.S.

Applied Mathematics. Applied mathematics is a field of research specializing in the development and application of analytical and numerical tools and techniques toward the solution of complex quantitative problems in science and engineering. A Bachelor of Science (B.S.) in Applied Mathematics prepares graduates for careers in the industry (usually in research and development) or academia (either in teaching and/or in research at university or governmental laboratories or agencies). It can be a terminal degree, or prepare students for graduate school in applied mathematics or related fields.

Biomolecular Engineering and Bioinformatics. The biomolecular engineering and bioinformatics major includes the biomolecular engineering (BME) and bioinformatics (BINF) concentrations. The BME concentration is designed for students interested in protein engineering, stem cell engineering, and synthetic biology. The emphasis is on designing biomolecules (DNA, RNA, proteins) and cells for particular functions, and the underlying sciences are biochemistry and cell biology. The BINF concentration combines mathematics, science, and engineering to explore and understand biological data from high-throughput experiments, such as genome sequencing, gene-expression chips, and proteomics experiments. The program builds upon the research and academic strengths of the faculty in the Biomolecular Engineering Department.

Biotechnology. The Bachelor of Arts in Biotechnology is intended for students who plan to be involved in the biotechnology industry as writers, artists, ethicists, executives, sales force, regulators, lawyers, politicians, and other roles

that require an understanding of the technology, but not the intensive training needed for technicians, research scientists, engineers, and bioinformaticians. (For those more technical roles, the biomolecular engineering and bioinformatics major or the molecular, cell, and developmental biology major is recommended.) A biotechnology student completing the program will have familiarity with several different biotechnologies and be able to apply ethical reasoning to make decisions about biotechnology in a global, economic, environmental, and societal context.

Computer Engineering. The computer engineering curriculum focuses on making digital systems that work. It overlaps with computer science on one end (software systems) and with electrical engineering on the other (digital hardware). The emphasis of our program is on design rather than analysis—on making things work, rather than on explaining the abstract theory of computation or electronics. The program's emphasis on problem solving provides both excellent training for future engineers and a strong foundation for graduate study. The combined B.S./M.S. program provides an opportunity for outstanding undergraduates to begin advanced study and earn both degrees in five years.

Computer Science. The computer science curriculum has options that include topics in hardware and software, giving students a solid grounding in both theoretical and practical aspects of computer technology and computer usage. The bachelor of arts focus is designed to give students a solid grounding in both theoretical and practical topics in computer science, computer engineering, and mathematics while leaving flexibility for a broad program of study, including many courses outside of science and engineering. The bachelor of science curriculum has a stronger concentration in the sciences, with more courses in computer science and computer engineering. Students become proficient in many areas, with a good academic foundation for various careers in the software industry, as well as preparation for graduate school.

Computer Science: Computer Game Design. The computer game design curriculum is a four-year interdisciplinary program that focuses on the technical, dramatic, and artistic elements of computer games. The program provides a rigorous education in computer science, in concert with a broad introduction to those aspects of art, music, narrative, digital media, and computer engineering most relevant to games. A game design studio sequence permits students to create substantial video games as part of a multi-student team. Students receive proficiency in many aspects of computer science, a good academic foundation for careers in the computer game industry or information technology industry, or for the pursuit of graduate studies in computer science, or computer game design.

Electrical Engineering. The electrical engineering curriculum provides a balance of engineering science and design and allows students to specialize in both the traditional topics and the latest subjects in electrical engineering. Students may concentrate their electives in the areas of communications and signal processing, control and signal processing, electronics and photonics, power and energy systems, digital hardware, or robotics and automation. The major is designed to attract motivated students who, upon graduation, will be sought by employers in the high-tech industry. The electrical engineering program is accredited by The Engineering Accreditation Commission of ABET, https://www.abet.org.

Network and Digital Technology. The network and digital technology B.A. program provides students with in-depth knowledge of the underlying structure and function of network and computer technology and the design processes which make these technologies function. The program, through its flexible requirements, is especially tailored to students who wish to combine technology with other fields, such as through a double major or a minor, or who, through the choice of electives, wish to concentrate on the digital design or computer networks aspects of computer engineering in preparation for future employment. The network and digital technology B.A. program is offered by the Computer Science and Engineering Department.

Robotics Engineering. The robotics engineering program prepares graduates for rewarding careers at the interfaces between electrical, computer, and mechanical engineering. UCSC robotics engineering graduates have a thorough grounding in the principles and practices of robotics and control, and the scientific and mathematical principles upon which they are built; graduates will be prepared for further education (both formal and informal) and for productive employment in industry.

Technology and Information Management. The technology and information management (TIM) curriculum is multidisciplinary and focuses on the fusion of information systems, technology, and business management for two purposes: the use of information systems to solve business problems and the management of technology, which includes new product development and enterprise management. Students must learn the mathematics, science, and technical fundamentals of computer science and engineering as well as understand the environment in which information technology (IT) solutions will be applied—through economics, business, and management of technology courses. It is a rigorous, challenging major for those students wanting to pursue careers in information systems management and the management of technology.

Undergraduate Minors

Undergraduate students may choose from the following nine minor options:

Applied Mathematics. The applied mathematics minor is available to students who wish to develop 1) proficiency in modeling real-life problems using mathematics and 2) knowledge of standard, practical analytical and numerical methods for the solution of these models. This minor could be combined with a major in any of the physical, biological, mathematical, or engineering sciences as preparation for a graduate degree in that field or in applied mathematics.

Assistive Technology. The guiding principle of the assistive technology minor is robotic assistance for people with

movement disabilities, which can include such concepts as motorized prostheses, exosuits, motorized wheelchairs, or follow-me luggage.

Bioelectronics and Biophotonics. The bioelectronics and biophotonics minor is primarily focused on electronics and photonics from devices to systems required for interfacing biology with electronics from sensors to actuators and diagnostics.

Bioinformatics. The bioinformatics minor is intended primarily for bioinformatics tool users who are majoring in a biological or chemical specialty. The bioinformatics minor is also appropriate for computer science or computer engineering majors who are considering graduate work in bioinformatics.

Computer Engineering. The computer engineering minor provides a solid foundation in digital hardware, electronics, and computer software, as well as the prerequisite material in mathematics and physics. The minor is well-suited to students who wish to take part in the design of computer and embedded systems in any discipline.

Computer Science. The computer science minor is available for students whose primary interest is in another area, and are interested in the applications of computer science in other areas of study, from art and music to business and science.

Electrical Engineering. The electrical engineering minor provides a solid foundation in the core areas of electronic circuits and signals and systems, as well as the prerequisite material in mathematics and physics. Concentration of upper-division electives in either of the major tracks constitutes substantial and focused work in the discipline of electrical engineering. This minor is particularly suitable for students with majors in applied physics or any Baskin Engineering major.

Statistics. The statistics minor is available for students who wish to gain a quantitative understanding of how to a) measure uncertainty, and b) make good decisions on the basis of incomplete or imperfect information and apply these skills to their interests in another field. This minor could also be combined with a major in mathematics as preparation for a graduate degree in statistics or biostatistics.

Technology and Information Management. The technology and information management minor provides undergraduates in Baskin Engineering as well in other programs and divisions in the university, such as economics and business management economics, the physical and biological sciences, and arts, the opportunity to expand the breadth of their knowledge and training to include the management of information systems and the management of technology.

Undergraduate Advising Office

The Baskin Engineering undergraduate advising office offers general advising for prospective and declared undergraduates majoring in Baskin Engineering programs. The office handles major declarations, transfer credits, course substitutions, articulations, and degree certifications. Undergraduate students obtain and submit all paperwork requiring departmental approval to the undergraduate advising office. Students may obtain additional information and assistance on the Baskin Engineering undergraduate advising website.

Admission to Baskin Engineering Majors

High School Preparation for Engineering Students

It is recommended that high school students intending to apply to a Baskin Engineering major have completed four years of mathematics (through advanced algebra and trigonometry) and three years of science in high school. Comparable college mathematics and science courses completed at other institutions also serve to properly prepare students for these majors.

College Board Advanced Placement Credit

Prospective students are encouraged to take the College Board Advanced Placement (AP) and International Baccalaureate (IBH) Examinations as acceptable scores on these examinations may satisfy both university or major degree requirements. Prospective engineering students should consider taking examinations in computer science, mathematics, economics, chemistry, physics, or biology. Students must provide official examination scores to the UCSC Office of Admissions to be granted credit toward course prerequisites or degree requirements. The following AP and IBH scores are accepted for course credit requirements as follows:

CEEB AP Exam	Score	UCSC Course Credit
Biology	5	BIOL 20A, Cell and Molecular Biology; and BIOE 20B, Development and Physiology
Computer Science: Exam A	3	CSE 10, Intro. to Computer Science
	4 or 5	CSE 5J, Intro. to Programming in Java
Computer Science: Principles	3, 4, 5	CSE 10, Intro. to Computer Science
Economics: Microeconomics	4 or 5	ECON 1, Introductory Microeconomics
Economics: Macroeconomics	4 or 5	ECON 2, Introductory Macroeconomics
Mathematics: Precalculus	3, 4, 5	MATH 3, Precalculus
Mathematics: Calculus AB	3	MATH 3 or AM 3, Precalculus
Mathematics: Calculus AB	4 or 5	MATH 3 or AM 3, Precalculus MATH 11A, Calculus with Applications MATH 19A, Calculus for Science, Engineering and Math
Mathematics: Calculus BC	3	MATH 3 or AM 3, Precalculus MATH 11A, Calculus with Applications MATH 19A, Calculus for Science, Engineering and Math
Mathematics: Calculus BC	4 or 5	MATH 3 or AM 3, Precalculus MATH 11A, Calculus with Applications; and MATH 11B, Calculus with Applications MATH 19A, Calculus for Science, Engineering and Math; and MATH 19B Calculus for Science, Engineering and Math
Physics: C Mechanics	4 or 5	PHYS 6A and PHYS 6L

	5	Phys 5A and PHYS 5L
Physics: C Electricity and Magnetism	4 or 5	PHYS 6C and PHYS 6N
	5	PHYS 5C and PHYS 5N

International Baccalaureate Credit

IBH Exam	Score	UCSC Course Credit
Computer Science	5, 6, 7	Computer Science and Engineering 5J, Introduction to Programming in Java

Students may check with the Office of Admissions for details about other AP and IBH examinations that also satisfy university requirements.

Admission as First-Year Students

Students interested in pursuing a Baskin Engineering major should indicate the major as their first or second choice on the UC application for admissions. Most Baskin Engineering programs require that students be listed as a proposed major in order to be admitted. The proposed major status is also required to enroll in many BE major courses.

Computer Science

Students interested in pursuing a computer science B.S. or B.A. **must** indicate the major on their University of California application for admission. Students who do not indicate this on their application will **NOT** be allowed to declare the computer science major. Students must be admitted as proposed computer science majors in order to declare the major.

Proposed Major Retention

A proposed engineering major status carries several benefits including being connected to advising, receiving pertinent communication, and priority access to enrolling in some required major courses. Baskin Engineering majors require students to be listed as a proposed major in one of the following majors in order to declare: biomolecular engineering and bioinformatics, computer engineering, computer science: computer game design, computer science (B.A. and B.S.), electrical engineering, robotics or technology and information management.

Students who are interested in computer science who are **NOT** listed as proposed computer science majors will not be allowed to migrate into the major. Students must properly list computer science as their proposed major.

Students pursuing applied mathematics, network and digital technology and biotechnology are not required to be proposed in any BE majors in order to declare applied mathematics, network and digital technology and biotechnology.

Students in their fourth quarter or beyond who would like to become a proposed major, or students who are proposed and would like to retain their proposed status, must have passed MATH 19A or MATH 20A, and two additional classes from the following list within their first three quarters: CHEM 3A or CHEM 4A, BIOL 20A, CSE 12, CSE 13S or ECE 13, CSE 16, CSE 30, MATH 19B, MATH 20B, PHYS 5A, PHYS 5C, TIM 50, or TIM 58.

Students who are in an engineering proposed major and who do not meet these criteria will be removed from their proposed major. Students who want to change to an engineering proposed major must also meet these criteria. Students that do not meet these criteria can appeal this decision within 15 days of notification. Within 15 days of receipt of the appeal, the student will receive the appeal decision. More information about the appeals process can be found on the Undergraduate Advising website.

Declaring a Baskin Engineering Major

The Baskin Engineering major declaration process can be found on the BE Undergraduate Advising Declare Your Major page. Students should start the declaration of major process as soon as they complete the major qualification requirements or reach their declaration deadline quarter (whichever comes first). Major qualification criteria for BE majors are specified on the BE Undergraduate Advising Major Qualification Requirements page.

Students petitioning when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh), will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification courses. Major declaration petitions must be submitted by the sixth quarter of study at UC Santa Cruz (second regular quarter for students admitted with upper-division standing), including students petitioning to declare a BE major as their second major.

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal this decision within 15 days of notification by following the steps on the BE Undergraduate Advising Major Declaration Appeal site. In most cases, within 15 days of receipt of the appeal, the student will receive the appeal decision.

If you have further questions concerning the appeal process, please contact the Undergraduate Advising Office at (831) 459-5840 or email bsoeadvising@ucsc.edu.

Junior Transfer Acceptance to Majors

Baskin Engineering strongly encourages applications from transfer students. Due to the prerequisite structure for upper-division courses, prospective transfer students should have completed as many of the lower-division major requirements as possible to complete the degree within a reasonable time.

Students must plan carefully because many courses must be taken sequentially.

Students are encouraged to follow the new UC Transfer Pathways. Any student who finishes the UC Transfer Pathways courses for computer science will more than satisfy the admission requirements for transfer to computer science, computer engineering, robotics, and network and digital technology. Any student who finishes the UC Transfer Pathways courses for electrical engineering will more than satisfy the admission requirements for electrical engineering, computer engineering, and robotics. Note that each department will have different GPA requirements for these courses.

Completion of mathematics and engineering courses is essential for transfer students; those applying to selective majors should carefully verify the admission requirements for their major.

Students who apply as transfer students with junior status (90 quarter credits or more of transfer credit) who wish to earn a degree from Baskin Engineering must indicate a Baskin Engineering major as their first choice on their UC application.

Acceptance into the major is based on the student's academic college record and preparation for the major. Applicants are encouraged to take and excel in as many courses that are equivalent to the department's lower-division major requirements as possible. For many Baskin Engineering majors, this includes completion of a year of calculus (accepted as equivalent to Mathematics 19A-B), linear algebra, differential equations, a year of calculus-based physics courses (accepted as equivalent to Physics 5A, 5B, 5C), and two programming courses are strongly recommended.

Letter Grade Policy

Starting Fall 2014, all students admitted to a Baskin Engineering major, or seeking admission to a major, must take all courses required for that major for a letter grade.

Ethics Requirement

Graduates of Baskin Engineering are expected to become professionals with the highest ethical standards. Knowledge and practice of professional ethics is a requirement for the degree. Examples of professional society codes of ethics are available on the IEEE and ACM websites. Students of Baskin Engineering are also expected to adhere to high ethical standards while pursuing their undergraduate studies.

Substitutions for Courses Taken at UCSC

Undergraduate engineering students who wish to substitute a major course with a course from UC Santa Cruz must first consult the Baskin Engineering Undergraduate Advising Office. The advising office requires a Petition for Course Substitution be approved before credit for an alternate course can be applied to any Baskin Engineering major requirement. Petition forms are available on the Undergraduate Advising Forms, Petitions, and Policies page.

Petitions and procedures for approval must be obtained from and submitted to the Undergraduate Advising Office.

Course Equivalencies and Substitutions Taken at an Outside Institution

Students should seek pre-approval for the use of courses planned to be taken at another institution when those courses are not already articulated (visit Assist.org). Courses may not apply to major or minor requirements if they are not articulated or pre-approved.

If the course is not listed on Assist.org, students must submit a course substitution petition to the BE Undergraduate Advising Office to have it reviewed for equivalency. Courses that need to be reviewed must be accompanied by a course description and syllabus. It is very helpful if students can provide further evidence of course content, such as examples of programming assignments, homework, or examinations. To guarantee equivalency, departments may sometimes require a grade of B or better. Forms and procedures for approval can be obtained from and submitted to the BE Undergraduate Advising Office.

Four-Year Institutions and the UC Education Abroad Program (UCEAP)

Students who intend to take a course at a four-year institution or UC Education Abroad, must submit a Course Substitution Petition to the BE Undergraduate Advising Office to have the course reviewed for equivalency. Courses that need to be reviewed must be accompanied by a course description and syllabus. It is very helpful if students can provide further evidence of course content, such as examples of programming assignments, homework, or examinations. To guarantee equivalency, departments may sometimes require a grade of B or better.

If the course is approved for equivalency, then the student must also receive approval by their major department PRIOR to taking the class. Forms and procedures for approval can be obtained from and submitted to the BE Undergraduate Advising Office.

Computing

Personal Computer Requirement

Baskin Engineering (BE) requires that all BE students own a laptop. A MAC or PC from the last several years is generally acceptable. The exact Normal minimum specifications appear on the Undergraduate Advising website.

Computing Facilities

Baskin Engineering houses research facilities and teaching laboratories in the Baskin Engineering Building for courses in programming, software design, circuits, electronics, graphics, digital design, and computer and system architecture. Emphasis in these laboratories is on state-of-the-art

equipment, including personal computers, engineering workstations, a 1000-processor Linux cluster, logic analyzers, microprocessor development systems, a wireless network for mobile computers, and network support at 100MB/sec. All Unix computers and workstations and most personal computers on campus are networked together, allowing students to access Baskin Engineering and the Information Technology Services (ITS) facilities from any computer account on campus. For a more complete description of the computing facilities on campus, see the ITS website.

