

	<b>Excellent (2)</b>	<b>Good (1)</b>	<b>Unacceptable (0)</b>
<b>Point placement</b>	Point accurately captures the structure intended	Point captures the structure intended, but may be better elsewhere	Point does not capture the structure intended
<b>Accuracy</b>	Point is consistently placed throughout the sequence	Point is placed throughout the sequence but is not consistent in its placement on the animal	Point jumps between structures throughout the sequence and does not consistently capture the intended structure
<b>Tracking throughout</b>	Point is placed on all frames	Only a frame or two missing a point	Several frames are missing points
<b>Point visibility</b>	Digitized structure can be seen throughout the entire sequence	Digitized structure can mostly be seen throughout the entire sequence	Digitized structure cannot be seen in many frames
<b>Performance/behavior</b>	Point accurately captures the intended behavior/performance	Point captures the intended behavior/performance, but may be better elsewhere or starting/ending at a different frame	Point does not accurately capture the intended behavior/performance
