

	<b>Exemplary (9-10)</b>	<b>Acceptable (6-8)</b>	<b>Developing (3-5)</b>	<b>Unacceptable (0-2)</b>	<b>Score</b>
Organization/ Mechanics	The annotated bibliography is very well organized. The flow is very clear. There are no grammar/spelling mistakes. Citations are clearly listed in APA format and provided. Not just links to websites, but full citation including journal title, volume and page numbers.	The annotated bibliography is well organized. The flow is clear. There are few grammar/spelling mistakes. Citations are listed in APA format and provided. Some are links to websites, not providing the full citation including journal title, volume and page numbers.	The annotated bibliography is not clearly organized. The flow is not clear. There are many grammar/spelling mistakes. Citations are not all listed in APA format or provided. Most are links to websites, not providing the full citation including journal title, volume and page numbers.	The annotated bibliography is not organized. The flow is not clear. There are many grammar/spelling mistakes. Citations are not listed in APA format or provided. Most are links to websites, not providing the full citation including journal title, volume and page numbers.	
Articles	Ten articles are provided. The articles are from the primary literature (peer review, scientific journals)	Ten articles are provided. Not all of the articles are from the primary literature.	Ten articles are not provided. Many of the articles are from sources other than the primary literature, including websites or popular press articles (e.g., National Geographic or Scientific American)	Fewer than 5 articles are provided. Almost all of them are from sources other than the primary literature, including websites or popular press articles (e.g., National Geographic or Scientific American)	
Article Relevance	All of the articles used are directly related to the project and class material. They support the project, clearly provide additional source of information, and present methods or results in line with course material.	Most of the articles used are related to the project and class material. They support the project, clearly provide additional source of information, and present methods or results in line with course material.	Some of the articles used are related to the project and class material. Some support the project, provide additional source of information, and present methods or results in line with course material. However, some articles are more tangentially related to the project or course material.	Most of the articles used are not related to the project and class material. They do not support the project, provide additional source of information, and present methods or results in line with course material. The topics of the articles are outside the scope of the project or class.	
Article Summary	The summary of the article clearly provides a synopsis of the goals of the study, a brief overview of the methods, and the relevant results. It is clear to the reader what the article was about and what the authors found.	The summary of the article provides a synopsis of the goals of the study, a brief overview of the methods, and the r results. It is mostly evident to the reader what the article was about and what the authors found, although detail is lacking.	The summary of the article does not clearly provide a synopsis of the goals of the study, a brief overview of the methods, or the relevant results. It is somewhat evident to the reader what the article was about and what the authors found.	The summary of the article does not provide a synopsis of the goals of the study, a brief overview of the methods, or the relevant results. It is not evident to the reader what the article was about and what the authors found.	
Article Synthesis	There is a clear synthesis of the articles, including its relation to the other articles as well as the research project. Multiple sources are clearly used to develop new ideas related to the research project.	There is a synthesis of the articles, including its relation to the other articles as well as the research project. Several sources are clearly used to develop new ideas mostly related to the research project.	There is a not a clear synthesis of the articles, including its relation to the other articles as well as the research project. Only a few sources are clearly used to develop new ideas mostly related to the research project.	There is a not a synthesis of the articles, including its relation to the other articles as well as the research project. The sources are not used to develop new ideas mostly related to the research project.