Prerequisites

Because of the sequential nature of the Baskin Engineering curricula, most courses have prerequisites, which are listed in the course descriptions. Students should carefully review these descriptions in the catalog and the quarterly Schedule of Classes. Students must have passed all prerequisites of a course for which they are enrolling. Pre-enrolled students who then fail a prerequisite are no longer eligible to be enrolled in the course and will be dropped.

Students who have transferable course work from another institution that appears to satisfy a UCSC course prerequisite, but is not listed in current articulation agreements, should promptly consult with the Baskin Engineering staff advisers for guidance. Students will be asked to present records from the other institution to document the course equivalency. Until such evidence has been verified by the department, students attempting to enroll in a course using a prerequisite course that was not completed at UCSC will be informed that they have not satisfied the course prerequisite. (See Course Equivalencies and Substitutions Taken at an Outside Institution above.)

Permission Numbers

Students not meeting the regular prerequisite requirements for courses sponsored by Baskin Engineering may petition the course instructor to receive a permission number to enroll. The instructor may ask a student to demonstrate the ability and/or potential to succeed in the course or may request additional information to formulate a decision. If no instructor has been assigned to the course, please contact the Undergraduate Advising Office for direction. The Computer Science and Engineering Department requires that students wait until the first day of instruction to contact instructors about enrolling in their courses.

Fees

Materials Fee

Students should be aware that some laboratory courses require each student to purchase miscellaneous parts or a material kit for completion of the laboratory work. Some laboratory courses may include consumable (one-time use) parts and materials that are distributed to the entire class. Some laboratory kits include parts that the student will assemble into a project and keep. Please refer to the Baskin Engineering Laboratory Support web page for specific course material-fee amounts.

Miscellaneous Fees

Miscellaneous breakage or loss of equipment fees are assessed to address the cost of damaged laboratory equipment and loss of laboratory materials due to abuse or negligence. This fee is only charged if a student breaks or loses laboratory equipment or materials and is not a mandatory fee charged to all students taking the course. Please refer to the Baskin Engineering Laboratory Support web page for more information.

Applied Mathematics

Baskin Engineering
(831) 459-2158
engineering.ucsc.edu

PROGRAMS OFFERED

Applied Mathematics B.S. (p. 509)

Applied Mathematics Minor (p. 517)

Scientific Computing and Applied Mathematics Contiguous Bachelor's/Master's Pathway (p. 518)

Applied Mathematics M.S. (p. 519)

Applied Mathematics Ph.D. (p. 520)

Scientific Computing and Applied Mathematics M.S. (p. 523)

Scientific Computing Designated Emphasis (p. 525)

Applied mathematics is a discipline devoted to the use of mathematical methods and reasoning to solve real-world problems of a scientific or decision-making nature in a wide variety of subjects, principally (but not exclusively) in engineering, medicine, the physical and biological sciences, and the social sciences.

The Applied Mathematics Department at UC Santa Cruz offers a Bachelor of Science (B.S.) degree in Applied Mathematics, Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) programs in Applied Mathematics, and a M.S. program in Scientific Computing and Applied Mathematics (SciCAM). The department also offers a Designated Emphasis in Scientific Computing, and an undergraduate minor in Applied Mathematics.

Additional information on these programs can be found on the department's website.

UNDERGRADUATE PROGRAM

The Department of Applied Mathematics offers a B.S. degree in Applied Mathematics. The goal of the program is to prepare students for careers in industry (usually in research and development) or academia (either in teaching and/or in research at university or governmental laboratories or agencies). The program can be a terminal degree, or can be

used to prepare students for graduate school in applied mathematics or related fields.

GRADUATE PROGRAM

The Department of Applied Mathematics offers M.S. and Ph.D. programs in Applied Mathematics, as well as a M.S. program in Scientific Computing and Applied Mathematics (SciCAM), and a Designated Emphasis in Scientific Computing.

The goal of the Applied Mathematics graduate program is to help students develop into independent scholars who are prepared for productive careers in research, teaching, and industry. The M.S. degree may be used as a terminal degree or as the first step toward the associated Ph.D. degree.

The goal of the SciCAM M.S. program is primarily to prepare students interested in scientific computing for productive careers in industry. However, it also serves as excellent preparation for students who prefer to pursue an academic career and wish to transfer into a Ph.D. program later, either in scientific computing/applied mathematics, or in a field related to their undergraduate degree.

APPLIED MATHEMATICS B.S.

Information and Policies

Introduction

Applied mathematics is a field of research specializing in the development and application of analytical and numerical tools and techniques toward the solution of complex quantitative problems in science and engineering. A Bachelor of Science (B.S.) in Applied Mathematics prepares graduates for careers in the industry (usually in research and development) or academia (either in teaching and/or in research at university or governmental laboratories or agencies). It can be a terminal degree, or it can prepare students for graduate school in applied mathematics or related fields.

The applied mathematics major at the University of California, Santa Cruz provides students with holistic training in mathematical modeling. The core of the degree program includes six courses that introduce modern analytical (and semi-analytical) techniques as well as general aspects of scientific computing. Students gain further depth or breadth by taking three (or more) electives among a large list of upper-division or graduate courses offered by applied mathematics faculty or in related subject areas. Finally, students learn to apply the techniques and tools learned through two capstone courses that focus on modeling “real-life” quantitative problems in science and engineering. In these courses, students also learn additional skills such as mathematical abstraction, critical thinking, and disciplinary communication.

The major has been designed to allow students to pursue an additional minor or major in an area of applications of mathematics (such as physics, astrophysics, Earth sciences, computer sciences, computer engineering, electrical engineering), and/or to pursue the 4+1 pathway into the Master of Science (M.S.) degree program in Scientific Computing and Applied Mathematics also offered by the Department of Applied Mathematics.

Academic Advising for the Program

Baskin Engineering's Undergraduate Advising Office is located in the Baskin Engineering Building, Room 225. It can be contacted by email at bsoeadvising@ucsc.edu or at the Baskin Engineering Undergraduate Advising website.

Transfer students to the program should consult the Transfer Students section of the Baskin Engineering Undergraduate Advising website.

Program Learning Outcomes

Recipients of a B.S. degree in applied mathematics at UC Santa Cruz are expected to have the following skills and experiences:

1. To be able to take a real-life science or engineering problem, and create a mathematical model for it, under the supervision of a professor.
2. To be competent with a number of analytical methods for the solution of linear algebra problems, as well as ordinary and partial differential equations.
3. To be competent with constructing numerical algorithms for the solution of linear algebra problems and ordinary differential equations.
4. To be competent in at least two scientific computing languages such as: Fortran, C, Python, R, Matlab, etc. and to be familiar with other computational elements such as Unix-type operating systems, the use of compilers, professional scientific computing libraries, efficient IO algorithms, data visualization tools, etc.
5. To be able to analyze critically the results obtained from a proposed model, and identify when the model is inappropriate.
6. To be able to communicate clearly and coherently with professionals (orally and in writing), in order to: (1) understand what is needed of the mathematical model prior to the investigation; and (2) report on the results of the model after the investigation.

Optional Catchall

Getting Started in the Major: Frosh

It is recommended that high school students intending to apply to this major have completed four years of mathematics (through advanced algebra and trigonometry) and three years of science in high school. Comparable college mathematics and science courses completed at another institution also serve to properly prepare students for this major.

This is a course-intensive and/or sequential program, and students who intend to pursue this major must begin taking classes for the major in their first year at UC Santa Cruz.

Math placement may be required for one or more of the foundational courses for this major. For more information, please review the Math Placement website.

Transfer Information and Policy

Transfer Admission Screening Policy

To be considered for admission to the applied mathematics major, incoming transfer students should complete the following courses:

One of the following courses:

AM 10	Linear Algebra for Engineers	5
MATH 21	Linear Algebra	5

Plus one of the following:

AM 20	Ordinary Differential Equations for Engineers	5
MATH 24	Ordinary Differential Equations	5

Plus one of the following

	Either this course	
AM 30	Multivariate Calculus for Engineers	5
	or these courses	
MATH 23A	Vector Calculus	5
MATH 23B	Vector Calculus	5

Plus one of the following options:

	Either these courses	
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
	or these courses	
MATH 20A	Honors Calculus	5
MATH 20B	Honors Calculus	5

Getting Started in the Major: Transfer Students

Transfer students should declare their major in their first quarter at UC Santa Cruz. Instructions for declaring a major in Baskin Engineering are on the Baskin Engineering's Declare Your Major website. If you satisfy the transfer admissions screening requirements, you are not required to take additional coursework in order to declare.

Major Qualification Policy and Declaration Process

Major Qualification

In order to be admitted into the applied mathematics major, students must be listed as a proposed major within the Baskin Engineering or within the Division of Physical and Biological Sciences. Please refer to Prepare to Declare a Baskin Engineering Major.

Transfers to the program should consult the Transfer Admission Screening Requirements and the Transfer Students section of the Baskin Engineering Undergraduate Affairs page.

In addition to being listed as a proposed Baskin Engineering or Physical and Biological Sciences major, admission to the applied mathematics major is based on passing the following foundational courses:

Foundation Courses

One of the following series:

	Either these courses	
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
	or these courses	
MATH 20A	Honors Calculus	5
MATH 20B	Honors Calculus	5

Plus one of the following options

AM 30	Multivariate Calculus for Engineers	5
	or these courses	
MATH 23A	Vector Calculus	5
MATH 23B	Vector Calculus	5

AM 30 is preferred.

Plus one of the following:

AM 10	Linear Algebra for Engineers	5
MATH 21	Linear Algebra	5

AM 10 is preferred.

Plus one of the following:

AM 20	Ordinary Differential Equations for Engineers	5
MATH 24	Ordinary Differential Equations	5

AM 20 is preferred.

Appeal Process

Denials of admission to the major may be appealed by submitting a letter to Baskin Engineering's Undergraduate Advising office, addressed to the program undergraduate director within 15 days from the date the notification was mailed. The appeal letter must describe why the prior performance is not an accurate reflection of the student's potential. Within 15 days of receipt of the appeal, the

Undergraduate Advising office will notify the student and their college of the decision.

How to Declare a Major

There are four steps to declaring a Baskin Engineering major. For a detailed guide to this process, please consult Baskin Engineering's Declare Your Major website.

Students should start the major declaration process by completing Step One on the Baskin Engineering's Declare Your Major website as soon as they complete the major qualification courses or reach their declaration deadline quarter, whichever comes first.

Students petitioning when the campus declaration deadline is imminent (i.e., in their sixth quarter, for students admitted as frosh), will either be approved, denied, or provided with conditions (e.g., completion of some courses with certain grades) that will be resolved within at most one more enrolled quarter, even if they have not completed major qualification courses.

Letter Grade Policy

Baskin Engineering requires letter grades for all courses in an engineering major.

[Optional Catchall]

Course Substitution Policy

Undergraduate engineering students who wish to substitute a major course with a course from UC Santa Cruz must first consult Baskin Engineering's Undergraduate Advising Office. The advising office requires a Petition for Course Substitution be approved before credit for an alternate course can be applied to any Baskin Engineering major requirement. Petition forms are available at the undergraduate advising office and on the Baskin Engineering advising website.

Petitions and procedures for approval must be obtained from and submitted to the Undergraduate Advising Office.

Double Majors and Major/Minor Combinations Policy

Students who are planning a double-major with physics can replace the AM 100 and AM 112 courses with the PHYS 116A and PHYS 116C courses. Special approval by both undergraduate directors will be required to do so.

Education Abroad Program (EAP)

Honors

Students must obtain a GPA of 3.8 or higher in the courses in the major to be considered for the distinction of "Highest Honors in the Major." Students must obtain a GPA of 3.5 or higher in the courses in the major to be considered for the distinction of "Honors in the Major." Baskin Engineering reserves the right to withhold honors based on other criteria, such as an incident of academic dishonesty.

Baskin Engineering Policies

Please refer to Baskin Engineering's Admission to School of Engineering Majors section of the catalog for additional policies that apply to all Baskin Engineering programs. These policies include admission to the major and the need for students to obtain preapproval before taking courses elsewhere.

Requirements and Planners

Course Requirements

Course requirements are divided into foundational lower-division courses and advanced upper-division courses. Some courses may be satisfied via exam credit.

Lower-Division Courses

Choose one of the following series:

	Either these courses	
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
	or these courses	
MATH 20A	Honors Calculus	5
MATH 20B	Honors Calculus	5

Credit for one or both MATH 19A and MATH 19B may be granted with adequate performance on the CEEB calculus AB or BC Advanced Placement examinations.

Plus one of the following courses:

AM 10	Linear Algebra for Engineers	5
MATH 21	Linear Algebra	5

AM 10 is preferred.

Plus one of the following courses:

AM 20	Ordinary Differential Equations for Engineers	5
MATH 24	Ordinary Differential Equations	5

AM 20 is preferred.

Plus one of the following options:

AM 30	Multivariate Calculus for Engineers	5
	or these courses	
MATH 23A	Vector Calculus	5
MATH 23B	Vector Calculus	5

AM 30 is preferred.

Plus one of the following options:

CSE 16	Applied Discrete Mathematics	5
MATH 100	Introduction to Proof and Problem Solving	5

MATH 100 is strongly recommended for students who eventually wish to take some upper-division electives in mathematics.

Plus one of the following programming courses

CSE 20	Beginning Programming in Python	5
CSE 13S	Computer Systems and C Programming	7
ECE 13	Computer Systems and C Programming	7
ASTR 19	Practical Programming for the Sciences	5

Through the lower-division programming course, students are expected to be competent in Python or C programming. The lower-division programming requirement can be satisfied with a prior programming course that is equivalent to one of CSE 20, CSE 13S, ECE 13, and ASTR 19 either via articulation on Assist.org or via approval by the applied mathematics program by sending a syllabus of the course to the department for review. The requirement can also be satisfied by passing the CSE 20 Testout exam after matriculation at UCSC.

Lower-Division Electives

Students are required to take two lower-division electives from the following list, in preparation for the upper-division electives they are later required to take. Students are encouraged to plan ahead carefully in consultation with undergraduate advising in making their selection.

EART, ECE, PHYS lower-division electives

Students interested in EART, ECE, PHYS upper-division electives should consider taking some of the following PHYS lower-division electives.

Several of these courses have corequisite lab courses. Lecture/lab combinations count as one course. Associated labs are required only when required by the lecture.

PHYS 5A	Introduction to Physics I	5
PHYS 5B	Introduction to Physics II	5
PHYS 5C	Introduction to Physics III	5
ASTR 21	The Diverse Universe: Stars, Planets, and Galaxies	5

CSE or ECE lower-division electives

Students interested in CSE or ECE upper-division electives should consider taking some of the following CSE or ECE lower-division electives (in addition to possible PHYS electives):

CSE 30	Programming Abstractions: Python	7
ECE 9	Statics and Mechanics of Materials	5

ECON and STAT lower-division electives

Students interested in ECON or STAT upper-division electives should consider taking some of the following ECON or STAT lower-division electives. Note that lecture/lab combinations count as one course.

ECON 1	Introductory Microeconomics: Resource Allocation and Market Structure	5
ECON 2	Introductory Macroeconomics: Aggregate Economic Activity	5
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2
STAT 17	Statistical Methods for Business and Economics	5
STAT 17L	Statistical Methods for Business and Economics Laboratory	2

STAT 17 (and associated lab STAT 17L) are strongly recommended for students wishing to take upper-division electives in economics.

Lower-division electives for mathematical biology

Students interested in mathematical biology (in particular AM 115) should consider taking some of the following BIOL or BIOE lower-division electives:

BIOL 20A	Cell and Molecular Biology	5
BIOE 20C	Ecology and Evolution	5

Upper-Division Courses

Complete the following core courses:

AM 100	Mathematical Methods for Engineers	5
AM 129	Foundations of Scientific Computing for Scientists and Engineers	5

Plus one of the following courses:

AM 147	Computational Methods and Applications	5
MATH 148	Numerical Analysis	5

Plus the following courses:

AM 112	Introduction to Partial Differential Equations	5
AM 114	Introduction to Dynamical Systems	5

Plus one of the following courses:

STAT 131	Introduction to Probability Theory	5
CSE 107	Probability and Statistics for Engineers	5

Upper-Division Electives

Students are required to take three upper-division elective courses from the following list of possible electives. Up to one of these electives can be replaced by a 5-credit independent study to do research with one of the program faculty.

Note that many of these electives have lower-division prerequisites. Students should plan carefully which ones to take to ensure they are prepared for their selected upper-division electives. Also note that enrollment in the graduate courses is by permission of the instructor, who will verify adequate preparation.

The upper-division electives should ideally be selected to form a concentration that prepares the student for their desired career or future choice of graduate school. Students interested in pursuing graduate school in applied mathematics (at UC Santa Cruz or elsewhere) are encouraged to choose upper-division electives from AM or MATH. Students interested in graduate school in a different discipline are strongly encouraged to pursue a minor (or a double-major) in that discipline, and choose upper-division electives that count for both the applied mathematics major and the minor or double major. Students interested in a career in the private sector should select upper-division electives that prepare them for that career, with recommendations listed on this website.

Possible AM Electives

Any 5-credit upper-division (100-199) or graduate (200-299) AM course that is not already a core course. AM 198 can only be used once for elective credit. AM 200, AM 211, and the AM 280 series and above may not be used.

