## STATEMENT OF PURPOSE

The study of international affairs as an academic discipline no longer belongs exclusively to the specialists in that field; rather, its scope has been extended to include the work of other related disciplines in recognition of the fact that international problems are not exclusively political in nature. It is the purpose of this journal to speak on matters involving international problems with many academic voices. More important, it is the purpose of this journal to permit undergraduate students to try their wings in describing, analyzing, and possibly suggesting solutions to the problems that have vexed nations in their contacts with each other.

The underlying premise of this journal is that undergraduate students *can* contribute effectively to a reasoned, moderate, academic analysis of international problems and that such contributions will have a more profound effect on the study of international affairs as well as on the student contributors to this journal than the passionate, partisan, and emotionally charged outbursts which have lately permeated American campuses.

Consequently, the *Journal* invites contributors to take an active interest in this publication. It encourages students as well as members of the Towson State faculty and the students and faculty from other campuses to contribute articles, reviews, and other pertinent materials.