Possible ASTR electives

ASTR 112	Physics of Stars	5
ASTR 113	Introduction to Cosmology	5
ASTR 119	Introduction to Scientific Computing	5

Possible BME electives

BME 118	Mathematics of the Mind	5
BME 160	Research Programming in the Life Sciences	6

Possible CSE Electives

Note that many require lower-division CSE courses. Lecture/lab combinations count as one course.

CSE 101	Introduction to Data Structures and Algorithms	5
CSE 102	Introduction to Analysis of Algorithms	5
CSE 104	Computability and Computational Complexity	5
CSE 106	Applied Graph Theory and Algorithms	5
CSE 108	Algorithmic Foundations of Cryptography	5
CSE 113	Parallel and Concurrent Programming	5
CSE 140	Artificial Intelligence	5
CSE 142	Machine Learning	5
CSE 144	Applied Machine Learning: Deep Learning	5
CSE 160	Introduction to Computer Graphics	7
CSE 161	Introduction to Data Visualization	5
CSE 161L	Data Visualization Laboratory	2
CSE 162	Advanced Computer Graphics and Animation	5
CSE 162L	Advanced Computer Graphics and Animation Laboratory	2

Note that most of these courses require CSE 101 as prerequisite. Enrollment restrictions may apply to many of these courses on short notice, and some have multiple upper-division prerequisites, and may, therefore, only be appropriate for double majors (or major-minor combinations).

Possible EART Electives

Note that many require lower-division PHYS or CHEM courses:

EART 112	Geophysical Data Science	5
EART 118	Seismotectonics	5
EART 119A	Introduction to Scientific Programming	5
EART 121	The Atmosphere	5
EART 124	Modeling Earth's Climate	5
EART 160	Planetary Science	5
EART 162	Planetary Interiors	5
EART 163	Planetary Surfaces	5
EART 164	Planetary Atmospheres	5

Either of the following courses:

EART 125	Statistics and Data Analysis in the Geosciences	5
EART 225	Statistics and Data Analysis in the Geosciences	5

Either of the following courses:

EART 172	Geophysical Fluid Dynamics	5
EART 272	Geophysical Fluid Dynamics	5

Possible ECE Electives

Lecture-lab combinations count as one course.

ECE 101	Introduction to Electronic Circuits	5
ECE 101L	Introduction to Electronic Circuits Laboratory	2
ECE 103	Signals and Systems	5
ECE 115	Introduction to Solid Mechanics	5
ECE 135	Electromagnetic Fields and Waves	5
ECE 135L	Electromagnetic Fields and Waves Laboratory	2
ECE 136	Engineering Electromagnetics	5
ECE 141	Feedback Control Systems	5

ECE 145	Estimation and Introduction to Control of Stochastic Processes	5
ECE 149	Introduction to Cyber-physical Systems	5
ECE 151	Communications Systems	5
ECE 153	Digital Signal Processing	5
ECE 163	Introduction to Small-Scale UAV Theory and Practice	7
ECE 179	Decision Analysis in Management	5

Note that most of these courses require ECE 101 as prerequisite. Many of these courses have more than one upper-division prerequisite beyond those that are already part of the core requirements. These courses may only be appropriate for double majors (or major-minor combinations).

Possible ECON Electives

Note that many require ECON lower-division courses:

ECON 100A	Intermediate Microeconomics	5
ECON 100B	Intermediate Macroeconomics	5
ECON 100M	Intermediate Microeconomics, Math Intensive	5
ECON 100N	Intermediate Macroeconomics, Math Intensive	5
ECON 101	Managerial Economics	5
ECON 113	Introduction to Econometrics	5
ECON 114	Advanced Quantitative Methods	6
ECON 115	Introduction to Management Sciences	5
ECON 124	Machine Learning for Economists	5
ECON 166A	Game Theory and Applications I	5

Note that some of these courses require more than one upper-division ECON prerequisite. Also, some of these courses have enrollment restrictions, and may require permission by the instructor and may, therefore, only be appropriate for double majors (or major-minor combinations).

Possible MATH Electives

MATH 105A	Real Analysis	5
MATH 105B	Real Analysis	5
MATH 105C	Real Analysis	5
MATH 110	Introduction to Number Theory	5
MATH 111A	Algebra	5
MATH 111T	Algebra	5
MATH 114	Introduction to Financial Mathematics	5
MATH 115	Graph Theory	5
MATH 116	Combinatorics	5
MATH 117	Advanced Linear Algebra	5
MATH 118	Advanced Number Theory	5
MATH 120	Coding Theory	5
MATH 121A	Differential Geometry	5
MATH 121B	Differential Geometry and Topology	5
MATH 124	Introduction to Topology	5
MATH 130	Celestial Mechanics	5
MATH 134	Cryptography	5
MATH 140	Industrial Mathematics	5
MATH 152	Programming for Mathematics	5
MATH 160	Mathematical Logic I	5

Note that most MATH electives require MATH 100 as a prerequisite, and that several of these courses have more than one upper division pre-requisite, or recommended prerequisites that students should take. These courses may only be appropriate for double majors, or for major-minor combinations.

Possible OCEA Electives

Note that some require lower-division PHYS electives, or upper-division ESCI electives:

OCEA 260	Introductory Data Analysis in the Ocean and Earth Sciences	5
OCEA 267	Applied Environmental Time Series Analysis	5
OCEA 286	Introduction to Ocean Modeling	5

Either of the following courses:

OCEA 100	Physical Oceanography	5
OCEA 200	Physical Oceanography	5

Either of the following courses:

OCEA 111	Climate Dynamics	5
OCEA 211	Climate Dynamics	5

Possible PHYS Electives

Note that many require lower-division PHYS courses:

PHYS 105	Mechanics	5
PHYS 110A	Electricity, Magnetism, and Optics	5
PHYS 110B	Electricity, Magnetism, and Optics	5
PHYS 139A	Quantum Mechanics I	5
PHYS 139B	Quantum Mechanics II	5
PHYS 150	Quantum Computing	5
PHYS 171	General Relativity, Black Holes, and Cosmology	5

The prerequisites of PHYS 116A and PHYS 116C are waived for students who have taken AM 100 and AM 112.

PHYS 139A, PHYS 139B, PHYS 171 are courses that have more than one upper-division prerequisite beyond those that are already part of the core requirements. These courses may only be appropriate for double majors (or major-minor combinations).

Possible STAT Electives

STAT 108	Linear Regression	5
STAT 132	Classical and Bayesian Inference	5

STAT 205	Introduction to Classical Statistical Learning	5

Possible TIM Electives

TIM 147	Introduction to Data Mining for Business	5
TIM 150	Optimization for Management	5

Disciplinary Communication (DC) Requirement

The DC requirement in the Applied Mathematics B.S. is satisfied by completing the capstone course AM 170A (see below).

Comprehensive Requirement

Students satisfy the senior comprehensive requirement by completing the capstone course sequence:

Either these two courses:

AM 170A	Mathematical Modeling 1	5
AM 170B	Mathematical Modeling 2	5

Or these two courses:

AM 170A	Mathematical Modeling 1	5
AM 195	Senior Thesis Research	5

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

The following are four sample academic plans that students can use to plan their sequence of courses in the major. The first two plans are suggested guidelines for students who begin their studies in their frosh year. Such students, if they plan carefully, will have several openings free to take other breadth courses they find interesting, or pursue an additional minor or major. The other two plans are for students transferring to UC Santa Cruz as juniors.

We generally encourage students to take AM 112 later in their curriculum, as this course requires proficiency in many different aspects of applied mathematics.

Plan One: This is a possible planner for a student entering UCSC in their frosh year who is prepared to go directly into MATH 19A or MATH 20A.

	Fall	Winter	Spring	**Summer**
Entering				College 1A Summer Edge (optional)
1st Year	MATH 19A	CSE 20	AM 20	
	AM 10	MATH 19B	CSE 16	
	College 1	WRIT 1/WRIT 1E (if needed)	Lower div elective	
2nd Year	AM 30	Lower-div elective	STAT 131	
	WRIT 2*	Lower-div elective	AM100	
3rd Year	AM114	AM 170A	Upper-div elective	
	Upper-div elective	AM 147		
4th Year	AM 129	AM 112	AM 170B	
		Upper-div elective		

* WRIT 2 should be taken in or before spring quarter of the second year.

The SI general education requirement is satisfied by passing the capstone course AM 170B. The MF general education requirement is satisfied by passing any of the lower-division mathematical foundations requirements.

Plan Two: This is a possible planner for a student entering UCSC their frosh year who needs to take preparatory courses prior to MATH 19A to ensure a successful outcome in this course.

	Fall	Winter	Spring	**Summer**
Entering				College 1A Summer Edge (optional)
1st Year	MATH 2	MATH 3 Lower-div elective WRIT 1/WRIT 1E (if needed)	MATH 19A Lower-div elective	
2nd Year	AM 10 MATH 19B WRIT 2*	AM 20 CSE 20	AM 30 CSE 16	
3rd Year	STAT 131 AM 114	AM 170A AM 147	AM 100 Upper-div elective	
4th Year	AM 129 Upper-div elective	AM 112 Upper-div elective	AM 170B	

* WRIT 2 should be taken in or before spring quarter of the second year.

The SI general education requirement is satisfied by passing the capstone course AM 170B. The MF general education requirement is satisfied by passing any of the lower-division mathematical foundations requirements.

Plan Three: This is a sample planner for a transfer student. It assumes the student has taken the majority of their general education requirements prior to joining UCSC.

	Fall	Winter	Spring	**Summer**
Entering				KRSG 1T Summer Edge (optional)
Junior Year	CSE 20 AM 100 Lower-div elective	CSE16 AM 147 Lower-div elective	STAT 131 Upper-div elective	
Senior Year	AM 114 AM 129 Upper-div elective	AM 170A AM 112	AM 170B Upper-div elective	

Plan Four: This is a sample planner for a transfer student interested in the 4+1 program for the comprehensive exam track. For the thesis track, replace two (or three) M.S. electives with Independent Studies. Note that the planner must ensure that there are at least 35 credits taken as a graduate student during the M.S. year.

	Fall	Winter	Spring	**Summer**
Entering				KRSG 1T Summer Edge

			(optional)
Junior Year	CSE 20	CSE16	STAT 131
	AM 100	AM 147	Upper-div elective
	Lower-div elective	Lower-div elective	Upper-div elective
Senior Year	AM 129	AM 170A	AM 170B
	AM 114	AM 112	Upper-div elective
M.S. Year*	M.S. elective	AM 213A	AM 213B
	M.S. elective	AM 160	AM 250
	Seminar	M.S. elective	Seminar

* Students in the 4+1 program take seven regular courses consisting of AM 160, AM 213A, AM 213B, AM 250 and three M.S. electives in their M.S. year. The specific arrangement of these seven courses shown in the M.S. year schedule above is just a sample and is subject to change.

APPLIED MATHEMATICS MINOR

The applied mathematics minor is available for students who wish to develop (1) proficiency in modeling real-life problems using mathematics; and (2) knowledge of standard, practical analytical and numerical methods for the solution of these models. This minor could be combined with a major in any of the physical, biological, mathematical, or engineering sciences as preparation for a graduate degree in that field or in applied mathematics.

Course Requirements

The applied math minor consists of the following requirements. Some courses may be satisfied via exam credit. Courses may be taken for a letter grade or Pass/No Pass.

Lower-Division Courses

Basic calculus sequence:

	Either these courses	
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
	or these courses	
MATH 20A	Honors Calculus	5
MATH 20B	Honors Calculus	5
	AND	
	Either these courses	
MATH 23A	Vector Calculus	5
MATH 23B	Vector Calculus	5
	or this course	
AM 30	Multivariate Calculus for Engineers	5

Plus one of the following sequences

	Either these courses	
AM 10	Linear Algebra for Engineers	5
AM 20	Ordinary Differential Equations for Engineers	5
	or these courses	
MATH 21	Linear Algebra	5
MATH 24	Ordinary Differential Equations	5
	or this course	
PHYS 116A	Mathematical Methods in Physics	5

Note: Students who complete MATH 21 and MATH 24 or PHYS 116A are strongly recommended to complete the MATLAB self-paced tutorial.

Upper Division Courses

Complete one course from each of the following categories

Mathematical Methods

AM 100	Mathematical Methods for Engineers	5

Dynamical Systems

AM 114	Introduction to Dynamical Systems	5

Introduction to Numerical Methods

AM 147	Computational Methods and Applications	5
PHYS 115	Computational Physics	5
MATH 148	Numerical Analysis	5

Partial Differential Equations

AM 112	Introduction to Partial Differential Equations	5
PHYS 116C	Mathematical Methods in Physics	5
MATH 107	Partial Differential Equations	5

Plus One Applied Mathematics Elective from the Following List

Any 5-credit upper-division (100-199) or graduate (200-299) AM course that is not already listed in the categories above. Independent studies (AM 198), AM 200, 211, and the 280 series and above may not be used.

CSE 107	Probability and Statistics for Engineers	5
ECE 103	Signals and Systems	5
ECE 115	Introduction to Solid Mechanics	5
ECE 141	Feedback Control Systems	5
MATH 103A	Complex Analysis	5
MATH 117	Advanced Linear Algebra	5
MATH 121A	Differential Geometry	5
PHYS 105	Mechanics	5
PHYS 139A	Quantum Mechanics I	5
PHYS 139B	Quantum Mechanics II	5
PHYS 171	General Relativity, Black Holes, and Cosmology	5
STAT 131	Introduction to Probability Theory	5
STAT 132	Classical and Bayesian Inference	5

Students may also propose other electives which use applied mathematical methods, subject to approval by the department.

SCIENTIFIC COMPUTING AND APPLIED MATHEMATICS CONTIGUOUS BACHELOR'S/MASTER'S PATHWAY

4+1 Contiguous Pathway leading to the SciCAM M.S. Degree

The 4+1 pathway into the SciCAM M.S. program is an option that allows undergraduates at UC Santa Cruz to (1) take the SciCAM foundational courses (AM 100, AM 112, AM 114, AM 129, and AM 147) during their undergraduate degree in preparation to join the 1-year track of the SciCAM program, and (2) apply to SciCAM through a streamlined application process. Undergraduate students currently enrolled in approved programs have the opportunity, any time between the start of their junior year and the end of the fall quarter of their senior year, to join the 4+1 contiguous pathway leading to the SciCAM degree program. Approved programs are:

- B.S. in Applied Mathematics
- B.S. in Astrophysics
- B.S. in Computer Engineering
- B.S. in Computer Science
- B.S. in Electrical Engineering
- B.A. in Mathematics (pure and computational)
- B.S. in Physics
- B.S in Robotics Engineering

Qualified undergraduates from other undergraduate majors may also apply to the 4+1 pathway and their applications will be considered on a case by case basis.

Admission Requirements

The requirements for admission into the 4+1 pathway are (1) a cumulative GPA of 3.3 or higher, and (2) to have taken, or to have a plan to take, at least four of the five SciCAM foundational courses before the end of their senior year. The five foundational courses are: AM 100 (Mathematical Methods for Engineers III), AM 112 (Introduction to Partial Differential Equations), AM 114 (Introduction to Dynamical Systems), AM 129 (Foundations of Scientific Computing for Scientists and Engineers), and AM 147 (Computational Methods and Applications). Note that some of the foundational courses are waived depending on the student's major, or can be substituted by other courses on a case by case basis, with approval from the 4+1 coordinator.

Interested students should schedule a meeting with the SciCAM 4+1 pathway director to discuss their curriculum plan and fill the application form, following the guideline on the 4+1 pathway website. The ultimate deadline for application to the pathway is Dec. 1 of the senior year, although students are encouraged to apply significantly earlier, ideally at the same time as their major declaration.

Students in the pathway who apply to SciCAM through the streamlined application process are not guaranteed admission, although we do expect to admit anyone who has passed all the foundational courses and has maintained a GPA of 3.3 or higher.

Program Requirements

Once accepted into the SciCAM program, students from the pathway will follow the same requirements as students in the regular SciCAM program (please refer to the SciCAM catalog page), but on an accelerated one-year track with anticipated graduation in spring of their M.S. year for Plan II (comprehensive exam track) students, and the end of the summer of their M.S. year for Plan I (thesis track) students.

Relationship of SciCAM Masters program and AM Doctoral Program

Students in the SciCAM M.S. program interested in an academic career will be strongly encouraged to apply to the AM Ph.D. program upon completion of their SciCAM M.S. degree. Applications are reviewed in the standard academic cycle. Students interested in applying to the AM Ph.D. program are encouraged to discuss this option with the graduate director in the fall of each year.

Transfer of Credit

Up to three UC Santa Cruz courses (15 credits) fulfilling the degree requirements of the SciCAM degree may be taken before beginning the graduate program. Note that this 15-credit limit does not apply to the requirements of the five foundational courses (AM 100, AM 112, AM 114, AM 129, and AM 147), which may all be taken prior to the start of the SciCAM program without penalty. However, students will still need to take courses totaling 35 credits while being graduate students to satisfy the university requirements.

Up to one course from other institutions may be applied to the M.S. degree course requirements. Petitions should be submitted along with the transcript from the other institution or UC Santa Cruz Extension. For courses taken at other institutions, copies of the syllabi, exams, and other course work should accompany the petition. Such petitions are not considered until the completion of at least one quarter at UC Santa Cruz.

Review of Academic Progress

Each year, the faculty reviews the progress of every student in the graduate programs. Students not making adequate progress toward completion of degree requirements are subject to dismissal from the program (see the UC Santa Cruz Graduate Handbook and the AM Graduate Handbook for the policy on satisfactory academic progress). Also, please refer to the Graduate Division's specific guidelines on annual student reviews.

APPLIED MATHEMATICS M.S.

Introduction

Graduate studies in applied mathematics (AM) at UC Santa Cruz focus on developing skill sets in mathematical modeling, analysis, and scientific computation applied to a broad range of science and engineering disciplines, including fluid mechanics, high-performance computing, mathematical biology, dynamical systems, stochastic processes, control, optimization, and scientific machine learning. The overarching goal of the AM graduate programs at UC Santa Cruz is to underscore the application of mathematics in solving real-life problems. In particular, the master of science (M.S.) program in applied mathematics prepares the students with the foundational analytical and numerical tools of applied mathematics, enabling them to perform research that transcends the disciplinary boundaries in science and engineering.

Requirements

Course Requirements

Students in the AM M.S. program must demonstrate mastery in the foundations of scientific computing and applied mathematics, either by submitting evidence of undergraduate transcripts to the AM graduate director for approval or by taking all of the following foundational courses upon entry to the M.S. program, or a combination of the two, by the end of their first year. These foundational courses can be taken for letter grade, or the Satisfactory/Unsatisfactory (S/U) grade scale option.

All of the following five courses:

AM 100	Mathematical Methods for Engineers	5
AM 112	Introduction to Partial Differential Equations	5
AM 114	Introduction to Dynamical Systems	5
AM 129	Foundations of Scientific Computing for Scientists and Engineers	5
AM 147	Computational Methods and Applications	5

Core Courses

All AM M.S. students must complete the following core courses: four regular courses (AM 212, AM 213A, AM 213B, AM 224), as well as one quarter of seminar course AM 280B, and at least one quarter of AM 297A, during which they work on their M.S. project. All four non-seminar courses must be taken for letter grades.

AM 212	Advanced Methods of Applied Mathematics	5
AM 213A	Numerical Linear Algebra	5
AM 213B	Numerical Methods for the Solution of Differential Equations	5
AM 224	Applied Dynamical Systems	5
AM 280B	Seminar in Applied Mathematical Modeling	2
AM 297A	Independent Study or Research	5

Elective Courses

In addition to the 27 core course credits, M.S. students must complete three additional regular 5-credit elective courses for a total requirement of 42 credits. As part of the three elective courses, students are required to take (at least) one elective course during their first year (called first-year elective). First-year electives are designed to prepare students for their ultimate research emphasis within applied mathematics. Possible first-year electives can be found in (but are not limited to) the following list:

AM 107	Introduction to Fluid Dynamics	5
AM 115	Stochastic Modeling in Biology	5
AM 148	GPU Programming for Scientific Computations	5
AM 160	Introduction to Scientific Machine Learning	5
AM 215	Stochastic Modeling in Biology	5
AM 217	Introduction to Fluid Dynamics	5
AM 229	Convex Optimization	5
AM 230	Numerical Optimization	5
AM 231	Nonlinear Control Theory	5

AM 232	Applied Optimal Control	5
AM 238	Fundamentals of Uncertainty Quantification in Computational Science and Engineering	5
AM 250	An Introduction to High Performance Computing	5

M.S. Project Requirements

Students must also conduct a capstone research master's project (AM 297A) to satisfy the Master's Plan II university requirement. Students in the AM M.S. program should identify a project advisor and research topic. The project will involve the solution of a problem or problems from the selected area of application. When the project is completed, students must submit an M.S. project report to their project reading committee for the committee's approval. The M.S. report must consist of at least 30 pages and no more than 60 pages of printed written work and accompanying pertinent figures, consisting of a coherent introduction and presentation of the current state of the field, a clear presentation of the questions raised, of the methodology used to solve them, and a discussion of the results obtained. The report will be read by the M.S. project reading committee to assess the quality of both written work for awarding the M.S. degree to the student.

The M.S. project reading committee must include two ladder-rank faculty members, consisting of the faculty advisor and one additional reader. At least one of these core two readers must be from within the Applied Mathematics Department. Additional readers will be chosen appropriately from within the Applied Mathematics Department or outside of it. Either the advisor or the additional reader must be from within the Applied Mathematics Department.

Relationship of AM Master's Program and AM Doctoral Program

The M.S. and Ph.D. programs are freestanding and independent, so that students can be admitted to either program. Students completing the M.S. program may request to transfer into the Ph.D. program. However, transfer from the M.S. to the Ph.D. program is considered an exceptional circumstance, and requires a sponsoring faculty (usually the faculty advisor) and approval by the graduate director and the Applied Mathematics Department.

Transfer of Credit

Up to three UC Santa Cruz courses (15 credits) fulfilling the degree requirements of the M.S. degree may be taken during students' undergraduate study at UC Santa Cruz. Courses from other institutions may not be applied to the M.S. degree course requirements. However, students will still need to take courses totaling 35 credits as graduate students to satisfy the university requirements.

Petitions should be submitted along with the transcript from their UC Santa Cruz undergraduate study. Such petitions are not considered until the completion of at least one quarter at UC Santa Cruz. At most, a total of three courses may be transferred.

Students who complete the M.S. degree in AM at UC Santa Cruz and continue on to the Ph.D. program in AM at UC Santa Cruz can transfer all applicable courses taken during the M.S. to the Ph.D. program, provided that such students meet the minimum residency requirement for Ph.D. programs, as specified by SR 686 and the UC Santa Cruz Graduate Division.

Foreign Language Requirements

Review of Academic Progress

Each year, the faculty reviews the progress of every student in all programs and tracks. Students not making adequate progress toward completion of degree requirements are subject to dismissal from the program (see the UC Santa Cruz Graduate Handbook and the AM Graduate Handbook for the policy on satisfactory academic progress). Also, please refer to the Graduate Division's specific guidelines on annual student reviews. In addition, students will work with their faculty sponsors to fill out an AM advising form at least once a year to discuss the overall academic progress, research relationship, and students' welfare.

Applying for Graduation

All candidates for a degree must submit an application for the M.S. degree to the Baskin Engineering Graduate Student Affairs Office by the date stated in the Academic and Administrative Calendar for the quarter they wish to receive the degree. The deadline for degree applications is typically in the second week of the quarter. A student is required to be registered or on Filing Fee Status during the quarter in which the degree is conferred. For more information about applying for graduation, visit the Baskin Engineering Graduate Studies website.

APPLIED MATHEMATICS PH.D.

Introduction

Graduate studies in applied mathematics (AM) at UC Santa Cruz focus on developing skill sets in mathematical modeling, analysis, and scientific computation applied to a broad range of science and engineering disciplines, including fluid mechanics, high-performance computing, mathematical biology, dynamical systems, stochastic processes, control, optimization, and scientific machine learning. The overarching goal of the AM graduate programs at UC Santa Cruz is to underscore the application of mathematics in solving real-life problems. In particular, the doctor of philosophy (Ph.D.) program prepares the students with the foundational analytical and numerical tools of applied mathematics, enabling them to perform independent research that transcends the disciplinary boundaries in science and engineering.

Advancement to Candidacy

Course Requirements

Foundational Courses

Students in the AM Ph.D. program must demonstrate mastery in the foundations of scientific computing and applied mathematics, either by submitting evidence of undergraduate transcripts to the AM graduate director for approval or by taking all of the following foundational courses upon entry to the Ph.D. program, or a combination of the two, by the end of their first year:

All of the following five foundational courses

AM 100	Mathematical Methods for Engineers	5
AM 112	Introduction to Partial Differential Equations	5
AM 114	Introduction to Dynamical Systems	5
AM 129	Foundations of Scientific Computing for Scientists and Engineers	5
AM 147	Computational Methods and Applications	5

Core Courses

All AM Ph.D. students must complete the following core courses. All five non-seminar core courses (i.e., AM 212, AM 213A, AM 213B, AM 224 and AM 160) must be taken for letter grades. Students must also take at least six credits from a combination of three courses in the AM 280 seminar series (i.e., AM 280A, AM 280B, and AM 280C). The combination must include at least one quarter of AM 280B.

AM 160	Introduction to Scientific Machine Learning	5
AM 212	Advanced Methods of Applied Mathematics	5
AM 213A	Numerical Linear Algebra	5
AM 213B	Numerical Methods for the Solution of Differential Equations	5
AM 224	Applied Dynamical Systems	5
AM 280A	Seminar in Mathematical and Computational Biology	2
AM 280B	Seminar in Applied Mathematical Modeling	2
AM 280C	Seminar in Geophysical and Astrophysical Fluid Dynamics	2

Elective Courses

In addition to these 31 credits, Ph.D. students must complete five additional 5-credit elective courses for a total requirement of 56 credits. As part of the five additional courses, students are required to take (at least) one elective course during their first year (called first-year elective) to help them engage in research as early as possible. First-year electives are designed to prepare students for their ultimate research emphasis within applied mathematics. These electives can be selected from any non-core regular 5-credit AM graduate courses (between course numbers 201 and 279).

Ph.D. students will be allowed to substitute up to two elective courses with corresponding numbers of credits of independent study (i.e., 5 or 10), during which they conduct research with their advisor toward their advancement to candidacy.

All elective courses, including the AM courses and non-AM courses, must be approved by the graduate director. Elective courses can be taken for the Satisfactory/Unsatisfactory grading option or the letter grade option.

Transfer of Credit

Up to three UC Santa Cruz courses (15 credits) fulfilling the degree requirements of the Ph.D. degree may be taken during students' undergraduate study at UC Santa Cruz. Note that this 15-credit limit does not apply to the requirements of the five foundational courses (AM 100, AM 112, AM 114, AM 129, and AM 147), which may all be taken prior to the start of the Ph.D. program without penalty. Ph.D. students who have previously earned an M.S. degree in a related field at another institution may substitute courses from their previous university with the approval of the student’s official advisor and the graduate committee.

Petitions should be submitted along with the transcript from the other institution or from their UC Santa Cruz undergraduate study. For courses taken at other institutions, copies of the syllabi, exams, and other coursework should accompany the petition. Such petitions are not considered until the completion of at least one quarter at UC Santa Cruz. At most, a total of three courses may be transferred.

Students who complete at UC Santa Cruz the M.S. degree in AM or the M.S. degree in Scientific Computing and Applied Mathematics (SciCAM) and continue on to the Ph.D. program in AM at UC Santa Cruz can transfer all applicable courses taken during the M.S. to the Ph.D. program, provided that such students meet the minimum residency requirement for Ph.D. programs, as specified by the UC Santa Cruz Graduate Division.

Teaching Requirement

Ph.D. students will be required to serve as teaching assistants for at least two quarters during their graduate study. Certain exceptions may be permitted for those with extensive prior teaching experience, for those who are not allowed to be employed due to visa regulations, or for other reasons approved by the graduate director.

Pre-Qualifying Requirements

Under normal progress, Ph.D. students are expected to find a Ph.D. advisor and complete their core course requirements by the end of their second year. Soon after identifying an advisor, they are expected to prepare for a pre-candidacy exam under the guidance of their advisor(s) to demonstrate their suitability and commitment to research. Students are expected to pass the pre-candidacy exam after completing all core courses and no later than by the end of the summer quarter of their second year, or they will be put on academic notice. The pre-candidacy exam has two parts (written and oral), in which students are expected to review the literature and present a research proposal relevant to the subject area of their intended

Ph.D. The written report must not exceed 10 pages and must be submitted to their committee at least one week prior to the planned oral exam date. The oral examination must cover, in no more than 30 minutes, both literature review and planned work. This will be followed by a question-and-answer session between the student and the committee during which the committee members can ask questions on core courses, literature review, and proposed research. The committee will assess the student's suitability for future research in the Ph.D. program based on both written and oral performance on the exam.

The committee, which must be formed at least one month prior to the planned pre-candidacy exam date, is approved by the graduate director, and must include:

(i) the student's primary Ph.D. advisor (a ladder-rank faculty member in or outside of AM);

(ii) another ladder-rank AM faculty member; and

(iii) another ladder-rank UCSC faculty member who is recognized as an expert in the student's research interest area with credentials equivalent to a ladder-rank UCSC faculty member as judged by the graduate director.

Students who do not pass the exam in their first attempt will be allowed to retake it once, and must do so at the very latest before the end of the fall quarter of their third year. If they fail the second examination they will not be allowed to continue in the Ph.D. program but will have the option to continue into the M.S. program and exit with the M.S. as the terminal degree.

Qualifying Examination

Under normal progress Ph.D. students are expected to advance to candidacy anytime between the quarter they pass the pre-candidacy exam and the spring quarter of their third year. A student who has not advanced to candidacy by the start of the fourth year will be subject to academic notice.

Ph.D. students must form a Qualifying Exam (QE) committee in preparation of the exam. This committee must consist of at least four members as follows (for continuity, the members of this committee are ideally the same as those of the pre-candidacy exam committee, augmented with an external member):

- QE Chair: This person must be a tenured AM faculty and cannot be the student's Ph.D. advisor(s).
- Member 1: Ladder-rank AM faculty member
- Member 2: Ladder-rank UCSC faculty member (any department).
- External Member: This person must be tenured UCSC faculty from outside AM or tenured faculty in the same discipline at another institution or a recognized non-faculty expert in the student's research area with credentials equivalent to a ladder-rank UCSC faculty member as judged by the graduate director and the dean of Graduate Studies. The external member cannot be the student's faculty advisor(s).

The candidacy exam also has two parts (written and oral), in which students are expected to review the literature, present a substantially completed research project that is appropriate for submission to an international journal or conference, and present a plan to complete further research projects in pursuit of their Ph.D. The written report, that should not exceed 60 pages, must be submitted to their committee at least two weeks prior to the planned oral exam date. The oral examination must cover, in no more than 45 minutes, both literature review, and existing and planned research. This will be followed by a question-and-answer session between the student and the committee during which the committee members can ask questions on the literature review, and current and proposed research. The committee will assess the student's suitability for advancement to candidacy based on both written and oral performance on the exam.

Students can only advance to candidacy after they have completed all course requirements (including removal of all incomplete grades), passed both pre-candidacy and candidacy examinations, nominated their dissertation reading committee, and paid the advancement to candidacy fee.

Dissertation Committee

Upon successful completion of the qualifying examination, a dissertation reading committee must be formed consisting of the dissertation supervisor and at least two additional readers appointed by the graduate director upon recommendation of the dissertation supervisor. Students should consult their advisor(s) about the membership of their committee.

The committee must include the following:

- Committee Chair: This person should be an AM faculty member (usually the student’s Ph.D. advisor).
- Member 1: Ladder-rank AM faculty member who is not the student's primary Ph.D. advisor.
- Member 2: Ladder-rank UCSC faculty (may be the student’s Ph.D. advisor) **or** a recognized expert in the student's research area with credentials equivalent to a ladder-rank UCSC faculty member as judged by the graduate director and the dean of Graduate Studies.

At least two members of the committee must be AM faculty. If a student has two co-advisors, they should both be listed as co-chairs and a fourth committee member must then be added. Additional members may be added to the committee. The committee is subject to the approval of the Graduate Division.

Post-Qualifying Requirements

After the advancement, Ph.D. students shall consult with their dissertation committee at least once every year to present and discuss progress made and receive comments and suggestions from their committee members.

Relationship of AM Master's Program and AM

Doctoral Program

The M.S. and Ph.D. programs are freestanding and independent, so that students can be admitted to either program. Students completing the M.S. program may request to transfer into the Ph.D. program (provided they pass the pre-qualifying examination). Students in the Ph.D. program can receive a non-terminal M.S. degree upon completion of the M.S. requirements, including the capstone research project. Each Ph.D. student will be required to have knowledge of applied mathematics equivalent to that required for the M.S. degree. In addition, Ph.D. candidates will be required to complete coursework beyond the M.S. level.

Optional Catchall

Dissertation

Dissertation

A dissertation is required for the Ph.D. degree. The dissertation will consist of a minimum of three chapters composed of material suitable for submission and publication in major professional journals in applied mathematics (or related subject areas of application), in addition to an introductory chapter that thoroughly reviews the literature, and a conclusion chapter that provides a broad perspective of the results in the context of the existing literature, and describes future work.

Dissertation Defense

The completed dissertation will be submitted to the reading committee at least one month before the dissertation defense. The defense consists of a public presentation (open session) of the research lasting between 45 and 55 minutes followed by a private examination (closed session) by the reading committee. Successful completion of the dissertation defense is the final requirement for the Ph.D. degree.

Review of Academic Progress

Each year, the faculty reviews the progress of every student in the graduate programs. Students who do not make adequate progress toward completion of degree requirements are subject to dismissal from the program (see the UC Santa Cruz Graduate Handbook and the AM Graduate Handbook for the policy on satisfactory academic progress). Also, please refer to the Graduate Division's specific guidelines on annual student reviews. In addition, students will work with their academic advisors (e.g., first-year advisor or official Ph.D. advisor) and their dissertation reading committee to fill out an AM advising form at least once a year to discuss the overall academic progress, research relationship, and students' welfare.

Applying for Graduation

All candidates for a degree must submit an application for the Ph.D. degree to the Baskin Engineering Graduate Advising Office by the date stated in the Academic and Administrative Calendar for the quarter you wish to receive the degree. The deadline for degree applications is typically in the second week of the quarter.

A student is required to be registered or on Filing Fee Status, whichever is applicable, during the quarter in which the degree is conferred. Students should consult the department staff advisor to determine which option fits their situation. For more information about applying for graduation, visit the Baskin Engineering Graduate Studies website.

SCIENTIFIC COMPUTING AND APPLIED MATHEMATICS M.S.

Introduction

The Department of Applied Mathematics (AM) offers an M.S. program in Scientific Computing and Applied Mathematics (SciCAM). SciCAM students learn a combination of applied mathematical modeling and cutting-edge computational methods for modern high-performance computing and scientific machine learning. The SciCAM M.S. degree is ideal for meeting the increasing need for graduates in the rapidly growing markets of machine learning and high-performance computing. Such computationally knowledgeable and experienced modelers are highly sought after in industry and government agencies.

Requirements

Course Requirements

Foundational Courses

Students in the SciCAM program must demonstrate mastery in the foundations of scientific computing and applied mathematics, either by submitting evidence through undergraduate transcripts to the AM graduate director for approval or by taking some or all of the following foundational courses upon entry to the M.S. program, or a combination of the two, by the end of their first year:

All of the following five courses:

AM 100	Mathematical Methods for Engineers	5
AM 112	Introduction to Partial Differential Equations	5
AM 114	Introduction to Dynamical Systems	5
AM 129	Foundations of Scientific Computing for Scientists and Engineers	5
AM 147	Computational Methods and Applications	5

Core Courses

All SciCAM M.S. students are required to take the four core courses listed below. These courses must be taken for letter grades.

AM 213A	Numerical Linear Algebra	5
AM 213B	Numerical Methods for the Solution of Differential Equations	5
AM 250	An Introduction to High Performance Computing	5

AM 160	Introduction to Scientific Machine Learning	5

Elective Courses

Any regular 5-credit AM graduate courses (between course numbers 201 and 279) not already listed as a core course can be counted as electives with approval from the graduate director. Elective courses outside of AM must be approved by the graduate director. Elective courses can be taken for the Satisfactory/Unsatisfactory grading option or the letter grade option.

Note that some upper-division electives are allowed, bearing in mind that no more than a total of 15 credits of upper-division courses may be used to satisfy the degree requirements. The foundational courses (AM 100, AM 112, AM 114, AM 129, and AM 147) cannot be used toward the elective degree requirements, but do not count toward the 15 transfer credits limit either.

Other Requirements

The SciCAM program offers two capstone options: Plan I thesis track and Plan II capstone exam track. Students in the SciCAM program pursue either a **Plan I thesis** or **Plan II capstone (comprehensive examination)** curriculum.

- **Candidates for a Plan I thesis** must complete one graduate-level five-credit elective course (between course numbers 200 and 279) and take a minimum of 10 credits of independent study to write a thesis (i.e., at least two five-credit independent studies over two quarters or one 10-credit independent study over one quarter). The thesis requirements are as follows. Students should identify a thesis advisor and a research topic as soon as possible upon joining the M.S. (before completing all core courses), ideally during the first or second quarter, and begin working on their research. They must ultimately write a thesis, which must consist of at least 30 pages and no more than 60 pages of printed written work and accompanying pertinent figures, consisting of a coherent introduction and presentation of the current state of the field, a clear presentation of the questions raised, of the methodology used to solve them, and a discussion of the results obtained. The quality and novelty of the thesis must be appropriate for potential publication in an international journal. The thesis will be read by a committee of three ladder-rank faculty members, consisting of the faculty advisor and two additional readers. Additional readers will be chosen appropriately from within the Applied Mathematics Department or outside of it. At least two members of the reading committee must be from within the Applied Mathematics Department. The student will then be required to give a public oral presentation of their thesis (between 30 minutes and 45 minutes), which will be evaluated by the reading committee. The reading committee will assess the quality of both written work and oral presentation in making their recommendation for awarding the SciCAM M.S. degree to the student.
- **Candidates for a Plan II capstone (comprehensive examination)** must complete three regular 5-credit elective courses from an approved list, at least one of which should be a graduate-level course, and pass the SciCAM comprehensive examination. The exam takes place in the spring quarter each year, and is a take-home exam covering the core and foundational courses. Passing the comprehensive examination fulfills the capstone requirement. A student has two attempts to pass the exam. If a student does not pass the exam in spring, they are allowed to retake it in late summer (late September before the fall quarter starts).

Accelerated One-Year Program Plan

The expected time to completion of the SciCAM M.S. degree program is two years. However, AM offers a one-year accelerated track for interested students who can demonstrate sufficient proficiency in the foundational subjects. The minimum requirements to join the accelerated track are:

1. having completed at least three calculus courses, including multivariate differential and integral calculus,
2. having completed a course on ordinary differential equations, a course on linear algebra, and a course on programming, and
3. having completed at least four of the five foundational requirement courses of the SciCAM program or their equivalents.

Note that this is a separate accelerated track from that of the SciCAM 4+1 Contiguous Bachelor's/Master's Pathway.

Requests to join the accelerated track must be made to the graduate director via email no later than Aug. 31 of each year, prior to the student's first quarter in the program.

Transfer of Credit

Up to three UC Santa Cruz courses (15 credits) fulfilling the degree requirements of the SciCAM M.S. degree may be taken during students' undergraduate study at UC Santa Cruz. Note that this 15-credit limit does not apply to the requirements of the foundational courses (AM 100, AM 112, AM 114, AM 129, and AM 147), which may all be taken prior to the start of the SciCAM program without penalty. However, students still need to take courses totaling 35 credits as graduate students to satisfy the university requirements.

Up to one course from other institutions may be applied to the SciCAM M.S. degree course requirements. Petitions should be submitted along with the transcript from the other institution or UC Santa Cruz Extension. For courses taken at other institutions, copies of the syllabi, exams, and other course work should accompany the petition. Such petitions are not considered until the completion of at least one quarter at UC Santa Cruz.

Relationship of SciCAM Master's Program and AM

Doctoral Program

Students in the SciCAM M.S. program interested in an academic career are strongly encouraged to apply to the AM Ph.D. program upon completion of their SciCAM M.S. degree. Applications are reviewed in the standard academic cycle. Students interested in applying to the AM Ph.D. program are encouraged to discuss this option with the graduate director in the fall of each year. Transfer from the SciCAM M.S. program to the Ph.D. program is considered an exceptional circumstance, and requires a sponsoring faculty (usually the faculty advisor) and approval by the graduate director and the Applied Mathematics Department.

Review of Academic Progress

Each year, the faculty reviews the progress of every student in the graduate programs. Students not making adequate progress toward completion of degree requirements are subject to dismissal from the program (see the UC Santa Cruz Graduate Handbook and the AM Graduate Handbook for the policy on satisfactory academic progress). Also, please refer to the Graduate Division's specific guidelines on annual student reviews. In addition, students will work with their faculty sponsors to fill out an AM advising form at least once a year to discuss the overall academic progress, research relationship, and students' welfare.

Foreign Language Requirements

Applying for Graduation

All candidates for a degree must submit an application for the M.S. degree to the Baskin Engineering Graduate Student Affairs Office by the date stated in the Academic and Administrative Calendar for the quarter they wish to receive the degree. The deadline for degree applications is typically in the second week of the quarter.

A student is required to be registered or on Filing Fee Status (thesis track only) during the quarter in which the degree is conferred. For more information about applying for graduation, visit the Baskin Engineering Graduate Studies website.

SCIENTIFIC COMPUTING DESIGNATED EMPHASIS

Introduction

Students from another degree program who meet certain requirements can have the designated emphasis (DE) of "Scientific Computing" annotated to their degree title. For example, an M.S. or Ph.D. student in physics who meets the requirements would get a certification that reads "M.S. in Physics with an emphasis in Scientific Computing" or "Ph.D. in Physics with an emphasis in Scientific Computing".

The designated emphasis is open to Ph.D. students, as well as M.S. students in either a Plan I (thesis) or Plan II (exam/project) capstone.

Requirements

Committee Composition and Departmental Approvals

Upon electing to pursue a designated emphasis in scientific computing, students must choose a DE faculty advisor within the Department of Applied Mathematics. This should be done at least one quarter before the student's Qualifying Examination (for Ph.D. students) or their planned graduation date (for M.S. students).

A list of eligible DE advisors is maintained online. The student must organize a preliminary meeting with the DE advisor, and agree on a plan for completion of the DE requirements. Once this plan has been designed, the student and the advisor must complete the DE application form available online. The completed application form must then be signed by the student's home department faculty advisor, by the DE advisor, and by the Applied Mathematics graduate director, and then submitted to the Baskin Engineering Graduate Student Affairs Office.

Course Requirements

Students declaring a designated emphasis in Scientific Computing must complete the courses listed below.

All of the following courses:

AM 213A	Numerical Linear Algebra	5
AM 213B	Numerical Methods for the Solution of Differential Equations	5

Plus one of the following courses (note that the other one can be used as an elective):

AM 160	Introduction to Scientific Machine Learning	5
AM 250	An Introduction to High Performance Computing	5

Plus one of the following approved elective courses:

AM 160	Introduction to Scientific Machine Learning	5
AM 230	Numerical Optimization	5
AM 250	An Introduction to High Performance Computing	5
AM 260	Computational Fluid Dynamics	5
CSE 201	Analysis of Algorithms	5
CSE 242	Machine Learning	5

Writing, Research and/or Teaching Requirements

- **Writing requirements:** a substantial and original written body of work related to scientific computing, associated with substantial code development or substantial modification of existing code, or development of significant computational tools for data analysis. The write-up could take the form of a paper (at least submitted), or an M.S., M.A., or Ph.D. thesis chapter, for instance.
- **Oral presentation requirement:** a presentation of no less than 30 minutes during which the student must

demonstrate mastery of the scientific computing component of the submitted written piece of work. This presentation could be the student's qualifying exam, or the Ph.D. defense, or a separate presentation. The DE advisor must be invited to attend this presentation.

Review of Progress

Applying for Graduation

All candidates for a degree must submit an application for the master's degree or an application for the doctorate in philosophy degree to the appropriate office in their primary department by the date stated in the Academic and Administrative Calendar for the quarter they wish to receive the degree. Students who have completed a designated emphasis should be sure to note the designated emphasis on the degree application. The deadline for degree applications is typically in the second week of the quarter. A student is required to be registered or on filing fee during the quarter in which the degree is conferred.

Biomolecular Engineering

Baskin Engineering
335 Baskin Engineering Building
(831) 459-2158
engineering.ucsc.edu

PROGRAMS OFFERED

Biomolecular Engineering and Bioinformatics B.S. (p. 527)

Biotechnology B.A. (p. 538)

Bioinformatics Minor (p. 542)

Biomolecular Engineering Contiguous Bachelor's/Master's Pathway (p. 542)

Biomolecular Engineering and Bioinformatics M.S. (p. 544)

Biomolecular Engineering and Bioinformatics Ph.D. (p. 545)

The Department of Biomolecular Engineering (BME) is an interdisciplinary department that combines expertise from biology, mathematics, chemistry, computer science, and engineering to train students and develop technologies to address major problems at the forefront of biomedical and bio-industrial research. Students trained in the Department of Biomolecular Engineering can look forward to careers in academia, the information and biotechnology industries, public health, or medical sciences.

The department offers a bachelor of science (B.S.) degree in biomolecular engineering and bioinformatics, a minor in bioinformatics, a contiguous B.S./M.S. pathway for well-prepared undergraduate students, a graduate master of science (M.S.) and a doctor of philosophy (Ph.D.) degrees in biomolecular engineering and bioinformatics. The department co-sponsors the Program in Biomedical Science and Engineering (PBSE), a doctoral training program, with the departments of MCD Biology, Chemistry and Biochemistry, and Microbiology and Environmental Toxicology.

Departmental faculty advise undergraduate and graduate researchers enrolled in the bioinformatics, bioengineering, and related degree programs. Members of the Department of Biomolecular Engineering actively collaborate with faculty from other Baskin School of Engineering departments, such as Applied Mathematics, Computer Science and Engineering, and Electrical and Computer Engineering; and with the Physical and Biological Sciences departments of MCD Biology, Chemistry and Biochemistry, Microbiology and Environmental Toxicology, and Ecology and Evolutionary Biology.

UNDERGRADUATE PROGRAM

The Department of Biomolecular Engineering offers a Bachelor of Science in Biomolecular Engineering and Bioinformatics (BMEB), a Bachelor of Arts in Biotechnology, and a minor in Bioinformatics. The BMEB B.S. program has two distinct tracks: one in biomolecular engineering which provides undergraduate training in experimental engineering, and a second with a computational focus in bioinformatics. The Biotechnology B.A. program provides an overview of the field and is suitable for those students intending to double major in humanities or social sciences.

Courses for All Majors and Minor

BME 80G, Bioethics in the Twenty-First Century: Science, Business, and Society, is particularly appropriate to all students interested in the societal issues surrounding the revolutions in bioinformatics and biotechnology.

BME 105, Genetics in the Genomics Era, teaches the principles of genetics and genomics, focusing on how sequencing technologies enable us to understand gene function, genotype to phenotype relationships, and genetic inheritance.

BME 110, Computational Biology Tools, provides an introduction to the tools and techniques of bioinformatics from a user's view. It is intended for biologists and biochemists who need to use bioinformatics tools, but are not primarily interested in building new bioinformatics tools.

BME 160, Programming for Biologists and Biochemists, provides an introductory programming class using Python to analyze, transform, and publish biological data.

BME 163, Applied Visualization and Analysis of Scientific Data, extends this life-science data focus with an emphasis on understanding and presenting that data.

GRADUATE PROGRAM

The Department of Biomolecular Engineering offers interdisciplinary M.S. and Ph.D. degrees in biomolecular engineering and bioinformatics and accepts students from a wide-variety of backgrounds. A typical cohort includes incoming students from molecular biology, genetics, computer science, engineering, and mathematics. The unifying theme of our research training program is using quantitative approaches to addressing fundamental questions

in biology and biomedical science. The Ph.D. program prepares students to lead independent research programs in academic or industry settings. The M.S. program is designed to prepare students for careers in contemporary biomedical research settings in the biotechnology industry.

Program coursework is designed to provide the technical skills in programming and other technical skills required for independent and advanced scientific discovery. Incoming students undertake rigorous core coursework, conduct laboratory rotations (Ph.D. only), and are exposed to a rich environment of regular seminars and group meetings. Students interact closely with biomolecular engineering and bioinformatics faculty members while undertaking their dissertation research (Ph.D.) or capstone projects (M.S.), and have first-hand access to state-of-the-art computation tools and laboratory facilities throughout their training, including cluster computing and high-throughput sequencing facilities.

BIOMOLECULAR ENGINEERING AND BIOINFORMATICS B.S.

Information and Policies

Introduction

The Biomolecular Engineering and Bioinformatics (BMEB) Bachelor of Science includes the biomolecular engineering (BME) and bioinformatics (BINF) concentrations.

The BME concentration is designed for students interested in protein engineering, stem cell engineering, and synthetic biology. The emphasis is on designing biomolecules (DNA, RNA, proteins) and cells for particular functions, and the underlying sciences are biochemistry and cell biology.

The BINF concentration combines mathematics, science, and engineering to explore and understand biological data from high-throughput experiments, such as genome sequencing, gene-expression chips, and proteomics experiments.

The BMEB major builds upon the research and academic strengths of the faculty in the Biomolecular Engineering Department.

The BMEB B.S. has course requirements in mathematics, science, and engineering. Students interested in Biomolecular Engineering and Bioinformatics as a major should contact the Baskin Engineering advising office (bsoeadvising@ucsc.edu) before enrolling in any courses at UCSC. Early advising is particularly important before choosing calculus and physics courses.

In both concentrations, students participate in a capstone experience. Options for the senior capstone experience include:

Capstone option 1: Series of project-based engineering design courses taken in the **senior year** where students propose and execute a design project, and then present their work through presentations and a capstone report. Two series are available:

(1) Advanced bioinformatics individual capstone project: Series of three courses taken in the senior year: BME 205 (fall), BME 230A (winter), and BME 129C (spring). Note: students are expected to present their work and complete a capstone report in BME 129C based on the project they started in BME 205 and BME 230A.

or

(2) Biomolecular engineering team design project: Series of three courses taken in the senior year: BME 129A (fall), BME 129B (winter), and BME 129C (spring). Ideal for students interested in working in industry. **Note:** students are expected to present their work and complete a capstone report in BME 129C based on the project they started in BME 129A and BME 129B. Presentations and capstone report are completed as a team.

Capstone option 2: Individual senior thesis.

Timeline: Students should identify a faculty to serve as their capstone mentor and begin working in the research lab **before the student's senior year**. **Note:** many faculty expect students to work in the lab prior to senior year, including the summer before senior year. Students must submit a project proposal in late summer or in the first two weeks of fall quarter of their senior year to the Undergraduate Program Director Dr. Dianne Hendricks.

Senior thesis research consists of 15 credits of Senior Thesis Research (BME 195). Students pursuing the senior thesis option must write a two-page thesis proposal and seek approval of their project from the undergraduate director in the quarter preceding the first quarter of BME 195, typically summer quarter before senior year. Students typically complete 15 credits of BME 195 during their senior year as follows: 5 credits per quarter fall/winter/spring.

Capstone option 3: iGEM (international Genetically Engineered Machines)

Students complete a team-oriented, student-led synthetic biology project based on the international iGEM competition. Students interested in the UCSC iGEM team should contact the iGEM faculty mentor (contact information can be obtained from the undergraduate program director.) This capstone option is available only to BMEB B.S. majors in the Biomolecular concentration.

Timeline: Students interested in iGEM complete a written application and interview in **fall of their junior year.** Students selected for the team enroll in **two courses in junior year**: BME 180 (winter) and BME 188A (spring) and **two course in summer before senior year**: BME 188B and BME 188C. **Note:** students are expected to work on the iGEM project full-time in summer before senior year in preparation for the iGEM Grand Jamboree in October.

More information on BME research:

All BME capstone options involve working closely with faculty and other researchers at UCSC, analyzing ideas, developing technologies, and discovering new approaches. Application areas include biomolecular sensors and systems, vaccine development, stem cell engineering, nano-electronic implants, assistive technologies, bioinformatics, microfluidics, nanoscale biotechnology, environmental monitoring, and other areas at the junction between engineering and the life sciences.

More information about BME research and undergraduate research opportunities can be found at Undergraduate Research Opportunities, the Genomics Institute, the Program in Biomedical Sciences and Engineering, and the STEM diversity programs.

Biomolecular engineering and bioinformatics students may continue their research and studies at UCSC in BME or a variety of graduate programs including biology, chemistry, biochemistry, and engineering programs such as computer science and engineering. Information may be found at the Division of Graduate Studies website.

The immense growth of biological information stored in computerized databases has led to a critical need for people who can understand the languages, tools, and techniques of statistics, science, and engineering. A classically trained scientist may be unfamiliar with the statistical and algorithmic knowledge required in this field. A classically trained engineer may be unfamiliar with the chemistry and biology required in the field. Thus, this major strives for a balance of the two: an engineer focused on the problems of the underlying science or, conversely, a scientist focused on the use of engineering tools for analysis and discovery.

Program Learning Outcomes

A biomolecular engineering and bioinformatics student completing the program should:

- have a broad knowledge of science and engineering disciplines including biology, chemistry, mathematics, statistics, and computer science; those completing the BINF concentration will also have a detailed knowledge of mathematics, statistics, and computer science; and, those completing the BME concentration will have broader knowledge in biology and chemistry;
- be able to apply their knowledge to identify, formulate, and solve engineering design problems;
- be able to write programs in Python;
- be able to find and use information from a variety of sources, including books, journal articles, online encyclopedias, and manufacturer data sheets;
- be able to design and conduct experiments, as well as to analyze and interpret data;
- be able to work effectively with partners and on teams;
- be able to communicate problems, experiments, and design solutions in writing, orally, and as posters; and
- be able to apply ethical reasoning to make decisions about engineering methods and solutions in a global, economic, environmental, and societal context.

Academic Advising for the Program

The Baskin Engineering Undergraduate Advising office offers general advising for prospective and declared undergraduates majoring in Baskin Engineering programs. The office handles major declarations, transfer credits, course substitutions, articulations, and degree certifications. Undergraduate students obtain and submit all paperwork requiring departmental approval to the undergraduate advising office. Transfer students should also refer to the Transfer Information and Policy section.

Baskin Engineering Building, Room 225
bsoeadvising@ucsc.edu
(831) 459-5840

Getting Started in the Major: Frosh

This is a course-intensive and/or sequential program, and students who intend to pursue this major must begin taking classes for the major in their first year at the University of California, Santa Cruz. Timely completion of the degree will require completion of a general Chemistry series (CHEM 3, or CHEM 4) and Engineering Calculus (MATH19) during the first year. Math placement is required for one or more of the foundational courses for this major. For more information, please review the Math Placement website.

Transfer Information and Policy

Transfer Admission Screening Policy

Transfer students need to complete the equivalent of eight courses from the following list with a GPA in those courses of 2.8 or better. Transfer students are not required to take additional coursework at UCSC to declare. This applies to all transfer students who complete eight courses, even if they didn't reach the 45 credits required to declare.

We calculate GPA from the eight courses from the list below using the UCSC grade points guidelines. If students take more than eight courses, **all courses taken that apply toward transfer admissions screening requirements** will be counted toward the GPA. For transfer courses from community colleges that do not include "+" or "-" we use the following: A=4.0, B=3.0, C=2.0, D=1.0.

BME 80G	Bioethics in the 21st Century: Science, Business, and Society	5
BIOL 20A	Cell and Molecular Biology	5
MATH 19A	Calculus for Science, Engineering, and Mathematics	5

MATH 19B	Calculus for Science, Engineering, and Mathematics	5
CHEM 8A	Organic Chemistry	5
CHEM 8B	Organic Chemistry	5
	Either one of these courses	
AM 10	Linear Algebra for Engineers	5
MATH 21	Linear Algebra	5
	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3C	General Chemistry	3
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5

Transferring to Biomolecular Engineering

Students transferring into the biomolecular engineering concentration may also count any of the following:

PHYS 5A	Introduction to Physics I	5
PHYS 5B	Introduction to Physics II	5
BME 21L	Introduction to Basic Laboratory Techniques	3

Transferring to Bioinformatics

The following courses are recommended to be taken before transfer, and will count toward transfer screening:

CSE 16	Applied Discrete Mathematics	5
CSE 30	Programming Abstractions: Python	7

Transfer students may use courses articulated to PHIL 22, PHIL 24, or PHIL 28 in place of BME 80G, if these courses are taken prior to registering at UC Santa Cruz.

Getting Started in the Major: Transfer Students

Successful transition to UC Santa Cruz happens with early advisor contact, preparing and submitting course descriptions for articulation purposes, and taking summer session courses prior to their first fall quarter. Specific information for transfer students can be found at the Baskin Engineering Transfer webpage. Transfer students should declare their major during their first quarter at UCSC; instructions for declaring a major at Baskin Engineering are on the major declaration webpage.

Major Qualification Policy and Declaration Process

Major Qualification

In order to be admitted into the biomolecular engineering and bioinformatics major students must be listed as a proposed major within Baskin Engineering. Please refer to Baskin Engineering's "Prospective Students", "Admitted Students" and its "Current Students" sections in the catalog and the Undergraduate Affairs website for more information.

In addition to being listed as a proposed Baskin Engineering major, students must have completed at least 45 credits with a GPA of 2.8 or better in courses required for the major. Students with more than 7 credits of grades of NP, C-, D+, D, D-, or F in these courses are not qualified for the major.

Declaration of the major can happen no sooner than the student's second quarter, and must precede class enrollment for the student's third year (see below: How to Declare a Major). Students wishing to declare the biomolecular engineering and bioinformatics major after the sixth quarter must appeal, must already have a declared major in which they have completed at least one major requirement course and be making reasonable progress, and must have completed 10 more credits of required courses in the biomolecular engineering and bioinformatics major for each additional quarter.

Transfer students should refer to the Transfer Information and Policy section.

Appeal Process

Students may appeal a major qualification decision by filing a petition with Baskin Engineering Advising. The appeal process is described at the Baskin Engineering Undergraduate Affairs website.

If you have further questions concerning the appeal process, please contact the Undergraduate Advising office at (831) 459-5840 or email bsoeadvising@ucsc.edu.

How to Declare a Major

Instructions for declaring a major in Baskin Engineering are on the division's website here.

Letter Grade Policy

Baskin Engineering requires letter grades for all courses in an engineering major.

[Optional Catchall]

Course Substitution Policy

Please refer to the Undergraduate Affairs Policies, Forms and Petitions website for Baskin Engineering policies about substitutions and taking courses at other institutions after enrolling at UC Santa Cruz.

Double Majors and Major/Minor Combinations Policy

Due to course overlap between the biomolecular engineering and bioinformatics (BMEB) B.S., the biotechnology B.A., and the bioinformatics minor, none of these double major or major/minor combinations will be considered. Other major/minor combinations are permitted and encouraged. Double majors with the biotechnology B.A. and majors in the Humanities, Social Sciences or Arts Divisions are specifically encouraged.

Study Abroad

Students are encouraged to investigate studying for short periods of time (a summer or a quarter) at other institutions, to broaden their education. Proposed plans of study should still be cleared with the undergraduate director.

Honors

Biomolecular engineering and bioinformatics majors are considered for "Honors in the Major" and "Highest Honors in the Major" based on their GPA and on results of undergraduate research. Students with a GPA of 3.7 or higher receive "Highest Honors in the Major." Students with a GPA of 3.3 or higher, but lower than 3.7, receive "Honors in the Major." Students with particularly significant accomplishments in undergraduate research may receive honors or highest honors with a lower GPA. Students who have been found guilty of academic misconduct are not eligible for either honors or highest honors.

Because of the enormous breadth of requirements, biomolecular engineering and bioinformatics majors are urged to take honors courses or sections to get as much as possible out of the courses they take in each field.

[Optional Catchall]

Biomolecular Engineering Concentration

The biomolecular engineering concentration focuses on wet-lab work, but with a modern appreciation for the statistics and computational tools needed for high-throughput experimentation. Due to course overlap, the biomolecular engineering and bioinformatics major (BMEB) B.S. cannot be combined with the biotechnology B.A. or the bioinformatics minor.

Course Requirements

Biomolecular engineering concentration majors must complete the following courses. Some courses may be satisfied via exam credit.

Lower-Division Courses

Biology

BIOL 20A	Cell and Molecular Biology	5

Bioethics

BME 80G	Bioethics in the 21st Century: Science, Business, and Society	5

General Chemistry

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3BL	General Chemistry Lab	2
CHEM 3C	General Chemistry	3
CHEM 3CL	General Chemistry Lab	2
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4AL	Advanced General Chemistry Lab	2
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4BL	Advanced General Chemistry Lab	2

Note: This requirement may also be satisfied with prior completion of CHEM 1A, 1B, 1M, 1C, and 1N or equivalent.

Previous to July 1, 2023, the General Chemistry series, offered by the Department of Chemistry and Biochemistry, was listed in the General Catalog as CHEM 1A, CHEM 1B and CHEM 1C, with associated laboratories CHEM 1M and CHEM 1N. As of academic year 2023-24, this series was replaced with two distinct series: CHEM 3A, CHEM 3B and CHEM 3C, with labs CHEM 3BL and CHEM 3CL; or CHEM 4A and CHEM 4B with labs CHEM 4AL and CHEM 4BL. Descriptions of these two series are given here.

Organic Chemistry

All of the following courses:

CHEM 8A	Organic Chemistry	5
CHEM 8B	Organic Chemistry	5

CHEM 8B is a prerequisite for BIOC 100A, BIOL 100, and CHEM 103.

Both CHEM 8A and CHEM 8B are required for all biomolecular concentration students.

Laboratory Training

All of the following courses:

BME 21L	Introduction to Basic Laboratory Techniques	3
BME 22L	Foundations of Design and Experimentation in Molecular Biology	2

Mathematics

One of the following options:

	Either these courses	
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
	or these courses	
MATH 20A	Honors Calculus	5
MATH 20B	Honors Calculus	5

Plus one of the following:

AM 10	Linear Algebra for Engineers	5
MATH 21	Linear Algebra	5

Physics

	Either one of these courses	
PHYS 5A	Introduction to Physics I	5
PHYS 15A	Honors Introduction to Physics I	5
	AND	
PHYS 5B	Introduction to Physics II	5
PHYS 5M	Introduction to Physics II Laboratory	1

Upper-Division Courses

Biochemistry and Molecular Biology

Choose one of the following options:

	Either these courses	
BIOC 100A	Biochemistry and Molecular Biology	5
BIOC 100B	Biochemistry and Molecular Biology	5
	or these courses	
BME 101	Molecular Biology for Biomolecular Engineers	5
CHEM 103	Biochemistry	5
	or these courses	
BME 101	Molecular Biology for Biomolecular Engineers	5
BIOL 100	Biochemistry	5

CHEM 8B is a prerequisite for BIOC 100A, BIOL 100, and CHEM 103.

BIOE 20B is a prerequisite for BIOL 100.

BIOC 100A and BIOC 100B are strongly preferred for students who plan to pursue research in protein engineering, genetics, molecular biology, or biochemistry-related fields.

Biomolecular Engineering

Choose one of the following courses:

BME 105	Genetics in the Genomics Era	5
BIOL 105	Genetics	5

BME 105 is strongly recommended.

Plus all of the following courses:

BME 110	Computational Biology Tools	5
BME 160	Research Programming in the Life Sciences	6
BME 163	Applied Visualization and Analysis of Scientific Data	5

Plus one of the following Modeling/Design sequences:

	Either these courses	
BME 128	Protein Engineering	5
BME 128L	Protein Engineering Laboratory	2
	or these courses	
BME 177	Engineering Stem Cells	5
BME 177L	Engineering Stem Cell Laboratory	2
	or these courses	
BME 130	Genomes	5
BME 123L	Long Read Sequencing	2

Statistics

STAT 131	Introduction to Probability Theory	5

Technical Writing

BME 185	Technical Writing for Biomolecular Engineers	5

This also satisfies the Disciplinary Communication (DC) requirement.

Elective

One of the following:

AM 115	Stochastic Modeling in Biology	5
METX 100	Introduction to Microbiology	5
METX 140	Molecular Biology and Microbial Genetics	5
BIOC 100C	Biochemistry and Molecular Biology	5
BIOL 115	Eukaryotic Molecular Biology	5
BME 118	Mathematics of the Mind	5
BME 122H	Extreme Environmental Virology	5
BME 123L	Long Read Sequencing	2
AM 147	Computational Methods and Applications	5
BME 128	Protein Engineering	5
BME 128L	Protein Engineering Laboratory	2
BME 130	Genomes	5
BME 132	Evolutionary Genomics	5
BME 140	Bioinstrumentation	5
BME 175	Entrepreneurship in Biotechnology	5
BME 177	Engineering Stem Cells	5
BME 177L	Engineering Stem Cell Laboratory	2
BME 178	Stem Cell Biology	5
ECE 104	Bioelectronics	5
	or any 5-credit biomolecular engineering graduate course	

Graduate courses must be numbered BME 201-279.

This course cannot satisfy other requirements of the major.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. Biomolecular engineering and bioinformatics majors satisfy the DC requirement by completing the following course:

BME 185	Technical Writing for Biomolecular Engineers	5

Comprehensive Requirement

All biomolecular engineering concentration students must complete a senior capstone project as a group project, as a series of Advanced Bioinformatics courses, or as an individual senior thesis doing research in a faculty laboratory.

Note that the Technical Writing requirement is a prerequisite for all the capstone options, including the senior thesis. Students pursuing the senior thesis option must write a two-page thesis proposal and seek approval of their project from the undergraduate director in the quarter preceding the independent study courses, typically spring quarter of the third year. Students are responsible for ensuring that they meet the prerequisites for whichever capstone they choose.

To complete the senior capstone requirement, Biomolecular Engineering concentration students must complete one of the following options:

Option 1: BME Team Design

BME 129A	Project Design and Implementation in Biomolecular Engineering I	5
BME 129B	Project Design and Implementation in Biomolecular Engineering II	5
BME 129C	Project Design and Implementation in Biomolecular Engineering III	5

Option 2: iGEM

BME 180	Professional Practice in Bioengineering	2
BME 188A	Synthetic Biology--Mentored Research A	2
BME 188B	Synthetic Biology--Mentored Research B	5
BME 188C	Synthetic Biology Mentored Research C	5

Permission code required for enrollment in BME 188A, BME 188B, and BME 188C. Only students who have interviewed and been selected for the iGEM team in fall of their junior year may register for these courses.

Option 3: Bioinformatics Capstone

BME 205	Bioinformatics Models and Algorithms	5
BME 230A	Introduction to Computational Genomics and Systems Biology	5
BME 129C	Project Design and Implementation in Biomolecular Engineering III	5

Option 4: Senior Thesis

The thesis option consists of three quarters of BME 195, where students conduct research in biomolecular engineering or related field such as chemistry, biology, or biochemistry. Students pursuing the senior thesis option must write a two-page thesis proposal and seek approval of their project from the undergraduate director in the quarter preceding the first quarter of BME 195. Students typically complete 15 credits of BME 195 during their senior year as follows: 5 credits per quarter fall/winter/spring.

BME 195	Senior Thesis Research	5

Permission code required for enrollment in BME 195. Permission code will be provided after student submits proposal (prior to first quarter of BME 195) or progress report (prior to second and third quarters of BME 195).

Exit Requirements

Students are required to submit a portfolio, exit survey, and attend an exit interview.

The portfolios must be turned in electronically as PDF files by the last day of the quarter of graduation, and will be reviewed quarterly by the undergraduate director.

Portfolios must contain the following:

- A substantial written report on a modeling/design project. This is typically satisfied by a senior thesis, or a written capstone project report.
- Slides from a substantial verbal presentation. This is typically satisfied by a capstone design presentation, Stem Cell Engineering, or other design courses.
- A research poster. This is typically satisfied by a senior thesis poster or a capstone design project poster, presented at the undergraduate poster symposium.

The three parts of the portfolio should represent at least two different design projects. If a senior thesis is completed, it must be provided as the written report. If a capstone project is completed, it must be provided as one (or more) of the three submissions.

Exit interviews are scheduled during the last week of the quarter by Baskin Engineering advising office, generally as small group interviews.

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Every biomolecular engineering and bioinformatics major must have a faculty advisor, assigned by Baskin Engineering's undergraduate advising office, and with that advisor must formulate a program of proposed coursework that meets the major requirements. The choice of capstone and electives should be made early, so that the plan can be tailored to fit in the chosen courses.

As in all engineering and science programs, it is recommended that students spread their general education requirements out over all 12 quarters. Delaying a general education requirement is safer than delaying a major requirement.

It is recommended that students reserve the summer after the junior year for undergraduate research.

Curriculum charts for the major are available on the BSOE website.

Sample Plan: Biomolecular Engineering Concentration

Year	Fall	Winter	Spring	Summer
Entering				College 1A Summer Edge (optional)
1st (frosh)	MATH 19A	MATH 19B	AM 10	
	CHEM 3A	CHEM 3B CHEM 3BL WRIT 1/WRIT 1E (if needed)	CHEM 3C CHEM 3CL	
2nd (soph)	BME 21L	BME 22L	BME 105	
	BIOL 20A	PHYS 5A PHYS 5L	PHYS 5B PHYS 5M	
	CHEM 8A	CHEM 8B	STAT 131	
	WRIT 2*			
3rd (junior)	BIOC 100A	BIOC 100B	BME 163	
	BME 110	BME 160	BME 177**	
	BME 185		BME 177L**	
4th (senior)	BME 129A	BME 129B	BME 129C	
		Elective	BME 80G	

* WRIT 2 should be taken in or before spring quarter of the second year.

** BME 177, BME 177L is one option for modeling/design sequence. Other options are offered in other quarters.

Students who can take Organic Chemistry (CHEM 8A and CHEM 8B, or transferable equivalents) in summer after their first year can take BIOC 100A in their second year and be ready to join a research lab a year earlier. Here is an alternative plan for students who do organic chemistry in summer.

Sample Plan: Biomolecular Engineering Concentration (CHEM 8A CHEM 8B In summer after first year)

Year	Fall	Winter	Spring	Summer
Entering				College 1A Summer Edge (optional)
1st (frosh)	CHEM 3A	MATH 19B	BIOL 20A	CHEM 8A
	MATH 19A	CHEM 3B CHEM 3BL WRIT 1/WRIT 1E	CHEM 3C CHEM 3CL	CHEM 8B

		(if needed)	
2nd (soph)	BME 21L	BME 22L	BME 105
	BIOC 100A	BIOC 100B	BME 80G
	WRIT 2*	PHYS 5A PHYS 5L	PHYS 5B PHYS 5M
3rd (junior)	BME 110	BME 160	BME 163
	AM 10	BME 128**	BME 185
		BME 128L**	
4th (senior)	BME 129A	BME 129B	BME 129C
	STAT 131		Elective

* WRIT 2 should be taken in or before spring quarter of the second year.

** BME 128, BME 128L is one option for modeling/design sequence. Other options are offered in other quarters.

General education requirements:

CC, ER are not met by any courses in the program.

IM, MF, PE-T, SI, and SR are met by required courses.

TA can be met by several electives: BME 122H, BME 132, BME 177, or BME 178.

PR-E can be met by some capstone options: BME 129C or BME 180.

C is not met by courses in the program, but is a prerequisite for the required BME 185 course.

Transfer planner

Year	Fall	Winter	Spring	Summer
Entering				KRSG 1T Summer Edge (optional)
1st (junior)	BIOC 100A	BIOC 100B	BME 105	
	BME 110	BME 160	BME 80G	
	BME 185	BME 22L	BME 163	
	BME 21L			
2nd(senior)	BME 129A	BME 129B	BME 129C	
	BME 130**	STAT 131	PHYS 5B PHYS 5M	
	BME 123L**	Elective		

** BME 130, BME 123L is one option for modeling/design sequence. Other options are offered in other quarters.

This transfer planner assumes that a student has completed the equivalent of CHEM 3A, CHEM 3B, CHEM 3BL, CHEM 3C, CHEM 3CL, CHEM 8A, CHEM 8B, MATH 19A, MATH 19B, PHYS 5A, PHYS 5L, BIOL 20A, AM 10, a molecular biology lab, and all general education courses before coming to UC Santa Cruz. Students are also expected to have completed all the general education requirements, except those covered by the required courses. This planner is only a proof-of-concept that the major can be completed in another two years; each student will need to work with an advisor to tailor their own schedule.

Bioinformatics Concentration

The bioinformatics concentration focuses on dry-lab (computational) techniques. Due to course overlap, the biomolecular engineering and bioinformatics major (BMEB) B.S. cannot be combined with the biotechnology B.A. or the bioinformatics minor.

Course Requirements

Bioinformatics concentration majors must complete the following courses. Some courses may be satisfied via exam credit.

Lower-Division Courses

Biology

BIOL 20A	Cell and Molecular Biology	5

Bioethics

BME 80G	Bioethics in the 21st Century: Science, Business, and Society	5

General Chemistry

	Either these courses	
CHEM 3A	General Chemistry	5
CHEM 3B	General Chemistry	3
CHEM 3C	General Chemistry	3
CHEM 3BL	General Chemistry Lab	2
CHEM 3CL	General Chemistry Lab	2
	or these courses	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4B	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4AL	Advanced General Chemistry Lab	2
CHEM 4BL	Advanced General Chemistry Lab	2

Note: This requirement may also be satisfied with prior completion of CHEM 1A, 1B, 1M, 1C, and 1N or equivalent.

Previous to July 1, 2023, the General Chemistry series, offered by the Department of Chemistry and Biochemistry, was listed in the General Catalog as CHEM 1A, CHEM 1B and CHEM 1C, with associated laboratories CHEM 1M and CHEM 1N. As of academic year 2023-24, this series was replaced with two distinct series: CHEM 3A, CHEM 3B and CHEM 3C, with labs CHEM 3BL and CHEM 3CL; or CHEM 4A and CHEM 4B with labs CHEM 4AL and CHEM 4BL. Descriptions of these two series are given here.

Organic Chemistry

CHEM 8A	Organic Chemistry	5

Computer Science and Engineering

All of the following courses:

CSE 16	Applied Discrete Mathematics	5
CSE 30	Programming Abstractions: Python	7

Mathematics

One of the following options:

	Either these courses	
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
	or these courses	
MATH 20A	Honors Calculus	5
MATH 20B	Honors Calculus	5

Plus one of the following:

AM 10	Linear Algebra for Engineers	5
MATH 21	Linear Algebra	5

Plus one of the following:

AM 30	Multivariate Calculus for Engineers	5
MATH 23A	Vector Calculus	5

Statistics

One of the following:

CSE 40	Machine Learning Basics: Data Analysis and Empirical Methods	5
STAT 132	Classical and Bayesian Inference	5

CSE 40 has a test-out option which can satisfy this requirement.

Upper-Division Courses

Data Structures and Algorithms

One of the following courses:

CSE 101	Introduction to Data Structures and Algorithms	5
CSE 101P	Introduction to Data Structures and Algorithms in Python	5

CSE 101 has an additional prerequisite of CSE 13S.

Biochemistry and Molecular Biology

One of the following courses:

BIOC 100A	Biochemistry and Molecular Biology	5
BIOL 100	Biochemistry	5
BME 101	Molecular Biology for Biomolecular Engineers	5
CHEM 103	Biochemistry	5

CHEM 8B is a prerequisite for BIOC 100A, BIOL 100, and CHEM 103.

BIOE 20B is a prerequisite for BIOL 100.

BME 101 is preferred.

Biomolecular Engineering

One of the following courses:

BME 105	Genetics in the Genomics Era	5
BIOL 105	Genetics	5

BME 105 is strongly recommended.

Plus all of the following courses:

BME 110	Computational Biology Tools	5
BME 160	Research Programming in the Life Sciences	6
BME 163	Applied Visualization and Analysis of Scientific Data	5

Bioinformatics concentration students may substitute CSE 20 for BME 160, although BME 160 is strongly recommended. CSE 20 has a test-out exam that will also be accepted. (**Note:** This substitution is not allowed for biomolecular concentration students.)

Statistics

STAT 131	Introduction to Probability Theory	5

Modeling and Design

One of the following:

CSE 142	Machine Learning	5
CSE 144	Applied Machine Learning: Deep Learning	5

Technical Writing

BME 185	Technical Writing for Biomolecular Engineers	5

Also satisfies the Disciplinary Communication (DC) requirement.

Elective

One of the following:

AM 115	Stochastic Modeling in Biology	5
AM 147	Computational Methods and Applications	5
BME 118	Mathematics of the Mind	5
BME 122H	Extreme Environmental Virology	5
BME 123L	Long Read Sequencing	2
BME 128	Protein Engineering	5
BME 128L	Protein Engineering Laboratory	2
BME 130	Genomes	5
BME 132	Evolutionary Genomics	5
BME 140	Bioinstrumentation	5
BME 175	Entrepreneurship in Biotechnology	5
BME 177	Engineering Stem Cells	5
BME 177L	Engineering Stem Cell Laboratory	2
BME 178	Stem Cell Biology	5
BIOC 100B	Biochemistry and Molecular Biology	5
CSE 142	Machine Learning	5
CSE 144	Applied Machine Learning: Deep Learning	5
CSE 182	Introduction to Database Management Systems	5
METX 100	Introduction to Microbiology	5
METX 140	Molecular Biology and Microbial Genetics	5
	or any 5-credit biomolecular engineering graduate course	

Graduate courses must be numbered BME 201-279.

Courses satisfying an elective cannot be used to satisfy other requirements of the major.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. BMEB majors satisfy the DC requirement by completing the following course.

BME 185	Technical Writing for Biomolecular Engineers	5

Comprehensive Requirement

All bioinformatics concentration students must complete a senior capstone project through one of the following options.

Note that the Technical Writing requirement BME 185 is a prerequisite for all capstone options. Students are responsible for ensuring that they meet the prerequisites for whichever capstone they choose.

Option 1: Bioinformatics Capstone

BME 205	Bioinformatics Models and Algorithms	5
BME 230A	Introduction to Computational Genomics and Systems Biology	5
BME 129C	Project Design and Implementation in Biomolecular Engineering III	5

Option 2: Senior Thesis

The thesis option consists of three quarters of BME 195, where students conduct research in biomolecular engineering or related field such as chemistry, biology, or biochemistry. Students pursuing the senior thesis option must write a two-page thesis proposal and seek approval of their project from

the undergraduate director in the quarter preceding the first quarter of BME 195. Students typically complete 15 credits of BME 195 during their senior year as follows: 5 credits per quarter fall/winter/spring.

BME 195	Senior Thesis Research	5

Permission code required for enrollment in BME 195. Permission code will be provided after student submits proposal (prior to first quarter of BME 195) or progress report (prior to second and third quarters of BME 195).

Exit Requirements

Students are required to submit a portfolio, exit survey, and attend an exit interview.

The portfolios must be turned in electronically as PDF files by the last day of the quarter of graduation, and will be reviewed quarterly by the undergraduate director.

Portfolios must contain the following:

- A substantial written report on a modeling/design project. This is typically satisfied by a written capstone project report.
- Slides from a substantial verbal presentation. This is typically satisfied by a capstone design presentation, Stem Cell Engineering, or other design courses.
- A research poster. This is typically satisfied by a capstone design project poster, presented at the undergraduate poster symposium.

The three parts of the portfolio should represent at least two different design projects. If a senior thesis is completed, it must be provided as the written report. If a capstone project is completed, it must be provided as one (or more) of the three submissions.

Exit interviews are scheduled during the last week of the quarter by the Baskin Engineering advising office, generally as small group interviews.

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Every biomolecular engineering and bioinformatics major must have a faculty advisor, assigned by the Baskin Engineering undergraduate advising office, and with that advisor must formulate a program of proposed coursework that meets the major requirements. The choice of capstone and electives should be made early, so that the plan can be tailored to fit in the chosen courses.

As in all engineering and science programs, it is recommended that students spread their general education requirements out over all 12 quarters. Delaying a general education requirement is safer than delaying a major requirement.

It is recommended that students reserve the summer after the junior year for undergraduate research.

Curriculum charts for the major are available on the BSOE website.

Sample Plan: Bioinformatics Concentration

Year	Fall	Winter	Spring	**Summer**
Entering				College 1A
				Summer Edge (optional)
1st (frosh)	CHEM 3A	CHEM 3B CHEM 3BL	CHEM 3C CHEM 3CL	
	MATH 19A	MATH 19B	BIOL 20A	
	College 1	WRIT 1/WRIT 1E (if needed)		
2nd (soph)	CHEM 8A	CHEM 8B	BME 105	
	AM 10	CSE 16	BME 80G	
	WRIT 2*	BME 160	AM 30	
3rd (junior)	BME 110	BME 101	BME 163	
	STAT 131	STAT 132	BME 185	
	CSE 30		CSE 101P	
4th (senior)	BME 205	BME 230A	BME 129C	
	Elective		CSE 142 or	

		CSE 144		

* WRIT 2 should be taken in or before spring quarter of the second year.

General education requirements:

CC, ER, and PR-E are not met by any courses in the program.

IM, MF, PE-T, SI, and SR are met by required courses.

TA can be met by several electives: BME 122H, BME 132, BME 177, or BME 178.

C is not met by courses in the program, but is a prerequisite for the required BME 185 course.

Transfer planner

Year	Fall	Winter	Spring	Summer
Entering				KRSG 1T Summer Edge (optional)
3rd (junior)	AM 10	BME 101	BME 105	
	STAT 131	BME 160	BME 163	
	AM 30	STAT 132	CSE 101P	
4th (senior)	BME 205	BME 230A	BME 129C	
	BME 110	CSE 142 or CSE 144	BME 80G	
	BME 185	Elective		

This transfer planner assumes that a student has completed the equivalent of CHEM 3A, CHEM 3B, CHEM 3BL, CHEM 3C, CHEM 3CL, CHEM 8A, CHEM 8B, MATH 19A, MATH 19B, BIOL 20A, CSE 16, and CSE 30 and all general education requirements, except those covered by the required courses. This planner is only a proof-of-concept that the major can be completed in another two years; each student will need to work with an advisor to tailor their own schedule.

BIOTECHNOLOGY B.A.

Information and Policies

Introduction

The Bachelor of Arts in Biotechnology is intended for students who plan to be involved in the biotechnology industry as writers, artists, ethicists, executives, sales force, regulators, lawyers, politicians, and other roles that require an understanding of the technology, but not the intensive training needed for technicians, research scientists, engineers, and bioinformaticians. (For those more technical roles, the biomolecular engineering and bioinformatics major or the molecular, cell, and developmental biology major is recommended.)

The major is deliberately designed to be paired as a double major for students in the humanities, social sciences, or the arts. Due to course overlap, the biotechnology B.A. cannot be combined with the biomolecular engineering and bioinformatics major (BMEB) B.S. or the bioinformatics minor.

Program Learning Outcomes

A biotechnology student completing the program should:

- have familiarity with several different biotechnologies;
- be able to find and use information from a variety of sources, including books, journal articles, and online encyclopedias;
- be able to write programs in Python;
- be able to communicate clearly in writing, orally, and as posters; and
- be able to apply ethical reasoning to make decisions about biotechnology in a global, economic, environmental, and societal context.

Academic Advising for the Program

The Baskin Engineering Undergraduate Advising office offers general advising for prospective and declared undergraduates majoring in Baskin Engineering programs. The office handles major declarations, transfer credits, course substitutions, articulations, and degree certifications. Undergraduate students obtain and submit all paperwork requiring departmental approval to the undergraduate advising office. Transfer students should also refer to the Transfer Information and Policy section.

Baskin Engineering Building, Room 225
bsoeadvising@ucsc.edu
(831) 459-5840

Getting Started in the Major: Frosh

Any UC-eligible student with a strong interest in biotechnology is welcome in the program. This major is not highly sequential or course intensive. Although it is advisable to begin taking courses toward the major in the first year, it is not required.

Declaration of the major can happen no sooner than the student's second quarter, and no later than the campus deadline.

Transfer Information and Policy

Transfer Admission Screening Policy

Transfer students need to have completed the following courses:

Both of these courses

BIOL 20A	Cell and Molecular Biology	5
CSE 20	Beginning Programming in Python	5

And

Statistics

	Either this course	
STAT 5	Statistics	5
	or these courses	
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2

Students with a different introductory programming course can still be accepted. Any course with C-ID COMP 112 or C-ID COMP 122 is acceptable. A course teaching Python is preferred even if it does not match either of these C-IDs. CSE 20 can be waived for students who have already completed an upper-division Python programming course.

Getting Started in the Major: Transfer Students

Successful transition to UC Santa Cruz happens with early advisor contact, preparing and submitting course descriptions for articulation purposes, and taking summer session courses prior to their first fall quarter. Specific information for transfer students is available online. Transfer students should declare their major during their first quarter at UC Santa Cruz; instructions for declaring a major at Baskin Engineering are available here.

Major Qualification Policy and Declaration Process

Major Qualification

Transfer students should refer to the Transfer Information and Policy section.

To qualify for the biotechnology major, students must have completed four of the following lower-division courses:

BIOL 20A	Cell and Molecular Biology	5
BME 5	Introduction to Biotechnology	5
BME 18	Scientific Principles of Life	5
BME 80G	Bioethics in the 21st Century: Science, Business, and Society	5
BME 80H	The Human Genome	5
CHEM 3A	General Chemistry	5
CSE 20	Beginning Programming in Python	5
ECE 80B	Engineering Innovations for Medicine and Natural Sciences	5
	Either this course	
STAT 5	Statistics	5
	or these courses	
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2

CSE 20 is waived for students who have already completed an upper-division Python programming course such as BME 160. A different introductory programming course or the CSE 20 Test Out exam are acceptable substitutes for CSE 20. Any course teaching Python will be accepted as meeting this requirement for transfer students.

Appeal Process

Students may appeal a major qualification decision by filing a petition with Baskin Engineering Advising. The appeal process is described at the Baskin Engineering Undergraduate Affairs website.

If you have further questions concerning the appeal process, please contact the Undergraduate Advising office at (831) 459-5840 or email bsoeadvising@ucsc.edu.

How to Declare a Major

Instructions for declaring a major with Baskin Engineering are on the Undergraduate Affairs website.

Students should submit a petition to declare as soon as they complete the

major qualification requirements or reach their declaration deadline
quarter (whichever comes first).

Students petitioning when the campus declaration deadline is imminent (i.e.,
in their sixth quarter, for students admitted as frosh), will either be
approved, denied, or provided with conditions (e.g., completion of some
courses with certain grades) that will be resolved within at most one more
enrolled quarter, even if they have not completed major qualification
courses.

Letter Grade Policy

Baskin Engineering requires letter grades for all courses in a major.

[Optional Catchall]

Course Substitution Policy

Please refer to the Undergraduate Affairs course substitution website for Baskin Engineering course substitution policies and about taking courses at other institutions after enrolling at UCSC. Refer to the course substitution section of the Baskin Engineering page in the catalog for overall substitution policies.

Double Majors and Major/Minor Combinations Policy

Double majoring with humanities, social science, or the arts majors is encouraged. Students considering double majoring with biology-related majors should consider a minor in bioinformatics.

Honors

Students with a GPA of 3.3 or higher in the major courses will receive Honors in the Major, unless they have been found guilty of academic misconduct.

[Optional Catchall]

Requirements and Planners

Course Requirements

Lower-Division Courses

Chemistry

CHEM 3A	General Chemistry	5
	OR	
CHEM 4A	Advanced General Chemistry: Molecular Structure and Reactivity	5
CHEM 4AL	Advanced General Chemistry Lab	2

CHEM 3A is recommended.

Note: This requirement may also be satisfied with prior completion of CHEM 1A or equivalent.

Previous to July 1, 2023, the General Chemistry series, offered by the Department of Chemistry and Biochemistry, was listed in the General Catalog as CHEM 1A, CHEM 1B and CHEM 1C, with associated laboratories CHEM 1M and CHEM 1N. As of academic year 2023-24, this series was replaced with two distinct series: CHEM 3A, CHEM 3B and CHEM 3C, with labs CHEM 3BL and CHEM 3CL; or CHEM 4A and CHEM 4B with labs CHEM 4AL and CHEM 4BL. Descriptions of these two series are given here.

Introductory

BIOL 20A	Cell and Molecular Biology	5
BME 5	Introduction to Biotechnology	5
CSE 20	Beginning Programming in Python	5

CHEM 3A is waived for students transferring in credit for BIOL 20A.

CSE 20 is waived for students who have already completed an upper-division Python programming course such as BME 160. A different introductory programming course or the CSE 20 Test Out exam are acceptable substitutes for CSE 20. Any course teaching Python will be accepted as meeting this requirement for transfer students.

For students intending to migrate from the Molecular, Cell and Developmental Biology Department (MCDB), the program will consider appropriate MCDB courses to substitute for specific biotechnology electives.

Statistics

	Either these courses	
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2
	or this course	
STAT 5	Statistics	5

STAT 7 and STAT 7L is strongly preferred.

Students may substitute STAT 131 for STAT 7 and STAT 7L, but it has several prerequisites that are not required for the major.

Biotechnology and Society

This course

BME 80G	Bioethics in the 21st Century: Science, Business, and Society	5

And one of these courses

	One of these courses	
B ME 18	Scientific Principles of Life	5

	OR	
BME 80H	The Human Genome	5
	OR	
ECE 80B	Engineering Innovations for Medicine and Natural Sciences	5

Upper-Division Courses

Biotechnology Upper-Division Core

BME 105	Genetics in the Genomics Era	5
BME 110	Computational Biology Tools	5
BME 160	Research Programming in the Life Sciences	6

Electives

Three of the following courses must be taken. We recommend that two or more of the three are BME courses.

BME 122H	Extreme Environmental Virology	5
BME 128	Protein Engineering	5
BME 130	Genomes	5
BME 132	Evolutionary Genomics	5
BME 140	Bioinstrumentation	5
BME 177	Engineering Stem Cells	5
BME 178	Stem Cell Biology	5
ECE 104	Bioelectronics	5
FMST 124	Technology, Science, and Race Across the Americas	5
FMST 133	Science and the Body	5
METX 100	Introduction to Microbiology	5
SOCY 121	Sociology of Health and Medicine	5
SOCY 123	Global and Transnational Perspectives in Science and Technology Studies	5
SOCY 127P	Sociology of Drugs, Botanicals and Pharmaceuticals	5

BME 128, BME 177, BME 178, ECE 104, FMST 133, and SOCY 127P all have additional prerequisites not covered by the major requirements.

Disciplinary Communication (DC) Requirement

BME 185	Technical Writing for Biomolecular Engineers	5

Comprehensive Requirement

The comprehensive requirement is covered by the project in the entrepreneurship course:

BME 175	Entrepreneurship in Biotechnology	5

Planners

The tables below are for informational purposes and do not reflect all university, general education, and credit requirements. See Undergraduate Graduation Requirements for more information.

Sample Plan for Incoming Frosh

Year	Fall	Winter	Spring	**Summer**
Entering				College 1A Summer Edge (optional)
1st (frosh)	BME 18 College 1	CHEM 3A BME 80H WRIT 1/WRIT 1E (if needed)	BIOL 20A	
2nd (soph)	STAT 7 STAT 7L WRIT 2**	BME 5 CSE 20	BME 105	
3rd (junior)	BME 130 BME 185	BME 110 METX 100	BME 160	
4th (senior)	BME 132*	BME 175		

*These are elective courses. Other elective courses may have prerequisites.

** WRIT 2 should be taken in or before spring quarter of the second year.

General education requirements:

C is not met by courses in the program, but is a prerequisite for the required BME 185 course.
CC, ER, and IM are not met by any courses in the program.
SR and PE are met by required courses.
SI can be met by BME 18.
TA can be met by several electives: BME 122H, BME 132, BME 177, or BME 178.

Sample Plan for Transfer Students

year	Fall	Winter	Spring	**Summer**
Entering				KRSG 1T
				Summer Edge (optional)
3rd (junior)	BME 130*			
	BME 80H	BME 160	BME 105	
	BME 5		BME 185	
4th (senior)	BME 132*	BME 175		
	BME 140*	BME 110		

*These are elective courses. Other elective courses may have prerequisites.

BIOINFORMATICS MINOR

The bioinformatics minor is intended primarily for bioinformatics tool users who are majoring in a biological or chemical specialty. The bioinformatics minor is also appropriate for computer science or computer engineering majors who are considering graduate work in bioinformatics. Due to course overlap, the bioinformatics minor cannot be combined with the biomolecular engineering and bioinformatics major (BMEB) B.S. or biotechnology B.A.

Course Requirements

Lower-Division Courses

Biology

BIOL 20A	Cell and Molecular Biology	5

Chemistry

	Either this course

BME 130	Genomes	5
BME 132	Evolutionary Genomics	5

BIOMOLECULAR ENGINEERING CONTIGUOUS BACHELOR'S/MASTER'S

PATHWAY

Because the bioinformatics concentration of the Biomolecular Engineering and Bioinformatics (BME) B.S. provides excellent preparation for a graduate program in bioinformatics, we offer a contiguous B.S./M.S. degree pathway that allows those students to complete the M.S. somewhat sooner than students with a less-tailored preparation.

The current B.S. and M.S. requirements have three courses in common:

BME 80G, Bioethics in the 21st Century*
BME 205, Bioinformatics Models and Algorithms*
BME 230A, Intro to Computational Genomics and Systems Biology*

*These courses must be passed with a grade of B- or better to meet the M.S. requirements.

In accordance with UCSC Graduate Council guidelines for contiguous five-year bachelor's/master's programs, students are required to complete 35 credits during the master's phase of the program, which may include graduate and upper-division undergraduate courses, but no more than 15 credits may be upper-division undergraduate courses. Since BME 205 and BME 230A are taken in the undergraduate phase, the credits cannot be counted toward the overall credits required by the M.S. degree.

Students must take biomolecular engineering graduate courses to fulfill the 35-credit requirement. Suitable courses are to be selected in consultation with the Biomolecular Engineering Graduate Advising Committee, the student, and the student's faculty mentor. Alternative electives may be considered with the approval of a student's faculty advisor and the graduate director.

The combined B.S./M.S. degree pathway does not make any changes to the undergraduate program nor the graduate program, except that students must pass the overlapping courses listed above for a grade of B- or better.

To apply for the combined pathway, students apply to the M.S. program through the normal graduate admission process in the fall of their senior year. If admitted into the graduate program, they are automatically included in the combined B.S./M.S. pathway.

Other Course Requirements

Graduate-Level Quantitative Science Course

Students must take one 5-credit graduate-level course focused on quantitative science. Suitable courses are to be selected in consultation with the Biomolecular Engineering Graduate Advising Committee, the student, and the student's faculty mentor.

Seminars

A minimum of three seminar courses (6 credits), including at least one quarter of the 2-credit biomolecular engineering seminar (BME 280B):

BME 280B	Seminar on Bioinformatics and Bioengineering	2

Because the intent of the seminar course requirement is to ensure breadth of knowledge, BME 281-series courses do not count as a seminar, since these are lab group meetings.

Transfer Limitations

Up to two graduate courses may be transferred from other graduate institutions with the approval of the faculty advisor and the graduate director. However, please note that students will still be required to complete 35 credits while in the graduate program at UC Santa Cruz, pursuant to UCSC's rules on minimum units for the master's degree.

Other Requirements

Bootcamp Activity

Entering graduate cohorts are encouraged to participate in the hands-on "bootcamp" just before the start of the fall quarter. Bootcamp activities include program orientation, laboratory safety training, teaching assistant (TA) training, fellowship advice, cohort building activities, practical advice for navigating graduate school, and a hands-on research project.

Further Study Outside the Department

No further courses are required. However, with faculty guidance students often choose to take upper-division undergraduate courses or graduate courses outside the department to make up for deficiencies in background areas of particular importance.

With consent of the graduate director, variations in the composition of the required courses may be approved.

M.S. Capstone Requirement

This is a Plan II capstone. Students must complete an individual project or a group project with a final written report submitted as part of the final evaluation. That project must be proposed by the student or student-group and be approved by BME faculty. Students will usually spend 2-3 quarters on the project and must include a BME faculty member for approval of the final written report. Group projects must describe in the written report a mechanism for evaluating the individual contributions of each member of the group.

Upon admission into the combined B.S./M.S. program, students should immediately seek out a BME faculty member to oversee their individual or group project. A faculty member must be identified by the first quarter of the M.S. phase.

Adequate Progress

Graduate students receiving two or more U (unsatisfactory) grades or grades below B- in courses relevant to the program are not making adequate progress and will be placed on

academic notice for the next three quarters of registered enrollment.

Graduate students who fail (unsatisfactory or lower than B-) a relevant course while on notice may be dismissed from the program. Students may appeal their dismissal. Graduate students who fail a relevant course after being removed from notice are immediately returned to academic notice.

Graduate students experiencing circumstances that may adversely affect their academic performance should consult with their advisor and the graduate director.

Applying for Graduation

All candidates for a degree must submit an Application for Master's Degree to the Graduate Division by the date stated in the Academic and Administrative Calendar for the quarter they wish to receive the degree. The deadline for degree applications is typically in the second week of the quarter. For more information about applying for graduation, visit the Baskin Engineering Graduate Studies website.

The combined B.S./M.S. degree pathway does not make any changes to the undergraduate program nor the graduate program, except that students must pass the overlapping courses listed above for a grade of B- or better.

To apply for the combined pathway, students apply to the M.S. program through the normal graduate admission process in the fall of their senior year. If admitted into the graduate program, they are automatically included in the combined B.S./M.S. pathway.

BIOMOLECULAR ENGINEERING AND BIOINFORMATICS M.S.

Introduction

The unifying theme of our research training program is using quantitative approaches to addressing fundamental questions in biology and biomedical science. The master of science (M.S.) program is designed to prepare students for careers in contemporary biomedical research settings in the biotechnology industry.

Program coursework is designed to provide the technical skills in programming and other technical skills required for independent and advanced scientific discovery. Incoming students undertake rigorous core coursework and are exposed to a rich environment of regular seminars and group meetings. Students interact closely with biomolecular engineering and bioinformatics faculty members while undertaking capstone projects (M.S.), and have firsthand access to state-of-the-art computation tools and laboratory facilities throughout their training, including cluster computing and high-throughput sequencing facilities.

Requirements

Course Requirements

M.S. students must complete a total of at least 41 credits, which may include graduate and upper-division undergraduate courses, but no more than 15 credits may be upper-division undergraduate courses.

Core courses

The following course:

BME 205	Bioinformatics Models and Algorithms	5

Plus one of the following courses:

BME 230A	Introduction to Computational Genomics and Systems Biology	5
BME 278	Stem Cell Biology	5
BME 228	Protein Design and Engineering	5

Graduate-Level Quantitative Science Course

Students must take one 5-credit graduate-level course focused on quantitative science. Suitable courses are to be selected in consultation with the Biomolecular Engineering Graduate Advising Committee, the student, and the student’s faculty mentor.

Ethics Course:

Choose one of the following courses:

BME 80G	Bioethics in the 21st Century: Science, Business, and Society	5
SOCY 268A	Science and Justice: Experiments in Collaboration	5

BME 80G can be taken to meet the ethics requirement, but the credits will not be counted toward the overall credit requirement for the M.S. since it is a lower-division course. In other words, students who choose to take BME 80G for the ethics requirement must take another 5-credit BME graduate-level course to fulfill their course credits.

Biomolecular Engineering Electives

Students must take bimolecular engineering graduate courses to fulfill the 41-credit requirement. Up to 5 credits of Independent Study or Research (BME 297A) sponsored by an individual faculty member could be used to fulfill the 41-credit requirement. In addition to these graduate courses, up to 15 credits may be upper-division undergraduate courses. Suitable courses are to be selected in consultation with the Biomolecular Engineering Graduate Advising Committee, the student, and the student’s faculty mentor. Upon approval, these courses are selected to address specific interests, cover topics specific for the capstone project, or address specific deficiencies of each student.

Seminars

A minimum of three seminar courses (6 credits total), including at least one quarter of the 2-credit biomolecular engineering seminar (BME 280B):

BME 280B	Seminar on Bioinformatics and Bioengineering	2

Transfer Limitations

Up to two graduate courses may be transferred from other graduate institutions with the approval of the faculty advisor and the graduate director. However, please note that students will still be required to complete 35 credits while in the graduate program at UC Santa Cruz, pursuant to UCSC's rules on minimum units for the master's degree.

Other Requirements

Bootcamp Activity

Entering graduate cohorts are encouraged to participate in the hands-on "bootcamp" just before the start of the fall quarter. Bootcamp activities include program orientation, laboratory safety training, teaching assistant (TA) training, fellowship advice, cohort building activities, practical advice for navigating graduate school, and a hands-on research project.

Further Study Outside the Department

No further courses are required. However, with faculty guidance students often choose to take upper-division undergraduate courses or graduate courses outside the department to make up for deficiencies in background areas of particular importance.

With consent of the graduate director, variations in the composition of the required courses may be approved.

M.S. Capstone Requirement

This is a Plan II capstone. Students must complete an individual project or a group project with a final written report submitted as part of the final evaluation. Students will usually spend two to three quarters on the project and must include a BME faculty member for approval of the final written report. Group projects must describe in the written report a mechanism for evaluating the individual contributions of each member of the group.

Upon admission into the M.S. program, students should immediately seek out a faculty member to oversee their individual or group project. The faculty member must agree to oversee the project. Should the student have difficulty in finding a faculty member, they should seek assistance from the BME graduate advisor by the end of the winter quarter. A faculty advisor must be identified by the end of the first year of the M.S. program.

Adequate Progress

Graduate students receiving two or more U (unsatisfactory) grades or grades below B- in courses relevant to the program are not making adequate progress and will be placed on academic notice for the next three quarters of registered enrollment.

Graduate students who fail (unsatisfactory or lower than B-) a relevant course while on notice may be dismissed from the program. Students may appeal their dismissal. Graduate students who fail a relevant course after being removed from notice are immediately returned to academic notice.

Graduate students experiencing circumstances that may adversely affect their academic performance should consult with their advisor and the graduate director.

Applying for Graduation

All candidates for a degree must submit an Application for Master's Degree to the Graduate Division by the date stated in the Academic and Administrative Calendar for the quarter they wish to receive the degree. The deadline for degree applications is typically in the second week of the quarter. For more information about applying for graduation, visit the Baskin Engineering Graduate Studies website.

BIOMOLECULAR ENGINEERING AND BIOINFORMATICS PH.D.

Introduction

Program coursework is designed to provide the technical skills in programming and other technical skills required for independent and advanced scientific discovery. Incoming students undertake rigorous core coursework, conduct laboratory rotations, and are exposed to a rich environment of regular seminars and group meetings. Students interact closely with biomolecular engineering and bioinformatics (BME) faculty members while undertaking their dissertation research, and have firsthand access to state-of-the-art computation tools and laboratory facilities throughout their training, including cluster computing and high-throughput sequencing facilities.

Advancement to Candidacy

Course Requirements

Ph.D. students must complete a total of at least 55 credits as described below.

Core Courses

The following courses:

BME 201	Scientific Writing	3
BME 205	Bioinformatics Models and Algorithms	5

BME 201 is typically taken as a second-year Ph.D. student, in winter quarter.

Plus one of the following courses:

BME 230A	Introduction to Computational Genomics and Systems Biology	5
BME 278	Stem Cell Biology	5

BME 228	Protein Design and Engineering	5

Graduate-Level Quantitative Science Course

Students must take one 5-credit graduate-level course focused on quantitative science. Suitable courses are to be selected in consultation with the Biomolecular Engineering Graduate Advising Committee, the student, and the student's faculty mentor.

Ethics Course:

Choose one of the following courses:

BME 80G	Bioethics in the 21st Century: Science, Business, and Society	5
SOCY 268A	Science and Justice: Experiments in Collaboration	5
